JUN 22 1923

MINUTES OF MEETING - June 22, 1923.

A regular meeting of the State Highway Commission was held at the offices of the Commission, Broad Street Bank Building, Trenton, Friday, June 22, 1923. The meeting was called to order by Chairman Scott at 10:30 A. M.

Present: Gen. H. L. Scott, Chairman, Messrs. Percy H. Stewart, Walter Kidde and Abraham Jelin.

Minutes Approved. ✓

All members of the Commission reported having read carefully the minutes of the meetings of, April 3, 1923, April 4, 1923, April 5, 1923, April 11, 1923, April 13, 1923, April 17, 1923 April 24, 1923April 26, 1923, May 3, 1923, May 8, 1923, May 11, 1923, May 15, 1923, May 17, 1923, May 29, 1923 and June 5, 1923. and Mr. Stewart thereupon moved that all of the minutes, beginning with those of April 3, 1923, and including those of June 5, 1923, be approved by the State Highway Commission as mailed. This was seconded by Mr. Jelin and unanimously adopted.

Right of Way Route #16. ✓

Chairman Scott reported that in company with Right of Way Engineer Meeker, he had visited the proposed improvement between Bernardsville ~~Blesser's Corner~~ and Van Doren's Mills, on Route #16, Section #6A, to look over parcels of land needed for the state for right of way purposes. He reported that all of the property owners made reasonable requests for their property with the exception of William Childs Jr., and Nina Childs, where, in his opinion, excessive amounts have been asked. Commissioner Stewart moved that the report be received and that the Right of Way Department be instructed to secure appraisers in order that proper offers may be made to the owners of property on Route #16, Section #6A, and in the event of refusal, that condemnation proceedings may be instituted. This was seconded by Mr. Kidde and adopted.

Route #18, Hearing.

Chairman Scott reported that in company with Mr. Kidde he had conducted a public hearing at Hackensack, on Wednesday, June 20th, looking toward the taking over of Route #18, from its intersection with the New York State Highway Route #3, to the Dikeman Street Ferry at Edgewater, and he felt that the Board of Freeholders were in accord with the views of the State Highway Commission in this connection. General Scott further advised that Judge Seuffert appeared at this hearing and asked that the funds which would be applied on Route #18, be applied for the completion of Route #10, south, and he had informed the meeting that the Route #18 proposition could not be abandoned/

Commissioner Kidde advised that Mr. Watson G. Clark, Borough Engineer of Tenafly, who was present at this meeting, had advised that he had already prepared plans and notes for a large portion of the section through which Route #18 would travel, and he offered to dispose of these notes and surveys to the State Highway Commission. Commissioner Jelin suggested that in order to secure the notes of Mr. Clark, that arrangements might be made for his employment as a special engineer for the specific purpose of laying out this route. After discussion Commissioner Stewart moved that the State Highway Engineer make an investigation of the notes of Mr. Clark and ascertain the value at which they are placed, and make a report to the Commission at a later meeting.

INCREASES.

The State Highway Engineer next presented to the Commission his recommendation for increases in the several divisions of the State Highway Department, effective July 1, 1923. He explained that the total averages were only slightly in excess of 3% of the annual payroll, and that there were no increases granted to employees who had received promotions within the last twelve months. The Commission considered the recommendations carefully of each Division. Commissioner Kidde inquired as to what disposition was being made of increases for Division Heads, and State Highway Engineer Sloan recommended that increases of 10% be granted to the

Assistant State Highway Engineer, Chief Clerk & Secretary and Construction Engineer. Commissioner Kidde further inquired as to what disposition would be made of men who have given efficient service and who would reach their twelve months period very shortly. State Highway Engineer Sloan advised that he was prepared to recommend that where employees are within three months of a twelve months period of service since their last promotion that these men should be given promotion upon his approval at that time. Commissioner Stewart moved that the recommendation of the State Highway Engineer for increases in the several Divisions of the State Highway Department be approved, effective July 1, 1923, and that a list of of increases be made an addenda to the minutes of this meeting. This was seconded by Mr. Jelin and adopted. Commissioner Kidde moved that an increase of 10% be granted to the Chief Clerk & Secretary, to the Assistant State Highway Engineer and to the Construction Engineer, effective July 1, 1923. This was seconded by Mr. Jelin and adopted.

Committee on Increases. ✓

Commissioner Jelin suggested that a committee be appointed to see the Civil Service Commission with regard to the approval of increases granted. On motion by Mr. Stewart, seconded by Mr. Kidde, the State Highway Commission directed that Commissioner Jelin be appointed a committee of one for the purpose of taking up the increases granted, with the Civil Service Commission.

Advisory Board. ✓

State Highway Engineer Sloan reported to the Commission that a meeting of the Advisory Board on the study of Vehicular Tunnel Traffic routes was held on June 6th, last, and the work progressed to the extent of laying down a tentative line through Jersey City and Newark, on which routes traffic count was also determined. Since that time traffic counts have been going on and a party is in the field making an accurate survey of the line through Jersey City around Newark and Elizabeth. The next meeting of this Board will be on the 27th of June. Chairman Scott questioned whether considerations were given to a route which would serve for the next twenty-five years. Major Sloan expressed the opinion that the plan proposed would serve for fifteen years.

Commissioner Kidde advised that he would favor a comprehensive scheme which would cover a period of at least twenty-five years, and he would await with interest the report of the Special Advisory Board.

Camden Bridge. ✓

Chairman Scott inquired as to what progress was being made with the bridge traffic routing in Camden, and the Secretary informed the Commission that it had been decided to defer the appointment of any Advisory Board on the Camden Situation until the Camden City Planning Commission has completed its plans. Commissioner Kidde inquired as to progress being made on the parallel route for shore traffic to Keyport. State Highway Engineer Sloan reported that there was a party in the field making survey and as soon as this report is presented, the Advisory Board on shore traffic study would be called together. Commissioner Kidde reported that he had an opportunity to meet Mr. Ford, who was a member of the Port Authority Commission and was familiar with the scheme for the unloading sheds on the meadows between Jersey City and Newark, as planned by the Railroads, from which terminals supplies would be carried into New York by trucks from the railroads, and he suggested that in the event that this question is taken up by the Special Advisory Board, Mr Ford be invited to serve with the Advisory Board.

Raritan River, ~~Bridge~~. ✓
New Brunswick Bridge.

Chairman Scott called attention to the proposed new bridge over the Raritan River at New Brunswick, where it was proposed to place approaches on lands now owned by the Woman's College of the State. State Highway Engineer Sloan advised that the Engineering Department was proceeding along the original lines and making suggested provisions for bridge approaches for the new bridge on the site of the Woman's College. Commissioner Stewart stated that in view of the fact that the State Has advinced large sums of money for the college and its grounds, it will be a mistake to place the new bridge so that traffic would come as close to the buildings as was proposed. Commissioner Kidde advised that there was a precedent for a change in line in view of the moving of Route #10 off the Bluff Road. Chairman Scott stated that in this case there were no buildings, as yet, on the ground and that any buildings that might be put up could be be arranged so that they would not be too close to the bridge when the same was finally decided upon. Commissioner suggested that a hearing be conducted at New Brunswick, at which time the College Authorities, the City Authorities and th State Highway Department be present in order that the entire matter might be disposed of to the satisfaction of all concerned. Commissioner Kidde stated that before this hearing was held that alternative plans should be prepared by the Engineering Department for consideration at that time, and he moved that the Engineering Department prepare alternative diagrams showing the necessities of the case in connection with the construction of a new bridge over the Raritan River at New Brunswick, and that following this a hearing be held between the City Authorities of New Brunswick, the Authorities of the Woman's College of New Brunswick and the State Highway Engineer. This was seconded by Mr. Jelin and adopted.

Absecon Boulevard.✓

The Secretary informed the Commission that Mr. A. F. Nelson, County Engineer of Atlantic County, was present and desired a hearing. On motion, duly seconded, a hearing was granted. Mr. Nelson appeared and stated that Atlantic County was awaiting action of the State Highway Commission on the plans and specifications for the Absecon Boulevard, in Atlantic County, work to be done under State Aid, if same was available, or County funds if same was rejected by the State Highway Commission.

Commissioner Jelin reported that at a conference between Commissioner Stewart and himself, on Tuesday last, consideration had been given this matter and it was decided to reject the plans and specifications, not only because of lack of funds, but because it was considered by the Commission that the type of pavement named therein would cost $1.00 to $1.30 per square yard more than a sheet asphalt pavement. Commissioner Kidde stated that he felt that while the County Board of Freeholders was within its rights in preparing specifications for asphalt block pavement, yet it was the duty of the State Highway Commission to place itself on record as being opposed to the higher cost of this pavement, and he moved that plans and specifications presented by Atlantic County for Absecon Boulevard, be rejected by the State Highway Commission, said rejection being due to lack of funds; and that there be attached to this rejection a copy of the following memorandum as prepared by State Highway Engineer Sloan, covering the cost of asphalt block as compared with the other equivalent types of pavement.

June 12, 1923.

"Under date of June 4th, Mr. A. H. Nelson, County Engineer, wrote to this office stating that the Board of Freeholders would act on the plans and specifications for the reconstruction of the Absecon Boulevard on the 13th inst., and if approved, they would be ordered sent to the State Highway Commission.

"He further stated that if the State Aid was not available, the County would ask the State to reject the plans and specifications because of lack of funds so that the County could finance the job from its own funds. He was advised that there were no funds available for this work, and that the matter would be presented to the State Highway Commission when he was ready to have action taken.

"Reference was made in the letter which you forwarded me this morning of the use of asphalt block for this purpose. A standard form of construction of asphalt block is to provide a concrete foundation of a minimum of 6 in., a cement mortar cushion of 1/2 inch; the 2" blocks are then laid on the cement mortar cushion.

"Nassau Street, Princeton was made of this form of construction under specifications prepared by the State, the work being done in 1915 and 1916. One section is now seven years old and the other eight; the pavement is in very good condition and has given excellent service.

"The objection, however, to it is that it is expensive, and while it is not a patented pavement, it is manufactured, so far as I can determine, by only one company: the Hastings Paving Company, New York.

"The Township of Maplewood in Essex County received bids April 3, 1923, for improvement of Valley Street in that Township. The bid on asphalt block, including the concrete foundation was $4.55 per square yard. This included a 6" concrete base, 1/2" received in competition with granite block and concrete pavements; the lowest price bid on the asphalt block was $4.44 per square yard, and the highest $4.60.

"The State received no bids this year on construction of sheet asphalt on concrete foundation but we have records of nine jobs on which bids were received by various counties and municipalities. The prices for 6" foundation and 3" sheet asphalt surface on these nine jobs range from $3.10 to $3.55 per square yard. On Springfield Ave., New Providence, Union County, 1-3-5 concrete foundation, 6" in depth, $1.76 was bid; on 3" sheet asphalt, $1.61 per square yard. Ackerman Avenue, Passaic County, same mix and depth, $1.60 for concrete foundation, and $1.70 for sheet asphalt surface.

"Sheet asphalt on concrete foundations has been standard form of construction in cities for more than twenty-five years; it has given satisfaction, and is still a standard method of construction. In view of the competition that can be obtained by specifying this type of construction, and considering the service rendered by this type of pavement, I can see no justification for paying $1.00 to $1.30 more per square yard for asphalt block pavement.

Respectfully submitted.
Assistant State Highway
Engineer."

This was seconded by Mr. Jelin and adopted.

The Commission next took up for consideration the schedule of business as prepared for the meeting of June 19, as follows.

Barber Asphalt Co., Award.

The State Highway Engineer reported that two bids were received for asphalt cement emulsion materials to be used by the Maintenance Department and recommended award to the Barber asphalt Company, they being the lowest bidders. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission approved the recommendation of the State Highway Engineer and awarded contract for asphalt cement emulsion to the Barber Asphalt Company, at their's the lowest bid in the total amount of $21,149.65.

Salem County Repairs.

On recommendation of the State Highway Engineer, Mr. Jelin moved that the State Highway Commission approve specifications and contract for asphaltic treatment of roads in Salem County, work to be done in accordance with Motor Vehicle schedule. This was seconded by Mr. Stewart and adopted.

Extension of Time, Rt. 8, Sec.5.

State Highway Engineer Sloan recommended an extension of time on Route #8, Section #5, to July 16, 1923, due to a considerable number of changes in plans, and additional work authorized. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission approved an extension of time to Kavanaugh & Van Keuren, on Route #8, Section #5, to July 16, 1923.

Morris County Traction Company.

State Highway Engineer Sloan reported in connection with the action of the Commission on the 14th inst., relative to the notification of the Town of Morristown and the Morris County Traction Company on the matter of paving of Speedwell Avenue, that letters covering this action had been forwarded to the Attorney General's Department to ascertain whether the subject matter is in proper legal form. On motion by Mr. Stewart, duly seconded the action of the State Highway Engineer was ordered ratified and confirmed.

Amboy Bridge Plan Deposit.

State Highway Engineer Sloan recommended to the Commission that they give consideration to a change in the action of the former State

Highway Commission relative to deposits for plans for the proposed work on the Perth Amboy Bridge; the former Commission directing that all deposits of $100.00 be returned if the plans are in good condition. On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission ordered the action taken by the former State Highway Commission rescinded, and directed that where plans are taken out, a deposit of $100.00 be requested by the State Highway Department, all of this amount to be returned in the event the person taking the plans is a bidder on the work, and $50.00 to be returned in all other instances where plans are brought back in good condition.

Route #2, Section #3A, Accepted.

State Highway Engineer Sloan recommended the acceptance of Route #2, Section #3A, White Horse to Crosswicks Creek Bridge, Mercer Co., work done under the Reimbursement Act. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission approved the acceptance of Route #2, Section #3A, White Horse Crosswicks Creek Bridge, in accordance with the Reimbursement Act.

Condemnation-Rt., #2, Sec., #5.

State Highway Engineer Sloan reported that it would be necessary to condemn the property of Mr. Chas. Heiser on Route #2, Section #5, Bordentown-Crosswicks Creek, since he refused to accept a tentative offer of $1,000.00 for the land and damages thereto, and he further advised that this land was on right of way for land needed for a contract already under way. On motion by Mr. Jelin seconded by Mr. Stewart, the State Highway Commission approved of the condemnation of the property of Mr. Chas. Heiser Route #2, Section #5 and adopted the following resolution of condemnation:

> RESOLVED, that this Commission hereby determines to acquire in the name of the State of New Jersey, for public use in the construction of State Highway Route #2, Section #5, Bordentown-Crosswicks Creek, ALL that certain Lot, tract or parcel of land and premises, situate, lying and being in the State of New Jersey, and more particularly described as follows:

PARCEL #2

BEGINNING at a point on the easterly side of the Bordentown-Trenton Road known as State Highway Route #2, Section #5, said point being distant thirty-three (33) feet from and at right angles to the center line of the said State Highway at Station 105 plus 64.96, as shown on plans dated May 15, 1923, said points also being in the line dividing lands of Chas, Heiser on the South and lands of Patrick Martin, Est. on the north, and running

Thence (1) South three degrees and fifty-two minutes West, five hundred and twenty-three feet and fifty-one one-hundreths of a foot (523.51) to a point in the land of Chas. Heiser;

Thence (2) South no degrees, seventeen minutes and thirty seconds East, one-hundred and seventy-nine feet and twenty-five one hundreths of a foot (179.25) to a point;

Thence (3) South four degrees, thirty-one minutes and thirty seconds East, six hundred and fifteen feet and eighty-four one-hundreths of a foot (615.84) to a point;

Thence (4) South nine degrees, fifteen minutes and thirty seconds East, one hundred and thirty-nine feet and thirteen one-hundredths of a foot (139.13) to a point;

Thence (5) South nineteen degrees, two minutes and thirty seconds East, two hundred and four feet and four one-hundreths of a foot (204.04) to a point; said point being distant one hundred and five feet and forty-eight one-hundreths of a foot (105.48) from the intersection of the center line tangents at Sta., 1389 plus 67.16, as measured along a line having a bearing of South sixty-nine degrees, forty-two minutes and thirty seconds East, as shown on accompanying plan and running

Thence (6) North fifty-four degrees, forty-three minutes and thirty seconds West, ninety-three feet and seventy-four one-hundreths of a foot (93.74) to a point;

Thence (7) North ten degrees, three minutes and thirty seconds West, one hundred and forty-nine feet and sixteen one-hundreths of a foot (149.16) to a point in the existing fence line along the easterly side of the said Bordentown-Trenton Road;

Thence (8) along said fence line, North four degrees, thirteen minutes and thirty seconds West, eight hundred and seventy-five feet and sixty-four one-hundreths of a foot (875.64) to a point;

Thence (9) still by said fence line, North three degrees and fifty-five minutes east, three hundred and forty-five feet and seventy-four one-hundreths of a foot (345.74) to a point;

Thence (10) still by said fence line, North six degrees and fifty-four minutes East, two hundred and thirty-one feet and seventy one one-hundreths of a foot (231.71) to a point in the above mentioned dividing line between Patrick Martin Est., and Chas Heiser, thence along this dividing line;

Thence (11) South seventy-four degrees and six minutes East, thirteen feet and four one-hundreths of a foot (13.04) to the point or place of Beginning; containing 0.954 acres, more or less.

The State Highway Engineer is hereby authorized and directed on behalf of this commission, to make an offer to the owners or owner of said lands and premises for the conveyance of the same to the State of New Jersey free and clear of all encumberances, and, upon the failure of such owner or owners to accept such offer, or if for any other reason said lands and premises cannot be immediately acquired by agreement with such owners or owner, then the Attorney General of the State of New Jersey is hereby authorized and directed to institute condemnation proceedings for the acquisition of said lands and premises.

Inspectors Re-appointed.

The State Highway Engineer recommended the re-appointment of the following inspectors effective June 14, 1923, at the salaries which they received prior to the recent examination; all of these men having passed one of the examinations as arranged; it being the recommendation of the Construction Engineer that there be no demotions among the present inspectors employed.

On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission approved of the employments as recommended by the State Highway Engineer.

Bids at Newark. ✓

Chairman Scott directed the attention of the Commission to an article appearing in the Newark Evening News, concerning bids received by the City of Newark for paving work on sheet asphalt, which appeared to show a completed pavement at $3.18. This was the same type of pavement as the Morris County Board of Freeholders desired to award at the price of $3.85 per square yard on East Main Street, Boonton.

Recess.

On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission recessed for luncheon at 12:30 P.M., to meet in regular session at 2:00 P. M.

The State Highway Commission reconvened at 2:00 P.M. as agreed with the same members present as at the morning session.

Route #18. ✓

The Secretary reported to the Commission that there would be a verbatum report prepared of the hearing held at Hackensack, on

June 20th concerning the taking over of State Highway Route #18, south to the Englewood approach. This was for information only.

Hunterdon County Chapter #10.

The Secretary reported on the conference held on Tuesday, June 19th, by Commissioners Stewart and Jelin, with the Board of Freeholders of Hunterdon County, and the City authorities of Lambertville, looking toward the amicable adjustment of differences between the County and the municipalities, under the operation of Chapter 10, Laws of 1919, as applied to the work in the municipality. Commissioner Jelin advised that at this hearing it appeared that the City of Lambertville had acted entirely according to law; having the work proceed over a five-year period instead of a ten-year, since this would give them a greater bond issue from which to do other important connecting links through the City of Lambertville. Commissioner Jelin reported further that it had been proposed that the City of Lambertville proceed under the five-year term for 1922, 1923, and 1924, and thereafter under a ten-year provision until the entire work was paid for; the State Highway Commission to allot to Hunterdon County a sufficient sum each year for 1922, 1923 and 1924 to meet the extra cost of work in Lambertville and Hampton. Commissioner Jelin advised that the sum spoken of at the hearing was a total of $15,000 for the three years, to be allotted by the State, Commissioner Kidde suggested that when this amount is paid by the State that a release be furnished by the County that there will be no further payments asked. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission approved of the recommendation of the State Highway Engineer for the apportionment to Hunterdon County of the sum of $15,200.00 for the years 1922 and 1923 on account of work being done in Lambertville and Hampton, and that a further allotment be made from the 1924 funds when they become available for this work, subject to a written agreement between the County of Hunterdon, the City of Lambertville and the Boro of Hampton, that the State Highway Commission will be released from any further payments on this account after 1924, this extra allotment to be $7,000.00 in 1924.

New Amboy Bridge. ✓

The Secretary reported that a conference had been held on June 19th, between Commissioners Stewart and Jolin and Assistant Attorney General Newcorn, with reference to the procedure in acquiring property for the new Amboy Bridge. A verbatum report of this report was presented but no action was taken at this time.

Route #1, Hackensack Bridge Property. ✓

State Highway Engineer Sloan reported to the Commission that following directions given at a former meeting he had requested the Right of Way Department to consult Mr. Schlessinger, Real Estate expert of Newark, with referance to making an appraisal of property being used on Route #1, at the Hackensack River Bridge. The appraisal submitted was signed by Mr. Schlessinger and Mr. Van Dearen and fixed the rental of the property at $5,000.00, and the total purchase price at $50,000.00. On motion by Mr. Stewart, seconded by Mr. Kidde, the State Highway Commission directed that Right of Way Engineer Meeker be present at the next meeting in order to outline the manner of obtaining appraisals for the Hackensack River Bridge property. The Commissioners discussed the conditions existing at the Hackensack River Bridge and Commissioner Stewart suggested repairing the old Hackensack River Bridge and the making of a new temporary structure. He was informed that the War Department would not permit of draw bridges as close as these two, nor would either structure be able to carry the traffic for a very long time.

Maps. ✓

Commissioner Kidde directed attention to the maps being prepared for the State Highway Commission, and asked that the printing of same be expedited as quickly as possible and that a supply be purchased by the State Highway Commission with the State Highway Commissioners names imprinted thereon.

Bridge Painting. ✓

Commissioner Stewart again spoke of the Hackensack River Bridge and brought out the fact that he understood that proper painting would save the State Highway Commission a considerable item on its bridge construction. State Highway Engineer Sloan informed the Commission that the Bridge Division had a bridge-painting gang in continual operation. Commissioner Kidde called attention to the fact that the average life of a steel bridge structure is placed at forty years.

License Fees. ✓

Mr. Kidde directed attention to a news item calling attention to the report of the New York Central Railroad, in which it was stated that heavy State taxes are being paid by the railroads for the purpose of improving State Highways, which enables motor trucks to compete with the railroads. Commissioner Jelin stated that it was his feeling that motor trucks should pay considerably larger license fees than they do at the present time, and that such a license fee should be graded so that there will be a wide difference between trucks from one to three tons capacity, from three to five tons capacity and from five tons up, in order that there might be discouraged the tendency of very heavy trucks plus heavy trailers.

Reports. ✓

The Secretary reported to the Commission that in view of the fact that so much time has elapsed since the first of January, that consideration should be given to the elimination of the publication of the Annual Report for the period from July 1, 1921, to December 31, 1922, in view of the desire of the Governor that reports be curtailed as much as possible. Commissioner Jelin moved that publication of the State Highway Commission report covering period from July 1, 1921, to December 31, 1922, be eliminated in view of the fact that this report was prepared for the Legislature and the Legislature had adjourned and it is no longer needed; it being understood that all the material for this report has been compiled and is on file in the office of the State Highway Department. This was seconded by Mr. Stewart and adopted.

Phillipsburg - Belvidere Road. ✓

The Secretary presented a communication from the Board of Freeholders of Warren County forwarding resolution requesting the State Highway Commission to approve of the road via Phillipsburg-Belvidere to Route #5, and from the Delaware River Bridge in Belvidere, to connection with the above, to be included in the 7% system for Federal Aid, and further requesting that aid be granted on other sections of this road beyond 1923; and further rescinding any action taken looking toward the improving of a section of the Phillipsburg-Belvidere road under the provisions of chapter 10.

On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission directed that any previous action taken in the case of Warren County procedure under Chapter 10 be rescinded, and that the State Highway Commission approve of a request being made upon the Federal Government for the inclusion of the road from Phillipsburg via Belvidere to State Highway Route #5, and from the Delaware River Bridge in Belvidere to a connection with the above road, a distance of about 13½ miles in the 7% Federal Aid System; it being the purpose of the State Highway Commission to make every effort for securing Federal Aid upon sections of this road other than that included in the request for construction in 1923; this, however, being no guarantee as to funds.

Attorney General's Opinion.

The Secretary presented a report from the Attorney General in response to a request for advice by Morris County as to extension of contract for road repairing materials, in which opinion the Attorney General ruled that the County of Morris could not extend last year's contract but should re-advertise in accordance with the terms of the Mathis Road Act. On motion by Mr. Stewart, seconded by Mr. Jelin, the State Highway Commission directed that the Secretary communicate with the Morris County Board of Freeholders advising them of the decision of the Attorney General.

Asbury Park Paving.

The Secretary presented a communication with resolution, from the Board of Commissioners of Asbury Park, requesting that the State Highway Commission join with the City of Asbury Park in paving Main Street from Asbury Avenue northerly to Deal, connecting with the bridge to a full width of 60 feet, the State Highway Commission agreeing to pave 18 feet each side of the trolley tracks which are to be repaved by the City of Asbury Park. In this resolution it was cited that there was an understanding between the State Highway Commission and the Asbury Park authorities. Commissioner Stewart stated that as far as he knew there was no verbal understanding or agreement and the same opinion was shared by all the Commissioners. On motion by Mr. Jelin, seconded by Mr. Stewart, the matter was referred to the State Highway Engineer for communication with the Asbury Park Authorities with further reference to this matter.

Pole Painting. ✓

The Secretary presented a communication from Hon. Joseph Thompson, Attorney for the Cape May Light & Power Co., agreeing in accordance with the request of the State Highway Commission at its last meeting, that poles will be painted white eight feet from the ground in consideration of the permission to erect same.

Route #9, Detour at Main Street, Hampton. ✓

The Secretary presented a communication from the Borough of Hampton, in Hunterdon County, requesting aid in the maintenance of Main Street, Hampton, a connecting link on the detour for Route #9, as advertised. State Highway Engineer Sloan reported that this work would cost approximately $1,500.00 to $2,000.00, and Commissioner Jelin moved that the Maintenance Division provide for the maintenance of detour for Route #9, through Main Street, Hampton, at the same time it was to do its work on the Hampton-Glen Gardner detour. This was seconded by Mr. Stewart and adopted.

Amiesite. ✓

The Secretary presented a communication from the North Jersey Amiesite Company, requesting further consideration of the Amiesite material for competition with other bituminous pavements. On motion duly seconded, the communication was ordered received and placed on file.

Sidewalks. ✓

The Secretary presented a communication from H. B. Keasby, County Engineer of Salem County concerning the matter of sidewalks on the proposed new bridge over the West Jersey & Seashore R. R. at Woodstown, where the State Highway Route crosses. Mr. Keasby advised that he felt that if sidewalks are not put on this bridge serious injury may result to pedestrians using the roadway. Commissioner Jelin moved that the matter of placing sidewalks on bridges be again reviewed with the Attorney General by a State Highway Commissioner and the State Highway Engineer, and that Mr. Keasby be advised that arrangements will be made on this bridge for pedestrians to walk. This was seconded by Mr. Kidde and adopted. Commissioner Kidde expressed the opinion that the State Highway Commission should not permit any situation to exist on the State Highways which would be dangerous to the public.

Detour Route #13. ✓

The Secretary presented a communication from the Princeton Chamber of Commerce recommending a detour during the construction of Route #13, between Trenton and Princeton. Commissioner Jelin moved that the recommendation be received and referred to the State Highway Engineer for report at the next meeting. This was seconded by Mr. Stewart and adopted. The Secretary was further directed to communicate with the Chamber of Commerce of Princeton and advise that this matter will be given attention.

Bond Issue ✓

Resolutions.

The Secretary presented a communication from the New Jersey Automobile Trade Association with a resolution advising that the Association goes on record as opposed to the issue of short term bonds for road and bridge purposes, and asked that future bonds be issued for longer terms. Commissioner Kidde moved that the resolution be received and that a communication be forwarded advising that the matter of State Highway Bond issuing has been very thoroughly gone into and that the question of building additional highways should be treated as a new project and be given consideration at future Legislation.

Route #13, Princeton - Trenton. ✓

State Highway Engineer Sloan brought to the attention of the Commission the matter of reconstruction of Route #13, between Trenton and Princeton, and advised that it was proposed to let this contract in such a manner as to permit of its completion before the close of the present construction year. There was, however, a controversy between the Department and the Trenton & Mercer County Traction Company concerning the moving of tracks for about a mile through the Town of Lawrenceville; it being the contention of the Trolley Company that the franchise of the company provides for the tracks to remain in their present position and does not require that they be moved. State Highway Engineer Sloan reported that the agreement which the Trolley Company should enter into was; First, that they will permit the tracks to be moved by the State Highway Department to the center of the road. Second: That they will furnish new rails and track material provided the State Highway Commission will finance the cost of same over a period of two years, and Third: That any question as to the payment for the pavement between the tracks would have to be left for determination after opinion from the Attorney General. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission approved of the form of agreement as recommended by the State Highway Engineer.

Automobile Purchase.

State Highway Engineer Sloan recommended that the State Highway Department be authorized to expend not in excess of $1,500.00 to equip the chassis of the Cadillac car "A" recently received from the Government as War Surplus Material, with a closed seven-passenger body, or that the painting of the present body be completed and the car traded for a new seven-passenger closed car not to exceed $2,500.00 additional. Commissioner Jelin moved that the State Highway Commission approve the purchase of a seven-passenger closed automobile, there being traded in, the car "A" recently received from the Federal Government, for the purchase not to exceed $2,500.00.

Route #11.

State Highway Engineer Sloan presented to the Commission a report on his investigation of Route #11 as referred to him at a previous meeting. He advised that in this investigation it was shown that of the total length of 46,000 feet on Route #11, 22,000 feet lies outside of cities having a population of less than 16,000, and this latter amount of road is capable of being taken over as a State Highway. He recommended that the request of the town of Bellville for paving through the Town be received and inasmuch as it has a population under 16,000 that a statement be requested together with a statement from the County of Essex as to whether or not they are prepared to proceed with the paving between the rails of the trolley line as requested by the franchise of the trolley company and for the placing of curbs and gutters beyond the width of pavement which the State could undertake to place. On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission accepted the report of the State Highway Engineer and directed that the Secretary notify the County of Essex and the Town of Bellville in accordance with the recommendations of the State Highway Engineer.

Delia Bridge, Route #10, Section #2.✓

State Highway Engineer Sloan recommended to the Commission the approval of plans and specifications for bridge on Route #10, Section #2, at Delia Ave. M.P. 9.9. On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission approved of the following resolution:

> RESOLVED, that the State Highway Commission does hereby approve of plans and specifications for the construction of bridge at M. P. 9.9, at Delia Avenue on Route #10, Section 2, in Bergen County, and
>
> BE IT FURTHER RESOLVED, that the Chairman is directed to approve the necessary plans and specifications and the Secretary is directed to place advertisement for the same.

Trolley Crossing Bridge, Rt. 10, Section #2.✓

State Highway Engineer Sloan presented plans and specifications and recommended approval of a bridge at M. P. 10.0 at the trolley crossing on Route #10, Section #2, Bergen County. On motion by Mr. Kidie, seconded by Mr. Stewart, the State Highway Commission approved of the following resolution.

> RESOLVED, that the State Highway Commission does hereby approve of plans and specifications for the construction of bridge at M. P. 10.0 at the trolley crossing on Route #10, Section #2, in Bergen County, and
>
> BE IT FURTHER RESOLVED, that the Chairman is directed to approve the necessary plans and specifications and the Secretary is directed to place the advertisements for the same.

Route #10, Section #3.✓

State Highway Engineer presented to the Commission a report on the completed contract of J. J. McGarry, for Route on Route #10, Section #3, Little Ferry-Ridgefield Section. This report advised that the surface of part of the work between stations 92 and 204 has been damaged by frost action, but the cores taken indicate that the pavement is of the required depth and except for slight surface damage the concrete is of good quality. He further advised that the contractor is willing to lay over the whole area of this section a pavement of one-half inch of bituminous material and to furnish a five-year bond that this bituminous surface will remain in fit shape for that period. The State Highway recommended that the contractor be permitted to do the work as above outlined and that work having been done and the five-year bond executed, that the contract be accepted. On motion by Mr. Stewart, seconded by Mr. Kidde, the State

Highway Commission accept the report of the State Highway Engineer with reference to Route #10, Section #3, Little Ferry-Ridgefield section and approved of his recommendation as made.

Route #3, Section #8, Accepted.

The State Highway Engineer recommended acceptance of Route #3, Section #8, Camden City Line-Clements Bridge Road, the same having been completed in accordance with the plans and specifications effective June 7, 1923. On motion by Mr. Kidde, seconded by Mr. Jelin the State Highway Commission approved of the acceptance of Route #3 Section #8, Camden City Line-Clements Bridge Road, in accordance with the terms of the Reimbursement Act; this road having been inspected by the Commissioners.

Right of Way, Route #5, Section #2.

State Highway Engineer Sloan recommended to the Commission the purchase of 2,500 square feet of property on Route #5, Section #2, from Julia S. Runyon, et al., for the consideration of $250.00. He reported that this property was placed under condemnation but no hearing had, as yet, been called. In the meantime the owner is willing to settle by accepting the original offer. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission approved of the purchase of property from Julia S. Runyon on Route #5, Section #2, for the consideration of $250.00.

Condemnation Route #9, Section #10.

State Highway Engineer Sloan recommended that condemnation proceedings be instituted against James Mannion for property needed on Route #9, Section #10, Bound Brook to Lincoln Avenue known as parcel #3. Commissioner Jelin reported that he had investigated this property and would also recommend that condemnation be instituted. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission approved of the condemnation of the property of James Mannion on Route #9, Section #10, Bound Brook to Lincoln Avenue, and adopted the following resolution of condemnation:

> RESOLVED, that the State Highway Commission hereby determines to acquire in the name of the State Of New Jersey, for public use in the construction of State Highway Route #9, Section #10, Bound Brook to Lincoln Ave., ALL that certain lot, Tract of parcel of land and premises, situate, lying and being in the County of Middlesex, and the State of New Jersey, and more particularly described as follows:

Parcel #3

Beginning at a point in line of lands between John Prendville on the South and James Mannion on the North where the same is intersected by the proposed new southeasterly right of way line of Route #9, Section #10, of the State Highway System said point being distant thirty feet (30) from, measured at right angles to, the proposed new center line as shown on a plan attached hereto entitled "New Jersey State Highway Department, Property to be acquired from James Mannion, Boro of Middlesex, Middlesex County, Scale 1"-50', April 1923, Parcel A";

Thence (1) along said line of lands, north, seventy-nine degrees, twenty-nine minutes, thirty seconde, west, a distance of forty-six feet (46) more or less to an angle point on the westerly side of the graded road;

Thence (2) along deed line of lands of party of the first part on the westerly side of road, north, thirty degrees, thirty minutes thirty seconds, east a distance of four hundred and eighty-one feet and eighty-one hundreths of a foot (481.80) to an angle point;

Thence (3) still along said line of lands north, one degree, twenty-nine minutes, thirty seconds, west, a distance of twenty-one feet (21) more or less to a point;

Thence (4) easterly, a distance of(18) eighteen feet more or less to a point in the easterly side line of Union Avenue;

Thence (5) on a curve to the left, with a radius of eight feet (8) a distance of nineteen feet (19) more or less to a point in the proposed new northwesterly side line of Route #9, Section #10;

Thence (6) along said proposed new northwesterly right of way line on a curve to the right with a radius of one thousand four hundred and sixty-two feet and sixty-nine one-hundreths of a foot (1462.69) a distance of three hundred and forty-two feet (342) more or less to a point;

Thence (7) on a curve to the left with a radius of eight feet (8), a distance of twenty-one feet (21) more or less to a point in the southerly side line of Bound Brook Road;

Thence (8) northerly a distance of thirty-One feet (31) more or less to the line of lands of the party of the first part and Max S. Bernstein;

Thence (9) along the line of lands, north, eighty-eight degrees, thirty minutes, thirty seconds, east, a distance of two hundred feet (200) more or less to a corner of the party of the first part and the Watchung Estates;

Thence (10) along the line of the Watchung Estates, south, six degrees, thirty minutes, thirty seconds, west, a distance of twenty three feet (23) more or less to the proposed new southeasterly right of way line on Route #9, Section #10;

Thence (11) on a curve to the left with a radius of one thousand four hundred and two feet and sixty-nine one-hundreths of a foot (1402.69) a distance of eight hundred and eight feet and fifty one one-hundreths of a foot (808.51) more or less to a point of curvature at Station 368 plus 32.35;

Thence (12) still along southeasterly right of way line, south, thirty degrees, thirty minutes, thirty seconds, west, a distance of one hundred and eighty-two feet and thirty-five one-hundreths of a foot (182.35) more or less to the point and place of beginning.

It being contended to convey a strip of land sixty feet (60) in width between the land of Prendville and the Watchung Estates, thirty feet (30) each side of the proposed center line of Route #9, Section #10, with extra land for intersections, as shown on the aforementioned plan;

CONTAINING one acre and four-tenths of an acre (1.4 acres) be the same more or less.

The State Highway Engineer is hereby authorized and directed on behalf of this Commission, to make an offer to the owner or owners of said lands and premises for the conveyance ot the same to the State of New Jersey free and clear of all emcumberances, and, upon the failure of such owner or owners to accept such offer, or if for any other reason said lands and premises cannot be immediately acquired by agreement with such owner or owners, then the Attorney General of the State of New Jersey is hereby authorized and directed to institute condemnation proceedings for the acquisition of said lands and premises.

Roosevelt Blvd., Cape May County. ✓

State Highway Engineer Sloan recommended approval of plans and specifications for grading and repaving with gravel, a section of the Roosevelt Boulevard from Marmora to Ocean City, Cape May County, work to be done with Motor Vehicle Aid. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission approved of plans and specifications for a section of the Roosevelt Boulevard from Marmora to Ocean City, Cape May County.

Hudson County Motor Vehicle Schedule. ✓

State Highway Engineer Sloan recommended approval of an amendment to the Hudson County Motor Vehicle Schedule requesting permission to use Motor Vehicle moneys on the county road section ofa through route comprising Tonnelle Avenue, Jersey City, County Road at Jersey City and Secaucus, and County Avenue at Secaucus connecting this proposed extension of Route #1 with the Paterson Plank Road in order that work on this section may proceed this year, and the two other sections to follow as rapidly as possible. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission approved of the request as made for the change in the Hudson County Motor Vehicle Schedule in accordance with the communication of County Engineer T. J. Wasser, dated June 15, 1923.

Brown's Mills-Lakehurst Road. ✓

The State Highway Engineer reported that a conference was held at his office on Monday, June 18th with Burlington County Officials and Assistant State Highway Engineer Reed, looking toward the maintenance of Brown's Mills-Lakehurst Road in Burlington County and he would recommend that the sum of $10,000 be set aside for the Brown's Mills-Lakehurst Road, be made available for the County to use in the maintenance of this road with County Forces; the County agreeing to do this work out of the said funds, but was not willing to take the road over as a county road. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission approved the maintenance of the Browns Mills-Lakehurst Road by the County of Burlington, the expenses of the same to be charged against the $10,000 as set up for that purpose by the State Highway Commission.

A. G. A. Signs. ✓

State Highway Engineer Sloan submitted for the information of the Commission a communication from Mr. J. C. Hastie, with reference to the agreement between the State and the American Gas Accumulator Co., for highway Lighthouses. Commissioner Kidde requested that this communication be received and that the Secretary prepare a resume of the agreement as existing between the American Gas Accumulator Co., and the State Highway Commission.

Route #12, Section #5. ✓

State Highway Engineer Sloan recommended approval of the force account agreement entered into by the Warren County Board of Freeholders with J. Rodney Thompson for the completion of the Hudson Contracting Company's contract on Route #12, Section #5, upon which an abandonment has been declared by Warren County and approved by the State Highway Commission. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission approved of the force account agreement between Warren County and J. Rodney Thompson, as recommended by the State Highway Engineer.

Rt. #9, Sec. #7A, Main St. Somerville

State Highway Engineer Sloan recommended the approval of the action of the Board of Freeholders of Somerset County in extending the time of the New Jersey Construction Company's contract on Route #9, Section #7A, Main St. and Goshen Avenue in Somerville, to July 18, 1923, this extension of time being due to the fact that an additional contract was awarded this same company by the Borough of Somerville for extra width pavement to the curbs. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission approved the extension of time on Route #9, Section #7A, as recommended by the State Highway Engineer.

Material Inspectors.

State Highway Engineer Sloan recommended to the Commission the execution of the contract with Hildreth & Company for the inspection of Highway Materials for the year 1923; this recommendation also cancelling the agreement now in force with the Robert W, Hunt Co. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission approved the contract with Hildreth & Company for Inspection of materials in 1923, excepting for materials to be used in connection with the new Amboy Bridge, and also directing the cancellation of the agreement now in force with the Robert W. Hunt Co.

Extension Route #14, Section #6, Denied.

State Highway Engineer Sloan presented to the Commission a resolution of the Board of Freeholders of Atlantic County granting an extension of time to Contractor C. H. Earle, on work held by him under contract on Route #14, Section #6, at Mays Landing. State Highway Engineer Sloan also reported that the date of completion was June 15, 1922, and there had only been completed on this date the amount of 14% of the entire contract, and he recommended to the Commission that in view of the fact that reports have been received that the contractor has not been very diligent in pushing the work, and that there is no reasonable cause for the loss of time, the extension be not approved by the State Highway Department. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission concurred the recommendation of the State Highway Engineer and denied the approval of the application for extension of time to contractor C. H. Earle.

Maintenance Report

Commissioner Kidde directed that Superintendent of Maintenance Muir be present at the next meeting of the Commission in order to report upon the progress made by the Maintenance Department up to this time, the date for the next meeting being Tuesday, June 26th, 1923.

Extension - Salem County Roads.

State Highway Engineer Sloan recommended approval of extension of time from July 1st, to August 1st, 1923, for Pennsville-Salem Road, Section #3 and Section #2, Salem County work having been done under Motor Vehicle Aid. On motion, duly seconded, this recommendation was approved.

Extension - Cove Road.

State Highway Engineer Sloan recommended extension of time from November 1, 1922, to June 15, 1923, for Cove Road from Merchantville Borough Line to the Burlington Pike, Camden County work having been done under the Motor Vehicle Aid. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission approved the extension of time, the same having been granted by Camden County.

Cove Road, Camden County.

State Highway Engineer Sloan presented for acceptance the completed work on Cove Road in Camden County. Commissioner Jelin recommended that this matter be held pending inspection by him.

On motion duly seconded, the State Highway Commission adjourned at 4:30 P. M., to meet in regular session on Tuesday, June 26th, 1923 at 10:30 A. M.

Respectfully submitted,
A. LEE GROVER,
Secretary.

MINUTES OF MEETING - JUNE [illegible], [illegible].

[illegible]

[illegible]

[illegible]

JUN 2 6 1923

this property [illegible] by the present owner last year at [illegible]. [illegible] in view of the [illegible] purchased by the present owner, after [illegible] had already passed the [illegible], would not influence [illegible] would be [illegible] difference in the value of [illegible]. Mr. [illegible] that the property [illegible] for three years to [illegible]. [illegible] there would be any change [illegible] would purchase [illegible] with any [illegible] modified.

[illegible] ✓

[illegible] Commission for [illegible], [illegible].

JUN 2 3 1923

Bergen County Repairs ✓

The Secretary reported that Mr. J. L. Thier, County Supervisor of Roads of Bergen County, was present and desired a hearing. On motion, duly seconded, the hearing was granted. Mr. Thier reported to the Commission that the maintenance work on roads in Bergen County was practically completed and the county had spent $19[illegible],770.[illegible] and the State apportionment for the County work was $154,[illegible]. Mr. Thier requested that the Commission [illegible] the payment of the entire State allotment to Bergen County at this time in order that the county might save interest charges on funds borrowed in anticipation of this receipt. Commissioner [illegible] advised that he would make an inspection of the Bergen County roads after July 1st, in order that the Commission might comply with the request of Bergen County.

Route 8 at [illegible] Crossing ✓

The Secretary informed the Commission that Mr. [illegible], representing Mr. [illegible], owner of the [illegible] Inn, desired a hearing. On motion, duly seconded, the hearing was granted. Mr. [illegible] appeared before the Commission and informed Chairman [illegible], in the event that Route 8 between [illegible] and [illegible], is put on a new line in order to eliminate the railroad grade crossings, the old road would still be open to traffic. [illegible] advised that the road [illegible] would [illegible] maintained [illegible] prior to the time it was taken over by the State. Mr. [illegible] asked that the Commission [illegible] when the road is constructed and this statement was given him by Chairman [illegible].

[illegible] Hearing /

The Secretary presented a communication from L. S. [illegible], Attorney, for several claimants against [illegible] & Company, and requested a hearing. On motion duly seconded, the Secretary was directed to arrange a hearing for Mr. [illegible] at the next meeting of the Commission.

Syracuse Bridges

The Secretary informed the Commission that Mr. LaChiotti, representative of the Syracuse [illegible] Bridge Company, was present with reference to the completion of an agreement between the Syracuse [illegible] Bridge Company and the State Highway Commission for the erection of

Bridge. Mr. LaChicotte appeared before the Commission with a suggested form of agreement and advised that there would have to be an amendment in the original proposal in view of the fact that his company had quoted a 1% fee for Manasquan River Bridge, since that was advertised as an identical structure with the Inland Waterway Bridge, but it developed that the former bridge had but one sidewalk while the Inland Waterway Bridge had two sidewalks, which would necessitate a change in detail to provide for proper balancing. He offered to do the Manasquan Bridge work for 3% instead of 1%.

Bascule Bridges ✓

State Highway Engineer Sloan advised that with reference to the Big Timber Creek Bridge, there was difficulty experienced with the Federal Government which would necessitate the hold up of approval on the same for sometime. Mr. LaChicotte was requested to advise whether his company was willing to give up consideration of the Big Timber Creek Bridge at this time and after further discussion, it was agreed by Mr. LaChicotte and the State Highway Commission that the agreement between the Chicago Bascule Bridge Co. and the State Highway Commission shall be for the plans and engineering service on the Bass River Bridge on Route 4 at 3%; and on Manasquan River Bridge on Route 4 at 3%, and the State Highway Commission withdrawing the proposal on Big Timber Creek. Commissioner [illegible] moved that the State Highway Commission enter into a contract with the Strauss Bascule Bridge Company for plans and engineering service in accordance with the above. This was seconded by Mr. Stewart and adopted.

Route 5, Netcong ✓

State Highway Engineer Sloan presented to the Commission a report on conditions existing in the town of Netcong on Ledgewood Ave. and [illegible] Street, which streets are used as connecting links to Route 5. The estimated cost of this work as made by the Maintenance Department was $[illegible].00. Superintendent of Maintenance [illegible] was present and explained the type of construction which it was proposed to place in Netcong. On motion by Mr. Stewart, seconded by Mr. [illegible], the State Highway Commission directed that the maintenance of connecting link of Route 5, through Netcong, be undertaken by the Maintenance Department at an estimated cost of $[illegible].00.

Maintenance Division Report

JUN 2 6 1923

Maintenance Division Report ✓

Superintendent of Maintenance Muir, as directed at the former meeting of the Commission, was present and presented a detailed report of the progress made by the Maintenance Division up to this time. He informed the Commission that the routine maintenance on all roads was progressing in a satisfactory way, and was as satisfactory as could be expected in view of the fact that this was a continuous operation. He reported that the repairing and resurfacing work is now 47% complete and he reported that it will take an additional month for the completion of the balance. He further reported that it was not necessary to detour on any of the work being done by the Maintenance Department. Mr. Muir advised that the delivering of materials was progressing very satisfactorily, and at the present time the labor situation is also satisfactory, since at this last report made a month ago there were 506 free laborers, while on June 16th there were 689. Mr. Muir advised that from a study made of the conditions existing at this period and the same period a year back, he could report that the work of the Maintenance Division was as far advanced even though there was a two months delay in the early spring as it was on the same date last year and he believed that the first of August would see the largest percentage of work of the Maintenance Division completed. He also reported that in a study of the finance statement, it appeared that the maintenance work could be done within the estimate as made up by the Maintenance Division at the beginning of the year.

Commissioner Stewart advised that he had four complimentary reports as to the conditions of the repairs on State highways and he desired to pass it along to Mr. Muir.

Dust Laying, Route 4 ✓

Commissioner Kilde presented to the Commission a communication received by him from Mrs. J. I. Dusenberry, complaining of the conditions of the road from Sea Girt to Manasquan and to Brielle and asking that there be some relief given on this section of Route 4 from the dust situation. Superintendent of Maintenance Muir advised that this section was proposed for reconstruction and no effort had been made to put any dust layer on this section pending this work. Commissioner Kilde suggested that some effort be made to sprinkle this road. Commissioner Stewart voiced his objection to undertaking the sprinkling of any section of road in view of the fact that this would open up a costly precedent for the State. After further discussion, Commissioner Kidde moved that the communication be received and referred to the Engineering Division in order that arrangemements can be made to properly lay the dust on this section of Route 1. This was seconded by Mr. Jolin and adopted.

Amiesite Paving –

Route 9, Section 3, Bridges. ✓

State Highway Engineer Sloan called attention to Item 25 of the Schedule of Business in which he recommended that the Superintendent of Maintenance be authorized to purchase approximately 15 tons of Amiesite to complete the paving on two bridges on Route 9, Section 3. He advised that this recommendation was made in view of the fact that the sum involved was very small and that this material could be handled most economically. Commissioner Jolin suggested that in order to create competition that several prices be obtained for bituminous surfacing in that locality and Commissioner Kidde moved that the recommendation of the State Highway Engineer for the paving of two bridges on Route 9, Section 3, be approved and that the work be done with Amiesite if found necessary and cheapest. This was seconded by Mr. Jolin and adopted.

On motion by Mr. Kidde, seconded by Mr. Jolin, the State Highway Commission recessed for luncheon at 1:00 P.M. to meet in regular session at 2:30 P.M.

The Commission reconvened at 2:30 P.M. with the same members present as at the morning session.

Morris Canal Property ✓

The Secretary presented a communication from Dr. L. M. Hammel advising that due notification would be given to the State Highway Commission when the disposition of the Morris Canal is taken up. On motion, duly seconded, the communication was ordered received and the Secretary was requested to formally request such a hearing.

A. G. A. Signs ✓

The Secretary presented for the information of the Commission a resume of the agreement with the American Gas Accumulator Company for highway flash beacons. The items covered were as follows: term, twenty years from March 1st, 1921; to be no other sign or device

device within 150 yards of any light house; Commission may rent same at $100.00 per year if advertising matter is removed, upon three years notice in writing; company to install not less than 100 signals per year; Commission may purchase signals upon three years notice at $300.00 each; the company may cancel agreement upon one years notice in writing. On motion, duly seconded, the report was ordered received and placed on file.

Route 15, Leesburg Cut-off ✓

State Highway Engineer Sloan recommended approval of plans and specifications for the grading and gravelling of Route 15, Leesburg Cut-off, Cumberland County, with further recommendation that the work be performed under agreement with the Department of Institutions & Agencies by inmate labor of the prison farm at Leesburg. Commissioner Kidde moved that the plans and specification be approved for Route 15, Leesburg Cut-off, Cumberland County, and that the State Highway Engineer take this matter up with the Department of Institution & Agencies for the preparation of a proper contract the same to be presented to the State Highway Commission for its approval. This was seconded by Mr. Stewart and adopted.

Route 5, Netcong ✓

State Highway Engineer Sloan presented plans and specifications for grading of Route 5 at Netcong. On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission unanimously adopted the following resolution:

> RESOLVED, that the State Highway Commission does hereby approve plans and specifications for the grading and drainage of Route 5 at Netcong, New Jersey, and
>
> BE IT FURTHER RESOLVED that the Chairman is directed to sign the necessary papers when in form and the Secretary is directed to place the necessary advertisements for this work.

Route 2, Section 4, Burlington ✓

State Highway Engineer Sloan presented plans and specifications and recommended approval for the grading of a road and construction of three bridges on State Highway Route 2, Section 4, through the City of Burlington. On motion by Mr. Stewart, seconded by Mr. Kidde, the State Highway Commission unanimously adopted the following resolution:

RESOLVED, that the State Highway Commission does hereby approve plans and specifications for the grading of a road and construction of three bridges on State Highway Route 2, Section 4, through Burlington, and

BE IT FURTHER RESOLVED, that the Chairman is directed to sign the necessary papers when in form and the Secretary is directed to place the necessary advertisements for this work.

Route 4, Section 21

State Highway Engineer Sloan reported to the Commission that he was prepared to recommend the award of contract for Route 4, Section 21, Point Pleasant-Laurelton, to Michael Staub, on his lowest bid of [illegible] in the amount of $[illegible], but as yet there had been no approval given by the Federal Bureau of Public Roads of the project statement applying Federal aid on this section of work. This matter was consequently held over until the next meeting.

Kavanaugh, Sub-Contractors

State Highway Engineer Sloan presented to the Commission a communication from Mr. Charles J. Kavanaugh, contractor on three jobs awarded to him by the State Highway Commission. Mr. Kavanaugh advised the Commission that he had sublet the entire work on Route 6, Section 2-A, [illegible], Road to William A. [illegible] of 100 [illegible] St., Newark, that he has sublet all the excavation, grading, removal of trees, installation of curbs, gutters, etc., on Route 10, Section 5, to John A. Lee & Brothers of [illegible], N. J.; also that he has contracted for all the steel for the three contracts awarded to him with the Kalman Steel Company, of 110 West 42nd Street, New York City; for reinforced concrete pipe with the Lock Joint Concrete Pipe Co. of 41 East 42nd St., New York City; for cast iron pipe with the American Casting Co. of Birmingham, Alabama; for cast iron catch basin, manhole heads and lamp holes with the S. M. L. Valve and Hydrant Co. of 55 Broad St., New York City; for all cement with the [illegible] Portland Cement Company of Philadelphia, Pa.; and for sand and gravel from the [illegible] Sand & Gravel Company of Spring Lake, N. J. State Highway Engineer Sloan recommended that the sub-contractors as referred by Mr. Charles J. Kavanaugh for Route 6, Section 2-A, and Route 10, Section 5, be accepted by the State Highway Commission and also that the materials purchased for the work from the companies named be accepted as being the proper materials, complying with the specifications. On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission directed that the communication of Mr. Kavanaugh be received and the recommendations of the State Highway Engineer be approved.

Route 5, Section 10. ✓

State Highway Engineer Sloan reported on bids received for Route 5, Section 10, Chatham to Brantwood on which the low bidder was Ralph Sangiovanni, who at the present time has two contracts for State Highway Construction on which the time of completion has been exceeded by 75% and he was not prepared at this time to recommend award to the low bidder. The second low bid was submitted by Graham VanKeuren at $293.50 in excess of the low bid. On motion by Mr. Jelin, seconded by Mr. Kidde, the Commission directed that Ralph Sangiovanni the low bidder on Route 5, Section 10, be requested to appear before the State Highway Commission at its next meeting.

Detour, Route 13. ✓

State Highway Engineer Sloan presented a report on detours for Route 13, Trenton to Princeton Section, as directed by the State Highway Commission at its last meeting. State Highway Engineer Sloan reported that the cost of placing the Ridge Road in proper shape for a distance of 2.6 miles was $6605.00. Chairman Scott urged that this road be made a detour in order that the heavy truck traffic could be detoured before reaching Princeton, rather than being brought through the town. On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission authorized the marking of official detour of the Ridge Road and that it be repaired at an estimated cost of $6605.00.

Route 4, Section 9,
Smithville-Mullica River ✓

State Highway Engineer Sloan presented to the Commission the request of Atlantic County for reimbursement on account of work done by forces of the Atlantic County Road Supervisor in maintaining a detour around Route 4, Section 9, between Smithville and Mullica River, the total amount of this work being $473.25. On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission approved of the payment to Atlantic County of the sum of $473.25 on account of expenses incident to the maintenance of detour around Route 4, Section 6, Smithville-Mullica River Section.

Accounting & Tabulating Machine ✓

State Highway Engineer Sloan presented to the Commission the recommendation of the Chief Clerk and the Chief Auditor for the installation and operation of a tabulating machine system of cost accounting by the Tabulating Machine Co., the cost of the same to be for one automatic card sorting machine at a rental of $70.00 per month; and the purchase of two punches at $100.00 each, one at $150.00 and one verifying machine at $120.00. State Highway Engineer Sloan recommended that the Commission approve this purchase in order that it may secure statistical information for the Accounting Department, which is now impossible to get, unless a great amount of time is consumed. On motion by Mr. [illegible], seconded by Mr. Stewart, the State Highway Commission approved of the installation of the Tabulating Machine Outfit and authorized an agreement to be entered into with the Tabulating Machine Company in accordance with the request of the Accounting Department.

Detours ✓

State Highway Engineer Sloan recommended to the Commission the adoption of official detours on Route 8, Section 1, Smith Mills-Charlottesburg and Route 4, Section 20, Manasquan River to Sea Girt Section. On motion by Mr. Stewart, seconded by Mr. [illegible], the State Highway Commission approved of the following official detours for Route 8, Section 1, Smith Mills-Charlottesburg, and Route 4, Section 20, Manasquan River-Sea Girt Section:

Detour, Route 8, Section 4.

Beginning in Charlottesburg at the intersection of Route 8, and the road to Macopin; thence (1) northwardly along the Macopin Road, bearing to the right at the fork near Macopin Lake, to Macopin; thence (2) to the right and southeasterly to the Echo Lake-Smith Mills Road; thence (3) to the right and southeasterly along said road leading to Smith Mills, at the fork bearing to the left and easterly and southeasterly along the Butler Road to the intersection of Route 8 in Butler.

Detour, Section 20, Route 4.

Beginning at the intersection of Higgins Avenue and Ashley

Avenue, north of Manasquan River Bridge; thence (1) north on Ashley Avenue to Union Lane; thence (2) to the left on Union Lane across Route 4 to South Street; thence (3) to the right along South Street through the Boroughs of Brielle and Manasquan to Main Street; thence (4) to the right on Main Street one hundred (100) feet more or less to Broad Street; thence (5) to the left along Broad Street and Manasquan Turnpike to the intersection with Route 4, south of Wreck Pond.

Ratings Increased

State Highway Engineer Sloan recommended to the Commission that approval be given to a recommendation of the Laboratory Division for the establishment of the grade of Assistant Junior Testing Engineer and Assistant Junior Testing Chemist, at the minimum salary of $125.00 per month and the fixing of the salary schedule for Testing Engineer and Testing Chemist at a minimum of $200.00 and maximum of $245.00, and for Senior Testing Engineer and Senior Testing Chemist at a minimum of $250.00 and maximum of $325.00 per month. On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission directed the recommendation of the State Highway Engineer be referred to the Civil Service Commission for establishment of salary schedule as recommended.

Township Aid, Mercer County

State Highway Engineer Sloan recommended approval of supplemental agreement for the surface treatment of the Harbourton-Bear Tavern Road, Hopewell Township, Mercer County, work to be performed from Township Aid Account, State Share $375.00. On motion by Mr. Stewart, seconded by Mr. Kidde, the State Highway Commission approved of the apportionment of $375.00 for surface treatment to the Harbourton-Bear Tavern Road, in Hopewell Township, Mercer County.

Township Aid, Burlington County

State Highway Engineer Sloan recommended acceptance of the completed work of the Lower Bank Road, Washington Township, Burlington County, said acceptance carrying also approval of final force account statement. On motion by Mr. Stewart, seconded by Mr. Kidde, the State Highway Commission approved the recommendation of the State Highway Engineer and accepted the Lower Bank Road, Washington Township, Burlington County, also giving approval to the force account statement.

Laurel Avenue Bridges, Essex Co.

State Highway Engineer Sloan recommended acceptance of completed bridge on Laurel Avenue, Essex County, State Aid. Commissioner Kidde reported the work to be in very good shape, except for the ballustrades which he understood were being reconstructed and he moved acceptance of Laurel Avenue Bridges by the State Highway Commission. This was seconded by Mr. Stewart and adopted.

Route 8, Lines Property

State Highway Engineer Sloan presented to the Commission a report on his investigation as to the cost of moving the house on the Lines Property or the construction of a new bungalow on this site and he recommended to the Commission that formal notice be given to the tenant to vacate the present house in order that the construction of the highway at this point on Route 8 may be completed without further delay. Commissioner Kidde suggested that a communication be forwarded to Mrs. Lines explaining the results of the findings of the State Highway Engineer to the effect that she could use the moneys now on deposit with the Court of Chancery for the purpose of erecting a new home or the removing of her present home, in order that the road may be completed. All of the Commissioners offered suggestions as to the composition of this communication and after further discussion, Mr. Kidde moved that the following communication be forwarded to Mrs. Lines and that action in accordance therewith be taken by the State Highway Commission.

June 30, 1923.

Mrs. Catharine Lines,
Riverdale, New Jersey,
Pequannock Township,
Morris County.

Dear Madam:

The former State Highway Commission, under due process of law, has condemned a portion of your property. You were awarded by the Condemnation Commission the sum of eleven thousand and fifty dollars ($11,050.00). This money has been on deposit to your credit with the Court of Chancery since August 9th, 1921.

We are receiving constant complaints of the dangerous condition in front of your property; of danger to life and limb; and we cannot in justice to the public allow this condition to remain any longer.

We are informed that you can erect a suitable bungalow for between seven thousand dollars ($7,000.00) and nine thousand dollars ($9,000.00), or that you can have your house removed, proper foundations made, etc. for approximately the same amount, which would permit you to operate your farm.

We expect to start the construction of this portion of the road on August 15th, 1923, and will have to possess ourselves of the land at that time. Your house will be untenantable thereafter.

In this connection we beg leave to call your attention to the fact that there is due from you to the State for rental of property which you have continued to occupy, an amount equal to 6% of the amount of award to you, which, as above stated, has been deposited with the Court of Chancery to your credit.

Very truly yours,

STATE HIGHWAY COMMISSION.

Per A. Lee Grover, Secretary.

This was seconded by Mr. Jelin and adopted.

Detour, Perth Amboy

State Highway Engineer Sloan presented a telegram from the City of Perth Amboy concerning a detour for Route 4 traffic, through the City of Perth Amboy, since the detour previously adopted was now torn up on account of underground construction.

Route 6, Section 15, Track Paving

State Highway Engineer Sloan recommended to the Commission the approval of agreement with the Public Service Railway Co. for furnishing of track material, labor and paving on State Highway Route 6, Section 15, Gloucester City, it being understood that the Public Service Railway Co. agrees to reimburse the State in equal installments over a period of five years to an amount of $3165.00. Commissioner Kidde stated that he would ask that provisions be made in this agreement to insure the block being replaced in as good condition as when first laid in the event it is necessary to open up the pavement between the tracks and he moved that approval be given to an agreement with the Public Service Railway Co. for the reconstruction and repaving of trolley tracks on State Highway Route 6, Section 15, Gloucester City, funds to be provided by the State in an amount of $46,025.00 and reimbursement to be made by the Public Service Railway Co. in equal installments over a period of five years to an amount of $31,065.00 the difference being the eventual cost of the work to the State. This was seconded by Mr. Stewart and adopted. Commissioner Kidde suggested that if possible a three year financing shceme be worked out rather than five years.

Public Hearing ✓

Commissioner Jelin called attention to the fact that he had arranged for a public meeting to be held at New Brunswick City Hall on Friday, June 29th, for the purpose of hearing all parties interested in the construction of a new bridge over the Raritan River at the location of the New Jersey College for Women, New Brunswick.

Absecon Boulevard ✓

State Highway Engineer Sloan presented a communication received from County Engineer A. H. Nelson, giving further information with reference to the action taken by the Board of Freeholders of Atlantic County for the reconstruction of the Absecon Boulevard, requesting a formal statement from the State Highway Commission of its criticism or comments in connection with the construction of this work by the County. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission directed that the communication be received and filed with the knowledge that the proper information has already been forwarded to the County of Atlantic.

Office Space ✓

The Secretary presented a communication from the Directors of the Broad Street National Bank of Trenton, advising that two floors of 11,100 sq. ft. of rental space in both, will be given to the State Highway Commission at the rate of $1.60 per sq.ft. providing the offices are arranged according to plans, no alterations to be made at this price unless a five year lease is given. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission directed that the communication be referred to the State Highway Engineer for preparation of sketch showing the amount of floor space needed and the lay out of the offices of the State Highway Commission in the event a lease is taken upon the new property until June 1st, 1925.

Hunterdon County Motor Vehicle Aid ✓

The Secretary presented a communication from O. P. Opdyke, County Road Supervisor of Hunterdon County, calling attention to the condition of the Flemington-Whitehouse Road and requesting assistance to the amount of $8,666.90. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission directed that the communication be received and that Mr. Opdyke be informed that there are at the present time no funds from which the State Highway Commission could aid on this work.

Employments

State Highway Engineer Sloan presented to the Commission a list of employments as approved by him since the last meeting of the Commission and recommended their approval by the State Highway Commission. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission approved the following list of employments as made by the State Highway Engineer:

July 1, 1923	Robert C. McKenny	Title Searcher	$140.00
June 18 "	John Hemseth, Jr.	Rodman	90.00
" 25 "	Wm. R. Hersohn	Asst.Jr.Test.Chem.	125.00
" 18 "	S. W. Fishler	Clerk	90.00
July 1 "	Jesse P. Achley	Grav. Patrolman	75.00

Hourly Basis

June 20, 1923	Irving Schwartzman	Gen.Asst.	.50
" " "	T. P. Doell	" "	.45
" 19 "	L. T. Cutterly	" "	.45
" 18 "	S. R. Schmid, Jr.	Mechanic	.65
" 16 "	W. C. Miers	M. T. D.	.40
" 12 "	Earl Maxwell	" " "	.40

" 22 "	F. M. Strehle	" " "	.45
" 24 "	Michael Lesnak	" " "	.45

Bridge Inspectors

State Highway Engineer Sloan presented to the Commission a certification of men already employed in the Bridge Division as Bridge Construction Inspector and who had qualified for reappointment by new examination and he recommended that reappointment be made effective June 14th. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission approved of the recommendation of the State Highway Engineer in reappointing the following men as Bridge Construction Inspectors:

James M. Hynes
John L. Fitzgerald
Robert H. Robson
William F. Borden
Charles W. Wean
Arthur J. Lichtenberg
Ralph H. Davis
Albert S. Herron

Revetment Contract, Route 4

State Highway Engineer Sloan presented to the Commission a copy of telegram forward to L. B. Harrison, contractor, for trimming slopes and revetment work on Route 4, approach to the proposed new Manasquan River Bridge, in which he recommended that the contract of L. B. Harrison be declared abandoned and the retained percentage be forfeited unless word was received from L. B. Harrison by 10:00 A. M. of the morning of this meeting. He advised that no reply had been received and he recommended that abandonment of the contract be declared and that the State Highway Commission make other arrangements for the completion of the work. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission approved the recommendation of the State Highway Engineer.

Route 10, Right-of-Way

Commissioner Kidde reported that he had received photographs from William H. Schoonmaker of Montclair with reference to the conditions existing on the Shafer Property on Route 10. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission directed that a communication of thanks be forwarded to Mr. Schoonmaker in appreciation of his interest in reporting on Route 10 conditions at the Shafer Property.

Extension Route 1 and 13

The Secretary presented a resolution from the City Commission of New Brunswick, granting extension of time for the completion of Route 1 and 13, Albany and French Street, New Brunswick, for sixty working days. State Highway Engineer Sloan advised that this work was being held up by trolley construction through New Brunswick and Mr. Jelin moved that approval be given to the extension of time as made by the City of New Brunswick. This was seconded by Mr. Kidde and adopted.

Morris County Repairs

State Highway Engineer Sloan reported to the Commission that in view of the fact that the Attorney General had ruled that the County of Morris could not extend its last year contracts for repair materials, the County of Morris had received bids this year and was ready to make award upon approval of the State Highway Commission. Commissioner Kidde stated that it was with regret that the County of Morris could not make use of last year's bids in view of the fact that they were lower than the present year, but inasmuch as it was a matter of law he would move that the State Highway Commission approve of the bids as received by Morris County and express regret that the law makes it necessary to pay the higher prices. This was seconded by Mr. Jelin and adopted.

Barber Asphalt Company Mixers ✓

The Secretary reported that a delegation was present at the request of Chairman Scott, representing the Barber Asphalt Company. On motion , duly seconded, a hearing was granted. There appeared before the Commission Messrs. Wells, Barrett and Warden, of the Barber Asphalt Company, offering to the State Highway Commission the latest improved machines for use in maintenance work for mixing asphalt on the jobs without taking any royalties from the State and without placing any restrictions as to the use of materials in the machine. The Commission expressed appreciation for this offer from the Barber Asphalt Company and advised that they would give these machines consideration when the need arose for the same.

On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission adjourned at 4:30 P.M. to meet in regular session on Thursday, July 5th, at 12 o'clock noon.

Respectfully submitted,

A. LEE GROVER

Secretary.

MINUTES OF MEETING - JULY 5, 1923.

A regular meeting of the State Highway Commission was held at the offices of the Commission, Broad Street Bank Building, Trenton, N. J., Thursday, July 5, 1923. The meeting was called to order by Chairman Scott at 11:00 A.M.

Present: Gen. H. L. Scott, Chairman, Messrs. Walter Kidde and Abraham Jelin.

Absent: Mr. Percy H. Stewart until noon.

Route 5, Section 10 ✓

The Secretary reported that in line with the request of the State Highway Commission at its last meeting, a hearing had been arranged for Mr. Ralph Sangiovanni, the low bidder on the construction of Route 5, Section 10, Chatham to Brantwood. On motion, duly seconded, a hearing was granted. Mr. Sangiovanni appeared with Mr. DeVoe, his counsel, and Mr. John Brahney, Agent for the Globe Indemnity Co. representing the bonding company. Mr.DeVoe pleaded the case of Mr. Sangiovanni urging that the State Highway Commission award the contract for Route 5, Section 10, on the ground that Mr. Sangiovanni was both the low bidder and a responsible bidder. He cited other work on which Mr. Sangiovanni had performed satisfactory service, and he also presented information to show that delays in the work being performed on Route 16, were not entirely the fault of Mr. Sangiovanni, but were due to delays in the receipt of materials on account of strikes; he further advised that Mr. Sangiovanni was financially able to perform this work and that if awarded the contract, Mr. Sangiovanni would give this work his entire attention and would not undertake any other work during the season. Mr. DeVoe further informed the Commission that Mr. Sangiovanni had $100,000.00 worth of equipment to place on the work in a week, since he had practically completed the concreting of his other jobs in Somerset County. Mr. Sangiovanni himself asked that this job be awarded to him in view of the fact that he has sufficient equipment and proper organization and he was ready to begin the work immediately under his own personal supervision; it being his purpose to handle one job at a time. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission deferred taking any action as to the award of this contract until the arrival of Mr. Stewart.

Tree Conservation

The Secretary presented a communication from Hon. F. M. P. Pearse, Secretary to the Governor, inclosing a copy of a letter written by him to telephone and electric companies regarding injuries to trees in the erection of poles and wires. Commissioner Kidde suggested that the State Highway Engineer be instructed to advise all Department Heads of the fact that the State Highway Commission is highly desirous of sparing the trees on State highways wherever possible, and that a report of this action be forwarded to the Secretary of the Governor, and he further moved that the Maintenance Division be instructed to review the form of contract now entered into between the State Highway Department and Public Utilities for the erection of poles toward the end that trees will not be unduly disturbed. This was seconded by Mr. Jelin and adopted.

Right-of-Way, Amboy Bridge

State Highway Engineer Sloan reported to the Commission that he had been in conference during the morning with Mr. C. W. Hudson, Supervising and Designing Engineer on the new Amboy Bridge relative to the property damage on the line of the proposed new bridge and he would suggest that Mr. Hudson appear before the Commission to discuss the matter. Mr. Hudson appeared and outlined for the Commission the proposed property damage on the properties of the National Fire Proofing Company and the Pardee Tile Works. After Mr. Hudson had concluded his outline of the damage, Mr. Kidde suggested that it would be of valuable assistance to have some reputable industrial Engineer make a survey of the property and prepare an estimate of the cost of replacing any property which might be in the line of the bridge. Commissioner Jelin suggested that in addition real estate appraisers be secured who could fix a proper value for the buildings and land taken. Mr. Hudson advised that he would endeavor to follow out the suggestions offered. State Highway Engineer Sloan inquired of the Commission whether the Commission would approve of specification being returned to the printer for submission of proof. On motion, duly seconded, the Commission directed that specifications for the new Amboy Bridge be forwarded to the printer in order that proof may be submitted to the Commission before final approval is given.

Commissioner Kidde moved that the State Highway Engineer and the Right-of-Way Engineer be prepared at the next meeting to report on the date on which the advertising for the work will be fixed. Commissioner Jelin suggested that at the next meeting the State Highway Engineer present his recommendations for appraisers on the new Amboy Bridge.

New Lisbon-Four Mile Road

The Secretary informed the Commission that Mr. Howarth who was interested in the claim made by A. J. Milmoe on the New Lisbon-Four Mile Road was present and desired ahearing with reference to the further consideration being given the claims of Mr. Milmoe. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission directed that the entire matter be referred to the State Highway Engineer for disposition and report to the State Highway Commission.

On motion, duly seconded, the Commission recessed for lunch to meet in regular session at 2:30 P. M.

The Commission reconvened at 2:30 P.M. as agreed.

Route 5, Great Meadows

State Highway Engineer Sloan reported to the Commission that in conference with General Scott, he had attended a public meeting held at Great Meadows, N. J. for the purpose of ascertaining local feeling with reference to a change in the line of construction for Route 5 at the Great Meadows grade crossing. Mr. Kidde advised that it was practically a unanimous opinion among the residents of Great Meadows that the State Highway Commission should not change the line on which the contractor was now working and which line was laid out by the former State Highway Commission. The residents were even willing to permit the grade crossing to remain rather than destroy the Village of Great Meadows, which they maintained would be the result if the new line as recommended by the State Highway Engineer was adopted. The Commissioners considered at length the various ways and means for adopting the recommendations of the State Highway Engineer without disturbing Great Meadows, and after this deliberation Mr. Kidde moved that the line for Route 5, through Great Meadows be continued on the work as to present projected, following the plans of the former State Highway Commission; the grade crossing eliminations to take place in accordance with the agreement as already drawn up and awaiting execution by the State Highway Commission, this motion giving authority to the Chairman to sign the necessary agreements with the Lehigh and Hudson River Railway Co.

Commissioner Stewart, in seconding Mr. Kidde's motion, stated that he did so with regret and only because it appeared to be the only solution to the moral questions involved.

State Highway Engineer Sloan requested authority to advertise the plans for Route 5 through Great Meadows, and on motion by Mr. Stewart, seconded by Mr. Kidde, the State Highway Commission approved of plans and specifications for the necessary work on the approaches to grade crossing eliminations on Route 5 at Great Meadows, and directed the Chief Clerk to place the necessary advertisements for the same.

Route 5, Section 10,
Chatham-Brantwood

State Highway Engineer Sloan requested consideration of the award of contract for Route 5, Section 10, Chatham to Brantwood on which Mr. Sangiovanni had appeared at the morning session and he agreed to carry on the work personally, and he recommended that in view of the fact that Mr. Sangiovanni will not take any other contract until the completion of Route 5, Section 10, and also that this work will have his personal attention; and also with the strong assurance of the Bonding Company that they indorse the work of Mr. Sangiovanni, he would recommend the award to Mr. Sangiovanni. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission unanimously adopted the following resolution:

> BE IT RESOLVED, that the contract for the construction of Route 5, Section 10, Chatham to Brantwood, be and the same is hereby awarded to Ralph Sangiovanni of Newark, New Jersey, on his the lowest bid amounting to 109.8% of the Engineer's estimated units of cost, or a contract amount of $161,132.54, and
>
> BE IT FURTHER RESOLVED, that the Chairman is authorized to sign the necessary contracts on behalf of the State Highway Commission after approval by the State Highway Engineer.

Route 4, Section 21,
Point Pleasant-Laurelton

The Secretary reported that information had been received from the Federal authorities to the effect that Federal Aid had been approved for the work on Route 4, Section 21, Point Pleasant to Laurelton, on which Michael Staub was low bidder. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission adopted the following resolutipn:

BE IT RESOLVED, that the State Highway Commission does hereby award the contract for the construction of Route 4, Section 21, Point Pleasant to Laurelton, to Michael Staub of Pitman, New Jersey at his the lowest bid amounting to 102.3% of the Engineer's estimated units of cost or a contracting amount of $263,625.67, and

BE IT FURTHER RESOLVED, that the Chairman is authorized to sign the necessary contract when in form.

Extensions of Time

State Highway Engineer Sloan reported to the Commission that he had received a communication from the Somerset County Board of Freeholders, granting an extension of time to Ralph Sangiovanni for the completion of Route 16, Section 3, to August 1, 1923, and on Route 9, Section 8, to August 15, 1923, and he recommended approval by the Commission. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission approved of the extension of time to Mr. Sangiovanni for Route 16, Section 3, to August 1, 1923, and Route 9, Section 8, to August 15, 1923. Mr. Kidde explained that his motion was made with the understanding that there were to be no further extensions of time granted on either of these sections of road.

Route 5, Great Meadows

The Secretary presented a communication from Mr. A. C. Aber urging the Commission's consideration of the request of the residents of Great Meadows for the grade crossing to be eliminated on the old line as laid out. On motion by Mr. Stewart, seconded by Mr. Jelin, the State Highway Commission ordered the communication received and placed on file and directed the Secretary to notify Mr. Aber of the action taken by the Commission.

Route 18 Taken Over

The Secretary presented a stenographic report of a hearing held at Hackensack on the matter of the taking over of a portion of State Highway Route 18, from the New York State Line to a point at or near the Englewood approach. On motion, duly seconded, the report was ord red received and placed on file.

Route 10 Alignment

Commissioner Kidde reported to the Commission the receipt of a communication from Mr. George A. Pheiffer, who had apparently studied the situation existing on Route 10 and was prepared to offer suggestions for a change in the line from that recommended. On motion by Mr. Kidde, seconded by Mr. Stewart, the communication was ordered received and referred to the State Highway Engineer for investigation, he to advise Mr. Pheiffer of the difficulties of the suggestions made by him.

Amboy Bridge Memorials

The Secretary presented a communication from Mr. J. F. Clevenger, Editor of the Perth Amboy Evening News with further reference to the incorporation of some memorial features in the proposed new State Highway Bridge over the Raritan River between Perth Amboy and South Amboy, in which communication he advised that this idea had been indorsed and had the support of all Civic organizations in addition to the American Legion of Perth Amboy and Middlesex County. The State Highway Engineer stated that he had given this matter thought and felt that some plan could be worked out whereby proper tablets could be erected on the bridge as a memorial feature. Commissioner Kidde moved that the communication be referred to the Chairman and State Highway Engineer with the idea that they will be able to develop with Mr. Clevenger of Perth Amboy some memorial features which might be placed on the bridge, and in order that the same might be incorporated in the bridge design, a copy of this action to be forwarded to Mr. Clevenger. This was seconded by Mr. Jelin and adopted.

Route 11, Clifton and Passaic

The Secretary presented a communication with resolution from the Board of Freeholders of Passaic County requesting that in line with the conference between County Engineer Ferguson and the State Highway Commission it was proposed to construct and improve Main Avenue in the City of Clifton and Passaic Avenue from the Essex County Line to Brook Avenue in the cities of Clifton and Passaic, connecting link on Route 11, under provisions of Section 9 of Chapter 14, Laws of 1917 (State Highway Act concerning Connecting Links) rather than under Chapter 10, Laws of 1919, (Motor Vehicle Bond Retirement Plan) and recommended approval by the State Highway Commission on the basis of the State's sharing in 50% of the cost of this work. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission approved of the work on Main Avenue in the City of Clifton, and Passaic Avenue in the Cities of Clifton and Passaic, connecting link on Route 11, being improved under provisions of Chapter 14, Laws of 1917 instead of Chapter 10, Laws of

1919. This approval signifies only a transfer of the funds from which this work will be done. The Secretary reported that in connection with this the county of Passaic desired that the State Highway Commission share the construction of Main Avenue, Sections 1 and 2, in the City of Clifton, connecting on State Highway Route 11, to the extent of one-half the cost of the work, it being understood that the said 50% will not exceed $60,000. On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission approved of the payment by the State of one-half the cost of the construction of Main Avenue, Sections 1 and 2, in the City of Clifton, County of Passaic, connecting link on Route 11, said 50% not to exceed $60,000. and with the understanding that care will be exercised in the supervision by the State of the work as performed in Passaic County.

Invitations-Hunterdon County

The Secretary presented a communication from the Board of Freeholders of Hunterdon County inviting the Commissioners to be the guests of the Hunterdon County Board of Freeholders at a dinner to be given to the State Association of Freeholders, at the Hunterdon County Country Club at Clinton, N.J. at noon on Monday, July 9, 1923. On motion, duly seconded, the Secretary was directed to accept the invitation on behalf of the Commission and advise that Chairman Scott would attend for the Commissioners.

Traffic Signals Route 8

The Secretary presented a communication from the Borough of Riverdale requesting that a stationary signal be placed on State Highway Route 8 at the junction of the Hamburg and Pompton Turnpikes. The Secretary also presented a report from the State Highway Engineer advising of the dangerous condition at this point and of the further dangers which would arise through the placing of a stationary signal at this very busy corner. On motion, duly seconded, the communication was ordered received and referred to the State Highway Engineer for consideration with the Borough of Riverdale.

Traffic Signals, Route 9

Commissioner Stewart presented a communication forwarded to him by the Borough Clerk of Bound Brook, New Jersey, concerning the placing of traffic posts in the center of Union Avenue, Route 9 at the intersection of the streets. The Secretary informed the Commission that a rule of the Department had always been that traffic posts may be placed in the center of intersecting streets and not in the middle of State Highway Routes. Commissioner Stewart directed that the Secretary inform the Borough Clerk of Bound Brook as to this provision.

Morris County Repair Bids

The Secretary presented a communication from Hon. Charles A. Rathbun, County Counsel of Morris County, with further reference to the matter of extension of contract for the furnishing of repair materials on Morris County roads, on which matter the Attorney General had ruled that the contracts of the county for the year 1922 could not be extended into 1923. Mr. Rathbun took exception of the opinion of the Attorney General and asked that reconsideration be given on the basis of the claim as made in the letter of his dated June 30th. On motion by Mr. Stewart, seconded by Mr. Jelin, the State Highway Commission directed that the communication be referred to the Attorney General's Department with the request for information as to whether there was anything contained in this communication which would modify the opinion as rendered, and the Secretary was directed to advise Mr. Rathbun of the fact that the Commission takes pleasure in presenting this matter again to the Attorney General's Department.

Route 16, Section 2, Far Hills

The Secretary presented a communication from Far Hills Fair Association concerning progress on Route 16, Section 2, Far Hills to Bedminster Section, with reference to the possibility of its being completed prior to the annual fair at Far Hills, which occurs September 13, 14 and 15.

State Highway Engineer Sloan reported to the Commission that he had received a request for extension of time on Route 16, Section 2, as approved by the Somerset County Board of Freeholders to July 29th, 1923. He advised that it would probably be the month of September before the work would be completed. State Highway Engineer Sloan recommended that the extension of time be granted to the Engineering Construction Corporation for the completion of the work to July 29th, 1923, and that no further extensions be granted except for reasons which justify such an extension. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission approved the recommendation of the State Highway Engineer with the understanding that no further extensions should be granted and that the Board of Freeholders of Somerset County be notified of the decision of the State Highway Department. The Secretary was also directed to notify the Treasurer of the Far Hills Fair of the action taken by the State Highway Commission.

Advisory Board

The Secretary presented a communication from the Board of Freeholders of Hudson County advising of the designation of Mr. T. J. Wasser as a member of the State Highway Advisory Board for the study of the Vehicular Tunnel traffic. On motion duly seconded, the communication was ordered received and the Secretary was directed to express the thanks of the Commission for the action taken in connection with the work of the Advisory Board.

Commissioner Kidde brought before the Commission the suggestion of Major Church of the Port Authorities who stated that it will be necessary for the State Highway Commission to consider motor truck trunk lines for heavy traffic. Major Church also stated that he felt that such trunk lines should be free entirely from grade crossings. Commissioner Jelin stated that revenues for such trunk license fees, and he suggested that a conference be arranged between the States of New York, New Jersey and Pennsylvania, looking toward the arriving at means for additional road building from increased motor vehicle truck fees. Chairman Scott suggested that recommendations along this line be incorporated in the annual report of the State Highway Commission to the Legislature.

Commissioner Stewart suggested that all items brought up for consideration on which Legislation is to be obtained, should be kept together in order that when the proper time comes they may be presented to the Legislature.

New Amboy Bridge

The Secretary presented a communication from the Strauss Bascule Bridge Company with further reference to the estimates on the New Amboy Bridge as prepared by that company. The report was in detail. On motion by Mr. Jelin, seconded by Mr. Kidde, the communication was ordered received and placed on file.

Maintenance Route 4, New Gretna

The Secretary presented a petition from the residents of the

Village of New Gretna, requesting relief from the dust nuisance on Route 4 at New Gretna, The State Highway Engineer reported that this section was one on which lignin binder would be applied as soon after bids were received as possible. On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission directed that the Secretary inform the residents of New Gretna of the intentions of the State Highway Department to properly take care of the matter of dust laying through their village.

Route 1, Hackensack Bridge ✓

The Secretary presented for further consideration the report as prepared by Bridge Engineer Vogel concerning the temporary bridge over the Hackensack River on State Highway Route 1 extension. Commissioner Kidde inquired whether holdups being experienced at the present time, due to delays in bridge swings, was being occasioned by faulty construction. State Highway Engineer Sloan advised that as far as investigations had determined, these conditions were not due to the work of the contractor, but rather to the fact that the bridge was built on a pile foundation, temporary in nature, and it is almost impossible to hold a swing bridge on such a foundation, due to what must be a certain amount of settlement. Commissioner Kidde then suggested that the State Highway Engineer be instructed to place a surveyor on this bridge to take notes on settlement or movement in order that provisions may be made for counteracting the same. Commissioner Kidde then inquired as to the reason for the non-payment of the balance due the contractor on this work. The Secretary explained that this work was done under emergency approval from the State House Commission, and the approvals were not sufficient to cover the entire cost of the work done. When application was made by the former State Highway Commission it was not approved in time for meetings of the old Commission, and was then laid over until such time as a new Highway Commission was appointed. Commissioner Kidde, therefore, moved that in view of the circumstances, the State Highway Commission make request for additional State House Commission promise on the balance of the Hackensack River Bridge expense, and that the State Highway Commissioners present the same to the State House Commission. This was seconded by Mr. Jelin and adopted.

Route 16, Pluckemin

The Secretary presented a communication with resolution from the Somerset County Board of Freeholders together with petitions from tax payers and residents of Pluckemin and from the Bedminister Township Committee in reference to having the State Highway Commission place curbs and gutters on each side of the street through the Village of Pluckemin to prevent the flooding of the adjoining sidewalks and private properties. On motion duly seconded, the communication was referred to the State Highway Engineer to take up for consideration with the local authorities.

St. Joseph's Summer Camp

The Secretary presented a communication from the Morris County Board of Freeholders, transmitting a letter received by that Board from the Secretary of the St. Joseph's Summer Camp with reference to the condition of Route 5 near Hackettstown. On motion the communication was ordered received and referred to the State Highway Engineer for investigation as to the exact location of this property.

Route 5, Great Meadows.

The Secretary presented a communication with resolution from the Warren County Board of Freeholders with further reference to the matter of Route 5 and the grade crossing at Great Meadows, New Jersey, This matter having been disposed of earlier in the day, no action was requested.

Consulting Engineer Appointment

The Secretary presented an opinion from the Attorney General's Department with reference to the appointment of a special Consulting Engineer and the payment for such service in connection with the work of the Advisory Board, and which the Attorney General ruled as follows:

> "There is no express authorization in the statute for the appointment of such Advisory Board and any advice of any such Board would, of course, have to be acted upon by discretionary act of the State Highway Commission by majority vote. I find no authority in the statute for the employment of a Consulting Engineer to such an Advisory Board. I am, therefore, unable to advise that you have the authority to expend the State Highway money for this purpose."

Commissioner Kidde inquired whether the Attorney General had understood that the Consulting Engineer was being appointed to work of the State Highway Commission and not for the work of the Advisory Board. On motion by Mr. Jelin, seconded by Mr. Kidde, the matter was held over until the next meeting of the Commission.

"Highwayman"

The Secretary read a communication from Mr. H. E. Deats of Minneakoning Farm at Flemington, New Jersey, commending the Commission for its decision not to charge for the "Highwayman". On motion duly seconded the communication was ordered received and placed on file.

Schedule of Business

The Schedule of Business was next taken up for consideration item by item as follows:

Route 13, Trenton-Princeton

State Highway Engineer Sloan requested authority to advertise for the work of drainage and paving for Route 13, between Trenton and Princeton, work to be advertised in two sections, approval to be given subject to approval of plans and specifications by the State Highway Engineer. On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission unanimously adopted the following resolution:

BE IT RESOLVED, that the State Highway Commission does hereby approve of plans and specifications for the construction of Route 13, between Trenton and Princeton, and

BE IT FURTHER RESOLVED, that the Secretary is authorized to place the necessary advertisements after approval by the State Highway Engineer and the Chairman of the State Highway Commission.

Route 13, Trolley Tracks

The State Highway Engineer submitted to the Commission a proposed resolution for adoption in connection with State Highway Route 13 through Lawrence Township, and also a resolution which is to be adopted by Lawrence Township after it has been passed upon by the State Highway Commission. On motion by Mr. Stewart, seconded by Mr. Jelin, the State Highway Commission unanimously adopted the following resolution concerning the establishment of State Highway Route 13, through the Township of Lawrence, Mercer County, subject to interest at 5% on money advanced by the State, if same is possible.

WHEREAS, by an Ordinance duly adopted by the Township Committee of the Township of Lawrence in the County of Mercer and State of New Jersey on or about February 16, 1899, the Trenton Street Railway Company was authorized to construct, maintain and operate a street railway and to use electricity and electric motors as the propelling power of its cars, in, upon, and along the public highway known as the Lawrenceville Road in said Township of Lawrence; and

WHEREAS, with reference to that portion of said street railway which is described in said Ordinance as follows, "where the tracks pass through the village of Lawrenceville, beginning at the school property and continuing through the village to the Presbyterian Church," it was required by said Ordinance that the track should be constructed of nine-inch girder rails and that said rails should be laid eight feet from the curb line on the right hand side of the road going towards Princeton; and,

WHEREAS, by an Ordinance adopted on or about February 20th, 1899, the Board of Chosen Freeholders of Mercer County granted to the said Trenton Street Railway Company leave and permission to construct, maintain and operate said street railway; and,

WHEREAS, after the passage of the two Ordinances aforesaid, the said Trenton Street Railway Company constructed a line of street railway, with the necessary poles and overhead structures, in accordance with the terms and provisions of said Ordinances and under and by virtue of the authority conferred by the same, and ever since has been and now is operating and maintaining said street railway in the manner authorized by said Ordinances; and,

WHEREAS, since the passage of said Ordinances and the construction of said street railway, the State Highway Commission of New Jersey, acting by virtue of the authority conferred upon it by law, has taken over the said Lawrenceville Road as a State highway and is about to lay a concrete paving thereon, and has determined to change the location of the tracks and the type of rail of said street railway as the same runs through the said village of Lawrenceville;

NOW, THEREFORE, BE IT RESOLVED by the State Highway Commission

(1) That the State Highway Commission will relocate and rebuild a portion of said track, including necessary poles and overhead, for a distance of approximately 4500 feet in length as the same passes through the village of Lawrenceville. the portion so to be relocated and rebuilt being shown on a certain map or plan on file in the office of the State Highway Commission, which shows the location both of the old track and the new track, with pole locations for necessary overhead, herein provided for, and which is hereby made a part of this Ordinance,

(2) That in relaying said tracks said State Highway Commission will use T rail of standard section weighing between 80 and 100 pounds per yard instead of nine inch girder rail, and will use Dayton resilient ties or creosoted ties, and that the cost of said rail and ties and of track fastenings, not to exceed the sum of Fifteen thousand dollars ($15,000.) shall be assessed against and borne by the said Trenton Street Railway Company, which is hereby given two years to reimburse said State Highway Commission for the same.

(3) That the Franchise of the said Trenton Street Railway Company and all the terms thereof are to remain in full force and effect, excepting as to the location of the tracks in the village of Lawrenceville as herein before stated.

On motion by Mr. Stewart, seconded by Mr. Kelly, the State Highway Commission approved of the form of resolution as presented by the State Highway Engineer for adoption of the Township Committee of Lawrence Township and directed that the Secretary forwarded a copy of same to the Township Committee in order that the action as recommended may be approved.

Route 9, Section 9,
Extension of Time.

State Highway Engineer Sloan presented for the Commission's consideration the request of the Crilly & Cannon Construction Company for an extension of time of eighty working days on Route 9, Section 9, this extension having already been granted by the County of Warren, where the work is being done under the Reimbursement Act. State Highway Engineer Sloan reported to the Commission that the specified date for the completion was eighty working days from July 1st, 1922, and an additional extension of eighty working days was approved on December 28th, 1922. He reported that the contract is now eighty per cent completed, and he recommended that only an extension of thirty days be granted and that the Board of Freeholders of Warren County be so notified in order that no further extensions may be granted except for good and sufficient reasons. On motion by Mr. Kidde, seconded by Mr. Jelin, the recommendation of the State Highway Engineer was approved and an extension of thirty working days was granted on Route 9, Section 9, Phillipsburg-Still Valley Section.

Fenwick Creek Bridge, Route 6

State Highway Engineer Sloan recommended approval of a second extension of fifty working days to contractor Samuel Campbell on Fenwick Creek Bridge, Route 6. The State Highway Engineer called attention to the fact that considerably over one-half the time embraced in this extension has already elapsed. He further recommended that no further extensions on the work will be approved. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission approved the recommendations of the State Highway Engineer for fifty working days extension on Fenwick Creek Bridge, same having been approved by the County of Salem.

Route 3, Section 11, Camden City

State Highway Engineer Sloan reported to the Commission in connection with Route 3, Section 11, in Camden City, that there are remaining about 1800 square yards of paving to be laid in order to connect between Haddon Avenue and the undercrossing of the West Jersey & Seashore Railroad, and he recommended that an allowance of $7,830.00 be made to the City of Camden they to agree to complete the paving of this highway and install the necessary curbs and gutters. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission approved of the payment by the State of $7,830. toward the improving of Route 3, connecting link in Camden City in accordance with the recommendation of the State Highway Engineer.

Route 14, Swainton-Marshall's Corner.

The State Highway Engineer presented a letter from Robert J. Kay of the Board of Freeholders of Cape May County, calling attention to the fact that the State Highway Commission had discussed the matter of construction of the pavement from Swainton to Marshall's Corner on Route 14, a distance of approximately eight miles, and he asked that the Commission give this consideration in the 1923 program. State Highway Engineer Sloan reported that plans and specifications for this section of highway are practically completed and he would recommend that it be advertised at an early date in order that it might be included as work that can be finished during this construction year. On motion by Mr. Stewart, seconded by Mr. Kidde, the State Highway Commission adopted the following resolution:

BE IT RESOLVED, that the State Highway Commission does hereby approve of plans and specifications for the construction of Route 14, Swainton to Cedar Springs Station with reinforced concrete pavement, and

BE IT FURTHER RESOLVED, that the Chief Clerk is directed to place the necessary advertisement for this work after approval by the State Highway Engineer and the Chairman of the State Highway Commission.

Route 1, Section 14, Right-of-Way.

Commissioner Jelin reported in the matter of properties on Route 1, Section 14, required from Mrs. Matilda Herr and Mr. John N. Adams that he had learned after this matter was referred to him, that the price was agreed upon by the Right-of-Way Division and the owners of the properties, and he was ready to recommend that the Commission approve the purchase of property on Route 1, Section 14, from Mrs. Matilda Herr, 0.14 acres for $322.00 and from John N. Adams, 0.131 acres for $301.00, and he moved approval of this recommendation which was seconded by Mr. Kidde and adopted.

Right of Way, Route 2.

The Secretary presented a communication from the Right-of-Way Division for the purchase of property needed on Route 2, Section 5, from A. Brakely Estate for the sum of $500.00. This property had been appraised by Real Estate men at $600.00. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission approved of the purchase of property from A. Brakely Estate on Route 2, Section 5, the amount of .818 acres for the sum of $500.00. This property had been appraised by Real Estate men at $600.00. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission approved of the purchase of property from A. Brakely Estate on Route 2, Section 5, the amount of .818 acres for the sum of $500.00.

Route 6, Woodstown, Crossing.

The State Highway Engineer presented a report in connection with the construction of overhead bridge at Woodstown on Route 6 work being done by the railroad company and financed by the State, the State to be reimbursed by the Railroad Company. State Highway Engineer Sloan recommended that the Board of Freeholders of Salem County be advised that if they desired sidewalks and are prepared to pay for the construction of the same, the State Highway Commission will negotiate with the Railroad Company along the lines of having sidewalks added to the bridge, otherwise the work will be completed under the original agreement. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission approved the recommendation of the State Highway Engineer.

Roads to State Institutions

State Highway Engineer Sloan submitted for the attention of the Commission a report on the requirements for the construction of roads leading to State Institutions throughout the State, in which it was recommended that the Commission give consideration to the construction, first, of the road leading to the New Jersey State Asylum and the New Jersey School for Deaf, on which road the County of Mercer was willing to share one-half of the expense. The State's share of this proposition would be $31,000.00. Second, the road which the Commission had already approved leading to the New Jersey State College for Women, which is an extension of Nichol Avenue at New Brunswick, the estimated cost of this work being $13,000.00; third, the repair of the road leading from Vineland to the Home for Feeble Minded Woman at an estimated cost of $4,000. Commissioner Jelin suggested that action be taken on those roads which were familiar to the members of the State Highway Commission, and all the other roads named be first inspected by the members of the Commission. Chairman Scott recommended to the Commission early action on the construction of the road leading to the New Jersey State Asylum and the New Jersey School for Deaf on which the County of Mercer had approved the paying of 50% of the cost. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission approved of the construction of Sullivan Way leading to the New Jersey State Hospital and the New Jersey School for Deaf jointly with the Board of Freeholders of Mercer County, it being estimated that the total cost of this work will be $62,000, 50% of which is to be paid by the State. The Secretary reported that in view of action already taken by the Commission for the improvement of Nichol Avenue, it would not be necessary for any final action to be taken at this time before work could proceed.

Material-Second Hand Block ✓

State Highway Engineer Sloan reported to the Commission that he had requested bids for the sale and removal from the trolley track area on Route 1, Section 13, Highland Park of 180,000 second hand granite blocks. Proposals had been requested from eight parties, the highest bid being received from the Utility Construction Company at $9.25 not loaded on trucks, and he recommended that the sale of these granite block (second hand) be made to the Utility Construction Company in view of their's, the highest price bid. On motion by Mr. Stewart, seconded by Mr. Jelin, the State Highway Commission approved the recommendation of the State Highway Engineer and authorized the sale of second hand granite blocks on Route 1, Section 13, Highland Park to the Utility Construction Company, at their's the lowest bid amounting to $9.25 per thousand, and not loaded on trucks.

Sparta-Woodport Road, Sussex Co. ✓

State Highway Engineer Sloan recommended the acceptance of the Sparta-Woodport Road, Sparta Township, Sussex County, Township Aid. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission accepted the completed work on the Sparta-Woodport Road, Sparta Township, Sussex County, and authorized final payment to be made to the Township.

Warren County, Township Aid

The State Highway Engineer presented to the Commission for approval plans and specifications on Washington-Oxford to Karrville Road, Section 2, Mansfield Township, Warren County, Township Aid, work to be bituminous surface-treated macadam, at an estimated cost of $15,943.10. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission approved of plans and specifications for the above named road, work to be done under Township Aid, Warren County, already set aside.

Burlington County, Motor Vehicle Aid

State Highway Engineer Sloan presented for the consideration of the Commission the request of the County of Burlington for approval of award by the County for the reconstruction of

Bridgeboro-Chester Ave. Road
Vincentown-Cross Road
Florence Road,

work to be done under Chapter 10, Laws of 1919, the County asking the State to make an agreement for the carrying on of this work for a longer period than five years. Commissioner Kidde stated that in view of the fact that Burlington County was already carrying a considerable amount of construction under the provisions of Chapter 10, Laws of 1919, he would move that the application be received and placed on file and that the County of Burlington be advised that the State Highway Commission is unable to approve of the said construction on account of the fact that the funds in hand at present do not permit of the approval in accordance with Chapter 10, Laws of 1919.

Somerset County, Township Aid

State Highway Engineer Sloan recommended for approval, plans and specifications for the Claremont Post-Kunhardt Road, Section 2, Parts 1 and 2, in Bernards Township, Somerset County, Township Aid, the estimated cost being $13,333.33. On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission approved the plans and specifications for the Claremont Post-Kunhardt Road, Section 2, Parts 1 and 2, Bernards Township, Somerset County, work to be completed from Township Aid funds already set aside.

Long Valley-Hunterdon County Line Road

The State Highway Engineer presented a communication from the

Board of Freeholders of Morris County advising that the County has not the funds with which to pave the Long Valley-Hunterdon County Line Road with 20' wide pavement, it being the purpose to construct an 18' wide pavement in compliance with the State Aid Act. State Highway Engineer Sloan recommended that the County of Morris be directed to place a 20' pavement on this road since the State traffic will best be served and there are no further 18' pavements being laid where improved roads are adopted. Commissioner Kidde suggested that in view of the fact that the State Highway Commission is asking for additional work to be done by Morris County beyond that which was contemplated, the State to endeavor to assist the County of Morris in the cost of additional work and he moved that the State Highway Commission approve of an extra apportionment of $7,000.00 for aid on the Long Valley-Hunterdon County Line Road to Morris County in the event the County will agree to construct this road to a width of 20' rather than 18'. This was seconded by Mr. Stewart and adopted.

Evesham Road, Camden County

State Highway Engineer Sloan recommended approval of contract of Evesham Road, Camden County, Motor Vehicle Aid. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission approved of the award of contract on Evesham Road (White Horse Pike to Haddonfield-Berlin Road) Camden County, Motor Vehicle Aid.

Motor Vehicle Schedule

The State Highway Engineer recommended to the Commission approval of agreements and schedules for Motor Vehicle Aid for 1923 with the Counties of Burlington and Monmouth. On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission approved of the agreements and schedules for Motor Vehicle Aid to the Counties of Burlington and Monmouth as recommended by the State Highway Engineer.

Employments

The State Highway Engineer presented to the Commission a statement of employments as approved by him since the last meeting of the State Highway Commission, and recommended the approval of the State Highway Commission. On motion, duly seconded, the State Highway Commission unanimously approved the following employments as recommended by the State Highway Engineer.

July 1, 1923	J. B. Branmer	Gravel Patrolman	$ 90.	mo.

Grade Crossing Accidents ✓

Chairman Scott presented a communication received by him from the Baltimore & Ohio Railroad Co., requesting assistance in lessening highway crossing accidents involving automobiles by not permitting ornamental trees, shrubbery, plant growth, advertising boards, etc., to hinder the drivers from having a good view of the railroad tracks when he is approaching a crossing. On motion, duly seconded, the State Highway Commission directed that the communication be received and that the Engineering Department notify the Resident Engineers and Inspectors to assist in the lessening of crossing accidents in line with the suggestion of the Baltimore & Ohio Railroad Company's communication.

Cove Road, Camden ✓

Commissioner Jelin reported that he was prepared to accept the completed Cove Road from Merchantville Row Line to Burlington Pike in Camden County, the same having been referred to him at the last meeting of the Commission and he moved acceptance of this road. This was seconded by Mr. Stewart and adopted.

Bridge at New Brunswick ✓

Commissioner Stewart reported to the Commission concerning a hearing held at the City Hall, New Brunswick, on the matter of the location of the new bridge over the Raritan River. He reported that plans as projected by the State Highway Engineer called for a bridge at a point immediately opposite the campus of the new Woman's College and would take a strip of ground about 120 feet wide on the westerly side of the campus going through a grove of trees. He further advised that the entire tract of land owned by the Woman's College contained 40 acres of ground and plans were already under way for the erection of a number of buildings which would carry one of these buildings on land on which the State proposed to place the bridge approaches. Commissioner Stewart reported a spirited meeting in which there were represented protests from the Woman's College, from the Experimental Station, from the State Federation of Women's Clubs from Rutgers College and from Mr. James Nelson who had donated considerable land to the colleges. The principal objection appeared to be the proximity of the proposed bridge line to the campus grounds which was felt would remove the privacy of the campus. Those in favor of the proposed new bridge were, in addition to the State Highway Engineer, the City Engineer of New Brunswick, who contended that the construction of the bridge would open a new site for increasing the ratables of the City of New Brunswick, and further that the site as selected appeared to be the only suitable and least expensive location possible. Commissioner Jelin reported that he had received word from Dr. Demarest and Professor Titsworth of Rutgers that they desired a conference with the State Highway Engineer before any final action was taken. Commissioner Kidde stated that he would prefer to go on the ground and make a personal investigation before he would decide any definite location for the bridge, and he moved that the matter be held over for disposition at the next meeting of the Commission.

Inspection-Trips ✓

The Secretary reported to the Commission that an invitation had been received for the Commissioners to attend an inspection of the Palisade Inter-State Park on Tuesday next. On motion duly seconded, the Secretary was directed to accept the invitation on behalf of the Commissioners and advise that they would be present at the appointed time.

Communications ✓

Commissioner Stewart presented to the Commission a communication from Mr. Howard Bird of Dunellen, New Jersey, enclosing a map and documents concerning the road in which he is interested in having the State complete. On motion, duly seconded, the communication was ordered received and referred to the State Highway Engineer for further disposition.

On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission adjourned at 6:30 P.M., to meet in regular session on Thursday, July 12, 1923, at 10:30 A.M.

Respectfully submitted,

A. LEE GROVER

Secretary.

JUL 1 [illegible] 23

MINUTES OF MEETING - July 12, 1923.

A regular meeting of the State Highway Commission was held at the offices of the Commission, Broad Street Bank Building, Trenton on Thursday, July 12th, 1923. The meeting was called to order by the Chairman at 10:45 A.M.

Present: General H. L. Scott, Chairman. Messrs. Kidde and Jelin.

Absent: Mr. Stewart who came in later.

Mr. Fishberg, Assistant Secretary, advised that Mr. Grover had been subpoenaed on a court case to appear in Newark which necessitated his being absent from this meeting.

Route #9, Dunellen ✓

A delegation from Middlesex County headed by Freeholder William T. Haight appeared and were granted a hearing before the Commission. Mayor Giddes of Dunellen was introduced and spoke to the Commission in reference to the condition existing on State Highway Route #9 through Dunellen, stating that the portion of highway between the trolley tracks was in a very deplorable and dangerous condition. He informed the Commission that the State had constructed the pavement through the town on either side of the tracks and they felt that something should be done to have the entire width of the street put in a passable condition. Mr. Kidde inquired of Mayor Giddes as to how much the Town of Dunellen would be willing to pay as their share of this improvement, but was informed that they could not definitely bind themselves at this time. After considerable discussion, the whole matter was referred to State Highway Engineer Sloan for compilation of a report and preparation of an estimate as to the cost of this work, when the matter would be again taken up with the Town authorities.

Rt. 4, Manasquan Bridge Fill ✓

Mr. Lloyd C. Riddle, Mayor of Manasquan and attorney at law, next appeared on behalf of clients who were owed money by L. B. Harrison in connection with his contract for making the fill at the Manasquan River Bridge. Mr. Riddle informed the Commissioners that he had been advised that the money owed Mr. Harrison in connection with this contract had been turned over to Mr. E. H. Russell of the

Department of Commerce and Navigation to be used in the payment of specific claims, which they felt had not been done, and his purpose in coming before the Commission was to ascertain if they could not recall this money and see that it was used for the payment of the labor claims which he holds. There was considerable discussion as to the rights of the Commission in the matter of claims filed against contractors and Mr. Riddle was advised that the Commission was not aware when they turned this money over to Mr. Russell that it was to be used for any specific purpose, they acting entirely upon the advice of the Comptroller's office and the strength of the Power of Attorney as held by Mr. Russell. The Commission felt, however, that the labor claims as held by Mr. Riddle should be given consideration and the Chairman was directed to communicate with Mr. Russell to determine what settlement could be made of these claims.

Mr. Stewart came into the meeting at this time.

Damage Claims ✓

Mrs. Anita Helferich of New Brunswick next appeared before the Commission. Mr. Jelin advised the Commission that the matter of the accident sustained by Mrs. Helferich had been referred to him sometime ago and he had invited her to come before the Commission and tell her story in order that all the Commissioners might be fully aware of the circumstances. Mrs. Helferich gave the Commission an outline of her accident, stating that she had been in the hospital for fourteen weeks and did not know when she would be able to return to work.

She stated that her actual expenses and loss of time had cost her $1,680.00 and she had made a claim for $3,000.00. General Scott stated that an opinion as to how the Commission could pay such claims had been requested from the Attorney General's Department and until such time as the opinion is received, they could not give a decision in the matter. Mrs. Helferich was, therefore, advised that the matter would be taken up with her again as soon as the opinion of the Attorney General is received.

Rt. 6, Right of Way, Mrs. Lines

Miss Lines and her attorney, Mr. Mills, next appeared in reference to the moving of the property of Miss Lines' mother on Rt. #6. Mr. Mills stated that they had come to ask if the Commission could not let this matter lay over until the next construction season inasmuch as it was impossible to do anything with Mrs. Lines and they felt that it would be a great injustice to cause her to lose her home at this time. They were advised that it was the feeling of the Commission that this improvement had been held up for two years and it was necessary that this property be moved at once in order that the dangerous condition existing at this curve may be eliminated.

Route No. 16, Bernardsville

Mr. Stryker, a member of the Bernards Township Committee, next appeared and requested that the Commission do something in regard to the construction of Alcott Square in Bernardsville, a portion of Route #16, if possible this year. He stated that the Township was ready to go ahead with their share and were also willing to finance the State's share and be reimbursed at a later date. He further stated that they would be willing to donate the services of their engineer in getting out the plans and specifications if it was determined to go ahead with this work. Mr. Bedwell informed the Commission that we have a tentative line for this work and suggested that if it is determined to go ahead with this work that the contract may be made to include all that section of Route #16 from Blaziers Corner through Alcott Square to the end of the present concrete. After a further discussion of this matter, Mr. Kidde moved that the engineer be instructed to complete the survey and prepare plans for the work from Blaziers Corner through Alcott Square to the end of the present concrete, with the understanding that Bernards Township will donate the services of their engineer in the preparation of said plans and further that the Township will agree to pay for the extra work necessary through Alcott Square. This was seconded by Mr. Jelin and adopted.

Route 15, Sec. 4, Millville.

The Secretary advised that Mr. McAllister who had requested a hearing in connection with the trolley track work on Route #15, Sec. #4, Millville, had been in conference with Mr. Bedwell and had decided not to appear at this time.

Office Building

The Secretary presented an opinion from the Attorney General advising as to the purchase of property for the purpose of erection of a State Highway office building. On motion by Mr. Jelin, seconded by Mr. Stewart, it was directed that same be filed and that a copy be forwarded to the State House Commission.

Right of Way, Amboy Bridge

The Secretary presented a communication from Hon. N.A.K. Bugbee, Comptroller, advising that a certified check for $250,000.00 refund has been received from the W. J. Donnell Lumber Company and has been deposited to the credit of the State Road Fund. On motion by Mr. Stewart, seconded by Mr. Kidde, the communication was ordered filed. In this connection, Mr. Kidde inquired as to when the Commission would order advertisement on the Amboy Bridge, and was informed that Mr. Hudson was still waiting some approval from the government. Mr. Kidde moved that the State Highway Engineer be directed to wire Mr. Hudson to ascertain if this approval could be obtained and the plans put in such shape that authority for advertisement can be given at the meeting next Tuesday. This was seconded by Mr. Jelin and adopted.

Middlesex County, Request for Aid

The Secretary presented a communication from Mr. L. J. Belloff, Member of the Board of Freeholders of Middlesex County, requesting a special allotment of $6,000.00as aid in the repair of the Aqueduct-Kingston Road, on which they claimed to have expended $12,000.00 and which was used as an official detour last year. This matter was discussed at some length and Mr. Kidde moved that this matter be laid on the table for the present. This was seconded by Mr. Stewart and adopted.

Route #15, Section No. 4

The Secretary presented a communication and resolution from the City of Millville concerning the trolley tracks on Route #15, Section #4, and requesting advice as to when a delegation may appear before the Commission. Mr. Stewart moved that this matter be laid on the table for the present time and that the City of Millville be notified when the Commission is ready to give them a hearing. This was seconded by Mr. Jelin and adopted.

Frenchtown Boro Request Hearing

The Secretary presented a communication from the Borough of Frenchtown requesting that they be given a hearing. On motion by Mr.

Jelin, seconded by Mr. Kidde, it was directed that they be given a hearing at the meeting next Tuesday.

Grade Crossing, Route 5, Great Meadows

The Secretary presented a communication from the Lehigh & Hudson River Railway Company in reference to the matter of elimination of the Great Meadows grade crossing on Route #5. Mr. Kidde moved that they be notified that the decision as reached had been made on other points than those brought up in their letter, and that they be given a hearing at the next meeting at which time the matter could be discussed from their viewpoint. This was seconded by Mr. Jelin and adopted.

Route No. 9, Westfield

The Secretary presented a communication from Alexander Blair, Town Surveyor of Westfield, in further reference to the construction of Route #9, to Westfield, and requesting that the Commission give them some definite advice as to their intent of proceeding with this improvement. Mr. Jelin moved that they be advised that it is the intention of the Commission to proceed with this work in the year 1924 and any preliminary work done now will be in line to make it possible. This was seconded by Mr. Kidde and adopted.

The Schedule of Business was next taken up item by item as follows:

Route 8, Section #4.

The State Highway Engineer recommended approval of plans and specifications for Route #8, Section #4, Smith Mills-Charlottesburg, Passaic County, and that the order to advertise be given. On motion by Mr. Jelin, seconded by Mr. Stewart, the following resolution was adopted:

> RESOLVED, that the State Highway Commission does hereby approve of plans and specifications for the construction of Route No. 8, Sec. No. 4, Smith Mills-Charlottesburg, Passaic County, and
>
> BE IT FURTHER RESOLVED, that the Chairman is authorized to sign the necessary papers as approved by the State Highway Engineer and the Chief Clerk is directed to place the necessary advertisements for the work.

Route No. 8, Section #4A

The State Highway Engineer recommended approval of plans and specifications for Route #8, Section 4A, Charlottesburg through Newfoundland on the old alignment of this road, and that the order to advertise be given. On motion by Mr. Stewart, seconded by Mr.

Jelin, the following resolution was adopted:

> RESOLVED, that the State Highway Commission does hereby approve of plans and specifications for the construction of Route #8, Section 4A, Charlottesburg through Newfoundland on the old alignment of this road, and
>
> BE IT FURTHER RESOLVED, that the Chairman is authorized to sign the necessary papers as approved by the State Highway Engineer and the Chief Clerk is directed to place the necessary advertisements for this work.

Bridge at M. P. 100.9, Rt. 4

The State Highway Engineer recommended approval of plans and specifications for the construction of Bridge at M. P. 100.9, on Route #4, and that the order to advertise be given. On motion by Mr. Kidde, seconded by Mr. Jelin, the following resolution was adopted:

> RESOLVED, that the State Highway Commission does hereby approve of plans and specifications for the construction of Route #4 Bridge at M. P. 100.9, and
>
> BE IT FURTHER RESOLVED, that the Chairman is authorized to sign the necessary papers as approved by the State Highway Engineer and the Chief Clerk is directed to place the necessary advertisements for this work.

Crosswicks Cr. Br.

Bridge at M. P. 26.5, Route 2

The State Highway Engineer recommended approval of plans and specifications for the construction of Bridge at M. P. 26.5, on Route #2, and that the order to advertise be given. On motion by Mr. Kidde, seconded by Mr. Jelin, the following resolution was adopted:

> RESOLVED, that the State Highway Commission does hereby approve of plans and specifications for the construction of Route #2, Bridge at M. P. 26.5, and
>
> BE IT FURTHER RESOLVED, that the Chairman is authorized to sign the necessary papers as approved by the State Highway Engineer and the Chief Clerk is directed to place the necessary advertisements for this work.

Right of Way, Route #16.

The State Highway Engineer recommended approval of purchase of right of way from Edward J. Scudder on Route #16, Section #6, for the consideration of $1.00. On motion by Mr. Jelin, seconded by Mr. Stewart, the Commission approved of the purchase of said property. In this connection, General Scott was requested to write to Mr. Scudder thanking for his cooperation with the Commission in this matter.

Right of Way, Route No.16.

The State Highway Engineer submitted for the consideration of the Commission the purchase of right of way from Anita C. Burnett on Route #16, Section #6, for the consideration of $400.00. On motion by Mr. Kidde, seconded by Mr. Jelin, the Commission approved of the purchase of property on Route #16, Section #6, from Anita C. Burnett for the sum of $400.00.

Phillipsburg-Belvidere Sec1,Warren Co.

The State Highway Engineer recommended approval of the plans and specifications for the Phillipsburg-Belvidere Road, Section #1, Warren County, Federal Aid. On motion by Mr. Kidde, seconded by Mr. Jelin, the Commission approved of the plans and specifications for the Phillipsburg-Belvidere Road, Section #1, Warren Co., Federal Aid, subject to the approval of the Federal government.

Bergen Turnpike, Hudson County

The State Highway Engineer recommended approval of additional allotment of $3,600.00 on Bergen Turnpike between Pleasant Avenue and Hudson Boulevard, Hudson County, State Aid. On motion by Mr. Jelin, seconded by Mr. Kidde, the Commission approved of an additional allotment of $3,600.00 on Bergen Turnpike between Pleasant Avenue and Hudson Boulevard, Hudson County, State Aid.

Belleville Turnpike

The State Highway Engineer recommended approval of award of contract for the construction of the Belleville Turnpike and Passaic Avenue, Hudson County Motor Vehicle Aid, the contract having been awarded by Hudson County to Robert J. Emmer on his bid of 150% of the Engineer's estimate of cost. On motion by Mr. Jelin, seconded by Mr. Kidde, the Commission approved of the award of contract as made by Hudson County.

Crown Point Road

The State Highway Engineer recommended approval of specifications for Crown Point Road, Section #5, Gloucester County, Motor Vehicle Aid. On motion by Mr. Kidde, seconded by Mr. Stewart, the Commission approved the specifications for Crown Point Road, Sec. #5, Gloucester County Motor Vehicle Aid.

Long Valley-Hunterdon Co.Line Rd.

The State Highway Engineer recommended the acceptance of the Long Valley Hunterdon County Line Road, drainage and grading job, Morris County State Aid. On motion by Mr. Jelin, seconded by Mr. Kidde, the Commission approved of the recommendation and accepted the grading and drainage job on the Long Valley-Hunterdon County Line Road, Morris County State Aid.

Route #1, Sec. 12, Rahway Ave., Eliz.

The State Highway Engineer submitted the following report on bids received for the construction of Route #1, Section #12, Rahway Avenue, Elizabeth, and recommended award to the lowest bidder, Newark Paving Company, at 99.9 of the Engineer's estimated units cost, amounting to $108,073.62.

Newark Paving Company	99.9%
Utility Const. Company.	102.
Standard Bitulithic Company	103.25
Joseph F. Burke	104.3
James J. Barrett.	105.
J. B. Gillingan-Casy Company.	106.9
N. J. Const. Company.	107.
Northern Const. Company	107.8

On motion by Mr. Kidde, seconded by Mr. Jelin, the Commission adopted the following resolution:

RESOLVED, that the State Highway Commission do hereby award the contract for the construction of Rt. 1, Sec. 12, Rahway Avenue, Elizabeth, to the Newark Paving Company of Newark, N.J. at their's the lowest bid amounting to 99.9% of the Engineer's estimated units of cost, the said bid amounting to $108,073.62, and

BE IT FURTHER RESOLVED, that the Chairman is authorized to sign the necessary contracts as approved by the State Highway Engineer.

Rt. 10, Sec. 2, Broad Ave., Glen Road

The State Highway Engineer submitted the following report on bids received for the construction of Route #10, Section #2, Broad Avenue-Glen Road, Bergen County, and recommended award to the lowest bidder, John J. McGarry, at 97% of the Engineer's estimated units of cost or a contract amount of $111,690.55.

John J. McGarry	97%
Krellwitz Cont. Co.	107.3
N. J. Const. Co.	107.5
Ferber-Gill Company	108.4
Curtin Brothers	109.
Kinzley & DiNapoli	120.

JUL 12 1923

On motion by Mr. Kidde, seconded by Mr. Jelin, the Commission adopted the following resolution:

> RESOLVED, that the State Highway Commission does hereby award the contract for the construction of Route #10, Sec. 2, Broad Ave., Glen Road, Bergen County, to John J. McGarry, at his the lowest bid amounting to 97% of the Engineer's estimated units of cost, the said bid amounting to $111,690.55, and
>
> BE IT FURTHER RESOLVED, that the Chairman is authorized to sign the necessary contracts as approved by the State Highway Engineer.

Route #10, Section 1C.

The State Highway Engineer submitted the following report on bids received for the construction of Route #10, Section 1-C, Bluff Road-Anderson Avenue, Bergen County, and recommended award of contract to the lowest bidder, John J. McGarry, at 99% of the Engineer's estimated units of cost, or a contract amount of $56,906.09.

John J. McGarry	97%
Krellwitz Const. Co.	109.
Curtin Bros.	109
Ferber-Hill Company	114.75
Kinzley & DiNapoli	127.

On motion by Mr. Kidde, seconded by Mr. Jelin, the Commission adopted the following resolution:

> RESOLVED, that the State Highway Commission does hereby award the contract for the construction of Rt. 10, Sec. 1-C, Bluff Road-Anderson Avenue, Bergen County, to John J. McGarry, at his the lowest bid amounting to 99% of the Engineer's estimated units of cost, the said bid amounting to $56,906.90, and
>
> BE IT FURTHER RESOLVED, that the Chairman is authorized to sign the necessary contracts as approved by the State Highway Engineer.

Route #4, Cedar Creek Bridge

The State Highway Engineer submitted the following report on bids received for the construction of Cedar Creek Bridge at M. P. 41.1 on State Highway Route #4, Ocean County, and recommended award of contract to the lowest bidder, Gibbs-Mueller Co., at $36,633.00.

Gibbs-Mueller Co.	$36,633.00
F. W. Schwiers, Jr. Co.	36,751.00
Krellwitz Cont. Co.	37,000.00
S. S. Thompson & Co.,Inc.	39,000.00
Louis J. Sieling	41,016.00
Tuller Const. Co.	45,780;00

On motion by Mr. Kidde, seconded by Mr. Jelin, the following resolution was adopted:

> RESOLVED, that the State Highway Commission does hereby award the contract for the construction of Route #4, Cedar Creek Bridge at M. P. 41.1 Ocean County, to Gibbs-Mueller Co., at their's the lowest bid amounting to $36,633.00, and
>
> BE IT FURTHER RESOLVED, that the Chairman is authorized to sign the necessary contracts as approved by the State Highway Engineer.

Route #16, Primrose Br.Bridge

The State Highway Engineer submitted the following report of bids received fro the construction of Primrose Brook Bridge at M. P. 33.7 on State Highway Route #16, Section #6, Morris County, and recommended award of contract to the lowest bidder, Hoffman Construction Company, at their bid of $5,671.53.

Hoffman Const. Co.	$ 5,671.53
Kuchar Bros.	8,800.00
Arnolt-More, Inc.	9,700.00
Krellwitz Cont. Co.	10,000.00
R. R. Mansfield	11,327.00

On motion by Mr. Jelin, seconded by Mr. Stewart, the following resolution was adopted:

> RESOLVED, that the State Highway Commission hereby does award the contract for the construction of Route 16, Primrose Brook Bridge, Section #6, Morris County, to Hoffman Const. Co. at their's the lowest bid amounting to $5,671.53, and
>
> BE IT FURTHER RESOLVED, that the Chairman is authorized sign the necessary contracts as approved by the State Highway Engineer.

Washington Ave., Wash.Twp., Bergen Co.

The State Highway Engineer recommended that the Commission approve of the granting of an extension of time for the completion of the contract on Washington Avenue, Washington Township, Bergen County, Township Aid, to August 15th,1923. On motion by Mr. Jelin seconded by Mr. Kidde, the Commission approved of the granting of an extension of time to August 15th,1923, for the completion of the contract on Washington Avenue, Washington Township, Bergen County, State Aid.

Landis Township, Cumberland Co.

The State Highway Engineer recommends approval of Township Aid Force Account Agreement on Weymouth Road, Landis Township, Cumberland County. On motion by Mr. Jelin, seconded by Mr. Kidde, the

Commission approved of Force Account Agreement on Weymouth Road, Landis Township, Cumberland County, and authorized the Chairman's signature thereto.

Township Aid Requests ✓

The State Highway Engineer submitted a compilation of requests for aid from the Township Aid Fund as made by the townships of the several counties of the State, together with a map showing the location of the different applications. On motion of Mr. Kidde, seconded by Mr. Jelin, it was directed that a copy of this report should be forwarded to each of the Commissioners for investigation before final action is taken thereon.

Inspectors Reinstated ✓

The State Highway Engineer submitted a list of Material Inspectors, Asphalt Plant Inspectors, Division Material Inspectors and Maintenance Inspectors, who have successfully passed the eligibility examination, and recommended that they be reinstated in the department in their regular capacities. On motion by Mr. Kidde, seconded by Mr. Jelin, the Commission approved of the reinstatement of the following inspectors to their regular capacities in the department:

Material Inspectors

Chas. M. Reeves,	$125.	Wm. T. R. Kinnery	$135.
Chas. H. Walklett	125.		

Asphalt Plant Inspectors

Wm. W. Manning	$155.	Robert H. Mountford	$155.
Jack Uhler	140.	Frank W. Schultz	155.

Division Material Inspectors

Russell Pfitzinger	$155.	Howard S. Keim	$155.

Maintenance Inspector

Harold Macormiac	$130.	Frederick J. Baker	$120.
John L. Silvers	120.		

Employments ✓

The State Highway Engineer submitted a list of employments as made since the last meeting of the Commission and recommended approval of same. On motion by Mr. Jelin, seconded by Mr. Kidde, the Commission approved of the following employments:

JUL 12 1923

July 5, 1923	Geo. H. Garwood	Inspector	$125.	mo.
" 1, 1923	Ernest Machner	Gravel Patrol	85.	
" 16, 1923	Frank S. Wilson	Br. Designer	300.	
" 5, 1923	Alex. Silverglate	Office Boy	40.	

Hourly Basis

June 8, 1923	David Sutton,	M. T. D.	.45	hr
" 8, 1923	Clark Hewitt	M. T. D.	.45	
" 8, 1923	Clarence Sutton,	M. T. D.	.45	
" 16, 1923	Wm. Towlin,	M. T. D.	.45	
" 18, 1923	Floyd Shaw	M. T. D.	.45	
" 18, 1923	Monroe Chambers	M. T. D.	.40	

Phillipsburg-Belvidere Road, Sec. #1

The State Highway Engineer recommended approval of Project Statement on the Phillipsburg-Belvidere Road, Section #1, Warren County. On motion by Mr. Jelin, seconded by Mr. Kidde, the Commission approved of the Project Statement on the Phillipsburg-Belvidere Road, Section #1, Warren County, and authorized the adoption of the necessary resolution:

> WHEREAS, under date of June 6th, 1923, the County of Warren did pass a resolution expressing its desire to include the road from the Northerly boro line of Phillipsburg to State Highway Route #5, (about one-half mile north of Belvidere) by way of Harmony, Roxburg and Belvidere and from the Delaware River Bridge at Belvidere to connect with the above named Phillipsburg-Belvidere Road, a total distance of about thirteen and one-half (13½) miles, in the Seven Percent System of Highways of New Jersey, and
>
> WHEREAS, the County of Warren is desirous of improving that portion of said highway between Lincoln Street, Phillipsburg, and lower Harmony, a distance of 3.56 miles, and
>
> WHEREAS, the County of Warren did agree to comply with all requirements of the Bureau of Public Roads and Federal Aid Act of 1921.
>
> NOW, THEREFORE, BE IT RESOLVED, that the State Highway Commission does hereby ratify, confirm and approve the action of the Warren County Board of Freeholders, and
>
> BE IT FURTHER RESOLVED, that a project statement be executed and forwarded to the Bureau of Public Roads of the United States Department of Agriculture on account of this improvement.

Route 16, Section 5

The State Highway Engineer recommended approval of the plans and order to advertise on Route #16, Section #5, South Somerville to Woods Tavern, a distance of approximately three miles, the contract to include the bridges. On motion by Mr. Kidde, seconded by Mr. Jelin, the following resolution was adopted:

RESOLVED, that the State Highway Commission does hereby approve of plans and order to advertise on Route #16, Section #5, South Somerville to Woods Tavern, and

BE IT FURTHER RESOLVED, that the Chairman is authorized to sign the necessary papers as approved by the State Highway Engineer and the Chief Clerk is directed to place the necessary advertisements for this work.

Route #12, Sec. #1, Bridges.

The State Highway Engineer recommended the acceptance of the paving of the approaches to bridges on Route #12, Section #1, Pine Brook-Parsippany, the said work having been inspected by Commissioner Kidde, Mr. Burn and Mr. Bedwell on June 28th, and found to be satisfactory. On motion by Mr. Kidde, seconded by Mr. Jelin, the Commission approved of the acceptance of the paving of the approaches to bridges on Route #12, Section #1, Pine Brook-Parsippany.

Route #13, Lawrenceville.

State Highway Engineer Sloan presented the matter of the trolley track situation through Lawrenceville, stating that he had not as yet been able to reach a satisfactory agreement with the Trenton & Mercer County Traction Company. Mr. Kidde moved that Mr. Johnson, President of the Trenton & Mercer County Traction Company be invited to appear before the Commission at its afternoon session to discuss this matter with the Commission to see if an agreement could be arrived at. This was seconded by Mr. Jelin and adopted.

The Commission recessed at 1.30 P.M. for luncheon, to meet in regular session at 2.30 P.M.

The Commission reconvened at 2.30 P.M. with the same members present as at the morning session.

Increases

State Highway Engineer Sloan presented to the Commission the matter of salary increases which had been recommended for various members of the department and which had not been allowed in full by the Civil Service Commission. In this connection, Major Sloan recommended that the Commission take some action to have these increases again presented to the Civil Service Commission in order to have the increases allowed. Mr. Kidde moved that the State Highway Engineer prepare a list of those increases which had not been allowed and which were particularly urgent, and that this matter be taken up by Major Sloan and Commissioner Jelin with the Civil Service Commission at the earliest moment in order that any errors may be corrected if possible. This was seconded by Mr. Stewart and adopted.

Route #13, Lawrenceville.

State Highway Engineer Sloan stated that in accordance with the direction of the Commission, he had invited Mr. Johnson to appear before the Commission and Mr. Johnson was now ready to appear; Mr. Johnson is president of the Trenton & Mercer County Traction Company. Major Sloan stated that this entire matter was in a satisfactory condition except that the Commission felt that they should have some assurance in written form that the trolley company would reimburse them for the full amount agreed upon, and asked Mr. Johnson to explain his view on the matter. Mr. Johnson stated that they were anxious to cooperate with the Commission and had endeavored to enter into an agreement with the Commission similar to that which had been entered into on the Greenwood Avenue paving, whereby the trolley company agreed to reimburse the State for the amount of the materials, and the Commission waived the rights of all other obligations for track moving, etc. The Commission had not been willing to agree to this in the case of Lawrenceville, and he had, therefore, suggested that the Commission adopt a resolution guaranteeing them their rights. Upon the adoption of this resolution, he stated that their company was willing to agree not to interfere with the work but would not enter into any written agreement unless the agreement should cover the entire matter. He explained that they did not know what the Commission was going to do in the matter and they wanted to be in a position to defend their rights if a suit was entered into. Major Sloan asked Mr. Johnson if he was willing to send them a letter stating they would not interfere with the work. Mr. Johnson stated they could not do this. Major Sloan then inquired if the trolley company would agree to pay the $15,000.00 as reimbursement for the materials used. Mr. Johnson also stated that they would make no agreement for this. He further stated that he could not enter into any agreement of any kind, nor would they do anything further than was called for in their franchise; he would, however, be willing to submit to their counsel any proposition which the Commission might want to make. There was a general discussion of this entire matter as to what the Commission should do in view of the attitude as taken by the trolley company. After considerable discussion of the matter, Mr. Kidde moved that the matter be laid on the table until the next meeting, at which time Mr. McGhee of the Attorney General's Office should be asked to appear to take up the matter and advise the Commission as to its status in this matter. In this connection, Mr. Kidde requested that the State Highway Engineer prepare a schedule of the various trolley track problems as existing throughout the State in order that they may be taken up at this time, and the Secretary was directed to prepare a digest of the opinions already received from the Attorney General in reference to trolley track work.

On motion by Mr. Kidde, seconded by Mr. Jelin, the Commission adjourned at 4.30 P.M. to meet in regular session on Tuesday, July 17th.

Respectfully submitted,

A. LEE GROVER, Secretary.

JUL 1[illegible]23

MINUTES OF MEETING - July 17th, 1923.

A regular meeting of the State Highway Commission was held at the offices of the Commission, Broad Street Bank Building, Trenton on Tuesday, July 17th, 1923. The meeting was called to order by Chairman Scott at 10:30 A.M.

Present: Gen. H. L. Scott, Chairman, Messrs. Abraham Jelin
and Walter Kidde. Mr. Stewart arrived at 11:30 A.M.

Commissioner Kidde reported having reviewed the minutes of the meeting of June 12th, 1923, and moved their approval as mailed. This was seconded by Mr. Jelin and adopted.

Expense Account
State Highway Engineer

The Secretary presented to the Commission an expense account covering items of expense incurred by State Highway Engineer Sloan for a period of two months from the time he was appointed as State Highway Engineer. The Secretary further reported that it was an established precedent approved by the Comptroller's Department that the State Highway Commission could pay such expenses. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission unanimously approved of the payment of expense account of State Highway Engineer Sloan, covering the first two months since he was appointed as State Highway Engineer, until he was able to establish a residence in this vicinity.

Right of Way, Route 4.

The Secretary presented a communication received from Mr. Frederick M.P.Pearse, Secretary to the Governor, calling attention to a situation at Point Pleasant in connection with property belonging to Ethelwin Brower, on State Highway Route 4, where the State Highway Department had gone in and removed trees and shrubbery before an agreement was signed with the owners of the properties. He advised that the Governor would suggest that this matter be looked into carefully in order to avoid such conditions. The Secretary reported that he understood that an agreement had been signed by the owners on Saturday last. Mr. Jelin stated that this condition had been called to his attention a week previous, and therefore, the statements as made in the communication were correct and he moved that the Secretary communicate with the office of the Governor and advise that the condition complained of has been corrected and that the Engineering Division is receiving additional instructions to the effect that no repetition of this condition will occur on State Highway work. This was seconded by Mr. Kidde and adopted.

Route 4, Amboy Avenue

The Secretary presented a communication with resolution from the City of Perth Amboy granting extension of time to contractors Graham and McKeon on Amboy Avenue, the connecting link of State Highway Route 4. State Highway Engineer Sloan reported that he had not yet investigated the condition existing on the work on Amboy Avenue, but he understood there were several violations of the provisions of the specifications. Commissioner Kidde asked that some further investigation be made of the work before extension of time is granted. He stated that he felt that the Commission should take some steps to find out what the purpose of the City of Perth Amboy was in pushing the completion of this work even though the State Highway Commission had refused to grant additional aid for extra fill needed, and he moved that the extension of time as requested on Route 4, Amboy Avenue, Perth Amboy, be not granted and that the State Highway Engineer be requested to inquire the status of the contract on this work, particularly as relating to the extra fill as discussed with the State Highway Commission some months ago. This was seconded by Mr. Jelin and adopted.

Grade Crossing, Great Meadows

The Secretary reported that Mr. C. S. Beattie, Claim Attorney for the Lehigh & Hudson Railroad Company was present with reference to the elimination of grade crossing at Great Meadows, New Jersey, and desired to discuss the same with the Commission. On motion, duly seconded a hearing was granted. Mr. Beattie appeared and advised the Commission that his company was particularly interested in the elimination through Great Meadows, since it had agreed to pay part of the cost of the elimination. He advised that the company was very desirous of extending this elimination to include the elimination of the grade crossing at the Creamery, where the Company would provide for pedestrian traffic and in addition would contribute # $1000.00 to the construction of a short road for the convenience of the people of Great Meadows. Com-

# See minutes of Aug 14th, for correction,
Should be $8,000.00.

missioner Kidde inquired the reason why the Railroad Company would not make application for this elimination to the Public Utility Commission, since this crossing was not on the State Highway, but was controlled by the Township of Independence. Mr. Beattie advised that his company felt that if the State Highway Commission would favor the elimination of the Creamery Crossing under the plans proposed by his company the township folks would be willing to acquiesce to the same. He further stated that this same condition existed in Buttzville where an agreement was made with the State Highway Commission for the elimination of the crossing in exactly the same manner. The Commission requested Mr. Beattie to make a formal statement concerning the attitude of his company, and he advised as follows:

> "That the Railroad Company is extremely anxious to eliminate vehicular traffic from the Creamery Crossing, and in order to accomplish this is willing to enter into an agreement with the Township Committee of Independence for the building of a new road from a point in the Creamery Highway east of the Creamery to the southerly end of the existing highway just east of the main crossing at Great Meadows, provided the cost of such a new road shall not exceed $8,000.00 to the company, and further provided that the Township Committee will enter into an agreement to accept the said road as a part of the township road system and thereafter maintain the same. As part of this agreement the old road now crossing the tracks past the Creamery would be closed to the vehicular traffic and would be made as safe as possible for the use of the pedestrians."

Commissioner Kidde moved that in view of this porposal from the Railroad Company, the Secretary be instructed to transmit the said proposal to the Township of Independence and they be informed that inasmuch as the State Highway Commission has agreed to the line for the grade crossing elimination in accordance with their ideas that it requests consideration of additional safe-guard of grade crossing eliminations in their Township, to request that the State Highway Commission be advised of the Township action in this matter in order that the work may be done at once. This was seconded by Mr. Jelin and adopted.

Kingston-Aqueduct Road

The Secretary reported that Dr. L. J. Belloff, of the Board of Freeholders of Middlesex County was present and desired a hearing on the matter of aid on the Kingston Aqueduct Road, Middlesex County. On motion, duly seconded, the hearing was granted. Dr. Belloff appeared before the Commission and advised that he desired to urge the Commission's consideration of the request made by Middlesex County for aid to the extent of $6,000.00 on the Kingston Acqueduct Road, Middlesex County. He stated that this road was used for detour purposes while a section of Route 13 was under construction; he further advised that the County had expended funds to the extent of $12,000.00 on this road and that unless some additional relief was furnished by the State Highway Commission, the work done by the County would not stand on the road. Commissioner Kidde inquired whether this road was marked as an official detour by the State Highway Department and he was answered in the negative by Mr. Reed who stated that although a large amount of traffic had used this road, it had never been officially known as a State Highway Detour. Commissioner Stewart advised that any action which might be taken in case of this road would be establishing a precedent by which the State Highway Commission would be called upon to give aid upon roads which have been subjected to traffic due to construction and which had not been officially designated as detours by the State Highway Commission, and he moved that the application as made by Middlesex County through Dr. Belloff be denied. This was seconded by Mr. Kidde and on roll call vote was adopted by three votes in the affirmative and none in the negative, Mr. Jelin having been excused from voting.

Preferential List

Commissioner Kidde moved that the application for aid on the Kingston-Acqueduct Road to the extent of $6,000.00 be placed in the preferred file of considerations, in the event the Motor Vehicle receipts were in excess of the estimated amount set up for the use of the Commission. This was seconded by Mr. Jelin and adopted.

Shore Route

The Secretary presented a resolution from the Township Committee of Madison Township, Middlesex County, petitioning the State Highway Commission to take over the construction at once of the road leading from Old Bridge at Matawan as a State highway. State Highway Engineer

Sloan reported that any new line for shore traffic would be given consideration by the Advisory Board, organized for this purpose, and on motion by Mr. Kidde, seconded by Mr. Jelin, the communication was referred to the Advisory Board on Shore Traffic for its consideration.

Advisory Board

Commissioner Kidde inquired of the State Highway Engineer as to the status of work being done by the Special Advisory Board for the study of Vehicular Tunnel Traffic through Jersey City and other congested points, and State Highway Engineer Sloan reported that the work of the Board had progressed to the point where estimates were being prepared on alternate routes and he would be prepared to render a report to the State Highway Commission as to progress being made after the next meeting of the Advisory Board, which would be held on Wednesday, July 18th. State Highway Engineer Sloan read before the Commission an outline of the proposed foreword to the report to be submitted on which the assumptions upon which the work was done were outlined. Commissioner Kidde suggested that a conference be held with the State Highway Engineer and Consulting Engineer E. P. Goodrich at the Hotel Robert Treat, Newark, N.J. at 6:00 P.M. Wednesday, July 18th.

Automobile Loan

The Secretary presented a communication from John A. Smith, Custodian of the State Capitol, requesting the State Highway Commission to assign one of the old Dodge trucks of the Department to his office for use in the transportation of mail and other utility purposes. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission directed that a Dodge truck of the State Highway Department be loaned to the Custodian of the State Capitol for mail and other utility purposes, all liabilities in connection with this truck to be assumed by the State Custodian from the time the truck is turned over to him.

Office Space

The Secretary reported on the matter of additional space needed by the State Highway Commission in the new wing of the Broad Street Bank Building; that the bank authorities are unwilling to make all the changes needed by the State Highway Department for its floor space with the short lease requested. In this connection Mr. Jelin presented to the Commission an offer made by the Rednor & McDermott Company, offering the lease of properties at No. 138 - 140 West State Street, just opposite the State

House, for offices of the Commission. On motion by Mr. Kidde, seconded by Mr. Stewart, the report of the Secretary was received and the proposal for new location was ordered referred to the State Highway Engineer for further investigation and report.

Lignin Binder Award ✓

State Highway Engineer Sloan reported that bids had been received on July 16th for the furnishing and application of Lignin Binder. Two bids had been received as follows:

International Paper Company	11¼¢ per gallon	$64,600.88
M. R. Young	9.8¢ " "	56,274.54

and he moved that award be made to M. R. Young of Trenton, at his the lowest bid, amounting to 9.8¢ per gallon or a total of $56,274.54. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission adopted the following resolution:

BE IT RESOLVED, that the award of contract for the furnishing and application of Lignin Binder on gravel roads of the State Highway System be made to Mr. M. R. Young of Trenton, N.J., at his the lowest price bid; namely, 9.8¢ per gallon or a total of $56,274.54, and

BE IT FURTHER RESOLVED, that the Chairman is authorized to sign the necessary contract when in form after approval by the State Highway Engineer.

The Secretary reported to the Commission that a conference had been arranged with the Attorney General's Department for 2:00 P.M. at the State House, and on motion, duly seconded, the meeting recessed for luncheon at 1:00 P.M. to meet in conference with the Attorney General's Department.

Trolley Franchises ✓

This conference was held at 2:00 P.M. between the members of the State Highway Commission, Attorney General McCran and Assistant Attorney General McGee, relative to the status of franchises held by traction companies throughout the State at places along the State highways where it was proposed to do construction work. After a general discussion, Attorney General McCran requested that all questions be put in writing to him and he would endeavor to give an opinion for the guidance of the Commission. It was the general concensus of opinion also that additional legislation will be necessary at the next session of the Legislature

Consulting Eng. ✓

covering this point. (See minutes of August 14th for correction) ¶ The Commission also discussed with the Attorney General the status of the Special Consulting Engineer engaged for the study of Vehicular Tunnel traffic on Route 1 Extension, and the Attorney General advised that this employment could be made with the approval of the Civil Service Commission.

Frenchtown Hearing ✓

The Secretary reported that Mr. Bloom, Clerk of the Borough of Frenchtown, had advised that his delegation could not appear at this meeting, but would come at any other convenient date. The Secretary was directed to arrange this meeting for Tuesday, July 24th, 1923. (See minutes of August 14th for correction).

Burlington County Roads ✓

The Secretary reported that a delegation from Burlington County Board of Freeholders desired a hearing at this time. On motion, duly seconded, a hearing was granted. Freeholders Stout and Wright and County Supervisor of Roads McFarland, appeared before the Commission with an invitation to the Commissioners to pay a visit to Burlington County in order to go over the roads of the county and see what has been accomplished by the Board of Freeholders. Chairman Scott advised that the State Highway Commission would be very glad to accept this invitation just as soon as the rush of work in pushing the large construction program through is accomplished. The delegation reported that this would be agreeable if the Commission would choose any day of the week except Friday, when the Board of Freeholders has its regular meeting day.

Riverside Township ✓

The Secretary presented a communication from the Township of Riverside requesting a hearing before the Commission on Monday, July 16th, if possible, on Fairview Street improvement in Riverside. On motion, duly seconded, the communication was ordered received and the Secretary was directed to arrange for a hearing if same was found necessary.

Inland Waterway Bridge, Route 4 ✓

The Secretary reported that former Senator George O. Vanderbilt of Princeton was present and desired a hearing before the Commission. On motion, duly seconded, the hearing was granted. Mr. Vanderbilt appeared before the Commission and stated that in response to a request made by the Commission at the time he was present before it some months ago, he had prepared a brief and map covering location of proposed trolley tracks across the proposed new bridge over the inland waterway now being constructed at Point Pleasant, and he advised that he represented a company that would some day complete a transportation system along the shore and would desire means for crossing the waterway at Point Pleasant. Request was made of Mr. Vanderbilt as to whether his company was willing to participate in the cost of the construction of such a bridge. He advised that all of the facts had been set forth in his brief and had presented same to the Commission for consideration. The Chairman advised him that these matters would be given careful consideration by the Commission at the time the Inland Waterway Bridge is taken up.

Route 1 Extension - Jersey Avenue ✓

Commissioner Kidde presented to the Commission a communication received by him from Mr. Robert S. Sinclair of the Vehicular Tunnel Commission and Chairman of a Committee to consider and report on the facilities for handling traffic at the entrances and exits of the tunnels and stating that he had been told unofficially that the State Highway Commission had already gone on record as fixing the beginning of Route 1 at Jersey Avenue. Commissioner Kidde reported that in company with Chairman Scott and Mr. Jelin, Mr. Sinclair had been assured at Bear Mountain that it was the purpose of the Commission to begin Route 1 at Jersey Avenue, Jersey City, and he moved that the communication of Mr. Sinclair be received and that the State Highway Commission has officially gone on record as declaring the beginning of Route 1 at Jersey Avenue, Jersey City.

Gloucester County, Township Aid ✓

State Highway Engineer Sloan recommended approval of Township Aid force account agreement on Mullica Hill-Richwood-Pitman Road, Section 2, Harrison Township, Gloucester County, Township Aid. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission approved the recommendation of the State Highway Engineer.

Route 12, Section 2, Adjusted ✓

The State Highway Engineer reported to the Commission in connection with the contract of the Oak Ridge Construction Company for the construc-

Denville-Parsippany

tion of Route 12, Section 2. He presented a communication received from County Counsel Rathbun, of Morris County suggesting that the Commission approve of the furnishing of a five year bond by the Bonding Company on this work, and that the work be accepted. He informed the Commission that the Oak Ridge Construction Company has abandoned the work and it is now up to the Bond Company to satisfy the County and State. The State Highway Engineer further reported that the foundation laid by the Oak Ridge Construction Company was thinner than the specifications required for a distance of 600 feet, and he would recommend that if the Commission would reverse the action of the previous State Highway Commission, he would recommend that the work be accepted upon the furnishing of a five-year bond.

Commissioner Jelin suggested that the Commission refuse to make payment for that section of the foundation not conforming to the specifications and that a five year bond be accepted upon the pavement on this section since he believed from the recommendations of the Engineer, that the character of the sub-foundation under this work was such as to not warrant the entire removal of the work as performed. The Secretary informed the Commission that the former State Highway Commission had discussed at its last meeting the preparation of an indemnity bond covering the portion of the pavement in dispute with a view to the giving acceptance subject to such a bond. After further discussion Mr. Jelin moved that a suggestion be offered to the County of Morris, that the work on Route 12, Section 2, as constructed by the Oak Ridge Construction Company be accepted subject to the elimination from the final payment of an amount equal to the foundation not in accordance with the specifications and a five-year bond covering the surface pavement on the section in dispute. This was seconded by Mr. Stewart and adopted.

E. P. Goodrich, Rates ✓

On motion by Mr. Stewart, seconded by Mr. Jelin the State Highway Commission directed that the Secretary communicate with the Civil Service Commission requesting action in connection with the special services being rendered by Mr. E. P. Goodrich, as Consulting Engineer on the study of Vehicular Tunnel Traffic Routes.

Route 12, Section 1, Bridges ✓

State Highway Engineer Sloan recommended to the Commission that approval be given to the bridges constructed by the Dover Boiler Works on Route 12, Section 1, known as bridges 84, 86, 88, "N" and Culvert M.P. 4.7 E, and Culvert M.P. 5.3 E, all of this work having been completed. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission approved the acceptance of bridges on Route 12, Section 1, as recommended by the State Highway Engineer.

Hobson Ave., Drain, Mercer County ✓

State Highway Engineer Sloan recommended to the Commission the approval of contract for the construction of a drain on Hobson Avenue in Hamilton Township, Mercer County, work being done from Township Aid account. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission approved the award of contract by Hamilton Township, Mercer County, for a drain on Hobson Avenue, at a cost of $4,017.40.

Commendations ✓

The Secretary presented a communication received by Chairman Scott from Mr. R. B. Gray of Asbury Park, advising that he was satisfied with the repair work done on roads in front of properties where complaint was made. On motion duly seconded, the communication was ordered received and filed.

The Secretary presented a communication received by Chairman Scott from Senator Bright of Cape May County, expressing appreciation for the friendly attitude adopted by the State Highway Commission in approving procedure on the construction of about eight miles on Route 14. On motion duly seconded, the communication was ordered received and filed.

Route 4, Section 15, Lakewood.

State Highway Engineer Sloan presented to the Commission a communication received by him from Mr. A. R. Smock of the Lakewood Township requesting that the Township be permitted to construct curbs and gutters over a section of about 300 feet on Route 4, Section 15, of a width of 28 feet between the curbs in order that any fine old trees may not of a necessity be removed as would be necessary in the event the 30 foot pavement is decided upon. The Commissioners all voiced their disapproval of any attempt to destroy trees where it was possible to obtain a full paving width of 28 feet, and on motion by Mr. Stewart, seconded by Mr. Kidde, the State Highway Engineer was directed to take such action as in his opinion is necessary in order to permit the construction of curbs and gutters on Route 4, Section 15, without disturbing trees now existing.

Employments

State Highway Engineer Sloan presented a list of employments as approved by him since the last meeting of the Commission and recommended ratification by the Commission. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission unanimously approved the following employments as recommended by the State Highway Engineer.

July 15,	E. F. Adams	Jr. Insp.	$ 125.00 per mo.
" 6	N. F. Rigor	Asst. C. E.	155.00

Route 13, thru Lawrenceville

The State Highway Engineer requested the Commission to give consideration to the situation existing in the Town of Lawrenceville on Route 14,1? in view of the fact that advertisements for bids had already been placed, and he recommended to the Commission that the section of State Highway Route 13, as lying in the Town of Lawrenceville, where it had been proposed to relocate the trolley tracks be omitted from the contract and be given later consideration. Commissioner Jelin stated that he felt that the Commission should not make two jobs and subject the people to the hardships of detours at two different times, when the entire work could be performed at one operation, and he suggested that a highway of the usual extent be constructed through the town of Lawrenceville on the present center line, disregarding entirely the location of the trolley tracks now located thereon. Commissioner Kidde stated that he felt that there was nothing to be gained by stopping on each side of the municipality, and if the trolley company could not see its way clear to join with the Commission, then the tracks should remain in their present location.

Chairman Scott advised that he was of the opinion that the work should be constructed in accordance with the recommendation of the State Highway Engineer since there already exists a suitable pavement through the Town which would not break the continuity of traffic between Trenton and Princeton.

Commissioner Kidde also stated that if the Commission were to undertake the relocation of tracks in Lawrenceville, the additional cost would be in the enighborhood of $55,000.00 which he felt would be saved by going straight through with the pavement as projected. He also stated that it might be possible for the Town of Lawrenceville to authorize a Bus Line, perhaps to individuals or to a company, which would give them the transportation facilities that they would need without the trolley tracks in the center of the road.

After further discussion, Commissioner Jelin moved that the line of Route 13 through Lawrenceville be continued as a 20-foot pavement through the Town of Lawrenceville eliminating any consideration of the trolley track paving. This was seconded by Mr. Stewart and on roll call vote was adopted with three votes in the affirmative and one in the negative, Chairman Scott voting against this proposition.

Amboy Bridge Approval

The Secretary reported that Mr. C. W. Hudson, Designing & Supervising Engineer on the New Amboy Bridge was present in accordance with the directions of the State Highway Commission that the matter of final presentation of plans and specifications for the Amboy Bridge be brought up at this meeting. Mr. Hudson had with him Mr. O. L. Grover, Bridge Engineer of the Federal Bureau of Public Roads. The State Highway Engineer explained that Mr. Hudson and Mr. Grover have been going over proposed changes in the specifications for the purpose of coming to an agreement which would permit approval by the State Highway Commission and the Federal authorities, in order that advertisement may proceed. Mr. Hudson then addressed the Commission advising that the plans are acceptable to the Bureau of Public Roads with the two exceptions covering notations concerning disposition of buildings of the Pardee Tile Company and the National Fire Proofing Company. State Highway Engineer Sloan suggested that these items be erased from the plans and that any information concerning the same be given the contractors in the information to bidders, to be furnished with specifications.

Mr. Hudson advised that a title sheet had been presented and signed by the Secretary of Agriculture Wallace, Director McDonald of the Bureau of Public Roads and the Chief Engineer of the Bureau of Public Roads, and still required the signature of the Chairman of the State Highway Commission.

The Commission inquired of Mr. Grover whether the plans were acceptable to the Federal Bureau and he advised in the affirmative. Mr. Hudson reported that after several conferences with the State Highway Engineer concerning the specifications that had been submitted to the Federal Office of Public Roads were in acceptable form except for four instances:

FIRST: As to the elimination of Asphalt Block paving from the specifications at the present time. The Commission explained to Mr. Grover that this was done in order to give the Commission an opportunity to take advantage of any reduction in price or any better type of construction three years hence when this item was reached for attention. Mr. Grover stated that the Federal Bureau would be willing to approve this change.

SECOND: Mr. Jelin questioned whether in view of the fact that the Public Utility Commission had approved of the abandonment of the trolley line crossing the present Amboy Bridge, the reinforcements in the new bridge would be necessary. Mr. Hudson advised that he had investigated this matter very thoroughly and he velieved that the trucks which would use the new bridge would in some cases, be as heavy as any trolley cars which it was proposed to run over the structure, and he recommended that the reinforcement be permitted to remain although an amount estimated at between $35,000.00 and $40,000.00 had been saved by the elimination of overhead structures, etc., which would have been used by the trolley company. Commissioner Kidde inquired from Mr. Grover whether the Federal Government approved of the additional reinforcement of the bridge, and Mr. Grover advised that he believed that the Federal Government would be in favor of leaving the reinforcement in the structure.

THIRD: Mr. Hudson reported that item 69 is an alternate covering the manner of construction of three of the river piers and the type of pier. He advised that it was suggested that by building these piers on timber platforms there would be a considerable saving made, and he further stated that he personally felt that such a foundation would be adequate. (See minutes of August 14th for correction. He further advised that the Federal Bureau of Public Roads had stated that due to the ice jams on the Raritan River such a pier does not offer a good foundation and they didn't feel that they could approve the change from the original specifications as drawn. Mr. Grover of the Bureau of Public Roads stated that in cooperation with the various states during the past six or seven years there hasn't been a single instance of this type of construction; it being his feeling that it does not offer as substantial a foundation as possible, and he stated that the Bureau would prefer that this alternate be left out entirely.

FOURTH: Mr. Hudson advised that an alternate had been prepared by State Highway Engineer Sloan for the stone facing on the piers. He advised that the original specifications provided for granite facing, but State Highway Engineer Sloan had endeavored to prepare an alternate which would be drawing the proposition into competition thus securing a better price to the State. He advised that the Federal Bureau of Public Roads would not approve of the specifications for any other than granite unless the said alternate material was presented to the Federal Government and approved by it prior to the approval of the specifications. Commissioner Kidde stated that he felt that the Bureau of Public Roads has an interest in the work no larger than the State of New Jersey and there should be a mutual desire to secure the best results, and if alternates were approved for the piers by the Federal Government a stone facing would result in securing cheaper prices to the State. Mr. Grover of the Bureau of Public Roads advised that it was the feeling of the Bureau that where the alternate would not fix a definite acceptable proposition to the contractors there was a chance for confusion as to the low bidder in the work and the Federal Bureau did not desire any alternates entered into the specifications. Commissioner Jelin stated that while it appeared a certain amount of competition may be eliminated from the work, it would certainly hold up the completion of the bridge if the Commission would not accept the suggestions of the Federal Bureau of Public Roads, and he urged that all the changes as recommended by the Federal Bureau of Public Roads be entered in its specifications and the same be approved. State Highway Engineer Sloan advised that in view of his personal knowledge and practice, that recommendations made by him for the change in pier construction on three piers would have resulted in a considerable saving to the State; and he also was in favor of permitting an alternate to the granite facing. State Highway Engineer Sloan further raised a question as to the provisions of the Federal Government wherein they advise that they cannot share in the expense of the bond furnished by the contractor as a guarantee against defective workmanship and material during one year, and Mr. Hudson was directed to arrange for securing from each contractor who bids on the work, a separate statement as to the amount of money bid by him for the securing of a bond guaranteeing against defective material, and workmanship in order that this amount might be deducted when statement is rendered the Federal Government.

The Commission discussed XXX pro and con with Mr. Grover of the Federal Bureau of Public Roads, the question of bringing in alternates for granite facing and pier construction. Mr. Kidde asked to be placed on record as being opposed (See minutes of August 14th for correction) to any plan which would increase the cost of the work to the State of New Jersey, which opinion was shared by all the other Commissioners present. Mr. Kidde further stated that his entire business career had been devoted to accomplishing results in securing competitive bids on construction work and he desired, if possible, to have such competition for the State of New Jersey, and he felt that the suggestions as offered for alternates would result in giving competition.

Commissioner Jelin stated that while he believed that all of the statements made by Commissioner Kidde and Major Sloan were correct, if any progress was to be made the Commission would have to proceed upon the 'say so' of the Federal Bureau of Public Roads. Commissioner Kidde, therefore, moved the adoption of the following resolution:

BE IT RESOLVED, that the State Highway Commission does hereby approve plans and specifications for the construction of a bridge over the Raritan River between Perth Amboy and

South Amboy, known as Federal Aid Project No. 20, in accordance with approval given to the said plans and specifications by the U. S. Bureau of Public Roads, and

BE IT FURTHER RESOLVED, that the Chairman of the State Highway Commission is authorized to sign all papers necessary for such approval by the State Highway Commission and the Secretary is directed to place the necessary advertisements for this work, said bids to be received on September 11th, 1923, at the meeting of the State Highway Commission.

This was seconded by Mr. Jelin and adopted.

Commissioner Kidde moved that the Commission record itself as expressing appreciation for the attention given this explanation by Mr Hudson and Mr. O. L. Grover of the Bureau of Public Roads. This was seconded by Mr. Jelin and adopted.

Commissioner Kidde suggested that a complete copy of the plans and specifications for the Amboy Bridge work be forwarded to each of the Commissioners for close study and examination.

On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission adjourned at 6:50 P. M., to meet in regular session on Tuesday, July 24th, 1923, at 10:30 A.M.

Respectfully submitted,

A. LEE GROVER,

Secretary.

JUL 2 1923

MINUTES OF MEETING - JULY 24, 1923.

A regular meeting of the State Highway Commission was held at the offices of the Commission, Broad Street Bank Building, Trenton, on Tuesday, July 24, 1923. The meeting was called to order by Chairman Scott at 10.30 A. M.

Present: Gen. H. L. Scott, Chairman, Messrs. Percy H. Stewart, Walter Kidde and Abraham Jelin.

Route #18 → See minutes Oct. 2 for correction

Commissioner Kidde reported having read the minutes of the meeting of June 27, and inquired the reason for no record of the Commission's having acquired Route #18. The Secretary explained that due to the situation in Tenafly, the Commission had not yet determined upon the final taking over of this section after the hearing.

New Brunswick Br. —

Commissioner Kidde also inquired as to whether there was to be any further disposition made of the new bridge location at New Brunswick, and stated that these minutes directed that the State Highway Engineer prepare alternate studies. The State Highway Engineer also advised that within the next thirty days he would have ready for the Commission, the surveys showing the different locations suggested and recommended. The matter was therefore, held in abeyance. Commissioner Kidde stated that he desired to make a personal investigation of the ground with Commissioner Jelin at some early date.

Automobiles

State Highway Engineer Sloan requested authority from the Commission for the purchase of a Cadillac Sedan automobile to be assigned to his use. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission approved of the request of the State Highway Engineer and authorized the purchase of a Cadillac Sedan for the use of the State Highway Engineer, subject to the regulations of the State Purchasing Department. (Further action requesting additional information taken later in this meeting.)

Rejection of Plans, Monmouth Co.

The Secretary presented a communication from Hon. Wm. A. Stevens County Counsel for Monmouth Co., requesting the Commission to grant State Aid on the Farmingdale-Belmar Road, Section #3, Monmouth County, or reject the said plans and specifications on account of lack of funds in order that the County may proceed with the work from its own funds. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission rejected plans and specifications for the Farmingdale-Belmar Road, Section #3, Monmouth County, due to lack of funds, in order that the County may proceed with the work from its own funds.

Encroachments

The Secretary presented a communication from the Lakewood Garage of Lakewood, N. J., complaining of the installation of gasoline pumps at a competitor's location in Lakewood. The State Highway Engineer presented a communication and data to the effect that the former State Highway Commission had issued regulations withholding approval for the installation of gasoline filling stations within the right of way of the State Highway and approved only of the drive-in type of filling stations. The State Highway Engineer reported that in this particular case notification had been made and directions had been given to the owners of the property to remove the pumps, but up to this time such requests had been ignored. He recommended that he be granted authority to proceed at once to forcefully remove the gas filling stations and other encroachment of the right of way on State Highways, and which are forming encroachments on other rights of way. The State Highway Engineer further advised that the law, as at present existing, would not give the State Highway Commission the right of police powers which would inflict penalties where encroachments were permitted to remain on State Highways and suggested that some Legislation be requested covering this matter. Commissioner Kidde stated that he believed that the action of the State Highway Engineer was justified and moved that authority be granted to the State Highway Engineer to remove the gas filling stations encroaching on the road at Lakewood, N. J., subject to an opinion from the Attorney General as to the procedure that can be adopted. This was seconded by Mr. Jelin and adopted.

Signs

Chairman Scott stated that in this connection he would call attention to a number of signs placed within the right of way on the Trenton-Princeton road, by the Trenton Inter-State Fair Association. The Secretary informed the Commission that the regulations of the State Highway Department would not permit of any signs being placed within the right of way except by special permission. On motion by Mr. Kidde, seconded by Mr. Jelin, the Commission directed that the matter be investigated and that a report be made at the next meeting of the Commission.

East Landis Avenue, Landis Twp.

The Secretary reported that Mr. Johnstone of the State Institution for Feeble Minded was present representing the State Institutions and the Township Committee relative to road improvement leading to his institution. On motion duly seconded a hearing was granted. Mr. Johnstone appeared and requested the Commission's consideration for the improvement of East Landis Ave., in the Township of Landis from the easterly line of the Borough of Vineland to Spring Road, a distance of one and a half miles, which road forms a connecting link serving the State Institution for Feeble Minded at Vineland. Mr. Johnstone presented a communication from the Chairman of the Township Committee of Landis Township advising that if the State Highway Commission would improve this road with concrete or other substantial pavement, the Township Committee was ready to pay all the costs of the necessary curbs and gutters and 50% of the cost of the paving, which 50% was estimated would cost not to exceed $35,000.00. Mr. Jelin reported that he had been on this road and was impressed with the connection it would offer to the City of Vineland. Assistant State Highway Engineer Reed reported that the road was in very poor condition and would need between $4,000 and $5,000 to place it in proper repair at the present time. Commissioner Kidde inquired as to the funds from which this work could be done and was informed that this would have to be a special allotment from the Motor Vehicle Account as an aid to roads leading to State Institutions. Commissioner Kidde, therefore, moved that the Secretary prepare for the Commission at its next meeting a statement of the status of the Motor Vehicle Funds of the Department showing all the available balance there may be for distribution by the Commission. This was seconded by Mr. Jelin and adopted. Commissioner Kidde requested, in connection with the statement asked of the Secretary, that a list of all preferential items as set up by the State Highway Commission, be presented for consideration.

Acting Chairman ✓

Chairman Scott advised the Commission that due to a previous engagement in New York, it would be necessary for him to leave the meeting at this time, which he did. Commissioner Kidde moved that Mr. Stewart assume the position of Acting Chairman, which was seconded by Mr. Jelin and adopted.

Special Motor Vehicle Inspectors. ✓

The Secretary presented to the Commissioners present, their badges as Special Motor Vehicle Inspectors and advised that the regular form of Summons' Book would be issued within a short time.

Union County, State Aid ✓

The Secretary reported that a hearing had been requested by Mr. J. L. Bauer, County Engineer of Union County, and that he was present at this time. On motion duly seconded a hearing was granted. Mr. Bauer appeared with Mr. Miland and Mr. Hatfield of Union County with reference to obtaining the Commission's approval of contract for the reconstruction of Springfield Ave., from Snyder Ave., to Passaic River in the Township of New Providence. Mr. Bauer stated that it was the policy of Union County to include permanent reconstruction each year in its Motor Vehicle allotment schedule, and for 1923 Edgar Road from Elizabeth to Rahway was included. However, due to the fact that the City of Elizabeth must pass an ordinance covering part of this work it will have to be delayed until next year. The County of Union has also undertaken the construction of Springfield Ave., and has received bids upon the same and requested that permission be granted to substitute Springfield Ave., in the Township of New Providence from Snyder Ave., to Passaic River in its 1923 schedule, there being no additional funds requested from the State Highway Commission. Commissioner Kidde directed that before the transfer is approved by the Commission the Assistant State Highway Engineer make a review of the specification and bids received and report to the Commission at the afternoon session. This was approved.

Suggested Routes.

The Secretary presented a resolution from the Township of Raritan, Middlesex County, requesting the Commission to consider an auxillary route "Leading from the present State Highway along Vineyard road to King George's or Post Road to Meadow Land and thence to the Raritan River in said township, and that a bridge be constructed across the said river at the end of Meadow Lane to connect with Weston's Mills Road." On motion duly seconded, the resolution was ordered received and placed on file for consideration when the new bridge line at New Brunswick is taken up.

Route #15, Sec. 4, Millville.

The Secretary presented a communication from the City of Millville requesting a hearing before the Commission with reference to the completion of West Main Street, Millville, known as Route #15, Section #4, and would prefer this hearing at the same time a hearing was granted to the Attorney for the trolley company operating between Bridgeton and Millville. On motion duly seconded, the communication was ordered acknowledged and the Secretary was directed to advise them that the matter is under consideration and plans are being prepared for the study of the Commission, and that they will be notified when there will be a hearing arranged.

On motion duly seconded the meeting recessed for luncheon at 12.20 P. M., to meet in regular session at 2.00 P. M. The meeting reconvened at 2.00 P.M., with Messrs. Kidde, Stewart and Jelin present.

Request Township Aid - Ocean Co

The Secretary reported that a committee representing the Township of Brick, Ocean County, was present and desired a hearing with reference to securing State Aid for township roads. On motion duly seconded a hearing was granted. Mr. H. C. Shinn, Engineer for the Township appeared with Mr. Savage, Director of the Board of Freeholders of Ocean County. Mr. Shinn reported that the Township Committee appeared to request aid to the extent of

$4,500.00 for the construction of a township road which would serve as a detour for Route #4, Section #21, Pt. Pleasant to Laurelton, which is now being constructed by Michael Staub, Contractor. The Township Committee informed the Commission that the contractor on the work had agreed to contribute to the Township the sum of $500. provided the State Highway Commission would permit traffic to be diverted over the Township road during the construction of the Highway. Commissioner Kidde inquired whether the road was marked as an official detour and was informed that under the provisions of the contract the contractor was to permit traffic to pass over the work while under construction. Commissioner Stewart then asked in what legal way the Township could secure this State Aid, and the Secretary informed the Commission that application had been filed for this improvement in accordance with the Township Aid Act. On motion by Mr. Jelin, seconded by Mr. Kidde, the apportionment of $4,500.00 Township Aid to Brick Township, Ocean County, was approved.

Rejection of Plans, Gloucester Co. ✓

The Secretary reported that Mr. William C. Cuttell, County Engineer of Gloucester County was present and desired a hearing. On motion duly seconded, a hearing was granted. Mr. Cottrell advised that he appeared with reference to securing State Aid for the Woodbury-Blackwood Road, Gloucester County, and that in the event the Commission cannot grant the same, asked that the plans and specifications be rejected in order that the County might proceed with the work from its own funds. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission rejected the plans and specifications for the Woodbury-Blackwood Road, Gloucester County, due to lack of funds, in order that the County might proceed with the work from its own funds.

Automobiles. /

The Secretary reported to the Commission that Mr. Seldon of the New Brunswick Cadillac Agency was present to discuss a proposition concerning the sale of the used Cadillacs and the purchase by the State of new cars. He submitted a tentative proposition to the Commission which was asked that he put in writing, and Mr. Kidde moved that the State Highway Engineer prepare a brief specification of the exact type of automobile desired for the purposes of himself and the Commission and that bids be received on these items in accordance with the State Purchasing Department's regulations.

Route #15, Section #4 ✓

The Secretary presented a report from Division Engineer J. A. Williams on the situation existing in the City of Millville on Route #15, Section #4. On motion duly seconded, the communication was ordered received and held for later consideration.

Route #12, Section #4. ✓

The Secretary presented a communication from Gardner A. Cline of New Village, on Route #12, Section #4, New Village-Marlatt's Corner section, complaining as to the method in which the work was done and asking relief from dust, dirt and water running into his yard. The Secretary presented a report from the Construction Engineer advising that the location of the trolley tracks in New Village was as authorized by the former State Highway Commission, and that conditions in the neighborhood of Mr. Cline's property have not been changed except for the fact that they now have the benefit of a highly improved highway as against that of a dusty, dirty macadam road which previously existed. On motion by Mr. Jelin, seconded by Mr. Kidde, the communication was ordered received and the Secretary was directed to notify the Secretary to the Governor as to the exact conditions in accordance with the report of the Construction Engineer.

Industrial Report ✓

The Secretary presented a communication received by Commissioner Stewart from Miss Lillian Erskine, Chief of the Bureau of Industrial Statistics, stating that in view of the fact that the State Highway Commission has changed since writing the transportation section of the new State Industrial Directory, she would desire information from the new Commission as to its policies for the information of the tax payers. On motion by Mr.

Jelin, seconded by Mr. Kidde, the communication was referred to the Secretary with directions that an outline be prepared for approval of the Commission, of a statement to be submitted by the State Highway Commission for the Industrial Directory.

Traffic Signals

The Secretary presented a communication from the City of Absecon requesting permission of the State Highway Commission to place an automobile signal at the intersection of White Horse Pike and New York Road on Route #3, and further requesting that in view of excessive traffic on White Horse Pike and the New York Road, that the said roads be cleaned by the State Highway Commission. State Highway Engineer Sloan presented a copy of a communication he had prepared to be forwarded to the City of Absecon in which he advised that the approval would be to the installation of a signal at the intersection of the said routes #3 & #4 at Absecon; said signal to be erected at the expense and sole responsibility of the City of Absecon, and that if the existance of the signal is found undesirable the city will remove the same upon notice from the State Highway Commission. As to the cleaning of the White Horse Pike and New York Road, he advised that this is a matter entirely for the Street Cleaning Department of the local Government. Commissioner Kidde moved that the communication as submitted by the State Highway Engineer be ratified and that permission be given for the installation of the traffic signal at Absecon subject to the approval of the State Highway Engineer and subject to its location and the type of signal used.

Shore Railway
Inland Waterway Br, Rt 4.

The Secretary presented a communication from Mr. George O. Vanderbilt with further reference to the request to place tracks over the bridge on the road from Lakewood to Pt. Pleasant, over the Inland Waterway, making the claim that his Company should have permission to run electric cars over this bridge without charge. On motion, duly seconded, the communication was ordered received and placed on file.

Route #11, Bellville. ✓

The Secretary presented a communication from the Town of Bellville, New Jersey, replying to the request made by the State Highway Commission as to whether the Town was prepared to improve Route #11 to its full width between the curbs, in the event the State Highway Commission undertook the improvement of the same. In this communication the Commission was informed that the Town of Bellville is prepared to take any action necessary to get this road constructed in such a manner that is adequate to care for the very heavy traffic and would cooperate in every way possible toward completing this improvement. On motion duly seconded, the communication was ordered received and acknowledged with the appreciation of the State Highway Commission for the cooperation offered.

Route #11, Essex County ✓

The Secretary informed the Commission that the County of Essex had been forwarded a similar communication as that which had been forwarded the Town of Bellville, but they had become exercised due to the feeling that the Commission was prejudiced against taking over any of Route #11 in Essex County. The Secretary further advised that a delegation of the Board of Freeholders of Essex County would appear at the next meeting of the Commission. Commissioner Lidde directed that a report be prepared by the State Highway Engineer on the condition of the State Highway System in Essex County in order that complete data may be on hand when the Essex County Board appears.

Long Branch Celebration ✓

The Secretary presented to the Commission an invitation from the Board of Freeholders of Monmouth County inviting the Commission to attend a banquet to be given at Price's Hotel, Pleasure Bay, this to be given by the City of Long Branch in commemoration of the opening of the Ocean Boulevard which will have been completed in Long Branch at that time. On motion duly seconded, the Secretary was directed to acknowledge the receipt of the communication and to inform the Board of Freeholders of Monmouth County that the Commission is pleased to accept the invitation and will notify them later as to the members of the Commission who will be present.

Schedule of Business

The Schedule of Business was next taken up for consideration item by item as follows:

Route #2, Section #4, Burlington.

State Highway Engineer Sloan presented a report on bids received for the grading of Route #2, Section #4 through Burlington, for the consideration of the Commission. These bids are as follows:

L. J. Seiling	86.43
S. S. Thompson & Co.	96.3
Thompson & Glickman, and Grant & Driver	96.93
Ross & Whelan, Inc.	96.8
Krellwitx Cont. Co.	103.4
Fish-Rutherford, Inc.	109.5
Michael Staub	112.8
Gibbs-Mueller Co.	113.3
Weldon Const. Co.	115.

The State Highway Engineer reported to the Commission that he was not prepared, in view of the wide difference between the low bid and the second low bid, to recommend award of contract to the low bidder. He further stated that L. J. Seiling, the low bidder had not been entirely satisfactory on the work performed by him in the past for the Commission. On motion duly seconded the Commission directed that Mr. L. J. Seiling be requested to appear before the Commission at its next meeting.

Route #10, Section #2, Delia Ave. Crossing

State Highway Engineer Sloan reported on bids received on Delia Avenue and Trolley crossing on Route #10, Section #2, at M.P. 9.9 and 10.0, for consideration of the Commission. These bids are as follows:

R. J. Mansfield	$118,330.00
John J. McGarry	125,000.00
Thomas Sheahan	127,447.88
Krellwitz Cont. Co.	138,934.00
Stillman-Delehanty-Ferris	154,750.00
O'Gara Const. Co.	164,699.00

State Highway Engineer Sloan stated that he was not yet ready to recommend award of contract to the low bidder on account

JUL 24 1923

of the slow progress made on other work for the Commission. On motion, duly seconded, the Commission directed that L. J. Mansfield, low bidder on this work, be requested to appear before the Commission at its next meeting.

Route #8, White's Bridge.

The State Highway Engineer reported that plans and specifications were ready for advertising on the construction of White's Bridge at M.P. 16.1 on Route #8. On motion by Mr. Kidde seconded by Mr. Jelin, the State Highway Commission adopted the following resolution:

> BE IT RESOLVED, that the State Highway Commission does hereby approve of plans and specifications for the construction of White's Bridge at M.P. 16.1 on Route #8, and
>
> BE IT FURTHER RESOLVED, that the Chairman is authorized to approve the necessary papers and the Chief Clerk is directed to place the necessary advertisements for the same.

Condemnation, Route #5, Sec. 10

The State Highway Engineer recommended to the Commission that condemnation proceedings be instituted in connection with the land of Mr. Townsend Cushman on Route #5, Section #10, the State having offered $500. and the owner demanding $1,000. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission unanimously accepted the report of the State Highway Engineer and adopted the following resolution of condemnation:

> RESOLVED, that this Commission hereby determines to acquire in the name of the State of New Jersey, for public use in the construction of State Highway Route No. 5, Sec. 10, All that certain Lot, tract or parcel of land and premises, situate, lying and being in the State of New Jersey, and more particularly described as follows:

Parcel #2

Beginning in the dividing line between lands of the party of the first part hereto and lands of Sarah C. Brant at a point distant Northeasterly thirty-eight feet (38') at right angles from the proposed center line of Route 5, also known as the Morris Turnpike, at Station 67 plus 22.50,

Thence (1) parallel to the said proposed center line South fifty-five degrees ten minutes thirty seconds East (S55-10'-30"E) four hundred and thirty-two feet and fifty-four hundredths of a foot (432.54') to the line of lands of the Tichenor-Williams Co.

Thence (2) along their line South fifty-six degrees thirty-eight minutes West (S56-38'W) nine feet and sixty-three hundredths of a foot (9.63') to a point in the Northerly side of the said Morris Turnpike.

Thence (3) along the said Northerly side of the said Morris Turnpike North sixty-five degrees fifty-six minutes West (N65-56'W) one hundred and thirty-two feet (132.00').

Thence (4) still along the said Northerly side of the said Morris Turnpike North fifty-one degrees five minutes West(N51-05'W) two hundred feet (200.00').

Thence (5) still along the said Northerly side of the said Morris Turnpike North fifty-two degrees thirty-four minutes West (N52-34'W) one hundred and two feet and sixty hundredths of a foot (102.60') to the aforesaid dividing line between the lands of the party of the first part hereto and lands of Sarah O. Brant.

Thence (6) along the said dividing line North forty-five degrees sixteen minutes East (N45-16'E) fourteen feet and eighty-nine hundredths of a foot to the point of beginning. Containing two hundred and twenty-four thousandths (0.224) of an acre.

Together with all rights, title and interest in and to all the property lying in front of the above described premises to the middle of the said Morris Turnpike.

The State Highway Engineer is hereby authorized and directed on behalf of this Commission, to make an offer to the owners or owner of said lands and premises for the conveyance of the same to the State of New Jersey free and clear of all encumbrances, and, upon the failure of such owner or owners to accept such offer, or if for any other reason said lands and premises cannot be immediately acquired by agreement with such owners or owner, then the Attorney General of the State of New Jersey is hereby authorized and directed to institute condemnation proceedings for the acquisition of said lands and premises.

JUL 2 1923

Route #4, Section #21, Right of Way.

The State Highway Engineer presented for approval by the Commission purchase agreements for land required on Route #4, Section #21, Laurelton-Pt. Pleasant section. Motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission approved the purchase of the following parcels of property on Route #4, Section #21, Laurelton-Pt. Pleasant.

Parcel #1, Wm. J. Kennedy ---- consideration--$ 1.00
Parcel #3, Ethelwyn Brower---- consideration-- 121.00
Parcel #4, Edgar M. Taylor---- consideration-- 1.00
Parcel #6, Robt. J. Parkinson- consideration-- 1.00

Route #5, Section #13, Condemnations

The State Highway Engineer reported to the Commission that it would be necessary to condemn property of Silas H. Chamberlain required for the construction of Route #5, Section #13, Budd Lake-Netcong section; the offer being $1,200.00 and the demand being $2,500.00. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission accepted the report of the State Highway Engineer and unanimously adopted the following resolution of condemnation:

> RESOLVED, that this Commission hereby determines to acquire in the name of the State of New Jersey, for public use in the construction of State Highway Route No. 5, Section No. 10, ALL that certain Lot, tract or parcel of land and premises, situate, lying and being in the State of New Jersey, and more particularly described as follows:

PARCEL #1

Beginning in the division line between lands of David H. Brown and the party of the first part hereto, at a point distant sixteen and one half feet (16.5') at right angles from the center line of State Highway Route #5, Section #13, at Station 4 plus 52.72 as shown on plans of same dated July 2, 1923, and adopted by the State Highway Commission.

(1) Thence, along the said division line, north nineteen degrees, twenty-nine minutes West (N. 19°-29'W.) seventeen and nineteen one hundredths feet (17.19').

(2) Thence, north easterly through the property of the party of the first part, on the arc of a curve to the left of radius thirteen hundred and ninety-nine and one half feet (1399.5') for

a distance of two hundred and seventy-nine and seven one hundredths feet (279.07'), chord of which is north forty-eight degrees fifty-eight minutes and forty-five seconds east (N.48°-58'-45" E.) two hundred and seventy-eight and sixty-one hundredths feet (278.60').

(3) Thence, north forty-three degrees and sixteen minutes east (N.43°-16'E.) three hundred and fifty-five feet more or less (355.' plus) to the westerly side of the public road leading between Budd Lake and Netcong.

(4) Thence, along the said side of public road south thirty-one degrees and forth-six minutes west (S.31°-46'W.) three hundred feet more or less (300'plus)

(5) Thence, along said side of public road south fifty-five degrees and three/minutes and fifty seconds West (S.55 -03'-50"W.) three hundred and fifty-three and fifty-five one hundredths feet more or less (353.55) to the point of beginning.

Containing forty-five one hundredths (0.45) of an acre more or less.

All of which is more particularly shown on a Map entitled New Jersey State Highway Department Route #5, Budd Lake-Netcong Section, property to be acquired from Silas Chamberlain, Mount Olive Township, Morris County, New Jersey.

Scale: 1" = 50' Dated Feb. 1923

PARCEL #2

Beginning at a point on the easterly side line of the public road leading between Budd Lake and Netcong. Said point being at Station 10 plus 95 of the center line of State Highway Route #5, Section #13, as shown on plans of same dated July 2, 1923, and adopted by the State Highway Commission.

(1) Thence, along the side of the said public road, north thirty-one degrees and forty-six minutes east (N. 31°-46'E.) one hundred and sixty-five and fifty-two one hundredths feet (165.52').

(2) Thence, through the property of the party of the first part north forty-three degrees and sixteen minutes east (N.43°-16'E.) eight hundred and forty and thirty one-hundredths feet (840.30').

(3) Thence, north easterly on the arc of a curve to the right of radius twenty-eight hundred and ninety-eight feet (2898') for a distance of two hundred and fifty-eight and seventy-nine one hundredths feet (258.79'), chord of which is north forty-five degrees forty-nine minutes and thirty seconds east (N.45°-49'-30"E.) two hundred and fifty-eight and seventy-one, one hundredths feet (258.71').

(4) Thence, north forty-eight degrees and twenty-three minutes east (N.48°-23'E.) one hundred and sixth-three and twenty-one hundredths feet (163.21') to the division line between lands of Mrs. Carrie Scudder and the party of the first part.

(5) Thence, along the said division line, south three degrees and fifty-two minutes west (S.3°-52'W.) eighty-three and forty-seven, one hundredths feet (83.47').

(6) Thence, through the property of the party of the first part south forty-eight degrees and twenty-three minutes west (S.48°-23'W.) one hundred and twelve and eleven one hundredths feet (112.11').

(7) Thence, south westerly on the arc of a curve to the left of radius twenty-eight hundred and thirty-two feet (2832') for a distance of two hundred and fifty two and eighty-nine, one hundredths feet (252.89'), chord of which is south forty-five degrees forty-nine minutes and thirty seconds west (S.45°-49'-30"W.) two hundred and fifty-two and eighty-two, one hundredths feet(252.82')

(8) Thence, south forty-three degrees and sixteen minutes west (S.43°-16' W.) five hundred and ninety-seven and fifty, one hundredths feet (597.50')

(9) Thence, south forty-six degrees and forty-four minutes (S.46°-44'E.)

The State Highway Engineer is hereby authorized and directed on behalf of this Commission, to make an offer to the owners or owner of said lands and premises for the conveyance of the same to the State of New Jersey free and clear of all encumbrances, and, upon the failure of such owner or owners to accept such offer, or if for any other reason said lands and premises cannot be immediately acquired by agreement with such owners or owner, then the Attorney General of the

State of New Jersey is hereby authorized and directed to institute condemnation proceedings for the acquisition of said lands and premises.

Route #5, Section #13, Right of Way

State Highway Engineer Sloan recommended the purchase of property needed for right of way on Route #5, Section #13, Budd Lake-Netcong Section. Commissioner Jelin stated that several of these items were for an amount in excess of $200 and suggested that the Commission secure appraisals from two competent Real Estate experts upon any properties on which the sum asked is more than $200, and he moved that the State Highway Commission approve the purchase of the following parcels of land on Route #5, Section #12, said amount being not in excess of $200.

Parcel #4, Mrs. Lillian Lake	$200.00
Parcel #5, Dorson Drake	200.00
Parcel #7, Leonard & Pauline Ringenback	15.00
Parcel #8, Michael Gallo	1.00
Parcel #11, Mrs. Ethel Chesterton	15.00
Parcel #12, Mr. Alvah Hill	25.00
Parcel #15, Kingdon Realty Co.	1.00
Parcel #7A, Robt. J. Petit	50.00
Parcel #18, Mrs. Elizabeth A. Smith	35.00

This was seconded by Mr. Kidde and adopted.

Right of Way, Route #4, Bass River Br.

State Highway Engineer Sloan recommended approval of purchase agreements for property needed on Route #4, at the location of the Bass River Bridge at M.P. 13.9. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission approved of the purchase of the following properties needed for the construction of the Bass River Bridge at M.P. 13.9 on Route #4.

Parcel #4, Jess Cramer	$350.00
Parcel #5, W. T. Loveland	50.00

Right of Way, Route #5, Section #13.

The State Highway Engineer reported to the Commission that the Right of Way Division was unable to agree with Mr. E. T. Dalberg for the purchase of property needed on Route #5, Section #13, Budd Lake-Netcong Section. Mr. Dalberg asked $3,000.00 cash for 500 cu. yds. of fill, while the State offered him $300.00. On motion by Mr. Jelin, seconded by Mr. Kidde, the report of the State Highway Engineer was ordered received and condemnation was directed in accordance with the following resolution:

> RESOLVED, that this Commission hereby determines to acquire in the name of the State of New Jersey, for public use in the construction of State Highway Route #5, Sec. 13, ALL that certain Lot, tract or parcel of land and premises, situate, lying and being in the State of New Jersey, and more particularly described as follows:

Parcel #6

Beginning at an iron monument on the division line between lands of D. S. Drake and the party of the first part hereto, said iron monument being five and one-half feet (5.50') at right angles to Station 35 plus 13 of the center line of State Highway, Route #5, Section #13, as shown on plans of same dated July 2, 1923, and adopted by the State Highway Commission.

(1) Thence, along the said division line north thirteen degrees and five minutes west (N.13°-05'W.) thirty one feet (31').

(2) Thence through the property of the party of the first part north forty nine degrees and thirty nine minutes east (N.49°-39'E.) five hundred and six and twenty seven hundredths feet (506.27').

(3) Thence, north easterly on the arc of a curve to the right of radius twenty eight hundred and ninety eight feet (2898') for a distance of three hundred and seventy and seven, one hundredths feet (370.07'), chord of which is north fifty three degrees, eighteen minutes, and thirty seconds east (N.53°-18'-30"E.) three hundred and sixty nine and eighty two, one hundredths feet (369.82').

(4) Thence, north fifty six degrees and fifty eight minutes (N.56°-58'E.) one hundred and ninety nine and thirty three, one hundredths feet (199.33').

(5) Thence, at right angles to course number four (4) north thirty three degrees and two minutes west(N. 33°-02'W.) seventeen feet (17.0').

(6) Thence, at right angles to course number five (5), north fifty six degrees and fifty eight minutes east (N.56°-58' E.) one hundred and fifty feet (150.0').

(7) Thence, at right angles to course number six (6), south thirty three degrees and two minutes east (S.33°-02'E.) seventeen feet (17.0').

(8) Thence, at right angles to course number seven (7), north fifty six degrees and fifty eight minutes east (N.56°-58'E.) six hundred and eight and eighty five, one hundredths feet (608.85') to a point in the division line between lands of Michael Gallo and the party of the first part, distant thirty-three feet (33') at right angles from the said center line of State Highway Route #5, Section #13, at Station 53 plus 58.85.

(9) Thence, along said division line of Michael Gallo, south eighty four degrees twenty eight minutes and ten seconds east (S.84°-28'10"E.) one hundred and five and seventy, one hundredths feet to a point on the said division line, said point being distant thirty three feet (33') at right angles from the said center line of State Highway Route #5, Section #13.

(10) Thence, through the property of the party of the first part south fifty six degrees and fifty eight minutes West (S.56°-58'W.) six hundred and ninety and thirty five, one hundredths feet (690.35').

(11) Thence, at right angles to course number ten (10) south thirty three degrees and two minutes east (S. 33°-02'E.) seven feet (7').

(12) Thence, at right angles to course number (11) south fifty six degrees and fifty eight minutes West (S.56°-58'W.) one hundred and fifty feet (150').

(13) Thence, at right angles to course number twelve (12) north thirty three degrees and two minutes West (N.33°-02'W.) seven feet (7').

(14) Thence, at right angles to course number thirteen (13)south fifty six degrees and fifty eight minutes West (S.56 -58'W.) one hundred and ninety nine and thirty three, one hundredths feet(199.33').

(15) Thence, south westerly on the arc of a curve to the left of radius twenty eight hundred and thirty two feet (2832') for a distance of three hundred and sixty one and sixty five, one hundredths feet (361.65') chord of which is south fifty three degrees, eighteen minutes, and thirty seconds west (S. 53°-18'-30"W.) three hundred and sixty one and forty, one hundredths feet (361.40').

(16) Thence, south forty nine degrees and thirty nine minutes West (S.49°-39'W.) four hundred and twenty one and fifty seven hundredths feet (421.57') to the northerly side of the public road leading between Budd Lake and Netcong.

(17) Thence, along the said public road south seventy degrees and forty minutes West (S.70°-40'W.) one hundred and seven and eighteen one hundredths feet (107.18') to the point of beginning.

Containing 2.927 acres, more or less.

All of which is more particularly shown on a Map entitled New Jersey State Highway Department Route #5, Budd Lake-Netcong Section, property to be acquired from Eric T. Dalberg, Mount Olive Township, Morris County, N. J.

Dated February 1923.

The State Highway Engineer is hereby authorized and directed on behalf of this Commission, to make an offer to the owners or owner of said lands and premises for the conveyance of the same to the State of New Jersey free and clear of all encumbrances, and, upon the failure of such owner or owners to accept such offer, or if for any other reason said lands and premises cannot be immediately acquired by agreement with such owners or owner, then the Attorney General of the State of New Jersey is hereby authorized and directed to institute condemnation proceedings for the acquisition of said lands and premises.

Right of Way, Route #4, Cedar Creek Bridge.

State Highway Engineer Sloan presented a report on property needed on Route #4, at the location of Cedar Creek Bridge, at M.P. 41.1, and recommended that an offer of $1,300.00 be made to the estate of Isaac North for the property or that condemnation proceedings be instituted. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission adopted the report of the State Highway Engineer and directed that the sum of $1,300.00 be offered to the Estate of Isaac North for property needed on Route #4, at M.P. 41.1, and in the event that the offer is refused, that condemnation be instituted in accordance with the following resolution:

RESOLVED, that this Commission hereby determines to acquire in the name of the State of New Jersey, for public use in the construction of State Highway Route #4, ALL that certain Lot, tract or parcel of land and premises, situate, lying and being in the State of New Jersey, and more particularly described as follows:

Parcel #2

BEGINNING at the point of intersection of the present fence line on the westerly side of the Highway now known as Route #4 of the State Highway System and the division line between properties of Isaac Worth and Wm. Brinley and running thence (1) North forty-seven degrees ten minutes West (N. 47°10' W), fifteen and eight one-hundredths (15.08) feet along said division line to a point distant thirty-three (33) feet radially from the new center line of the State Highway; thence (2) in a northeasterly direction along the arc of a circle to the left, concentric with the curve of the new center line and of nine hundred twenty-two and thirty-seven one-hundredths (922.37) feet radius, seventy-six and sixty-eight one-hundredths (76.68) feet to a point of tangency; thence (3) North thirty degrees six minutes twenty seconds East (N 30° 06' 20"E), one hundred nine and sixty-two one-hundredths (109.62) feet to a point on the northerly property line of Isaac Worth, said point being at or near the southerly side of Cedar Creek and distant thirty-three (33) feet at right angles from the new center line of Highway; thence (4) South eighty-two degrees fourteen minutes forty seconds East (S 82° 14' 40" E), forty-nine and ninety-four one hundredths (49.94) feet along said property line of Isaac Worth to the aforementioned fence line on the westerly side of the Highway; thence (5) South thirty-nine degrees thirty-two minutes thirty seconds West (S 39° 32' 30" W), two hundred eleven and thirty-eight one-hundredths (211.38) feet along said fence line to the point or place of beginning CONTAINING one hundred thirty one-thousandths (0.130) of an acre more or less.

IT BEING the intention of the grantor to convey to the State of New Jersey all that portion of his property Lying between the present fence line on the westerly side of the highway and a line distant thirty-three (33) feet westerly from and parallel to the new center line of State Highway from Cedar Creek southerly to the division line between the properties of Isaac Worth and Wm.Brinley as shown on map entitled "New Jersey State Highway Department, Section of Route #4, property to be acquired from Isaac Worth near Cedar Creek Bridge, Lacey Township Ocean County, Scale 1" = 50' December 1922. "Revised February 1923."

TOGETHER with all the right, title and interest the party of the first part may have in the existing Highway adjoining the above described premises.

The State Highway Engineer is hereby authorized and directed on behalf of this Commission, to make an offer to the owners or owner of said lands and premises for the conveyance of the same to the State of New Jersey free and clear of all encumbrances, and, upon the failure of such owner or owners to accept such offer, or if for any other reason said lands and premises cannot be immediately acquired by agreement with such owners or owner, then the Attorney General of the State of New Jersey is hereby authorized and directed to institute condemnation proceedings for the acquisition of said lands and premises.

Right of Way, Route #4, Cedar Ck. Bridge

The State Highway Engineer presented purchase agreement for property needed on Route #4, at M.P. 41.1, for the construction of Cedar Creek Bridge and recommended approval by the Commission. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission approved the recommendation of the State Highway Engineer and authorized the purchase of the property on Route #4, at M.P. 41.1 for the construction of Cedar Creek Bridge.

Parcel #1, Estate of William Brinley, $25.00 for land and $1,064.00 for moving building, total $1,089.00

Parcel #3, M. Almond Grant, consideration-- $25.00

Route #5, Section #13, Pavement.

The State Highway Engineer recommended to the Commission the passage of a resolution providing for the placing of permanent type pavement on Route #5, Section #13, Budd Lake-Netcong Road as soon as practicable in order to meet the requirements of the Federal Government. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission adopted the following resolution:

WHEREAS, project statements, plans and specifications for Route #5, Section #13, Budd Lake-Netcong section, Federal Aid project #50 have been submitted to the Bureau of Public Roads for approval, the work providing for grading and drainage only in order to permit proper settlement prior to the construction of a pavement thereon

NOW, THEREFORE, BE IT RESOLVED, that the Federal Government be assured that the State Highway Commission will complete this section by the construction of an adequate pavement as soon as it is practical after the settlement of the fills.

Route #4, Section #17. ✓ Barnegat

State Highway Engineer Sloan recommended approval of the action of the Board of Freeholders of Ocean County, extending the time of the completion of Route #4, Section #17, to June 18, 1923 which date was the date of completion on the work. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission approved extension of time on Route #4, Section #17 to June 18,1923.

Route #4, Section #18 Tuckerton

On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission approved of the extension of time as granted by the Ocean County Board of Freeholders to the Public Service Production Company, on Route #4, Section #18, to June 18,1923, on which time the work was reported completed.

Route #6, Section #14

On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission approved of the extension of time as granted by the Board of Freeholders of Gloucester County to the Public Service Production Company on Route #6, Section #14, through Woodbury, to June 21, 1923, as recommended by the State Highway Engineer.

Route #5, Section #8 Barkers Cor- Great Meadows

State Highway Engineer Sloan presented the resolution of Warren County granting an extension of time of 45 working days to Salmon Brothers, for their contract on Route #5, Section #8, at Great Meadows, and recommended that the extension of time for 45 days be denied but that an extension of 20 days be approved on Route #5, Section #8, work being done under the Reimbursement Act by Warren County.

Route #5, Section #6 ✓

The State Highway Engineer presented a report in connection with the contract of J. [illegible] Geiger Sons, on Route #5, Section #6, Speedwell Avenue, Morristown, and recommended approval of a request for extension of time of one month due to the fact that the Traction

Company has failed to deliver the track material on the work. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission approved the action of the Board of Freeholders of Morris County in granting extension of time to J. S. Geiger Sons on Route #5, Section #6, Speedwell Ave., Morristown for one month from June 15th.

Route #9, Plainfield ✓

The State Highway Engineer presented a resolution from the Common Council of the City of Plainfield granting extension of time to the Newark Paving Company, on Route #9, Section "B" in the City of Plainfield from June 1st to July 1, 1923, and he recommended approval by the Commission. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission approved the action of the Common Council of Plainfield in granting extension of time to the Newark Paving Company, from June 1,1923 to July 1, 1923, on Route #9, Section "B" in Plainfield.

Sidewalks on Bridges ✓

The State Highway Engineer presented a communication from H. B. Keasby, County Engineer of Salem County, advising that the Board of Freeholders had no right to expend money for construction of sidewalks on bridge at M.P. 9.7, on State Highway Route #6, over the West Jersey & Seashore R. R., at Woodstown, and further expressed regret that the lives of the pedestrians must be endangered by reason of the lack of authority to put sidewalks on this bridge. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission ordered the communication received and directed that the Secretary advise Mr. Keasbey of the provision in the statute whereby roads may be widened for extra width beyond that paid by the State, by the local Governing Bodies.

Cement Bids ✓

The State Highway Engineer presented a communication from the Sales Manager of the Lehigh Portland Cement Co., of Allentown, Pa., requesting permission to quote on State Purchases of cement. The Secretary informed the Commission that there was a regulation of the former Commission, that when cement prices were obtained that they be obtained only from those concerns having plants in New

Jersey. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission directed that the competition in the purchase of cement by the State Highway Department, be opened wide in order to permit of prices being obtained from any responsible source.

Office Buildings ✓

The State Highway Engineer presented a report as requested by the Commission in connection with the properties located at 138-140 West State Street, Trenton, N.J., as to their suitability for office purposes of the State Highway Department; this report advising that the arrangement of the rooms in this building are not adapted for the needs of the Department, nor has it sufficient natural light or ventilation for the purposes of the Department. On motion duly seconded, the report was ordered received and placed on file. Commissioner Kidde inquired as to whether there was any further report on the matter of securing space in the new wing of the Broad Street Bank Building, and the Secretary advised that the matter was discussed with the building Superintendent and the President of the Bank and the State Comptroller and was to be given further consideration.

Route 1, Hackensack Bridge ✓

The State Highway Engineer reported to the Commission that inasmuch as it was not the policy of the Commission to carry insurance on its bridges, he would recommend that insurance be not continued on the Hackensack River Bridge after final payment is made to Stillman, Delehanty, Ferris Company, on account of their contract for the construction of a bridge over the Hackensack River. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission approved the recommendation of the State Highway Engineer and directed the policy on the Hackensack River Bridge (Temporary Bridge) be not continued beyond the date of final payment to the Contractor.

Commissioner Kidde further suggested that the State Highway Engineer arrange to have some one from the Department detailed to inspect the fire prevention facilities on the various State Highway structures.

A. G. A. Signs ✓

The State Highway Engineer presented a communication from the American Gas Accumulator Co., together with the blue-print for a new design of light-house which they expect to install in accordance with their agreement with the State Highway Department. Commissioner Kidde stated that he would not approve of any further items as affecting the Highway Lighthouses, and moved that the communication be ordered received and placed on file. This was seconded and adopted.

DeCharms' Resignation. ✓

State Highway Engineer Sloan reported to the Commission that he had received a letter of resignation from Mr. Richard DeCharms, Assistant Bridge Engineer, to take effect August 15, 1923. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission accepted the resignation of Mr. DeCharms with regret.

State Highway Engineer Sloan stated that he had presented this resignation and would state that he felt that the unsatisfactory conditions existing in the employment situation in the Bridge Department would be eliminated to a great extent if the Bridge Office was transferred to Trenton.

Northeast Boulevard, Cumberland County. ✓

The State Highway Engineer recommended to the Commission the acceptance and final payment on the Northeast Boulevard, Landis Township, Cumberland County Township Aid. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission accepted the Northeast Boulevard, Landis Township, Cumberland County, and directed that final payment be made from the Township Aid Account.

Bergen County, Motor Vehicle Aid. ✓

The State Highway Engineer recommended that the Commission authorize the payment of the entire Motor Vehicle allotment for 1923 to the County of Bergen in the sum of $154,975.00. Commissioner Kidde reported that he, in company with Chairman Scott, had made an inspection of completed work on Bergen County road repairs and they were convinced that the work had been well done under the supervision of the Supervisor of County Roads, Mr. Thier, and he moved that the Commission authorize payment of the entire Motor Vehicle allotment. This was seconded by Mr. Jelin and adopted.

Moorestown Pike

On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission approved specifications for the patching of a portion of the Moorestown Pike between Cove Road and the Delaware River Railroad Bridge, Motor Vehicle Aid, Camden County.

Hunterdon County-Township Aid

On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission authorized the approval of agreement between the Township of Union in Hunterdon County and Sigafoos & Poore, for the Jutland-Perryville Road, at their low bid of $8,714.38, said agreement having been recommended by the State Highway Engineer.

Hunterdon County Township Aid

On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission approved of agreement between Franklin Township and Hugh Simanton for the construction of the Pottstown-Quakertown Road, in Franklin Township, Hunterdon County, at the low bid of $15,073.70, said agreement having been recommended by the State Highway Engineer.

Sussex County Township Aid.

On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission approved the acceptance and final payment of $500.00 to Byram Township, Sussex County, on Waterloo Road (Starport Hill & Approaches) said approval having been recommended by the State Highway Engineer.

Mercer County Township Aid

On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission approved the acceptance and final payment amounting to $4,424.35 on the Harbourton-Bear Tavern Road, Mercer County, same having been recommended by the State Highway Engineer.

Morris County, Stone & Equipment

On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission approved award of contract by the County of Morris to the Gray Construction Company, for broken stone and gravel; to the Pompton Crushed Stone Company for broken stone and to the Gray Construction Company for equipment; same having been recommended by the State Highway Engineer.

Route #3, Section #8 ✓

State Highway Engineer Sloan recommended to the State Highway Commission approval of extension of time for 30 working days on Route #3, Section #8, Camden City Line-Clements Bridge road, this work having been completed and this extension being necessary for the completion of the records. On motion duly seconded, the recommendation of the State Highway Engineer was received and approval was given for an extension of 30 working days on Route #3, Section #8, Camden City Line-Clements Bridge Road.

Traffic on Detours ✓

The Secretary presented a report he had made to the Chairman advising that he had taken up with the Attorney General's Department the matter of the right and authority of the State Highway Department in forcing traffic to use detours as established by the Department. The Attorney General had ruled that the State Highway Act contains no police powers nor does the Detour Act provide any penalty, therefore, traffic cannot be compelled to take a detour. The Secretary was directed to place this matter in a special file for consideration when recommendations are made to the Legislature in the annual report.

Route #10, Section #10 ✓

The State Highway Engineer requested that the State Highway Commission adopt a resolution covering the acquisition of all property needed on Route #10, Section #10, and that it provide that where agreements are entered into that they be presented to the Commission for approval. On motion, duly seconded, the State Highway Commission adopted the following resolution:

> RESOLVED, that the State Highway Commission hereby determines to acquire, in the name of the State of New Jersey, by purchase or condemnation, all lands and premises necessary for the use in the construction of Section #10, State Highway Route #10, as shown on the plans for such construction heretofore adopted and approved by said Commission, and that the State Highway Engineer, wherever possible, is hereby directed to arrange for the acquisition of such lands and premises by agreement with the owners thereof and to present such agreements to this Commission for its approval; that, where in his opinion, such acquisition is not possible by agreement with the owners of such lands and premises, he is hereby directed to arrange for the institution of condemnation proceedings in accordance with the provisions of the Statute in such case made and provided.

Employments ✓

The State Highway Engineer reported to the Commission that a number of employments and transfers had been made since the last meeting of the Commission, and requested ratification of same. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission unanimously approved the following employments in the State Highway Department:

July 20	Chas. P. Brennen	Senior Clerk	$115	per	mo.
Aug. 1	J. S. Van Nuys	Rodman	90	"	"
July 13	Wm. S. D'Arcy	Office Boy	40	"	"
Aug. 1	[illegible] L. Braybrooke	Asst. Civil Eng.	165	"	"
July 12	Patrick McCullough	Bridge Inspector	165	"	"
July 16	John J. Coakley	Bridge Attendant	90	"	"

Change in Status

July 1	L. M. McKenny formerly Title Searcher at $150.00	Asst. Right of Way Agt.	$190.	per	mo.
July 16	H. R. Fleming formerly Rodman at $90.00	Junior Engineer	125.	"	"
Aug. 1	Julius J. Newmark formerly Survey Engineer at $210.00	Office Engineer	300.	"	"

Hourly Men

July 13	Norman Gabel	Garage Assistant	.45	per	hr.
" 5	W. F. Bush	Garage Assistant	.50	"	"
" 16	Jos. Rabatic	Motor Truck Driver	.45	"	"
" 16	C. T. Tuckern	" " "	.45	"	"
" 16	Dorsey Hollingshead	" " "	.40	"	"
" 16	F. H. Bainbridge	Garage Assistant	.45	"	"
" 17	William Eick	Motor Truck Driver	.45	"	"

Increases

July 16	Geo. Swedaker	Motor Truck Driver	$.45 to $.50
" 16	John Whitlock	" " "	.55 to .60

On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission adjourned at 4.30 P.M., to meet in regular session on Tuesday, July 31, 1923.

Respectfully submitted,

A. LEE GROVER,

Secretary.

MINUTES OF MEETING - JULY 31, 1923.

A regular meeting of the State Highway Commission was held at the offices of the Commission, Broad Street Bank Building, Trenton, on Tuesday, July 31, 1923. The meeting was called to order by Chairman Scott at 10.30 A. M.

Present: Gen. H. L. Scott, Chairman, Messrs. Percy H. Stewart,
Walter Kidde and Abraham Jelin.

Minutes Approved ✓

Commissioner Stewart reported that he had read the minutes of the meetings of June 22 and June 26 as mailed to him, and he was prepared to move approval of same as mailed. This was seconded by Mr. Jelin and adopted.

Automobiles ✓

The State Highway Engineer reported to the Commission that in accordance with instructions at the last meeting, he was prepared to advise that he would recommend the purchase of a five-passenger Cadillac Sedan to be used by him and a seven-passenger suburban type Cadillac to be assigned for the use of the Commission, and that there would be needed in addition to the cars which it was proposed to trade in, the sum of approximately $5,520.00. Commissioner Kidde moved that the State Purchasing Agent be requested to negotiate the purchase of two Cadillac Automobiles: one to be a seven-passenger suburban type automobile for the use of the State Highway Commission and the other a five-passenger Sedan type for the use of the State Highway Engineer, and in part payment thereof there be offered two Cadillac automobiles now in the use of the State Highway Commission plus a sum not exceeding $5,520.00. This was seconded by Mr. Jelin and adopted.

Route #11, Essex County ✓

The Secretary reported that a delegation from the Board of Freeholders of the County of Essex was present and desired a hearing. On motion duly seconded, a hearing was granted. There appeared Mr. William A. Stickel, County Engineer; Mr. E. A. Reed, Chairman of the County Road Committee and Mr. Z. G. Crane, Director of the Board of Freeholders, also Mr. Bowden, County Supervisor. Mr. Reed advised the Commission that the purpose of the delegation was to ascertain from the Commission what was proposed to be done in connection with State Highway Route #11 in Essex County, and he explained that this route had been changed at the last Legislature which would not permit of Bond Issue funds being applied thereto, but the County of Essex felt that the State could take the road over as part of the State Highway System for future maintenance, at this time. Mr. Stickel advised the Commission that the road at the present time is paved and would not require reconstruction, and that the right of way on the road is one hundred feet. State Highway Engineer Sloan reported to the Commission that the present condition of Route #11 out of Newark is very unsatisfactory for traffic, there being a pavement between the two lines of trolley tracks which causes a poor condition on the shoulders, and he further stated that he felt that in the event this road is taken over it would necessitate very early reconstruction. Commissioner Kidde inquired as to the manner in which Route #11 might be taken over. The Secretary stated that the State Highway Commission could take the road over for maintenance from its motor vehicle account but that Bond Issue funds could not be applied for its reconstruction. Commissioner Kidde stated that inasmuch as the County did not desire immediate reconstruction, this removed from his mind a great amount of doubt as to what could be done and he moved that the State Highway Engineer prepare a complete report as to the status of Route #11 in order that the State Highway Commission may take action looking toward the taking over of that road as part of the State Highway System. This was seconded by Mr. Jelin and adopted.

Damage Clain, Hackensack Bridge. ✓

Commissioner Kidde inquired from the Essex County delegation what progress is being made in the suit for damages in the destruction of the draw span of the Hackensack River Bridge. Mr. Stickel, County Engineer, informed the Commission that the Court had determined that the ship owners were liable to the Counties of Essex and Hudson for the damage done, but that the amount of damage collected could not exceed the total value of the craft which had collided with the bridge and this amount was in the neighborhood of $140,000.00. He further stated that estimates had been prepared in order to be submitted to the Arbitration Board to fix the amount of damages in the amount of $140,000.00, while the boat owners estimated that the total damage done would not exceed $100,000.00 and therefore it would be necessary to establish the amount of damage between $100,000.00 and $140,000.00. Commissioner Kidde further inquired from Mr. Steckel as to whether any information had been obtained concerning the responsibility of the Public Service Corporation in the re-building of the Hackensack River Bridge. Mr. Stickel advised that he had searched carefully into the records and he had secured a great quantity of information which should be compiled before a report can be made, and he suggested that the State Highway Commission authorize a representative of the State Highway Department to compile the information now in the hands of the County Engineer of Essex County. Commissioner Kidde moved that the State Highway Engineer be authorized to delegate an employee of the State Highway Department to work in conjunction with County Engineer Stickel in order to compile information concerning the Public Service franchise over Route #1, Lincoln Highway Section in Essex and Hudson Counties. This was seconded by Mr. Jelin and adopted.

Motor Vehicle Funds, Status ✓

The Secretary presented to the Commission a detailed statement as to the status of the Motor Vehicle funds of the State Highway Department in which he advised that present indications were to the effect that the anticipated receipts in the Motor Vehicle funds would be reached but that it would not be possible to make any additional allotments until the money was in hand on or about January 1, 1924. On motion duly seconded, the report was ordered received and placed on file.

Frenchtown Hearing ✓

The Secretary informed the Commission that a delegation from the Borough of Frenchtown was present and desired a hearing. On motion duly seconded a hearing was granted. There appeared

Senator Egans of Hunterdon County, County Engineer Davis, the Mayor of Frenchtown and Mr. Bloom, Borough Clerk of Frenchtown. Mr. Bloom advised the Commission that they appeared with reference to the improvement of one-half mile of road through the Main Street of Frenchtown which forms an important connecting link in the County road System. The estimated cost of this work was $42,714.00 and the request of the Borough was for a State's apportionment of $20,000.00; the total estimated cost including curbs and gutters and a concrete construction 8" thick. He further stated that it was proposed to do this work under Chapter 43 Laws of 1917 which permitted extraordinary repair and reconstruction by municipalities in conjunction with the State.

The Secretary informed the Commission that on the priority list of the Commission is a request from the Borough of Frenchtown for $15,000.00. The Borough authorities advised that when the first request was made there was no intention of widening the road to the curbs and gutters, which it was intended to do under the present request. Commissioner Kidde informed the delegation that in all cases passing through municipalities the State Highway Commission was assisted by the local authorities in the widening by sharing in the same as a "Town Improvement" and he (Commissioner Kidde) moved that the matter be referred to the State Highway Engineer for investigation on the ground and further report.

Senator Agans of Hunterdon County asked favorable consideration for the request of Frenchtown in the improvement of its streets. He further asked for the consideration of the Commission to the completion of the Township road between Centerville and Three Bridges, a distance of one-half mile. The Secretary informed the Commission that this request was in the general township requests from Hunterdon County for consideration with other Township approvals.

Route #9, Detours. ✓

Senator Agans further requested consideration of a road between West Portal and Asbury which the citizens claimed had been torn up while it was used as a detour for Route #9 traffic. State

Highway Engineer Sloan advised that he had ordered an investigation of this complaint and had found that the road was placed in better condition by the forces of the State Highway Department after Route #9 was completed that it was before being used as a detour.

Route #13, Section #6

The Secretary informed the Commission that a delegation from Lawrence Township was present and desired a hearing. On motion duly seconded a hearing was granted. There appeared Mr. Harvey Satterthwaite at the head of a delegation composed of Mr. Reeves Mr. White, Mr. DeCou, Mr. Applegate, and Mr. Evans. Mr. Satterthwaite advised the Commission that the delegation had been informed on the 16th of July of the fact that the State Highway Commission proposed to construct Route #13, through Lawrence Township without making provision for moving the trolley tracks now existing; he also advised that the Township was very desirous of widening the roadway through Lawrenceville to the curbs and gutters in conjunction with the State Highway work, but that they could not negotiate the finances of this work within the short time remaining before the work was undertaken. He further advised that the Township of Lawrence was negotiating for the purpose of installation of a water system which would require the placing of mains through the center of the street and would be beneath the pavement to be laid by the State Highway Commission. With all these considerations he asked that the Commission delay the construction of Route #13 until proper arrangements could be made by Lawrence Township for the financing of all of this work contemplated, and also that the Township may be permitted to go before the Public Utility Commission in order to force the trolley company to place its tracks in a condition safe for travel. Mr. Jolly stated to the Committee that he felt that the requests as made for a delay was very indefinite for the reason that the Committee was not sure as to just how long it would take to negotiate the finances, and he suggested that the water mains be laid under the sidewalk or in another location if the funds could not be raised within a very short period. Commissioner Kidde stated that if this work was omitted from the contract it would necessitate the holding up of traffic on the Lincoln Highway over two construction seasons instead of one as would be the case if all the work was done this year, and he inquired whether there was any way in which the State Highway Commission could assist the Township in forcing the problems through the Township and he was informed that if the Commission would join in going before the Public Utility Commission as regards the trolley situation, it would add some weight to the efforts of the Township. Commissioner Stewart stated that he felt that if the State Highway Commission would omit this section of the road at the present time it might impair the opportunity to have the work done by the State Highway Commission for sometime to come. Commissioner Kidde further stated that he believed that this was the first time on record that municipality had resisted in improvement. Mr. Satterthwaite advised that the Township Committee was not willing to obligate itself to the cost of the extra work upon such short notice and without consulting the people who will pay the bills. On motion by Mr. Stewart, seconded by Mr. Jelin, the State Highway Commission directed that the matter be taken under advisement for further consideration.

East Main St., Boonton, Morris Co. ✓

Commissioner Jelin presented to the Commission the following written report on bids received on East Main Street, Boonton, Morris County on July 5th, and he moved the approval of his recommendations.

Trenton, N.J., July 31, 1923.

To the State Highway Commission,

Gentlemen:

I would report that on July 25th, I personally attended the opening of bids, at the Court House, Morristown, for the construction of East Main Street, Boonton. I found there were five bidders, the lowest bid being submitted by the Utility Construction Company, of New Brunswick, in the amount of $59,720.00. The saving affected, therefore, is $2,417.75.

It is my opinion, however, that the lowest bid as submitted on this work is still too high. Without casting reflections on the governing body of Morris County, it is my personal belief that a mistake was made in advising Morris County to advertise for a sheet asphalt pavement in this locality. It appears that the Standard Bitulithic Company is the only contracting firm which has an asphalt plant in the vicinity of this job. Proper competition is therefore denied to Morris County because this particular job is too small to warrant the bringing in of an asphalt plant, and contractors are practically at the mercy of this single plant where they must purchase their asphalt.

It is also my personal belief that a saving of at least $5,000.00 additional can be made if the contract is readvertised for concrete, in competition with Amiesite and two inch Topeka.

I would also report that there is at present no sewer under this proposed pavement, and this should be attended to before a contract is let.

I would therefore recommend that the State Highway Commission refuse approval of the award of contract on East Main Street, Boonton, and that the work be again advertised for the several types mentioned above, to assure proper competition for Morris County.

Respectfully submitted,

ABRAHAM JELIN

Commissioner.

Commissioner Kidde stated that he felt that the Commission was justified in asking for further competition in order to secure better prices for Morris County on the work, and Mr. Stewart seconded the recommendation of Mr. Jelin, and the Commission unanimously denied the approval to the award of contract by Morris County for the work as advertised on East Main Street, Boonton, Morris County and directed that the Secretary inform the County of Morris that the State Highway Commission would recommend that re-advertisement be made for this work for concrete in competition with Amiesite and Two-inch Topeka.

Route #2, Sec.#4, Burlington ✓

The Secretary informed the Commission that Mr. L. J. Sieling low bidder on State Highway Route #2, Section #4 through Burlington was present at the request of the Commission. On motion duly seconded a hearing was granted. Mr. Sieling appeared in company with Dr. Stryker to whom he had proposed to sublet the grading work on Route #2, Section #4. Mr. Sieling called attention to the fact that Dr. Stryker had made a very attractive price to him for the grading work, which accounted for the low price bid. He further stated that he had received advice from the American Bridge Company that shipment of steel necessary for bridge work could be made within three and a half months, and he further stated that he was in a position to begin work immediately and also he felt that his former record with the State Highway Department on bridges and roads should assist him in securing the approval of the State Highway Commission to the award of contract to him. He further stated that he would accept this work and would not expect any extensions of time from the State Highway Commission. On motion duly seconded the matter was ordered held under advisement by the State Highway Commission.

✓

Delia Ave., Bridge & Trolley Crossing,
Route #10, Section #2.

The Secretary reported to the Commission that R. J. Mansfield low bidder on bridge and trolley crossing at Delia Avenue, Route #10, Section #2, was present at the request of the Commission. On motion duly seconded the hearing was granted. Mr. Mansfield appeared before the Commission and asked that the contract be awarded to him on the ground that he was entirely responsible and that he had previously done work of a similar nature for several municipalities and the U. S. Government. He related to the Commission the hardships he had encountered in the work of Biddle's Creek Bridge on Route #15 where he had been held up on account of the tides. Commissioner Kidde called his attention to the type of foreman that he found on the work when he made an inspection of the same, and he advised Mr. Mansfield that his impression was not favorable as to the character of the work performed due to the fact that there appeared to be no personal supervision by Mr. Mansfield himself.

After further discussion Mr. Kidde moved that the matter of award of contract to Mr. Mansfield be held under advisement by

The State Highway Commission. This was seconded by Mr. Jolin and adopted.

The Secretary informed the Commission that Mr. J. J. McGary second bidder on the Delia Ave., crossing on Route #10, was present to answer any questions which the Commission might require. Mr. McGary was invited into the Commission meeting and informed the Commission that he had all of the necessary equipment and material to proceed expeditiously with the work. He recited for the Commission the work he had previously done for the Highway Department and stated that his total accomplishments last year were $700,000. He asked that in the event the Commission did not award the contract to the low bidder, that he be permitted to proceed with the contract. No action was taken on the matter by the Commission.

Sussex County Repairs ✓

The Secretary informed the Commission that Senator Kays, County Counsel for Sussex County, was present and desired a hearing. On motion duly seconded, the hearing was granted. Senator Kays appeared before the Commission and advised that the County of Sussex is very anxious to use a balance of $12,500.00 remaining in the 1922 Motor Vehicle schedule for the payment of bills due against 1922 repair work. He advised that it was first contemplated to use this money for the retirement of bonds under Chapter 10, Laws of 1919, but for the first year this was taken care of under short-term notes and the County would not begin this work under Chapter 10 until 1923. Commissioner Kidde stated that he felt that the entire matter should be gone into by the State Highway Engineer, and that proper resolutions should be prepared together with a report as to the work to be done. Commissioner Jolin therefore moved that the State Highway Engineer be instructed to report on the work to be done by ~~Essex~~ Sussex County under Chapter 10, Laws of 1919, and to prepare proper resolutions for adoption by the State Highway Commission in order that 1922 funds may be applied against the schedule and in order that the Commission may approve of the procedure by the County.

Sussex-Port Jervis Road ✓

Senator Kays advised the Commission that the County of Sussex had been informed that the U. S. Government would not approve the grading contract for the Sussex-Port Jervis Road under Federal Aid unless it was guaranteed by the County that a durable pavement will be placed thereon within three years; he further advised that this would be impossible for the County of Sussex in view of the large cost, but that the County was ready to proceed with the grading at this time without giving any details as to future work. Commissioner Jelin stated that he felt that a durable type of pavement on this road would be something similar to a penetration macadam and Commissioner Kidde stated that he believed that it would be possible to have the terms as set down by the Government modified to an extent which would permit of Sussex County proceeding in accordance with its original plans, and he suggested that Senator Kays prepare a brief as to the attitude of Sussex County toward the work and in order that the same might be presented to the Federal Government with the favorable opinion of the State Highway Commission in order to obtain a modification of the original requirements.

Fredon-Newton Road ✓

Senator Kays further requested consideration of final payment to the County for work done on the Fredon-Newton Road with State Aid. He advised that the County has performed its part upon this work by placing a gravel pavement thereon and would request payment by the State of balance withheld in the sum of $8,100.00. Commissioner Stewart moved that the State Highway Commission approve the payment of balance due Sussex County on account of the Fredon-Newton Road. This was seconded by Mr. Jelin and adopted.

Sussex County Hearing ✓

There were several other items concerning Township Aid and Federal Aid which the Sussex representatives had to bring before the Commission and they were directed to take the matters up with the State Highway Engineer before the same were placed before the Commission.

The Commission recessed for luncheon at 2.15 P.M., to re-convene at 3.15 P.M.

The Commission reconvened at 3.15 P.M., as agreed, with the same members present as at the morning session.

Burlington County Hearing ✓

The Secretary informed the Commission that a delegation of the Board of Freeholders of Burlington County was present and desired a hearing. On motion duly seconded, the hearing was granted. Mr. Wright, Director of the Board of Freeholders, appeared together with County Engineer Smith and Chairman of the Road Committee, Mr. Stout, inquiring concerning the Mile Hollow-Yardville Road, and asking that this road be constructed as a connection of State Highway Routes #1 & #2, thus enabling traffic to travel from Route #1 at Robbinsville, to Route #2 at Mile Hollow near Bordentown. The delegation was advised that the provision of Chapter 14 of the Laws of 1917 to which they referred had been adjudged in conflict with other provisions of this Act, and therefore, no action had thus been taken under this Act. Mr. Wright then inquired whether Detour money could be applied on this road in order to save the work that had already been done thereon. There followed a discussion during which the delegation was advised that it did not appear possible to perform the class of work which was contemplated by Burlington County under the Detour Act. On motion by Mr. [illegible], seconded by Mr. [illegible], the request of the County was ordered filed for consideration should the funds become available for proceeding with this work.

Burlington County Inspection. ✓

Commissioner [illegible] inquired of the Commission whether a definite date could be set for making a trip over the Burlington County roads as requested by the Board of Freeholders [illegible]. Chairman Scott advised that he was prepared to go at any time the Commission saw fit, and it was definitely decided that the Commission would visit Burlington County on Thursday, August 9, 1923.

Route #5, Dover - Openings

The Secretary reported that Mr. Clyde Potts, Engineer for the Town of Dover, and Mayor Hosking of Dover were present and desired a hearing. On motion duly seconded, the hearing was granted. Mr. Potts stated to the Commission that the Town of Dover is constructing a new sewer and the contracts had been let for the laying of the necessary mains. The Committee requested that permission be given to the Town of Dover for the laying of its mains on Blackwell Street on Route #5, through the Town of Dover, since this section was as yet unimproved by the State Highway Commission and the laying of mains would not interfere with the construction. Mr. Potts advised that the alternate way to do this work would be to lay the mains under the sidewalks but this would involve considerable legal difficulty with property owners who had placed vaults and other property beneath the sidewalks. Commissioner Kidde suggested that where the mains lay outside the congested limits, that they then be placed under the sidewalks. On motion by Mr. Kidde, seconded by Mr. Jolin, the State Highway Engineer was directed to investigate the application of the Town of Dover and make a report on the same at the next meeting.

Route #5, Sec. #6, Speedwell Avenue ✓

Commissioner Kidde inquired of Mr. Potts, who is Mayor of Morristown, as to what was being done in connection with the trolley track area on Route #5, Speedwell Avenue, Morristown. Mr. Potts informed the Commission that the situation was even more difficult due to the fact that the Morris County Traction Co., was operating in the hands of a receiver, and he explained to the Commission that it was his feeling that inasmuch as the State Highway Commission took over with the road all the franchises of the utilities existing thereon and assumed the same position as was the case of the municipality before, that the municipality would not feel willing to inject themselves into the controversy except to say that they were very anxious to have the road between the tracks repaired to a condition suitable for the passing traffic. Commissioner Kidde called the attention of Mayor

Potts to the fact that in practically all cases where State Highway Routes passed through municipalities, the local municipalities were willing and anxious to be permitted to share with the State in the cost of the extended improvement for the benefitting of the municipality, and he urged upon Mr. Potts that the municipality cooperate with the State Highway Department in efforts to remedy conditions through Morristown. Mayor Potts stated that as far as the municipality was concerned they would prefer to have the trolley tracks removed entirely and would then consider sharing in the cost of paving. Mayor Potts stated that he had suggested to the State Highway Commission that they have the contractor on the Route #5, restore the grade of the tracks to the same grade as the existing roadway in order that the traffic may travel over the tracks. Mayor Potts further stated that in the event the Commission desired to take the matter of paving up with the trolley authorities that they would be willing to cooperate in whatever way they could. On motion by Mr. Kidde, duly seconded, the State Highway Engineer was directed to investigate the condition of the tracks on Route #5, Speedwell Ave., Morristown, with a view toward having some temporary repair provided.

Hackensack Bridge, Route #1, Extension.

The Secretary presented a certificate of permission from the State House Commission covering the additional amount necessary to be paid on the contract of Stillman-Delehanty-Ferris Company for the construction of the temporary bridge over the Hackensack River on Route #1 Extension. On motion by Mr. Kidde, seconded by Mr. Jolin, the State Highway Commission approved the final payment of balance due Stillman-Delehanty-Ferris Co., contractors on the Hackensack Bridge, Route #1 Extension, in accordance with the permission granted by the State House Commission to make such payment.

Right of Way Route #2, Section #11.

The Secretary reported to the Commission that on properties necessary for Right of Way on Route #2, Section #11, it was necessary to take properties belonging to the West Jersey & Seashore Railroad at the crossing in Woodbury for the betterment of alignment. This entailed the moving of a house, the cost of which moving was $750. The property desired was deeded to the State without cost, but the Railroad Co., requested payment of the cost of removal of the building. On motion by Mr. Jolin, seconded by Mr. Stewart, the State Highway Commission approved the payment of $750. for property and removal of building on Route #6, Section #11, at Woodbury, from the West Jersey & Seashore Railroad Company.

E. P. Goodrich Appointment ✓

The Secretary presented a communication from the Civil Service Commission advising that Mr. E. P. Goodrich's appointment as Consulting Engineer in traffic problems for a maximum service of forty days at $100.00 per day is approved as a temporary special employee. Commissioner Kidde moved that the communication be received and that all out-standing accounts for service of Mr. E. P. Goodrich be paid. This was seconded by Mr. Jolin and adopted.

Communications /

The Secretary presented a communication from W. Parker Runyon of the State Board of Commerce and Navigation, requesting the Commission for sufficient canvas covering out of its surplus material to make a winter cover for the New Jersey State Boat (W. Parker Runyon). On motion by Mr. Jolin, seconded by Mr. Stewart, the communication was ordered received and the Secretary was directed to take the matter up with the Attorney General's Department to ascertain whether the State Highway Commission has the authority to offer the use of this canvas to another State Department.

Route #16, Sec. #2, Bedminster Cor. Mine Mt. Road /

The Secretary presented a communication from the Board of Freeholders of Somerset County advising of an extension of time granted to the Engineering Construction Corporation on Route #16, Section #2, together with a communication from the contractor. The State Highway Engineer reported to the Commission that he had previously recommended that no further extensions of time be granted on this section of road. Commissioner Jolin therefore moved that the communication be received and that the County of Somerset be notified that the State Highway Commission cannot consider granting any further extension of time on this work until the work is entirely completed.

Manasquan River Bridge ✓

The Secretary presented a resolution from the Borough of Brielle in printed form, which called upon the citizens of Brielle to be come interested in the improvements of the Inland Waterway and the Manasquan River Bridge at Brielle. On motion duly seconded this resolution was ordered received and placed on file.

Cape May- Lewes Ferry ✓

The Secretary presented a communication from the Cape May Chamber of Commerce urging the consideration of the Commission in the development of the Cape May-Lewes Ferry. On motion by Mr. Stewart, seconded by Mr. Jolin, the State Highway Commission directed that the Secretary advise the Cape May Chamber of Commerce, referring to a previous communication in which the State Highway Commission then advised that this matter has been before the Attorney General's Department and the Delaware authorities and the State Highway Commission was also advised that the State of Delaware has only $15,000.00 available for the work and that the Attorney has advised that unless the State of Delaware agrees to go into the proposition on a fifty-fifty basis with the State of New Jersey, that no further action can be taken by the State Highway Commission, and for this reason the State Highway Commission is not prepared to proceed with the matter.

Complaints ✓

The Secretary presented a petition from the residents of Bayville, New Jersey, on Route #4, requesting relief from dust nuisance existing on this section of road. The Secretary informed the Commission that arrangements were made for taking care of this work as soon as the Lignin Binder was received and could be placed. On motion by Mr. Jolin, seconded by Mr. Stewart, the Secretary was directed to so notify the Village of Bayville.

Amboy Bridge

The Secretary presented a communication from Mr. Phillip H. Bruskin, who is named as one of the appraisers on the Amboy Bridge properties, requesting a copy of the resolution showing duties and powers of this Appraisal Committee, and whether it is to determine the physical as well as the business damages to the properties on the line of the new Perth Amboy Bridge. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission directed that the Communication be referred to the Attorney General in order that he might define the powers of the appraisers.

Proposed Routes.

The Secretary presented a communication from the Black Horse Pike to the Sea Association, calling attention to the advantages, if approved, for the construction of a paved highway from Camden to the seashore by the way of Blackwood and Williamstown Pike, thence to Mays Landing, and further requesting a hearing of the Association members at any time. On motion duly seconded, the communication was ordered received and the Secretary was directed to notify the Black Horse Pike Association that when the matter of further routes across the State is taken up that they will give an opportunity for a hearing, but nothing definite on it could be determined at this time.

Convention

The Secretary presented a communication received by General Scott from Comptroller N. A. K. Bugbee, urging that the annual conference of the Highway Department be held at Trenton again as usual. The Secretary informed the Commission as to the matter of conventions held during the past three years by the State Highway Department during the month of February when papers are read by prominent road authorities and discussions were participated in by members of the State Highway Department, contractors and material men. Mr. Stewart moved that it be the sense of the State Highway Commission that there be held a convention of the State Highway Department, and that Chairman Scott be authorized to name a committee to attend to the necessary arrangements. This was seconded by Mr. Jelin and adopted.

Employments.

The Secretary presented a communication received from the International Union of Steam Engineers, calling attention to the fact that men employed on the Hackensack Bridge on Route #1, were being paid less than the Union rate. On motion by Mr. Jelin, seconded by Mr. Stewart, the communication was ordered received and referred to Superintendent Muir for investigation and report. Commissioner Kidde advised that he believed the union scale would not apply in cases where men were employed for the entire year and were paid for vacations and days off.

Shade Trees on Highways

Commissioner Kidde inquired whether any information had been received from the Department of Conservation and Development relative to the proposed shade tree experiment on the State Highways. The Secretary informed the Commission that no further information had been obtained from that Department, and Commissioner Kidde suggested that inasmuch as the fall of the year was the proper time for planting such trees, that the Secretary communicate with the Department of Conservation and Development inquiring as to what progress has been made toward shade tree development along State Highways.

Requests for Aid

The Secretary reported that Mr. Thorne, Superintendent of the State Institution for Feeble Minded,at Vineland, was present concerning the road leading from Landis Ave., Vineland, to the State Institution. He expressed the same arguments which were presented by Mr. Johnstone at the meeting of the previous week, and the Commission advised him that the matter had been placed on the preferred list for consideration when there are funds available for the work.

The Schedule of Business was next taken up for consideration Item by Item as follows:

Route #4,Sec. #20,Manasquan-Sea Girt.

State Highway Engineer Sloan presented plans and specifications for the construction of Route #4, Section #20, Manasquan-Sea Girt Section, and recommended approval by the Commission. On motion by

Mr. Stewart, seconded by Mr. Kidde, the State Highway Commission unanimously adopted the following resolution:

> BE IT RESOLVED, that the State Highway Commission does hereby approve plans and specifications for Rt.#4, Section #20, Manasquan-Sea Girt section Monmouth County, and
>
> BE IT FURTHER RESOLVED, that the Chairman is authorized to sign the necessary papers after approval by the State Highway Engineer and the Secretary is directed to place the necessary advertisements for the work.

Route #5, Sec.#13, Budd Lake-Netcong.

The State Highway Engineer reported to the Commission the receipt of bids as follows, for the construction of Route #5, Section #13, Budd Lake-Netcong Section, Morris County, and recommended the award to the low bidder, Salmon Bros. of Netcong, at 85.8% of the engineer's estimated units of cost amounting to $52,061.61.

Salmon Bros.	85.8%
Smith Bros. & Co.	97.5
Richards & Gaston, Inc.	93.0
Claus Miller-Freeman Co.	91.25
T. J. M. Const.	96.5
Spiniello Const. Co.	97.

On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission adopted the following resolution:

> BE IT RESOLVED, that the contract for the construction of Route #5, Section #13, Budd Lake-Netcong Section, be and the same, is hereby awarded to Salmon Bros., of Netcong, New Jersey, on their's the lowest bid submitted being 85.8% of the Engineer's estimated units of cost and amounting to $52,061.00, and
>
> BE IT FURTHER RESOLVED, that the Chairman is authorized to sign the necessary contract after approval by the State Highway Engineer.

Right of Way, Route #10, Sec. #1C, Parcels #2 and #13.

The State Highway Engineer recommended to the Commission the purchase of the following parcels of property on Route #10, Section #1C.

Parcel #2 from Edith J. and Ferdinand J. Pflug.	.052 Acres	Consideration $1.00
Parcel #13 from Albert Schauermann.	.014 Acres	Consideration $25.00

On motion by Mr. Kidde, seconded by Mr. Jelin, the recommendation of the State Highway Engineer for the purchase of property on Route #10, Section #1C was approved.

Right of Way, Route #2, Section #4.

The State Highway Engineer recommended to the Commission the purchase of Parcel #11 on Route #2, Section #4 from Emily B. Greenwood for the consideration of $1.00. On motion by Mr. Jelin, seconded by Mr. Stewart, the recommendation of the State Highway Engineer was approved for the purchase of property known as Parcel #11 on Route #2, Section #4.

Right of Way, Route #12.

The State Highway Engineer presented a report on property required from William H. Beattie for the elimination of grade crossing on Route #12, Union Avenue, Little Falls, and recommended that an offer of $205.60 be made and in the event of his refusal condemnation proceedings be instituted. On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission authorized the purchase of property on Route #12, at Union Ave., Little Falls, from Mr. Wm. H. Beattie for the sum of $205.60, and in the event of Mr. Beattie's refusal directed that condemnation proceedings be instituted in accordance with the following resolution:

> RESOLVED, that this Commission hereby determines to acquire in the name of the State of New Jersey, for public use in the construction of State Highway Route #12, ALL that certain Lot, tract or parcel of land and premises, situate, lying and being in the State of New Jersey, and more particularly described as follows:

Parcel #1

Being Parcel #1, containing twenty-two hundred (2200) sq.ft., more or less, of land and shown in yellow outline on attached print.

Beginning at the intersection of the Westerly side line of Union Avenue and the Southerly right of way line of the Morris & Essex Railroad Company, thence

(1) Southwestwardly along said Westerly side line of Union Avenue two hundred twenty (220) feet, thence

(2) Northeastwardly across lands of Beattie Manufacturing Company two hundred sixteen (216) feet, more or less, to an intersection with the Southerly right of way line of the Morris & Essex Railroad Company, thence

(3) Southeastwardly along said Southerly right of way line twenty (20) feet to place of beginning.

Parcel #2

Being Parcel #2, containing fifty-six hundred (5600) sq. ft.., more or less, of land and shown in yellow outline on attached print.

Beginning at the intersection of Easterly side line of Union Avenue and the Southerly side line of Lackawanna Avenue, thence

(1) Southwestwardly along said Southerly side line of Lackawanna Avenue two hundred forty-three (243) feet, more or less, to the Westerly line of lands of the New Jersey General Security Co. (formerly The East Jersey Water Companies), thence

(2) Southwestwardly along said line of lands eleven (11) feet, thence

(3) Northwestwardly across lands of Beattie Manufacturing Co., two hundred thirty-five (235) feet to a point distant thirty (30) feet, measured Southwestwardly at right angles from the Southerly side line of Lackawanna Avenue, thence

(4) Southwestwardly still across lands of Beattie Manufacturing Co. one hundred (100) feet, more or less, to an intersection with the Easterly side line of Union Avenue, thence

(5) Northeastwardly along said Easterly line of Union Avenue one hundred thirty (130) feet to the place of Beginning.

Parcel #3

Being Parcel #3, containing seventy-four hundred (7400) sq. ft., more or less, of land and shown in yellow outline on attached print.

Beginning at the intersection of the Easterly side line of Union Avenue with the Northerly right of way line of the Morris & Essex Railroad Co., thence

(1) Eastwardly along said right of way line thirty-three (33) feet, thence

(2) Northeastwardly across lands of the Beattie Manufacturing Company two hundred eighty-seven (287) feet, more or less, to an intersection with the Easterly side line of Union Avenue, thence

JUL 31 1923

(3) Southwestwardly along said Easterly side line of Union Avenue one hundred fifteen (115) feet, to an angle point in same, thence

(4) Southwestwardly still along said Easterly side line two hundred (200) feet, more or less, to the place of Beginning,

The State Highway Engineer is hereby authorized and directed on behalf of this Commission, to make an offer to the owners or owner of said lands and premises for the conveyance of the same to the State of New Jersey free and clear of all encumbrances, and, upon the failure of such owner or owners to accept such offer, or if for any other reason said lands and premises cannot be immediately acquired by agreement with such owners or owner, then the Attorney General of the State of New Jersey is hereby authorized and directed to institute condemnation proceedings for the acquisition of said lands and premises.

Right of Way, Route #5, Section #2A

The State Highway Engineer presented to the Commission purchase agreements and recommended approval of the purchase of property on Route #5, Section #2A as follows:

Parcel #3	-----Estate William B. Williams -----	$1,[illegible]75.00
Parcel #2	-----George Z. Williams --------------	500.00
Parcel #8	-----William W. Bird ----------------	350.00

On motion by Mr. Jolin, seconded by Mr. Stewart, the State Highway Commission directed that appraisals be secured on the property of Mr. William B. Williams before the purchase is authorized, and that purchase be made of Parcels #2 & #8.

Right of Way, Route #5, Sec. #13

The State Highway Engineer presented a report of the appraisers on property needed for right of way on Route #5, Section #13, Budd Lake-Netcong Section, which had been requested at the last meeting of the Commission. On motion by Mr. Kidde, seconded by Mr. Jolin, the State Highway Commission unanimously approved the purchase of the following parcels of property on Route #5, Section #13, the same having been appraised equal to or in excess of the amounts established to the owners.

Parcel #3	Caroline Scudder	$100.00
Parcel #14	Mrs. Dorcas Stearns	300.00
Parcel #2A	Paul Romano	200.00

JUL 31 1923

On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission directed that the property of the Bochman Spring Co., and Frank Donimick on Route #5, Section #13, be referred to Commissioner Jelin for investigation and further report.

Route #4, Section #9.
Smithville-Mullica River

State Highway Engineer Sloan reported that Route #4, Section #9, Smithville-Mullica River Section was completed and ready for inspection. Commissioner Jelin informed the Commission that he had inspected this work and would move its acceptance by the Commission in accordance with the Reimbursement Act. This was seconded by Mr. Kidde and adopted.

The State Highway Engineer called attention to the fact that the bridge over Nacote Creek on this section was at fault in design as regards the pile bents but this was not the fault of the contractor. Commissioner Kidde suggested that the State Highway Engineer direct the Bridge Department to make corrected plans for this bridge and determine whether anything can be done to strengthen this structure. The State Highway Engineer reported that the strength of the bridge was satisfactory.

Route #4, Sec. #17, Main St., Barnegat.

The State Highway Engineer reported that Route #4, Section #17, Main St., Barnegat, was completed and ready for inspection and acceptance by the State Highway Commission; the same having been accepted by the County of Ocean on May 12th, 1923. Commissioner Jelin reported that he had made an inspection of this work and was prepared to move its acceptance by the Commission in accordance with the terms of the Reimbursement Act. This was seconded by Mr. Stewart and adopted.

Rt. #4, Sec. #18, Main St., Tuckerton.

State Highway Engineer Sloan reported to the Commission that Route #4, Section #18, was completed and ready for acceptance by the State Highway Commission; the work having been accepted by the County of Ocean on June 18, 1923. Commissioner Jelin reported that he had inspected the work and would move its acceptance in accordance with the terms of the Reimbursement Act. This was

JUL 31 1923

seconded by Mr. Stewart and adopted.

Route #6, Sec. #14, Woodbury ✓

The State Highway Engineer reported to the Commission that Route #6, Section #14, in the City of Woodbury was completed and ready for acceptance by the State Highway Commission; same having been accepted by the County of Gloucester on June 16th, 1923. Commissioner Jolin reported that he had gone over this work on a recent inspection trip and would move its acceptance by the State Highway Commission in accordance with the terms of the Reimbursement Act. This was seconded by Mr. Stewart and adopted.

Route #1, Section #13. ✓

State Highway Engineer Sloan presented an application from Mr. T. H. Riddle for an extension of time to August 1, 1923 on account of the construction of Route #1, Section #13, and recommended approval to September 1, 1923. On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission approved of extension of time to September 1, 1923, to T. H. Riddle for the completion of Route #1, Section #13.

Route #1, Section #14. ✓

State Highway Engineer Sloan presented a request for an extension of time of 30 working days from July 11th for S. S. Thompson & Co., contractors on Route #1, Section #14. This work having been delayed on account of the construction of the undercrossing of the Bordentown Branch of the P. R. R. and recommended approval of the same. On motion by Mr. Jolin, seconded by Mr. Stewart, the State Highway Commission approved of an extension of time of 30 working days from July 11th, for the completion of Route #1, Section #14, Stelton Road - Metuchen.

Communication on Route #10, Hudson County. ✓

The Secretary presented a communication from the Board of Freeholders of Hudson County forwarding a resolution and requesting a hearing to be held on the taking over of Route #10 from the Hudson County Boulevard to the Hudson-Bergen County Line. On motion by Mr. Stewart, seconded by Mr. Jolin, the communication was ordered received and the Secretary was directed to inform

Hudson County Board of Freeholders that the State Highway Commission is not yet prepared to act on this matter but will be very glad to inform them of the time when this will be taken up.

Route #2, Section #4, Burlington.

The Commission went into executive session at 5:00 P.M., for fifteen minutes. When the meeting was again re-opened, Commissioner Kidde moved the adoption of the following resolution for the construction of Route #2, Section #4, through Burlington:-

> BE IT RESOLVED, that the State Highway Commission does hereby make award of contract for the construction of Route #2, Section #4, through Burlington to Mr. L. J. Sieling at his, the lowest bid of 86.4% of the Engineer's estimated units of cost in the amount of $149,968.58, and
>
> BE IT FURTHER RESOLVED, that the Chairman is authorized to sign the necessary papers after approval by the State Highway Engineer.

This was seconded by Mr. Jelin and adopted.

Delia Ave. Bridge Crossing, Rt. 10.

Commissioner Jelin moved that the State Highway Commission defer action relative to the award of contract for Delia Avenue bridges on Route #10, until the next meeting of the Commission. This was seconded and adopted.

Route #13, Lawrence Township.

Commissioner Kidde moved that it be the sense of the Commission that the work through the Township of Lawrence in Mercer County be not held up in any way, and that the authorities of Lawrence Township be advised that the State Highway Commission will cooperate with them to the very best of its ability, but this will in no way interfere with the progress of the construction. This was seconded by Mr. Jelin and adopted. The State Highway Engineer was directed to prepare for the Township of Lawrence a complete and careful estimate of the cost of the improvement beyond the width of the roadway which the State would pay for.

Route #12, Section #2. Denville-Parsippany

State Highway Engineer Sloan presented a report in connection with the condition of the Fox Hill grade on Route #12, Section #2, in which it was recommended that the surface of the grade be roughened by the application of hot chips to be spread and rolled into the surface in accordance with bid received from the Standard Bitulithic Company in the sum of $298.00. On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission approved the recommendation of the State Highway Engineer for the roughening of the surface on the Fox Hill grade.

Commissioner Kidde retired from the meeting at this time due to previous engagement for the evening.

Route #4, Perth Amboy ✓

The State Highway Engineer presented a report of the Engineering Department as requested by the Commission covering the re-alignment of State Highway Route #4 between Spa Spring Road at Amboy Avenue and Convery Place in the City of Perth Amboy, and requested that some action be taken in order that the work may proceed looking toward the construction of this new line. On motion by Mr. Stewart, seconded by Mr. Jelin, the report was ordered referred to Commissioner Jelin for further study and investigation.

Complaint, Route #9 ✓

The State Highway Engineer presented a report in connection with the complaint of J. W. Higgins, Borough Engineer of Roselle Park, with reference to the unsatisfactory condition of the crossings of the tracks of the Public Service Railway Company through Roselle Park on Route #9, and he recommended that the Public Service Railway Company be notified that in this franchise it is required to lay and maintain an 8" macadam pavement at each street intersection and also to pave between said tracks with 4" of macadam at all other points, and that in the event of their failing to carry out this requirement the State Highway Commission will proceed to do the work and bill the cost of same against the Public Service Railway Company. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission approved the recommendation of the State Highway Engineer and authorized him to so communicate with the Public Service Railway Company.

2236-A

JUL 21 1923

Route #1, Lake St. Bridge, Metuchen.

The Secretary presented a report in connection with the construction of the Lake Street Bridge at Metuchen, in which report it was advised that the Lehigh Valley Railroad Co., would be willing to share in the cost of such a widening of the present structure. The State Highway Engineer recommended that the State Highway Commission offer to pay one-half the cost of the widening reconstruction of the Lake Street Bridge estimated to cost $35,000.00. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission approved the recommendation of the State Highway Engineer and directed that the Engineering Department negotiate with the Lehigh Valley R. R. Co. looking toward the construction of a new bridge at Lake Street in Metuchen, the State to pay one-half the cost and the Lehigh Valley R. R. Co. to pay the other half of the cost.

Route #10, Sec. #3, Pluckemin-Bedminster.

The State Highway Engineer presented a report on conditions existing on Route #10, Section #3, between Pluckemin and Bedminster as complained of to the State Highway Commission by the Village of Pluckemin and the Township of Bedminster. The complaint was that during storms the sidewalks and properties of private citizens are flooded with water. The report presented from the Construction Division advised that the flooding of the properties can be remedied upon the construction of earth sidewalks or a curb and gutter and the reason for additional water is the fact that the ditches on this section since the reconstruction of the road are not as deep as they were before but that the grade of the road was not materially changed by the construction. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission directed that the recommendation of the State Highway Engineer be forwarded to the complaining authorities on Route #10, Section #3.

Guard Rails- Route #6, Bridgeton.

State Highway Engineer Sloan recommended that authority be given to widen the fill and construct guard-rail on Route #6, West City Line of Bridgeton to the Salem-Cumberland County Line at [illegible], thus eliminating a dangerous condition. The estimated cost is placed at $1,537.50. On motion by Mr. Stewart, seconded by Mr. Jelin, the State Highway Commission approved the recommendation of the State Highway Engineer for the authorization of additional fill and guard rail on Route #6.

Route #16, Grade Crossing Elimination

The State Highway Engineer presented a report in connection with the proposed elimination of grade crossing on Route #16 at South Somerville at the tracks of the Lehigh Valley Railroad Company. He informed the Commission that the estimated cost of the entire structure would be $87,000.00 toward which the Lehigh Valley R. R. Co., is willing to contribute $10,000. On motion by Mr. Stewart, seconded by Mr. Jelin, the State Highway Engineer was directed to make a thorough investigation of the matter of elimination of grade crossing on Route #16, at South Somerville and to present a report for consideration when all the Commissioners are present.

Route #4, Main St., Asbury Park.

The State Highway Engineer presented to the Commission a report in connection with the construction of Main Street in Asbury Park and recommend that the City of Asbury Park be advised that the State Highway Commission will take under maintenance the brick pavement on Main Street, Asbury Park and will pay for a total of 20 feet of new asphalt pavement over the balance of the work; the City of Asbury Park to construct curbs, remove trolley tracks and lay the remainder of the pavement to the curbs. State Highway Engineer Sloan further recommended that the City of Asbury Park be notified that there is no agreement of any kind concerning the paving of this road between the State Highway Commission and the City of Asbury Park. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission unanimously approved of the recommendation of the State Highway Engineer and directed that the Secretary acknowledge the resolution of the Board of Commissioners of Asbury Park under date of June 18th, and inform them that the Commission has made no agreement with the City of Asbury Park concerning the paving of State Highway Route #1 in Asbury Park or the construction of Route #7 to Hurley's Corner,

JUL 31 1923

and further directed that the Secretary notify the Board of Commissioners of Asbury Park that it will take under maintenance the brick pavement now existing on Main Street and will pay for a total of 20 feet of new asphalt pavement over the balance of the section, it being understood that the Borough of Asbury Park will pave to the gutters and move the Trolley tracks.

Detour, Route #10, Section #6

The State Highway Engineer recommended to the Commission the adoption of the following revised detour on account of the construction of Route #10, Section #6, Passaic River to Morris Township Line.

> "Beginning at a point in Mount Kemble Avenue (Route #10) where the same is intersected by the road to New Vernon, known as the Vernon Road, and running thence (1) southeasterly over the Vernon road to New Vernon a distance of approximately 1.7 miles; thence (2) over the Blue Mills Road in a southwesterly direction a distance of approximately 2.5 miles to Logansville; thence (3) still in southwesterly and westerly direction a distance of approximately 1.7 miles through Osborn's Mills and Madisonville to Route #10, at Blazier's Corner."

On motion by Mr. Jolin, seconded by Mr. Stewart, the State Highway Commission adopted the recommendation for revised detour on Route #16, Section #6.

Equipment

The State Highway Engineer presented a request from the Secretary of State for the use of a truck for the purpose of delivering election materials to the various County Clerks similar to the loan made during the past three years. On motion by Mr. Stewart, seconded by Mr. Jolin, the State Highway Commission directed that a truck be loaned to the Secretary of State for use in delivering election materials, that Department to furnish the driver for the same.

Request for Aid

The Secretary presented a communication from Mr. H. W. Riddle of Asbury, New Jersey, concerning the detour between West Portal and Bristol Corner. This matter was the same as taken up by Senator Agans at the morning session and the communication was therefore, ordered received and placed on file.

JUL [illegible] 1923

Kaighn Ave., Extension

On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission approved of plans and specifications for the Kaighn Avenue Extension, Camden County, work to be done under Motor Vehicle account; same having been recommended by the State Highway Engineer.

Long Valley-Hunterdon Co. Line, Morris Co.

On motion by Mr. Stewart, seconded by Mr. Jelin, the State Highway Commission approved plans and specifications for the construction of the Long Valley-Hunterdon County Line Road, Morris County, work to be done from Motor Vehicle and State Aid funds; same having been recommended by the State Highway Engineer.

Parsippany-Littleton Road, Morris Co.

On motion by Mr. Stewart, seconded by Mr. Jelin, the State Highway Commission approved plans and specifications for the Parsippany-Littleton Road in Morris County, work being done from Motor Vehicle Funds.

Camden County Repairs

The State Highway Engineer presented for approval by the Commission contract as entered into by the County of Camden for materials for repair work covering such materials as crushed stone, asphalt, patching material, Amiesite and Calcium Chloride. On motion by Mr. Stewart, seconded by Mr. Jelin, the State Highway Commission approved the contract as awarded by Camden County for repair material on the 1923 schedule.

Landis Ave., Sec. #1, Cumberland Co.

The State Highway Engineer recommended to the Commission final acceptance and final payment on Landis Avenue, Section #1, Cumberland County, work having been done under Motor Vehicle Aid. Commissioner Jelin reported having inspected this work on July 20, 1923 and moved acceptance by the Commission. This was seconded by Mr. Stewart and adopted.

Employments

The State Highway Engineer presented for the consideration of the Commission a list of employments as approved by the State the last meeting of the Commission, as follows:

Aug. 1	Wm. J. Hampton, Jr.	Jr. Inspector	$125. per mo.
July 25	C. C. Hewitt	Title Searcher	120. " "
Aug. 1	L. E. Andrews	Div. Engineer	325. " "
July 23	J. W. Fitzgerald	Jr. Engineer	125. " "
Aug. 1	Wm. H. Helm, Jr.	Jr. Inspector	125. " "
Aug. 1	G. H. Derrick	Const. Inspector	125. " "
Aug. 1	Felix D. Hurwitz	" "	125. " "
July 1	Willard D. Conover	Highway Inspector	155. " "

Transfer

Aug. 1	Ralph C. Capuis	Asst. Civil Engr.	Cent. to North.

Hourly On

July 16	Oliver Farrington	Motor Truck Driver	$ .40 per hr.
" 23	W. J. Gibbs	Mech. was T. D.	.60 " "
" 23	Edward Scott	Motor Truck Driver	.40 " "
" 26	Benj. Hahn	" " "	.45 " "
" 13	Andrew J. Aber	" " "	.40 " "
" 19	Leon Cramer	" " "	.45 " "

Increases

July 16	Chas. Henson	Mechanic	$ .65 to $ .75 per hr.

On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission approved the list of employments as recommended by the State Highway Engineer.

Routes #1 & #13, New Brunswick

State Highway Engineer Sloan reported to the Commission that Routes #1 & #13, connecting link known as French and Albany Streets, New Brunswick, is completed and ready for inspection. On motion by Mr. Stewart, seconded by Mr. Jelin, the State Highway Commission accepted the completed pavement on Route #1 & #13, French and Albany Streets in New Brunswick, subject to inspection by Commissioners Scott and Jelin.

Route #8, Sec. #7A, Somerville

The State Highway Engineer reported to the Commission the completion of Route #8, Section #7A, Union Avenue, Somerville, and recommended that the same be inspected and accepted. On motion by Mr. Stewart, seconded by Mr. Jelin, the State Highway Commission approved the acceptance and final payment of Route #8, Section #7A, Union Avenue in Somerville, subject to inspection by Commissioners Scott and Jelin.

Resignation of C. A. Burr

State Highway Engineer Sloan reported to the Commission that Mr. C. A. Burr, Division Engineer of the Northern Division, had tendered his resignation effective September 1, 1923, in order to accept other employment. He recommended to the Commission that Mr. L. E. Andrews, Survey Engineer be promoted to the position of Division Engineer of the Northern Division, effective August 1, 1923, at the entrance rate of $325.00 per month. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission approved the recommendation of the State Highway Engineer and authorized the appointment of Mr. Leon E. Andrews as Division Construction Engineer effective August 1, 1923, at the entrance rate of $325.00 per month, subject to Civil Service Regulations.

Osborne's Bridge-Laurelton

On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission approved plans and specifications for Osborne's Bridge-Laurelton road in Brick Township, Ocean County Township Aid, same having been recommended by the State Highway Engineer.

Tabernacle Road, Cape May County.

On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission accepted the completed work on the Tabernacle Road in Lower Township, Cape May County Township Aid; same having been recommended by the State Highway Engineer.

Hope-Chapel Road, Ocean County.

On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission accepted the completed work on the Hope Chapel Road, Lakewood Township, Ocean County Township Aid; same having been recommended by the State Highway Engineer.

Cedar Grove Road, Mercer County.

On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission approved plans and specifications for Cedar Grove Road, Princeton Township, Mercer County Township Aid; same having been approved by the State Highway Engineer.

Bulls Ferry Road, Hudson County.

On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission approved of plans and specifications for the Bulls Ferry Road, North Bergen Township, Hudson County, Township Aid; same having been recommended by the State Highway Engineer.

JUL 31 1923

Detour, Little Falls.

The State Highway Engineer recommended to the Commission the adoption of the following detour during the construction of Route #12, grade crossing elimination at Little Falls;

> Beginning at the intersection of the Totowa Road and Union Avenue, Totowa, and running thence easterly over Route #12 to the intersection of the Totowa Road and the Little Falls Turnpike, in east Paterson, and from thence southerly and westerly over the Little Falls Turnpike to its intersection with Route #12, at Beatty's Mills, in Little Falls.

On motion by Mr. Jolin, seconded by Mr. Stewart, the State Highway Commission unanimously adopted the recommendation of the State Highway Engineer.

Route #16, Sections #5 & #5A, Detour.

State Highway Engineer Sloan recommended the approval of the following official detour during the construction of Route #16, Sections #5 & #5A, between Somerville and Woods Tavern.

> Beginning at a point in the Borough of Somerville where the Somerville-Pleasant View Road (Rt. 16) intersects Main St. (Rt. 8) and runs thence, Main St. (Rt. 8) in an easterly direction a distance of approximately 0.15 miles to Gaston Ave. (Rt. 8); thence northerly over Gaston Ave. a distance of approximately 0.45 miles to Union Ave. (Rt. 8) thence easterly over Union Ave. a distance of approximately 1.3 miles to the Manville-Millstone Road a distance of approximately 4.8 miles to the Amwell road; thence westerly over the Amwell Road a distance of approximately 3.1 miles to Route #16.

On motion by Mr. Jolin, seconded by Mr. Stewart, the State Highway Commission approved the adoption of the detour as recommended.

Warren County ~~Communication~~ Request.

The State Highway Engineer presented to the Commission a communication from the Board of Freeholders of Warren County concerning the condition of the Hampton-Hazlett's Corner-Washington Road and Asbury-Hazlett's Corner Road requesting that since these roads were used as detours during the construction of Route #6 & #12 they be repaired in as good condition as when taken over for detours. The Board of Freeholders advised that they are prepared to contribute 50% of the cost of permanently improving this road providing the State will provide an equal amount, the total estimated cost being $220,000.00. State Highway Engineer Sloan recommended that the Board of Freeholders of Warren County be advised that the Commission has not funds from which to contribute 50% of the cost at this time and it would request that the Board of Freeholders consider including this road in the 7% system in order to obtain Federal Aid, or that they consider doing this construction under Chapter 10 Laws of 1919. On motion by Mr. Jelin, seconded by Mr. Stewart, the recommendation of the State Highway Engineer was ordered approved and the Secretary was directed to so notify the Warren County Officials.

Width of Township Roads ✓

The Highway Engineer presented a report in connection with the pavement required by the State Highway Commission on Township roads, and recommended that the resolution of the former State Highway Commission placing the main width at sixteen feet be rescinded and that each road be considered as to its width upon the usefulness in which it will be placed. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission ordered this matter deferred until the next meeting of the Commission.

Township Aid- General ✓

The State Highway Engineer requested information from the Commission as to whether it would be possible to approve any of the allotments of Township Aid as recommended on the forms submitted the week previous. Commissioner Jelin moved that the State Highway Commission approve the allotment of Township Aid funds to those counties wherein the total request at this time was $25,000.00 or less, and that each apportionment to these counties be subject to approval by the State Highway Engineer, and further that there be prepared a supplemental list showing those counties where the total requests were in excess of $25,000.00. This was seconded by Mr. Stewart and adopted.

On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission adjourned at 6.50 P.M., to meet in regular session on Tuesday, August 7, at 10.30 A. M.

Respectfully submitted,

A. LEE GROVER,

Secretary.

MINUTES OF MEETING - August 7, 1923

A regular meeting of the State Highway Commission was held at the offices of the Commission, Broad Street Bank Building, Trenton, on Tuesday, August 7, 1923. The meeting was called to order at 11.00 A.M., by Chairman Scott.

Present: Gen. H. L. Scott, Chairman, Messrs. Percy H.
Stewart, Walter Kidde and Abraham Jelin.

President Harding Memorial ✓

General Scott made the following statement to the Commission at the opening of themeeting:

"The Country has met with a very severe loss in the death of our President, and it seems fitting that the State Highway Commission should take notice of this fact in a proper manner."

Commissioner Kidde therefore, moved that in order to express the sorrow felt by the State Highway Commission and its forces, that the office of the Commission be closed on Friday, August 10, 1923, the date of President Harding's funeral; and that Chairman Scott prepare a short memorial address to be broadcasted to all contracts in operation and to outside forces of the State Highway Department, to be read during a ten minute cessation of work at the hour of the funeral ceremonies. This was seconded by Mr. Jelin and adopted.

Office Space ✓

The State Highway Engineer reported to the Commission that he was very anxious to obtain sufficient office space in Trenton to bring the Bridge Department from Newark at the earliest possible date. The Secretary informed the Commission that he had conferred with the officials of the Broad Street Bank Building concerning a short lease on the new wing, but that they were very reluctant to grant any leases in the new wing shorter than five years. They were, however, willing to provide any additional space needed in the Highway Department in the present building and would endeavor to put as many Departments on one floor as it would be possible. Commissioner Jelin moved that the State Highway Engineer be instructed to arrange for proper space for Departments of the State Highway Commission in the Broad Street Bank Building; this to include sufficient space for the removal of the Bridge Department from Newark to Trenton; said rental space to be secured on a lease not to extend beyond May 1, 1924. This was seconded by Mr. Kidde and adopted. Commissioner Kidde suggested that no arrangements for the removal of the Bridge Department be made until it was definitely established that space could be acquired for the office in Trenton.

Labor Union Complaint ✓

The Secretary presented a report from Superintendent of Maintenance Muir, in reference to the statement made by the International Union of Steam and Operating Engineers, in which report Mr. Muir advised that the compensation as now being paid is in accordance with standardized rates as fixed by the Civil Service Commission, and further that the Hackensack Bridge is not a steam operated bridge, but electric. On motion by Mr. Stewart, seconded by Mr. Kidde, the State Highway Commission directed that the Secretary forward a communication to the International Union of Steam and Operating Engineers informing them of the report of Mr. Muir and of the salary schedules as in effect for these men.

Materials, Shortage - R.R. Cars ✓

The Secretary presented a telegram received from the U. S. Bureau of Public Roads advising of the fact that there is imminent a shortage in railroad cars beginning September 15, 1923, and urging the State Highway Department to have its contractors ship as much material as possible prior to that date. Commissioner Kidde moved that the telegram be received and that the State Highway Engineer be directed to forward a notice to each contractor working for the State informing them of the serious situation to be encountered by a car shortage, and asking that they make every effort to stock-pile their materials prior to September 15, 1923.

Trenton-New Brunswick Turnpike ✓

The Secretary presented an opinion from the Attorney General in answer to a request made for the use of Motor Vehicle funds on the reconstruction of the Trenton-New Brunswick Turnpike, in which opinion the Attorney General ruled that State Aid could not be granted on anything but improved roads, and inasmuch as it was contemplated to grade the work there were no funds available but the Appropriathe Committee could appropriate sufficient moneys from the Motor Vehicle account for that purpose at the next session of the Legislature. On motion by Mr. Stewart, seconded by Mr. Jelin, the opinion of the Attorney General was ordered received and spread in full upon the minutes.

Trenton, N.J., July 31, 1923.

A. Lee Grover, Secretary,
State Highway Commission,
Trenton, New Jersey.

Dear Mr. Grover:

I am answering your letter, in which the Commission asks to be advised as to whether the Motor Vehicle Funds at the disposal of the State Highway Commission may be used for the purpose of completing the grading and construction on the Trenton-New Brunswick Turnpike.

Chapter 395 of the Laws of 1912 in Sections 7,8,9,26, and 27, as amended respectively by the Supplement of 1915, page 442 amended by Laws of 1913, page 645, and Laws of 1917, page 76, all refer to the extension and construction of State Highways, and the improvement of roads and maintenance and repair of bridges and culverts. I am unable to advise that Section 17, of Chapter 15 of the Laws of 1917 authorizes the remainder of the fund to be expended for other than improved roads.

Very truly yours,

Thomas F. McCran,
Attorney-General.

Right of Way, Route #5, Sec. #13.

Commissioner Jelin presented a report to the Commission as to the inspection trip made by him to properties on Route #5, Section #13, Budd Lake-Netcong Section, which had been referred to him for investigation. He presented the following report:

New Jersey State Highway Commission,
Trenton, N.J.

Gentlemen:

Yesterday, August 6th, I visited Route #5, Section #13, Netcong-Budd Lake, and carefully examined the several properties on which we had agreements and the Commission decided should be investigated further before giving its approval to the same.

AUG 7 1923

The first property is that of the Beckman Springs Company, on which we had an agreement to convey the necessary land to the State of New Jersey for the sum of $1,750.00. From this property we take .924 acres. I do not consider that this property should be valued on the basis of building lots, particularly as the portion we take is so far from the present highway that the rear of only two lots facing on the Netcong-Budd Lake road merely touch it.

The other claim, that of a valuable factory site adjacent to the D. L. & W. R. R. has been considerably reduced in size, is without value, inasmuch as it is one hundred and fifty-two feet from the side line of the proposed new highway to the right of way of the railroad on the eastern end of the property and one hundred and twenty-six feet from the railroad right of way at the road known as Love Land, and, as this existing road cuts into the railroad right of way at an acute angle just beyond this point, our new and improved highway rather increases than decreases the value of the tract as a factory site.

The point has been raised that the fill across this property will greatly decrease its value. In reality, there is only about one hundred feet of heavy fill across the existing gully in the property. Beginning at the easterly end, two hundred and fifty feet of the property is practically on the grade with other finished road and at the westerly end the lot is on the grade with the new highway.

In view of these facts, I consider that an allowance of $785.00 would be very liberal compensation indeed, for the property taken, as the ground at present is simply meadow or pasture land and in my judgment, the benefits conferred upon the property by the construction of the new road at least equal the value of the land taken.

Nevertheless, as it is the practice of the State to pay for the area of the ground taken for the highway, I would recommend that $785.00 be the maximum allowance tendered to the Beckman Springs Company for the property. If this tender is refused, I would recommend that condemnation proceedings be undertaken at once. To my mind, the idea of valuing this meadow land on a lot basis is absurd and cannot be justified since there is nothing visible on the property or its surroundings at the present time.

The second property referred to me for report by you is that of Frank Dominick. This is a low tract adjacent to the present Budd Lake public road and is used as a truck patch. As the grade of our new road is considerably lower than that of the Budd Lake road, Mr. Dominick will have a lot between the old and new roads which will be much more valuable and at a better grade than his property is at present.

The lot referred to is triangular in shape, one hundred and two feet deep and one hundred and thirty-eight feet along the old road and one hundred and seventy-seven and five tenths feet along the new highway. In my opinion Mr. Dominick would be very amply recompensed for the land we take from him if he were to receive the sum of $500.00.

The claim is made that we destroy three lots for which he paid $750.00, the lots remaining after the road is completed, one on the South side above referred to and a smaller lot on the North side, are, in my judgment worth at least $400.00.

In this case, I would therefore recommend that a tender of $500.00 be made to Mr. Frank Dominick and if the same is refused by him, condemnation proceedings be undertaken at once for the acquisition of the property required.

Very truly yours,

Abraham Jelin,

State Highway Commissioner.

Commissioner Kidde stated that he felt that it should be the rule of the Department that where property was being acquired along the line of a new highway that there are benefits which will accrue to the properties to an extent almost sufficient to pay for the value of the property taken, and that where land is acreage ground it shall be so considered, even though the building of a road through the property will make it suitable for building lots. Commissioner Kidde moved that the recommendations of Commissioner Jelin as contained in his report be adopted. This was seconded by Mr. Stewart, and approved.

2249

AUG 7 1923

Right of Way - General ✓

Commissioner Kidde requested that Mr. Meeker of the Right of Way Department appear before the Commission relative to right of way matters. Mr. Meeker appeared before the Commission and was questioned concerning the work of the Right of Way Division. He informed the Commission that due to the press of work in getting contracts under way, it was almost impossible with the forces at hand to secure all the properties needed on each job in time to permit the contractors to proceed with their work. Commissioner Kidde suggested that Mr. Meeker should spend practically all of his time in the field procuring property necessary and making appraisals upon the same, and that he should also have sufficient force in order to expedite the Right of Way Department activities and he moved that the State Highway Engineer be authorized to furnish for Mr. Meeker, Right of Way Engineer, such assistants as he might require, either temporary or permanent in order that the Right of Way Division may function smoothly, and further that hereafter that all property reports to the Commission be signed personally by Mr. Meeker as head of the Right of Way Department. This was seconded by Mr. Stewart and adopted.

Request for Aid, Town of Harrison. ✓

The Secretary presented an opinion from the Attorney General advising that State Aid could not be granted to the Town of Harrison in view of the fact that the project was completed and the plans and specifications were not approved by the Commission as required by the Statutes. On motion by Mr. Jelin, seconded by Mr. Stewart, the opinion was ordered received and spread in full upon the minutes, and a copy of the same was directed to be forwarded to the County of Hudson, and the Town of Harrison.

Trenton, N. J., July 31, 1923.

A. Lee Grover, Secretary,
State Highway Commission,
Trenton, N. J.

Dear Mr. Grover:-

I am referring to your letter of sometime ago, requesting to be advised whether the Town of Harrison can be granted State Aid in the matter of the request to the Commission therefore in view of the fact that the project has been completed and the plans and specifications were not approved by the Commission.

I am of the opinion that this may not be done in view of the statutory requirement that the plans and specifications shall be approved by the Commission.

Very truly yours,

Thomas F. McCran,
Attorney-General.

Consulting Engineer Goodrich

Advisory Board

The Secretary presented an opinion from the Attorney General concerning the employment of Mr. E. P. Goodrich, Special Consulting Engineer, in which opinion the Attorney General ruled that it is legal for the Commission to employ Mr. Goodrich. On motion by Mr. Kidde, seconded by Mr. Stewart, the opinion of the Attorney General was ordered received and spread in full upon the minutes.

Trenton, N.J., July 27, 1923.

A. Lee Grover, Secretary,
State Highway Commission,
Trenton, N.J.

Dear Mr. Grover:

Further supplementing my letter to you of July 2nd, in reply to your letter of May 16th, I have been advised by you, representing the State Highway Commission, that the Engineer is to be specially employed as a Consulting Engineer to advise as to the method of regulation of the traffic at the mouth of the Hudson River Vehicular Tunnel at Jersey City and its distribution through Jersey City and Newark and points, north, west and south, was an employment of such Consulting Engineer by the State Highway Commission as one of the special assistants authorized by statute to advise the Commission. You have further advised me that while he is to be of service to the Advisory Board composed of engineers of the municipalities interested and others. Mr. Goodrich as such Engineer is in the employ of the State Highway Commission to advise it and not solely to act as adviser of an authorized Advisory Committee.

In view of the facts as stated to me, I have come to the conclusion that it is legal for the Commission to employ Mr. Goodrich as a Consulting Engineer, as suggested in your letter of May 16th, to wit; for forty days at the rate of remuneration considered advisable by your Commission.

Very truly yours,

Thos. F. McCran,
Attorney General.

On motion by Mr. Kidde, seconded by Mr. Stewart, the amount as due to Mr. Goodrich was ordered paid in full inasmuch as the work of Mr. Goodrich has been completed.

Trolley Track Paving

The Secretary presented an opinion from the Attorney General concerning the obligation of trolley companies as to the relocation and paving of tracks in the State of New Jersey. On motion by Mr. Kidde, seconded by Mr. Stewart, the opinion of the Attorney General was ordered received and spread in full upon the minutes.

STATE OF NEW JERSEY
Office of the Attorney General

Trenton, N.J., July 26,1923.

Hon. W. G. Sloan,
State Highway Engineer,
Trenton, New Jersey.

Dear Sir:-

Further answering your letter of sometime ago, in which you state that you would like to be advised as to whether or not there is any obligation on the part of the traction company to stand the cost of paving its tracks, and maintain the same, with any pavement other than the existing blocks where the tracks are now located in the center of the highway, and whether the Traction company may be required to relocate and reconstruct its tracks that now lie on the side of the highway to a new location in the center of the highway, and if such company would be required to pave the track area with any material whatsoever under these circumstances.

In my opinion, where a franchise permits a street railway company to place its tracks along the side of the street, such company cannot thereafter be compelled to relocate such tracks in the center of the street. All that the company may be compelled to do is to fulfill the terms of the franchise as originally required of them therein.

AUG 7 1923

Where the franchise provides no obligation on the part of the company to pave between or outside its tracks, no obligation may thereafter be imposed. Where such obligation provides for the use of a certain form of pavement and no other, the company cannot be compelled to use a different kind pavement, and if the authorities controlling the road use a different material at their own expense the company cannot be compelled to pay the difference between the cost of laying the pavement provided for in their franchise and of that laid down by the authorities.

In Dean v. Paterson, reported in 67 N.J.L. 199, etc., the Supreme Court held that under the provisions of an ordinance requiring a street railway company to keep and maintain the portion of a street inside the rails and for two feet outside of them in good and sufficient repair, the company is not bound to repave within those limits with a new or different material selected by the city nor is it liable to the expense of such repaving when laid down by the city.

In Fielders v. North Jersey Railroad Company, 68 N.J.L., pages 343, etc., the Court of Errors and Appeals held with respect of an ordinance which required all Street Railway Companies to pave, repave and keep in repair, under the direction and to the satisfaction of the proper municipal authorities, the space between the rails of their tracks and between the tracks, and the space for one foot outside of each outer track, at the same time providing that if any company failed to pave or repave or to keep the pavement in repair, the city authorities may cause the work to be done, and the ordinance required the company in such case, on demand, to pay the cost thereof. The Court held in this case, as a matter of construction, that the ordinance did not confer a right of action upon any member of the traveling public who might sustain damage through the non-repair of the street. The Court in that case discussed the question as to whether the ordinance was an exertion of the power of taxation or was an exercise of the police power conferred upon the municipality by the Legislature, and said that the liability of the company to maintain the pavement as such if it existed, must either be raised upon some valid statute or ordinance imposing such a duty or must arise out of the obligations of a contract, and the Court said that where such a burden is lawfully imposed by a municipality upon a Street Railway Company as a condition of the grant of its franchise, the acceptance of such a condition by the company constitutes a contract between the company and the municipality. The Court cited the case of Appleby v. State, 16 Vr. 135, where the Court said that a duty, the breach of which is an actionable wrong, must either arise from a contract or be imposed by positive law independent of contract. In the first case, the party to the contract only can sue; in the other case, any person injured may sue, if he be one of the class of persons for whose duty the benefit is imposed. In the Fielders case, the Court reversed the judgment obtained by Fielders on the ground that the ordinance was not lawful as applied to that particular company for the reason that it was an exercise of the power of taxation rather than of the police power and was not subject to a contractual obligation on the part of the company. In that case, the Court held that the enforcement of the franchise was an exercise of the taxing power and not of the police power, in that it was not merely regulatory, and it seems from reading the whole opinion that it was an attempt to impose upon every traction company the duty to pave a considerable portion of every street over which it passed and was not a contractual obligation which had been agreed to by the railroad company in the acceptance of a franchise.

The rule as laid down in the courts of this State is that the distinction between the power to license as a police regulation and the same power as a revenue measure is that if the power given is a police power it must be exercised as a means of regulation only and cannot be used as a source of revenue. North Hudson Street Railway Company v. Hoboken, 41 N.J.L., pages 71, etc.

In the case of Freeholders v. Jersey City, 25 N.J.L., pages 170, etc., the Court of Errors and Appeals held that a statute or ordinance which required a Street Railway Company to keep and maintain in good repair the paving or other surface material of so much of the several public highways through which the road is constructed as is occupied by or adjacent to its tracks does not impose upon it any obligation to contribute to the cost of repaving any of such highways, and this is so even if the cost of maintenance is greater than the cost of re-paving would be. In that case, the freeholders of Hudson County brought an action at law to recover from the defendant a portion of the cost incurred by the freeholders in the laying of a granite block pavement upon a portion of the Paterson Plank Road, a public highway of the county through which the company operated an electric railway. This company was taken over by a corporation, subsequently organized, and the court held that in spite of the rule laid down in some other states, that the duty of paying a proportionate share of the cost of repaving when the public interest required that a street should be improved that such a rule was not in force in this State under the case of Dean v. Paterson, cited above. Nothing was said in that case as to the right of the freeholders to bring an action to recover the cost of work originally contracted for under a franchise given to a Street Railway Company, and Judge White, in a concurring opinion, said that though it had been held in this State that the only remedy is by mandamus that the case of Rutherford v. Hudson River Traction Company, 44 Vr. 227, holding that mandamus was a remedy because of the public nature of duty assumed was no reason why the contractual obligation might not also be in force. It seemed, he said, that the assumption of the public duty by the trolley company does not relieve the municipality of the same public duty, that the officers of the municipality might be indicted for its non-performance, and that there is no difference because someone else has contracted to perform the duty, and that application for mandamus had been made and has long been pending (during appeal) to compel the performance of that contract. He said that the proper convenience of the public is superior to such excuses however well founded; that the public is entitled to use its highway today and look to its necessity to have it in fit condition for such immediate use.

I conclude, however, that an agreement to pave under a franchise does not include the expense of repaving, nor does the acceptance of a franchise requiring a company to maintain the street in good condition require it to repave or to pay the difference of cost of replacement where another kind of pavement is laid down by a municipality or by the State Highway Department, which, under the statute, may be subrogated to the rights of the municipality in this respect. I am further of the opinion that a traction company may not be required to relocate and reconstruct its tracks in another part of the highway where the original franchise, which it accepted and which constituted the contractual obligation, specifically required the tracks to be laid originally in a certain location.

It is unquestionably true that under the decisions of this State mandamus is the remedy whereby a trolley company may be compelled to perform its duty to the public under the terms of the franchise accepted by it, but I am of the opinion, nevertheless, that where a public duty is imposed upon the State Highway Commission or a municipality to keep the streets in repair for traffic that upon proper notice to the company and an opportunity given to fulfill its contractual obligation, the municipality may recover the cost from the trolley company of such paving or repair as is lawfully imposed upon the company by the terms of the franchise under which it is operating.

Very truly yours,

Thos. F. McCran

Attorney-General.

Route #13, Lawrence Township

The State Highway Engineer advised that in connection with the foregoing, a delegation had visited him from the Township of Lawrence at which meeting they advised that they had tentatively proposed to the trolley company that they would be willing to pay one half of the cost of the paving between the tracks if the trolley company would pay

AUG 7 1923

for the balance. This proposal was not accepted by the Traction Company. He stated that in view of the opinion of the Attorney General's Department that he would recommend that the State Highway Commission authorize an agreement with the Trenton & Mercer County Traction Company, for the removing of the tracks from the side to the center of the roadway, and that the State enter into an agreement with the Township of Lawrence whereby Route #13 through Lawrenceville would be paved between the tracks and there would be no additional width provided to the curbs, and curbs placed, provided the Township of Lawrence will pay for such work beyond 20 feet of pavement to be placed by the State and one-half the cost of the paving of the tracks to be borne by the State. The Commission held over action on this matter until it had a chance to digest the opinion of the Attorney General.

Proposed
Legislation

The Secretary presented for General Scott the request that the Commission consider the desirability of legislation to permit the counties to remove the bond issuance for reimbursement work from their bonding limit; this in view of the fact that where counties have financed reimbursement work they have practically exhausted their bonding limits thereby restricting the work that the county may perform on its own roads. The Secretary cited the case of Somerset County where the County was desirous of doing additional work, but had issued bonds to the extent of its limit. General Scott suggested that this be placed in the list of matters to be considered in connection with proposed legislation. Commissioner Kidde made the statement that he felt that since all the counties could not take advantage of the Reimbursement Act it would be unfair to permit additional improvements in counties where the Reimbursement work was already completed.

Rt. 10, Sec. 2, Dolia Avenue,
Bridge & Trolley Crossing

The Secretary presented a communication from Mr. [illegible] J. Mansfield, low bidder on Dolia Avenue Bridge Crossing on Route #10, requesting award of contract to him. Commissioner Kidde stated that the nature of the work was such that it required very careful and competent contractor. State Highway Engineer Sloan reported to the

Commission that he felt that the character of the work as performed for the State by Mr. R. J. Mansfield, was not such to warrant his recommendation for awarding the contract on Route #10, Section #2 bridges to Mr. Mansfield, and he would therefore recommend to the Commission that the contract be given to the next low bidder, Mr. J. J. McGarry. The Secretary read an opinion given by Justice Parker of Bergen County in a similar case where award was made to the second low bidder. The Comission reserved decision on this matter until after luncheon. On motion duly seconded, the Commission recessed for luncheon at 12.45 P.M., to meet in regular session at 2.00 P.M.

The Commission reconvened at 2.00 P.M., as agreed, with the same members present as at the morning session.

Cape May - Lewes Ferry ✓

Chairman Scott called attention of the Commission to the propaganda being broadcasted by the newspapers of South Jersey relative to the operating of the Cape May-Lewes Ferry, and inquired of the Commission whether there was any intention of proceeding with the ferry and dock construction. Commissioner Stewart stated that he felt that sufficient answer had already been given to the local authorities in Cape May County to the effect that until there is assurance that the State of Delaware will provide 50% of the cost of the entire project, the State of New Jersey cannot proceed any further. Chairman Scott stated that he felt that if anything was done at all it should be done through private interests and not having the State responsible for the operation of the boats.

U. S. Bureau of Public Roads ✓

The Secretary read a telegram from the U. S. Bureau of Public Roads, advising that the office at Troy would be closed on August 10th, and that the Washington offices would be closed from Tuesday noon till Saturday morning.

Absecon Boulevard, Atlantic Co.

Commissioner Kidde called attention of the Commission to the fact that the County of Atlantic was ready to receive bids for the construction of the Absecon Boulevard with an asphalt block pavement, and he moved that Assistant State Highway Engineer Reed be requested to prepare a comparison between the prices received for the Lawrenceville-Princeton Road and those received on the Absecon Boulevard with relation to the difference in cost between sheet asphalt and asphalt rock. This was seconded by Mr. Jelin and adopted.

Bridge & Trolley Crossing, Delia Ave., Route #10.

The Commission next took up for further consideration the matter of the award of contract for Delia Avenue Bridge and trolley crossing on Route #10, Section #2, in which case the State Highway Engineer stated that he would recommend award of contract to the second low bidder. On motion by Mr. Stewart, seconded by Mr. Kidde, the State Highway Commission adopted the following resolution:

WHEREAS, due consideration has been given to the matter of award of contract on Route #10, Section #2, Delia Avenue Bridge and Trolley Crossing.

THEREFORE, BE IT RESOLVED, that the State Highway Commission does hereby award the contract for the construction of the Delia Avenue Bridge and Trolley Crossing on Route #10, Section #2, to J. J. McGarry, on his the lowest responsible bid amounting to $125,000.00, and

BE IT FURTHER RESOLVED, that the Chairman is authorized to sign the necessary contract on behalf of the State Highway Commission.

Advisory Board.

The State Highway Engineer reported to the Commission that the Advisory Board had been at work preparing a study of the Vehicular Tunnel Traffic Routes, and was prepared to present its report to the State Highway Commission. Chairman Scott inquired whether in view of the fact that the Governors of New York and New Jersey had expressed opinions favoring additional tunnels, whether the conclusions reached should be supplemented in any way. State Highway

Engineer Sloan advised that the report as ready to be presented was complete as far as the action of the State Highway Commission had delegated the Advisory Board to perform. State Highway Engineer Sloan further informed the Commission that arrangements had been made for a dinner meeting between the Advisory Board and the State Highway Commission at the Robert Treat Hotel in Newark, on Wednesday, August 9th, at 6.30 P.M., where the final presentation of this report would be made to the State Highway Commission. Commissioner Kidde then moved that the Commission delegate one of its members to officially accept the report from the Advisory Board and to ask that the State Highway Commission be given the opportunity to study the report as submitted and invite the Advisory Board members to be its guests within two or three weeks in order that the entire Commission might have the opportunity to discuss the material contained in the report with a better understanding. This was seconded by Mr. Jelin and adopted. Chairman Scott delegated Commissioner Kidde to act as the representative of the State Highway Commission at the dinner meeting with the Advisory Board members to be held at Newark, at the Robert Treat Hotel, on August 9th, at 6.30 P.M.

Burlington County Inspection Tour

The Secretary presented a communication from the Burlington County Board of Freeholders outlining the itinerary which it was proposed to cover with the State Highway Commission on Thursday, August 10th. On motion duly seconded, the communication was ordered received and placed on file.

Prospect Avenue, Essex County

The Secretary presented a communication from the County of Essex Board of Freeholders requesting consent to survey Prospect Ave., in West Orange and Verona. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission approved the consent to survey Prospect Avenue in West Orange and Verona and authorized the Chairman to approve the same on behalf of the Commission.

Freehold-Clarksburg Road, Monmouth Co.

The Secretary presented a communication from the Board of Freeholders of Monmouth County, requesting consent to survey the Freehold-Clarksburg Road #24, Section 2. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission approved the request of the Board of Freeholders of Monmouth County for consent to survey the Freehold-Clarksburg Road #24, Section 2, and authorized the Chairman to approve the same on behalf of the Commission.

Rejection of Plans-Red Bank-Oceanport Road, Monmouth County

The Secretary presented a communication from the Monmouth County Board of Freeholders, requesting that the State Highway Commission grant aid for the Red Bank-Oceanport Road, or reject plans and specifications for the same, in order that the county might proceed with the construction from its own funds. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission ordered the rejection of plans and specifications for the Red Bank-Oceanport Road in Monmouth County, due to lack of funds, in order that the county might proceed with the construction from its own funds.

Route 9, Section 7-A, Extension of Time

The Secretary presented a communication from the Somerset County Board of Freeholders advising of an extension of time having been granted to the New Jersey Construction Company, contractors on Route 9, Section 7-A. On motion duly seconded, the communication was ordered referred to the State Highway Engineer for investigation and report.

Request for Aid-Middlesex County

The Secretary presented a communication from the Middlesex County Board of Freeholders requesting the Commission to grant State Aid to the extent of $45,000.00 for the Old Bridge-Matawan Road in Middlesex County, stating that this money had been assured them by the former State Highway Commission. On motion by Mr. Jelin, seconded by Mr. Stewart, the communication was ordered referred to the State Highway Engineer for report with recommendations at the next meeting of the Commission.

Laurelton - Allen Osborn Bridge Road, Brick Township, Ocean County.

The Secretary presented a telegram from the Township Committee of Brick Township, Ocean County, requesting permission to proceed under Force Account Agreement with the construction of the Laurelton-Allen Osborn Bridge Road, due to the fact that five contractors had been asked for bids, but none were received. State Highway Engineer Sloan recommended that authority be given for Brick Township to proceed with this conctruction under Force Account Aggrement. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission approved the recommendation of the State Highway Engineer.

Route #5, Sec. #6, Speedwell Ave.

The Secretary presented a communication from Mr. Davis S. Solny of Morristown, N.J., requesting a hearing for the purpose of discussing the conditions on Route #5, Speedwell Ave., Morristown. On motion by Mr. Jelin, duly seconded, a hearing was granted for the next meeting of the State Highway Commission.

The Schedule of Business was next taken up for consideration item by item as follows:

Route #13, Section No. 6.

State Highway Engineer Sloan presented the following bids received for the construction of Route #13, Section #6:

Utility Const. Co.	97.75%
N. J. Const. Co.	102.5
Ross & Whelan, Inc.	104.8
Public Service Prod. Co.	105.75
Union Paving Co.	106.5
James J. Barrett	108.75
Standard Bitulithic Co.	109.5
S. S. Thompson & Co.	119.

and recommended award to the low bidder, the Utility Construction Company at 97.75% of the Engineer's estimated units of cost, amount-to $495,473.83; and he further reported that approval had been given to the project by the Federal Government. On motion by Mr. Stewart, seconded by Mr. Kidde, the State Highway Commission unanimously adopted the following resolution:

RESOLVED, that the contract for the construction of Route #13, Section #6, Lawrenceville-Princeton Section, be and the same is hereby awarded to the Utility Const. Co. of New Brunswick, N.J., at their's the lowest bid of 97.75% of the Engineer's estimated units of cost or a contract amount of $495,473.83, and

BE IT FURTHER RESOLVED, that the Chairman is authorized to sign the necessary contracts after approval by the State Highway Engineer.

State Highway Engineer Sloan asked that in connection with this award of contract, that some disposition be made of the situation through the Township of Lawrence. Commissioner Kidde moved that the State Highway Engineer be instructed to prepare agreements to be entered into with the Trenton & Mercer County Traction Company looking toward their cooperation in the moving of the tracks and their agreement to reimburse the State for the cost of the new materials which they desire in the new location with the understanding that the State Highway Commission will not, if view of the opinion of the Attorney General, make any effort to collect further demands from them; all of this subject to the Township of Lawrence being agreeable to sharing in one-half of the cost of paving between the trolley tracks. This was seconded by Mr. Jelin and adopted.

Commissioner Kidde moved that the State Highway Engineer communicate with the Township Committee of Lawrence Township on the basis that the State Highway Commission will finance the removal of the tracks to the center of the roadway provided the Township of Lawrence will agree to pay one-half of the cost of paving the trolley track area, and further provided that the Township of Lawrence will pay for the entire cost of paving and the placing of curbs and gutters beyond a total of 22 feet to be paved by the State aside from the trolley track area. This was seconded by Mr. Jelin and adopted.

Route #5, Section #8A ✓
Great Meadows Crossing.

State Highway Engineer Sloan reported to the Commission that bids had been received as follows on the construction of bridge over the tracks of the Lehigh & Hudson R. R. at Great Meadows,

Salmon Bros.	87.2%
Krellwitz Cont. Co.	93.2
Frederick J. Parker	93.8
Edward P. Lupfer Corp.	98.5
S. S. Thompson & Co. Inc.	103.

and would recommend award of contract to Salmon Brothers, of Netcong, N. J., at their's the lowest bid of 87.2% of the Engineer's estimated units of cost. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission adopted the following resolution.

> RESOLVED, that the contract for the construction of bridge over the Lehigh & Hudson River Railway, on Route #5, Section #8, be and the same is hereby awarded to Salmon Brothers, of Netcong, N. J., at their's the lowest bid of 87.2% of the Engineer's estimated units of cost amounting to $131,009.72, and
>
> BE IT FURTHER RESOLVED, that the Chairman is authorized to sign the necessary papers after approval by the State Highway Engineer.

Bids Received Rt. #14, Sec. #8.

The State Highway Engineer presented bids received on August 6th for the construction of Route #14, Section #8, Swainton to Ocean View, Cape May County,

Public Service Production Co.	103.7%
Sutton & Corson	106.
Wm. Eisenberg	107.8
N. J. Construction Co.	109.5
S. S. Thompson & Co. Inc.	109.5
Acchione & Canuso	114.

and he recommended the award to the low bidder, the Public Service Production Company of Newark, N. J., at 103.7% of the Engineer's estimated units of cost amounting to $215,021.69. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission adopted the following resolution:

> RESOLVED, that the contract for the construction of Route #14, Section #8, Swainton to Ocean View, Cape May County, be and the same is hereby awarded to the Public Service Production Company of Newark, N. J., at their's the lowest bid of 103.7% of the Engineer's estimated units of cost, amounting to $215,021.69, and

BE IT FURTHER RESOLVED, that the Chairman is authorized to sign the necessary papers after approval by the State Highway Engineer.

Bids Received on Rt. #8, Sec. #4.

State Highway Engineer Sloan reported that the following bids had been received on August 6th for the construction of Route #8, Section #4, Smith Mills-Charlottesburg, and recommended award of contract to the low bidder, Weldon Contracting Co., of Westfield, New Jersey, at their's the lowest bid of 102.8% of the Engineer's estimated units of cost and amounting to $349,597.16.

Weldon Contracting Co.	102.8%
N. J. Construction Co.	103.5
Richards & Gaston, Inc.	107.
Graham VanKeuren	110.
Curtin Brothers	129.75

On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission adopted the following resolution:

RESOLVED, that the contract for the construction of Route #8, Section #4, Smith Mills-Charlottesburg, be and the same is hereby awarded to Weldon Contracting Company, of Westfield, N.J., at their's the lowest bid of 102.8% of the Engineer's estimated units of cost, amounting to $349,597.16, and

BE IT FURTHER RESOLVED, that the Chairman is authorized to sign the necessary papers after approval by the State Highway Engineer.

Right of Way, Rt. 10, Sec. 1C.

The State Highway Engineer recommended approval of the purchase of Parcel #7 on Route #10, Section 1C, from Robert Hartwig, required for Right of Way, for the consideration of $1.00. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission approved the recommendation of the State Highway Engineer and authorized the purchase of Parcel #7, on Route #10, Section #1C, for the consideration of $1.00.

Right of Way, Route #5, Sec. 13.

The State Highway Engineer recommended the purchase of Parcel #9, on Route #5, Section #13, from the Singer Mfg. Co., for the consideration of $1.00. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission approved the recommendation of the State Highway Engineer for the purchase of Parcel #9, as above.

Right of Way, Rt. 16, Sec. 5.

State Highway Engineer Sloan recommended the purchase of the following sections of property on Route #16, Section #5, Lehigh Valley Railroad to Woods Tavern.

1 & 17	Oscar J. Brown, R.F.D. #1, Somerville	$ 1.00
2	Emily L. Wright, " " "	113.00
4	Chas. A. Worral, " " "	1,00
5	Edith J. Worral, " " "	1.00
7	J.E.F. & Emma Gerlich " "	70.00
10	Annie E. Neville " " "	159.00
11	Edward Lindstrom, Box 645 " "	1.00
12	Mabel D. Talbot " 861 " "	1.00
13	Fred & Elizabeth Kaiser " "	215.00
15	Socrates T. & Emily L. Yeomans	380.00
16	John & Elizabeth Newman, R.F.D.#1, Somerville	60.00
18	Lavinia Bean " " "	900.00
19	Howard C. & Adda L. Staats " " "	275.00
20	Eugene H. & Eva J. VanRonk #1, Somerville	1.00
22	Lynn E. Greenwood Belle Meade	100.00
24	Mattie B. Himelright, R.F.D. #1, Somerville	1.00

On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission approved the purchase of property on Route #16, Section #5, as recommended by the State Highway Engineer.

Maintenance Contract. ✓

On recommendation of the State Highway Engineer and on motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission approved the extension of time to the Union Building and Construction Company of Passaic, N. J., on the contract for furnishing bituminous concrete FA-BC-1 on maintenance job on Route #8.

Mill Street, Sussex, M.V. Aid.

On recommendation of the State Highway Engineer and motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission approved the contract for Mill Street, Borough of Sussex, Sussex County, work to be done under Motor Vehicle Aid Account.

Newton-Stanhope Road, Sussex Co. M.V.Aid.

On recommendation by the State Highway Engineer and on motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission approved contract for the Newton-Stanhope Road, Section #3, Sussex County, work to be done from the Motor Vehicle Account.

Storm Water Drain, Cranbury.

The State Highway Engineer presented to the Commission a report with estimates covering the cost of a storm water drain at Cranbury New Jersey, on Route #1; said estimate being $35,438.40. The State

Highway Engineer further stated that he had inspected the location and felt that the conditions existing were not entirely due to the building of the roadway, also the construction of the road would cause water to collect on the road. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission was directed to forward this estimate to the Township of Cranbury requesting that they advise the Commission what proportion of the cost they would bear in the event this storm sewer was constructed to relieve the situation existing in Cranbury.

Employments.

The State Highway Engineer presented to the Commission a report on employments approved by him since the last meeting of the Commission, and recommended ratification by the Commission. On motion by Mr. Stewart, seconded by Mr. Jelin, the State Highway Commission approved the following employments as recommended by the State Highway Engineer:

August 4, 1923	Geo. Garber	Loc. Mat. Insp.	$125.00 mo.
" 1, "	Robert Guy,	Bridge Attendant	90.00 "
" 6, "	C. H. Hughes,		20.00 wk.
July 30, "	Paul T. Locks,	Mechanic	.60 hr.
" 30, "	John Buis,	Motor Tr. Driver	.40 "
" 18, "	George Brock,	Steam Shovel Oper.	8.00 day

Codification of Road Laws.

The State Highway Engineer presented a communication received from Mr. F. J. Rattigan, Secretary of the County Engineers' Assoc. referring to the fact that there are conflicting laws concerning the construction of roads in the State of New Jersey, and requesting an appointment with the State Highway Commission at which time might be taken up the advisability of having the various laws concerning roads codified. On motion by Mr. Kidde, seconded by Mr. Stewart, the communication was ordered received and the County Engineers' Association was granted a hearing at some future date relative to the matter of road laws, and the matter was also directed to be placed in the special folder concerning proposed matters to be taken up in the annual report.

Proposed Legislation.

Commissioner Kidde at this point called attention to a matter which he believed also should be given consideration, which matter was the issuance of special license to certain individuals permitting them to reach the ferries ahead of the general line of motorists and suggested that this should be taken up with Commissioner Dill with reference to having certain Legislation on the matter brought up.

Overloading of Trucks.

State Highway Engineer Sloan reported having discussed with Col. Schwarzkopf, head of the State Police, relative to the overloading of trucks on highways. Commissioner Jelin stated that he felt there should be additional scales set up for the checking of violations of overloading trucks. Commissioner Kidde moved that the Secretary invite Commissioner Dill and Col. Schwarzkopf to a conference with the State Highway Commission for the purpose of discussion for the protection of the highways of the State, and he particularly referred to the overloading of trucks. This was seconded by Mr. Jelin and adopted.

Motor Truck Scale, Paramus Road.

Assistant State Highway Engineer Reed reported to the Commission there was ready for the approval of the Commission, a bill in the sum of $3,500.00 from Mr. Chas. W. Bance, for furnishing and installing a motor truck scale on Paramus Road, Bergen County. On motion by Mr. Stewart, seconded by Mr. Jelin, the State Highway Commission approved the payment of $3,500.00 for the furnishing and installing of a motor truck scale on Paramus Road, Bergen County.

Albany Street Bridge, - [illegible]
Trolley Franchise.

The State Highway Engineer reported to the Commission that the franchise under which the Public Service Railway Company occupies the Albany St. Bridge at New Brunswick, expired in August 1922 and he further advised that the changes incident to the widening of the Albany Street Bridge contemplated the moving of the tracks of the trolley company to the center of the bridge, and that such arrangements with the Trolley Company could be considered along with the renewal of the franchise which would be renewed or extended. The Sedretary informed the Commission that the Attorney General had ruled that the State Highway Commission cannot exact a franchise tax from the Public Utilities operating on State Highways. Commissioner Kidde stated that he felt that this condition presented an opportunity for the Commission to determine what rights and powers the State had with respect to Public Utilities on State Highways, and he moved that an opinion be obtained from the Attorney General's Department requesting, in view of the fact that the franchise of the Public Service Railway Company has expired and the Commission is about to negotiate for the continuation of the same, whether, First: the State Highway Commission has the right to negotiate for such a continuation, Second: How far can the State Highway Commission go toward requesting participation by the Public Service Railway Co. in paving a portion of the cost of the widening, and further, what participation the State Highway Commission can require towards maintenance charges from the Public Service Railway Company. This was seconded and adopted.

Signs, Cautionary and Directionary

The Secretary presented a communication from Mr. F.J.Radigan, Secretary of the County Engineers' Association, covering the matter of cautionary and directionary signs, suggesting that the State Highway Commission compel each County to expend the sum of $500. from its Motor Vehicle Allotment for the purpose of providing proper directionary and cautionary signs on its highways. On motion by Mr. Jelin, seconded by Mr. Kidde, the communication was ordered referred to Assistant State Highway Engineer Reed for report and further discussion at the next meeting of the Commission.

Island Heights Bridge.

The State Highway Engineer recommended extension of time of 30 working days to L. J. Sieling on his contract for repairs to the Island Heights and Seaside Park Bridge, this extension being justified by a large amount of extra work which it has been necessary to do. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission approved of an extension of time of 30 working days to L. J. Sieling, as recommended by the State Highway Engineer.

Trolley Tracks, Route #4.

The State Highway Engineer advised the Commission that in the plans for the construction of a bridge over the Inland Waterway on Route #4, no provision was made for any trolley tracks such as had been presented before the Commission by Mr. Vanderbilt representing the trolley company which anticipated making use of the bridge. On motion by Mr. Stewart, seconded by Mr. Jelin, the State Highway Commission directed the State Highway Engineer to proceed with the plans for the Inland Waterway Bridge without any regard for any tracks on the same.

Right of Way, Route #5, Sec.10.

State Highway Engineer Sloan recommended to the Commission the purchase of Parcel #4, on Route #5, Section #10, Chatham-Brantwood, from Mrs. M. R. White, for the consideration of $100.00. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission approved the recommendation of the State Highway Engineer for the purchase of Parcel #4, Section #10, and Route #5.

Route #2, Section #5,
Route #6, Section #15.

The State Highway Engineer presented to the Commission agreements between the State Highway Commission and the Public Service Railway Company covering work to be done in connection with the improvement of Route #2, Section #5, Bordentown-Crosswicks Creek section and Route #6, Section #15, Broadway, Gloucester, providing for reimbursement by the Public Service Railway Company over a five year period. On motion by Mr. Stewart, seconded by Mr. Kidde, the State Highway Commission authorized the Chairman to execute the necessary agreements with the Public Service Corporation, on behalf of the State Highway Commission covering relocation work on Route #2, Section #5, Bordentown-Crosswicks Creek Section and Route #6, Section #15, Broadway, Gloucester City.

Route #15, Leesburg Cut Off.

The State Highway Engineer presented to the Commission the contracts which had been approved by the Board of Control of Institutions & Agencies, covering the work to be done with inmate labor on the construction of Route #15, Leesburg Cut Off. On motion by Mr. Kidde, seconded by Mr. Jelin, the contract was approved and the

Chairman was authorized to sign the necessary contract forms.

Route #2, Section #5.

Commissioner Kidde stated that he felt that records should be made of the reports given to the Commission by the State Highway Engineer to the effect that the work being done by the Inmate Labor on Route #2, Bordentown-Crosswicks Section was a very fine character although the progress made was not entirely satisfactory.

On motion by Mr. Kidde, seconded by Mr. Stewart, the Commission adjourned at 5.00 P.M., to meet in regular session on Tuesday, August 14th, at 10.30 A.M.

Respectfully submitted,

A. LEE GROVER,

Secretary.

MINUTES OF MEETING - AUGUST 14, 1923.

A regular meeting of the State Highway Commission was held at the offices of the Commission, Broad Street Bank Building, Trenton, N.J., on Tuesday, August 14, 1923. The meeting was called to order by Chairman Scott at 11:00 A.M.

Present: Gen. H. L. Scott, Chairman, Messrs. Percy H. Stewart, Walter Kidde and Abraham Jelin.

Bulls Ferry Road, Hudson County

The Secretary informed the Commission that Mr. F. J. Radigan, County Engineer of Hudson County was present for a hearing before the Commission. On motion duly seconded a hearing was granted. Mr. Radigan appeared before the Commission and reported that Hudson County was prepared to proceed with the construction of Bulls Ferry Road under the provisions of the Township Aid Act applying thereto the Township Aid funds for 1923 in the amount of $25,000.00, and requested that the State Highway Commission consider the apportionment of the 1924 Townshi Aid Account of $25,000.00 to this road. He further advised that this road was the County extremity of Hudson and is primarily a road for direct traffic between Bergen and Hudson counties. He also advised that a request for this Township Aid was made by North Bergen Township for work on this road. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission approved of the apportionment of the Hudson County share of Township Aid for 1924, amounting to $25,000.00 to North Bergen Township for work on the Bulls Ferry Road.

Advisory Board

Commissioner Kidde inquired of Mr. Radigan whether in view of the fact that Mr. Wasser was no longer County Engineer of Hudson County, he would be willing to cooperate in the further progress of the work of the Advisory Board studying the traffic situation arising from the construction of the Vehicular Tunnels. Mr. Radigan offered his fullest cooperation at any time the Commission had use for his services.

Minutes Approved

Commissioner Kidde reported that he had carefully reviewed the minutes of July 5th and July 12th and moved that the minutes be approved as mailed. This was seconded by Mr. Jelin and adopted.

Commissioner Kidde called the attention of the Commission to the following items in the minutes of July 17th, 1923:-

On Page No. 2, Paragraph 1, a typographical error in line No. 12, where "$1,000"should read "$8,000," this being the amount as set forth in the statement which the Lehigh & Hudson River Railroad Company offers to the Township Committee of Independence for the elimination of the Creamery Crossing at Great Meadows.

On Page No. 4, Item No. 3, covering conference relative to the trolley franchises. Mr. Kidde suggested that instead of the quotation "covering this point" there be inserted the quotation "covering the policing powers of the Commission." Also, on Page No. 9, with regard to the conference with the Federal Bureau Engineer, Mr. Grover, regarding the Amboy Bridge, Mr. Kidde suggested that in the third item it be noted that the alternate offered by the State Highway Commission for the construction of river piers, was a type presented by the State Highway Engineer which had in it the possibilities of saving $75,000.

On Page No. 11, instead of the words "of being opposed", in the fourth line, there be substituted the word "protesting."

Commissioner Kidde moved the approval of the minutes of July 17th with the corrections as suggested by him. This was seconded and adopted.

Township Aid, Pittsgrove Township.

The Secretary informed the Commission that a delegation was present from Pittsgrove Township, Salem County, for a hearing before the Commission. On motion duly seconded, the hearing was granted. Mr. Lippman appeared and advised that he was sent as a Committeeman from the Township Committie of Pittsgrove Township to request favorable action on the Township Aid application of Pittsgrove Township for the improvement of Garden Road in the township. He advised that this road was practically impassable for the farmers living along it to reach any through highway, and an improvement of two miles of this road would result in greatly increasing the marketing of products from the locality. Mr. Lippman also inquired concerning application filed for aid on Willow Grove Road in Pittsgrove Township, on which an amount of $1,500.00 had been requested. Commissioner Kidde stated that he felt that the Township Aid funds should be used to a large extent in the rural districts to make feeders to main roads from isolated districts, and he further stated that he felt that the situation existing in Pittsgrove Township was one where aid could be given along the lines he had in mind. On motion by Mr. Jelin, seconded by Mr. Kidde, the matter was held in abeyance for consideration by the Commission when the Salem County Township Aid was to be apportioned.

Request for Aid, Salem County ✓

Commissioner Jelin inquired of Mr. Lippman whether there was any change of attitude in the Township with regard to raising 10% necessary for the construction of the connecting link through Norma, on Landis Avenue. Mr. Lipmann advised that he felt that when the improvement was definitely projected that there would be no trouble concerning the necessary 10% to be raised by the county. Commissioner Jelin suggested that Mr. Lippman take the proposition up again with the Township Committee advising them that the Commission is favorable to the improvement and has placed it on the preferred list awaiting the favorable action by the township.

Speedwell Ave., Morristown ✓

The Secretary reported that a delegation from the City of Morristown was present and desired a hearing. On motion, duly seconded, the hearing was granted. There appeared a delegation from the Morristown Chamber of Commerce including Mr. Abell, Director of the Board of Freeholders of Morris County, and State Senator Whitney of Morris County. Mr. Abell, acting as spokesman for the delegation, advised that they appeared with regard to obtaining relief on Speedwell Avenue in Morristown. He advised that although this matter had been discussed for a great length of time there has been nothing done to improve the situation existing in Morristown, and that the pavement as laid by the State Highway Commission forms nothing more than parking space along side the curbs while traffic is compelled to travel between the car tracks where there is no pavement and where the situation is very dangerous. It was also felt by the Chamber of Commerce of Morristown that the condition of the street tended to keep through traffic away and thus detracting from the business along the thoroughfare. Mr. Abell informed the Commission that the Chamber of Commerce has investigated the situation and felt that since the Commission had constructed pavements for full width through other municipalities, that such should be the case through Morristown. The Secretary informed the Commission that at no time had the State Highway Commission constructed a pavement from curb to curb without participation by the local municipality through which the roadway passed. Commissioner Kidde cited the situation in Lawrence Township, Mercer County, where the locality is not only willing but will also pay for one-half the cost of the paving the trolley track area. Commissioner Kidde called attention to the fact that the State Highway Commission's duty was to produce a certain amount of mileage with the amount of money in hand, and if it was to deviate from this plan by constructing extra widths, the funds would not give the mileage as estimated. Commissioner Kidde further advised that this matter had been taken up with Mr. Potts, Mayor of Morristown, at the last meeting of the Commission; and that Mayor Potts had stated that it was believed that the State Highway Commission had sole responsibility for the condition existing in the trolley area, but that they would be willing to confer with the Commission and the Trolley officials looking toward reaching some definite means for improving the trolley area.

Senator Whitney advised that he believed in view of the fact that the Commission stepped into the shoes of the municipality,when Route #5, was taken over, it was up to the Commission to determine the means for eliminating the deplorable conditions existing, especially in view of the fact that the Commission, in the construction of Route #5, through Speedwell Avenue has changed the grading of the roadway in such a manner as to necessitate the entire relaying of the tracks. Commissioner Jelin suggested that an endeavor be made to solve the situation, and offered as a solution that the State Highway Commission and the City of Morristown, jointly, on the 50-50 basis, improve the area between the trolley tracks on Speedwell Avenue, and that the State Highway Commission endeavor, through Law, to collect from the Morris Co., Traction Company, such payment toward this work as the courst will order, said payment to be devided as reimbursement between the State Highway Commission and the City of Morristown.

Mr. Abell reported to the Commission that he felt that this was a very satisfactory solution to the situation, and he estimated the cost of the improvement to be $100,000.00. Mr. Kidde moved that the State Highway Commission express itself as being in a receptive mood toward participating in the cost of the improvement of the pavement between the trolley tracks through the built-up section of Morristown, provided the Town of Morristown will act favorably toward participating in this improvement. Commissioner Jelin in seconding this motion stated that he believed it would be desirable to have a committee from the State Highway Commission to to Morristown to meet with the Board of

Freeholders of Morris County and the City authorities of Morristown with power to negotiate a settlement of the situation in the trolley area on Speedwell Avenue.

Commissioner Kidde further suggested as a means toward improving this situation that the State Highway Commission will bear in addition to one-half of the cost of the paving, the cost of changing the grades of the tracks due to the new pavement construction. The Commission was then informed that Mayor Potts of Morristown was off on a vacation, but as soon as he returned this matter would be placed before him for attention.

Long Valley-Hunterdon County Line Road

Mr. Abell, Director of the Board of Freeholders of Morris County, called the attention of the Commission to the fact that the County was ready to advertise the improvement of the Long Valley-Hunterdon County Line Road, but that if the cost of the same was beyond the means of the County, there will be no award of contract. He further asked that in view of the great amount of controversy on Main Street, Boonton, that the Commission permit the transfer of $25,000.00 as apportioned to East Main Street, Boonton, from that account to the Long Valley-Hunterdon County Line Road. The Commission took no action on the matter at this time.

Morris County Repair Material

The Secretary presented an opinion received from the Attorney General advising that in view of the fact that the County of Morris entered into its contracts for repair materials prior to the passage of the Mathis Act, they were within the Law in extending the 1922 contract to cover 1923 purchases. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission directed that the opinion of the Attorney General be spread in full upon the minutes and that a copy of the same be forwarded to the County of Morris for their attention.

Trenton, N. J., August 3, 1923.

Mr. A. Lee Grover, Secretary,
State Highway Commission,
Broad Street Bank Bldg.,
Trenton, N.J.

My dear Mr. Grover:-

I have before me your letter of recent date enclosing copy of letter of Hon. Charles A. Rathbun, County Counsel of Morris County, in the matter of extension of contracts for the furnishing of repair materials in Morris County.

From the facts submitted, it appears that the County had previously entered into contracts before the passage and taking effect of the Act of March 23, 1923, entitled "An Act concerning the construction, reconstruction, or resurfacing of any State highway, county road, or municipal road, and the award of contracts therefore."

The County of Morris, it appears, desires to patch certain portions of roadways with the approval of the State Highway Commission, without the advertisement of bids and the making of contracts therefor.

The Act in question seems to restrict its requirements to the awarding of bids and to cases where construction,reconstruction, or resurfacing of any road, or part thereof, exceeds the cost of $1,000.00.

From the facts submitted it seems that the situation in Morris County does not come within the terms of the conditions and restrictions of the statute.

I am, therefore, of the opinion that the Board can take advantage of the option in the previous contracts, extending the contracts for a term of one or two years, if in the discretion of your Board, such action is considered to be advisable. The spirit of the Act is to eliminate unfair competition or lack of competition in the use of patented materials, and in the approving of the extension of such contracts, it seems to me that the matter is one of discretion with the State Highway Commission.

Very truly yours,

Thomas F. McCran,

Attorney General.

Request for Aid-Warren County ✓

The Secretary informed the Commission that a delegation from the Warren County Board of Freeholders was present and desired a hearing. On motion duly seconded, the hearing was granted. There appeared County Engineer Vetter and Freeholder Stryker of Warren County. Mr. Stryker urged upon the Commission the importance of improving the road in Warren County from Hampton to Washington and Asbury, forming a north and south connecting link in Warren County. He advised that the County of Warren stood ready to share in the cost of 5.26 miles of road which was estimated to cost $200,000.00. Mr. Stryker was informed by the Commission that there were no funds from which this improvement could be made at this time, due to the fact that there was no State Aid appropriation made and that the Motor Vehicle account was already over-apportioned. As to the suggestion made by the Commission that this work be included in the Federal Aid recommendations, Mr. Stryker advised that Warren County had already taken up considerable Federal Aid improvement and could not carry any additional. Mr. Stryker inquired whether detour funds could be applied to this work and was informed that detour account was a part of the State Highway funds and therefore, could not properly be applied for improvement other than on State Highways. After discussion, Mr. Stryker was advised to hold the request for aid on this road, for consideration when new funds become available in 1924.

Commissioner Kidde moved that a recess be taken for luncheon until 2:00 P.M. This was seconded by Mr. Jelin and adopted.

The Commission reconvened at 2:00 P.M. as agreed with the same members present as at the morning session.

Maps ✓

The Secretary reported to the Commission that the small detour maps were ready for distribution by the State, and advised that he would forward the same to the various agencies suggested by the Commission. The Commission directed that proper notice be given of the availability of these maps to the public in order that they may be distributed throughout the State.

Obstructions on State Highways, ✓
Opinions of Attorney General

The Secretary presented an opinion from the Attorney General covering the removal of obstructions from the State highways, in which the Attorney General ruled as follows:

August 9, 1923.

"I, therefore, conclude that the proper remedy is by indictment for encroachments upon the Highway, unless such encroachments are natural encroachments and not artificial, which the overseer of highways is authorized to remove. If, however, the obstruction prevents the progress of the individual of the public, such a public nuisance may be removed in order to allow traffic to pass. If the injury, nevertheless, is a serious one and an immediate one, for which there is no adequate and complete remedy at law by indictment, I am of the opinion that relief may be had by information filed by the Attorney General for an injunction. The cases cited in your letter do not appear to me to be of such character, except that perhaps of the gasoline pump installed within the right of way lines of the State highway.

"I, therefore, advise that the Commission notify the offenders that they will proceed by way of indictment because of the encroachment of which they are guilty, except in the case of the gasoline pump. In the last named case, as the installation of the gasoline pump as placed in the highway does not obstruct the passage of traffic so as to justify forcible and immediate removal without judicial process, if the facts can be established that the pump, situated as it is, is such an irreparable mischief and danger as to require its immediate removal, I am of the opinion that a court of equity would compel its removal on information by the Attorney General by the means of an injunction.

Very truly yours,

Thos. F. McCran,

Attorney General."

In view of the fact that the Attorney General's opinion ruled that gasoline filling stations along the highways were not natural obstructions, Commissioner Jelin moved that the State Highway Commission apply to the Attorney General's Department to commence proceedings and vigorously prosecute the same in order to have the obstructions removed. This was seconded by Mr. Stewart and adopted.

Publicity ✓

The Secretary presented a communication from the office of the Governor inclosing a clipping from the Providence, R. I. Journal, under date of July 19, 1923, calling attention to the effectiveness of publicity and information bureau in disseminating highway news and information. On motion, duly seconded, the communication was ordered received and filed for consideration.

Advisory Board

Commissioner Kidde reported to the Commission that on Wednesday, August 8th, he had met with the Advisory Board appointed by the Commission for the study of the Vehicular Tunnel traffic and had been presented with the completed copy of the report as prepared up to this time. He advised that he had accepted the report stating that he received it on behalf of the State Highway Commission and would further ask that an opportunity be given to all the State Highway Commissioners to become familiar with the matter contained in the report in order that within the next two or three weeks another meeting might be held at which time the matter could be discussed intelligently and a statement given to the press.

Alternate Routes, Perth Amboy-Keyport

The Secretary informed the Commission that Senator Stevens of Monmouth County was present and desired a hearing. On motion, duly seconded, a hearing was granted. Senator Stevens appeared and reported to the Commission that the hotel interests and business in general along the shore was very anxious to have some relief afforded to the traffic situation existing between Perth Amboy and beyond Keyport. Commissioner Kidde informed Senator Stevens that the State Highway Commission had already gone into this matter very thoroughly and had appointed an Advisory Board consisting of the County Engineers of Middlesex and Monmouth Counties and the State Highway Engineer looking toward the securing of relief for shore traffic from Perth Amboy to and through Keyport. State Highway Engineer Sloan advised that he had arranged to hold the first meeting of this Advisory Board on the day following this meeting and he felt that the work of this Board would not delay action on the project a very long time.

Route #7.

Senator Stevens further called attention to Route #7, between Asbury Park and Hightstown and stated that he believed the condition of this road between Freehold and Trenton was better than at any time he could remember but from Freehold to the Shore it was in poor shape and he would urge the Commission to take some action looking toward its permanent improvement.

Request for Aid, Monmouth County.

Senator Stevens also called attention to the fact that Monmouth County was very much interested in securing the improvement of Roseld Avenue which forms a connecting link from Deal to the County Line, this road is a Township and Borough Road, and he advised that the County was willing to add its share to the cost of the work. He estimated the total cost would be $35,000.00 and that the Borough of Deal and the County would each be willing to share with the State in its improvement. Commissioner Jelin advised that he believed the State would act favorably on sharing to the extent of 25% in the cost of this improvement if the Township, Borough and County each took care of the remaining 75%. Commissioner Kidde moved that the Commission be on record as favorable to the improvement of Roseld Avenue in the Borough of Deal, and when proper resolutions are presented by the local authorities the Commission will take action thereon at once. This was seconded by Mr. Jelin and adopted.

Alternate Route, New Brunswick.

Senator Stevens called attention of the Commission to the fact that he had been urged by a friend of his in New Brunswick to use his influence toward having the State Highway Commission keep away from the Woman's College Campus at New Brunswick, in the construction of a proposed new bridge. General Scott offered for Senator Stevens' attention a copy of a communication which had been forwarded in reply to an appeal from practically every part of the State of New Jersey. Senator Stevens advised that this would answer all his questions. A copy of this letter was ordered forwarded to Senator Stevens.

Route 4, South Amboy

The Secretary presented a communication transmitted by the Secretary to the Governor, Mr. Pearse, urging the State Highway Commission to reimburse the property owners located on Stevens Avenue between Main Street and Bordentown Avenue, South Amboy, for the permanent brick pavement on said street which the property owners paid for prior to the time this highway was taken over for use by the state. The Secretary informed the Commission that the Law very clearly defined the roadways on which the state could reimburse local municipalities and Mr. Jelin moved the communication be received and ordered filed, with a suitable answer made thereto.

Route 1, Section 12, Rahway Avenue

The Secretary presented a communication from the Board of Public Works of Elizabeth, N.J., transmitting form of agreement in duplicate for the joint improvement of Rahway Avenue, Route 1, Section 12, which permitted the additional width of pavement to be constructed without special contract and the same to be paid for by the City of Elizabeth reimbursing the State. On motion by Mr. Jelin, seconded by Mr. Stewart, the agreement was ordered received and referred to the State Highway Engineer for approval. After further consideration the Chairman was authorized to sign same on behalf of the Commission.

Request for Aid, Hunterdon County

The Secretary presented a communication from Hon. George K. Large, Counsel for the Board of Freeholders of Hunterdon County, requesting aid in reconstructing the road between Lambertville and White House in Hunterdon County. On motion by Mr. Stewart, seconded by Mr. Kidde, the request was ordered received and placed on file, and the Secretary was directed to notify Hunterdon County that the Commission has no funds from which it could give aid on this improvement at this time.

Harding Highway, Salem County

The Secretary presented a communication with resolution from the

Salem County Board of Freeholders, advising that the County Highway from Pennsgrove via Woodstown-Pole Tavern and Elmer to the County Line near Malaga is dedicated to the memory of President Harding, and is designated as "Harding Highway." On motion by Mr. Stewart, seconded by Mr. Jelin, the communication was ordered received and filed and the Secretary was directed to extend the kind expression of the Commission for the feeling displayed by Salem County in affecting this memorial.

Great Meadows, Route 5 ✓

The Secretary presented a communication from the Clerk of the Township of Independence in Warren County, advising that he had received the letter of the Commission with regard to the closing of the Creamery Crossing at Great Meadows, but that the Township Committee had not had the opportunity of taking the matter up further. He did, however, quote the action of the Township Committee taken at a previous time when they would not allow the elimination of the Creamery Crossing and he stated that he did not believe they were of any different opinion yet. Commissioner Jelin stated that in view of the action taken by the Commission when the report of the Lehigh & Hudson River Railroad was presented, the State Highway Commission should ask that the Township Committee take favorable action in the matter and he moved that Chairman Scott forward a communication to the Township Committee of Independence advising therein that inasmuch as the State Highway Commission has cooperated with them to the fullest extent toward the elimination of the Creamery grade crossing, that it is very important for them to give immediate favorable attention to the request for the closing of the grade crossing to vehicular traffic. This was seconded by Mr. Kidde and adopted.

Township Aid, Washington Ave., Bergen Co. ✓

The Secretary presented a communication from Washington Township in Bergen County, New Jersey, advising of the official opening of Washington Avenue on Saturday afternoon, August 18th, and inviting the State Highway Commission to be present at this time. On motion by Mr. Jelin, seconded by Mr. Kidde, the invitation was ordered received and accepted with appreciation for the thoughtfulness of the community.

Detour, Route 9. ✓

The Secretary presented a communication from Mr. H. M. Riddle of Asbury, N. J. with further reference to his former request that the

State Highway Commission arrange for the repair of the Bristol Corner-West Portal Road, which he claimed was not placed in as good condition after it was used as a detour, as it was previous to being used as a detour. On motion by Mr. Stewart, seconded by Mr. Jelin, the State Highway Commission directed that the communication be filed and that Mr. Riddle be advised that the Commission can take no further action beyond that which was explained in its former communication.

Industrial Directory ✓

The Secretary reported to the Commission that in accordance with the Commission's suggestions he had taken up with Miss Lillian Erskine, Chief of the Bureau of Industrial Statistics of the Labor Department, the matter of supplying information for the new Industrial Directory, and had been informed by Miss Erskine in a communication dated August 1st, the fact that it was her desire that an introduction not to exceed 2000 words containing a statement of the general policy concerning road problems and expenditures be prepared by the State Highway Commission. The Secretary read the communication of August 1st, outlining the items desired to be covered. On motion by Mr. Jelin, seconded by Mr. Kidde, the communication was ordered received and the Secretary was directed to forward such information as the Commission had available for the purpose.

The schedule of business was next taken up for consideration item by item as follows:

Crosswicks Creek Bridge, Route 2. ✓

The State Highway Engineer presented a report of the following bids received on August 13th, for the construction of the Crosswicks Creek Bridge on Route 2, M. P. 26.5 and recommended that action relative to the award be deferred pending further investigation of the lowest bidder:

A. L. Trimpi - Harris Structural Steel Co. 202 State Trust Bldg., Plainfield, N.J.	$80,400.00
Thomas Sheahan, Hagerstown, Md.	93,226.13
Frederick J. Parker, Montclair, N.J.	89,850.00
S. S. Thompson & Co., Red Bank, N.J.	96,400.00
L. J. Sieling, Red Bank, N.J.	103,800.00
Grant, Driver & Grant, Trenton, N.J.	119,297.08
Gibbs, Mueller Co., Philadelphia, Pa.	123,991.00

On motion by Mr. Jelin, duly seconded, the award of contract for the Crosswicks Creek Bridge was held for action at the next meeting of the Commission.

Right of Way, Route 2, Section 5

The State Highway Engineer presented for the approval of the Commission two leases for land required for the construction of a temporary bridge over Crosswicks Creek on Route 2, Section 5. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission approved of the leasing of property from the following on the location of the temporary bridge over Crosswicks Creek:

Estate of Patrick Martin	$ 72.00 per year
Esther A. Cunningham	120.00 per year.

Right of Way, Route 8, Section 4

The State Highway Engineer presented purchase agreements and recommended approval of property purchase on Route 8, Section 4, Smith Mills-Charlottesburg Road. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission approved the recommendation of the State Highway Engineer and authorized the purchase of the following parcels of property on Route 8, Section 4:

Parcel #3	Harry & Hattie Little,	0.08 acres	$1.00
Parcel #4	Butler Water Company	.29 acres	1.00
Parcel #5	Pequannock Rubber Company	.47 acres	1.00

Right of Way, Route 10, Section 1-C

The State Highway Engineer recommended the purchase of property required for the construction of Route 10, Section 1-C, known as Parcel #3 from W. Scott, for the consideration of $25.00. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission approved the purchase of property known as Parcel #3, Route 10, Section 1-C, from W. Scott for the consideration of $25.00.

Right of Way, Route 8, Section 4-A

State Highway Engineer Sloan reported that Mr. Frank Schulster, owner of Parcel #5 on Route 8, Section 4-A, had refused an offer of $1,000.00 which was deemed fair. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission directed that an offer be made to Mr. Schulster of $1,000.00 and in the event of his failure to accept, that action be taken in accordance with the following condemnation resolution:

RESOLVED, that this Commission hereby determined to acquire in the name of the State of New Jersey, for public use in the construction of State Highway Route 8, Section 4-A, ALL that certain Lot, tract or parcel of land and premises, situate, lying and being in the State of New Jersey, and more particularly described as follows:

Parcel #5

Beginning at the intersection of the west property line of Frank Schulster property and the south Right of Way line of State Highway Route 8, Section 4-A, and running (1) N 54 degrees 42' 00" E a distance of 8.44', thence (2) S 23 degrees 53' 13" E a distance of 83.73', thence (3) S 79 degrees 42' 00" W a distance of 2.25' to the Right of Way line of said highway, thence (4) running along the Right of Way line of said highway, on a curve to the left, whose radius is 445.34', a distance of 81.78' to the point of beginning. The amount of land hereby conveyed being .008 acres as shown on map entitled Parcel #5, N.J.S.H.D. - Route 8, Section 4-A.

The State Highway Engineer is hereby authorized and directed on behalf of this Commission to make an offer to the owners or owner of said lands and premises for the conveyance of the same to the State of New Jersey free and clear of all encumbrances, and, upon the failure of such owner or owners to accept such offer, or if for any other reason said lands and premises cannot be immediately acquired by agreement with such owner or owners, then the Attorney General of the State of New Jersey is hereby authorized and directed to institute condemnation proceedings for the acquisition of said lands and premises.

Right of Way, Route 8, Section 4-A

State Highway Engineer Sloan reported that Mr. F. R. Casterline, owner of Parcel #1, Route 8, Section 4, and parcel #9, Route 8, Section 4-A, had refused a reasonable offer of $50.00 for property taken. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission directed that an offer of $50.00 be made Mr. Casterline for Parcel #1 on Route 8, Section 4, and Parcel #9 on Route 8, Section 4-A, and in the event of his refusal that condemnation proceedings be instituted.

AUG 1 4 1923

Right of Way, Route 16, Section 5 ✓

The State Highway Engineer reported that Azniv Maniguian owner of Parcel #21 on Route 16, Section 5, has persistently refused to sign any papers on account of some grievance, and has refused a reasonable offer of $425.00 for his property. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission authorized the offer of $425.00 to Azniv Maniguian, owner of Parcel #21, on Route 16, Section 5, and in the event that the same is refused that condemnation proceedings be instituted in accordance with the following resolution of condemnation:

RESOLVED, that this Commission hereby determined to acquire in the name of the State of New Jersey for public use in the construction of State Highway Route 5, Section 10, ALL that certain Lot, tract or parcel of land and premises, situate, lying and being in the State of New Jersey, and more particularly described as follows:

Parcel #21

Beginning at a point where the existing center line of the New Amwell Road is intersected by the proposed new southerly Right of Way line of State Highway Route 16, Section 5, said point being thirty-three feet (33') distant from, measured at right angles to the proposed new center line of said Route 16, Section 5, at Station 249 plus 10.01 as shown on a plan attached hereto entitled "New Jersey State Highway Department, Route 16, Section 5. Property to be acquired from Azniv Maniguian, Hillsboro Township, Somerset County. Scale 1"=50'; May, 1923"; thence (1) along the said proposed new southerly right of way line, south sixty-five degrees one minute fifty seconds west (S°-01'-50"W) a distance of seven hundred eight and eighty-four one-hundredths feet (708.84') to a point in the same, said point being thirty-three feet (33') distant from, measured at right angles to the proposed center line of said Route 16, Section 5, at a point of curvature, station 256 plus 18.85; thence (2) along the proposed new southeasterly right of way line on a curve to the left with a radius of nine hundred twenty-two and thirty-seven one-hundredths feet (922.37') parallel to the thirty-three feet (33') distant from the said proposed new center line, a distance of seven hundred and twenty-eight one hundredths feet (700.28') to a point in the same, said point being thirty-three feet (33') distance from, measured at right angles to the said proposed new center line at a point of tangency, station 263 plus 44.18; thence (3) along the proposed new easterly right of way line south twenty-one degrees thirty-one minutes fifty seconds west (S-21°-31'-50"W) a distance of one thousand twenty-four and thirteen one-hundredths feet (1024.13') to a point in the existing center line of the road leading from Somerville to Princeton; said point being thirty-three feet (33') distant from, measured at right angles to the said proposed new center line of Route 16, Section 5, at station 273 plus 68.31; thence (4) along the said existing center line north six degrees forty-two minutes east (N6°-42' E) a distance of forty-four and two one-hundredths feet (44.02') to a point in the line of lands between the said Azniv Maniguian and Lynn E. Greenwood; thence (5) along the said line of lands north seventy-two degrees forty-three minutes west (N 72°-43'W) a distance of fifty-four and eighty-nine one-hundredths feet (54.89') to a point in the proposed new westerly right of way line of Route 16, Section 5, said point being thirty-three feet (33') distant from, measured at right angles to the proposed new center line at station 273 plus 23.82; thence (6) along the said proposed new westerly right of way line north twenty-one degrees thirty-one minutes fifty seconds east (N 21°-31'-50" E) a distance of nine hundred eighty-five and sixty-four one-hundredths feet (985.64') to a point in the same, said point being thirty-three feet (33') distant from, measured at right angles to the proposed new center line at a point of tangency, station 263 plus 44.18; thence (7) still along the same on a curve to the right with a radius of nine hundred eighty-eight and thirty-seven one-hundredths feet (988.37'), parallel to and thirty-three feet (33') distant from the proposed new center line, a distance of one-hundred nineteen and eighty-two one-hundredths feet (119.82') to a point in the same, said point being thirty-three feet (33') distant from, measured radially from the proposed new center line at station 262 plus 28.46; thence (8) on a curve to the left with a radius of one hundred fifty feet (150') a distance of three hundred two and eighty-eight one-hundredths feet (302.88') to a point in the existing southerly right of way line of the new Amwell Road; thence (9) north two degrees forty-seven minutes east (N 2°-47' E) a distance of sexteen and one-half feet (16.5') to a point in the existing center line of the New Amwell Road; thence (10) along the said existing center line south eighty-seven degrees thirteen minutes east (S 87°-13' E) a distance of two hundred thirteen and eighty-eight one-hundredths feet (213.88') to an angle point in the same; thence (11) still along the same north sixty-five degrees twelve minutes east (N 65°-12' E) a distance of one thousand fifty-nine and ninety-six one-hundredths feet (1059.96') to an angle point in the same; thence (12) still along the same south eighty-three degrees thirty-eight minutes East (S 83°- 38' E) a distance of seventy and thirty-six one-hundredths feet (70.36') to the point and place of beginning, all bearings being from true meridian; containing two and nine hundred nineyt-six one-thousandths (2.996) acres, be the same more or less, exclusive of the existing roadway.

The State Highway Engineer is hereby authorized and directed on behalf of this Commission to make an offer to the owners or owner of said lands and premises for the conveyance of the same to the State of New Jersey free and clear of all encumbrances, and, upon the failure of such owner or owners to accept such offer, or if for any other reason said lands and premises cannot be immediately acquired by agreement with such owners or owner, then the Attorney General of the State of New Jersey is hereby authorized and directed to institute condemnation proceedings for the acquisition of said lands and premises.

Right of Way, Route 16, Section 6 Parcel 23 ✓

State Highway Engineer Sloan reported to the Commission that Matthew H. & Mary A. Nelson had refused to accept $427.00 for parcel #23 on Route 16, Section 6. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission authorized the offer of $427.00 to Matthew H. & Mary A. Nelson owners of Parcel #23 on Route 16, Section 5, and in the event that same is refused, that condemnation proceedings be instituted in accordance with the following resolution of condemnation:

RESOLVED, that this Commission hereby determines to acquire in the name of the State of New Jersey, for public use in the construction of State Highway Route 16, Section 5, ALL that certain Lot, tract or parcel of land and premises, situate, lying and being in the State of New Jersey, and more particularly described as follows:

Parcel #23

Beginning at a point where the line of lands between Matthew H. & Mary A. Nelson and Frieda M. & Edward Robertson is intersected by the proposed new easterly right of way line of State Highway Route 16, Section 5, said point being thirty-three feet (33') distant from, measured at right angles to the proposed new center line at Station 285 plus 93, as shown on a plan entitled "New Jersey Highway Department, Route 16, Section 5, property to be acquired from Matthew H. & Mary A. Nelson, Hillsboro Township, Somerset County, Scale 1"=50', May 1923"; thence (1) along the said line of lands North eighty-three degrees, twelve minutes West (N 83°-12' W) a distance of thirty-six and five-tenths feet (36.5') to a point in the existing center line of the road leading from Wood's Tavern to Belle Mead; thence (2) along the said existing center line North sixteen degrees fifty-three minutes East (N 16°-53' E) a distance of nine hundred thirty-two feet (932.0') to a point in the same; thence (3) South seventy-three degrees seven minutes East (S 73°-07' E) a distance of sixteen and five-tenths feet (16.5') to a point in the existing easterly side line of said road; thence (4) along the said existing easterly side line in a northeasterly direction on a curve to the right with a radius of one hundred fifty-eight and ninety-seven one-hundredths feet (158.97') a distance of sixty-seven and one-tenth (67.10') feet to a point in the same; thence (5) still along the same North forty-one degrees four minutes East (N 41°-04' E) a distance of one hundred forty-four feet (144.0') to a point in the existing center line of the old Amwell Road, thence (6) along the said existing center line South eighty degrees twelve minutes East (S 80°-12'E) a distance of fifty-one and forty-three one-hundredths feet (51.43') to a point in the same; thence (7) South nine degrees forty-eight minutes West (S 9°-48' W) a distance of twenty and ninety-eight one-hundredths feet (20.98') to a point; thence (8) southwesterly on a curve to the left with a radius of thirty feet (30') a distance of forty and ninety-eight one-hundredths feet (40.98') to a point in the proposed new easterly right of way line of said Route 16, Section 5, said point being thirty-three feet (33') distant from, measured at right angles to the proposed new center line at station 275 plus 07; thence (9) along the said proposed new easterly right of way line South twenty-one degrees thirty-one minutes fifty seconds West (S 21°-31'-50"W) a distance of nine hundred thirty-nine and twenty-one one-hundredths feet (939.21') to a point in the same, said point being thirty-three feet (33.0') distant from, measured at right angles to the proposed new center line at a point of curvature, Station 284 plus 46.21; thence (10) still along the same on a curve to the left with a radius of thirteen hundred ninety-nine and sixty-nine one-hundredths feet (1399.69') parallel to and thirty-three feet (33') distant from the proposed new center line, a distance of one hundred dive and five one-hundredths feet (105.05') to a point in the same, said point being thirty-three feet (33') distant from , measured at right angles to the proposed new center line at a point of tangency, Station 285 plus 53.73; thence (11) still along the same South seventeen degrees thirteen minutes fifty seconds West (S 17°-13'-50" W) a distance of thirty-nine and twenty-seven one-hundredths feet (39.27') to a point and place of beginning, all bearings being from true meridian; containing one and three hundred eighty-four one-thousandths (1.384) acres, be the same more or less, exclusive of the existing roadway.

The State Highway Engineer is hereby authorized and directed on behalf of this Commission to make an offer to the owners or owner of said lands and premises for the conveyance of the same to the State of New Jersey free and clear of all encumbrances, and upon the failure of such owner or owners to accept such offer, or if for any other reason said lands and premises cannot be immediately acquired by agreement with such owner or owners, then the Attorney General of the State of New Jersey is hereby authorized and directed to institute condemnation proceedings for the acquisition of said lands and premises.

Route 5, Section 6,
Extension of Time.

State Highway Engineer Sloan recommended to the Commission approval of extension of time to September 25, 1923 to J. S. Geiger's Sons, contractors on Route 5, Section 6, Speedwell Ave., Morristown, this extension being justified due to delays in installing track material by the Morris County Traction Company. The Secretary explained that Mr. J. S. Geiger was present and desired a hearing in connection with this extension. On motion duly seconded the hearing was granted. Mr. Geiger appeared before the Commission and explained in detail the difficulties encountered in the progress of this work on Route 5, Section 6, stating that it was his idea to have this work entirely completed before the end of the past construction season but innumerable delays not due to his own work made it necessary for an extension of time to the month of September before final completion. On motion by Mr. Jelin seconded by Mr. Stewart, the State Highway Engineer and authorized an extension of time on Route 5, Section 6, to September 25, 1923.

Route 9, Section 7-A,
Extension of Time.

On recommendation of the State Highway Engineer, Mr. Jelin moved for an approval of extension of time of the New Jersey Construction Company on Route 9, Section 7-A, from July 18th to July 24th, 1923, the work having been completed on that date, said extension having been approved by the County of Somerset. This was seconded and adopted.

Routes 1 & 13, Connecting Link,
New Brunswick.

Chairman Scott reported an inspection of Routes 1 and 13, connecting links known as Albany and French Streets, New Brunswick, and he advised that this work was in satisfactory condition for acceptance by the State. Commissioner Jelin moved that final payment of the State's share of this work be approved. This was seconded by Mr. Stewart and adopted.

Detour - Route 2, Section 5.

Commissioner Kidde reported that in company with General Scott a tour of inspection was made of Burlington County roads on Thursday, August 9, 1923, and they were very much impressed with the construction work being done by Burlington County. He further stated that he would recommend that the State Highway Commission assist, as soon as possible, in the improvement of a cut-off between Bordentown and Route 1, known as the Mile Hollow Road, which would permit of through traffic proceeding from Route 2 to Route 1, without passing through Trenton. Commissioner Kidde moved that this route be placed on the priority list for construction from excess Motor Vehicle funds. This was seconded and adopted. Commissioner Kidde further suggested that it may be possible for the State Highway Engineer to work out some plan whereby the State Highway Commission could furnish the material and the Department of Institutions and Agencies furnish inmate labor for this work.

Detour, Route 1, Section 12.

The State Highway Engineer presented to the Commission a report on conditions existing in the Borough of Roselle Park relative to traffic officers required to handle traffic on detour through the Borough. This report advised that he believed, inasmuch as the State Highway Commission has no police powers, it cannot delegate such power to employees to be placed in municipalities to act as traffic officers. On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission directed that a communication be forwarded to the Mayor of the Borough of Roselle Park advising that there is no provision in the Budget of the State Highway Commission for the payment of traffic officers, nor has the State Highway Commission been vested with police powers, and further suggesting that the State Highway Commission would advise the municipality to call upon the State Police for such assistance as they may be able to give.

Laurelton-Allen Osborn Road, Brick Township, Ocean County

The State Highway Engineer presented a force account agreement from Brick Township, Ocean County, covering work to be done on Laurelton-Allen Osborn Road, on which the State's share was not to exceed $4,500.00, and the Township's share was $1,500.00. On motion by Mr. Stewart, seconded by Mr. Jelin, the State Highway Commission, on recommendation of the State Highway Engineer, approved the Township Aid force account agreement for the Laurelton-Allen Osborn Road, Brick Township, Ocean County.

Width of Township Roads

State Highway Engineer Sloan resubmitted to the Commission for their consideration, the matter of minimum width of Township roads, in which he recommended that the rule as adopted by the former State Highway Commission, limiting the minimum width for Township roads to sixteen feet in cases where State Aid is used, be rescinded, and that each request for aid on Township roads be considered as to width in connection with the traffic, and where conditions will justify the construction of a nine foot width, that the same be authorized. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission directed that any former action concerning the width of Township roads be rescinded and that, as recommended by the State Highway Engineer, the width to be paved on Township roads be considered in connection with traffic carried thereon.

Motor Truck Scales

State Highway Engineer Sloan presented to the Commission a report from the Superintendent of Maintenance covering the installation of additional scales for the proper apprehension of over-loaded trucks on the highways. This report outlined for the Commission the location of the present scales and the results obtained through the Motor Vehicle Commissioner upon the scales as located, in which it was recommended that additional scales be placed:

(1) Paterson Plank Road near Homestead

(2) On Route 6, at a point near Big Timber Creek Bridge

(3) On Route 1, between Highland Park and Metuchen

(4) On Route 1, on the Lincoln Highway between the Passaic and Hackensack Rivers.

(5) On Route 4, at some point near South Amboy

(6) On Route 1, at some point near South Amboy.

The estimated cost of the installation of these scales was placed at $3,600.00 each. State Highway Engineer Sloan recommended to the Commission that approval be given for the installation of these six additional scales at this time. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission approved the recommendation of the State Highway Engineer and directed the installation of six additional scales in accordance with the report of the Superintendent of Maintenance, these scales to be purchased by advertising for same and to include proper covers and gates for their protection. Commissioner Stewart suggested that, in the event additional scales are required, that one be placed on Route 9 in the vicinity of Bound Brook.

Route No. 11.

State Highway Engineer Sloan presented to the Commission a report on the status of Route 11 on which he had been directed to make a report looking toward the taking over of this route by the State Highway Commission. He advised the Commission that, in view of the conditions existing on Route 11, which would require very early reconstruction by the State, he would not personally recommend the taking over of this route by the State at this time. Commissioner Kidde informed the Commissioners that he believed that when the Essex County delegation was present at the last meeting they were practically assured that the Commission would favorably consider the taking over of Route 11 as soon as a report was presented by the State Highway Engineer and he believed that in view of the fact that the State cannot expend its bond issue funds for this improvement, the County of Essex was satisfied to have it taken over for maintenance only by the State. He further stated, in view of the fact that Essex County has such a small amount of State Highway mileage within its boundaries, it should be treated with favor by the State Highway Commission. Commissioner Jelin moved that the State Highway Commission arrange for the taking over of Route 11 effective October 1, 1923, and offered the following resolution:

RESOLUTION

WHEREAS, by Chapter 14 of the Laws of 1917, there was defined State Highway Route 11, extending from Newark to Paterson, and

WHEREAS, by Chapter 190 of the Laws of 1923, the said State Highway Route 11 was redefined as extending from Newark to Paterson by way of Belleville, Nutley and Passaic, and

WHEREAS, a public hearing has been held in accordance with the statute preliminary to the taking over of said route as a State highway.

NOW, THEREFORE, BE IT RESOLVED that the State Highway Commission does hereby take over as a State highway for future maintenance and repair, effective October 1st, 1923, in accordance with the provisions of Section 3, Chapter 14, Laws of 1917, the sections of the said State Highway Route 11, lying outside of municipalities, the population of which exceeds 16,000 as follows:

"Beginning at the line between the City of Newark and Town of Belleville, and extending in a general northerly direction on and along Washington Avenue through the Town of Belleville and Town of Nutley to the line between the Counties of Essex and Passaic, which is also the city line of the City of Clifton.

"Beginning again at the line between the City of Clifton and the Town of Nutley, and extending in a general westerly direction on and along Kingsland Road to Cathedral Avenue, thence along Cathedral Avenue in a general northerly direction to the line between the Town of Nutley and City of Clifton,"and

BE IT FURTHER RESOLVED, that there shall be prepared a detailed description showing courses and distances which shall be forwarded to the governing bodies of the County of Essex, Town of Belleville and Town of Nutley.

This was seconded by Mr. Kidde and unanimously adopted.

Motor Vehicle Repairs, Sussex County

State Highway Engineer Sloan presented a report on the request of Sussex County for the use of $12,500.00 remaining in the 1922 Motor Vehicle Account against 1922 repairs, and for a similar amount to be applied from the 1923 Motor Vehicle Account on work under Chapter 10, P.L. 1919, and he recommended the passage of proper resolutions covering these items. On motion by Mr. Stewart, seconded by Mr. Jelin, the State Highway Commission unanimously adopted the following resolution:

WHEREAS, permission was granted by the State Highway Commission to Sussex County in 1922 for the reconstruction of certain roads in Sussex County under the provisions of Chapter 10 of the Laws of 1919, known as the Bond Retirement from Motor Vehicle Fund plan, and

WHEREAS, it was not possible to proceed with the said work at that time, and therefore, payments on said account have not as yet been necessary to be made.

NOW, THEREFORE, BE IT RESOLVED that the action as heretofore taken be rescinded, and

BE IT FURTHER RESOLVED that permission is hereby granted to Sussex County to construct the roads known as Branchville-Dingman's Road, Section 2 - one mile, and Ross' Corner-Sussex Road, Section 1-D - 1.3 miles, under the provisions of the said Chapter 10, Laws of 1919, the State Highway Commission to permit the use of Motor Vehicle moneys for the retirement of the State's share of the bonds and interest thereon, and

BE IT FURTHER RESOLVED that the bonds to be issued by the County shall be for a term not exceeding 5 years and that the State's share to be used toward the payment of the principal and interest on said bonds shall not exceed 50% of the cost thereof in any one year; nor shall the amount paid by the State for such purpose in any one year exceed the amount of $12,500.00, said amount to come from the regular Motor Vehicle apportionment to Sussex County when available.

Route 5, Section 12, Netcong-Canal Culvert Section

State Highway Engineer Sloan reported to the Commission that, in order to secure Federal Aid for the grading of Route 5, Section 12, Netcong-Canal Culvert Section, it will be necessary to adopt a resolution advising the Federal Government that the State Highway Commission will complete this construction with an adequate type of pavement as soon as practicable. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission unanimously adopted the following resolution:

> WHEREAS the plans and specifications for Route 5, Section 12, Netcong to Canal Culvert Section, known as Federal Aid Project 49, to be submitted to the Bureau of Public Roads for approval, provide for grading and drainage only in order to permit proper settlement prioe to the construction of a pavement thereon,
>
> NOW, THEREFORE, BE IT RESOLVED that the Federal Government be assured that the State Highway Commission will complete this section by the construction of an adequate type of pavement as soon as is practicable after the settlement of the fills.

Morris Canal Bridges

Commissioner Kidde called the attention of the Commission to the fact that the time was approaching when consideration must be given to the matter of disposition of bridges over the abandoned Morris Canal. State Highway Engineer Sloan informed the Commission that investigation was already being made of the condition of these bridges and will be reported on as soon as completed.

Hainsburg-Columbia Road, Warren Co.

State Highway Engineer Sloan presented to the Commission plans and proposal sheet for the grading and drainage of the Hainsburg-Columbia Road, Warren County, Federal Aid Project 52, and recommended that same be approved by the Commission in order that they may be forwarded to the Federal Government. On motion by Mr. Kidde, seconded by Mr. Jelin, the Commission approved the plans and specifications for the grading and drainage of the Hainsburg-Columbia Road, Warren County, and authorized the Chairman to sign the necessary papers on behalf of the Commission.

Jackson's Mills-Imlaystown Road, Ocean County ✓

On recommendation of the State Highway Engineer, Mr. Kidde moved that an extension of time to September 1, 1923, be approved for Jackson's Mills-Imlaystown Road, Ocean County, State Aid work. This was seconded by Mr. Jelin and adopted.

Cohansey-Husted Station Road, Cumberland County ✓

On recommendation of the State Highway Engineer, Mr. Jelin moved that an extension of time to July 15, 1923, be approved on the Cohansey-Husted Station Road, Cumberland County,State Aid work. This was seconded by Mr. Kidde and adopted.

Landis Ave., Section 1, Cumberland Co. ✓

On recommendation of the State Highway Engineer, Commissioner Kidde moved that an extension of time to July 15th, 1923, be approved for Landis Ave., Section 1, Cumberland County, Motor Vehicle Aid work. This was seconded and adopted.

Laurel Avenue, Essex County ✓

On recommendation of the State Highway Engineer, Mr. Jelin moved that approval be given to an extension of time of twenty working days on the contract for the construction of Laurel Ave., Essex County, work being done by State Aid. This was seconded by Mr. Stewart and adopted.

Jackson's Mills-Imlaystown Road. ✓

State Highway Engineer Sloan reported the completion and recommended the acceptance of the Jackson's Mills-Imlaystown Road, Ocean County,work having been done with State Aid. On motion by Mr. Stewart, seconded by Mr. Jelin, the Commission approved the recommendation of the State Highway Engineer and ordered the acceptance and final payment on the Jackson's Mills-Imlaystown Road, Ocean County.

Springfield Ave., New Providence, Union County ✓

State Highway Engineer Sloan reported that in accordance with instructions given at previous meeting of the Commission, he had investigated the specifications and bids for Springfield Ave., New Providence, Union County, and he would recommend approval of award of contract as submitted by Union County. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission approved the award of contract by Union County for Springfield Ave., New Providence, Union County, work to be done from Motor Vehicle account.

New Lisbon-Four Mile Road

Commissioner Jelin reported that he had received a request from the Attorney for Mr. A. J. Milmoe, contractor on the New Lisbon-Four Mile Road, requesting a further hearing relative to the final adjustments allowed on this contract, and he moved that a hearing be granted at the next meeting. This was seconded and adopted.

Phillipsburg-Belvidere Road,
Section 1.

State Highway Engineer Sloan reported to the Commission that a slight change was necessary in the resolution allowing Warren County to proceed with the construction of the Phillipsburg-Belvidere Road, Section 1, Warren County, under Federal Aid, this change being in the first paragraph by eliminating the words "the northerly borough line of" and substituting therefore "State Highway Route 12 in." On motion by Mr. Kidde, seconded by Mr. Stewart, the Commission authorized the change as recommended.

Cumberland County, Motor Vehicle
Repair Schedule.

State Highway Engineer Sloan presented to the Commission the Motor Vehicle Repair Schedule of Cumberland County, same having been delayed in transmission, due to the fact that Cumberland County had expected to receive additional aid from the State. On motion by Mr. Kidde, seconded by Mr. Jelin, the Commission approved the Motor Vehicle Schedule of Repairs as submitted by Cumberland County and authorized the Chairman to sign the same on behalf of the Commission.

Newton Avenue, Boro of Sussex,
Sussex County

On recommendation of the State Highway Engineer, Commissioner Jelin moved that the Commission approve the contract for Newton Ave., Borough of Sussex, Sussex County, work being done from Motor Vehicle account. This was seconded by Mr. Stewart and adopted.

Distribution-Township Aid Account

Commissioner Kidde requested that at the next meeting the balance remaining to be distributed to counties from the Township Aid Account be taken up for consideration.

Swainton-Goshen Road, Cape May County

On recommendation of the State Highway Engineer, Commissioner Kidde moved that approval be given to the final statement of cost and payment made on the Swainton-Goshen Road, Middle Township, Cape May County, work having been done by force account from the Township Aid funds. This was seconded by Mr. Stewart and adopted.

Mt. Lucas Road, Princeton Township, Mercer County

On recommendation of the State Highway Engineer, Commissioner Jelin moved that approval be given to the award of contracts by Princeton Township, in Mercer County, for the construction of Mt. Lucas Road at an estimated cost of $17,000.00, work being done from the Township Aid Account funds already set up. This was seconded by Mr. Biddle and adopted.

Employments

State Highway Engineer Sloan presented to the Commission a report on employments made by him since the last meeting of the Commission. On motion by Mr. Biddle, seconded by Mr. Stewart, the State Highway Commission approved the following employments as recommended by the State Highway Engineer:

Aug. 15, 1923	Jas. P. Casey	Cost Clerk	$ 90.00	per mo.
" 16	B. M. Adams	Bridge Attendant	90.00	
" 16	Arlington Wilson	" "	30.00

Highway Exhibit-Inter-State Fair

The Secretary called the attention of the Commission to the fact that Mr. Gage, Division Head in charge of the Laboratory, had inquired whether the Commission desired to consider the matter of arranging for an exhibit of State Highway material and work at the 1923 Inter-State Fair at Trenton. The Commission ordered the matter held in abeyance without taking any action thereon.

Right of Way,
Route 5, Section 8-A

State Highway Engineer Sloan reported to the Commission that in connection with the acquisition of property needed on Route 5, Section 8-A, at the Great Meadows grade crossing, arrangements were made with Lewis Merrill, owner of Parcel 9, for the purchase of his property for the sum of $1,000.00 and the moving of a house, but that he would recommend to the Commission that an offer be made to the owner of the sum of $1,500.00, which will include the property and moving of the house by the owner. On motion by Mr. Stewart, seconded by Mr. Jelin, the Commission authorized the purchase of Parcel #9, Route 5, Section 8-A, from Lewis Merrill for the consideration of $1,500.00, which will include the purchase price of his land and the cost of moving the house by the owner, or institute condemnation proceedings if not accepted.

RESOLVED, that this Commission hereby determines to acquire in the name of the State of New Jersey, for public use in the construction of State Highway Route 5, Section 10, ALL that certain Lot, tract or parcel of land and premises, situate, lying and being in the State of New Jersey, and more particularly described as follows:

Parcel 4

Beginning at the point of intersection of the southerly line of Ninth Avenue with the easterly line of River Avenue, and running

Thence (1) south sixty-seven degrees, twenty-four minutes and thirty seconds east, seven feet and fifty-four one-hundredths of a foot (7.54') along said southerly line of Ninth Avenue to a point, said point being distant twenty-five feet (25') measured radially, from the new center line of State Highway Route 4;

Thence (2) in a southwesterly direction along the arc of a circle to the left of one-thousand, eight hundred and eighty-five feet and eight one-hundredths of a feet (1885.08') radius, and concentric with the said center line of State Highway, one hundred and twenty-two feet and twenty-seven hundredths of a foot (122.27') to a point, said point being on a radius drawn thru the point of curve of new center line of State Highway at Station 191 plus 76.05;

Thence (3) south thirty-two degrees, thirty-eight minutes west, thirty feet and eighty-five one-hundredths of a foot (30.85') from said new center line of State Highway to a point in the division line between the properties of Fred M. Davison and the Arthur M. D. Carpenter Estate;

Thence (4) north sixty-seven degrees, twenty-four minutes and thirty seconds west, eleven feet and ninety-one ond hundredths of a foot (11.91') along said division line to a point in the aforementioned easterly line of River Avenue;

Thence (5) north thirty-five degrees, forty-two minutes and forty seconds east, one hundred and fifty-four feet and two one hundredths of a foot (154.02') along said easterly line of River Avenue to the point or place of beginning, being a part of lot 1765 as shown on the map of Boro of Belmar, made by Clyde Potts in 1915.

CONTAINING three one hundredths of a acre (0.03A) more or less.

It being the intention of the grantor to convey to the State of New Jersey all that portion of his land included between the easterly line of River Avenue and a line drawn parallel to and twenty-five feet (25') distant easterly from the new center line of State Highway Route 4, between the southerly line of Ninth Avenue and the division line between the properties of Fred M. Davison and the Arthur M.D.Carpenter Estate, as shown on map entitled "New Jersey State Highway Department, Section of Route 4, property to be acquired from Fred M. Davison, Boro of Belmar, Monmouth County, N.J. Scale 1"-50', revised June 1923."

Together with all the right, title and interest the party of the first part may have in River Ave. and Ninth Ave. adjoining the above described premises.

RESOLVED, that this Commission hereby determines to acquire the above property, and

The State Highway Engineer is hereby authorized and directed on behalf of this Commission to make an offer to the owner or owners of said lands and premises for the conveyance of the same to the State of New Jersey free and clear of all encumbrances, and upon the failure of such owner or owners to accept such offer, or if for any other reason said lands and premises cannot be immediately acquired by agreement with such owner or owners, then the Attorney General of the State of New Jersey is hereby authorized and directed to institute condemnation proceedings for the acquisition of said lands and premises.

Right of Way, Route 16, Section 5.

State Highway Engineer Sloan presented with his recommendations purchase agreement for Parcel #9, Route 16, Section 5, from George M. and Grace DeHart Greene for the consideration of $100.00. On motion by Mr. Stewart, seconded by Mr. Jelin, the State Highway Commission approved the purchase of Parcel #9 on Route 16, Section 5, from George M. and Grace DeHart Greene, for the consideration of $100.00.

Right of Way, Route 9, Section 10.

State Highway Engineer Sloan presented with his recommendation for approval, purchase agreement for Parcel #1, from the Pierce Estates Inc., required for construction of Route 9, Section 10, the cost being $100.00. On motion by Mr. Jelin, seconded by Mr. Stewart, the Commission approved the purchase of Parcel #1, Route 9, Section 10, from the Pierce Estates, Inc., for the consideration of $100.00.

Right of Way, Route 16, Section 5.

State Highway Engineer Sloan presented purchase agreements with his recommendation for Parcel #3, Route 16, Section 5, from Margaretha Ebert, Executrix of the Ernestine Wagner Estate, for the consideration of $1.00. On motion of Mr. Jelin, seconded by Mr. Stewart, the Commission approved the purchase of Parcel #3, Route 16, Section 5, from Margaretha Ebert, Executrix of the Ernestine Wagner Estate, for the consideration of $1.00.

Route 5, Section 9,
Barkers Corner-Hackettstown.

State Highway Engineer Sloan reported to the Commission that he had investigated the request for an extension of time as made by the Globe Indemnity Company, Surety for Frank J. Groman & Sons, contractors on Route 5, Section 9, Barkers Corner-Hackettstown Section, for 120 working days, and he recommended to the Commission that no extension be granted on this contract. On motion of Mr. Kidde, seconded by Mr. Jelin, the Commission approved the recommendation of the State Highway Engineer and denied an extension of time on Route 5, Section 9, Barkers Corner-Hackettstown Section.

Maintenance Division Work-Status.

The Secretary reported that, in accordance with request made, Mr. Muir, Superintendent of Maintenance, was present to report on the work done by the Maintenance Division. Commissioner Kidde inquired of Mr. Muir as to how far advanced the work of the Maintenance Department was at this time, and Mr. Muir stated that he could see very clearly the end of the heavy maintenance work within two weeks, and upon inquiry as to his funds, Mr. Muir stated that he believed from his last report that the work of the Maintenance Division during this year would be accomplished within the amount set up by the Department from the Motor Vehicle Account. Mr. Muir further advised as to the progress being made on the application of Lignin Binder to the gravel roads and stated that this work was ahead of its schedule.

Tree Planting Along Highways

Commissioner Kidde inquired as to what progress might be made with regard to the tree-planting experiment along state highways, and suggested that the Secretary communicate with Mr. Wilbur of the Department of Conservation and Development, requesting that a report be presented to the Commission in the immediate future covering this matter. Mr. Muir stated to the Commission that he would urge extreme caution and care with reference to the type of tree and location along the highways, since he has found that where trees are planted close to underdrainage work, there is a tendency for the roots to be drawn into the drains,causing them to clog.

On motion by Commissioner Kidde, seconded by Commissioner Jelin, the Commission adjourned at 5:45 P.M. to meet in regular session on Tuesday, August 21, 1923.

Respectfully submitted,

A. LEE GROVER, Secretary.

MINUTES OF MEETING - AUGUST 21, 1923.

A regular meeting of the State Highway Commission was held at the offices of the Commission, Broad Street Bank Building, Trenton, on Tuesday, August 21, 1923. The meeting was called to order at 10.30 A.M., by Chairman Scott.

Present: Gen. H. L. Scott, Chairman, Messrs. Percy H. Stewart, Walter Kidde and Abraham Jelin.

New Lisbon-Four Mile Road.

The Secretary advised the Commission that Mr. Jacob L. Newman, Attorney for A. J. Milmoe, contractor on the New Lisbon-Four Mile Road, Burlington County, was present and desired a hearing relative to the claims filed by his clients for extra items due on account of their contract. On motion duly seconded, the hearing was granted. Mr. Newman appeared together with Mr. Milmoe and Mr. Allworth and presented to the Commission a complete review of the conditions existing with reference to the New Lisbon-Four Mile Road. He pleaded that the State Highway Commission give consideration to the fact that his clients were compelled to go to considerable expense in order to secure adequate gravel for this work; this being done in view of the fact that the specifications informed them that "Gravel may be obtained from State property." He stated that the Engineering Department of the old Commission had directed the contractors to obtain gravel from the Staffordsville pits, which necessitated a payment for the gravel, together with a freight charge for hauling and spreading. He suggested that the Commission consider seriously the payment to the contractors of the amount due on account of the Staffordsville gravel purchased in addition to the allowance already made for freight in bringing this gravel to the job. Contractor Milmoe recited for the Commission the conditions encountered in the work, and stated that due to the fact that the gravel as obtained in the vicinity of the work was not sufficient either in quantity or binder, the work had to be done over and over again with the result he estimated the loss on the work to his firm to be nearly $50,000. Mr. Allworth advised that at a previous session of the former Highway Board the claim for payment for the Staffordsville gravel was presented and the information given him by the Secretary was that the Commission had approved his claim, but that it would not be considered until after the entire work was completed. Secretary Grover corrected this impression by advising that the former Highway Commission had made no efforts to settle this matter, but had directed that the Contractor complete his entire work before presenting any claims. After further consideration of the matter Commissioner Jelin moved that action on this matter be deferred until after a conference by the Commissioners. This was seconded and adopted.

Right of way

Shaver Property, Rt.#10,Sec. 1A.

The Secretary reported that a tentative request for a hearing had been made by Mrs. Caroline E. Shaver with reference to the condemnation of her property on Route #10, Section #1A, but that she had not appeared.

Route #1 Extension; Vehicular Tunnel Entrance.

The Secretary presented a communication from the Inter-State Bridge & Tunnel Commission, transmitting a copy of the opinion of the Attorney for that Board, concerning the beginning point of the Vehicular Tunnel between New York and Jersey City, in which opinion was rendered that the entrance to the Vehicular Tunnel is at that point where the authority of Jersey City ends and the authority of the State as represented by the Tunnel Commission begins, which is, in his opinion, "the point between Grove and Provost Streets at 12th Street, Jersey City, where it is designed by the Tunnel authority to assume entire control of the traffic entering the tunnel and that the entrace or exit of the tunnel at 14th Street is that point between Henderson and Provost Streets where the traffic shall be released from the control of the Commission authority." Commissioner Stewart voiced his opinion that this represented merely an interpretation of the meaning of the word "Entrance" as applied to the

Vehicular Tunnel, and moved that the communication, together with the opinion as received, be placed in the files for further consideration, and that the following reply be forwarded to the New Jersey Inter-State Bridge and Tunnel Commission:-

Re: Route #1, Extension,
Vehicular Tunnel Entrance.

New Jersey Inter-State Bridge & Tunnel Comm.,
Mr. James F. Dolan, Secretary,
Hall of Records,
New York City.

Gentlemen:-

I am directed by the State Highway Commission to acknowledge your communication under date of August 7th, 1923, inclosing therewith a copy of an opinion concerning the matter of the entrance to the Hudson River Vehicular Tunnel rendered by Deputy Attorney General Emerson Richards, as presented to the New Jersey Inter-State Bridge & Tunnel Commission. Your communication and the opinion therewith were ordered received and placed in our files.

I am further directed to advise you that there was forwarded to your Commissioner Robert S. Sinclair a copy of action taken by the State Highway Commission covering the case in point, and in view of the apparent conflict in the opinions, the State Highway Commission has expressed a desire to give the matter further consideration.

Furthermore, I am directed to inform you that your construction of the matter seems to be at variance with the economics of the situation, and if correct the Legislature may wish to clarify the same.

Very truly yours,

A. LEE GROVER,

Secretary.

This was seconded by Mr. Jelin and adopted.

Tree Planting.

The Secretary presented a communication from Mr. C. P. Wilbur, State Forestre of the Department of Conservation & Development, advising that in regard to the inquiry of the Commission concerning tree planting, the present planting season is passed and would recommend that planting proposed be delayed until next Spring, at which time he will get in touch with the State Highway Department. On motion, duly seconded, the State Highway Commission ordered the communication received and placed on file.

Route #18.

The Secretary presented a communication from Major W. A. Welsh, General Manager of the Palisade Inter-State Park, advising that a blue-print copy showing the alignment of the proposed change of highway through the property of the Palisade Inter-State Park Commission at Green Brook Park in the Borough of Alpine and Tenafly was being forwarded. He further advised that he had the assurance of the Borough of Tenafly that they will abandon the road needed for the new line, at their next regular meeting. Commissioner Kidde suggested that before any definite action was taken looking toward the taking over of Route #18, some competent employee of the Department with legal knowledge of the procedure be delegated to look into all of the matters connecting the work through the various municipalities in Bergen County. Secretary Grover informed the Commission that the Attorney General had ruled that the State Highway Department in taking over any road, was not concerned in the abandonment of any lines by the local municipalities. Commissioner Kidde stated that he and General Scott in going over the line of Route #18, found that by moving the road a short distance it could be placed near the Palisades, thus creating a very magnificent view of the Palisades and New York. On motion, duly seconded, the communication was ordered received and placed on file for the time being.

Mercer County Road Inspection.

The Secretary presented an invitation from the Board of Freeholders of Mercer County inviting the Commission to participate in an inspection of the highways of Mercer County with the Board of Freeholders. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission directed the Secretary to accept the invitation extended by Mercer County and to arrange for a date suitable to all.

Long Valley Hunterdon County
Line Road, Morris County.

The Secretary reported that he had received a telephone communication from the Director of the Morris County Board of Freeholders requesting the Commission to transfer the State Aid of $25,000 as set aside for the East Main Street Boonton work to the Long Valley Hunterdon County Line Road. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission directed that the Secretary inform the Director of the Morris County Board of Freeholders that the Commission would ask for a written request from the Board of Freeholders of Morris County giving full details of the proposition before any action could be taken.

Township Aid, Franklin Twp. Bergen Co.

The Secretary presented a telegram received from the Cedar Hill Improvement Association of Bergen County, New Jersey, protesting against the appropriation of $12,000 for the building of a road on Crescent Avenue in Franklin Township. On motion duly seconded, the telegram was ordered received and placed on file for consideration when Township Aid requests of Bergen County were disposed of.

MAPS

The Secretary presented a communication from the New Jersey Automobile and Motor Club requesting the Commission to furnish them with 3,500 maps for distribution among its members. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission directed that the Secretary forward one thousand road maps to the New Jersey Automobile and Motor Club with the statement that if it was proposed to mail maps to each member, the balance of the request would be forthcoming.

Hackensack River Bridge, Route #1.

The Secretary presented to the Commission a communication from Edward P. Stout, Attorney for James Bowen, owner of property on which the approach to the Hackensack River Bridge on Route #1 is located, protesting against the treatment accorded his client in that no notice, either direct or indirect, of condemnation proceedings had reached them. The Secretary informed the Commission that the status of the case was to the effect that when the report of the appraisers as appointed by the Commission was received, it was decided that there would be a further investigation of the property made, but that no proceedings had, as yet, been instituted for condemnation. After discussion on this matter, Mr. Jelin moved that the State Highway Commission authorize an offer of $20,000 to James Bowen for the purchase of his entire property located on Route #1 Extension of the Lincoln Highway at the Hackensack River Bridge location and, in the event that the same is refused, that condemnation proceedings be instituted. This was seconded by Mr. Kidde and adopted.

The Commission recessed for luncheon at 1.00 P.M. to meet in regular session at 2.00 P.M. The Commission reconvened at 2.00 P.M. as agreed, with the same members present as at the morning session.

Route #8, Sec.#3, Lines Property.

Commissioner Stewart called the attention of the Commission to the articles appearing in the newspapers on the matter of ousting Mrs. Catherine Lines from her property on Route #8, and he moved that a statement be prepared for the press covering the exact status of this matter as considered by the State Highway Commission. This was seconded by Mr. Kidde and adopted. The statement as prepared by Mr. Stewart is as follows:

The State Highway Commission makes the following statement with reference to the vacation of the injunction restraining them from proceeding to take possession of the property of Mrs. Lines on State Highway Route #8:-

> In or about the month of November, 1919, there were appointed Condemnation Commissioners for the purpose of condemning such portion of the property of Mrs. Lines as was considered necessary to straighten the road running in front of this property.
>
> This Condemnation Commission reported on June 30th, making an award to Mrs. Lines of $11,050.00, as representing her damages for the taking of the necessary portion of her property and damages to her house, from which decision Mrs. Lines took no appeal.
>
> This money has been available for Mrs. Lines since that time but she has made no application, nor has anyone in her behalf made application to use the money. She was offered this money in cash by the Attorney General in person and refused to accept the money, and thereupon it was deposited in the Court of Chancery, as Trustee for Mrs. Lines.
>
> The Commission appointed by Governor Edge requested Mrs. Lines to vacate the premises. The present Commission personally called upon Mrs. Lines last Spring and were advised by her that she was willing to vacate the property provided she could have a suitable home. Subsequently, representatives of this department called upon her many times to give helpful suggestions, with no results. The State Highway Commission, in order to assist Mrs. Lines, had plans and specifications prepared for a house which could be built for less money than she was awarded under the Condemnation Proceedings and, in addition, there was prepared for her an estimate for the cost of removing the present house to another location. Both of these estimates were furnished to Mrs. Lines and she, apparently, was prepared to vacate. It appears, however, that a third person interposed and urged Mrs. Lines not to vacate.
>
> In view of the great public necessity to render this location safe to the traveling public, particularly in view of the fact that repeated accidents have occurred in this location, the present Commission very regretfully considered that it was its duty to remove this dangerous condition and advised Mrs. Lines of that fact but, in order that she might not be unduly inconvenienced, gave her six additional weeks in which to find other accommodations. It appeared, however, that at the expiration of that period there had been no effort made on Mrs. Lines' part to vacate the property, and it became the unpleasant necessity of proceeding according to law.

INVITATION

The Secretary presented a communication as received by General Scott from the State Board of Commerce and Navigation, inviting the Commission to take a trip on the Delaware to visit the new water-front terminal as recently developed by the City of Wilmington; this trip to be held on Monday, August 27th, from the Wilmington Terminal at 10.30 A.M. On motion by Mr. Jelin, seconded by Mr. Kidde, the Commission directed that the communication be acknowledged with thanks, and that the Secretary express the regret of the Commission that it cannot attend, due to the fact that there will be road bids received on that date by the members of the State Highway Commission.

Route #14, Section #9, Oceanview-Seaville.

The State Highway Engineer reported to the Commission that the following bids had been received on August 20th for the construction of Route #14, Section #9, Oceanview to Seaville, in Cape May County and he would recommend award of contract to the lowest bidder, William Eisenberg, at 98% of the Engineer's estimated units of cost:

William Eisenberg	98%
Sutton & Corson Co.	104.98%
Public Service Prod.Co.	106.6%
Burgess & Dorrier	108.7%
Gibbs-Mueller Co.	118.75%

On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission approved the recommendation of the State Highway Engineer and unanimously adopted the following resolution:-

RESOLVED, that the Contract for the construction of Route #14, Section #9, Oceanview to Seaville, in Cape May County, be and the same is hereby awarded to William Eisenberg of Woodbine, N.J., at his, the lowest bid submitted at 98% of the Engineer's estimated units of cost, amounting to a contract price of $197,688.74, and

BE IT FURTHER RESOLVED, that the Chairman is authorized to sign the necessary contract after approval by the State Highway Engineer.

Route #16, Section #5.

The State Highway Engineer reported to the Commission that the following bids were received on Monday, August 20th, for the construction of Route #16, Section #5, South Somerville to Woods Tavern, and recommended that award be made to the lowest bidder, J. F. Chapman & Son, at their's, the lowest bid of $105.9% of the Engineer's estimated units of cost:-

J. F. Chapman & Son	105.9%
Jos. F. Burke	109.3%

On motion by Mr. Stewart, seconded by Mr. Jelin, the State Highway Commission approved the recommendation of the State Highway Engineer and adopted the following resolution:-

> RESOLVED, that the contract for the construction of Route #16, Section #5, South Somerville to Woods Tavern, be and the same is hereby awarded to J.F. Chapman & Son, of Hillside, N.J., at their's, the lowest bid at 105.9% of the Engineer's estimated units of cost amounting to a contract price of $257,656.18, and
>
> BE IT FURTHER RESOLVED, that the Chairman is authorized to sign the necessary contract after approval by the State Highway Engineer.

Crosswicks Creek Bridge, Route #2.

State Highway Engineer Sloan reported to the Commission that after investigation of the low bidder for the Crosswicks Creek Bridge on Route #2, he would recommend to the Commission the rejection of all the bids received for this work, and on motion by Mr. Stewart, seconded by Mr. Kidde, the State Highway Commission approved of the recommendation of the State Highway Engineer and rejected all the bids received for Crosswicks Creek Bridge on Route #2. State Highway Engineer Sloan recommended that an agreement be entered into with the Department of Institutions and Agencies for the use of Inmate Labor as employed on the construction of Route #2, Section #5, between White Horse and Bordentown, for the construction of the Bridge at Crosswicks Creek; this agreement to cover inmate labor to be used in the excavation and concrete work, or do this work by State construction forces if more desirable, while it was recommended that the steel work be advertised for from steel contractors. On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission adopted the recommendation of the State Highway Engineer and directed that an agreement be entered into with the Department of Institutions and Agencies for the necessary inmate labor in constructing the Crosswicks Creek Bridge on Route #2, and in the event that this is found undesirable, the construction of the bridge to be undertaken by State construction forces.

Route #8, Section #4A.

State Highway Engineer Sloan reported the following bids received on Monday, August 20th, 1923, for the construction of Route #8, Section #4A, Charlottesburg-Newfoundland section, and he recommended award to the lowest bidder, the R. D. Richardson Construction Co., of Scranton, Pa., at their's, the lowest bid of 99% of the Engineer's estimated units of cost, amounting to a contract price of $240,567.28. He advised that he had received word from the State Highway Department at Harrisburg, that this company is competent and responsible as shown by their experience in building Pennsylvania Highways:-

R. D. Richardson Const. Co.	99.0%
Weldon Contracting Co.	103.4%
C. H. Winans Co.	109.78%
Jos. F. Burke	113.3%

On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission approved the recommendation of the State Highway Engineer and adopted the following resolution:-

> RESOLVED, that the Contract for the construction of Route #8, Section #4A, Charlottesburg-Newfoundland section, be and the same is hereby awarded to R.D. Richardson Construction Co., of Scranton, Pa., at their's the lowest bid of 99.0% of the Engineer's estimated units of cost amounting to a contract price of $240,567.28, and
>
> BE IT FURTHER RESOLVED, that the Chairman is authorized to sign the necessary contract after approval by the State Highway Engineer.

Approach to Women's College,
Nichol Ave., New Brunswick.

State Highway Engineer Sloan reported the completion of plans and specifications for the construction of Nichol Ave., New Brunswick, approach to the State College for Women, and recommended authority to advertise. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission adopted the following resolution:

> RESOLVED, that the State Highway Commission does hereby approve of plans and specifications for the construction of Nichol Avenue, New Brunswick, approach to the State College for Women, and
>
> BE IT FURTHER RESOLVED, that the Chairman is authorized to sign the necessary specifications after approval by the State Highway Engineer and the Chief Clerk is directed to place the necessary advertisements for bids on same.

Route #14, Section #6, Mays Landing.

The State Highway Engineer presented to the Commission the final papers covering the completion of Route #14, Section #6, in Mays Landing, and recommended final acceptance by the State in accordance with the terms of the Reimbursement Act. He called attention to the fact that in the original plans and specifications as approved by the former State Highway Commission, provision was made for a full width pavement through Mays Landing without a share of this expense to be borne by the Town of Mays Landing. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission approved the acceptance of Route #14, Section #6, through Mays Landing, in accordance with the terms of the Reimbursement Act.

Routes #1 and #13, Connecting Link,
New Brunswick.

State Highway Engineer Sloan reported to the Commission that at a former meeting, when Routes #1 & #13, connecting link, on French & Albany Streets in New Brunswick, was presented for final acceptance, and was accepted upon the report of Chairman Scott, he had not reported upon results of core drill tests made of the pavement, showing that there was a deficiency in thickness of pavement at certain street intersections which, however, in his opinion, and in the opinion of the State Chemist, was of ample and sufficient strength. The deficiency, he further stated, was explained by the City Engineer of New Brunswick and by the contractor as due to the fact that it was necessary to meet the existing grades of the cross streets; and he would recommend that the action as taken by the Commission stand as taken.

Bridge #61, Route #16, Section #3.

State Highway Engineer Sloan reported to the Commission the completion and recommended acceptance of Bridge #61 at M.P. 25.7, on Route #16, Section #3. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission approved the acceptance and final payment on Bridge #61, at M.P. 25.7, on Route #16, Section #3.

Right of Way, Route #16, Section #6.

On recommendation by the State Highway Engineer, Mr. Jelin moved that the Commission approve the purchase of Parcel #16 on Route #16, Section #6, from Margaret B. Mills, for the consideration of $1.00. This was seconded by Mr. Stewart and adopted.

Right of Way, Route #16, Section #6.

On recommendation of the State Highway Engineer, Commissioner Stewart moved that the Commission approve the purchase of Parcels #8A and #8B from Thomas H. Baxter on Route #16, Section #6, for the consideration of $1.00. This was seconded by Mr. Jelin and adopted.

Route #8, Section #3, Jannarone Claim.

State Highway Engineer Sloan reported to the Commission with reference to the claim of Philip Jannarone for expenses incurred in litigation on Route #8, Section #3. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission authorized the payment of the bill of Philip Jannarone in the amount of $582.79, which was his expense in defence of suit brought against him for trespassing on the property of Allen T. Haycock, on Route #8, Section #3, at Bloomingdale, in compliance with the plans of the State Highway Department.

Route #1, Section #13, Highland Park-Stelton.

State Highway Engineer Sloan presented to the Commission a request from T. H. Riddle for extension of time on his contract for work on Route #1, Section #13, Highland Park-Stelton Road, from September 1, 1923 to October 1, 1923. State Highway Engineer Sloan reported that in view of the progress made on the work he could not recommend that an extension of time be granted. Commissioner Jelin reported to the Commission that Mr. Riddle has been unable to attend to the work himself due to the fact that he has been laid up in the hospital for some time past and is still in a very serious condition, and he would recommend that in view of this that the extension of time in question be granted. This was seconded by Mr. Stewart and adopted.

Route #9, Sec. #9A, Still Valley-Bloomsbury.

State Highway Engineer Sloan presented to the Commission a request for extension of time as approved by Warren County for the Bernard A. Tighe Contracting Co., for thirty working days on Route #9, Section #9A, Still Valley to Bloomsbury Section, and recommended that the State Highway Commission does not approve of this extension of time in view of the fact that there was no satisfactory reason for the same. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission unanimously adopted the recommendation of the State Highway Engineer and denied the extension of time as requested on Route #9, Section #9A, Still Valley-Bloomsbury Section.

Fire Prevention on Bridges.

State Highway Engineer Sloan presented to the Commission a report from the Superintendent of Maintenance covering the facilities of the Maintenance Department for fire prevention on the bridges throughout the State, in which it was stated that it was felt that the State Highway Commission is taking reasonable precautions against danger from fire on all bridges with the exception of three long toll bridges taken over at Island Heights, Ocean City and Long Beach Turnpike, where it was not felt that the necessities of the case warranted the installation of tanks and fire patrols on these bridges. On motion by Mr. Jelin, and duly seconded, the report was ordered received and placed on file.

Employments.

The State Highway Engineer presented a report of employments, as approved by him since the last meeting of the Commission and recommended approval of the same. On motion by Mr. Stewart, seconded by Mr. Jelin, the State Highway Commission approved the following employments as made since the last meeting of the Commission:-

Aug. 15, 1923	Jas. P. Casey	Cost Clerk	$ 90.00 mo.
" 16, "	B. M. Adams	Bridge Tender	90.00 "
" 16, "	Arlington Wilson	" "	30.00 "
" 16, "	Jas. Bradeley	" "	75.00 "
" 20, "	T. E. Kavanaugh	" Inspector	165.00 "

Hourly Basis.

Aug. 16, 1923	S. S. Everett	Garage Assistant	.45 hr.
" " "	C. H. Blatt	" "	.45 "
" " "	Carmine LaFalce	" "	.45 "

Salary Increase.

State Highway Engineer Sloan reported to the Commission that there were several salary increase recommendations for approval by the Commission, same having been recommended by the Division Heads. They are as follows:

Edward Banim	from	$120.00	to	$130.00
W. N. Barry	"	145.00	"	155.00
J. J. Collins	"	125.00	"	135.00
John H. Davis	"	130.00	"	140.00
J. C. Houman	"	155.00	"	165.00
W. A. Manchester	"	155.00	"	185.00
Lebeus Martin	"	125.00	"	135.00
E. S. Scollan	"	125.00	"	135.00
M. N. Vliet	"	155.00	"	165.00
John Davis	"	125.00	"	155.00

On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission directed that the increases be granted as recommended by the State Highway Engineer, all of the same being in conformity with Civil Service regulations.

Right of Way, Route #5, Section #13.

State Highway Engineer Sloan recommended to the Commission the approval for the purchase of Parcels #17 and #19, required on Route #5, Section #13, from A. P. Villa & Bros., Incorporated, for the consideration of $1.00. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission approved the purchase of property as recommended by the State Highway Engineer.

Right of Way, Route #2, Section #4.

State Highway Engineer Sloan recommended to the Commission that approval be given to the purchase of Parcel #9 on Route #2, Section #4, from David F. McGill and J. A. McBridge, for the consideration of $50.00. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission approved the purchase of property on Route #2, Section #4, known as Parcel #9, for the sum of $50.00.

Right of Way, Route #4, Section #20.

The State Highway Engineer recommended to the Commission the approval of the purchase of property needed on Route #4, Section #20, Manasquan River-Sea Girt. He advised that three Real Estate Experts in the vicinity of the work furnished appraisals upon the property. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission approved of the purchase of property needed on Route #4, Section #20, Manasquan

River-Sea Girt as follows:

9	Sea Girt Investment Co., Spring Lake, N.J.	$1,200.00
11	Sea Girt Investment Co., Spring Lake, N.J.	750.00
12	Sea Girt Investment Co., Spring Lake, N.J.	750.00
13	Sea Girt Investment Co., Spring Lake, N.J.	750.00
14	Brighton Realty Co., Spring Lake, N.J.	750.00
15	Brighton Realty Co., Spring Lake, N.J.	750.00
16	Rudolph Kadelac, Sea Girt, N. J.	300.00
17	Sea Girt Investment Co., Spring Lake, N.J.	450.00
19	Emma Trueman, Sea Girt, N.J.	1,000.00
20	Sea Girt Company, Spring Lake, N.J.	1.00
21	Mary L. Gleason, Sea Girt, N.J.	1,500.00
22	John A. Biggett, Spring Lake, N.J.	794.00
24	Sea Girt Company, Spring Lake, N.J.	400.00

Right of Way, Route #9, Section #10.

The State Highway Engineer reported to the Commission with reference to the Right of Way secured from Warren C. King on Route #9, Section #10, at Bound Brook, for which right of way the Commission recently agreed to pay $1,000.00 and to move the hedges and trees and shrubbery; that a proposition had been received from the BraeBurn Nurseries for this landscape work for the sum of $217.50, which proposition was acceptable to Mr. King, and he recommended that the Commission authorize the payment of $1,217.50 to Mr. King for property needed in full payment of all claims. On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission approved the purchase of property from Warren C. King on Route #9, Section #10, Bound Brook, for the total sum of $1,217.50 in full of all claims by Mr. King.

Route #5, Section #10.

State Highway Engineer Sloan reported that the Canoe Brook Golf Club on Route #5, Section #10, Chatham-Brantwood, was very desirous of constructing an underpass at the highway which cuts through their property. He reported that the estimated value of the right of way taken from the Canoe Brook Golf Club in the construction of Route #5, Section #10, was $600.00, and he recommended that the State Highway Commission authorize the purchase of property from the Canoe Brook Golf Club on Route #5, Section #10, for the sum of $600.00, and that the Canoe Brook Golf Club be permitted to construct an underpass on Route #5, Section #10, Chatham-Brantwood Section from its own funds. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission approved the purchase of property from the Canoe Brook Golf Club on Route #5, Section #10, Chatham-Brantwood Section, for a sum not exceeding $600.00, it being understood that the Canoe Brook Golf Club proposed to construct an underpass on said route.

Condemnations.

State Highway Engineer Sloan reported to the Commission that endeavors had been made to secure several parcels of property on Route #13, Section #6, but that the owners had made exorbitant demands upon the State, and he recommended that reasonable offers be made or that condemnation be instituted. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission authorized the purchase of property on Route #13, Section #6, from the owners at the following amounts:

W. J. George	consideration	$100.00
Cunnah & Boice	"	250.00
Wm. Pelligran	"	650.00

and in the event of their refusal to accept that condemnation be entered into.

Route #8, Section #5, Sussex-Unionville.

State Highway Engineer Sloan reported to the Commission the completion of Route #8, Section #5, Sussex-Unionville Road and recommended acceptance by the Commission. On motion by Mr. Jelin, seconded by Mr. Stewart, this road was referred to Commissioner Kidde for inspection and report preliminary to acceptance by the Commission.

Hainesville-Montague Road.

State Highway Engineer Sloan requested the Commission to give consideration to the balance of Township Funds to be distributed among the townships of the State. Assistant State Highway Engineer Reed requested that the Commission give consideration to the request of Sandyston Township, Sussex County, for the sum of $6,413.34, to be used on the Hainesville-Montague Road, this approval was needed in order to permit the contractor to go on the work. On motion by Mr. Stewart, seconded by Mr.

Kidde, the State Highway Commission approved the apportionment of $6,413.34 to Sandyston Township, Sussex County, for the Hainesville-Montague Road.

Township Funds.

On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission directed that the balance of Township Aid apportionments be considered at the next meeting of the Commission.

Bridge #58, Route #16, Section #3.

State Highway Engineer Sloan reported the completion of Bridge #58 at M.P. 23.8 on Route #16, Section #3, Bedminster-Pluckemin Section, and recommended acceptance by the State. On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission accepted the completed work on Bridge #58, at M.P. 23.8 on Route #16, Section #3, and authorized final payment to be made.

Special Motor Vehicle Inspector.

Commissioner Jelin moved that the State Highway Commission authorize the appointment of Mr. Jacob Hagin, Superintendent of Plant and Equipment, as Special Motor Vehicle Inspector, this action having been suggested by Commissioner Dill. This was seconded by Mr. Stewart and adopted.

Riverside Drive, Monmouth County.

The Secretary reported to the Commission that a request had been made by Monmouth County that the Commission again reject plans and specifications for the Riverside Drive Road, Section #1, in view of the fact that the action as taken at the last meeting preceded any action by the Board of Freeholders. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission ordered the rejection of plans and specifications for Section #1, Riverside Drive, Monmouth County, due to lack of funds.

Shippetauken Creek. Route 13

The Secretary presented, at the request of General Scott, the matter of type of construction on Bridge over Shippetauken Creek on Route #13, Section #6, it being his suggestion that the bridge be of concrete type with stone facing. On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission approved the adoption of a concrete bridge for Shippetauken Creek on Route #13, Section #6, the same to be improved with a stone facing in order to conform with its historical surroundings.

On motion by Mr. Jelin, seconded by Mr. Stewart, the Commission determined it would not hold a meeting on Tuesday, September 4th, due to the fact that it was the day after Labor Day and no bids were to be received on Labor Day.

On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission adjourned at 4.00 P.M., to attend a dinner as the guests of Governor Silzer at Sea Girt, at 7.00 P.M.

The next meeting of the Commission is to be held on Tuesday, August 28th, 1923, at 10.30 A.M.

Respectfully submitted,

A. LEE GROVER,
Secretary.

MINUTES OF MEETING - AUGUST 28th, 1923.

A regular meeting of the State Highway Commission was held at the offices of the Commission, Broad Street Bank Building, Trenton, New Jersey, on Tuesday, August 28th, 1923. The meeting was called to order at 10.30 A.M.

Present: General H. L. Scott, Chairman; Mr. Walter Kidde, and Mr. Abraham Jelin.

Absent: Mr. Percy H. Stewart.

Right of Way, Route #10.

The Secretary advised that Mrs. Caroline E. Shaver was present and desired a hearing in connection with the purchase of her property on Route #10, Section #1A, Edgewater, on which condemnation proceedings had been authorized. Mrs. Shaver was granted a hearing and gave the Commission an outline of her case, stating that she had been held up for a long time and was in need of money at once. Upon being advised that the Commission could do nothing until the decision of the Condemnation Committee had been received, Mrs. Shaver asked that a loan on the money be arranged in some manner. There was a considerable discussion on the matter, the Commission feeling that they could do nothing unless their offer was accepted, in which case the money could be paid within two or three days. It was finally agreed that Mrs. Shaver should be offered $1,000.00 in cash as a settlement, not because the Commission felt the property was worth the additional amount, but in order to avoid the condemnation proceedings, which would cost approximately $300.00 in addition to the $750.00 already offered for this property. Mrs. Shaver stated that she would agree to this with the understanding that the Commission would also pay the taxes for the past year and allow her to have an exit and entrance to her property. On motion by Mr. Jelin, seconded by Mr. Kidde, the Commission authorized that Mrs. Shaver should be paid $1,000.00, her taxes for the past year, and should be granted permission for an entrance and exit to her property under a proper agreement satisfactory to both parties.

Route #4,Sec. 20, Manasquan-Sea Girt.

Mr. McGreevey and Mr. O'Connor next appeared before the Commission in reference to their low bids on the construction of Route #4, Section #20, Manasquan River-Sea Girt. Upon being asked for a statement of their general experience, they stated that they were a new firm and this was the first job on which they had bid as partners; that both had considerable experience in construction work as foremen and superintendents. They stated that they did not have any plant at the present time but felt that they could obtain same and meanwhile were planning to go ahead with the drainage and pipe work. They also presented statements showing their net worth, on which their assets were chiefly in the form of real estate. Mr. Kidde suggested that before the Commission give a decision on this matter, that Mr. McGreevey have the Manasquan Bank forward a notice to the Commission before four o'clock of this day as to their standing and the amount they could borrow, the matter of award being held up until this information was received.

Route #13,Sec.#5, Lawrenceville-Trenton.

The State Highway Engineer submitted the following report on bids received for the construction of Route #13, Section #5, Lawrenceville-Trenton, and recommended that the contract be awarded to the low bidder, James J. Barrett:

James J. Barrett	Trenton	92.1%
Utility Const.Co.	New Brunswick	97.75
Ross & Whelan	Trenton	98.7
Standard Bithulithic Co.	New York City	98.7
N. J. Const.Co.	Hackensack	103.2
Jos. F. Burke	Plainfield	104.9

On motion by Mr. Jelin, seconded by Mr. Kidde, the Commission adopted the following resolution for award of contract:

RESOLVED, that the contract for the construction of Route 13, Sec. 5, Lawrenceville-Trenton section, be and the same is awarded to James J. Barrett of Trenton, New Jersey, the low bidder, at 92.1% of the Engineer's estimated units of cost, said bid amounting to $331,431.06, and

BE IT FURTHER RESOLVED that the Chairman is authorized to sign the necessary contracts as approved by the State Highway Engineer.

Luppatcong Creek Bridge, Route #4.

Mr. J. P. Clarke next appeared in reference to his bid for the construction of the new abutments and approaches at the Luppatcong Creek Bridge on Route #4. Mr. Clarke stated that he felt that he made an error in his fugures and did not feel that he would be able to carry the contract to a satisfactory conclusion if awarded to him. He asked that the Commission reject his bid and if possible return his certified check which accompanied same. Mr. Clarke was informed that a decision would be reached later in the day and Mr. Kidde suggested that the second low bidders, Bentley-Morrison Corporation be requested to have a representative present at the afternoon session to determine their ability for carrying on this work.

Long Valley-Hunterdon Co.Line Rd.
M.V. ~~State~~ Aid- Morris County.

A delegation from the Morris County Board of Freeholders next appeared consisting of Mr. Hopkins, County Engineer; Mr. Estler and Mr. Fritts. Mr. Estler spoke for the delegation stating that the Board of Freeholders had by unanimous vote at its last meeting decided to request the Commission to transfer the sum of $25,000.00 standing to the credit of East Main Street, Boonton, to the improvement of the Long Valley-Hunterdon County Line Road. Mr. Jelin stated that the Commission had already apportioned $28,000.00 of State Aid for this road, and an additional $7,000.00 when it was decided to construct an additional two foot width, and that the $10,000.00 from the Motor Vehicle Funds was to be applied on this work. Mr. Kidde moved that the Commission approve of the transfer of an amount sufficient to complete the State's share of 40% of the cost of the construction of the Long Valley-Hunterdon County Line Road, from the $25,000.00 standing to the credit of East Main Street,Boonton, the remainder not necessary to complete the said 40% share to remain to the credit of East Main Street, Boonton, or such other road as might be designated by the Commission. This was seconded by Mr. Jelin and adopted.

Route #16, Alignment.

Mr. Strauss and Mr. Eames appeared before the Commission to make a protest against a proposed change in alignment of Route #16, in the vicinity of Van Dorn's Mills. They were informed that this matter should first be discussed with the Construction Engineer and if necessary a hearing would be given them at the afternoon session.

New Lisbon - Four Mile Road.

The matter of the claim of A. J. Milmoe on account of gravel from the Staffordville Pit which was used in connection with his contract for the construction of the New Lisbon-Four Mile Road was next considered. On motion by Mr. Jelin, seconded by Mr. Kidde, the Commission authorized that Mr. Milmoe be allowed 50% of his claims in accordance with the recommendation of the State Highway Engineer, it being understood that he will furnish the Commission with a final and complete release of all claims in consideration of this allowance. This sum being an addition to allowance already made on claims presented.

Maps

The Secretary advised that he had received a letter advising that the large scale maps had been shipped on August 27th, and that same would be received within a few days. No action was required in this connection.

The matter of the supply of small detour maps was taken up, the Commission being informed that the supply was practically exhausted and that additional requests were still being received. On motion by Mr. Kidde, seconded by Mr. Jelin, the Commission directed that an additional ten thousand copies be procured.

Route #9, Sec. B, Plainfield.

The Secretary presented a communication from Mr. A. W. Vars, City Engineer of Plainfield, advising that the work on Route #9, Section B, Plainfield, was completed and ready for inspection and acceptance by the Commission. On motion by Mr. Kidde, seconded by Mr. Jelin, the Commission referred this matter to Mr. Stewart for inspection and report to the Commission at a later meeting.

Route #18.

The Secretary presented a communication from Mr. J. E. Thier, Supervisor of Roads in Bergen County, stating that he would try and arrange an appointment with Mr. Rionda for next week in order to go over conditions on Route #18 in Bergen County. On motion by Mr. Kidde, seconded by Mr. Jelin, the communication was ordered acknowledged with thanks and Mr. Thier advised that some members of the Commission will be ready to go with him when the arrangements are completed.

Bridge at New Brunswick. Rt. 1

General Scott presented a clipping taken from the State Gazette of Trenton which contained information as to work that is proceeding at the Women's College in New Brunswick. This was presented for information only.

Route #4, Drainage.

The Secretary presented a resolution from the Monmouth County Board of Freeholders concerning drainage conditions on Route #4, at West Long Branch and Oakhurst, requesting that the State Highway Commission designate some of its engineers to confer with the County Engineer for the purpose of planning proper drainage. Mr. Kidde moved that the Monmouth County Board of Freeholders be advised that the State Highway Engineer has gone into this matter and considers the change as desirable, but that the responsibility of the Commission in the carrying out of same is negligible. This was seconded by Mr. Jelin and adopted.

Meetings

The Secretary presented a communication from the Board of Freeholders of Gloucester County, inviting the Commission to be present at a meeting of the State Association of Boards of Freeholders to be held at the Normal School, Glassboro, on September 10th. Mr. Kidde moved that the invitation be accepted and that as many of the Commissioners as possible arrange to attend the dinner and meeting. This was seconded by Mr. Jelin and adopted.

Proposed Routes.

The Secretary presented a resolution from the Board of Freeholders of Gloucester County, requesting the Commission to take over and construct the road by way of Malaga to Millville and from Malaga to Downstown. There was a considerable discussion as to the various routes that have been suggested in this connection and the Commission was in doubt as to which was the most important. Mr. Kidde moved that the State Highway Engineer be directed to prepare a map showing the various routes proposed to be taken over, together with a report to be submitted as to which were considered the most important. This was seconded by Mr. Jelin and adopted.

Gloucester County Inspection. ✓

The Secretary presented a communication from the Board of Freeholders of Gloucester County, requesting that the Commission set a date when it will visit Gloucester County for the purpose of going over the county roads. In this connection, Mr. Kidde suggested that the matter be taken up with the Board of Freeholders to determine if it would not be possible for someone to take them over the county roads on Spetember 10th, following the dinner of the State Association of Freeholders in Glassboro.

Right of Way, Route #5. ✓

The State Highway Engineer presented a report in connection with the acquisition of the property of Edward B. Emory on Route #5, at Buttzville, and requested that the Commission authorize the making of another offer of $3500 as had been previously done. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission authorized the State Highway Engineer to make another bid of $3500 on the property of Edward B. Emory on Route #5 at Buttzville.

The Commission recessed for luncheon at 1.30 P.M. to meet again in regular session at 2.30 P.M.

The Commission reconvened at 2.30 P.M. as agreed, with the same members present as at the morning session.

Route #11, Main Street, Clifton. ✓

The State Highway Engineer presented the matter of approval of the contract for Main Street, Clifton, on which two bids were received, the low bid being by George F. Brackett. He stated that he would not recommend approval as he felt that there had not been sufficient competition and the price for the pavement was too high. Mr. Kidde moved that Passaic County be advised that the Commission rejected approval of this contract due to the high cost of pavement and lack of sufficient competition, and that they be advised to readvertise same making an eight inch reinforced concrete road as an alternate, and that a list of prices received on similar work in that vicinity be forwarded to them. This was seconded by Mr. Jelin and adopted.

Route #14, Sec. #7, Petersburg-Greenfield.

The State Highway Engineer recommended that an extension of time be granted to Ross & Whelan on their contract for the construction of Route #14, Section #7, from July 23rd to date, this work having been opened to traffic on July 3rd. On motion by Mr. Jelin, seconded by Mr. Kidde, the Commission approved of the granting of an extension of time to Ross & Whelan on their contract for the construction of Route #14, Section #7, from July 23rd to August 28th, 1923.

Crown Point Road, Gloucester County.

Mr. William Cattell, County Engineer of Gloucester County appeared and requested that the Commission approve of the contract for the Crown Point Road, on which the low bid had been submitted by the Union Paving Company at $57,448.50 for a sheet asphalt surface. On motion by Mr. Jelin, seconded by Mr. Kidde, the Commission approved of the award of contract for the Crown Point Road, by Gloucester Co., upon recommendation of the State Highway Engineer.

Route #4, Section #16, Toms River.

The State Highway Engineer recommended that the Commission approve of the extension of time to December 1st, 1922, as granted by the Ocean County Board of Freeholders to the Public Service Production Company on their contract for the construction of Route #4, Section #16, Toms River. On motion by Mr. Kidde, seconded by Mr. Jelin, the Commission approved of the extension of time to December 1st, 1922, on the contract of the Public Service Production Company for the construction of Route #4, Section #16, Toms River.

Route #9, Sec. 8, Somerville-North Branch, Route #16, Sec. 3, Bedminster-Pluckemin.

State Highway Engineer Sloan submitted a letter from the Board of Freeholders of Somerset County, stating that they were prepared to grant extensions of time to Ralph Sangiovanni on Route #9, Sec. 8, and Route #16, Section #3, if it were agreeable to the State Highway Commission. Mr. Jelin moved that the Board of Freeholders be advised that the Commission will not approve of such extensions. This was seconded by Mr. Kidde and adopted.

Route #14, Sec. 7, Petersburg-Greenfield. ✓

The State Higway Engineer recommended the acceptance of Rt. 14, Section #7, Petersburg-Greenfield, as constructed under contract of Ross & Whelan, the same having been inspected on August 24th. On motion by Mr. Jelin, seconded by Mr. Kidde, the Commission accepted the completed work of construction on Route #14, Section #7, Petersburg-Greenfield.

Route #4, Perth Amboy. ✓

The State Highway Engineer recommended that partial payment be made on account of the construction of Route #4, connecting link, Perth Amboy, in the amount of $18,075.31, being 47% of the amount paid to the contractor on account of the above construction to June 29, 1923. On motion by Mr. Jelin, seconded by Mr. Kidde, the Commission approved of the making of a partial payment on account of the construction of Route #4, connecting link, Perth Amboy, in the amount of $18,075.31, and adopted the following resolution:

> WHEREAS, the State Highway Commission did by resolution of December 7th, 1922, approve of a contract for the construction of an extension of State Highway Route #4, known as Amboy Avenue, the contract having been awarded by the City of Perth Amboy to Graham & McKeon at a contract amount of $158,216.62, and
>
> WHEREAS, by the same resolution did authorize the setting up of the sum of $75,000.00 as the State's share of the cost of the said construction of the extension of State Highway Route #4, in Perth Amboy, and
>
> WHEREAS, it has been certified to the State Highway Commission by the City of Perth Amboy that work has been performed to the amount of $35,601.72, and request has been made by the City of Perth Amboy for a partial payment on account of the said work as performed,
>
> NOW, THEREFORE, BE IT RESOLVED, by the State Highway Commission of the State of New Jersey that the Commission does hereby approve of the payment of the sum of $18,075.38 as the State's share of cost of the work performed and do hereby request the Hon. N. A. K. Bugbee, Comptroller of the State of New Jersey, to draw his warrant against the State Road Fund in favor of the Treasurer of the City of Perth Amboy in the sum of $18,075.39.

Route 13, Sec. 6, Lawrenceville-Princeton. ✓

The State Highway Engineer requested that the Commission grant authority to enter into an agreement with the Lawrence Township authorities for work through Lawrenceville. Mr. Kidde moved that the Commission authorize the execution of an agreement with Lawrence Township along the lines as heretofore approved, and offered the following

AUG 2 3 1923

2329

resolution concerning the performance of thw work in Lawrenceville:

WHEREAS, by an Ordinance duly adopted by the Township Committee of the Township of Lawrence in the County of Mercer and State of New Jersey on or about February 16, 1899, the Trenton Street Railway Co. was authorized to construct, maintain and operate a street railway and to use electricity and electric motors as the propelling power of its cars, in, upon and along the public highway known as the Lawrenceville Road in said Township of Lawrence; and,

WHEREAS, with reference to that portion of said street railway which is described in said Ordinance as follows, "where the tracks pass through the village of Lawrenceville, beginning at the school property and continuing through the village to the Presbyterian church", it was required by said Ordinance that the track should be constructed of nine-inch girder rails and that said rails should be laid eight feet from the curb line on the right hand side of the road going towards Princeton; and,

WHEREAS, by an Ordinance adopted on or about February 20, 1899, the Board of Chosen Freeholders of Mercer County granted to the said Trenton Street Railway Co. leave and permission to construct, maintain and operate said street railway; and

WHEREAS, after the passage of the two Ordinances aforesaid, the said Trenton Street Railway Co. constructed a line of street railway, with the necessary poles and overhead structures, in accordance with the terms and provisions of said Ordinance and under and by virtue of the authority conferred by the same, and ever since has been and now is operating and maintaining said street railway in the manner authorized by said Ordinances; and,

WHEREAS, since the passage of said Ordinances and the construction of said street railway, the State Highway Commission of New Jersey, acting by virtue of the authority conferred upon it by law, has taken over the said Lawrenceville Road as a State Highway and is about to lay an improved pavement thereon, and has determined to change the location of the tracks and the type of rail of said street railway as the same runs through the said village of Lawrenceville; and to change the location of the tracks at other places in the Township of Lawrence, all as shown on plans attached hereto;

NOW, THEREFORE, BE IT RESOLVED by the State Highway Commission

1. That the State Highway Commission will relocate and rebuild a portion of said track, including necessary poles and overhead, for a distance of approximately 4500 feet in length as the same passes through the village of Lawrenceville, the portion so to be relocated and rebuilt being shown on a certain map or plan attached hereto and on file in the office of the State Highway Commission, which shows the location of both the old track and the new track, with pole locations for necessary overhead, herein provided for, and which is hereby made a part of this Ordinance.

2. That in relaying said tracks through the village of Lawrenceviile said State Highway Commission will use T rail of standard section weighing between 80 and 100 pounds per yard instead of nine-inch girder rail, and will use Dayton resilient ties or creasoted ties, and that the cost of said rail and ties and of track fastenings, not to exceed the sum of Fifteen thousand dollars ($15,000.00), shall be assessed against and

borne by the said Trenton Street Railway Co., which is hereby given two years to reimburse said State Highway Commission for the same.

3. That the franchise of the said Trenton Street Railway Company and all the terms thereof are to remain in full force and effect, excepting as to the location of the tracks in the Township of Lawrence as hereinbefore stated.

This was seconded by Mr. Jelin and adopted.

Requests for Aid.

The State Highway Engineer submitted a report in connection with the request for aid by the Middlesex County Board of Freeholders in the construction of the Old Bridge-Matawan Road and recommended that Middlesex County be advised that the State Highway Commission has no funds at the present time to aid in this project, but that the matter will be given due consideration in the report now being prepared by the Advisory Board on alternate shore routes. On motion by Mr. Jelin, seconded by Mr. Kidde, the Commission approved of the recommendation of the State Highway Engineer in this matter.

Right of Way, Route #4, Sec. #21.

The State Highway Engineer submitted a proposed agreement for the purchase of property on State Highway Route #4, Section #21, Point Pleasant to Laurelton, from Z. P. VanNote, for the amount of $2,000.00, and recommended the approval of same. On motion by Mr. Jelin, seconded by Mr. Kidde, the Commission approved of the purchase of property on Route #4, Section #21, Point Pleasant to Laurelton, from Z. P. VanNote for the sum of $2,000.00.

Right of Way, Route #4, Sec. #19, Sea Girt - Belmar.

The State Highway Engineer recommended approval of acquisition of property on Route #4, Section #19, Sea Girt to Belmar. There was some discussion as to the prices to be paid for this property. Mr. Meeker was asked to come before the Commission and stated that while the prices seemed high, the appraisals had been made by competent real estate men and represented the actual price being paid for lots in that vicinity. Major Sloan stated that he had recommended the purchase of same in order not to hold up the work on this section. On motion by Mr. Jelin, seconded by Mr. Kidde, the Commission approved the purchase of the following property on Route #4, Section #19, Sea Girt to Belmar, at the prices listed:

Parcel #1,	Arthur Sanford,	consideration	$2,245.00
" 2,	William H. Carpenter,	"	1,000.00
" 5,	George G. Titis	"	2,750.00
" 3,	Arthur M.D.Carpenter,	"	2,000.00

Right of Way, Route #16, Sec. 5.

The State Highway Engineer recommended acceptance of agreement with Elsie Gallaway, for Parcel #6, on Route #16, Section #5, for the sum of $1.00. On motion by Mr. Jelin, seconded by Mr. Kidde, the agreement with Elsie Gallaway in the sum of $1.00 for Parcel #6, on Route #16, Section #6, was approved.

Right of Way, Route #4, Section #20.

The State Highway Engineer submitted property purchase agreements for Parcels 2, 3 and 4, on Route #4, Section #20, the property being required for the Manasquan Grade Crossing elimination, the agreement being with Pearce and Parker in the sum of $12,000.00. He recommends that an offer of $1,273.00 be made for this property and in the event of their refusal to accept same, that Condemnation Proceedings be authorized. On motion by Mr. Jelin, seconded by Mr. Kidde, the Commission approved of the recommendation of the State Highway Engineer and authorized that an offer of $1,273.00 be made for this property, and in the event of their refusal of same, that Condemnation be proceeded with.

Right of Way, Route #4, Section #20.

The State Highway Engineer submitted property purchase agreements with T. Tasso Fischer for property on Route #4, Section #20, in the sum of $4,000.00, and recommended that an offer of $1,230.00 be made Mr. Fischer and in the event of refusal of same that Condemnation Proceedings be authorized. On motion by Mr. Jelin, seconded by Mr. Kidde, the Commission approved of the recommendation of the State Highway Engineer, and authorized that an offer of $1,230.00 be made Mr. Fischer, and that in the event of his refusal of same that Condemnation be proceeded with.

Route #9, Section #11.

The State Highway Engineer submitted a report in connection with Route #9, Section #11, in accordance with the resolution received from the Mayor and Council of the Borough of Middlesex, requesting that the State Highway width on Route #9, Section #11, Bound Brook Road, from Lincoln Avenue to the line of the Borough of Dunellen, be graded for a full forty foot width and that the tracks of the Public Service Railway Company be moved to the center of the highway and the pavement placed on each side thereof, and recommended that the Borough of Middlesex be advised that this was entirely a local proposition in which the Commission has no responsibility. On motion by Mr. Kidde, seconded by Mr. Jelin, the Commission approved of the recommendation of the State Highway Engineer in this matter.

Equipment- Storage Charge.

The State Highway Engineer submitted a report in connection with the storing by the State Police of stolen automobiles in the State Highway Department garages, and recommended that the department be authorized to make a charge against other State Departments for services rendered, such charge to be commensurate at least with the actual cost to this department of the service rendered. On motion by Mr. Kidde, seconded by Mr. Jelin, the Commission authorized that the Highway Department make a charge against other State Departments for such services, said charge to be at least commensurate with the actual cost to this department, and that negotiations be entered into with the various departments to determine the responsibility for the charges.

Kaighn Ave., Extension, Camden Co.

The State Highway Engineer recommended approval of contract for Kaighn Avenue, Extension (Browning Road to Marlton Pike) Camden County Motor Vehicle Aid. On motion by Mr. Kidde, seconded by Mr. Jelin, the Commission approved of the contract for Kaighn Avenue Extension (Browning Road to Marlton Pike) Camden County Motor Vehicle Aid, the funds having been already provided.

Belmont Avenue, Passaic Co. State Aid

The State Highway Engineer recommended approval of extension of time to June 15, 1923, on Belmont Avenue, Passaic County, State Aid. On motion by Mr. Jelin, seconded by Mr. Kidde, the Commission approved of an extension of time to June 15, 1923, on Belmont Avenue, Passaic County, State Aid.

Township Aid-Voorhees Township, Camden County.

The State Highway Engineer recommended that $4500 granted to the Township of Voorhees, Camden County, for the construction of the Haddonfield-Kresson Road, be transferred to the Gibbsboro-Kresson Road, in accordance with the application of the Township Committee. On motion by Mr. Kidde, seconded by Mr. Jelin, the Commission approved of the transfer of $4500 from the Haddonfield-Kresson Road to the Gibbsboro-Kresson Road, Voorhees Township, Camden County.

Township Aid, Delaware Township, Hunterdon County.

The State Highway Engineer recommended approval of application for additional township aid in the sum of $1,650.00 on the Rosemont-Stockton Road, Delaware Township, Hunterdon County, funds to be taken from the cancellation fund of the Township Aid Account. On motion by Mr. Kidde, seconded by Mr. Jelin, the Commission approved of the application for Township Aid on the Rosemont-Stockton Road, Delaware Township, Hunterdon County, funds to be taken from the cancellation funds of the Township Aid Account.

Wildwood Jct. -Dias Creek Road, Middle Township, Cape May County.

The State Highway Engineer recommended approval of Force Account Agreement and final statement on Wildwood Junction-Dias Creek Road, Middle Township, Cape May County, Township Aid. On motion by Mr. Kidde, seconded by Mr. Jelin, the Commission accepted the Wildwood Junction-Dias Creek Road, Middle Township, Cape May County Township Aid, and directed final payment.

Norbury Landing Road, Middle Twp. Cape May County.

The State Highway Engineer recommended approval of the final statement and acceptance on the Norbury Landing Road, Middle Township, Cape May County Township Aid. On motion by Mr. Kidde, seconded by Mr. Jelin, the Commission approved of the final statement and acceptance of the Norbury Landing Road, Middle Township, Cape May County Township Aid.

Township Aid, Evesham Twp.Burlington Co.

The State Highway Engineer recommended approval of transfer of funds in the sum of $1,000.00 from the Evans-Westcott and Evesboro-Camden Roads to the Marlton-Kresson Road, all in Evesham Township,

AUG 28 1923

Burlington County, Township Aid. On motion by Mr. Kidde, seconded by Mr. Jelin, the Commission approved of the transfer of funds from the Evans-Westcott and Evesboro-Camden Roads to the Marlton-Kresson Road, all in Evesham Township, Burlington County, Township Aid.

Employments

The State Highway Engineer submitted a report in the matter of employments sine3 the last meeting and recommended the approval of same. On motion by Mr. Jelin, seconded by Mr. Kidde, the following employments were approved:

Aug. 20, 1923	R. A. Williams,	Jr. Inspector	$125.00 mo.
" 14, "	John McMullen,	" "	125.00 mo.
Sept. 1, "	W. R. Ketels,	Res. Hway. Engineer	240.00 mo.
Aug. 21, "	Whitney Norton,	Mechanic	.60 hr.
" 21, "	Henry Brackel,	"	.60 hr.
" 21, "	Elmer Parsons,	M.T.D.	.40 hr.

Right of Way, Route #16, Sec. 5.

The Rev. M. Maniguian appeared before the Commission in reference to the acquisition of his property on Route #16, Section #5, on which condemnation has been authorized. After a statement of his protest, Rev. Maniguian was informed that this matter should be taken up with the Construction Engineer and Right of Way Engineer, who would give him the correct advice as to same.

Laurel Ave.,Essex Co. State Aid.

Mr. Kidde reported that he had inspected Laurel Avenue, Essex County State Aid and would move the acceptance of same. This was seconded by Mr. Jelin and adopted and final payment authorized.

Luppatcong Creek Bridge, Rt. #4.

Mr. Davies of the Bentley-Morrison Corporation, second low bidders on the Luppatcong Creek Bridge, appeared and gave a statement as to the ability of their company and a resume of the work which they had done. He stated that they were ready to take the contract and believed that they could carry it to a satisfactory conclusion. After some discussion, Mr. Kidde moved that the bid of the low bidder be rejected and that his certified check be returned, due to the fact that he was not a responsible bidder. State Highway Engineer Sloan recommended that the contract be awarded to the second low bidder after presenting the following report of bids received:

J. P. Clarke	$ 23,000.00
Bentley-Morrison Corp.	29,995.00
Gust Wickberg.	35,333.14
Grant & Driver	36,778.49
R. J. Mansfield.	36,980.00
F. W. Schwiers, Jr. Co.	37,587.00
S. S. Thompson & Co. Inc.	38,800.00
Louis J. Sieling	38,880.00
Tuller Construction Co.	44,740.00
Arnolt-More, Inc.	49,000.00
O'Gara Construction Co..	61,000.00

Engineer's Estimate - - $30,135.25

Mr. Kidde moved the adoption of the following resolution:

RESOLVED, that the contract for the construction of Luppatcong Creek Bridge, Route #4, be and the same is hereby awarded to Bentley-Morrison Corporation, of Elizabeth, New Jersey, the lowest responsible bidder at $29,995.00, and

BE IT FURTHER RESOLVED, that the Chairman is authorized to sign the necessary contracts as approved by the State Highway Engineer.

This was seconded by Mr. Jelin and adopted.

Fredon-Stillwater Road, Sussex Co.

The State Highway Engineer presented plans and specifications for the Fredon-Stillwater Road, Section #2, and 2A, Sussex County, township aid, and recommended approval of same. On motion by Mr. Jelin, seconded by Mr. Kidde, the Commission approved of the plans and specifications for the Fredon-Stillwater Road, Sections 2 and 2A, County of Sussex, township aid, the funds having already been set up.

Route #4, Sec. #20, Manasquan River-Sea Girt

The Secretary read a report which had been received from the Manasquan Bank in reference to Mr. McGreevey. The State Highway Engineer presented the following report of bids received and reported that he could not recommend the award to McGreevey & O'Connor due to their lack of experience, believing that it would be too much of a risk:

McGreevey & O'Connor	94%
Inter-State Construction Co.	99.5
Michael Staub	101
Gibbs-Mueller Co	101.4
Charles T. Kavanagh	101.68
Sutton & Corson Co	102.4
Thompson & Glickman	103
S. S. Thompson & Co	104.7
New Jersey Construction Co	105.8
Joseph F. Burke	109.3

There was a considerable discussion of this matter, the Commissioners feeling that they should not reject all these bids unless absolutely necessary. Mr. Jelin finally moved that the contract be awarded to the low x bidder and offered the following resolution:

RESOLVED, that the contract for the construction of Rt. 4, Sec. 20, Manasquan-Sea Girt, be and the same is hereby awarded to McGreevey and O'Connor of Manasquan, the low bidder at 94% of the Engineer's estimated units of cost, and

BE IT FURTHER RESOLVED, that the Chairman is authorized to sign all the necessary contracts as approved by the State Highway Engineer.

This was seconded by Mr. Kidde and adopted.

Cement -- Foreign Supply

Mr. Kidde presented a letter which he had received from the Industrial Oil Company of Hackensack, in reference to the use of Belgian Cement by the State Highway Commission, and moved that same be acknowledged and referred to the State Highway Engineer for investigation. This was seconded by Mr. Jelin and adopted.

Township Aid

State Highway Engineer Sloan brought up the matter of distribution of township aid in those counties in which the allotments had not already been made, presenting a schedule showing the applications as made by the various counties and his recommendations thereon. In this connection, Mr. Kidde inquired if the Commission had any choice in the selection of roads on which this money is to be used, and was advised by the State Highway Engineer that the Commission has no jurisdiction where the amount requested is below the $25,000.00 allowed to each county. Where the total applications amount to more than $25,000.00, the Commission has the Commission has the right to decide on which roads an amount up to $25,000.00 shall be allotted. After a considerable discussion of the matter, Mr. Kidde moved that the following applications be approved in the counties where the applications amounted to more than $25,000.00:

Burlington County,	Crosswick-Chesterfield,Sec. 1,	$ 7,163.73
" "	Chambers Cor.-Jobstown	10,336.27
" "	Hancocks Cor.-Jobstown	750.00
" "	Marlton & Kresson Road	3,000.00
" "	Naylor's Corner	3,750.00
Gloucester County,	Tomlin Station Rd.,Sec. 2	3,000.00
" "	Pitman-Richwood-Mullica Hill, Section 1	4,500.00
" "	Swedesboro-Harmoney School	4,500.00
" "	Bridgeport-Gibbstown	3,000.00
" "	Glassboro Road	7,750.00
" "	Bridgeport-Mullica Hill	2,250.00
Hunterdon County	River Road	5,000.00
" "	Barbertown-Delaware Line Rd.	20,000.00
Mercer County	Old York Road	12,500.00
" "	Franklin Cor. Road	9,200.00
" "	Province Line Road	3,300.00
Monmouth County	Bangs Avenue	12,000.00
" "	Road from Church Cor. at New Monmouth to Middletown State Highway	7,000.00
" "	Allenwood-Lakewood	6,000.00
Salem County	Telegraph Road	4,500.00
" "	Acton Station Road	4,500.00
" "	Willow Grove Road	1,500.00
" "	Garden Road	2,500.00
" "	Daretown-Woodstown	4,500.00

Salem County	Harrisonville-Lighthouse-Cemetary	$ 7,500.00
Sussex County	Tranquillity-Andover	18,586.66
" "	Hainesville-Montague	6,413.34
Warren County	Carpenterville-Alpha	7,000.00
" "	Brass Castle Road	9,000.00
" "	Haxen-Cornish Road	9,000.00
Camden County	Blue Anchor-Brooklyn-Sicklerville	12,000.00
" "	Spring Road	2,100.00
" "	Walker Road	2,700.00

This was seconded by Mr. Jelin and adopted.

Township Aid - General

Mr. Kidde moved that Mr. Reed be directed to communicate with the other counties in which the applications do not total $25,000.00 requesting that they forward additional applications to bring the total up to the $25,000. in order that the Commission may exercise some choice as to roads on which the money is to be used, and that he present a report on same at the next meeting. This was seconded by Mr. Jelin and adopted.

Township Aid, Pittsgrove Twp., Salem Co

On motion by Mr. Jelin, seconded by Mr. Kidde, there was apportioned to Garden Road, Pittsgrove Township, Salem County, the sum of $2500.00 from the township aid savings account, this together with the $2500.00 of 1924 moneys making a total of $5,000.00 of township aid to be apportioned to Pittsgrove Township, Salem County, for the use of Garden Road.

Alpha Borough Road

Mr. Jelin presented the matter of the request of Alpha Borough for aid to the extent of $25,000.00 in the construction of road through that Borough, which road had been used as a detour during the construction of Route #9, He moved that $25,000.00 be contributed toward this plan which he understands involves a total expenditure of $75,000.00 on this road, and that they be requested to submit the entire proposition to the Commission for approval of the plans and specifications. This was seconded by Mr. Kidde and adopted, the funds to be taken from the motor vehicle account.

On motion by Mr. Jelin, seconded by Mr. Kidde, the Commission adjourned at 5:30 to meet in regular session on September 11th, 1923.

Respectfully submitted,

A. Lee Grover, Secretary.

SEP 11 1923

2338

MINUTES OF MEETING- September 11, 1923.

A regular meeting of the State Highway Commission was held at the office of the Commission, Broad Street Bank Building, Trenton, New Jersey, on Tuesday, September 11, 1923. The meeting was called to order at 11:00 A.M.

Present: General H. L. Scott, Chairman, Mr. Walter Kidde
and Mr. Percy H. Stewart.

Absent: Mr. Jelin.

Route 11, Main St., Clifton, Sections 1 and 2.

Mr. Edward Maxson, Commissioner of Banking and Insurance, appeared before the Commission, representing Mr. W. T. Brackett, the contractor on Route 11, Main St., Clifton, Passaic County, which contract the Commission had refused to approve. Mr. Maxson stated that he had gone into this matter quite thoroughly and his opinion was that the bid was not too high, taking into consideration the conditions which exist on this section as to the trolley tracks and the manner of handling traffic during construction. He urged that the Commission rescind their former action and give permission for Passaic County to approve of this contract. Mr. Garwood Ferguson, County Engineer, was also present and stated that while the bid on this work was higher than they had expected, they felt that the contract should be awarded, inasmuch as the contract for the paving of the trolley tracks had already been awarded and this work was being held up; also the condition of the street was such that something had to be done before the winter set in. Major Sloan stated that he felt that the bid on the asphalt surface on this work was entirely too high and did not see how the Commission could approve the same. He stated, however, that he realized the emergency which existed and the need for this improvement and would recommend that the Commission approve of the contract, with the understanding that the item of sheet asphalt surface pavement be eliminated therefrom at the contract price. Mr. Kidde moved that the recommendation of the State Highway Engineer be approved and that the Commission approve of the award of contract for Route 11, Section 1 and 2, Main Street, Clifton, if the item of sheet asphalt surface is eliminated therefrom at the contract price, it being understood that the sheet asphalt paving will be readvertised next spring and that fullest possible competition will be obtained thereon. This was seconded by Mr. Stewart and adopted.

SEP 11 1923

Bids ✓

The Secretary advised that bids had been advertised on two projects to be received at 11:00 A.M. Standard Time, on this date. On motion by Mr. Kidde, seconded by Mr. Stewart, the regular order of business was suspended in order that these bids might be opened.

Nichol Ave., Extension-
New Brunswick ✓

Bids were received and read for the construction of Nichol Ave. Extension in the City of New Brunswick, the following bids being received, based on Engineer's estimate of $9,732.00.

T. H. Riddle, New Brunswick, N.J.	104%
Utility Construction Co., New Brunswick	100.2

Whites Bridge, Route 8, Section 3 ✓

Bids covering the construction of Whites Bridge over the Pequannock River on Route 8, Section 3, was read, the following bids being submitted:

Arnolt-More, Inc., Newark, N. J.	40,500.00
F. W. Schmiers, Jr. Co., New York	54,500.00
S.S.Thompson & Co., Red Bank, N.J.	[illegible]
L.J.Sieling, Red Bank, N.J.	58,870.00
Linde & Griffith Co., Newark, N.J.	[illegible]

Requests for Aid
Lakewood-New Egypt Road, Ocean Co. ✓

Mr. Kidde moved that the regular order of business be resumed and that Mr. Savage, Director of the Board of Freeholders of Ocean County, who was present, be granted a hearing. This was seconded by Mr. Stewart and adopted. Mr. Savage appeared before the Commission in reference to the Lakewood-New Egypt Road, stating that Ocean County was desirous of improving same and asking whether the Commission would approve of their using a portion of their motor vehicle moneys on this road for the construction of a half width road to be so constructed as to crown, etc., that the other half could be laid at some later date, their idea being that in this way they would be able to improve a longer stretch than would be possible if they attempted to construct a full width pavement, and they felt this would be desirable inasmuch as this road is practically impassable at certain times of the year. Mr. Kidde inquired as to when they felt they would be able to complete this project and after a considerable discussion as to this and as to the question of whether it would be possible to protect the edge of this half width pavement until such time as the other half was laid,

SEP 11 1923

Mr. [illegible] was advised that he should go over this whole matter with Mr. [illegible] to prepare a statement as to the probably expense of the project, the status of their motor vehicle funds, etc. and to submit same to the Commission at a later time.

Cape May-Lewes Ferry ✓

Mr. Kidde reported an interview which he and General Scott had had with the Mayor of Cape May City this morning with reference to the Cape May-Lewes Ferry, who had invited the Commission to come to Cape May and look over the situation. Mr. Kidde further stated that they had advised the Mayor of Cape May City that before meeting with them they would like them to submit a report to the Commission as to what the traffic would be over this Ferry, the results that might be expected from the opening of same, and what type of boat would be necessary. He was further advised that the Commission would be much better pleased with the operation of this ferry as a private enterprise, the Commission to provide the docking facilities and approaches only. The Mayor had advised that he would have a brief prepared and submit same to the Commission within a couple of weeks. This report was for information only, no action being required.

Amboy Bridge-New,
Federal Aid Project #20. ✓

The Secretary advised that bids had been advertised to be received at twelve o'clock noon for the construction of the new Amboy Bridge, Federal Aid Project #20, and on motion by Mr. Kidde, seconded by Mr. Stewart, the Commission suspended its regular order of business to receive bids on the Amboy Bridge. There were three bids submitted and read as follows:

Frederick Snare Corporation, New York City -

Item A:	For entire structure	$3,934,000.00
" B:	With elimination of trolley work	3,890,000.00
" C:	" " " surface pavement	3,872,000.00
" D:	" " " trolley work & surface.	3,838,000.00

Stillman-Delehanty-Ferris Co., Jersey City, N. J.

Item A:	For entire structure	$4,444,696.34
" B:	With elimination of trolley work	4,389,696.40
" C:	" " " surface pavement	4,384,696.14
" D:	" " " trolley work & surface.	4,329,696.14

Patrick McGovern, Inc., New York City.

Item A:	For entire structure	$4,933,011.13
" B:	With elimination of trolley work	4,848,011.00
" C:	" " " surface pavement	4,793,011.00
" D:	" " " trolley work & surface.	4,878,011.00

Mr. Kidde moved that these bids be received and that all the bids be turned over to Mr. C. W. Hudson, Supervising & Designing Engineer, for his study and the submission of a report with recommendations on same at a later meeting of the Commission. This was seconded by Mr. Stewart and adopted.

On motion by Mr. Stewart, seconded by Mr. Kidde, the Commission adjourned for luncheon to meet in regular session at 2:30 P.M.

The Commission reconvened at 2:30 P.M. as agreed with the same members present as at the morning session.

Mr. James of the Federal Bureau of Public Roads who had been present at the opening of the bids on the Amboy Bridge, came before the Commission and was asked for his opinion on the bids that had been received. Mr. James stated that the bids were considerably higher than they had estimated and the acceptance of the low would entail the expenditure of an additional $800,000.00 over that which had been set up for this project. He further stated that he felt that if their Department were asked to share to the extent of an additional $400,000.00 that the first reaction toward same would be unfavorable inasmuch as there was already considerable opposition to the concentration of such a sum in one place. He stated, however, that the matter of the concentration of funds was over on which the Commission must make the first decision, He suggested that if the bridge was readvertised that better results might be obtained by advertising same in three sections, as sub-structure, super-structure, and fill. In this connection Major Sloan stated that he did not feel that same should be divided into more than two parts as the fill would amount to only approximately $100,000.00. Major Sloan further stated that the condition of the present bridge is such that it is hardly possible to hold same for any length of time and he felt that it was very urgent that the work be undertaken at the earliest moment. Mr. Kidde inquired if all the Federal agreements had been signed and was advised that it would be necessary for the final agreement to be executed after the low bid had been accepted, this agreement being subject to revision. Mr. Kidde also inquired if Mr. James thought that approval could be obtained if they decided to do away with the granite facing and take a chance on concrete but was informed that the Federal Government would not advise this as their experience had shown that concrete was not desirable near salt water. Mr. James suggested that if it is decided to readvertise that they wait until spring before doing same as he did not feel that any results would be obtained if same was advertised at once. Asked if he thought that better prices might be obtained through a unit bid, Mr. James stated that their experience had been that somewhat better prices were usually obtained by a unit price bid. After considerable further discussion of the whole matter, Mr. Kidde stated that he did not want to ask Mr. James for a recommendation on the matter but that they would appreciate any suggestions that he might make. Mr. James stated that if they decided to accept the low bid and ask for additional Federal Aid, that he would advise them to do so as he felt that it would be possible to obtain his Department's consent to the use of additional funds on this project, should the Commission feel that they wanted to concentrate such an amount of Federal Aid on one project. Asked what he thought the feeling would be, should they accept the low bid and find the additional money from their own funds, Mr. James advised that he did not feel that there would be any opposition to the acceptance of the low bid.

Commendations

Before leaving the meeting, Mr. James stated that he had visited the Fernwood Service Station and desired to compliment the Commission on same, stating that he had visited a great many but this was the best and most fully equipped one that he had ever seen.

Advisory Board-Camden

The Commission went into a conference at this time in order to discuss the matter of Advisory Board, to study the Camden situation. After a short discussion the meeting was declared open and the State Highway Engineer offered his suggestions as to the personnel of an Advisory Board to study the traffic situation in and around Camden. Mr. Kidde then offered the following resolution and moved its adoption:

"WHEREAS, the importance of the project of taking care of the traffic from the approach or entrance of the new bridge over the Delaware River at Camden and its distribution through Camden City and Points north, east and sough throughout the State is such as to require a special study, therefore,

BE IT RESOLVED that the State Highway Commission does hereby appoint an Advisory Board for the special study of this problem, the said Advisory Board to be composed of Major

William G. Sloan, State Highway Engineer, as Chairman, and Charles Fishberg as Secretary to said Board; the County Engineer of the County of Camden, the City Planning Engineer of the City of Camden, and a member of the Board of Engineers of the Delaware River Bridge Joint Commission, and

BE IT FURTHER RESOLVED, that the Board of Chosen Freeholders of Camden County be requested to designate its County Engineer, that the authorities of the City of Camden be requested to designate their City Planning Engineer, and the Delaware River Bridge Joint Commission be requested to designate a member of its Board of Engineers, the said Advisory Board to give its services to the State without remuneration other than its necessary expenses, in view of the public good to be derived from such work, the technical report to be submitted to the State Highway Commission, and

BE IT FURTHER RESOLVED, that the duties of the said Advisory Board shall be to study the problems presenting themselves in connection with the expeditious and economical handling of the volume of traffic which will converge to and diverge from the entrance to the new bridge over the Delaware River between Camden and Philadelphia throughout the zone in which points of congestion, due to such traffic may occur; to give consideration not only to the probable character and amount of traffic to be expected at the time of the opening of the bridge, but also its future character and amount; to devise plans for handling such probable traffic in accordance with the above, such plans to embrace the location of routes and types of construction, to the State Highway Commission."

This was seconded by Mr. Stewart and adopted. ✓

Advisory Board - Shore Traffic

Mr. Kidde then moved that it be noted that the Advisory Board Study of traffic on Route 4, between Perth Amboy and Asbury Park, was presented by the State Highway Engineer and the Commission is taking the matter up for study and further consideration. This was seconded by Mr. Stewart and adopted.

Biddle Creek Bridge, Route 15,
M.P. 37.0

The State Highway Engineer presented a communication from R. J. Mansfield, contractor on the Biddle Creek Bridge at M.P. 37.0 on Route 15, and recommended that same be accepted. On motion by Mr. Kidde, seconded by Mr. Stewart, the Commission approved of the acceptance of Biddle Creek Bridge at M.P. 37.0 on Route 15, R. J. Mansfield, contractor.

Right of Way, Route 10, Section 1-B

Mr. A. D. Beebe appeared before the Commission in reference to property which has been taken on Route 10, Section 1-B, but on which title has never been acquired. Mr. Meeker advised the Commission that they had not been able to secure title to same due to the fact that they had been misinformed as to the owner of the same. They had offered $1500.00 for the property in the beginning and the taxes and accrued interest would now make the total price $1800.00. He further stated that Mr. Beebe had agreed to furnish a clear title for $2,000.00 if we will convey to him a small triangular strip on the lower portion of the lot, otherwise he would ask $2,250.00, his proposition being that he will accept $2,000.00, giving the Commission until April 1, 1924 to deliver the small triangular portion in lieu of the additional $250.00; otherwise the $250.00 to be paid if the Commission is unable to deliver the small parcel of land. After considerable further discussion of the matter, Mr. Stewart advised Mr. Beebe that inasmuch as the entire Commission was not present they could not give him a definite answer until the matter had been taken up with the entire Commission, and they would endeavor to give him reply after the next meeting.

Route 4, Toms River

The Secretary presented a communication from Hon. Thomas Mathis, State Senator, in refernece to the proposed change of alignment of Route 4, through Toms River, and requesting advice as what is going to be done. State Highway Engineer Sloan presented a report on this matter advising that while this was not in the program for this year, he felt that a new line was desirable as it would eliminate two grade crossings. After some discussion on the matter, Mr. Kidde moved that Senator Mathis' letter be acknowledged and that he be advised that while the matter has not been definitely decided, it is the opinion of the Commission that same new line should be adopted in order to eliminate the two grade crossings. This was seconded by Mr. Stewart and adopted.

Route Numbers ✓

The Secretary presented a letter that had been received by the Chairman from Mr. W. A. VanDuzer of the Pennsylvania State Highway Department, requesting that a conference be arranged with a representative of the Commission in reference to the renumbering of routes in order that a scheme might be worked out whereby inter-state routes would have the same numbers. On motion by Mr. Kidde, seconded by Mr. Stewart, the Commission directed that this communication be acknowledged with the advice that they feel that such a conference would be futile inasmuch as the route numbers in New Jersey are designated by the Legislature and the State Highway Commission has no jurisdiction over same.

Route 4, Manasquan ✓

The Secretary presented a resolution from the Borough of Manasquan together with an agreement covering the extra width pavement to be paid for by the Borough of Manasquan on Route 4 through that Borough. On motion by Mr. Kidde, seconded by Mr. Stewart, the Commission approved of the entering into an agreement with the Borough of Manasquan for the extra width pavement on Route 4 through the Borough of Manasquan, the said extra width to be paid for by the Borough of Manasquan.

Route 4, Alignment ✓

The Secretary presented a communication from Mr. W. L. Morgan, together with a petition concerning the realignment of Route 4, at the Manasquan River, advising that they favored the proposed relocation of the bridge. On motion by Mr. Stewart, seconded by Mr. Kidde, the communication was ordered acknowledged with thanks and placed on file.

Route 4, Alignment ✓

The Secretary presented a communication from Mr. Howard M. Folk, Secretary of the Manasquan River Golf and Country Club, together with a petition favoring the line of Route 4, at the Manasquan River as at present laid out. On motion by Mr. Stewart, seconded by Mr. Kidde, the communication was ordered acknowledged with thanks and placed on file.

Dover-Mt. Freedom Road, Randolph Township, Morris Co.

The Secretary presented a communication from Hon. Arthur Whitney, concerning the application of Randolph Township for aid on the Dover-Mt. Freedom Road. In connection with this matter the State Highway Engineer advised that this was one of the applications from the townships of Morris County which was approved, and recommended that the Commission approve of the allotment as requested. Mr. Kidde moved that the application of Randolph Township, Morris County, for township aid on the Dover-Mt. Freedom Road, to the amount of $12,000.00 State's share, be approved. This was seconded by Mr. Stewart and adopted.

Permits

The Secretary presented a communication from Charles Pettinos of Millville, New Jersey, requesting permission to install a railroad siding to their gravel pits on State Highway Route 15. Mr. Stewart stated that he would like to have some drawings showing the proposed location, together with further information, and moved that the matter be referred to the State Highway Engineer for further investigation and report on same at a later meeting. This was seconded by Mr. Kidde and adopted.

Proposed Routes

The Secretary presented a resolution from the Cape May County Board of Freeholders requesting the early paving with hard surface of the road from Rio Grande to Millville. Mr. Kidde moved that this resolution be acknowledged and the Cape May County Board advised that the matter has been brought to the attention of the Commission and same is being considered together with other requests of a similar nature. This was seconded by Mr. Stewart and adopted.

R. B. Gage - Increase

The Secretary presented a communication from the Civil Service Commission concerning increase in compensation for Mr. R. B. Gage as approved by the State Highway Commission. The Secretary further advised that he had been in conversation with Civil Service Commissioner Devereux this morning who had suggested that the matter be again referred to the Civil Service Commission. On motion by Mr. Kidde, seconded by Mr. Stewart, the Commission directed that this matter be again presented to the Civil Service Commission.

SEP 11 1923

Proposed Routes

State Highway Engineer Sloan presented to the Commission a report on additional routes to be taken over by the Commission, including new routes and those designated by the Legislature at the last session, together with his recommendations thereon. This matter was presented for the information of the Commissioners only in order that they might be able to give same further consideration at a later date.

White's Bridge,
Route 8, Section 3.

The State Highway Engineer reported on bids received this morning for the construction of White's Bridge over Pequannock River on Route 8, Section 3, and recommended that the contract be awarded to the low bidder. Mr. Kidde thereupon offered the following resolution and moved its adoption:

> RESOLVED, that the contract for the construction of Route 8, Section 3, White's Bridge over Pequannock River, be and the same is awarded to Arnolt-More Inc., of Newark, New Jersey, the low bidder for the sum of $40,300.00, and
>
> BE IT FURTHER RESOLVED, that the Chairman is authorized to sign the necessary contracts as approved by the State Highway Engineer.

This was seconded and adopted.

Nichol Ave., Extension, New Brunswick

The State Highway Engineer reported on bids received this morning for the construction of Nichol Avenue Extension, approach to Women's College, New Brunswick, on which T. H. Riddle had submitted the low bid, and recommended that the award of this contract be held over until the next meeting. On motion by Mr. Kidde, seconded by Mr. Stewart, the Commission approved of the State Highway Engineer's recommendation and directed that the award of contract on Nichol Avenue Extension be held over until the next meeting.

Route 4, Section 22, Main St., Asbury Pk.

The State Highway Engineer presented plans and specifications for the construction of Route 4, Section 22, Main St., Asbury Park, and recommended approval of the plans and specifications and order to advertise. On motion by Mr. Stewart, seconded by Mr. Kidde, the Commission adopted the following resolution:

RESOLVED, that the State Highway Commission does hereby approve of the plans and specifications for the construction of Route 4, Section 22, Main St., Asbury Park, and

BE IT FURTHER RESOLVED, that the Chairman is authorized to sign the necessary papers as approved by the State Highway Engineer, and the Chief Clerk is directed to place the necessary advertisements for this work.

Route 9, Section 12, ✓
North Avenue, Plainfield

The State Highway Engineer presented plans and specifications for the construction of Route 8, Section 12, North Avenue, Westfield, and recommended the approval of plans and specifications and order to advertise. On motion by Mr. Kidde, seconded by Mr. Stewart, the Commission adopted the following resolution:

RESOLVED, that the State Highway Commission does hereby approve of the plans and specifications for the construction of Route 8, Section 12, North Avenue, Westfield, and

BE IT FURTHER RESOLVED, that the Chairman is authorized to sign the necessary papers as approved by the State Highway Engineer, and the Chief Clerk is directed to place the necessary advertisements for this work.

Route 8, Section 2, ✓
Montclair-Verona.

The State Highway Engineer presented plans and specifications for the construction of Route 8, Section 2, Montclair-Verona, and recommended the approval of plans and specifications, and order to advertise. On motion by Mr. Kidde, seconded by Mr. Stewart, the Commission adopted the following resolution:

RESOLVED, that the State Highway Commission does hereby approve of the plans and specifications for the construction of Route 8, Section 2, Montclair-Verona, and

BE IT FURTHER RESOLVED, that the Chairman is authorized to sign the necessary papers as approved by the State Highway Engineer, and the Chief Clerk is directed to place the necessary advertisements for this work.

✓
Long Valley-Hunterdon County Line Rd.

The State Highway Engineer submitted a report with recommendation in connection with bids received from the Long Valley-Hunterdon County

Line Road, Morris County, State Aid, paving contract, on which Morris County had rejected all bids and requested the Commission's approval of this rejection. On motion by Mr. Kidde, seconded by Mr. Stewart, the Commission directed that the Morris County Board of Freeholders be advised that the Commission is desirous of discussing this matter in connection with the general road situation in Morris County and suggested that this matter be taken up at the time of the meeting at Morristown on Friday. This was seconded by Mr. Stewart and adopted.

Route 5, Section 8,
Barkers Corner-Great Meadows

The State Highway Engineer submitted a resolution from the Warren County Board of Freeholders, granting an extension of time to Salmon Brothers, on their contract for Route 5, Section 8, for a period of 40 days and recommended that an extension of 20 working days be approved, and that the Board of Freeholders be advised that no further extension will be granted. On motion by Mr. Kidde, seconded by Mr. Stewart, the Commission approved of an extension of time of 20 working days to Salmon Brothers, contractors on Route 5, Section 8, and directed that the Warren County Board of Freeholders be advised that no further extensions will be granted.

Route 10, Section 5,
Hudson St., Hackensack.

The State Highway Engineer recommended that the Commission accept the completed work on Route 10, Section 5, Hudson Street, Hackensack, George M. Brewster & Son, contractors, this work having been before the Commission at an early date, due to deficiency in bituminous content, and the contractor has furnished a guarantee bond for a period of five years from date, guaranteeing the section of road between Stations 38 and 44. In view of the above report, Mr. Kidde moved that the Commission accept the completed work on Route 10, Section 5, Hudson Street, Hackensack, George M. Brewster & Son, contractors. This was seconded by Mr. Stewart and adopted.

Route 4, Section 5-A,
Maple Avenue, Red Bank.

The State Highway Engineer recommended that an extension of time be granted William P. McDonald Construction Company, contractors on Route 4, Section 5-A, Maple Ave., Red Bank, to July 15th, on which date the work was completed. On motion by Mr. Kidde, seconded by Mr. Stewart, the Commission approved of the granting of an extension of time to William F. McDonald Construction Company, contractors on Route 4, Section 5-A, Maple Avenue, Red Bank, to July 15th, the date of completion.

Route 4, Section 5-A,
Maple Avenue, Red Bank.

The State Highway Engineer recommended the acceptance of the completed work on Route 4, Section 5-A, Mapel Avenue, Red Bank, William F. McDonald Construction Company, contractors, the work having been completed on July 15th. On motion by Mr. Stewart, seconded by Mr. Kidde, the Commission accepted the completed work on Route 4, Section 5-A. Maple Avenue, Red Bank, William F. McDonald Construction Company, contractors.

Right of Way,
Route 2, Section 4, Burlington

The State Highway Engineer presented purchase agreements for property on Route 2, Section 4, and recommended purchase of Parcels #1, #1-A, and #1-B, from the U. S. Cast Iron Pipe & Foundry Co. for $887.75. On motion by Mr. Kidde, seconded by Mr. Stewart, the Commission approved of the purchase of Parcels #1, #1-A, and #1.-B, on Route 2, Section 4, Burlington, from the U. S. Cast Iron Pipe & Foundry Co. for the sum of $887.75.

Right of Way,
Route 5, Section 10, Chatham to
Brantwood.

The State Highway Engineer submitted purchase agreement for Parcel #3 on Route 5, Section 10, Chatham to Brantwood, and would recommend purchase of same from Ernest K. and Annie E. Speiden, for the consideration of $500.00. On motion by Mr. Kidde, seconded by Mr. Stewart, the Commission authorized the purchase of Parcel #3 on Route 5, Section 10, Chatham to Brantwood, from Ernest K. and Annie E. Speiden, for the consideration of $500.00.

Right of Way,
Route 4, Section 20, Manasquan-
Sea Girt.

The State Highway Engineer submitted purchase agreements and recommended purchase of Parcel #23, Route 4, Section 20, Manasquan-Sea Girt Section, from H. L. Davis, for the consideration of $384.00. On motion by Mr. Kidde, seconded by Mr. Stewart, the Commission authorized the purchase of Parcel #23 on Route 4, Section 20, Manasquan-Sea Girt, from H. L. Davis, for the consideration of $384.00.

Morris Canal Reports

The State Highway Engineer, in accordance with the request of the State Highway Commission, presented a report from the Bridge Division on the matter of bridges on State Highways over the Morris Canal. Mr. Kidde moved that the report be received and laid on the table for the present, the papers in the matter being referred to Commissioner Kidde to be brought up at a later meeting. This was seconded by Mr. Stewart and adopted.

War Surplus Equipment.

The State Highway Engineer presented an application from the Department of Institutions & Agencies, requesting that the Commission turn over to them two Delco Lighting units for institutional use. In this connection, the State Highway Engineer advised that this Department has six such units taken over as war surplus material, for which this Department has no particular use. Mr. Kidde moved that the Department of Institutions & Agencies be loaned the two sets as requested, the same to be returned upon request, and that they advise the Commission as where the sets are and guarantee good care of same. This was seconded by Mr. Stewart and adopted.

Long Valley-Hunterdon County Line Road

The State Highway Engineer recommended approval of extension of time to July 1, 1923, on the grading contract on the Long Valley-Hunterdon County Line Road, Morris County, this work having been accepted by the Commission and this matter being for completion of records only. On motion by Mr. Kidde, seconded by Mr. Stewart, the Commission approved of an extension of time to July 1, 1923, on the grading contract on the Long Valley-Hunterdon County Line Road, this being for completion of the records only.

Request for Aid, Boro of Frenchtown.

The State Highway Engineer presented a report on the request for aid by the Borough of Frenchtown in the amount of $15,000.00 and recommended that action be held in abeyance pending receipt from Hunterdon County of a request for aid from the 1924 Motor Vehicle funds, in order that the total allotment for Hunterdon County may be appropriated where most needed. Mr. Kidde moved that the recommendation of the State Highway Engineer be adopted, and that the request of the Borough of Frenchtown for aid in the amount of $15,000.00 be held in abeyance, pending receipt from Hunterdon County of a request for aid from the 1924 Motor Vehicle funds.

Washington-Oxford-Karrville Road,
Mansfield Township, Warren Co.

The State Highway Engineer presented specifications and contract for the Washington-Oxford to Karrville Road, Mansfield Township, Warren County, Township Aid, and recommended approval of same. On motion by Mr. Kidde, seconded by Mr. Stewart, the Commission approved the contract and specifications for the Washington-Oxford to Karrville Road, Mansfield Township, Warren County, Township Aid.

Moorestown Pike, Section 2,
Camden County, M.V.A.

The State Highway Engineer recommended approval of contract for the Moorestown Pike, part of Section 2, from Cove Road to Delaware River R. R. Bridge, Camden County, Motor Vehicle Aid, the specifications having been approved on August 3, 1923. On motion by Mr. Kidde, seconded by Mr. Stewart, the Commission approved of the contract for the improvement of the Moorestown Pike, part of Section 2, from Cove Road to Delaware River R.R. Bridge, Camden County, the work to be done from the Motor Vehicle account.

Township Aid Cancellation

The State Highway Engineer recommended cancellation of Township Aid as follows: Crystal Lake Avenue, Haddon Township, Camden County, $500.00; Tabernacle Road, Lower Township, Cape May County, $7.37. On motion by Mr. Kidde, seconded by Mr. Stewart, the Commission approved of the recommendation of the State Highway Engineer for cancellation of the following Township Aid:

Crystal Lake Avenue, Haddon Township, Camden County.....	$500.00
Tabernacle Road, Lower Township, Cape May County........	7.37

Centerville-Three Bridges Rd.
Hunterdon County

The State Highway Engineer recommended approval of an extension of time to October 8th, 1923, on the Centerville-Three Bridges Road, Readington Township, Hunterdon County, Township Aid. On motion by Mr. Stewart, seconded by Mr. Kidde, the Commission approved of an extension of time to October 8th, 1923, on the Centerville-Three Bridges Road, Readington Township, Hunterdon County, Township Aid.

Newton-Swartswood Road, Hampton Township, Sussex County

The State Highway Engineer recommended approval of Township Aid force account agreement for the Newton-Swartswood Road, Hampton Township, Sussex County. On motion by Mr. Kidde, seconded by Mr. Stewart, the Commission approved of force account agreement for the Newton-Swartswood Road, Hampton Township, Sussex County.

Weymouth Road, Landis Township, Cumberland County

The State Highway Engineer submitted final statement of work and expenditures on Weymouth Road, Landis Township, Cumberland County, Township Aid, and recommended approval of same. On motion by Mr. Stewart, seconded by Mr. Kidde, the Commission approved of the final statement of work and expenditures on Weymouth Road, Landis Township, Cumberland County, Township Aid, the work having been done under force account.

Detour-Route 4, Section 10, Sea Girt - Belmar.

The State Highway Engineer submitted a proposed official detour for Route 4, Section 10, Sea Girt to Belmar, and recommended the adoption of same. On motion by Mr. Kidde, seconded by Mr. Stewart, the Commission adopted the following as the official detour for Route 4, Section 10, Sea Girt-Belmar:

> "Beginning at Shark River Bridge and running southerly on F Street, Belmar, approximately 0.7 of a mile to the southerly city line of Belmar; thence southerly on Third Avenue through Wall Township approximately 0.5 miles; thence southerly on Third Avenue in Spring Lake approximately 0.3 miles; thence westerly on Brighton Avenue, Spring Lake, approximately 0.27 miles; thence southerly on Fifth Avenue, Spring Lake, approximately 0.3 miles; thence easterly on Warren Avenue, Spring Lake approximately 0.1 miles; thence southerly on Fourth Ave., Spring Lake, approximately 0.6 miles; thence westerly on Prospect Avenue, Spring Lake, approximately [illegible] of a mile; thence southerly on Wall Street, Spring Lake, 0.15 of a mile; thence westerly on Lake Avenue, Spring Lake, approximately 0.1 miles to bridge over Wreck Pond on Main Street.

Route 13, Section 6,
Lawrenceville-Princeton.

The State Highway Engineer presented an agreement with the Trenton and Mercer County Traction Corporation covering relocation of their tracks in Lawrenceville on Route 13, Section 6, and recommended that the Commission authorize execution of same. Mr. Stewart moved that the Commission approve of the said agreement with the Trenton and Mercer County Traction Corporation covering relocation of their tracks in Lawrenceville on Route 13, Section 6, and that the Chairman be authorized to execute on behalf of the Commission. This was seconded by Mr. Kidde and adopted.

Permits-Traffic Signals ✓

The State Highway Engineer presented a communication from the Borough of Somerville with a request for permission to erect two fixed traffic signals on Route 9, Somerville, and recommended that this request be denied. On motion by Mr. Kidde, seconded by Mr. Stewart, the Commission directed that the request of the Borough of Somerville for permission to erect two fixed traffic signals on Route 9, Somerville, be denied.

Right of Way, Route 2, Sec. 4,
Burlington

The State Highway Engineer submitted purchase agreements and recommended purchase of the following property needed for Right of Way purposes on Route 2, Section 4, Burlington. On motion by Mr. Kidde, seconded by Mr. Stewart, the Commission approved of the purchase of the following property on Route 2, Section 4, Burlington, as recommended:

Parcel #14, Est. Joseph Fleetwood -	consideration.....	$4,011.00
Parcel #13, Burlington Silk Mills -	"	1,000.00
Parcel #12, Jacob Ellis	"	400.00
Parcel # 5, & #5-A, E.H.Russell & Chas.Warner	"	208.40

Right of Way, Route 2, Sec. 4,
Burlington

The State Highway Engineer submitted a report on purchase of Parcel #2, from Kazimierz, required for construction purposes on Route 2, Section 4, on which they refused to negotiate with the Department at our estimate, and recommended that authority be given to make a formal offer of $200.00, and upon refusal, condemnation be instituted. Mr. Stewart moved that the recommendation of the State Highway Engineer

SEP 11 1923

be approved and that authority be granted by the Commission to make a formal offer of $250.00 to Kazimierz & Pauline Czepiel for their property that is required for construction purposes on Route 2, Section 4, and that upon refusal, that condemnation be instituted. This was seconded by Mr. Kidde and adopted.

Route 9, Section 9-A,
Still Valley-Bloomsbury.

The State Highway Engineer recommended that an extension of time of six weeks to October 15th, 1923, be granted to the Bernard E. Tighe Contracting Co. for the completion of their contract on Route 9, Section 9-A, due to the fact that certain conditions show that it is desirable to install some additional pavement, curb and gutter in order to improve drainage conditions. On motion by Mr. Stewart, seconded by Mr. Kidde, the Commission granted an extension of time to the Bernard E. Tighe Contracting Co. for six weeks to October 15th, 1923, on their contract for the construction of Route 9, Section 9-A.

Employments

The State Highway Engineer presented a report of employments made since the last meeting of the Commission and recommended the Commission's ratification of the same. On motion by Mr. Kidde, seconded by Mr. Stewart, the Commission approved of the following employments as made since the last meeting of the Commission.

MINUTES OF MEETING - Sept. 18, 1923.

A regular meeting of the State Highway Commission was held at the offices of the Commission, Broad Street Bank Building, Trenton, on Tuesday, September 18, 1923. The Meeting was called to order by Chairman Scott at 10:30 A. M.

Present: Gen. H. L. Scott, Chairman; Messrs. Percy H. Stewart, Walter Kidde and Abraham Jelin. ✓

Commissioner Kidde, after the meeting was opened, called the attention of the Commissioners to the fact that a complaint had been received by him from the officials of one of the counties to the effect that when they desired to see the Commission at Trenton, it is often necessary for them to wait many hours before being granted an audience, and he moved that the Secretary be directed to write to each of the Boards of Freeholders in the State advising that the Commission desires to relieve them of the annoyance of waiting a long time for a hearing, and would ask their cooperation toward this end by writing the Secretary several days beforehand explaining the nature of the subject to be discussed, when a definite time of appointment will be made; all of this being done in order to expedite the business of the Commission. This was seconded by Mr. Stewart and adopted.

Route 9, Section "B",
Plainfield. ✓

Commissioner Stewart reported that he had made an inspection of Route 9, Section "B" through Plainfield, and he was prepared to recommend the acceptance of same. He, therefore, moved the adoption of the following resolution:

> RESOLVED, that the State Highway Commission does hereby accept the completed work on Route 9, Section "B", through Plainfield, in accordance with the terms of the Reimbursement Act.

This was seconded by Mr. Jelin and adopted.

Route 3, Section 5,
Sussex-Unionville. ✓

Commissioner Kidde reported that he had inspected Route 3, Section 5, Sussex-Unionville Section in Sussex County, Kavanaugh & VanKeuren, contractors, and in view of the fact that he understood that the final papers were not yet entirely satisfactory to the State

Highway Engineer, he would move that the State Highway Commission accept the completed work on Route 8, Section 5, Sussex to Unionville, subject to the final papers coming through in proper shape and satisfactory form. This was seconded by Mr. Stewart and adopted.

Route 5, Section 6,
Speedwell Ave., Morristown ✓

Commissioner Kidde reported that accompanied by Commissioner Jelin and State Highway Engineer Sloan he had attended a hearing which had been held at the Aldermen's rooms, Morristown, on Friday, September 14, 1923, with representatives of the Town of Morristown, headed by Mayor Pettit; with representatives of the Board of Freeholders of Morris County, headed by Mr. Abell: and in addition there were present Senator Whitney, representatives of the Chamber of Commerce of Morristown, and a number of citizens. This hearing was held for the purpose of arriving at some disposition of the trolley track paving through Speedwell Avenue, Morristown, on Route 5, Section 6. Commissioner Kidde informed the Commission that the Town of Morristown had set forth its position, in a communication, stating that it was felt that the municipality had no legal grounds for offering any aid upon a State highway.

The town authorities were advised of a number of instances in which this work had been done through municipalities and partial payment made by the municipal authorities. After general discussion it was suggested by the Freeholders of Morris County that they would be willing to share 15% of the total cost estimated at $120,000.00 if the State would pay 60% and the municipality the remaining 25%. This was followed by a conference of the Mayor and Aldermen of Morristown, after which an offer was made by the city of $20,000.00 in a flat sum instead of the 25% which would be $30,000.00. Both the county authorities and the State Highway Commissioners were unwilling to accept the offer of the municipality and the meeting adjourned without anything definite having been accomplished.

Commissioner Kidde took occasion to answer the criticism made by the municipality that the condition of the tracks was due to the work of the contractor, by saying that the work as completed by the contractor was necessary in order to insure a satisfactory drainage and good grade for the pavement. He further advised that the trolley company authorities had expressed their willingness to raise their tracks to the new grade and to install steel tie construction, and it was further discussed that in the event a suit is undertaken against the Traction Company in the matter of reimbursement for pavement work and an award is given to the State, then this sum would be distributed between the State, County and Municipality on a pro rata basis.

Amboy Bridge (New)

Commissioner Jelin informed the Commission that he had invited Mr. O'Connell, a member of the Board of Appraisers for the Amboy Bridge property, to come before the meeting with a report of the appraisers which was now complete. Mr. O'Connell appeared before the Commission and explained the methods by which the appraisers ascertained the values on the land and buildings of the Pardee Tile Works, The National Fire-Proofing Company and the Dennell Lumber Company. He presented to the Commission a typewritten report of investigations and findings. Commissioner Kidde inquired of Mr. O'Connell whether, in the event of condemnation, the appraisers stood ready to confirm all the figures arrived at and Mr. O'Connell reported that the appraisers held themselves in readiness at any time to report to the Commission, or to appear as expert witnesses in condemnation proceedings.

Right of Way Engineer Meeker, who was present at this meeting, informed the Commission that the proper procedure would be for offers to be made to the various parties from whom the property is to be acquired and that a request be made that they sign an agreement with the State at a certain figure and in the event these offers are not accepted, then the Commission should authorize condemnation proceedings to be entered into. On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission directed that the report of the apprisers for the Amboy Bridge property, be received and referred to the Right of Way Engineer for investigation and report to the Commission his recommendations as to offers to be made for property needed for right of way purposes for the New Amboy Bridges.

Route 16, Section 6-A.

Right of Way Engineer Meeker informed the Commission that Mr. Chester H. Lane, Attorney for the Childs estate and others interested in property on Route 16, Section 6-A, at VanDorn's Mills, was present

SEP 13 1923
2358

and desired a hearing. On motion duly seconded a hearing was granted. Mr. Land appeared before the Commission and urged the Commission to consider purchasing all the remaining parcels of land needed for the realignment of Route 16, Section 6-A, VanDorn's Mills. He spoke of his own activity in assisting Mr. Meeker in securing advantageous prices on various parcels of land in view of the fact that the Childs were interested in securing the new improvement. Mr. Meeker informed the Commission that agreements had been secured for all of the land needed with the property of David Strauss, the Somerset Crystal Spring Company, and Heman Childs. He informed the Commission that he understood that Mr. David Strauss was ready to accept $315.00 for his property and on motion by Mr. Kidde, seconded by Mr. Stewart, the Commission authorized the purchase of property needed on Route 16, Section 6-A, from Mr. David Strauss for the sum of $315.00. With respect to the property of the Somerset Crystal Spring Company, known as the Hames property, an offer had been made of $303.25, but the least amount which the owner would consider was $1000.00, claiming that the remaining money represented damage to the values of the property. Mr. Land spoke on behalf of Mr. Hames in this case stating that he believed that the $1000.00 asked was very much below the value of the damage done. On motion duly seconded the Commission directed that the purchase of the Hames and Heman Childs properties be laid over until the next meeting. This was seconded by Mr. Jelin and adopted. Mr. Jelin advised the Commission that he would view the property before the next meeting.

On motion by Mr. Stewart, seconded by Mr. Jelin, the Commission adjourned for luncheon at 12:30 to meet in regular session again at 2:00 P.M.

The meeting was again resumed at 2:00 P.M. as agreed, with the same members present as at the morning session.

Vehicular Tunnel ✓

Commissioner Jelin informed the Commissioners that he had received an opinion concerning the interpretation of the word "entrance" as affecting the Vehicular Tunnel Plaza situation. On motion by Mr. Stewart, seconded by Mr. Kidde, the State Highway Commission directed that the communication be received and placed on file for the information of the Commissioners only, this action also carrying with an expression of thanks to Commissioner Jelin for his courtesy in the matter.

Amboy Bridge,
Federal Aid Project #20.

State Highway Engineer Sloan presented to the Commission a report on the bids received, from Mr. Hudson, Supervising and Designing Engineer for the new Amboy Bridge, Federal Aid Project #20, in which report it was recommended that all bids be rejected due to the fact that the price was excessive for the work. State Highway Engineer Sloan informed the Commission that he also had thoroughly investigated the figures as submitted by the lowest bidder and he was prepared to recommend to the Commission that they reject all the bids submitted and readvertise. Commissioner Kidde informed the Commissioners that the low bidders would have representatives at this meeting to explain the bids submitted. The Secretary informed the Commission that Messrs. Skillen and Buttenheim, representing the Frederick Snare Corporation, were present and desired a hearing relative to their low bid on the Amboy Bridge. On motion duly seconded, the hearing was granted. Mr. Buttenheim informed the Commission that he was Vice-President of the Frederick Snare Corporation and that he had come down for the purpose of answering any questions the Commissioners might have with regard to their bid as submitted. Chairman Scott informed the visitors that the reports of both the State Highway Engineer and the Special Consulting Engineer consider the bids as submitted entirely too high for the Commission to award a contract upon, and the Commission was considering the reletting of the contract after changes are made in the specifications which would tend to give a lower price. Mr. Skillen, also a Vice-President of the Frederick Snare Corporation, offered the Commission the privilege of going over each of the items of the bid submitted by his corporation, in order that they might ascertain that the profit expected from the work was not excessive. Mr. Buttenheim at some length went into the various items affecting the bid. He explained the dangerous character of the caisson work and the fact that his company had arranged to secure the services of an expert Consulting Engineer on all of this pneumatic work. Furthermore, they had arrangements made for letting the steelwork to the American Bridge Company, which would guarantee a first-class job. They estimated that the profit allowed to themselves on this work would not reach 10% of the total cost price. Commissioner Jelin stated that in view of the conclusions of the Engineers of the Commission, it would be possible for the State Highway Commission to let contracts in so great an amount of money contrary to their recommendations. Commissioner Kidde stated that he had hoped that the visit of the contractors would bring the Commission some ideas as to the way in which the contract costs could be reduced. Chairman Scott stated that he had been very glad to give the Frederick Snare Corporation a full opportunity to present its case before the Commission and he expressed the hope that the Corporation would submit a bid when the same was again advertised for. The Commission promised that careful consideration would be given to the statements made before any final action was taken. After Messrs. Skillen and Buttenheim had departed, Chairman Scott requested the pleasure of the Commission on the matter of the award of contract. Commissioner Stewart stated that he was very thoroughly convinced that the Commission should accept the recommendations of its engineering experts and he moved that the bids as received for the new Amboy Bridge, Federal Aid Project #20, be rejected as being entirely too high and that the certified checks of the bidders be returned immediately and that arrangements be made for the readvertisement of this work. Commissioner Kidde stated that he believed the Commission was doing its full duty to the State in taking this action and he seconded the motion of Mr. Stewart. Upon question, the motion was unanimously adopted by the State Highway Commission.

Parcel #30-A, Route 10, Sec. 1-B

The Secretary informed the Commission that Mr. C. D. Beebe was present, following his appearance at the last meeting of the Commission. On motion, duly seconded, the hearing was granted. Mr. Beebe appeared before the Commission and inquired as to what disposition would be made of his proposition for the disposal of Parcel #30-A, Route 10, Section 1-B, which has already been in possession of the State Highway Commission for road purposes for the past two years, but, owing to the title not being in proper shape, could not be paid for until this time. Right of Way Engineer Meeker informed the Commission that Mr. Beebe was desirous of having the Commission return to him a small triangular tract, which he would take care of in order that it would not depreciate the value of other real estate in the vicinity and that he had accepted an offer of $2250.00 for his tract of land and was willing, if the State could deed this triangular piece back to him, to allow $250.00 for the same. Mr. Meeker recommended that the Commission acquire the property at $2250.00 and ascertain whether the small tract could be returned to Mr. Beebe. On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission approved of the purchase of Parcel #30-A, Route 10, Section 1-B, from Mr. C. D. Beebe, for the consideration of $2250.00, subject to a deduction of $250.00 in the event that the triangular strip known as Lot 4, Block 4, located to the east of the highway, is returned to Mr. Beebe either by legislative authority or other necessary steps to give deed for the same.

Route 18 - Inspection Trip ✓

The Secretary informed the Commission that Mr. J. W. Thier, County Supervisor of Roads of Bergen County, was present in order to arrange for a proposed trip of the Commission on Route 18. Mr. Thier appeared before the Commission and advised that there was an apparent mix-up in the arrangements for the trip into Bergen County, as planned by the State Highway Commissioners in order to view the property of Mr. Rionda, looking toward the construction of scenic roadways on the top of the Palisades. Mr. Thier presented to the Commission the invitation of Mr. Rionda to the State Highway Commissioners and their officers to be his guests at his home on Route 18 in Bergen County, on any day convenient to the Commission. On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission accepted the invitation of Mr. Thier, for Thursday, September 27th, it being the intention to inspect the site at 11:00 A. M. on that date and to dine with Mr. Rionda at 1:00 P.M. Commissioner Kidde suggested to Mr. Thier that the Director of the Board of Freeholders, Mr. Bogert, and former Director, Mr. Roberts, together with himself, also, accompany the Commission on this inspection trip and that any other arrangements as proposed be cancelled at once.

Route 16, Section 3, ✓
and
Route 9, Section 8. ✓

The Secretary presented a memorandum left by Senator Case of Somerset County, concerning the deductions being made on account of non-completion of Route 16, Section 3, and Route 9, Section 8, by

Ralph Sangiovanni within the time limits as approved by the contracts. Senator Case informed the Commission that in view of the fact that the pavement was completed for the traveling public before the expiration of the time limit, and in view of the fact that the Somerset County Board of Freeholders had granted extensions of time to the date of final completion, the Commission should, if possible, remit any penalties imposed upon the contractor. Upon inquiry, the State Highway Engineer informed the Commission that an extension on Route 16, Section 6, had been granted to August 1st and final date of completion was September 4th, while on Route 9, Section 3, the extension was granted to August 15th and actual completion was on September 7th. State Highway Engineer Sloan further stated that he believed that the contractor was negligent in finishing up the work and that a penalty should be inflicted. Commissioner Jelin stated that while it was true that the contractor went beyond the date of completion, yet the roadway was open for traffic and the reason for the additional time was in order to finish up work of guard rail and shoulders. Secretary Grover informed the Commissioners that it was the policy of the former State Highway Commission to approve an extension of time to contractors where roads were open to the traffic even though the finishing work had not yet been done. Commissioner Kidde stated that the contractor in this case had been before the Commission when an award was held up on a new contract and he had, himself, stated that the work on these two jobs would be completed within two weeks from the time he appeared, which would have brought the date up to the middle of August, and he expressed the belief that some penalty should be imposed. Commissioner Jelin stated that any penalty should be in the nature of a warning to the contractors against permitting any of their work to go beyond the time set unless there are reasons beyond their own control, and he moved that the penalty as retained against the two contracts named above be remitted except for a total sum against the two contracts of fifteen days at $40.00 per day, making a total penalty of $600.00 on these contracts. This was seconded by Mr. Stewart and adopted.

Cape May-Lewes Ferry ✓

The Secretary informed the Commission that Senator Bright of Cape May County had been present in the morning and had conferred with

SEP 1 8 1923

Chairman Scott on the matter of the Cape May-Lewes Ferry and also concerning the construction of a section of road at Tuckahoe. Chairman Scott informed the Commission that Senator Bright would present his propositions in writing to the Commission at an early date.

White Horse Pike ✓

The Secretary presented a communication from Governor Silzer, concerning the widening and beautification of the White Horse Pike between Camden and Atlantic City in order to make traffic safer, and further in view of the fact that a number of residents along the White Horse Pike would install sidewalks if the road were graded out to the curbs. The Governor further suggested that a hearing be granted to Mr. Charles F. Wise, member of the Board of Freeholders of Camden County, Audubon, N. J. and Mrs. William D. Weikel, Merchantville, N.J., on this matter. On motion duly seconded, the Secretary was directed to invite Mr. Wise and Mrs. Weikel to appear at the next meeting of the Commission.

Route 5, Mine Hill Section - See 7

The Secretary presented a telegram received from Mr. T. J. Wasser, of the Public Service Production Company, informing the Commission that Route 5, Mine Hill Section, is completed. Commissioner Kidde reported that he had inspected the work on Mine Hill Section and moved that same be accepted subject to final papers being approved by the State Highway Engineer. This was seconded by Mr. Stewart and adopted.

Additional Highways,
Westville - Malaga & Penns Grove - Atlantic City ✓

The Secretary presented a resolution from the Atlantic County Board of Freeholders, requesting that the routes from Westville to Malaga, and Penns Grove to Atlantic City be taken over as State Highways. Chairman Scott informed the Commission that at a previous meeting a number of suggested routes which could be taken over for maintenance, was presented to the Commission and that he believed these routes should be given consideration at the same time. On motion duly seconded, the State Highway Commission directed that the Secretary inform the Atlantic County Board of Freeholders that the taking over of additional routes was being given consideration by the Commission.

Route 5, Section 10,
Canoe Brook Country Club ✓

Commissioner Kidde reported that the Canoe Brook Country Club was desirous that the work at their entrance on Route 5, Section 10, be done at the same time the State highway improvement was taking place, and they were going to use the amount awarded by the State for the land taken from the Club towards doing this work, and he moved that the State Highway Engineer be authorized to make an arrangement whereby the entrance to the Country Club oould be taken care of at the same time as the road improvement was being put through. This was seconded by Mr. Jelin and adopted.

Nichol Ave., Women's College,
New Brunswick.

State Highway Engineer Sloan reported that he would recommend to the Commission the award of contract to Mr. T. H. Riddle, low bidder on Nichol Avenue (Road to Women's College) at New Brunswick, at 104% of the Engineer's estimated units of cost, amounting to $10,121.28. On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission unanimously adopted the following resolution:

RESOLVED, that the contract for the construction of road to Women's College, New Brunswick, Nichol Avenue, be and the same is awarded to T. H. Riddle, low bidder at 104% of the Engineer's estimated units of cost, amounting to $10,121.28, and

BE IT FURTHER RESOLVED, that the Chairman is authorized to sign the necessary contracts as approved by the State Highway Engineer.

New Bridge at New Brunswick

State Highway Engineer Sloan presented for the attention of the Commission the suggested locations for a new bridge at New Brunswick, together with comparative estimates of cost, and the information that the Women's College authorities have let a contract for a new building to be constructed on their property approximately onthe line of Jones Avenue extension, which building, if erected, would interfere with the construction of the bridge in accordance with Scheme #1, as shown on the plans. Commissioner Stewart moved that the consideration of this matter be laid over until October 2nd. This was seconded by Mr. Kidde and adopted.

Route 4, Section 5-A,
Maple Avenue, Red Bank

State Highway Engineer Sloan reported to the Commission that in connection with the acceptance of Route 4, Section 5-A, Maple Avenue, Red Bank, as made at the last meeting of the Commission, this acceptance involves an adjustment with the contractor to the end that the section deficient in bituminous content has been covered by 25% reduction in price.

Permits - Openings
Route 15, Section 6,
Leesburg Cut-off

State Highway Engineer Sloan presented correspondence from Mr. Chas. Pettinos, requesting permission to place a three inch pipe through the subgrade on Route 15, Section 6, Leesburg Cut-off, for the purpose of drainage, by pumping, of his sand pit, and further requesting permission to maintain and operate a narrow-gauge railroad across the highway at grade. State Highway Engineer Sloan recommended that permission be granted for the placing of the pipe but that Mr. Pettinos be denied permission for the operation of a narrow gauge railroad at grade over the road and that he be advised that the Commission will consider a crossing beneath the highway. On motion by Mr. [illegible], seconded by Mr. Kidde, the recommendations of the State Highway Engineer were unanimously adopted.

Right of Way, Route 4

State Highway Engineer Sloan presented a communication from Mr. Charles L. Steuerwald, as representative of the Jersey Central Traction Company, inquiring whether the Commission would be interested in securing their right of way along Route 4 for purposes of widening. On motion by Mr. Kidde, seconded by Mr. Stewart, the Commission directed that the Jersey Central Traction Company be advised that the State Highway Engineer will go over the plans for the widening of Route 4 with them and will entertain from them a proposition as to their right of way where needed.

Grade Crossing, Morgan
(Advisory Board)

Commissioner Kidde called the attention of the Commissioners to the fact that the Advisory Board on the study of shore route traffic has suggested, as an important measure, the elimination of the grade crossing at Morgan, and he moved that the State Highway Engineer be delegated to prepare plans for the elimination of the grade crossing at Morgan and that estimates be developed with relation thereto.

This was seconded by Mr. Jelin and adopted. Commissioner Kidde stated that he would go over the ground at Morgan on the same date at which the New Brunswick Bridge proposition would be taken up.

Damage Claim,
Quaker City Cab Company

State Highway Engineer Sloan submitted the claim of the Quaker City Cab Company in the amount of $177.30 for damages done to one of its taxicabs by a car driven by an employee of this Department on July 1, 1923. He explained that the conditions surrounding the accident would justify payment of the claim and recommended that payment be made. On motion by Mr. Kidde, seconded by Mr. Jelin, the Commission approved of the payment of $117.30 in full of claim for damages by the Quaker City Cab Company.

Route 16, Section 4,
Extension of Time

On motion by Mr. Jelin, seconded by Mr. Kidde, the Commission approved of an extension of thirty working days to the [illegible] Engineering and Construction Corporation on Route 16, Section 4, as recommended by the State Highway Engineer, due to the fact that they were unable to work advantageously last Fall on account of non-completion of sewers by the Borough.

Route 4, Section 15, County Section Extension of Time

On motion by Mr. Stewart, seconded by Mr. Jelin, the State Highway Commission approved of an extension of time to December 1, 1923, to the Public Service Production Company for the construction of Route 4, Section 15, delays being due to matters beyond their control.

Route 14, Section 3.

On recommendation of the State Highway Engineer, Commissioner Kidde moved that authority be granted to William Eisenberg, contractor on Route 14, Section 3, to sub-let the work of constructing two bridges and retaining wall on that job to the Kalyn Construction Company of Trenton, it being understood that the general contractor [illegible] execution of the work and in no way would be relieved of his obligation to the State. This was seconded by Mr. Jelin and adopted.

Slag Contracts-Camden County

On motion by Mr. Jelin, seconded by Mr. Stewart, the Commission, upon recommendation of the State Highway Engineer, approved of contracts for slag to be entered into by Camden County for maintenance work.

County Avenue, Hudson Co.

On motion by Mr. Jelin, seconded by Mr. Kidde, the Commission approved of plans and specifications for County Avenue, Hudson County, work to be done from Motor Vehicle Account, same being recommended by the State Highway Engineer.

Paterson Plank Road, Hudson County.

On motion by Mr. Jelin, seconded by Mr. Kidde, the Commission approved an extension of time of thirty working days on the Paterson Plank Road, Hudson County, due to the fact that the contractor cannot perform his work until the trolley company has finished all work on its rails, this extension being recommended by the State Highway Engineer.

Denville-Mountain Lakes Road.

On motion by Mr. Kidde, seconded by Mr. Jelin, the Commission approved plans and specifications for the Denville-Mountain Lakes Road, Denville Township, Morris County, Township Aid Account, recommended by the State Highway Engineer.

Long Valley-Hunterdon County Line Road.

Commissioner Kidde reported to the Commission that at the hearing at Morristown on September 11th, where he had taken up with the Morris County Board of Freeholders the reason for the rejection of bids received on the Long Valley-Hunterdon County Line Road, the Commission was informed by the Morris County authorities that the price exceeded the budget prepared by the County for the work, and it was determined to readvertise for bids.

Canton & Greenwich Road, Stow Creek Twp., Cumberland Co.

On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission approved of acceptance and final payment on Canton and Greenwich Road, Stow Creek Township, Cumberland County, work done with Township aid.

Roosevelt Boulevard, Cape May Co.

On motion by Mr. Kidde, seconded by Mr. Jelin, the Commission approved of the recommendation of the State Highway Engineer for approval of contract and bond for grading and paving with gravel a section of Roosevelt Boulevard, extending from Marmora to Ocean City in Upper Township, Cape May County.

Bulls Ferry Road, Hudson County

On motion by Mr. Kidde, seconded by Mr. Jelin, the Commission approved of contract and bond for Bulls Ferry Road, Hudson County, work to be done from Township Aid Account, same being recommended by the State Highway Engineer.

Hainesville-Montague Road.

On motion by Mr. Jelin, seconded by Mr. Stewart, the Commission approved of contract for Sandystone Township Road #9, Hainesville-Montague Road, Sandystone Township, Sussex County, Township Aid, same being recommended by the State Highway Engineer.

Pennsville-Salem Road, 2nd & 3rd Section

On motion by Mr. Jelin, seconded by Mr. Stewart, the Commission approved of an extension of time from August 1st to August 15, 1923, on the Pennsville-Salem Road, 2nd and 3rd Sections, in Salem County.

Hope-Johnsonburg Road, Warren Co.

On motion by Mr. Jelin, seconded by Mr. Stewart, the Commission approved of final payment to Hope Township for work on the Hope-Johnsonburg Road, Warren County, Township Aid.

Mile Hollow-[illegible] Road

State Highway Engineer Sloan reported, in connection with the Mile Hollow-[illegible] Road now being used as a detour in connection with the construction of Route 2, Section [illegible], that Burlington County was very desirous of getting an improved type of construction on this road, the total cost of which was estimated by him at $40,000.00, of which amount the State would be asked to contribute 40% less a sum of $[illegible],000.00 already approved for maintenance of this detour, and he further advised that it was proposed to do the work with the inmates now employed on Route 2, Section [illegible]. On motion by Mr. Kidde, seconded by Mr. Stewart, the Commission unanimously approved the recommendation of the State Highway Engineer for the improvement of Mile Hollow-[illegible] Road.

Route 5, Section 2-A,
Hackettstown-Drakestown.

On motion by Mr. Jelin, seconded by Mr. Stewart, the Commission approved of modification of Project Agreement for Route 5, Section 2-A, Hackettstown-Drakestown Section, in which case the amount to be contributed by the Federal Government was reduced from $1[illegible],251...

per mile to $15,000.00 per mile.

Route 4, Section 22, Detour.

State Highway Engineer Sloan presented an official detour which he recommended for approval on Route 4, Section 22, Main Street, Asbury Park. On motion by Mr. Kidde, seconded by Mr. Stewart, the Commission unanimously approved the following official detour to be established for Route 4, Section 22, Main Street, Asbury Park, construction:

> Beginning on Norwood Avenue (Route 4, State Highway) at the southerly end of the Deal Lake Bridge; thence (1) easterly on Deal Lake Driver to Ocean Avenue; thence (2) southerly on Ocean Avenue to Lake Avenue; thence (3) westerly on Lake Avenue to Bond Street; thence (4) westerly on Bond Street to State Highway Route 4 (Main Street).

Vincent J. Loughran, Leave of Absence.

State Highway Engineer Sloan presented a letter from Vincent J. Loughran, Bridgeman on the Hackensack River Bridge, together with physician's certificate to the effect that he has tuberculosis and is at Saranac Lake. It was recommended that a one month's leave of absence be extended with pay and that a report at the end of this period be secured from his physician, further leave to be conditional on the report to be received. On motion by Mr. Kidde, seconded by Mr. Jelin, the recommendation was unanimously adopted.

Maintenance Division, Leave of Absence.

The State Highway Engineer informed the Commission that there were two other men in the Maintenance Division who were out on sick leave with pay and there was no disposition made of their cases. On motion, duly seconded, the Commission directed that these men be carried on the payroll to the end of September, at which time a physician's certificate be secured as to their condition.

Bergen Turnpike, Hudson County.

State Highway Engineer Sloan recommended that plans and specifications for Bergen Turnpike, Hudson County, be approved. On motion by Mr. Kidde, seconded by Mr. Jelin, the Commission approved of plans and specifications for the construction of Bergen Turnpike, Hudson

County, work to be done from the Motor Vehicle Account.

Right of Way
Property Purchases

On motion by Mr. Jelin, seconded by Mr. Kidde, the Commission unanimously approved of the purchase of the following parcels of property, same having been recommended by the Right of Way Engineer and the State Highway Engineer:

Parcel #5, Route 14, Section 8, Charles & Therm Kates, consideration $100.00. ✓
Parcel #8, Route 2, Section 4, Vandegrift Estate, consideration $300.00. ✓
Parcel 8-A, Route 2, Section 4, Vandegrift Estate, consideration $25.00. ✓

Property on Route 14, Section 6, Ocean View-Seaville Section, purchased by quit claim deeds: ✓

Chas. M. & Emma C. Gandy,	consideration	$1.00
Matilda Lovell,	"	1.00
Emma T. Corson,	"	1.00
J. Oliver T. [illegible],	"	1.00
Owen Dervin,	"	1.00
Elizabeth W. Way	"	1.00

Parcel #3, Route 13, Section 5, Hilsboro Township Board of Education, consideration $1.00. ✓

Property on Route 14, Section 3: ✓

Chas. S. & Annie W. Roberts,	consideration	$1.00
Linnaeus L. Swain,	"	1.00
Clinton Townsend,	"	1.00
W. Frank & Ella Doris Davis,	"	1.00
Edward S. Jr. & Florence N. Powell,	"	1.00
Robert & Harriet W. Mangold,	"	1.00
Harry W. & Belle M. McCool,	"	1.00

Property on Route 4, Section 20: ✓

Parcel #16-Marie Muller,	consideration	$350.00
" 5-Elias H. Green,	"	800.00
" 7-J. H. Wiltse,	"	180.00
" 10-Jacob McLaughlin,	"	650.00

Parcel #14, Route 5, Section 13. ✓

State Highway Engineer Sloan presented to the Commission the recommendation of the Right of Way Division that Condemnation be entered into on Parcel #14, Route 5, Section 13, due to the fact that the owner, Mrs. Dorcas Thernes, refuses to sign the papers. On motion by Mr. Jelin, seconded by Mr. Kidde, the Commission directed that condemnation proceedings be instituted on the property of Mrs. Dorcas Thernes in accordance with the following resolution:

RESOLVED, that this Commission hereby determines to acquire in the name of the State of New Jersey, for public use in the construction of State Highway Route 5, Section 13, ALL that certain Lot, tract or parcel of land and premises,

situate, lying and being in the State of New Jersey,
and more particularly described as follows:

Parcel #14

Beginning in the division line between lands of Frank Dominick and the party of the first part hereto, at a point distant thirty-three feet (33') at right angles from the center line of State Highway Route 5, Section 13, at Station 65 and 35.15, as shown on plans and adopted by the State Highway Commission.

Thence (1) through the property of the party of the first part and parallel to the said center line of the said State Highway north fifty-six degrees and fifty-eight minutes west (N 56°58' W) one hundred and twenty-nine and eighteen, one hundredths feet (129.18') to the westerly side of the public road leading between Budd Lake and Netcong.

Thence (2) along the said public road south twenty degrees and twenty-nine minutes west (S 20°29' W) one hundred and three and eighty-six, one hundredths feet (103.86') to the aforesaid division line between land of Frank Dominick and the party of the first part.

Thence (3) along the said division line of Dominick, north sixty-nine degrees and thirty-one minutes west (N 69°31' W) seventy-six and eighty-one, one hundredths feet (76.81') to the point of beginning.

All of which is more particularly shown on a map entitled - New Jersey State Highway Department, Route 5, Budd Lake-Netcong Section, property to be acquired from Mrs. [illegible], Borough of Netcong, Morris County, New Jersey.

Parcel #7, Route 14, Section 7.

The State Highway Engineer presented a report from the Right of Way Division recommending an appeal from the award made by Condemnation Commissioners for property of Cresswell and [illegible], known as Parcel #7, Route 14, Section 7, the award being $1,[illegible] and $[illegible] being considered the maximum worth for the property. On motion by Mr. [illegible], seconded by Mr. Kidde, the Commission approved the appeal from condemnation award of property of Parcel #7, Route 14, Section 7.

Buena-Tuckahoe Road, Section 2.

State Highway Engineer Sloan recommended that the Commission approve the cancellation of $[illegible],221.15 from the 1932 Township Aid Funds, as applied to the Buena-Tuckahoe Road, Section 2, Weymouth Township, Atlantic County, Township Aid, and that the funds for this work be set up from the 1924 Township Aid Account to the credit of Atlantic County. On motion by Mr. Kidde, seconded by Mr. Jelin, this recommendation was approved.

Montague-Port Jervis Road

State Highway Engineer Sloan recommended that the sum of $1,065.33, remaining as unexpended balance in the account of Montague-Port Jervis Road, Montague Township, Sussex County, be cancelled. On motion by Mr. Kidde, seconded by Mr. Jelin, this cancellation was unanimously approved.

Main Street-Three Bridges Road.

State Highway Engineer Sloan recommended that Township Aid in the amount of $4,200.00 be approved for the Main Street-Three Bridges Road, Hunterdon County, Township Aid, funds to be provided from cancelling allotments in the 1923 Township Aid Fund. On motion by Mr. Jelin, seconded by Mr. Kidde, this recommendation was unanimously approved.

Damage Claim-Mrs. Helfrich.

Commissioner Jelin called the attention of the Commission to the fact that the claim of Mrs. Helfrich of New Brunswick, for damages sustained when run into by a department automobile, had not yet been disposed of, and he recommended that the matter be taken up at the next meeting, before which time the Secretary should prepare a complete resume of the status of the case.

Employments

State Highway Engineer Sloan presented a report of employments approved by him since the last meeting of the Commission and recommended ratification of the same. On motion by Mr. Jelin, seconded by Mr. Kidde, the Commission approved the following employments as recommended by the State Highway Engineer:

Sept.	10	Schuyler Slack,	Jr. Testing Engr.	$125. [illegible] Mo.
Aug.	28	G. M. Tozaur,	Motor Truck Driver	.[illegible] Hr.
Sept.	8	A. C. Adams,	" " "	.40
"	10	F. A. Hayes,	" " "	.45
Aug.	29	Clarence Jones,	" " "	.40
Sept.	5	Victor Fox,	" " "	.[illegible]
"	11	W. T. Martin,	Garage Assistant	.50

On motion, duly seconded, the meeting adjourned at 5:45 P.M. to meet in regular session on Tuesday, September 25, 1923.

Respectfully submitted,

A. LEE GROVER,

Secretary.

MINUTES OF MEETING - September 25, 1923.

A regular meeting of the State Highway Commission was held at the offices of the Commission, Broad Street Bank Building, Trenton, on Tuesday, September 25, 1923. The meeting was called to order at 10:30 A. M. by Chairman Scott.

Present: General Hugh L. Scott, Chairman; Messrs. Walter
Kidde, Percy H. Stewart, and Abraham Jelin.

Sussex County Maintenance Work

The Secretary informed the Commission that a hearing had been requested by Senator William T. Kays of Sussex County, and that he was present at the offices of the Commission. On motion, duly seconded, the hearing was granted. Senator Kays appeared before the Commission, together with County Engineer Harvey Snook, and presented a written statement of the work performed by Sussex County during the year 1923, and requested an additional allotment of $3,000.00 to be used in continuation of the maintenance work in Sussex County until November 25th, it being necessary to discontinue all maintenance work on Sussex County roads due to the fact that funds were exhausted. Commissioner Kidde inquired concerning the maintenance schedule as filed with the State Highway Commission at the beginning of the year. County Engineer Snook informed the Commission that the schedule as prepared was an estimate of what would be required but the work performed exceeded the funds set aside by both the State and the County for maintenance. After a general discussion as to Sussex County Maintenance work, Commissioner Kidde moved that an emergency allotment of $3,000.00 be granted to Sussex County immediately from the Motor Vehicle Reserve Account, and that any further action be withheld until the receipt of a report from the County Engineer as to the maintenance work performed upon those items contained in the schedule approved by the State Highway Commission. This was seconded by Mr. Jelin and adopted.

Sussex-Port Jervis Road.

Commissioner Kidde then inquired from Senator Kays as to what developments there were in regard to the Sussex-Port Jervis Road, which would pass through High Point Park. Senator Kays presented the Commission with a copy of a brief prepared at the direction of the Commission to be forwarded to the Federal Bureau of Public Roads, requesting that the County of Sussex be permitted to use Federal Aid upon this road and to make use of shale rock material which was in the immediate vicinity and further to permit the grading only of the road at this time without guaranteeing a permanent type of pavement thereon within five years. The Commissioners discussed the importance of this road as a through route from New York and Pennsylvania into New Jersey and also a route which would open up High Point Park, which was very desirable from the viewpoint of New Jersey. Senator Kays informed the Commission that as far as Sussex County was concerned it could not afford to spend the money needed for placing a permanent pavement on this road from its own account, since there were other roads which the County authorities felt were more important to the County than would be the Sussex-Port Jervis road when completed. They were, however, willing to spend the balance of the funds needed beyond the Federal Aid apportionment for the grading of this road. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission accepted the brief as prepared by Senator Kays and directed that the Sussex-Port Jervis Road be considered with a view toward placing a shale surface thereon rather than a concrete construction.

Hainesburg-Columbia Road, Warren Co.

The Secretary informed the Commission that Mr. Carhart, County Treasurer of Warren County, was present and desired a hearing. On motion, duly seconded, the hearing was granted. Mr. Carhart informed the Commission that bids had been received by the County of Warren for the grading and drainage of the Hainesburg-Columbia Road and the County was desirous of making an award to the lowest bidder, since a very desirable bid had been received in the amount of $30,820.54. On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission approved the award of contract by Warren County for the Hainesburg-Columbia Road, Warren County, subject to approval of the State Highway Engineer.

Route 3, White Horse Pike

The Secretary informed the Commission that a communication had been received from Mrs. Weikel of Merchantville, advising that on account of to-day being Primary Day, she, together with Mr. [illegible]ise of Audubon, would not be able to meet with the State Highway Commission, and asking for an opportunity to appear before the Commission on Tuesday next, October 2nd. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission directed the Secretary to inform Mrs. Weikel and Mr. Wise that it will be entirely satisfactory for them to appear on October 2nd.

Advisory Board-Delaware Riv.Br.

The Secretary presented a communication from the Board of Commissioners of the City of Camden advising that Mr. Charles W. Leavitt had been named as a member of the Advisory Board to study traffic problems in connection with the new bridge between Camden and Philadelphia. On motion, duly seconded, the communication was ordered feceived and placed on file.

Eagle Scout Highway.

The Secretary presented a communication from the National Headquarters of the Boy Scouts of America, suggesting that the Commission give the name of "Eagle Scout Highway" and "Boy Scout Highway" to two desirable routes in the State System. Commissioner Kidde suggested that Route #8 running from Montclair to the State Line at Unionville is a desirable senic route and one greatly frequented by Boy Scout troops, and he moved that the Commission reserve Route #8 from Montclair to the State Line at Unionville for such designation. Commissioner Kidde was authorized to canvass the situation locally and report a suitable designation of this route.

Route #18, Inspection Trip.

The Secretary presented a telegram received from Major W. A. Welsh, advising that he will meet with the Commissioners at Hackensack at 11:00 A.M., Thursday, September 27th, for the purpose of going over Route #18. Commissioner Stewart requested information from the Commission as to whether it was the purpose of attending the Inter-State Fair at Trenton on Thursday, September 27th, at which time the Governor and State officials have a special reserved box for their use. Commissioner Kidde said that as there had been a misunderstanding as to a previous appointment time for the Commissioners to go to Route #18, , a change should not be made from the previous appointment, unless the Bergen County authorities could arrange such a change without any inconvenience to themselves or to Mr. Pionda, at whose home the Commissioners were to lunch at 1:00 o'clock on Thursday. It was decided that Commissioner Kidde should call up the Director of the Bergen County Board of Freeholders, relative to this matter. This was done at once and it was determined that the appointment could not be postponed and the Commissioners decided to arrange for the trip to Bergen County on Thursday.

Route 10, Palisade Ave. Intersection.

The Secretary presented a suggested form of resolution to be adopted by the State Highway Commission, granting permission to the Borough of Fort Lee to use a triangular strip of land at the intersection of Route 10 and Palisade Avenue that is not at present used for highway purposes. He informed the Commission that it was the purpose of the Borough of Fort Lee to establish a small park in this area and place a monument thereon. On motion by Mr. Kidde, seconded by Mr. [illegible], the following resolution was unanimously adopted by the State Highway Commission.

WHEREAS, the Borough of Fort Lee has requested permission of the State Highway Commission to use the triangular strip of land at the intersection of Route 10 and Palisade Avenue, which is not at present used for highway purposes, for a public park.

NOW, THEREFORE, BE IT RESOLVED, by the State Highway Commission of the State of New Jersey that permission is hereby granted to the Borough of Fort Lee to use for park purposes the triangular strip of land located at the intersection of State Highway Route 10 and Palisade Avenue, which said strip is not at present used for highway purposes, it being understood that no building, structure or monument shall be erected upon this land without the written approval of the State Highway Commission of such building, structure or monument before erection of same, and

BE IT FURTHER RESOLVED, that this permission shall be and remain in effect until it shall be determined by the State Highway Commission that the property is required by it, and

BE IT FURTHER RESOLVED, that upon proper notice the Borough of Fort Lee will remove, at its own expense, any building, structure or monument that may hereafter be erected upon the said tract by the Borough.

Damage Claim-Mrs. Anita Helferich

As directed by the State Highway Commission, the Secretary presented a summary of the case of the claim made by Mrs. Anita Helferich on account of injuries sustained by her when run down by a State Highway Department automobile. The Secretary further informed the Commission that the claim of Mrs. Helferich, under date of April [illegible], 1923 was for the total amount of $1,[illegible].00. Commissioner Jelin reported to the Commission that as far as he could learn Mrs. Helferich was still unable to return to her work as saleslady and would remain maimed for life. After discussion, Commissioner Kidde moved that, predicating its decision as to the amount of money to be awarded to Mrs. Anita Helferich of Highland Park, for injuries received by her when run down by an automobile of the State Highway Commission on December [illegible], 1922, upon receipt from Mrs. Helferich of a statement to the effect that she has no further claims nor will she make any further claims upon the State, and further, subject to the approval of the Attorney General as to the form of such release, that payment of damages be authorized in the total sum of $[illegible].00. This was seconded by Mr. Stewart and adopted.

The Schedule of Business was next taken up, item by item, as follows:

Route 4, Section 20,
Main Street, Asbury Park.

State Highway Engineer Sloan presented the following report of bids received on September 26th, for the construction of Route 4, Section 20, Main Street, Asbury Park, and recommended award of contract to Joseph F. Burke, the lowest responsible bidder, at 96% of the engineer's estimated units of cost:

Joseph F. Burke.	96.
Standard Bitulithic Co	96.1
James J. Barrett	97.3
Newark Paving Co.	99.
Mercer Construction Co	103.2
[illegible] Thompson & Company	109.

On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission unanimously adopted the following resolution:

RESOLVED, That the State Highway Commission does hereby make award of contract for the construction of Route 4, Section 20, Main Street, Asbury Park, to Joseph F. Burke, the lowest responsible bidder, at his low bid of 90% of the Engineer's estimated units of cost, said bid amounting to $110,331.30, and

BE IT FURTHER RESOLVED, that the Chairman is authorized to sign the necessary contracts after approval of the State Highway Engineer.

Route 2, Section 5,
Crosswicks Creek Bridge

The State Highway Engineer presents the following report of bids received for the erection of the structural steel work on the Crosswicks Creek Bridge at M.P. 20.5 on Route 2, Section 5, and recommends award of contract to the Phoenix Bridge Company of Phoenixville, Pa., at their's the lowest bid, amounting to $2[illegible]:

Phoenix Bridge Company	$2[illegible]
Carl [illegible]insett	2[illegible]
[illegible] Boiler Works.	2[illegible],1[illegible]
Bethlehem Steel Co.	2[illegible],2[illegible]
McClintic-Marshall Co.	2[illegible]
[illegible] Iron Works	28,130.00

On motion of Mr. Stewart, seconded by Mr. Kidde, the State Highway Commission adopted the following resolution:

RESOLVED, that the State Highway Commission does hereby award the contract for the erection of the structural steel work at the Crosswicks Creek Bridge at M.P. [illegible] on Route 2, to the Phoenix Bridge Company of Phoenixville, Pa. at their's, the lowest bid, amounting to $2[illegible], and

BE IT FURTHER RESOLVED, that the Chairman is authorized to sign the necessary contracts after approval by the State Highway Engineer.

Bridges —
Route 8, Section 1-A

State Highway Engineer Sloan presented the following report of bids received for the construction of three bridges at M.P. 21.0, M.P. 22.7, and M.P. 23.2, Route 8, Section 1-A, and recommends that award be made to the lowest bidder, Thomas Sheehan of [illegible], N.J. at his, the lowest bid, amounting to $104,728.31:

Thomas Sheehan	$104,728.31
S. J. Thompson & Co., Inc.	1[illegible]
F. M. Gibbs Const. Co.	110,[illegible]
L. J. [illegible]	11[illegible]
W. J. [illegible], Inc.	12[illegible]
[illegible]-Moore, Inc.	12[illegible]
[illegible] W. Weller	127,[illegible].32

On motion by Mr. Stewart, seconded by Mr. Jelin, the State Highway Commission adopted the following resolution:

RESOLVED, that the State Highway Commission does hereby award the contract for the construction of three bridges at M.P. 21.0, M.P. 22.6, and M.P. 23.2, on Route 3, Section 1-A, to Thomas Sheehan of Hagerstown, Md., at his, the lowest bid, amounting to $104,728.61, and

BE IT FURTHER RESOLVED, that the Chairman is authorized to sign the necessary contracts after approval by the State Highway Engineer.

Route 6, Section 15, Broadway, Gloucester.

State Highway Engineer Sloan reported completion and recommended the acceptance of Route 6, Section 15, Broadway, Gloucester, Michael Staub, contractor. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission unanimously approved of the acceptance and final payment to Michael Staub, contractor, for the completed work on Route 6, Section 15, Broadway, Gloucester.

Albany Street Bridge

State Highway Engineer Sloan recommended to the Commission that approval be given to the plans and specifications for the widening of Albany Street Bridge, New Brunswick, on Route 1, together with approaches for the same. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission adopted the following resolution:

RESOLVED, that the State Highway Commission does hereby approve of plans and specifications for the construction of approaches and the widening of the Albany Street Bridge at New Brunswick on Route 1, and

BE IT FURTHER RESOLVED, that the Chief Clerk is directed to advertise for the said work after approval by the State Highway Engineer.

Commissioner Jelin stated that, in connection with the approaches to the bridge, there should be considered the widening of the same, and he felt that an agreement could be made whereby property of Mr. Rice might be acquired. On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission authorized Commissioner Jelin to interview Mr. Rice relative to his property needed for widening purposes on the approach to the Albany Street Bridge.

Amboy Bridge-Deposits on Plans

State Highway Engineer Sloan recommended to the Commission in view of the rejection of bids and the proposed readvertisement of the Amboy Bridge, that the Commission authorize the return of the entire deposit to those who took out plans and returned them, even though they did not bid. On motion by Mr. Stewart, seconded by Mr. Jelin, the State Highway Commission approved the recommendation of the State Highway Engineer and directed that all deposits for plans taken out for the Amboy Bridge be refunded on return of the plans in good condition. Commissioner Kidde further moved that when readvertisement takes place for the Amboy Bridge work, that a deposit of $100.00 be required from all taking out plans and the entire amount be refunded to those who will return the same within a reasonable time. This was seconded by Mr. Jelin and adopted.

Route 10, Section 2. Bridge

The Secretary presented to the Commission a communication received from Mr. R. J. Mansfield, protesting against the award of contract for the construction of bridge work on Route 10, Section 2, to the second low bidder over his, the low bid for this work. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission directed that the Secretary acknowledge the receipt of the communication, advising that the State Highway Commission does not agree with the statement of fact as contained therein.

Route 4, Section 21-Detour

State Highway Engineer Sloan recommended to the Commission the approval of a proposed official detour to be used during the construction of Route 4, Section 21, said detour to be maintained for one-way traffic at no expense to the state. On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission unanimously approved of the following official detour for one-way traffic on Route 4, Section 21, between Laurelton and Point Pleasant, at no expense to the State:

> "Beginning at the intersection of Route 4, and the Herbertsville road in the Borough of Point Pleasant; thence (1) in a northwesterly direction along the Herbertsville Road, its various courses and distances to and through Herbertsville, a distance of approximately 4½ miles to the Allenwood-Lakewood Road; thence (2) along this road in a southwesterly direction a distance of approximately 3½

miles to Greenville; thence (3) southeasterly a distance of approximately 1¼ miles to Lanes Mills; thence (4) southwesterly approximately ¾ miles to Route 4."

Property Purchases

Upon recommendation of the State Highway Engineer, on motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission approved of purchase of the following parcels of property on State Highway Routes:

Route 4, Section 10, -

Parcel #11, Spring Lake Real Estate Co., consideration $1.00,
" #12, W. Elliot Dyer, consideration $1.00.

Route 14, Section 3. -

Quit Claim Deed from Howard S. & Edith Townsend, consideration $1.00.

Route 14, Section 8, -

Elizabeth F. Sutton, consideration $1.00,
Quit Claim Deed from Alfred E. A. and Clara E. Bronson, consideration $1.00,
Quit Claim Deed from James [illegible]. and Alma V. Anderson, consideration $1.00, and resetting fences,
Quit Claim Deed from Frank [illegible]. Tullner, consideration $1.00, and resetting fences.

Route 16, Section 5-A.

Commissioner Jelin reported that he had inspected the properties on Route 16, Section 5-A, at Van Dorn's Mills and he could not agree to the claim of [illegible] Hills as regards the damage done to his property since the new line will be fully 175 feet from the front of the house. He suggested that the Right of Way Department prepare a report to be ready at the next meeting of the Commission covering his recommendations as to the amount to be offered for the properties.

Route 8, Mountain View.

State Highway Engineer Sloan presented a report from the Construction Engineer relative to right of way necessary to be acquired for the construction of the viaduct now being constructed at Mountain View on Route 8, and he recommended that the Attorney General be requested to prepare a bill for presentation to the Legislature at its coming session to permit of the State Highway Commission or the D. L. & W. R.R. Co. to secure the necessary land or an easement thereon for the purposes desired. This is made necessary because the property was originally owned by the Morris Canal and Banking Company and by Legislation of 1923 the directors of the Canal Company cannot in any manner, as trustees for the State, dispose of Canal Company's land. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission authorizes the Secretary to communicate with the office of the Attorney General with a view toward having the necessary legislation prepared for the acquisition of right of way at Mountain View Crossing on Route 8.

Dover Garage-Rental Agreement

On recommendation of the State Highway Engineer, Commissioner Kidde moved that a rental agreement be entered into with the Public Service Production Company, granting the said company the use of one-half of the Dover Garage at Dover, N.J., for the sum of $[illegible] per month. This was seconded by Mr. Stewart and adopted.

Purchase-Post Hole Digging Machine

State Highway Engineer Sloan reported to the Commission that under date of October 26, 1922, the State Highway Department entered into an agreement with [illegible] Brown for the rental of one power-driven post hole digging machine at $[illegible] per month, with the provision that the State Highway Department could at any time purchase the said machine for $375.00, any rentals paid to apply against the purchase price. Since the rentals to date amount to $229.93, it was recommended that authority be granted to purchase the machine by the payment of $145.07 additional, by which payment the State would secure an entirely new machine. On motion by Mr. Kidde, seconded by Mr. Stewart, the recommendation of the State Highway Engineer was approved and authority was given for the purchase of one power-driven post hole digging machine at $145.07.

Pennsville-Salem Road,
Sections 2 & 3.

On motion by Commissioner Kidde, seconded by Mr. Stewart, the State Highway Commission approves the acceptance of the Pennsville-Salem Road, Sections 2 and 3, Salem County, Motor Vehicle work, the same having been recommended by the State Highway Engineer.

Barnegat-Tuckerton Road, Section 2.

On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission approves the acceptance of the Barnegat-Tuckerton Road, Section 2, Ocean County, State Aid, the same having been recommended by the State Highway Engineer.

Branchville-Dingman's Road,
Section 2.

On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission accepted the completed work on the Branchville-Dingman's Road, Section 2, Sussex County, Motor Vehicle Aid work, the same having been inspected by Commissioner Kidde and recommended for approval by the State Highway Engineer.

Ross' Corner-Sussex Road,
Section 1-D.

On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission authorized the acceptance of the Ross' Corner-Sussex Road, Section 1-D, in Sussex County, Motor Vehicle Aid work, the same having been inspected by Commissioner Kidde and recommended by State Highway Engineer Sloan.

Central Avenue, Section 1.

On motion by Mr. Stewart, seconded by Mr. Kidde, the State Highway Commission approved of plans and specifications for Central Avenue, Section 1, Cape May County, Motor Vehicle Aid work, same having been recommended by the State Highway Engineer.

Bridgeton-Port Norris Road,
Sections 1 to 5.

On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission approved the plans and specifications for the Bridgeton-Port Norris Road, Cumberland County, Sections 1 to 5, Motor Vehicle Aid work, the same having been recommended by the State Highway Engineer.

Newton Ave., Borough of Sussex

On motion by Mr. Stewart, seconded by Mr. Jelin, the State Highway Commission accepted Newton Avenue in the Borough of Sussex, Sussex County, Motor Vehicle Aid work, the same having been recommended by the State Highway Engineer.

Force Account Agreements.

On motion by Mr. Stewart, seconded by Mr. Jelin, the State Highway Commission approved the following Force Account agreements for Township Aid work in the State, same having been recommended by the State Highway Engineer:

Stow Creek Township - Roadstown to Shiloh Road, Cumberland Co.
Hopewell Township - Friesburg Road to Seeley Mill Bridge Road, Cumberland County.
Fairfield Township - Back Neck Road, Cumberland County.
Shrewsbury Township - Asbury Avenue, Monmouth County.

Crosswicks-Chesterfield Road,
Section 1.

On motion by Mr. Stewart, seconded by Mr. Jolin, the State Highway Commission approved of plans and specifications for the Crosswicks-Chesterfield Road, Section 1, Chesterfield Township, Burlington County, Township Aid, the same having been recommended by the State Highway Engineer.

Plainsboro-Cranbury Neck-Princeton Jct. Road,
Sections 1 & 2

On motion by Mr. Stewart, seconded by Mr. Jolin, the State Highway Commission approved of plans and specifications for the construction of the Plainsboro-Cranbury Neck-Princeton Junction Road, Sections 1 and 2, Middlesex County, Township Aid, the same having been recommended by the State Highway Engineer.

[illegible] Road, [illegible] Township

On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission approved the transfer of $[illegible] from [illegible] Road in [illegible] Township, to [illegible] Boulevard in the same township, Cumberland County, Township Aid, the same having been recommended by the State Highway Engineer.

Alexander St., Princeton Twp.

On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission approved of an extension of time to August [illegible], [illegible], for Alexander St., Princeton Township, Mercer County, Township Aid, the same having been recommended by the State Highway Engineer. On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission accepted the completed work of Alexander St., Princeton Township, Mercer County, Township Aid, as recommended by the State Highway Engineer.

Bridgeton-Port Norris Rd., Sec. 1

State Highway Engineer Sloan presented to the Commission Federal Aid Projects Statements as prepared for the construction of the Bridgeton-Port Norris Road, Section 1, Cumberland County, and recommended approval of the same from Federal Aid funds already set aside for this purpose. On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission approved of Federal Aid Project Statement for the construction of Bridgeton-Port Norris Road, Section 1, Cumberland County, and authorized the Chairman to sign the necessary papers after approval by the State Highway Engineer.

Bridgeton-Port Norris Road, Sec.2

State Highway Engineer Sloan presented to the Commission, Federal Aid Projects statements as prepared for the construction of the Bridgeton-Port Norris Road, Section 2, Cumberland County, and recommended approval of the same from Federal Aid Funds already set aside for this purpose. On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission approved of Federal Aid Projects statement for the construction of the Bridgeton-Port Norris Road, Section 2, Cumberland County, and authorized the Chairman to sign the necessary papers after approved by the State Highway Engineer.

Hunterdon-Warren County Line Road

State Highway Engineer Sloan presented to the Commission a resolution from Warren County requesting that the road beginning at the Hunterdon-Warren County Line at Imlaydale, and running by way of Marlatts' Corner, Washington and Oxford, connecting with State Highway Route 5 at Buttzville, in Warren County, a total distance of 11.46 miles, be included in the 7% System, and further requesting that approval be given to the application of Federal Aid for the construction of that portion of said highway between Imlaydale and the Borough of Washington, a distance of 3.26 miles, all in accordance with the requirements of the Bureau of Public Roads. State Highway Engineer Sloan recommended to the Commission that approval be given to the resolution as presented by Warren County and that the application for Federal funds upon 3.26 miles be approved. On motion by Mr. Stewart, seconded by Mr. Kidde, the State Highway Commission approved of the recommendation of the State Highway Engineer and authorized the inclusion of the aforenamed route in the 7% System of Federal Roads and also approved the request for the construction of 3.26 miles thereof in accordance with the requirements of the Federal Bureau of Public Roads.

Route 3, Camden City Line-P.R.R.Br.

State Highway Engineer Sloan reported to the Commission the completion of Route 3 from Camden City Line to Pa. Railroad Bridge and recommended the acceptance of same. On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission approved the acceptance and final payment on Route 3, from Camden City Line to Pennsylvania Railroad Bridge as recommended by the State Highway Engineer.

Insurance

State Highway Engineer Sloan reported to the Commission that he had investigated the matter of insurance upon State Highway property and had found that a communication had been forwarded to the State House Commission by the previous State Highway Commission requesting information as to what property under the jurisdiction of the State Highway Commission was to be covered by insurance, since it was found that neither the garage in Trenton nor the Fernwood Service Station is covered by insurance. Commissioner Hide stated that he felt that the mutual form of insurance could be carried by the Fernwood Service Station, in view of its high class construction at a very nominal cost, and he moved that the State Highway Engineer be instructed to advise the State House Commission as to the value of the plant and machinery at the Fernwood Service Station, voicing the opinion of the State Highway Commission that consideration should be given to insuring the said buildings in view of the low rate which might be obtained thereon. This was seconded by Mr. Jolly and adopted.

Employments

State Highway Engineer Sloan reported to the Commission that the following employment matters had been approved by him since the last meeting of the Commission and he requested ratification of the same:

On

Sept. 24,	Geo. Peel,	Bridge Const. Insp.	$135.00 mo.
July 1,	Fred Battline,	Asphalt Plant Insp.	130.00 mo.
Sept. 24,	Nathan Schneiderman,	Draftsman,	165.00 mo.

Off

Sept. 15,	T. E. Kavanaugh,	Bridge Inspector	$165.00 mo.

Increases

Oct. 1,	Geo. Lear,	Lab. Mechanic -	from $125. to $150. mo.
" 1,	A.T.Wilson,	Asst. Chemist-	" $165. to $175. "
" 1,	D.L.Gage,	Asst. Chemist-	" $165. to $175. "

On motion by Mr. Stewart, seconded by Mr. Hide, the State Highway Commission approved of the employments as recommended by the State Highway Engineer.

Amboy Bridge, Route 1.

State Highway Engineer Sloan reported to the Commission that Right of Way Engineer Meeker had carefully examined the appraisals submitted to the Commission by appraisers for the property required for the North approach to the New Amboy Bridge on Route 4, and he reported to the Commission that it appeared that the appraisals as made were fair and just, and he recommended that offers not exceeding the appraisals be made, and in the event of such offers not being accepted, that condemnation proceedings be instituted. On motion by Mr. Hilke, seconded by Mr. Jelin, the State Highway Commission adopted the following resolution:

RESOLVED, that the State Highway Commission does hereby concur in the recommendations of the State Highway Engineer as to right of way required for the construction of the North approach to the new Amboy Bridge on Route 4, and

BE IT FURTHER RESOLVED, that the following offers be made for the purchase of the said property and in the event that said offers are not acceptable to the owners of the property, then condemnation proceedings shall be instituted for the acquisition of the State:

Property of C.Pardee Tile Works,	consideration	$27,143.77
Property of the National Fireproofing Co.,	"	41,743.50
Property of the W.J.Donnell Lumber Co.,	"	29,405.80

Road - Dover-Chester

Commissioner Hilke presented to the Commission a communication from James R. Dalrymple of Dover, New Jersey, relative to the road leading from Dover to Chester, and he moved that the communication be referred to Assistant State Highway Engineer Reed for inquiry and report. This was seconded by Mr. Jelin and adopted.

On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission recessed for luncheon at 1:15 P.M. to meet in regular session at 2:30 P.M.

The Commission reconvened at 2:30 P.M. as agreed, with the same members present as at the morning session.

Route #4

State Highway Engineer Sloan presented for discussion of the Commissioners the matter of right of way of the Jersey Central Traction Company paralleling Route 4, where he would recommend that the tracks of the railroad company be permitted to remain rather than have the same torn up at this time. The Commissioners approved generally of the recommendation of the State Highway Engineer but no formal action was taken at this time.

SEP 25 1923

New Bridge-New Brunswick

State Highway Engineer Sloan presented before the Commission a map of the district surrounding the location where it was proposed to construct a new bridge at New Brunswick at the property of the State College for Women. The Commissioners determined to view the location on the ground, and on motion by Mr. Kidde, seconded by Mr. Jelin, the meeting adjourned at 3:00 P.M. for the purpose of permitting time for the Commissioners to go from Trenton to New Brunswick in order to view the location of the proposed new bridge.

Respectfully submitted,

A. LEE GROVER,

Secretary.

MINUTES OF MEETING - October 2, 1923.

A regular meeting of the State Highway Commission was held at the offices of the Commission, Broad Street Bank Building, Trenton, New Jersey, on Tuesday, October 2, 1923. The meeting was called to order by Chairman Scott at 10:30 A.M.

Present: General H. L. Scott, Chairman; Mr. Walter Kidde,
Mr. Percy H. Stewart and Mr. Abraham Jelin.

Route 3, White Horse Pike

A delegation from Camden County, consisting of Mrs. Weikel, President of the Camden County Association for Beautifying the White Horse Pike; Mr. C. F. Wise, Chairman of the Camden County Road Committee; and Mr. J. J. [illegible], Camden County Engineer, were present and given a hearing. Mrs. Weikel spoke first, stating the purpose of their organization. Mr. Wise then spoke, stating that they had taken the matter of beautifying the White Horse Pike up with the various municipalities, but had found they could get little interest in the matter until the question of sidewalks was settled, the people feeling that this matter was of first importance, inasmuch as all pedestrians, including small school children, are compelled to use the roadway to walk on, and several deaths have already resulted. He stated that their purpose in coming before the Commission was to see if something could not be done to relieve this condition. It was not their idea, however, that the Commission should actually construct sidewalks, but they felt that it would be a great relief if the banks could be cut away and a space for walking be thus provided. Mr. Stewart advised the delegation that this matter had already been taken up and that the Attorney General had ruled that the Commission had no right to provide sidewalks. He suggested that the best way of obtaining the desired results would be through having legislation passed at the coming session of the Legislature. Mr. Kidde inquired as to the whole scheme and suggested that a sample five mile stretch be put in to educate the people as to what could be done. Mr. Wise asked if one of the Commissioners could not be appointed to go over the ground with them but was advised that the Commission did not feel that this was necessary inasmuch as they are already thoroughly familiar with the condition. After a considerable discussion of the matter, during which the delegation stated that they would like to have the Commission do, and that they would like something definite to report at the next meeting, it was directed that a letter be forwarded to Mrs. Weikel from the Commission, acknowledging her conference before the Commission and advising that the Commission is in sympathy with their purpose and will do everything in its power to relieve the dangerous conditions.

Mr. Albertson spoke to the Commission with reference to encroachments on the present road with special reference to those in Magnolia. He stated that the road as originally laid out was 66 feet but in some places the width had been cut down to 40 and 50 feet. He also stated that in Magnolia there were several houses which encroached on the right of way and suggested that the Commission remove these, advising that the right of way could be obtained without cost if the Commission would move the buildings back. He further stated that the Borough of Magnolia was ready to immediately lay sidewalks if these encroachments were removed. State Highway Engineer Sloan advised that he had already taken this matter up with the Commission and was proceeding with a test case to determine the Commission's right in this matter. Mr. Albertson stated that there was considerable doubt in his mind as to the right of the Commission to force these people to move their buildings, and suggested that the moving of same as suggested by him would work out much better. After a discussion of the matter, Mr. Stewart advised that the Commission could take no definite action in this matter until after a report of the State Highway Engineer as to the ruling of the Attorney General in the matter, inasmuch as the Commission is entirely governed by the Attorney General's advice in such matters.

Drain, Route 4, South Amboy

The Secretary informed the Commission that a delegation was presented from Middlesex County and desired a hearing. On motion duly seconded, a hearing was granted. There appeared Senator Morgan Larson, County Engineer, together with County Counsel Richardson and Freeholders Ley and Quackenbush. Mr. Ley informed the Commission that the County of Middlesex was at this time improving the road through the "Hole in the Wall" at South Amboy and desired to correct a drainage condition at the location of State Highway Route 4 in this vicinity. He reported that the conditions there at the present time were such as to cause the

State highway to be overflowed with water in heavy rains, and it was proposed to construct an under drain beneath State Highway Route 4, in which it was expected that the State Highway Commission would participate. Senator Larson presented to the Commission a pencil sketch of the conditions and suggested that the Commission investigate and make a decision. Commissioner Kidde inquired as to whether there was any possibility for assessments being levied abutting property owners who would benefit from the construction of this drain. County Counsel Richardson informed the Commission that only municipalities can levy assessments, and that counties cannot. After further discussion, Commissioner Jelin moved that the State Highway Engineer be authorized to make an investigation to determine the amount of State's liability involved, and to present a report as to the conditions existing. This was seconded by Mr. Stewart and adopted.

Motor Vehicle Repairs, Sussex Co.

The Secretary informed the Commission that Mr. Harvey Snook, County Engineer of Sussex County, and Mr. McKeon were present and Mr. Snook appeared before the Commission presenting a report of Motor Vehicle repairs as listed in their maintenance schedule, which report was requested by the State Highway Commission at its last meeting. Mr. Snook informed the Commission that while all the money mentioned in the schedule was not entirely used up on these roads yet this money was needed on large reconstruction jobs in the County and the County found itself at this time without any further moneys with which to continue the maintenance work. Mr. Snook asked that the Commission consider an additional allotment of $3000.00 beyond the $3000.00 granted at the last meeting. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission ordered the report received and the request of Sussex County taken under advisement.

Albany Street Bridge,
New Brunswick.

The Secretary presented an opinion from the Attorney General's Department concerning the right of the State to negotiate with the Public Service Corporation in the matter of the widening of the Albany Street Bridge, as follows:

Trenton, N.J., Sept. 24, 1923.

A. Lee Grover, Secretary,
State Highway Commission,
Trenton, N.J.

Dear Mr. Grover:-

I have your letter in which you set forth that the Public Service Railway Company was granted a franchise by the Board of Freeholders of Middlesex County for the right to operate cars over the Albany Street Bridge between Highland Park and New Brunswick. This franchise expired has expired. You desire to be advised whether the Commission under the circumstances has the right to negotiate for continuation of such franchise how far the State Highway Commission can go toward requiring participation by the Public Service Railway Company in paying a portion of the cost of widening the said bridge, and what participation the State Highway Commission may require from the public Service Railway Company toward the maintenance charges on said bridge.

Section 10 of Chapter 14 of the Laws of 1917 provides that in the construction, repair and maintenance of highways forming a part of the State Highway System, the Commission shall possess and exercise, in addition to those conferred by this act, all those rights and powers not incompatible with its functions nor prohibited by law which are now exercised by overseers of roads and boards of chosen freeholders in road construction, repair and maintenance.

Section 8 of the same Act provides that no franchise prior to its taking over as a State highway shall be granted, except under such restrictions, regulations and conditions as are or shall be approved and officially made known by the State Highway Commission to the body with authority to issue such privilege.

Section 12 of Chapter 15 of the laws of 1917, as amended in 1919, P.L. 523, authorizes the Commission to determine and adopt rules, regulations and specifications, and to enter into contract covering all matters and things incident to the acquisition, construction, reconstruction, maintenance and repair of State highways.

I am of the opinion, in view of the foregoing, that your Commission has the necessary authority to require by contract from the

Public Service Railway Company such participation in paying a portion of the cost of the maintenance or building or repair of the said highway as may seem to it advisable. I have, however, previously advised you that the Act establishing the State Highway Commission only authorizes it to make such charges as may be incident to the construction, maintenance, and repair of the highway, and may not make charges in addition to the cost of the maintenance thereof.

I am further of the opinion that the State Highway Commission has no power to require the Public Service Railway Company to participate in paying a portion of the cost of widening the bridge between Highland Park and New Brunswick over Albany Street in view of the clause in Section 7 of Chapter 14 of the Laws of 1917, which requires that work of maintenance, repair and extraordinary repair shall be done at the expense of the State. I think, however, that the corporation under proper rules and regulations by your Commission may be required to pay such portion of the cost of the maintenance and construction of tracks in the roadway and over the bridge as may be properly chargeable to it in the same manner as would be permissable for boards of freeholders to require.

Very truly yours,
Thomas F. McCran,
Attorney General.

State Highway Engineer Sloan informed the Commission further that the Public Service Railway Company has informed him that they did not understand that their franchise for crossing the Albany Street Bridge had expired as yet, and that they are still in a position to continue running their cars over this bridge. After discussion, Commissioner Stewart moved that the State Highway Engineer make a request upon the Public Service Railway Company to put in writing their claims as to their franchise rights on the Albany Street Bridge, New Brunswick. This was seconded by Mr. Jelin and adopted.

Pole Lines on State Highways

State Highway Engineer Sloan directed the attention of the Commission to an opinion of the Attorney General relative to a clause which the State Highway Department has been inserting in the contracts with the electric lighting and power companies, providing for the removal of their pole lines from the State highways, on one years notice to that effect by the State Highway Commission, in which opinion the Attorney General ruled that "I advise that the communication in question does not seem to be within the authorization of the statute in that the Commission may not request that the poles may be removed on one years notice." On motion by Mr. Stewart, seconded by Mr. Jolin, the State Highway Engineer was authorized to remove the one year clause in agreements in such cases as are appropriate and proper so to do in accordance with the advice of the Attorney General's Department.

Tunnel Plazas

The Secretary presented a communication from Hon. John F. Boyle of the Interstate Bridge & Tunnel Commission, transmitting a copy of an opinion received by him from Corporation Counsel Thomas J. Brogan of Jersey City, in the matter of the responsibility for the building of plazas on the New Jersey side of the Vehicular Tunnel. On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission directed that the communication be acknowledged with thanks and placed on file.

Minutes Approved

Commissioner Kidde reported having carefully read the minutes of the meeting of July 24th, and he moved that the same be approved as mailed with the following correction in the first paragraph concerning Route 18, changing the third line to read "The Secretary explained that the action taken was of a tentative nature, depending upon the situation in Tenafly." This was seconded by Mr. Jolin and adopted.

Route 17, Bergen County

The Secretary presented a communication from the Board of Freeholders of Bergen County requesting that the Commission take over Route 17 as defined under Chapter 5 of the Laws of 1923, from Newark by way of Kearney, Rutherford, Hackensack, Ridgewood and Ramsey, to the New York State Line. In connection with this the Commissioners discussed the possibilities of taking over additional State Highway mileage during the next year in view of the fact that the Motor Vehicle funds will increase and the amount of the work of the Maintenance Division will be cut down because of the increased improved State highway mileage. Commissioner Kidde moved that the communication be referred to the State Highway Engineer for full report as to the condition of the existing Route 17 and an estimate of the probable cost of its upkeep and maintenance. This was seconded by Mr. Jelin and adopted.

On motion by Mr. Kidde, seconded by Mr. Stewart, the Commission recessed for luncheon at 1: P. M. to meet in regular session at 2:30 P.M. The Commission reconvened at 2:30 P.M., as agreed, with the same members present as at the morning session.

Route 15, Millville

A delegation met the Commissioners informally on the situation as existing through Millville. The Secretary informed the Commission that the construction of Route 15, Section 4, through Millville was being held up pending the receipt of an opinion from the Attorney General as to the trolley track situation through Millville. On motion duly seconded, the Secretary was directed to make a request upon the Attorney General's Department for an early response to a request for an opinion in order that the construction of Route 15, through Millville might go forward as soon as practical.

(New) Amboy Bridge

Commissioner Kidde inquired of the State Highway Engineer as to the proposed time for the readvertisement of the Amboy Bridge. State Highway Engineer Sloan informed the Commission that it was proposed to readvertise in order to have bids received some time between November 28th and December 3rd.

Route 12, Section 2

The Secretary presented to the Commission a communication from the Morris County Board of Freeholders requesting the acceptance of a proposition from the Hartford Accident & Indemnity Company, a surety for the Oak Ridge Company, contractors on Route 12, Section 2, that there be deducted from the contract price that amount which it can be reasonably estimated that the contractor has saved by building that section of pavement between Station 0 plus 0 and Station 3 plus 0, in the manner in which it was done instead of in the manner in which the contract requested it to be done to an amount not exceeding the sum of $1000.00, and give in addition to the one year maintenance bond requested by the contract, a five years' maintenance bond. The Secretary informed the Commission that at a Commission meeting of July 17, 1923, it was suggested that the Morris County Board of Freeholders accept Route 12, Section 2, eliminating from the payment the total cost from the base pavement on the 300 feet in question, and request a five year maintenance bond covering both the surface and foundation of the 300 feet in question. Commissioner Stewart moved that the State Highway Commission again forward to Morris County its suggestion as to settlement for Route 12, Section 2, Denville-Parsippany, in accordance with action taken at a meeting held July 17, 1923. This was seconded by Mr. Jelin and adopted.

Route 4, Section 22, Asbury Park

The Secretary presented a communication from Mr. Gillespie of Asbury Park, New Jersey, executor for the James A. Bradley Estates, advising that he is owner of lands claimed by the City of Asbury Park to have been dedicated to public use and which it was proposed to use in the widening of Route 4, Section 22, through Asbury Park, and that he will protect the interests of said estates by whatever proceedings may be necessary for the purpose if just compensation is not made to him as executor of Mr. Bradley's estate. The Secretary informed the Commission that he had received informal advice from the Attorney General's Department that the Highway Commission is without interest in the matter but that Mr. Gillespie should be presented with notice of the agreement existing between the State Highway Commission and Asbury Park for the widening cost to be borne entirely by the City of Asbury Park, and also that the City of Asbury Park be informed of the Communication as received from Mr. Gillespie. On motion by Mr. Stewart, seconded by Mr. Jelin, the State Highway Commission directed that the communication of Mr. Gillespie be acknowledged and that he be advised of the clause in the agreement between the State Highway Commission and the City of Asbury Park concerning the construction of additional width on Route 4, Section 22, Main Street, Asbury Park, and further that the City of Asbury Park be notified of the communication received from Mr. Gillespie.

Route 4, Section 22, Asbury Park

The Secretary presented a report from the Construction Division recommending approval of the agreement with the City of Asbury Park for the extra width pavement on Route 4, Section 22, the same to be paid for by the City of Asbury Park. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission ordered approval of agreement between the City of Asbury Park and the State Highway Commission for the construction of extra-width pavement on Route 4, section 22, Main street, Asbury Park, total cost of said extra width, beyond that to be paved by the State Highway Department, to be borne by the City of Asbury Park, and the Chairman was authorized to execute the necessary contracts on behalf of the Commission.

Route 10, Section 1-A

The Secretary presented a communication from the Hon. J. F. Pearse, Secretary to the Governor, transmitting a letter received by him from Mrs. Caroline A. Shaver, concerning property acquired from her on Route 10, Section 1-A, in which Mrs. Shaver accuses the State Highway Commission of violating an agreement made with her. On motion by Mr. Kille, seconded by Mr. Jelin, the State Highway Commission directed that the communication be received and placed on file and that the Secretary inform Mr. Pearse that the agreement mentioned by Mrs. Shaver was executed by the Chairman of the former State Highway Commission pending the ratification of this action by the State Highway Commission, which ratification, however, was not given.

North Plainfield Township Road, Somerset County

The Secretary reported that the County of Somerset desired aid on the North Plainfield Township Road. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission directed that plans and specifications for the North Plainfield Township Road be rejected, due to lack of funds.

Schedule of Business

The Schedule of Business was next taken up for consideration item by item as follows:

OCT 2 1923

2399

Route 8, Section 10, M.P. 40.2, Bridge
Bound Brook-Lincoln Ave.

State Highway Engineer Sloan reported plans and specifications completed for bridge at M.P. 40.2 on Route 8, Section 10, Bound Brook to Lincoln Avenue Section, and recommended that advertisement be placed for same. On motion by Mr. Stewart, seconded by Mr. Jelin, the State Highway Commission unanimously adopted the following resolution:

RESOLVED, that plans and specifications for the construction of Bridge at M.P. 40.2 on Route 8, Section 10, Bound Brook to Lincoln Avenue Section, be and the same are hereby approved, and

BE IT FURTHER RESOLVED, that the Secretary is directed to place the necessary advertisement for the same after approval by the State Highway Engineer.

Route 1, Section 13

State Highway Engineer Sloan reported the completion and recommended acceptance and final payment on Route 1, Section 13, Highland Park-Stelton Road, work having been completed on September 22, 1923. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission unanimously adopted the following resolution:

RESOLVED, that the State Highway Commission does hereby accept the completed work on Route 1, Section 13, Highland Park-Stelton Road Section, and

BE IT FURTHER RESOLVED, that the Chief Clerk is authorized to sign the necessary papers after approval by the State Highway Engineer.

Route 1, Section 14

The State Highway Engineer reported the completion and recommended acceptance and final payment on Route 1, Section 14, Stelton Road-Metuchen Section, work having been completed on August 6, 1923. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission unanimously adopted the following resolution:

RESOLVED, that the State Highway Commission does hereby accept the completed work on Route 1, Section 14, Stelton Road-Metuchen Section, and

BE IT FURTHER RESOLVED, that the Chief Clerk is authorized to sign the necessary papers after approval by the State Highway Engineer.

Route 4, Section 15

State Highway Engineer Sloan reported the completion and recommended acceptance and final payment on Route 4, Section 15, Lakewood (County Section) work having been completed on December 1, 1928. Commissioner Jelin reported having inspected this work and moved the acceptance of same in accordance with the terms of the Reimbursement Agreement, as entered into with Ocean County.

Route 4, Section 16

State Highway Engineer Sloan reported the completion and recommended acceptance and final payment of Route 4, Section 16, Toms River Section, work having been completed on December 1, 1928. Commissioner Jelin reported having inspected this work and moved the acceptance of the same in accordance with the terms of the Reimbursement Agreement, as entered into with Ocean County.

Route 9, Section 8-A RT.16 Sec 6 A and Rt 9 Sec 8 A

State Highway Engineer Sloan recommended approval of purchase agreements for the acquisition of a number of properties on State Highway Sections and recommended approval by the State Highway Commission. On motion by Mr. Jelin, seconded by Mr. [illegible], the State Highway Commission unanimously approved of the purchase of the following parcels of property on State Highway Sections.

Route 9,	Section 8-A,		Est. T.?. Williams	$1475.00
" 16,	" 6-A,	Parcel #1,	Wm. J. Phillips	$1000.00
" 16,	" 6-A,	" #4,	L.A. DuFour et ux	$ 900.00
" 16,	" 6-A;	" #5,	M.A. Averitt,	$ 75.00
" 16,	" 6-A,	" #7,	Wm. Phillips, Jr.	$ 1.00 and steps.
" 16,	" 6-A,	" #8,	Susan A. VanDorn	$277.00
" 16,	" 6-A,	" #9,	Somerset Crystal Spring Company.	$1000.00
" 9,	" 8-A,	" #1,	James Dow	$ 25.00

Advisory Board

State Highway Engineer Sloan reported to the Commission that he had received a letter from Mr. F. F. Goodrich, member of the Advisory Board for the study of the Vehicular Tunnel traffic, requesting a copy of the report as submitted to the State Highway Commission. The State Highway Engineer also requested information as to whether copies are to be furnished other members of the Board. On motion by Mr. Kidde seconded by Mr. Stewart, the State Highway Commission directed that additional copies of this report be prepared in order that distribution of same may be made to the members of the Advisory Board.

Automobiles

State Highway Engineer Sloan recommended to the Commission that approval be given for the purchase of nine automobiles for the use of Division Engineers and others in the State Highway Department, giving in trade therefor eight Buick automobiles and one Essex automobile, all of these cars having outlived their usefulness and economy of upkeep to the State Highway Department. The State Highway Engineer informed the Commission that it was contemplated to request the Purchasing Agent to purchase four Essex Coaches and five five-passenger Buick Double Service Sedans. Both Commissioner Kidde and Commissioner Jolin suggested that the purchase be standardized to one particular make of car in order that there may be more economy of operation and upkeep. State Highway Engineer Sloan recommended that authority be given to request the State Purchasing Agent to secure quotations for nine Double-Service Buick Sedans, giving in trade as part of the purchase price, eight Buick automobiles and one Essex automobile. On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission approved the recommendation of the State Highway Engineer and authorized a request to be made upon the State Purchasing Agent for negotiations toward this purchase.

Commissioner Kidde called attention to the conditions existing with reference to the new Cadillac automobiles just received wherein under existing regulations the State Highway Commission could not purchase a high class cord tire for these machines which do such heavy duty for the Commission, and he moved that the Secretary ascertain from the State Purchasing Agent whether it would be possible for the State Highway Commission, in the case of the two new Cadillac cars assigned to the State Highway Engineer and the State Highway Commission, to purchase high grade cord tires for entire equipment on these automobiles. This was seconded by Mr. Jolin and adopted.

Commissioner Kidde further inquired whether any tabulations had been made on the nature of tire costs to the State by reason of the use of a cheaper tire as purchased under the State contract. The Secretary informed the Commission that such a record had been kept in the past and had been forwarded to the State Purchasing Agent, but at the present time a new contract had just been entered into which gave a ten thousand mile guarantee with every cord tire furnished to the State. The Commission directed that careful inquiry be made as to the comparative cost of standard cord tires with those now in use, in order that the same may be submitted to the State Purchasing Agent for his guidance in the purchase of tires.

Evesham Road, Camden County

On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission approved acceptance of completed work on the Evesham Road, Camden County, Motor Vehicle Aid work, as recommended by the State Highway Engineer.

County Avenue, Hudson County

On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission approved award of contract for County Avenue, Hudson County, Motor Vehicle Aid, as approved by the Board of Freeholders of Hudson County and recommended by the State Highway Engineer.

Bergen Turnpike

On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission approval of contract for Bergen Turnpike from Hudson Boulevard to the Hudson-Bergen County Line, by Hudson County Motor Vehicle Aid and as recommended by the State Highway Engineer.

Springfield Avenue and Branch Mills Road.

On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission approved the acceptance of Springfield Avenue-Branch Mills Road, Union County, Motor Vehicle Aid, the same having been recommended by the State Highway Engineer.

Alpha Boro Road, Camden County

State Highway Engineer Sloan recommended approval of plans and specifications for the Alpha Boro Road, Warren County, Motor Vehicle Aid. Commissioner Kidde inquired as to whether this was the work on which it was proposed to have the cement donated by the Alpha Cement

Company in the vicinity, and he was informed in the affirmative. He, therefore, moved that the State Highway Commission approve plans and specifications for the Alpha Bore Road, Warren County, Motor Vehicle Aid work, subject to a proper supply of cement being furnished for this work in accordance with a proper agreement. This was seconded by Mr. Stewart and adopted.

Shore Road-Atlantic County

On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission approved of specifications for the Shore Road, Atlantic County, Motor Vehicle Aid work, as recommended by the State Highway Engineer.

Lignin Binder, Atlantic County Road

On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission approved of specifications as presented by Atlantic County for the application of Lignin Binder to gravel roads of the county, as per their motor vehicle schedule.

Somerset County, Township Aid Work

State Highway Engineer Sloan presented to the Commission, with his recommendation, a resolution by Somerset County, appropriating $[illegible] in its 1924 budget together with as much more as is necessary to reserve the full amount of $24,000.00 as set aside for Somerset County on Township Aid work. On motion by Mr. Jelin, seconded by Mr. Stewart, the resolution was ordered held over until the next meeting of the Commission.

Township Aid Force Account Agreements

On recommendation of State Highway Engineer Sloan, Commissioner Jelin moved the approval of the following Township Aid Force Account agreements:

Cumberland County, Downe Twp. Delaware Way, Section 2,
" " Maurice River Twp. Cumberland-Pt. Elizabeth Rd.
" " Maurice River Twp. Heislerville Road,
" " Commercial Twp., [illegible],
" " Harrison Twp., Mullica Hill-Richwood and Pitman Road.

This was seconded by Mr. Kidde and adopted.

Extension of Time-Dey Road

On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission approved of an extension of time to September 15, 1925, on Dey Road, Cranbury Township, Middlesex County.

On motion by Mr. Jolin, seconded by Mr. Kidde, the State Highway Commission approved of final payment and acceptance of Dey Road, Cranbury Township, Middlesex County, same having been recommended by the State Highway Engineer.

Sayres-Neck Road, Lawrence Township

On motion by Mr. Jolin, seconded by Mr. Stewart, the State Highway Commission approved of final payment on Sayres-Neck Road, Lawrence Township, Cumberland County, same having been recommended by the State Highway Engineer.

Sewell Avenue, Mercer County

State Highway Engineer Sloan recommended to the Commission that permission be granted to Hamilton Township, Mercer County, to make four inlets on Sewell Avenue which they propose to construct, with the basin built by the State on Sewell Avenue for the purpose of draining South Broad Street near Trenton. On motion by Mr. Kidde, seconded by Mr. Jolin, the recommendation of the State Highway Engineer was adopted.

Employments

The State Highway Engineer presented the following employments as approved by him since the last meeting of the Commission, and recommended ratification of the same.

Tully, Walter F.	Draftsman,	Bridge Division,	$120.00 per mo.
[illegible], Jas. [illegible],	Jr. Engr.	Central "	125.00 " "
Higgins, John [illegible],	Car. Asst.	" "	.45 " hr.

Increases

Michael Calvin,	M. T. D.	$.40 to .45¢ per hr.
G. D. Sutterley,	Jr. Clerk Steno.	$115.00 to $120.00 per mo.
J. [illegible]. French,	Jr. Steno.	$115.00 to $120.00 " "

On motion by Mr. Stewart, seconded by Mr. Jolin, the State Highway Commission ratified the employments as presented by the State Highway Engineer.

A. G. A. Signs

Commissioner Kidde called attention to a communication received by him from the Board of Public Utilities Commissioners, calling attention to a conflict of signs on Mantua Avenue, Route [illegible], South of Woodbury, where a sign of the American Gas Accumulator Company was in close proximity to a newly installed and electrically operated flash signal of the Railway Company. Commissioner Kidde also called attention to the report forwarded by the Public Utilities Commission on the hearing held covering the matter of standardization of highway and railroad crossing signals, at which time he had voiced the feeling of the State Highway Commission that they were only too glad to cooperate with the Public Utilities Commission in this matter.

Commissioner Jelin stated that although the Public Utilities Commission was encouraging the removal of the A. G. A. Signs, he did not feel that they should be abolished until there was provided a more satisfactory system of signals. Commissioner Kidde stated that he felt that the Department should cooperate with the Public Utilities Commission and moved that the State Highway Engineer be instructed to request the removal of A. G. A. Signs in close proximity to railroad crossings where the railroads have installed the new type of electrically operated type of flashing signals, and that the American Gas Accumulator Company be requested to place such signs as are moved from these locations at other dangerous points on the State Highway system. This was seconded by Mr. Stewart and adopted. On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission directed that the Secretary acknowledge receipt of the communication from the Board of Public Utilities Commission and express the desire of the State Highway Commission to cooperate with the Commissioners in matters of this kind, and further request that the Public Utilities Commission issue an order for the removal of the A. G. A. Signs located on Mantua Avenue, South of Woodbury, the removal of which was asked in their letter of the 5th.

Highway Mileage Publicity

Commissioner Jelin took occasion at this time to call attention to the fact that in publicity given to the mileage of roads under the State Highway Commission, that the total mileage should include all of those roads on which the State is financially interested with State Aid, Motor Vehicle Aid and Federal Aid. Commissioner Kidde expressed the belief that the general impression to be gained by the public as to the mileage controlled by the State Highway Commission, was that roads constructed and maintained exclusively by the Highway Commission formed what is a trunk line system of the very highest type and should be so considered.

Request for Hearing

Commissioner Jelin reported that a request for a hearing had been made for the meeting of October 9th, by the Manufacturers' Association and the Board of Trade of New Brunswick on the matter of the new bridge at that point. On motion duly seconded, a meeting was ordered granted.

Respectfully submitted,
A. LEE GROVER,
Secretary.

MINUTES OF MEETING - October 9, 1923.

A regular meeting of the State Highway Commission was held at the offices of the Commission, Broad Street Bank Building, Trenton, New Jersey, on October 9th, 1923. The meeting was called to order at 10:30 A.M. by Chairman Scott.

PRESENT: General H. L. Scott, Chairman; Mr. Percy H. Stewart, and Mr. Abraham Jelin.

New Brunswick Bridge

The Secretary advised that a request for a hearing had been received from the Board of Trade of New Brunswick and that their delegation was present at this time. On motion, duly seconded, a hearing was granted to a delegation from the New Brunswick Board of Trade headed by Mr. Elmer E. Connolly, President, and Mr. John J. Scott, the State Highway Engineer presented a map on which were shown the various routes which have been projected and are being considered for use as approaches to a new bridge across the Raritan and explained same in detail. Answering an inquiry as made by one of the delegation, the State Highway Engineer advised that he had received word from the War Department that a bridge giving a clearance of fifty feet will be approved for use above the lock. At any location below the lock, a clearance of one hundred thirty-five feet or use of a drawspan is required. General Scott addressed the delegation, setting forth his stand in the question of the proposed bridge across the Raritan which he felt was the stand in the question of the proposed bridge across the Raritan which he felt was the stand of the entire Commission, stating that their idea in the matter had been that they felt that the Women's College should not be allowed to go ahead with their buildings without having been advised that the Commission was considering the erection of a new bridge. He further stated that since coming into office, the Commission had been confronted with the tremendous traffic problems throughout the State and they fully realized that a new bridge would have to be constructed across the Raritan somewhere in the vicinity of New Brunswick, and that the chief concern of the Commission was to see that same was placed in the most practical and economical position and where it would be of the most benefit to the entire State. Mr. Stewart also spoke to the delegation, confirming the position as explained by General

Scott and advising that his mind is still open on the best thing to do under the circumstances.

Mr. Jelin stated that several communications had been received from manufacturers and residents of New Brunswick who were unable to attend the meeting and suggested that these be read. On motion by Mr. Stewart, seconded by Mr. Jelin, a petition from residents of Highland Park and communications from E. R. Squibb & Sons, and J. W. Johnson, President of Johnson & Johnson, were read and ordered received and placed on file. Mr. Jelin also advised that a traffic count had been taken on this bridge on October 6th, and on motion duly seconded, this was read and ordered received and placed on file.

Mr. Elmer J. Connolly, President of the Board of Trade, addressed the Commission, stating that the Board of Trade was unanimous in the opinion that a new bridge should be built in the vicinity of New Brunswick, and their purpose in coming before the Commission at this time was to urge the necessity for early construction of same. He further stated that they had no preference in the matter of a site but believed that they could depend upon the Commission to select the most economical and practical location. Mr. Leslie P. Johnson next spoke, representing the Manufacturers' Committee of the Board of Trade, reading a resolution which had been passed by the Committee on October 9th by a unanimous vote, in which it was urged that the Commission gather and publish all obtainable data as to the cost and mileage of various routes and that the Board of Trade be granted another hearing after the investigations have been completed and before a final decision is made. On motion by Mr. Jelin, seconded by Mr. Stewart, the resolution was ordered received and placed on file.

Mr. Kidde came into the meeting at this time. Mr. Sydney B. Carpenter addressed the Commission, reading a letter which he had forwarded to the New Brunswick Home News for publication, in which his opinions were set forth. On motion, duly seconded, this communication was ordered received and placed on file. Mr. John J. Morrison, Mayor of New Brunswick, advised that the City Commission had realized that something was to be done to take care of the traffic and they had their City Engineer make surveys and after an investigation, had passed a resolution in which they went on record as favoring the Jones Avenue Route. He further stated that they would not insist upon this route but were satisfied to leave the decision up to the State Highway Commission. He also raised the question as to whether the use of Jones Avenue would not be a benefit rather than an injury to the Women's College, inasmuch as by putting the road through there with the building of a wall along same, they would be in a way separated from the town and have more privacy than is now possible.

Mr. James Neilson spoke, setting forth the objection of the College, in which he stated that he felt that the college was a wonderful asset to the State and there was a great need for the instructions it was giving to girls. He stated that they felt that the running of this road along the campus would be a great detriment. He spoke of the great deal of money that had been raised and expended in beautifying the grounds. The Chief objection which he raised was that the noise and vibration from the vehicles going back and forth would interfere seriously with the conduct of the classes.

There was considerable further discussion of this matter which was joined in by several of those present, particularly Prof. Jacob G. Lipman, Director of the New Jersey Experiment Station, Mr. James A. O'Connell, and Mr. Joseph J. Feaster, City Commissioner. After the various opinions had been submitted, Mr. Connolly, President of the Board of Trade, stated that he felt that with a little cooperation they could get what they want and adjust the matter so that it would be arranged satisfactorily to everyone. He thanked the Commission for giving them an opportunity to appear before them and asked that they give the matter their careful attention and get the bridge started at the earliest opportunity.

Mr. Stewart inquired if a resolution had been passed and if the entire membership of the trustees of the college was unanimous in being against the Jones Avenue route. Mr. Neilson stated that the Board of Trustees had not met since the matter had come up and he was not in a position to speak for the entire Board. Mr. Lipman stated that the Trustees would hold a meeting on next Friday and suggested that it might be well to have representatives of the Commission and the City of New Brunswick at the meeting. Mr. Jelin stated, however, that he felt it would be better if the Trustees would appoint a Committee on this matter to meet with the Commission, the Board of Trade, Manufacturers Committee, and other interested parties at some convenient time. Mr. Neilson advised that he would take up the matter with the Trustees at the next meeting and endeavor to have such a Committee appointed.

Warren County Detours-7% System

The State Highway Engineer brought up the matter of roads in Hunterdon County which had been used as detours and on which the Commission had acted favorably toward having same included in the 7% System of Federal Aid highways. He stated that the Commission had authorized Mr. Muir to place same in as good condition as before it was used as a detour, which would mean a considerable amount of work on the section from Asbury to Marlatts Corner. The county has asked that instead of maintenance that this be made a reconstruction job and he recommended that Mr. Muir be authorized to proceed on the basis of reconstructing same. On motion by Mr. Jelin, seconded by Mr. Stewart, the Commission approved the recommendation of the State Highway Engineer and authorized Mr. Muir to proceed with the reconstruction of the detour from Asbury to Marlatts Corner.

Inspections - Invitation

The Secretary presented a letter which had been received from the Board of Commerce & Navigation by General Scott inviting the Commission to accompany the Board on an inspection trip on October 19th and 20th. During the discussion, it developed that each of the Commissioners had received a similar letter and on motion by Mr. Jelin, seconded by Mr. Kidde, it was directed that each Commissioner acknowledge his letter individually and advise the Board of Commerce & Navigation whether or not he will be able to attend.

North Jersey Rapid Transit Commission

The Secretary presented a letter which had been received by General Scott inviting the members of the Commission to a conference between the Governor of the State of New Jersey, the North Jersey Rapid Transit Commission, and the members of the New York Port Authority. On motion by Mr. Jelin, seconded by Mr. Kidde, the Commission agreed that the members of the Commission and the State

Highway Engineer should attend this conference and directed that the Secretary send out notifications to the members sometime prior to October 24th, the date of the said conference.

Township Aid

The Secretary presented an opinion that has been received from the Attorney General regarding the right of the Commission to refuse approval of applications for township aid where the amount applied for by the townships of any county does not exceed the sum of $25,000.00, in which it was stated that the Commission has no right to refuse consideration of applications from the townships up to the sum of $25,000.00, the discretion of the Commission applying only as to the surplus. On motion by Mr. Jelin, seconded by Mr. Stewart, the opinion of the Attorney General was ordered received and placed on file.

Township Aid, Somerset County

In connection with the above opinion, there was again presented the resolution of Somerset County, appropriating such money as necessary in order to reserve $25,000.00 for Somerset County township aid work. After a discussion of the matter, Mr. [illegible] moved that Somerset County be advised that the proper method to be followed would be for the townships to make application for this money, it being outside the jurisdiction of the county to apply for the same. This was seconded by Mr. Stewart and carried.

On motion by Mr. Jelin, seconded by Mr. Stewart, the Commission adjourned for luncheon to meet in regular session at 2:30 P.M.

The Commission reconvened at 2:45 as agreed with the same members present as at the morning session.

7% System Trenton-Woodsville Road

The Secretary presented a resolution from the Mercer County Board of Freeholders requesting the Commission to place the road from Trenton to Woodsville via Ewingville, Pennington and Marshall's Corner in the System of State Highways and further that the Commission request the Federal Government to include the said road in the seven per cent system. Mr. Kidde moved that the Mercer County Board of Freeholders be advised that the Commission is aware of the importance of this road and expects to include same in its recommendations for State Highway Routes, and that no action be taken to include the same in the Federal System at this time, inasmuch as there is no Federal Aid available at the present time. This was seconded by Mr. Stewart and adopted.

Commendations

The Secretary presented a communication from the Maryland Motor Federation of Baltimore, Mayrland, commending the Commission upon information as to road conditions which it has been furnishing. On motion by Mr. Jelin, seconded by Mr. Kidde, the communication was ordered received and filed.

Rejection of State Aid-Middlesex County

The Secretary presented a communication from Frederick F. Richardson, County Counsel of Middlesex County, requesting the Commission to pass a resolution rejecting approval of State Aid because no money is available for State Aid in the construction of Somerset Street, New Brunswick. On motion by Mr. Jelin, seconded by Mr. Stewart, the Commission directed that the Boards of Freeholders of Middlesex and Somerset Counties be advised that the Commission has no funds available at this time for aid in the construction of a portion of Somerset Street, New Brunswick, and, therefore, the plans and specifications are rejected.

Route 4, Section 28

The Secretary presented a communication from Miss A. [illegible] King, City Clerk of Asbury Park, transmitting a copy of letter written by the City Solicitor of Asbury to Samuel [illegible] Gillespie, in reference to the widening of Main Street, through Asbury Park. On motion by Mr. Jelin, seconded by Mr. Kidde, the Commission directed that the communication be received and filed.

Route 12, Section 2

The Secretary presented a communication from the Morris County Board of Freeholders with further reference to the acceptance of Route 12, Section 2, Denville-Parsippany, in which they advised that the bonding company had rejected the suggestion of the Commission reconsider this matter. Mr. Kidde moved that the Board of Freeholders of Morris County be advised that the Commission has given careful consideration to the matter and feel that the only alternative to the suggestion as previously made is to tear up the section in question and lay a new pavement, and that the bonding company be advised that if they desire to discuss this matter further they will be given an opportunity to appear before the Commission at its next meeting. This was seconded by Mr. Jolin and adopted.

Route 15, Millville Sec 4

The Secretary presented a communication from the Municipal League of Millville, requesting the early completion of Route 15, through Millville. Mr. Kidde moved that this matter be referred to the State Highway Engineer for investigation and report in connection with the next year's program and that they be so advised. This was seconded by Mr. Stewart and adopted.

Strauss Plans

The Secretary presented a communication from the Strauss Bascule Bridge Company setting forth a saving that could be effected through the use of a bascule type of span. In this connection the State Highway Engineer advised that in his opinion any saving that could be effected would be offset by the increased maintenance cost and delay in construction due to making new plans. Mr. Jolin moved that the recommendation of the State Highway Engineer be adopted and that the Strauss Company be advised that it will not be possible to make changes in the plan at the present time. This was seconded by Mr. Stewart and adopted.

Right of Way, Route 6

The State Highway Engineer submitted for the reconsideration of the Commission purchase agreements covering the property of Frank Schulster and Jennie E. Schulster on Route 6, Section 4-A, on which the Commission had previously authorized an offer of $1,000.00 or condemnation, and recommended that the Commission approve of the purchase of same for the sum of $1400.00. On motion by Mr. Jolin, seconded by Mr. Stewart, the Commission approved of the recommendation of the State Highway Engineer and authorized the purchase of property on Route 6, Section 4-A, from Frank Schulster and Jennie E. Schulster, in the sum of $1400.00 and 171 cubic yards of fill.

Right of Way, Route 10

The State Highway Engineer recommended approval of agreement for the purchase of right of way from Albert H. [illegible] and

Letitia F. Wightman on Route 16, Section 6, in the sum of $344.00. On motion by Mr. Jelin, seconded by Mr. Stewart, the Commission approves of the recommendation of the State Highway Engineer and approval of agreement for the purchase of right of way from Albert F. Wightman and Letitia F. Wightman, on Route 16, Section 6, in the sum of $344.00.

Right of Way, Route 16

The State Highway Engineer recommended approval of purchase agreements for the purchase of right of way, Route 16, Section 6, from George Mattick in the sum of $50.00. On motion by Mr. Jelin, seconded by Mr. Stewart, the Commission approved of the recommendation of the State Highway Engineer and authorized the purchase of right of way on Route 16, Section 6, from George Mattick in the sum of $50.00.

Right of Way, Route 16

The State Highway Engineer recommended approval of purchase agreements with [illegible] W. Childs and Frederick W. Childs for the purchase of Parcel [illegible]-A, and Parcel [illegible]-B, on Route 16, Section 6, in the sum of $1.00 each. On motion by Mr. Jelin, seconded by Mr. Stewart, the Commission approved of the recommendation of the State Highway Engineer and authorized the purchase of Parcels [illegible]-A and [illegible]-B of Route 16, Section 6, from [illegible] W. Childs and Frederick W. Childs, for the sum of $1.00 each.

Right of Way, Route 8

The State Highway Engineer recommended approval of an agreement for the construction of a temporary bridge and for permanent slope rights on Route 8, Section 14, from [illegible] for the consideration of $1.00. On motion by Mr. Jelin, seconded by Mr. Stewart, approval of agreement was given for an easement for the construction of a temporary bridge and for permanent slope right on Route [illegible], Section [illegible], from [illegible] for the consideration of $1.00.

Right of Way, Route [illegible]

The State Highway Engineer recommended approval of purchase agreements for Parcel #1 on Route 8, Section 14, from James Manning and Katherine Manning for a consideration of $[illegible].00. On motion by Mr. Jelin, seconded by Mr. Stewart, the Commission approved of the purchase agreements for Parcel #4, on Route 9, Section 10, from James Mannion and Katherine Mannion, for the sum of $2[illegible].

Right of Way, Route 9

The State Highway Engineer recommended acceptance of deed from the inhabitants of the City of Plainfield, Borough of North Plainfield, and the Borough of Dunellen, deeding land on Route 9, Section 10, to the State for the sum of $1.00. On motion by Mr. Jolin, seconded by Mr. Stewart, the Commission approved of acceptance of deed from the inhabitants of the City of Plainfield, Borough of North Plainfield and the Borough of Dunellen, deeding land on Route 9, Section 10, to the State for the consideration of $1.00.

Condemnation, Route 5, Section 2

The State Highway Engineer recommended appeal from award of $2,640.00 by condemnation commissioners to Jacob Heinochowitz on Route 5, Section 2, be authorized. On motion by Mr. Jolin, seconded by Mr. Stewart, the Commission authorized that an appeal be made from award of $2,640.00 as made by the condemnation commissioners to Jacob Heinochowitz on Route 5, Section 2.

Right of Way, Route 5

The State Highway Engineer submitted a report in connection with the claim of Henry C. Beecher concerning property [illegible] for the construction of Route 5, Section 2, Budd Lake, and recommended that the Commission authorize an expenditure of $80.00 for making of a fill at the property of Mr. Beecher as requested. On motion by Mr. Jolin, seconded by Mr. Stewart, the Commission approved of the recommendation of the State Highway Engineer and directed that a fill be made at the property of Mr. H. C. Beecher on Route 5, Section 2, at an expenditure of $80.00.

Right of Way, Amboy Bridge

The State Highway Engineer reported that a tentative offer of $29,405.80 had been made to the Bonnell Lumber Company for property necessary on account of construction of Perth Amboy and the offer refused by them, and recommended that a formal tender of this amount be made and in the event of refusal by the Bonnell Lumber Company to accept same, that condemnation be proceeded with. On motion by Mr. Jolin, seconded by Mr. Stewart, the Commission approved of the recommendation of the State Highway Engineer and adopted the following resolution, directing that a formal tender of $29,405.80 be made to the Donnell Lumber Company for property necessary on account of the construction of the Amboy Bridge, and in event of their refusal to accept same, that condemnation proceedings be instituted.

RESOLVED, that this Commission hereby determines to acquire in the name of the State of New Jersey, for public use in the construction of State Highway Route 4, Perth Amboy Bridge, ALL that certain Lot, tract or parcel of land and premises, situate, lying and being in the State of New Jersey, and more particularly described as follows:

Beginning at a point, said point being the northeast corner of land of the Donnell Lumber Company and the southeast corner of land of the C. Pardee Tile Works, and approximately at right angles to the center line of Route 4 at Station 2 plus 52, and running

Thence (1) south twenty-eight degrees, thirty-four minutes west, one hundred and seventy-two feet and fifty-one hundredths of a foot (172.50');

Thence (2) south fifty degrees, six minutes west, two hundred and thirty-three (233') more or less;

Thence (3) south six degrees, thirty-seven minutes west, two hundred and forty-three feet (243') more or less;

Thence (4) in a southwesterly direction and parallel to said center line a distance of eight hundred and thirteen feet (813') more or less, to the northerly Bulkhead Line in the Raritan River;

Thence (5) along said Bulkhead Line north forty-six degrees, fifty-three minutes and fifty-eight seconds west, (Magnetic) one hundred and sixteen feet (116') more or less, to the dividing line between lands of the Donnell Lumber Company and the National Fireproofing Company;

Thence (6) along said dividing line, north forty degrees, twelve minutes east, forty-four feet and fifty-five one hundredths of a foot (44.55');

Thence (7) along said dividing line, north thirty-five degrees no minutes east, seven hundred and forty-nine feet and eighty-seven one hundredths of a foot (749.87');

Thence (8) along said dividing line, north eleven degrees, forty-nine minutes east, one hundred and fifty-seven feet (157') more or less;

Thence (9) in a northeasterly direction and parallel to the center line of Route 4, for a distance of four hundred and fifty-eight feet (458') more or less, to the dividing line between lands of Donnell Lumber Company and the C. Pardee Tile Works;

Thence (10) along said line south sixty-one degrees, twenty-six minutes east, one hundred and three feet (103') more or less, to the place of beginning.

CONTAINING three and five tenths acres (3.5 A) more or less;

Excepting that portion of land belonging to the Raritan and North Shore Railroad.

The State Highway Engineer is hereby authorized and directed, on behalf of this Commission, to make an offer of the sum of $29,405.80 to the owners or owner of said lands and premises for the conveyance of the same to the State of New Jersey free and clear of all encumbrances, and upon the failure of such owner or owners to accept such offer, or if for any other reason said lands and premises cannot be immediately acquired by agreement with such owners or owner, then the Attorney General of the State of New Jersey is hereby authorized and directed to institute condemnation proceedings for the acquisition of said lands and premises.

The State Highway Engineer submitted a report as to damage done to Ford Sedan of Mr. J. S. McCurdy by one of our Maintenance men throwing a shovel full of slag against same, and recommended that a claim of $25.00 for the refinishing of the car be approved. On motion by Mr. Stewart, seconded by Mr. Jelin, the Commission directed that a claim for damages in the amount of $25.00 be allowed to J. S. McCurdy on account of damages done through one of our men.

Route 15, Section 4

The State Highway Engineer submitted an opinion from the Attorney General in the matter of the obligations of the Cumberland County Traction Company as to the relocation of its tracks and pavement on Route 15, Section 4, and recommended that the Commission authorize the advertisement of this work and that the trolley company be advised that they will have to pay for the pavement of the tracks after same have been relocated by the Commission. On motion by Mr. Kidde, seconded by Mr. Jelin, the Commission approved of the recommendation of the State Highway Engineer and ordered advertisement of the work on Route 15, Section 4, with the understanding that the trolley company will be required to pay for the cost of paving the trolley tracks, if such cost can be collected.

Millville Hearing

In connection with the above matter, the Secretary advised that the City of Millville had been informed that they would be given an opportunity to appear before the Commission before the matter was settled. On motion by Mr. Kidde, seconded by Mr. Jelin, the Commission directed that the City of Millville be advised that they will be given an opportunity to appear before the Commission at its next meeting.

Right of Way, Route 16

The State Highway Engineer submitted purchase agreements covering the Heman Childs property on Route 16, Section 6-A, on which the consideration was $7,800.00. There was considerable discussion on this matter, the sense of the Commission being that this amount was considrable, in view of the damage done, and on motion by Mr. Kidde, seconded by Mr. Stewart, the Commission directed that this purchase be held up until such time as Commissioners Kidde and Stewart shall have an opportunity to make further investigations in regard to same.

Township Aid-Camden County

The State Highway Engineer recommended approval of several Township Aid Force Account agreements covering roads in Winslow Township, Camden County. On motion by Mr. Kidde, seconded by Mr. Jelin, the Commission approved of the following Township Aid Force Account agreements:

Blue Anchor-Brooklyn-Sicklerville Road, Winslow Twp., Camden Co.
Walker Road, Winslow Township, Camden County.
Spring Road, Winslow Township, Camden County.

Broadway - Asbury Rd

Township Aid, Warren County

The State Highway Engineer recommended approval of extension of time and final acceptance on Broadway-Asbury Road, Franklin Township, Warren County, Township Aid. On motion by Mr. Kidde, seconded by Mr. Jelin, the Commission approved of the acceptance and final payment on the Broadway-Asbury Road, Franklin Township, Warren County, Township Aid, the said acceptance carrying with it an approval of extension of time to July 27, 1923, the date of completion.

Clinton Ave - Lawline Rd.,
Township Aid, Bergen County

The State Highway Engineer recommended approval of extension of time and final acceptance on Clinton Avenue & Lawline Road, Franklin Township, Bergen County, Township Aid. On motion by Mr. Stewart, seconded by Mr. Jelin, the Commission approved of the acceptance and final payment on Clinton Avenue and Lawline Road, Franklin Township, Bergen County, Township Aid, the said acceptance carrying with it an approval of extension of time to September 1, 1923, the date of completion.

Request - State Aid, Union County

The State Highway Engineer presented a request from the County Engineer of Union County, Mr. J. L. Bauer, for aid in connection with the resurfacing of East Broad Street, Westfield, for a distance of 6300 feet. Mr. Stewart moved that the county be advised that the proper procedure to be followed in this matter would be for the Town of Westfield to make application for aid through the county for aid from the Motor Vehicle Fund account. This was seconded by Mr. Kidde and adopted.

Washington-Buttzville Road,
Section 3

The State Highway Engineer recommended acceptance and final payment on the Washington-Buttzville Road, Section 3, Warren County, State Aid. On motion by Mr. Jelin, seconded by Mr. Kidde, the Commission accepted the completed work on the Washington-Buttzville Road, Section 3, Warren County, State Aid, and authorized final payment thereon.

Bridgeton-Port Norris Road,
Sections 1 and 5

The State Highway Engineer recommended approval of award of contract for the Bridgeton-Port Norris Road, Sections 1 and 5, Cumberland County, Motor Vehicle Aid, on which one bid was received in the amount of $19,036.04. On motion by Mr. Jelin, seconded by Mr. Kidde, the Commission approved of award of contract for the Bridgeton-Port Norris Road, Sections 1 and 5, Cumberland County, Motor Vehicle Aid, on the low bid of $19,036.04.

Roads to Institutions

The State Highway Engineer recommended that $4500. be allotted from the emergency repair fund for the repair of road from Vineland to the State Home for Feeble-Minded (Roads to State Institution), on which the township is willing to spend $1,500.00, toward a total cost of $6,000.00. On motion by Mr. Kidde, seconded by Mr. Stewart, the Commission approved of an allotment of $4,500.00 toward the repair of road from Vineland to the State Home for Feeble-Minded, the said allotment to come from the Emergency Repair Fund.

Route 9, Section 12, Westfield

The State Highway Engineer submitted a letter from Alexander Blair, Town Surveyor of Westfield, Union County, relative to additional width of paving through the Town of Westfield on Route 9, Section 12, and recommended that Mr. Blair be advised that the State will pay for paving only twenty-two feet. On motion by Mr. Kidde, seconded by Mr. Jelin, the Commission directe that Mr. Blair be advised that the State will pay for the paving of twenty-two feet width and no more, the balance to be paid for by the town.

Signs

The State Highway Engineer submitted for the approval of the Commission, types of signs, both cautionary and directionary, which signs have already been approved by the County Enginaers' Association. After some discussion of the matter the Commission, on motion by Mr. Kidde, seconded by Mr. Stewart, approved of the directionary and cautionary signs as submitted with the understanding that a narrow border will be placed on same. In connection with this matter, Commissioner Stewart submitted samples of directionary signs such as are used in England and France.

Signs

The State Highway Engineer further submitted for the approval of the Commission several styles of signs to be used for the marking of State Highway Routes and asked that Commission approve one of the signs as submitted. After more discussion of the matter, Mr. Kidde moved that the Commission approve of the sign with the route number banded through the center of the state, with the suggestion that one of these signs be made up for the next meeting with the names of the terminal points of the route printed in the white strips above and below the number. This was seconded by Mr. Jelin and adopted.

Leave of Absence

The State Highway Engineer submitted for the information and approval of the Commission the request of Vincent J. Laughran for a further leave of absence on account of sickness, together with a physician's report thereon. After a considerable discussion on this matter, Mr. Kidde moved that the Commission approve of an additional leave of absence for thirty days to Mr. V. J. Laughran. This was seconded by Mr. Stewart and adopted.

The State Highway Engineer submitted for the information of the Commission and their action thereon, the request of Matthew Henry for an additional leave of absence due to sickness, together with a physician's report in which it was advised that he would probably be able to report for work within two weeks. On motion by Mr. Stewart, seconded by Mr. Kidde, the Commission granted an additional leave of absence for two weeks to Mr. Matthew Henry.

The State Highway Engineer also submitted a request for leave of absence as made by Lawrence Dalton, together with physician's report thereon. In connection with this report, Mr. Muir who was present, advised that Mr. Dalton had already returned to his work, and no action on this request was required at this time.

Employments

The State Highway Engineer submitted a report on employments as made since the last meeting of the Commission and recommended the ratification of the Commission thereon. On motion by Mr. Jelin, seconded by Mr. Stewart, the Commission approved of the following list of employments as made by the State Highway Engineer since the last meeting:

Oct. 15,	Alvin L. Ruefer,	Rodman	$ 90.00 mo.
" 8,	C. F. Yard,	Jr. Engineer	125.00
" 15,	Philip H. Burch,	Br.Dfts. & Des.	200.00
" 1,	Nina M. Hann,	Clerk Stenog.	80.00
" 1,	Chas. Zweigle,	Adm. Chauf.	135.00
" 8,	John A. Egan,	Clerk Typist	80.00
Sept. 24,	C. W. Dexheimer,	St. Sh. Oper.	150.00

Hourly Basis

Oct. 3,	C. W. Chafey,	Gar. Assistant	$ .45 hr.
Sept. 17,	P. H. Bundy,	Motor Tr. Driver	.45
" 26,	R. C. Davis,	" " "	.40
Oct. 1,	Archie McBride,	" " "	.45
" 1,	John Firman,	" " "	.45
" 1,	William Fisher,	" " "	.45
" 1,	John Flanagan,	Gar. Asst.	.45
" 4,	Oliver Hulse,	Motor Tr. Driver	.50
" 4,	Chas. D. Douglass,	Mechanic	.60

Right of Way, Route 16, Section 6-A

The State Highway Engineer submitted a letter that had been received by the Chairman from Robert Burnett concerning the acquisition of his property on Route 16, Section 6-A, in which he asked that the agreement which he had executed be returned to him, inasmuch as he felt same had been signed under a false understanding. After a considerable discussion on the matter, Mr. Kidde moved that some member of the staff of the State Highway Department be instructed to call upon Mr. Burnett and explain to him that there had been no intention on the part of the Commission to deceive him on this matter, and if necessary to make some slight concession to Mr. Burnett in addition to the terms of the agreement in order that the matter could be settled satisfactorily to both parties. This was seconded by Mr.Stewart and adopted.

Right of Way-Route 4

The State Highway Engineer advised the Commission that there was a similar condition in connection with the acquisition of the Bigot property on Route 4, where Mr. Bigot claimed that there had been no mention made of the slope that was required when he was shown the stakes for the road. On motion by Mr. Kidde, seconded by Mr. Stewart, the Commission directed that this matter be handled in the same manner, and that a representative of the Department take same up with Mr. Bigot.

Right of Way-Route 13

The State Highway Engineer submitted purchase agreements for the purchase of property from John E. Reynolds in the sum of $1842.00: George Mardle in the sum of $270.00; and John E. Reynolds in the sum of $3249.00, all on Route 13, Section 5, and requested Commission action thereon. On motion by Mr. Stewart, seconded by Mr. Kidde, the Commission directed that the purchase of these properties be referred to Mr. Jelin for his investigation.

Tests of Materials

The State Highway Engineer submitted a letter from Wm. C. Cattell, County Engineer of Gloucester County, requested that the Commission allow the Laboratory forces to test the cement to be used in the construction of the Woodbury-Blackwood Road, Section 1, without cost. After considerable discussion of the matter, the Commission directed that Mr. Cattell be advised that the Commission will approve of this cement being tested by the State Laboratory without charge, with the understanding that this will not establish a precedent in the matter of testing cement for county use, a~~t~~ motion to this effect being offered by Mr. Jelin and seconded by Mr. Kidde.

Route 10, Section 1-B

The State Highway Engineer submitted the papers and report on Route 10, Section 1-B, Anderson Avenue to Arcadian Way, which has been completed and is now ready for acceptance. On motion by Mr. Jelin, seconded by Mr. Stewart, the Commission directed that this matter be referred to Mr. Kidde for his inspection and report to the Commission thereon.

Detour - Route

The State Highway Engineer submitted a revised detour for use in connection with the construction of Route 1, Section 12, Rahway Avenue, Elizabeth, and recommended the Commission's approval thereof. On motion by Mr. Jelin, seconded by Mr. Kidde, the Commission approved of the adoption of the following detour on account of the construction of Route 1, Section 12, Rahway Avenue, Elizabeth:

> "Beginning at the intersection of Cherry Street and Rahway Avenue, in the City of Elizabeth, running thence (1) northerly on Cherry Street a distance of approximately 0.4 miles to Westfield Avenue; thence (2) westerly over Westfield Avenue; thence (3) southerly over Elmora Avenue, a distance of approximately 0.7 miles to Rahway Avenue, Route 1."

Frank Reddan-Appointment

Mr. Jelin advised the Commission that in accordance with the action of the Commission at the last meeting, he had requested Mr. Frank Reddan to be present and asked that the Commission take some action on the matter of his appointment. On motion by Mr. Jelin, seconded by Mr. Stewart, the Commission approved of the appointment of Mr. Frank Reddan as Clerk to the Chairman at a salary of $1200.00 per annum.

On motion by Mr. Stewart, seconded by Mr. Jelin, the Commission adjourned at 6:00 P.M. to meet in regular session on Tuesday, October 16, 1923.

Respectfully submitted,

A. LEE GROVER

Secretary.

MINUTES OF MEETING - October 16, 1923.

A regular meeting of the State Highway Commission was held at the offices of the Commission, Broad Street Bank Building, Trenton, on Tuesday, October 16, 1923. The meeting was called to order by Chairman Scott at 10:30 A.M.

Minutes Approved

Commissioner Kidde reported the reading of the minutes of the meeting of July 31, 1923, and moved that the same be approved with some minor typographical changes as recorded. This was seconded by Mr. Jelin and adopted.

North Jersey Traffic

The Secretary presented a communication from the Convention Reporting Company of New York, requesting whether they could make a report of the conference to be held between the North Jersey Rapid Transit Commission, the State Highway Commission, and the Port Authority. On motion duly seconded, the Secretary was directed to notify the reporting agency that it was proposed to conduct an informal round table discussion of which no record need be made, and further that the North Jersey Rapid Transit Commission be advised that it is expected that the conference will be informal.

Crescent Road, Franklin Township, Bergen County

The Secretary informed the Commission that a delegation was present from Franklin Township, Bergen County, and desired a hearing. On motion duly seconded, the hearing was granted. There appeared Mayor Harmon and Mr. Frost of Franklin Township, and requested information re an application filed with the Commission for the improvement of Crescent Road, Franklin Township. Assistant State Highway Engineer Reed informed the Commission that he would recommend the sum of $6,115.00 be allotted from the Bergen County Township Aid account. On motion by Mr. Kidde, seconded by Mr. Stewart, the Commission approved of the allotment of a balance of $6,115.00 as the State's share of Township Aid to Crescent Road, Franklin Township, Bergen County, and any additional aid to be made the subject of another application from the next year's funds.

Morris Canal Report -

Commissioner Kidde reported to the Commission that he had informally met two members of the Morris Canal Commission and had discussed the condition of the bridges on State Highway routes over the abandoned Morris Canal, in accordance with report submitted by the Bridge Division. Discussion was had as to the estimate for placing such bridges in shape, and means for securing a similar report from the various counties. There was also discussed the possibilities of constructing a highway on the bed of the canal across the City of Newark to connect with Passaic and Paterson. Commissioner Kidde suggested that it might be possible to arrange for a conference between the Morris Canal Commission and the State Highway Commission, sometime in the near future. No definite decision was reached by the Highway Commission, pending the results of the meeting with the North Jersey Transit Commission on the 24th instant.

New Brunswick Bridge, New

The Secretary presented a communication from James Neilson of New Brunswick, forwarding a list of Trustees of the New Jersey State College for Women, as appointed to treat with the Highway Commission on the matter of the proposed new bridge at New Brunswick. On motion by Mr. Kidde, seconded by Mr. Stewart, the Commission directed that the communication be acknowledged and that the Secretary inform Mr. Neilson that it wasn't the purpose of the Commission to insist upon a special representation from the State College for Women, but if desired, a meeting could be arranged after the engineering data was in shape, which would be some time in November.

Invitation to Vineland

The Secretary presented a communication from Mr. Pearse, Secretary to the Governor, forwarding a telegram from Miss Thelma Parkinson, of Vineland, N.J. inviting members of the State Highway Commission to meet with representatives of important South Jersey towns at Millville, on October 17th, on the matter of roads in that section of the State. On motion by Mr. Kidde, seconded by Mr. Stewart, the Commission directed that the telegram be acknowledged, and that due to its late receipt, the Secretary inform Miss Parkinson that other engagements will not permit of the attendance of the Commissioners, and it is also felt that the Commission will be in a better position to consider the questions involved, after a conclusion has been reached at their meeting.

Route 13 - Detour

The Secretary presented a communication forwarded by Mr. Pearse, Secretary to the Governor, transmitting a complaint from Mrs. Charles E. Mershon of Monmouth Junction, N.J. as to the dangerous condition existing at the intersection of the Brunswick Pike and the Ridge Road, used as detour for Route 13 traffic. On motion by Mr. Kidde, seconded by Mr. Stewart, the Commission directed that a temporary danger signal be installed at this point.

Communications

On motion by Mr. Kidde, duly seconded, the Commission directed that the communications from Mr. Pearse be acknowledged, together with a statement of the dispositions made.

Invitation to Washington

The Secretary presented a communication from the Kiwanis Club of Washington, N.J. inviting the Commission to be present as guests of the club at Baker's Inn, Washington, N.J. at a meeting to be held at the convenience of the Commission on November 7th or 20th. On motion by Mr. Kidde, seconded by Mr. Jelin, the Commission accepted the invitation extended, and directed the Secretary to inform the Kiwanis Club of Washington, New Jersey, that the 20th of November will be the most desirable date and information will be forwarded at a later date as to the number who can attend.

Route 18, through Tenafly

The Secretary presented a communication from the Commissioners of the Palisade Interstate Park, transmitting fully executed agreement between the Borough of Tenafly and the Commissioners of the Palisade Interstate Park of New Jersey, with respect to the proposed change in the location of the State Highway Route 18 where it crosses Greenbrook Park in the Borough of Tenafly. The Secretary explained that this covered the link questioned at the public hearing as to the taking over of Route 18. Commissioner Kidde moved that the Secretary acknowledged the receipt of the agreement and the State Highway Engineer be directed to place the necessary survey parties on that section of Route 18 from Alpine to Englewood in order that the correct right of way be established for the official taking over of Route 18, said study taking advantage of the scenic value of the road. This was seconded by Mr. Stewart and adopted/

Route #16, Section #5.

The Secretary presented a communication received by the Commissioner Jelin from Senator Pierson, transmitting a letter from J. F. Chapman & Son, contractors on Route #16, Section #5, requesting permission to sublet the concrete paving work on Route #16, Section #5, tp P. Camello & Co. of Westfield, N.J. On motion by Mr. Kidde, seconded by Mr. Jelin, the Commission approved the subletting of concrete paving work on Route #16, Section #5, to P. Camello & Co. of Westfield, N.J., the same having been recommended by the State Highway Engineer and the responsibility for the entire work resting upon the contractors, J. F. Chapman & Son.

Route #4, through South Amboy.

The Secretary presented to the Commission a communication received from the General Superintendent of the P. R. R. requesting settlement of a claim of the railroad company for property taken by the State for road purposes on Route #4, through South Amboy. The Secretary explained to the Commission that this claim was one presented to the former State Highway Commission and was never given consideration. He further informed the Commission that the amount of the claim at the present time was $18,000.00, covering proportionate share of trestle work of the railroad and that money had already been paid for the actual land taken. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission directed that the communication be received and that the railroad company be directed to arrange for a representative to appear before the Commission and explain the claim.

Proposed Route #19, Atlantic County.

The Secretary presented a communication from the Atlantic County Board of Freeholders transmitting a resolution requesting the commission to take over Route 19, from Seaville by way of Palermo, Marmora, Beesley's Point, Somers Point and Absecon. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission directed that Atlantic County be advised that the Commission is considering the matter of additional State Highway Routes, but is not yet in a position to take definite action in these matters.

Main St., Hightstown

The Secretary presented a communication from William H. Thompson, Mayor of Hightstown, requesting the Commission to give favorable consideration to the matter of replacing the present iron rail on Main Street Bridge with a stone parapet and for the widening of the intersection of Route 1 with Route 7. State Highway Engineer Sloan stated that he had investigated the situation at Hightstown, and he would recommend that the Commission approve of the placing of a parapet wall on the Main Street Bridge of cut stone similar to the proposed work to be done on the Memorial Park project in Hightstown, and further that such paving as is necessary to complete the widening of the corner be taken by the Commission. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission approved the recommendation of the State Highway Engineer.

On motion, duly seconded, the Commission recessed for luncheon at 12:30 P.M. to meet again in regular session at 2:00 P.M. The Commission reconvened at 2:00 P M. as agreed with the same members present as at the morning session.

Bergen County Hearing - Route 17

The Secretary informed the Commission that Mr. J. E. Thier, Road Supervisor of Bergen County, was present and desired a hearing. On motion duly seconded, a hearing was granted. Mr. Thier appeared before the Commission and inquired concerning the disposition to be made by the Commission of Route 17; that is whether or not it would be taken over by the State Highway Commission before it would be necessary for the County of Bergen to arrange its maintenance schedule for 1924. Chairman Scott informed Mr. Thier that the State Highway Commission was prepared a study of proposed routes to be taken over and its Motor Vehicle Schedule for 1924, and he suggested that Bergen County arrange its schedule so that Route 17 would be included in the same, and in the event that it was taken over by the State it could be struck off from the schedule.

Route 5; Sec 4.

Millville Hearing

The Secretary informed the Commission that a delegation from Millville, New Jersey, was present and desired a hearing in accordance with their request to the State Highway Commission. On motion duly seconded, a hearing was granted. There appeared from the City of Millville, C. M. Felmey, Mayor; Louis Miller, City Solicitor; N. R. Wade, City Engineer; also A. R. McAllister, Attorney for the Cumberland County Traction Co., Walter Bacon, representing the said Traction Co., and G. W. McPherson, President of the Cumberland County Traction Co. Mr. Miller, in speaking in behalf of the delegation, expressed appreciation for having been invited to the meeting in order to expedite the completion of Route 15, Section 4, through Millville. He reported that he believed that the City Engineer had come to an agreement with the State Engineers on the matter of a storm water drain through Millville, and also that the extra width pavement beyond that to be paid for by the State would be paid for by the City of Millville. The Secretary informed the Commission that while these arrangements had been taken care of by the Engineering Department of the City and State, no formal agreement was as yet, submitted for approval by the State Highway Commission. Assistant Construction Engineer Moore informed the Commission that the matter of the drain was taken care of on a fifty-fifty basis. Mr. Bacon, representing the Cumberland County Traction Co. reported that he appeared to bring before the Commission the position of the Cumberland County Traction Co. relative to paving through the City of Millville, where it involved the moving of the tracks of the Company. He informed the Commission that his interpretation of the opinion of the Attorney General rendered in this case was to the effect that the Cumberland County Traction Company would not have to pay for any paving done between the tracks. Mr. Miller, City Solicitor, outlines to the Commission the status of the franchise existing over the line occupied by the Traction Company and stated that he felt that the obligations of the franchise were still effective, and it was the duty of the Cumberland County Traction Co. to pave between its tracks at any location where the tracks might be placed. State Highway Engineer Sloan informed the Commission that he felt that the opinion of the Attorney General was to the effect that the State must pay for the moving of the rails if same are moved but that it was the obligation of the Traction Co. to do any paving as was necessary. Mr. McAllister, Attorney for the Cumberland County Traction Co. informed the Commission that he realized the deplorable conditions existing on Route 15, Section 4, and that he was very anxious to do anything which would assist in having this work finished but he was unwilling to waive any rights which the Traction Co. might have. Commissioner Kidde inquired whether there would be any objection on the part of the Traction Co. for the State to move the tracks from their present location to the center of the roadway. He was informed that there would be no objection to this. He, therefore, asked whether or not the work could proceed on the basis of having the tracks moved and the paving completed in the State contract, subject to there being a decision reached in the courts as to the liability for the said paving. This was considered agreeable by the representatives of the Traction Co. and Commissioner Stewart further inquired whether in the event the work was done by the State, there would be no questions raised on the part of the Traction Co. either as to the cost of this work or as to the duration of time for its completion, all these matters to be at the discretion of the State Highway Commission. Mr. Bacon, representing the Traction Co. informed the Commission that there would be no objections raised and that it would be entirely satisfactory to the Company to agree to accept the discretion of the State Highway Commission in the matter of the cost of the track removal, etc. There was considerable discussion as to the furnishing of new rails and ties for the trolley tracks in this area, but it was decided that this could be amicably adjusted by the Company, and the Engineering Division, when it was determined as to the quantity of new materials needed. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission directed that a form of agreement be prepared for approval, to be entered into by the Cumberland County Traction Co. and the State Highway Commission, covering all the items necessary in the moving of the tracks and the construction of pavement on Route 15, Section 4. State Highway Engineer Sloan informed the Commission that advertisement had already been authorized for this work including all the trolley track structure.

Lignin Binder, Atlantic County

State Highway Engineer Sloan presented to the Commission a report on one bid received for lignin binder in Atlantic County. Commissioner Jelin called attention to a communication received by him bearing upon this work, and moved that Atlantic County be notified that the State Highway Commission does not approve of a contract for the application of lignin binder, and in view of the lateness of the season it is suggested that the County take advantage of the provisions of Chapter 185 of the Laws of 1918 for the obtaining of new bids to the end that lower prices might be secured. This was seconded by Mr. Kidde and adopted.

General Scott, at this time, informed the Commission that due to an important appointment in New York he must be excused. On motion by Mr. Kidde, seconded by Mr. Jelin, Commissioner Stewart was named as Chairman pro tem.

Signs

North Jersey Automobile Club

The Secretary presented a communication from the North Jersey Automobile Club offering its services to the State Highway Commission in the erection of directionary or cautionary signs it might desire to place in the North Jersey district. On motion by Mr. Kidde, seconded by Mr. Jelin, the communication was ordered received and the Secretary was directed to notify the North Jersey Automobile Club that the Commission at its last meeting approved the design for signs to be placed throughout the State, the same to be standardized with the signs for the counties and that these would be placed as soon as possible by the forces of the Commission, and further that the Commission appreciates very much the kind offer of the Club.

J. M. Reilly-Claim

The Secretary presented a communication from Edward R. McGlynn requesting consideration of a claim held by his client, Mr. James M. Reilly, for expense incurred in the preparation of plans, etc. for the lease of quarters in Newark, N.J. for the State Highway Department, which were not taken up by the former Commission. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission directed that the communication be acknowledged and that a request be made for full data on which it is considered there is a basis for the claim as presented.

Invitation to Chicago

The Secretary presented a communication from the American Road Builders Association advising of the annual convention of the As-

OCT 16 1923

sociation to be held at Chicago on January 14th to 18th, 1924, and requesting the Commission to take an active part in this Convention. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission directed that this communication be received and referred to the State Highway Engineer for his recommendation.

Fredon-Newton Rd.

T. J. Wasser, Hearing

The Secretary informed the Commission that Mr. T. J. Wasser of the Public Service Production Company was present and desired a hearing. On motion, duly seconded, a hearing was granted. Mr. Wasser informed the Commission that he had taken up for settlement the matter of payment for completed work on Newton-Fredon Road, Sussex County State Aid. He informed the Commission that this work was completed at the time he was State Highway Engineer, but was done under the direction of the County Engineer with the State Inspector thereon, that difficulty had been encountered by the Public Service Production Co. in obtaining satisfactory superintendence of the work, which resulted in a road of good riding quality and of proper strength, but of poor workmanship, especially at the joints. He stated that the County of Sussex was willing to consider any suggestions which might be acceptable to the State Highway Commission. He offered on behalf of the Public Service Company to place a bond guaranteeing the entire job for a period of five years against any defect whatsoever, and that the company would forego any rights to contest any claim to be made as to such defects. Commissioner Kidde stated that he did not feel that the Commission should pay one hundred per cent for a road that was not in complete accord with the specifications and he suggested that an asphalt surface be placed over the entire work by the contractor. State Highway Engineer Sloan informed the Commission that any defects which might occur due to the improper joint construction would tend to destroy any surface pavement as well as the foundation. He stated that he felt that the pavement was of sound construction and of proper strength and he would not recommend that the Commission order the same torn up but that there should be some adjustment reached as to the payment for the same, and a guarantee as to its structure.

Commissioner Jelin inquired whether a ten year bond could be secured and was informed that the bonding company provisions do not permit of bonds beyond a five year period. Commissioner Kidde stated that he was averse to accepting the work as a hundred per cent job, and he would suggest that a sufficient amount, say 25%, be withheld from the contractors for a period of five years, and in the event that the pavement did not stand up satisfactory, this should be forfeited as a penalty, and in addition to this that the bond be prepared for the entire work. This seemed to meet all objections on the part of the Highway Commission and Mr. Wasser informed the Commission that this proposition was acceptable to the Public Service Production Company, although he would not consider it as definite conclusion until it had been presented and approved by the Sussex County Board of Freeholders, the proposition being that payment will be made to the Public Service Production Company in the amount of 75% of the cost of the work on the Newton-Fredon Road; that the remaining 25% is to be held for five years as a guarantee, said 25% or any part thereof, to be forfeited in the event the road is not in good condition at the end of such a time, or at a time previous if so decided by the Commission; further that the Public Service Production Company will furnish a bond for 100% of the work and will do any and all repairing necessary without making any claim as to the reason for such repairs.

Alpha Boro Road, Warren County

State Highway Engineer Sloan presented a report from the Assistant State Highway Engineer advising that in the matter of the Alpha Boro Road, Warren County, the Cement Company stated that it did not make any promises of contributing cement for the Alpha Boro Road. Commissioner Kidde stated that he felt reasonably sure that some sort of promise was made, but in view of the fact that the State's share of the work was not affected thereby, he moved that approval be given for the construction of Alpha Boro Road, Warren County without any provision as to the material for the work. This was seconded by Mr. Jelin and adopted.

Farmingdale-Squankum Road

The Secretary presented a communication from Arthur Brisbane forwarded by Governor Silzer bearing on the matter of completing the county road between Farmingdale and Squankum. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission directed that the matter be referred to Assistant State Highway Engineer Reed in order that the same might be taken up with the proper county authorities.

The Schedule of Business was next taken up for consideration, item by item, as follows:

Cedar Bonnet Bridge

State Highway Engineer Sloan reported that plans and specifications were completed for Cedar Bonnet Bridge over Manahawken Bay, and recommended that authority be given to advertise the same. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission unanimously adopted the following resolution:

RESOLVED, that the State Highway Commission does hereby approve of plans and specifications for the construction of Cedar Bonnet Bridge over Manahawken Bay, Ocean County, and

BE IT FURTHER RESOLVED, that the Chairman is authorized to sign the necessary papers and the Chief Clerk is directed to place advertisement for same.

Inland Waterway Bridge, Route 4

State Highway Engineer Sloan reported plans and specifications completed for the Inland Waterway Bridge on Route 4 at M.P. 66.6 in Monmouth County, and recommended authority for advertising the same. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission unanimously adopted the following resolution:

RESOLVED, that the State Highway Commission does hereby approve of plans and specifications for the construction of Inland Waterway Bridge on Route 4, at M.P. 66.6 in Monmouth County, and

BE IT FURTHER RESOLVED, that the Chairman is authorized to sign the necessary papers and the Chief Clerk is directed to place advertisement for the same.

Route 13, Section 5, Bridges

The State Highway Engineer presented the following report of bids received for the construction of bridges at M.P. 1.0 and 2.6 on Route 13, Section 5, Trenton-Lawrenceville Section, and recommended award to the lowest bidder, Grant & Driver, of Trenton, N.J.

Grant & Driver	$ 31,982.00
Kolyn Construction Co.	40,471.00
F. W. Schwiers, Jr. Co.	44,900.00
Harris Structural Steel Co. and Snook and Sons	49,270.00

On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission unanimously adopted the following resolution:

RESOLVED, that the State Highway Commission does hereby approve of an award of contract for the construction of Bridges at M.P. 1.0 and 2.6 on Route 13, Section 5, Trenton-Lawrenceville Section, to Grant & Driver of Trenton, N.J. at their's the lowest bid submitted in the amount of $31,982.00, and

BE IT FURTHER RESOLVED, that the Chairman is authorized to sign the necessary contracts on behalf of the State Highway Commission after approval by the State Highway Engineer.

Route 13, Section 6, Bridges

State Highway Engineer Sloan presented the following bids received on bridges at M.P. 3.9, 5.7, and 7.9 on Route 13, Section 6, Lawrenceville-Princeton Section, and recommended award to L. J. Sieling at his the lowest bid submitted.

L. J. Sieling	$ 41,700.00
P. A. Hennessey & Sowell	43,475.00
Grant & Driver	44,381.00
S. S. Thompson & Co., Inc.	46,865.00
Kolyn Construction Co.	47,980.00
General Cont. & Const. Co.	49,000.00
A. L. Trimpi	57,350.00
F. W. Schwiers, Jr., Co.	59,900.00

On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission adopted the following resolution:

RESOLVED, that the State Highway Commission does hereby approve an award of contract for the construction of bridges at M.P. 3.9, 5.7, and 7.9 on Route 13, Section 6, Lawrenceville-Princeton Section, to L. J. Sieling of Red Bank, N.J., at his the lowest bid submitted in the amount of $41,700.00, and

BE IT FURTHER RESOLVED, that the Chairman is authorized to sign the necessary contracts on behalf of the State Highway Commission after approval by the State Highway Engineer.

Right of Way, Route 14, Sec. 9.

State Highway Engineer Sloan presented purchase agreements for property on Route 14, Section 9, and recommended approval by the State Highway Commission, all of these properties having been secured for the price of $1.00. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission approved the purchase of the following parcels of property of $1.00 each and directed that an expression of thanks to be forwarded to the owners.

Ida S. VanGilder	Consideration	$1.00	
Mark L. Stebbins & Wife	"	1.00	
Jos. B. Sharp & Wife	"	1.00	
L. H. Dallas & Wife	"	1.00	
Sophie C. Lee & Ludlum M. Lee	"	1.00	
Chas.W.Mumford & Wife	"	1.00	Q.C.D.
M. G. Barsby & Wife	"	1.00	Q.C.D.

Right of Way, Route 14, Section 8

State Highway Engineer Sloan presented purchase agreements for property on Route 14, Section 8, and recommended approval of same by the State Highway Commission, all of these properties having been secured for the price of $1.00. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission approved the purchase of the following parcels of property at $1.00 each and directed that an expression of thanks be forwarded to the owners.

D. W. Hewitt & I. T. Kandle	Consideration	$1.00
Rolla Hewitt & V.P.Hewitt, 2 parcles	"	2.00
C. W. Beall & Wife	"	1.00
Maurice Cain & Wife	"	1.00
E. S. Townsend & Wife	"	1.00
J. A. Gety & Wife	"	1.00
T. S. Hampton & Wife	"	1.00
G. M. Robinson & Wife	"	1.00
Allison Ludlum & Wife	"	1.00
Arthur C. Patterson	"	1.00
Ethel Townsend, Sallie & Alfred Spark	"	1.00
Edward Fox & Wife	"	1.00
Frambus Jerrel & Wife	"	1.00

Right of Way, Route 4, Section 20.

State Highway Engineer Sloan presented to the Commission a report on property of Margaret E. Osborne on Route 4, Section 20, Manasquan River-Sea Girt Section, where it was recommended by the Construction Division that disposition be made without condemnation in view of the fact that there was moving of property involved in the transaction. On motion by Mr. Kidde, duly seconded, the matter was ordered referred to Commissioner Jelin for further report.

OCT 15 1923
2488

Condemnation, Route 12

State Highway Engineer Sloan recommended that condemnation proceedings be instituted to secure property from Redmond & Crews, required for right of way on Route 12, Little Falls Railroad Crossing elimination, amount of award to be reimbursed to the State by the railroad company, which is to do the work. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission authorized condemnation proceedings to be instituted for the acquisition of property on Route 12, from Redmond & Crews, as recommended by the State Highway Engineer.

Lights on Amboy Bridge

State Highway Engineer Sloan presented to the Commission with his recommendation for approval a proposed contract between the State Highway Commission and the Monmouth Lighting Company covering the Lighting of the southerly end of the Amboy Bridge, this contract calling for the maintaining of the thirty-five 25-candle power street series lamps. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission authorized approval of an agreement between the Monmouth Lighting Company and the State Highway Commission for lighting of the southerly end of the Amboy Bridge as recommended by the State Highway Engineer.

Storm Water Drain, Route 1

State Highway Engineer Sloan recommended to the Commission the approval of the installation of a storm water drain on Route 1, Hamilton Ave. and Nottingham Way intersection in Mercer County, the estimated cost of the work being $15,249.00, the County of Mercer to pay one-third of the cost. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission approved the recommendation of the State Highway Engineer for a storm water drain on Route 1, Hamilton Ave. and Nottingham Way intersection, Mercer County.

Route ~~9~~ 4, Section ~~4~~ 2, Atlantic County

State Highway Engineer Sloan reported to the Commission that at the time of the acceptance by the Commission of the work done by the contractor on Route ~~9~~ 4, Section ~~4~~ 2, there was not included in the total bill a charge of $1,900.00 which was paid by Atlantic County to the Strauss Bascule Bridge Company for services rendered in connection with the design of the Nacote Creek Bridge. He advised that this charge should properly come within the amount to be reimbursed to Atlantic County on account of the construction of this route, and recommended that either this amount be paid Atlantic County or that the same be included in the amount which is to be reimbursed to Atlantic County on account of said contract. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission approved the recommendation of the State Highway Engineer and directed that the charge of $1900.00 be included and made part of the claim for reimbursement against the State for work done on Route 9, Section 4.

East Main Street, Boonton

State Highway Engineer Sloan reported that he was in receipt of a communication from Mr. Winfield Hopkins, County Engineer of Morris County, advising that the County was desirous of proceeding with the placing of a concrete base on East Main St., Boonton, Morris County, using its own forces and renting equipment, it being the desire of the County to proceed with this base construction, using available balances of funds in the Motor Vehicle Account, and will enter into an agreement with the State Highway Commission to the effect that they will, within a reasonable time, construct a bituminous top on this concrete base, which bituminous top will be satisfactory to the Commission, both as to the character and price. The Commissioners inquired as to the reason for this work being done under force account, and they were informed that it was determined by the county that there would not be sufficient time to advertise this work before cold weather sets in and it was the desire to have the traffic use this base when constructed. Commissioner Jelin stated that he did not approve of work of so large a magnitude being done by force account, and he moved that a communication be forwarded to Morris County advising that the State Highway Commission feels that the size of the work contemplated on East Main Street, Boonton, would hardly justify its being done by force account, and it was recommended that a contract be advertised for this work. This was seconded by Mr. Kidde and adopted.

Damage, Perth Amboy Bridge

The State Highway Engineer presented to the Commission a release on the part of the Tice Towing Company for damage done to the Perth Amboy bridge by the Tug "Numatic" on or about October 25th, 1922. The payment on account of said damage amounts to $1,117.83 and represents two-thirds of the cost of the repairs made necessary by said collision. He recommends that this release be approved on the ground that it was felt that this is a fair settlement in that a proper depreciation should be allowed for that part of the bridge structure which was damaged and which has now been replaced by new timber. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission approved the form of release to the Tice Towing Company and authorized the Chairman to sign the same on behalf of the Commission.

Cranbury Township, Middlesex County

On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission approved the cancellation of unexpended balance of $1.42 standing to the credit of the Dey Road, Cranbury Township, Middlesex County, Township Aid.

Employments

State Highway Engineer Sloan presented the following list of employments made by him since the last meeting of the Commission and recommended ratification of the same. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission approved the following employments as recommended by the State Highway Engineer.

Oct.	8,	Warren W. Warman,	Stenog.	$ 80.00 mo.
"	15,	Martin Bergen,	Br.Const.Insp.	165.00
"	15,	J. E. O'Rourke,	Storekeeper,	145.00
"	15,	Maxwell J. Hoffman,	Clerk-Typist,	80.00
"	9,	Frank Mullen,	Motor Tr. Dr.	.50 hr.

The State Highway Engineer recommended that consideration be given as to the apportionment of balances remaining to the credit of several counties in the State for Township Aid. A schedule was presented and on motion by Mr. Jelin, seconded by Mr. Kidde, the following Township Aid apportionments were approved by the Commission:

Township Aid Balances of Apportionments

County	Township	Road	State's Share
Bergen	Franklin	Crescent Road	$ 6,115.00
"	"	Clinton Ave., R.R. ave.	3,000.00
"	Hohokus	Wyckoff-Ramsey	15,885.00
Camden	Winslow	Williamstown-New Freedom	8,200.00
Cape May	Dennis	Whitefield-Taylor Road	3,000.00
"	"	Sea Isle Junction	1,500.00
"	Middle	Norbury Landing	600.00

County	Township	Road	State's Share
Cape May	Middle	Wildwood Junction	$ 600.00
"	"	Swainton-Goshen	900.00
"	"	" "	900.00
"	"	Cape May Court House-Dian Crk.	900.00
"	"	Shell Bed Landing	300.00
"	Lower	Breakwater Road	750.00
"	"	New England Road	750.00
"	"	Shunpike Road	1,500.00
Cumberland	Upper Deerfield	Cornwell Drive	4,500.00

"	"	Canton-Greenwich	1,375.00
Morris	Passaic	Main Ave., Stirling	12,000.00
Ocean	Lakewood	" " "	20,000.00
Somerset	Montgomery	Bolmer Cor.-Blawenburg	799.96

Route 10, Section 3,
Little Ferry-Ridgefield

State Highway Engineer Sloan reported to the Commission that Route 10, Section 3, Little Ferry-Ridgefield, Bergen County, was completed and ready for acceptance by the Commission. Mr. Jelin reported that he had gone over this work on the recent trip through Bergen County, and he moved that the Commission approve the acceptance of Route 10, Section 3, Little Ferry-Ridgefield Road, Bergen County, in accordance with the terms of the Reimbursement Act. This was seconded by Mr. Kidde and adopted.

Mill Lane Road, Middlesex County

State Highway Engineer Sloan recommended approval of plans and specifications for Mill Lane Road, New Brunswick Township, Middlesex County, and on motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission unanimously adopted the recommendation of the State Highway Engineer.

State Highway-Additional Funds

State Highway Engineer Sloan directed the attention of the Commission to the fact that in order to proceed with the construction of State highways it will be necessary to make some arrangement for the transfer of additional State Highway funds for roads purposes. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission directed that this matter be taken up at the next meeting at which time all data and resolutions were to be prepared for acceptance by the Commission.

On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission adjourned at 6:00 P.M. to meet in regular session again on Tuesday, October 23rd, 1923 at 10:30 A.M.

Respectfully submitted,

A. LEE GROVER,

Secretary

MINUTES OF MEETING - October 23, 1923.

A regular meeting of the State Highway Commission was held at the offices of the Commission, Broad Street Bank Building, Trenton, on Tuesday, October 23, 1923.

Present: Walter Kidde, Percy H. Stewart and Abraham Jelin.

Absent: General Hugh L. Scott, Chairman.

In the absence of General Scott, Commissioner Kidde moved the election of Commissioner Stewart as Chairman for the meeting. This was seconded by Mr. Jelin and adopted.

Minutes approved.

Commissioner Kidde reported having read carefully the minutes of the meetings held on August 7, 14 and 21, and he moved that the same be approved as mailed, subject to several typographical errors which he had indicated to the Secretary. This was seconded by Mr. Jelin and adopted.

Minutes to be printed.

Commissioner Kidde brought up for the consideration of the Commission the matter of having the Commission minutes printed in order that they might be forwarded to county officials, etc., who may desire copies concerning action taken. He suggested that the Secretary ascertain what the cost of such printing would be and make a report if possible at the next meeting.

New Amboy Bridge-Readvertisement.

State Highway Engineer Sloan reported to the Commission that plans and specifications were ready for the readvertisement of the Perth Amboy Bridge and although authority had been given for the readvertisement of same, he desired that the Commission ratify his action in authorizing bids to be received on November 27th. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission approved of the action of the State Highway Engineer in fixing November 27th as the date on which to receive bids for the construction of the Perth Amboy Bridge, said bids to be taken at the State House Assembly Chamber at 12:00 o'clocknoon. Commissioner Kidde suggested that the advertisement in the Engineering News Record for the Amboy Bridge, be arranged in block form giving prominence to the same in order that high-class bidders may be attracted to submit proposals on the work.

Right of Way, Route 4, South Amboy

The Secretary reported that in accordance with the invitation extended to Mr. C. I. Leiper, General Superintendent of the P.R.R., to appear before the Commission with reference to the claim for right of way at Route 4, South Amboy, there were present Messrs. Harris, Chandler and Kinkade, representing the railroad company. On motion duly seconded, a hearing was granted. Mr. Harris appeared before the Commission and reviewed the facts in connection with the claim of the railroad company for final payment of what had been agreed upon between the railroad company and the former State Highway Engineer, W. G. Thompson; namely, that the State Highway Commission would, in making use of the railroad company's lands in South Amboy, pay for the value of the land taken together with a proportionate share of the cost of overhead bridges spanning the proposed roadway and which had been built at the sole expense of the railroad company. He informed the Commission that this agreement had been approved by the Executive Committee of the State Highway Commission in June of 1919, but that the agreement had never been consummated, nor had any payments been made. Commissioner Kidde stated that he felt that before any action could be taken by the present State Highway Commission, the Engineering Division should make a through investigation of the property actually acquired, and the reason for the objections raised by the former State Highway Commission as to the payment on account of this claim. Mr. Harris informed the Commission that the former Commission had asked for an investigation of the claim but had never taken any action thereon. After further discussion of the matter, Commissioner Kidde moved that the entire matter be referred to Commissioner Jelin and State Highway Engineer Sloan for a full investigation and report with a view toward a final disposition of this claim.

Advisory Board-Camden

The Secretary presented a communication from the Camden County Board of Freeholders advising of the naming of Mr. J. J. Albertson, County Engineer of Camden County, as a member of the Advisory Board for the study of traffic problems in and about Camden. On motion by Mr. Kidde, seconded by Mr. Jelin, the communication was ordered received and filed and the Secretary was directed to acknowledge the same with thanks of the Commission.

Advisory Board-Camden

The Secretary presented a communication from the Delaware River Bridge Joint Commission advising of the naming of Mr. Lawrence Ball, a member of the Board of Engineers, as a member of the Advisory Board to study traffic problems in and about Camden. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission directed that the communication be received and placed on file, and further directed the Secretary to acknowledge the same with the appreciation of the Commission.

Cape May-Lewes Ferry

The Secretary presented a communication from Hon. William H. Bright, State Senator from Cape May County, urging the Commission's favorable consideration of the Cape May-Lewes Ferry proposition. Commissioner Jelin voices his opinion that there may be merits in the claims of Senator Bright that the completion of this ferry will open up the southern end of the State, especially as affecting traffic from points in the southern part of the country to Atlantic City, and he suggested that an investigation be made in order that a report might be presented to the Commission. Commissioner Kidde suggested that it might be possible to secure an opinion from the Chief Engineers of the P.R.R. Marine Department or the Jersey Central Railroad where there was considerable experience in the matter of Ferry Boat operation. After discussion on the matter, Commissioner Jelin moved that Commissioner Kidde in conjunction with the State Highway Engineer be authorized to consult with an engineer who is familiar with such problem as is presented by the Cape May-Lewes Ferry, for the purpose of ascertaining an estimate of what the cost of such a project might be, and such other details as is possible. This was seconded by Mr. Kidde and adopted.

Route 5, Section 8.

The Secretary informed the Commission that Mr. H. K. Salmon, of the Salmon Brothers Company, was present and desired a hearing in reference to the penalty clause invoked against his contract on Route 5, Section 8, Great Meadows-Barker's Corner. On motion duly seconded, a hearing was granted. Mr. Salmon appeared and asked that the Commission remit the penalty of 16½ days overtime on his contract for Route 5, Section 8, and based his contention on the ground that there was, during the period of his contract, a very bad laber situation existing which compelled him to complete the operations on the work with men of inferior knowledge of the work. State Highway Engineer Sloan presented reports showing that Mr. Salmon had been granted an extension of time equal to the total amount of his contract; namely, 120 working days, and in addition to this Mr. Salmon had been informed when the last extension was granted, that the Commission would not give consideration to any further extensions on this contract. Commissioner Kidde directed the attention of Mr. Salmon to the fact that the State Highway Commission was endeavoring to make contractors be more punctual in the performances of their work for the State, and to this end the Commission was keeping a very exact statement as to the progress being performed. After discussion, Commissioner Kidde moved that the matter be taken under advisement at this time. This was seconded by Mr. Jelin and adopted.

Lignin Binder, Atlantic County.

The Secretary informed the Commission that Hon. E. A. Higbee, County Solicitor of Atlantic County, was present with reference to the matter of award of contract for the furnishing and application of lignin binder on Atlantic County roads. On motion, duly seconded, the hearing was granted. Judge Higbee appeared and stated that he had been informed to the effect that a person by the name of Herzog had made a statement before the State Highway Commission at its last meeting that he was prepared to present a bid for lignin binder for Atlantic County, through an agent by the name of Justice, and he(Justice) had been told by a member of the road committee that if he did bid he would not be given an opportunity to sell any road machinery to Atlantic County.

Judge Higbee stated that he felt that his appearance was necessary in order to vindicate the members of the Board of Freeholders in the opinion of the State Highway Commission, should it be decided that a re-advertisement is necessary on the Lignin Binder award, that the County of Atlantic would find itself in a position where it was too late to re-advertise for bids, and therefore the work could not be done. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission directed that the matter be held over for consideration until the afternoon session.

Chamber of Commerce membership.

The Secretary presented a communication from the Chamber of Commerce of Trenton, requesting the Commission to give further consideration to the matter of continuing its membership in the Chamber of Commerce of the City of Trenton. On motion, duly seconded the communication was ordered referred to General Scott for his consideration since the Commission had already expressed at a previous meeting that they could not be a member of any one particular Chamber of Commerce in any city without becoming affiliated with others throughout the State.

Route #14, Cape May County.

The Secretary presented a communication from Senator Bright of Cape May County, urging the completion of Route #14, from Marshall's Corner to the Tuckahoe River Bridge approximately seven and one-half miles long, which will practically complete all of Route #14, in Cape May County. On motion by Mr. Jelin, seconded by Mr. Kidde the communication was ordered received and acknowledged, and placed in the file for consideration in connection with the 1924 road building program.

Womens College, New Brunswick

The Secretary presented a communication as received by General Scott from Mable S. Douglass, Dean of the New Jersey College for Women at New Brunswick, forwarding a list of the Committee members appointed by the Board of Trustees of Rutgers College to treat with the State Highway Commission concerning the new bridge location at New Brunswick, and advising of a resolution of the Board of Trustees objecting to the proposed plan through Jones Avenue, and stating that there are several other locations available which are less expensive and better adapted for highway purposes. On motion by Mr. Kidde, seconded by Mr. Jelin, the communication was ordered received and placed on file for later consideration.

Posting Highway Streams

The Secretary presented a communication received by Chairman Scott from the League of American Pen Women, urging the posting of names of the streams over which highways pass. On motion by Mr. Kidde, seconded by Mr. Jelin, the communication was ordered received, acknowledged by the Secretary, and laid on the table.

Camden-Millville-Cape May City

The Secretary presented a resolution from the Wild wood Board of Trade, urging the taking over and construction of the highway from Camden to Millville to Cape May. On motion by Mr. Jelin, seconded by Mr. Kidde, the communication was ordered received and placed on file.

Invitation-N.J.Rapid Transit Company

The Secretary presented a communication from Herbert Swan, Secretary of the North Jersey Rapid Transit Commission, informing the Commission that the proposed conference to be held with the Port Authority on October 24th was for the purpose of discussing the work of the several bodies so that there will be mutual co-operation and no overlapping of one anothers work. On motion duly seconded, this was ordered filed.

Kiwanis Club-Change of Dates

The Secretary informed the Commission that due to the misunderstanding, the dates of the invitation of the Kiwanis Club of Washington, to the State Highway Commission, had been changed from the 7th and 20th of November to the 13th and 27th of November. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission approved the acceptance of the invitation of the Washington Kiwanis Club for the 27th day of November, 1923, and directed the Secretary to so inform them.

Bond Issue

Commissioner Kidde directed the attention of the Commission to the fact that in order to continue the road program it would be necessary to make a change in the issuance of the remainder of State Highway bonds in the hands of the issuing officials and he offered the following resolution for adoption:

WHEREAS, by resolution of the State Highway Commission of June 5, 1923, the Issuing Officials of the State of New Jersey were requested to issue State Highway road and bridge bonds in the sum of $5,000,000.00 for roads and $3,000,000.00 for bridges, making the total of $8,000,000.00 for the year as provided by Chapter 262 of the Laws of 1922, and

WHEREAS, it now appears desirable to change the amounts as applicable for roads and bridges on account of the greater amount of highway work that has been possible to place under contract than was originally anticipated,

NOW, THEREFORE, BE IT RESOLVED by the State Highway Commission of the State of New Jersey that the Issuing Officials of the State of New Jersey be and they are hereby requested to apportion the total bond issue for roads and bridges for the year ending December 31, 1923, as follows:

The sum of $6,000,000.00 for constructing, improving, reconstructing and rebuilding of highways.

The sum of $2,000,000.00 for constructing, improving, reconstructing and rebuilding of bridges on said highways.

This was seconded by Mr. Jelin and adopted.

Amboy Bridge Funds

Commissioner Kidde inquired as to what disposition would be made of the Amboy Bridge funds in the event these bridge funds were allocated to road work in accordance with the resolution passed. The Secretary informed the Commission that in view of the fact that the Amboy Bridge contract will not be let until the month of December, the funds for the same will be apportioned beginning with the 1924 account and these in three installments from the 1924, 1925, and 1926 year accounts.

The Schedule of Business was next taken up for consideration item by item:

Route 8, Section 2.

State Highway Engineer Sloan presented the following list of bids received on October 22, for the construction of Route 8, Section 2, Montclair-Verona, and recommended award of contract to Frank Cannova of Lodi, N.J., at his the lowest bid, of 87% of the Engineer's estimated units of cost.

Frank Cannova	87. %
John W. Heller	97.7%
Newark Paving Co.	99. %
J. F. Chapman & Son	102. %
Phillip Jannarone & Sons	115. %

On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission unanimously adopted the following resolution:

RESOLVED, that the State Highway Commission does hereby make award of contract for the construction of Route 8, Section 2, Montclair-Verona, to Frank Cannova of Lodi, New Jersey, at his the lowest bid amounting to 87% of the Engineer's estimated units of cost, said bid amounting to $32,090.38, and

BE IT FURTHER RESOLVED, that the Chairman is authorized to sign the necessary contracts after approval by the State Highway Engineer.

Seaside Heights & Island Heights Br.

State Highway Engineer reported to the Commission the completion of the Seaside Heights and Island Heights Bridge over Barnegat Bay on September 15, 1923, and recommended that the Commission accept the same and approve of final payment thereon to L. J. Sieling, contractor, of Red Bank, N.J. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission approved the recommendation of the State Highway Engineer and authorized the acceptance and final payment of the Seaside Heights and Island Heights Bridge over Barnegat Bay.

Right of Way, Route 1~~5~~4, Section 8.

State Highway Engineer Sloan presented purchase agreements and recommended acceptance of the same by the Commission on Route 14, Section 8. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission unanimously approved of the purchase of parcels of property on Route 14, Section 8, as follows, the same having been recommended by the State Highway Engineer.

From George Eldridge and Roxanna D. Eldridge for the consideration of $1.00 and the rebuilding of 230 lineal feet of galvanized fence at a total estimated cost of $149.50.

From Charles and Anna M. Wills, for the consideration of $1.00 and the rebuilding of 110 feet of lineal mesh wire fence at an estimated cost of $49.50.

From Annie Leaming for the consideration of $75.00.

From Michael and Mary Brodbeck for the consideration of $1.00 and the removal of garage and fence construction at a total estimated cost of $299.45.

From Hattie G. Douglass for the consideration of $1.00 and the resetting of existing fences.

From Frank W. Addison for the consideration of $1.00 by quit claim deed.

From Clarence E. Moore and Marian Moore for the consideration of $1.00 by quit claim deed.

Right of Way, Route 14, Section 9.

State Highway Engineer Sloan presented purchase agreements and recommended acceptance of the same by the Commission, on Route 14, Section 9. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission unanimously approved of the purchase of parcels of property on Route 14, Section 9, as follows, the same having been recommended by the State Highway Engineer:

From Aaron Delancy, Parcel 5, for the consideration of $1.00 and filling of driveway to house.

From Edward DeVaul for the consideration of $1.00 by quit claim deed.

From James E. Allen, for the consideration of $1.00, by quit claim deed including the resetting of fences.

From Anthony Canuso and wife, for the consideration of $1.00 by quit claim deed.

From William L. Reem for the consideration of $1.00 by quit claim deed.

Right of Way, Route 5, Section 2-A

State Highway Engineer Sloan recommended approval of purchase agreement for property of Frederick W. Thomas and Ella V. Thomas, and Cona W. Thomas, known as Parcel #2-A on Route 5, Section 2-A, at a consideration of $75.00. On motion by Mr. Kidde, seconded by Mr. Jelin, the recommendation of the State Highway Engineer for the purchase of property on Route 5, Section 2-A, was approved.

Right of Way, Route 16, Section 6.

State Highway Engineer Sloan recommended to the Commission purchase of property on Route 16, Section 6, known as Parcels 14-A and 14-B, on either side of Mt. Kemble Ave. , from Enoch Howlett for the consideration of $125.00. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission approved the recommendation of the State Highway Engineer and authorized the purchase of Parcels 14-A and 14-B on Route 16, Section 6.

Right of Way, Route 10, Section 1-C

State Highway Engineer Sloan recommended to the Commission that condemnation be authorized on lands needed for the construction of Route 10, Section 1-C. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission unanimously approved of the condemnation of lands on Route 10, Section 1-C, as follows:

Parcel #1, owner Fred Buz
" #2, " Oscar Millimet
" #4, " Chas. W. Godfrey
" #9, " Albert Catelan
" #10, " Frazoie Mermet
" #11, " Alareick O. Ouimet
" #15, " Donald McClure
" #17, " Mrs. Emma McGeorge

Route 8, Section 4-A, Bridge

On recommendation of the State Highway Engineer, Commissioner Kidde moved the acceptance of an easement for the construction of a temporary bridge at M.P. 23.2 on Route 8, Section 4-A, from John A. Tice, for the consideration of $1.00. This was seconded by Mr. Jelin and adopted.

Route 4, Section 20, Osborne Estate

State Highway Engineer Sloan presented a report from Assistant State Highway Engineer Reed, advising that in accordance with the action of the State Highway Commission on October 16, Commissioner Jelin and Mr. Reed had inspected the property of A. J. Osborne

Estate, in the Borough of Brielle, on Route 4, Section 20, Manasquan-Sea Girt Section, and after taking the matter up with Mrs. Osborne and her daughter Commissioner Jelin stated that he would recommend that the Commission pay $7,000.00 for the property with the understanding that the owner would have all the buildings removed from the line of work in time to prevent any interference with the construction. Commissioner Jelin stated that he felt that the price of $7,000.00 was not excessive for the land and moving of the buildings and he moved approval of his recommendation. This was seconded by Mr. Kidde, and adopted.

On motion by Mr. Kidde, seconded by Mr. Jelin, the Commission recessed for luncheon at 12:30 P.M. to meet in regular session at 2:00 P.M.

The Commission reconvened at 2:00 P.M. as agreed with the same members present as at the morning session.

Right of Way, Burnett Claim

State Highway Engineer Sloan reported in connection with the claim made by Mr. Burnett as to his being misled by the agent of the State Highway Commission that he (Major Sloan) had instructed Mr. Meeker to again see Mr. Burnett. Mr. Meeker had found that Mr. Burnett was unwilling to treat with the Commission upon a fair understanding, and he recommended that the Commission proceed to acquire this property on the basis of the contract already signed by Mr. Burnett and his wife. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission directed that proceedings be commenced for the acquisition of property on the agreement as drawn and upon the recommendation of the Right of Way Division.

Route 15, Section 4, Millville

State Highway Engineer Sloan informed the Commission that in accordance with the hearing conducted by the Commission with the Cumberland County Traction Company and with the authorities of Millville, a form of agreement had been drawn up whereby the State could proceed with the construction of Route 15, Section 4, and the Cumberland County Traction Company would not interfere nor stand upon any technicalities as to the performance of the work leaving the matter of the paving between the trolley tracks up to court decision on the matter. Commissioner Stewart informed the Commission that he had gone over the suggested form of agreement and he was satisfied as to its contents. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission approved the form of agreement as prepared by the State Highway Engineer and directed that the same be forwarded to the Cumberland County Traction Company for execution.

Newton-Fredon Road

Commissioner Kidde in discussing the matter of agreements, called the attention of the Commission to the tentative agreement reached with Mr. Wasser, Engineer of the Public Service Production Company at the last meeting of the Commission with reference to the payment for the Newton-Fredon Road in Sussex County. He suggested that before any definite action is taken by the County of Sussex that the Commission approve of the form of agreement to be entered into, especially with a view toward giving the Commission the discretion of using the 25% to be retained for five years, in the event the pavement is not satisfactory at a previous time. Chairman Stewart informed the Commission that he felt that the form of this agreement should be passed upon by the Attorney General's Department before it could be approved by the State Highway Commission. After further discussion Commissioner Jelin moved that a copy of the minutes of the meeting of October 16th on the matter of the Newton-Fredon Road be forwarded to Senator H. T. Kays, County Solicitor for Sussex County, in order that the agreement may be drawn in accordance with the suggestions as made by the State Highway Commission. This was seconded by Mr. Kidde and adopted.

New Brunswick Bridge

State Highway Engineer Sloan presented a plan with alternating routes for the new bridge at New Brunswick. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission declared an executive session for the consideration of this plan.

American Road Builders Association

State Highway Engineer Sloan presented a report to the Commission in accordance with a request at the last meeting of the Commission concerning the convention of the American Road Builders Association to be held in Chicago during January of 1924, and he recommended that practically the same exhibit as made last year be made this year at an estimated expense of $800.00 and that expenses be provided for approximately eight representatives, at the rate of $150.00 each for the purpose of attending this conference, stating that he felt that information concerning the work being done in other states will be of great value to the Division Heads and he suggested also that as many of the Commissioners as can find it convenient should attend the conference. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission approved the recommendation of the State Highway Engineer and authorized an exhibit and attendance therewith.

Hunterdon County-Seven Per Cent System

State Highway Engineer Sloan presented a resolution from the County of Hunterdon requesting that the Commission approve the placing of the route from Trenton to Flemington to Clinton to Hampton in the Federal Aid Seven Per Cent System. On motion by Mr. Kidde, seconded by Mr. Jelin , the State Highway Commission approved of the request of Hunterdon County and authorized this route to be placed in the Federal Aid Seven Per Cent System without making any guarantee as to funds for its construction.

Mercer County-Seven Per Cent System

State Highway Engineer Sloan called the attention of the Commission in this connection to the fact that the road requested by Mercer County for inclusion in the Seven Per Cent System was the Trenton link in this line and he recommended that the Commission clarify its action taken at the last meeting by approving of the inclusion of this section in the Seven Per Cent System without making any guarantee of funds. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Engineer approved of the recommendation of the State Highway Engineer and authorized the inclusion of the Mercer County Road in the Seven Per Cent System.

Washington Avenue, Bergen County

State Highway Engineer Sloan recommended the approval and acceptance of Washington Avenue, Washington Township, Bergen County. On motion by Mr. Kidde, seconded by Mr. Jelin, the recommendation of the State Highway Engineer was approved.

Township Aid Force Account Agreements

On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway

Commission approved of force account agreements covering the following Township Aid roads:

Gloucester	Co.	Greenwick Twp.	Tomlin Station Road
"	"	Harrison "	Swedesboro-Harmony School Rd.
"	"	Logan "	Bridgeport-Gibbstown Rd.
"	"	Woolwich "	Bridgeport-Mullica Hill Rd.
Salem	"	Lower Penns Neck Twp.	Harrisonville-Lighthouse-Cemetary Rd.
"	"	Mannington "	Action Station Rd.
Hunterdon	"	Delaware "	Stockton-Rosemont Rd.

Employments

The State Highway Engineer Sloan presented the following list of employments as made by him since the last meeting of the Commission and recommended ratification of the same.

Oct. 16,	H. L. Henderson	Asst. C. E.	$165.00 mo.
" 24,	Bernard Feeney	Highway Const. Inspector.	$185.00

Hourly Basis

Oct. 16,	Herbert Whitesell	Mechanic	$ .60 hr.
" 3,	Bernard Higgins	Gar. Asst.	.45
" 16,	Wm. S. Nugent	Motor Tr.Dr.	.50

On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission approved of the employments as made by the State Highway Engineer.

Lignin Binder, Atlantic County

The Secretary informed the Commission that Mr. M. R. Young, who was the bidder for the placing of Lignin Binder on Atlantic County roads, and who had been awarded the contract by Atlantic County, was present and desired a hearing. On motion duly seconded, the hearing was granted. Mr. Young appealed to the Commission for a~~n~~ review of ~~unprejudiced~~ the decision in the matter of award of the Lignin Binder contract to him by Atlantic County in view of the statements presented to the commission by County Solicitor E. A. Higbee at the morning session. On motion duly seconded, an executive session was declared after which Mr. Young was again invited before the Commission and was informed by the Chairman that the Commission had investigated charges which were made at the last meeting, and sitting as an unprejudiced committee it had found no truth in the charges as made against Mr. Young and that the State Highway Commission was now prepared to approve of the award of contract for Lignin Binder on Atlantic County Roads. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission directed that the Secretary notify the County of Atlantic that in the light of information which has come before the State Highway Commission since its last meeting the Commission rescinds its action taken at that meeting requesting readvertisement for Lignin Binder, and in view of the lateness of the season approves of the award of contract as made by Atlantic County for Lignin Binder.

Route 4, Perth Amboy

The Secretary presented a communication from Graham & McKeon, contractors on Route 4, extension, Perth Amboy, requesting the Commission to be present on the grounds on Thursday, October 25th, to consider the matter of the bad conditions of the subgrade and the advisibility of proceeding with the pavement thereon. Commissioner Jelin reported to the Commission that he had been waited on by the contractors who had stated that it was impossible for them to proceed with the completion of this work and that some arrangement should be made whereby the work could be abandoned. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission directed that the matter be referred to the State Highway Engineer for the purpose of preparing a complete report on the condition of this work and with a view toward ascertaining the liability of the State Highway Commission in the amount of the work done and further that a representative of the Department be delegated to attend the meeting between the City authorities and the contractors on Thursday, October 25th.

Route 17-Taking over

State Highway Engineer Sloan presented to each Commissioner a report as prepared by the Maintenance Division Superintendent bearing on the taking over of Route 17, in which report it was stated that the grand total for maintenance on Route 17 will be $115,087.00. Commissioner Kidde stated that in view of the fact that this route was the only one approved by the Governor at the last session of the Legislature and further in view of the fact that it was felt by the State Highway Commission that the route is a very desirable one in the State Highway, he would move that arrangements be made for a public hearing to be held at Hackensack after the statuatory thirty-day notice, and on a day agreeable to Chairman Scott. This was seconded by Mr. Jelin and adopted.

Paulsboro-Swedesboro Road

On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission approved of plans and specifications for the Paulsboro-Swedesboro Road, Section 1, Gloucester County, same having been recommended by the State Highway Engineer.

Denville-Mountain Lakes Road

On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission approved the contract for the Denville-Mountain Lakes Road, Morris County, Township Aid, same having been approved by the State Highway Engineer.

Crosswicks-Ellisdale Road

State Highway Engineer Sloan presented to the Commission a communication from the Township of Chesterfield requesting permission to proceed with the construction of Crosswicks-Ellisdale Road to Chesterfield Township, in Burlington County from funds to be apportioned by the state after January 1st. Assistant State Highway Engineer Reed informed the Commission that this was desirable in view of the fact that it was better to have this work done at this time of the year by the farmers, where it could be done to much better advantage than it would be possible to have the same done in thr spring. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission approved of an advance allotment to Chesterfield Township for the construction of the Crosswicks-Ellisdale Road, Burlington County.

Draw Bridge Machinery

State Highway Engineer Sloan presented to the Commission reports on the abandonment of operation by the Jersey Central Traction Company on the Matawan Creek Bridge and the Morgan Draw Bridge where it would be necessary to provide other means of operating draw spans in view of the fact that the electric current has been shut off. He presented the recommendation of the Superintendent of Maintenance Muir, that a guaranteed second hand motor generator set be installed on each bridge for $625.00 complete with the necessary controls. On motion by Mr. Kidde, seconded by Mr. Jelin, the recommendations of the State Highway Engineer and Maintenance Division Superintendent were ordered approved and motor generators were authorized for Morgan

Bridge and the Matawan Creek Bridge on Route 4.

Repairs - ~~Nolan's Point~~, Morris County

Commissioner Kidde called attention to a communication received by him concerning a road near Nolan's Point in Morris County and moved that this be referred to Assistant State Highway Engineer Reed for further report. This was seconded by Mr. Jelin and adopted.

Route 4, South Amboy

The Secretary presented to the Commission a petition received from residents of South Amboy urging that the Commission consider extending the width of Route 4 through South Amboy in order that they would not be assessed for street widening. On motion by Mr. Jelin, seconded by Mr. Kidde, the communication was ordered referred to the State Highway Engineer for report at a later date.

Signs

Assistant State Highway Engineer Reed presented for approval of the Commission a revised sign to be placed at the beginning and ending of routes and at the intersections of county roads with the State Highway routes, on which was designated the route number together with the beginning and ending points of that particular route. On motion duly seconded this sign as presented was approved by the Commission.

Bill-board Advertising

Commissioner Kidde directed the attention of the Commission and the Clerk to the Chairman to a scheme for bill-board advertising on State Highway jobs and asked that some data together with probable cost of same be secured for further study by the Commission.

On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission adjourned at 4:30 P.M. to meet in regular session again on Tuesday, October 30th, 1923, it being the purpose of the Commission to attend a meeting of the North Jersey Rapid Transit Company in New York on Wednesday, October 24th, and to inspect the shore routes on October 25th, in the interim.

Respectfully submitted,

A. LEE GROVER,

Secretary

MINUTES OF MEETING - October 30, 1923.

A regular meeting of the State Highway Commission was held at the offices of the Commission, Broad Street Bank Building, Trenton, on Tuesday, October 30, 1923. The meeting was called to order by Chairman Scott at 10:30 A.M.

Present: Gen. H. L. Scott, Chairman; Messrs. Percy H. Stewart, Abraham Jelin and Walter Kidde.

The Secretary informed the Commission that there had been no requests made during the past week for hearings at this meeting.

Route 16, Section 6

Burnett Claim

The Secretary presented a communication received by Chairman Scott from Mr. Robert N. Burnett with further reference to right of way agreements signed by him conveying his property on Route 16, Section 6, in which communication Mr. Burnett sought the return of his agreements on the ground that matters had been misrepresented to him. The Commission requested Mr. R. A. Meeker, Right of Way Engineer, to explain conditions existing on his property and Mr. Meeker informed the Commission that he had informed Mr. Burnett that the Commission must acquire a sixty-six foot right of way but that the graded width of the roadway at the present time would be thirty feet and there would be no immediate use be the Commission for the remainland between the slopes and the sixty-six foot line. Mr. Meeker informed the Commission that Mr. Burnett had been present at his office earlier in the day and was willing to allow the agreements to stand if permission was granted him to erect a new fence on the location of the present existing fence which is within the sixty-six foot line. State Highway Engineer Sloan recommended to the Commission that in view of the fact that encroachments do not exist within the sixty-six foot line, which will not at the present time, interfore with the construction of the roadway, that the Commission should permit these obstructions to remain until such time as the land is needed by the Commission, but under no circumstances should the owners be permitted to place any fences or any obstructions inside this sixty-six foot line, any such fences whether built by the owner, to be placed on the sixty-six foot line.

Route 16, Section 6, Childs Property

The Secretary informed the Commission that a communication had been received by Chairman Scott from Mr. Frederick Childs also an owner of property on Route 16, Section 6, near the property of Mr. Burnett, in which communication Mr. Childs claims that it had been represented to him that the Commission would not desire anything at the present time beyond the land required for actual road purposes. Commissioner Kidde voiced his opinion that wherever possible the State Highway Commission should purchase a full sixty-six foot right of way without encroachments of any kind thereon. Mr. Meeker informed the Commission that in this particular case the contractor was on the work and it was necessary to secure a clear roadway for the construction purposes in the shortest possible time. After further discussion Commissioner Stewart moved that the Secretary acknowledge the receipt of the letters of Mr. R. N. Burnett and Mr. Frederick Childs, advising that for the time being the State Highway Commission is willing to allow the present obstructions to remain within the sixty-six foot right of way line with the strict understanding that the same will be removed when notified by the State Highway Commission to do so. further that the Commission will not permit any new encroachments or any fences to be rebuilt or constructed within the sixty-six foot line, any such fences as shall hereafter be constructed to be placed on the sixty-six foot line; further that so far as charges or fraud or misrepresentations are concerned, the State Highway Commission has investigated the charges and finds them to be untrue. This was seconded by Mr. Kidde and adopted.

Highway Through Ocean Grove

The Secretary presented a communication received by the Chairman Scott from Hon. H. B. Wells, Judge of the Burlington County Courts, requesting that the State Highway Commission make no commitment to any policy with regard to a highway through Ocean Grove until an opportunity has been afforded to present reasons why this highway should not be laid through Ocean Grove. On motion by Mr. Stewart, seconded by Mr. Kidde, the State Highway Commission instructed the Secretary to acknowledge the receipt of the communication from Judge Wells advising him that the State Highway Commission will take no action in the matter without granting him a full opportunity to be heard, also advising Judge Wells that as far as the interests of the State appear in the matter it may be that the Freeholders will proceed entirely without the aid of the State and in this way the matter will not come before the State Highway Commission.

A. G. A. Signs

The Secretary presented a communication from Hon. H. V. Osborne, President of the Board of Public Utilities Commission, requesting the Commission to remove A. G. A. signals at the Mantua Avenue Crossing of the Salem Branch and the Pennsgrove Branch of the West Jersey & Seashore Route on Route 6, at which place there had been installed the new visible red flashing signal adopted as a standard by the railroads and Public Utility Commission. Assistant State Highway Engineer Reed informed the Commission that instructions had already been forwarded to the American Gas Accumulator Co., informing them of the request of the Public Utility Commission for the removal of the flashing signals. On motion by Mr. Stewart, seconded by Mr. Jelin, the State Highway Commission directed the Secretary to acknowledge the communication from the Public Utilities Commission with the information that immediate attention is being given to their request as made.

Route 17, Newark, N.J. State Line

The Secretary presented a communication from the Board of Chosen Freeholders of Bergen County setting aside either December 3rd or December 10th, for a hearing date relative to the taking over of Route 17 from Newark to the New York State Line, said hearing to be held at the Court House in Hackensack, N.J. The communication also conveyed an invitation to the Commission to meet with the Board of Freeholders on the day of the hearing in time for luncheon. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission is directed that the Secretary place the necessary notices for the holding of a hearing on December 3rd, 1923, at the Court House, Hackensack, at 12:00 P.M. on the matter of taking over Route 17, and further that the invitation of the Board of Freeholders of Bergen County be accepted and the Secretary notify the Board that the Commission will endeavor to reach Hackensack at 12:30 on the day of the hearing.

East Main Street, Boonton, Balance

The Secretary presented a communication from the Board of Freeholders of Morris County to which was attached a resolution adopted by the Board with reference to East Main Street, Boonton, requesting the State Highway Commission to transfer the balance of the apportionment remaining to the credit of East Main Street, Boonton, to the Long Valley-Hunterdon County Line Road to certify to the Board of Freeholders of Morris County that there are no funds available for the construction of East Main Street, Boonton, in order that the County of Morris may proceed with its construction entirely with its own funds and without any control by the State. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission directed that the Secretary invite the Director of the Board of Freeholders of Morris County to come before the next meeting of the Commission in order to arrive at a solution of the condition existing in Morris County on East Main Street, Boonton, and other Morris County matters.

Route 5, Section 6, Speedwell Avenue

The Secretary presented a communication from the Board of Freeholders of Morris County requesting the Commission to improve conditions on Speedwell Avenue, Morristown, Route 5, Section 6, by patching from Vale Avenue north as far as the Town limits. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission directed that this matter be also taken up at the next meeting with the Director of the Board of Freeholders of Morris County. In this connection State Highway Engineer Sloan informed the Commission that a communication had been received from Hon. Clyde Potts, Mayor of Morristown, complaining of the condition in which the contractor on Route 5, Section 6, Speedwell Avenue, Morristown, had allowed the work to remain after it had been completed by him and requested that the Commission retain out of moneys due the contractor, the sum of $1,000.00, which amount the town had expended for repairing destruction caused by the contractor during the prosecution of his work. State Highway Engineer Sloan presented to the Commission a copy of a communication covering this matter which he proposed to forward to Mr. Potts, in which he informed Mr. Potts that the State Highway Department has not yet approved a final settlement with John S. Geiger & Sons, contractors on Route 5, Section 6, although the final adjustments with the contractor do not include any questions relative to the track area on Speedwell Avenue, and further advising Mr. Potts that he would not recommend that any moneys be retained out of the amount due the contractor as requested by the Town of Morristown. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission unanimously ratified the communication as written by the State Highway Engineer to the Town of Morristown and directed that a copy of the same be forwarded to the municipality of Morristown and to the Board of Freeholders of Morris County.

Sidewalks on Bridges

The Secretary presented a communication from the Board of Freeholders of Middlesex County, requesting the Commission to give consideration to the matter of constructing sidewalks for pedestrians on the trolley trestle on the old Amboy Bridge, said trolley trestle having been abandoned by the Jersey Central Traction Company. State Highway Engineer Sloan informed the Commission that under the opinion of the Attorney General it is not within the province of the State Highway Commission to construct sidewalks on bridges where none existed before, and on motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission directed that the Secretary notify the Board of Freeholders of Middlesex County that under existing legislation, sidewalks cannot be constructed by it on the Amboy Bridge.

Lights-Fenwick Creek Bridge - Rt 6

The Secretary presented a communication from the Rotary Club of Salem, N. J. requesting the Commission to reconsider the action of Bridge Engineer Vogel at deeming it unnecessary to continue lighting the new bridge over Fenwick Creek in Salem County, which bridge had replaced the old covered bridge in that location. On motion by Mr. Stewart, seconded by Mr. Jelin, the State Highway Commission directed that the communication be received and referred to the State Highway Engineer for report.

New Brunswick Bridge

The Secretary presented a communication from Mr. James Nielson, of New Brunswick, N.J. transmitting a communication received by him from Professor Charles H. Whitman, of the Women's College giving his views on the proposed bridge by way of Jones Avenue in New Brunswick. On motion by Mr. Stewart, seconded by Mr. Jelin, the State Highway Commission directed that the communication be acknowledged with the advice that it will receive due and careful consideration at the proper time.

Memorial Features-Amboy Bridge

The Secretary presented a communication from the Past Councillors Association of the Junior Order of United American Mechanics, urging the Commission to place memorial features on the new bridge over the Raritan River between Perth Amboy and South Amboy. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission directed that the Secretary notify the Sussex County Past Councillor's Association that in the plans and specifications as drawn for this new bridge, provision has been made for a space for the placing of tablets on the pylons on each entrance to the bridge which would give the bridge a memorial feature; said tablets to be erected when the bridge is completed, by some recognized agency.

American Association of State Highway Officials

The Secretary received a communication received by Chairman Scott from W. C. Markham, Executive Secretary of the American Association of State Highway Officials, advising that Mr. Charles A. Mead, formerly employed as Bridge Engineer to the State Highway Commission of New Jersey, was appointed a member of the sub-committee of bridges and structures of this Association, which Committee was now engaged in important work having to do with the standardizing of highway bridge specifications and kindred subjects. Attention was directed to the fact that Mr. Mead was no longer connected with the State Highway Department and while the Association would regret losing Mr. Mead's services, it felt that it should not continue a situation which might not meet with the entire approval of the New Jersey State Highway Commission. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission directed that the communication be acknowledged with the advice that the Commission would be very glad to have Mr. Mead continue his work with the American Association of State Highway Officials since it is felt that he will keep the State Highway Commission in touch with any important developments, and further that a communication be forwarded to Mr. Mead authorizing him to continue as a member of the American Association of the State Highway Officials sub-committee on bridges, with the distinct understanding that he will keep the State

Highway Commission advised of any developments in this work; and further that the State Highway Commission would congratulate him upon the fact that the American Association of State Highway Officials is desirous of having him continue in this work.

Frank Reddan-Appointment

The Secretary presented a communication from the Civil Service Commission advising of its approval of the appointment of Frank Reddan, as Clerk to the Chairman and placing this position in the exempt class. On motion, duly seconded, the communication was ordered received and placed on file.

Crosswicks Creek-Chesterfield Rd.,
Chesterfield Township, Burlington Co.

The Secretary informed the Commission that a delegation from Chesterfield Township, Burlington County, was present and desired a hearing relative to the award of contract for the Crosswicks Creek-Chesterfield Road, Section 1, in Chesterfield Township, Burlington County. On motion, duly seconded, the hearing was granted. Mr. Bunting, Chairman to the Township Committee, and Mr. Wills, Township Engineer, appeared before the Commission and advised that bids had been received by the Township on October 20th, for resurfacing the above mentioned road. Three bids had been received on a unit bid basis. One of the bidders had placed an additional item not called for in the proposal in his bid. It was felt that this made the bid irregular and award had been made to the lowest bidder on the two items requested in the proposal. The Commission investigated the circumstances of the bids and it was pointed out by Assistant State Highway Engineer Reed that the Township Committee has the authority, under the specifications, to determine the amount of work that it is to perform. Commissioner Kidde moved that the State Highway Commission approve the award of contract as made by Chesterfield Township Committee. This was seconded by Mr. Jelin and adopted.

The Schedule of Business was next taken up for consideration item by item as follows:

Route 9, Section 10 Bridge m P4.2

State Highway Engineer Sloan presented the following report on bids received on October 29 for a bridge at M.P. 4.2 on Route 9, Section 10, at Bound Brook, and recommended award to the F. W. Schwiers Jr. Co. of New York City, at their low bid of $49,673.00.

F. W. Schwiers Jr. Co.	$48,673.00
L. J. Sieling.	58,300.00
S. S. Thompson & Co., Inc.	58,300.00
Krellwitz Contracting Co..	59,000.00
Richards & Gaston.	87,000.00

On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission unanimously adopted the following resolution:

RESOLVED, that the State Highway Commission does hereby approve of award of contract to F. W. Schwiers Jr. Co. of New York City, for the construction of a bridge at M.P. 4.2 on Route 9, Section 10, Bound Brook, at their's the lowest bid amounting to $48,673.00, and

BE IT FURTHER RESOLVED, that the Chairman is authorized to sign the necessary contracts after approval by the State Highway Engineer.

Albany Street Bridge Widening

State Highway Engineer Sloan presented a report of two bids received for the widening of the Albany Street Bridge on Route 1, Section 13, at M.P. 31.4 and recommended that all bids be rejected and further that the widening of the Albany Street Bridge be delayed provided the State Highway Commission will proceed at once, with the construction of a new bridge at New Brunswick, which bridge could be completed in time for the same summer season that the widening work can be done on the Albany Street Bridge, and the Albany Street Bridge will furnish the means of travel without delay detouring traffic. Commissioner Jelin informed the Commission that it was his feeling that the widening of the Albany Street Bridge was imperative to relieve the traffic congestion and it was his further feeling that if the Albany Street Bridge was widened the traffic congestion could be studied to a better advantage with reference to the construction of a new bridge. Commissioner Stewart informed the Commission that he felt the same concerning the Albany Street Bridge as did Commissioner Jelin. State Highway Engineer Sloan further reported that in connection with the low bid of Krellwitz Contracting Company he had received a communication informing the Commission of the equipment the contractor would place upon the work if it was awarded to them, but no financial statement, or statement of similar work performed, had been received. Commissioner Kidde expressed the opinion that on a contract of this size there should be greater competition than that afforded by only having two bids received, and he moved that both bids be rejected and that the work be readvertised forthwith, in order that there may be greater competition in the work. This was seconded by Mr. Jelin and adopted.

Route 15, Section 5

State Highway Engineer Sloan reported that plans and specifications were completed for Route 15, Section 5, Millville-Menantico section, and recommended that authority be given to advertise the same from the 1923 funds since it was felt that work in this district could be carried on successfully to a much later date than in the northern part of the State. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission unanimously adopted the following resolution:

> RESOLVED, that plans and specifications for Route 15, Section 5, be and the same are hereby approved, and
>
> BE IT FURTHER RESOLVED, that the Chairman is authorized to sign the necessary papers and the Chief Clerk is directed to place the necessary advertisements for this work.

Bass River Bridge, Route 4

State Highway Engineer Sloan informed the Commission that plans and specifications were completed for the Bass River Bridge at M.P. 13.9 on Route 4, and he recommended authority be given to advertise the same. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission unanimously adopted the following resolution:

> RESOLVED, that plans and specifications for the construction of the Bass River Bridge at M.P. 13.9 on Route 4, be and the same are hereby approved, and
>
> BE IT FURTHER RESOLVED, that the Chairman is authorized to sign the necessary papers and the Chief Clerk is directed to place the necessary advertisement for this work.

Attorney General's Opinion-
Route 15, Section 4.

The Secretary presented a communication from the Attorney General advising that he has made a review of his opinion of August 31st with reference to the cost of construction of State Highway Route 15, Section 4, in Millville and he would change the answer to Question 3 in the letter of the Commission of August 16th to read "in my opinion the Traction Company is relieved of the obligation of regrading and repaving imposed by the franchise ordinance, and the obligation of the Traction Company to the Turnpike Company, if such was taken over by the County of Cumberland and inures to the State Highway Commission."

State Highway Engineer Sloan informed the Commission that the agreement with the Cumberland County Traction Company had been prepared and was ready to be submitted for execution. On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission directed that the opinion of the Attorney General be received and that the Engineering Department be directed to proceed with the agreement as formerly authorized, it being distinctly understood in the minds of the State Highway Commission that the matter would be finally disposed of in the courts.

Route 13, Section 5, Right of Way

Commissioner Jelin reported to the Commission that he was prepared to recommend approval of purchase agreements for property on Route 13, Section 5, Trenton-Lawrenceville section. On motion by Mr. Stewart, seconded by Mr. Kidde, the State Highway Commission approved of the purchase of the following parcels of property on Route 13, Section 5, Trenton-Lawrenceville, same having been recommended by the State Highway Engineer and Commissioner Jelin.

Parcel #1	John E. Reynolds	consideration	$1,842.00
" #2	George Mardl	"	270.00
" #3	John E. Reynolds	"	3,249.00

Right of Way, Route 16, Section 6-A

State Highway Engineer Sloan presented the purchase agreements for property of Heman Childs on Route 16, Section 6-A, and reported that this had been inspected by Commissioners Kidde and Stewart. Commissioner Kidde reported that in company with Commissioner Stewart a visit had been made to the property of the Heman Childs Estate, and after having gone over the ground very carefully they were prepared to approve the amount of damages as recommended by the State Highway Engineer. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission approved the purchase of property known as Parcel #3 from the Heman Childs Estate on Route 16, Section 6-A, between Blazier's Corner and VanDorn's Mills, for the total sum of $7,800.00

Route 4, Perth Amboy

State Highway Engineer Sloan informed the Commission that following instructions from the State Highway Commission he had delegated Division Engineer H. D. Robbins to attend a meeting with the contractors and the city authorities of Perth Amboy on the ground on Route 4, Connecting Link at Perth Amboy. State Highway Engineer Sloan presented a report from Division Engineer Robbins advising that it was the desire of the City authorities to place a cinder sub-base on the work in order that the work may proceed through clay fill and cut. The estimated cost of the work in which the State was requested to share to the amount of one-half, was $14,141.00. On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission directed that the report of Division Engineer Robbins be received and the authorities of Perth Amboy notified that the State Highway Commission is unwilling to participate to any further extent than the original $75,000.00 which the former State Highway Commission agreed to provide in connection with the improvement on Route 4, Connecting Link through Perth Amboy.

On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission recessed for luncheon at 1:00 P.M. to meet in regular session at 2:30 P.M. The Commission reconvened at 2:30 P.M. with the same members present as at the morning session.

Extension of Time, Route 9, Section 12

The State Highway Engineer presented a report from John Dorer, contrqctor on Route 9, Section 10, Bound Brook-Lincoln Avenue section, for an extension of time of 30 working days and recommended approval of same by the State Highway Commission, in view of the fact that the work is approximately 95% completed. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission approved of the recommendation of the State Highway Engineer and authorized an extension of time of 30 working days on Route 9, Section 10.

Employments

State Highway Engineer Sloan presented the following report on employments as approved by him since the last meeting of the Commission and recommended ratification of same. On motion by Mr. Jelin seconded by Mr. Stewart, the State Highway Commission approved the recommendations of the State Highway Engineer.

Nov. 1,	J. P. McCormack	Jr. Engineer	$120.00 mo.
" 1,	Wm. C. Davis	Br. Insp.	165.00

Hourly Basis

Nov. 1,	C. W. Graham	Div. Chauff.	.50 hr.
Oct. 24,	Vivian G. Farrow	Mechanic	.60
" 17,	Joseph Young	Mot. Tr. Dr.	.45
" 19,	John Dry	" " "	.40
" 23,	Frank H. Manley	Gar. Asst.	.45

New Brooklyn Road, Gloucester County

On recommendation of the State Highway Engineer, Mr. Jelin moved acceptance and final payment on New Brooklyn Road, Monroe Township, Gloucester County, Township Aid. This was seconded by Mr. Stewart and adopted.

Pitman-Richwood-Mullica Hill Road, Gloucester County

On recommendation of the State Highway Engineer, Commissioner Kidde moved acceptance and final payment of the Pitman-Richwood-Mullica Hill Road, Section 2, Harrison Township, Gloucester County, Township Aid. This was seconded by Mr. Stewart and adopted.

Walters Road, Cumberland County

On recommendation of the State Highway Engineer Commissioner Stewart moved the acceptance and final payment of Walters Road in Upper Deerfield Township, Cumberland County,Township Aid. This was seconded by Mr. Jelin and adopted.

Right of Way, Route 14, Section 9

State Highway Engineer Sloan recommended to the Commission that an offer of $367.40 be made to Emma M. Townsend for the acquisition of Parcel #9, on Route 14, Section 9, between Ocean View and Seaville, and in the event of refusal that this property be acquired by condemnation. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission unanimously adopted the following resolution authorizing this offer to be made, or condemnation.

> RESOLVED, that this Commission hereby determines to acquire in the name of the State of New Jersey for public use in the construction of State Highway Route 14, Section 9, ALL that certain lot, tract or parcel of land and premises, situate, lying and being in the State of New Jersey, and more particularly described as follows:

BEGINNING at a point in the easterly line of the road leading from Seaville to Tuckahoe, where said line is intersected by the northerly line of lands of Emma M. Townsend, and running thence (1) along said northerly line, south, fifty-five degrees, fifteen minutes and forty-five seconds East, nineteen feet and seven-tenths of a foot (19.7') to a point in said line; thence (2) southeastwardly and curving to the left with a radius of twenty-eight hundred and thirty-one feet and ninety-three one-hundredths of a foot (2831.93') a distance of three hundred and forty-one feet and two-tenths of a foot (341.2') to a point of curve at center line opposite Station 1167 plus 45.47, as shown on certain plans adopted by the New Jersey State Highway Commission for the improvement of Route 14, Section 9, of the State Highway System, and distant thirty-three feet (33') eastwardly from said center line; thence (3) south, twenty-six degrees, eight minutes and fifteen seconds east, eight hundred and eight feet and twelve one-hundredths of a foot (808.12') to a point of tangent opposite center line Station 1159 plus 37.35, as shown on said plans, and thirty-three feet (33') eastwardly from said center line; thence (4) southeastwardly and curving to the right with a radius of nine hundred and eighty-eight feet and thirty-seven one-hundredths of a foot (988.37') a distance of two hundred and ninety-five feet and five-tenths of a foot (295.5') to a point in the northerly line of lands now or formerly of Allan Corson; thence (5) along said northerly line, north, fifty-four degrees, eighteen minutes and thirty-four seconds west, a distance of ninety-six feet and thirty-six one-hundredths of a foot (96.36') to a point in said line; thence (6) northwardly and curving to the left with a radius of nine hundred and twenty-two feet and thirty-seven one-hundredths of a foot (922.37') a distance of two hundred and seven feet and nine-tenths of a foot (207.9') to a point of tangent opposite center line Station 1159 plus 37.35 and thirty-three feet (33') westerly from said center line; thence (7) north, twenty-six degrees, eight minutes and fifteen seconds west, eight hundred and eight feet and twelve one-hundredths of a foot (808.12') to a point of curve opposite center line Station 1167 plus 45.47, and thirty-three feet (33') westwardly from said center line; thence (8) curving to the right with a radius of twenty-eight hundred and ninety-seven feet and ninety-three one-hundredths of a foot (2897.93') a distance of forty-eight feet (48') to the easterly line of said road to Tuckahoe; thence (9) along said easterly line, north one degree, one minute and forty-five seconds east, one hundred and thirteen feet and forty-eight one-hundredths of a foot (113.48') to an angle in the same; thence (10) still along the easterly line of said road, north, nineteen degrees, twenty-five minutes and forty-five seconds, west, two hundred and ten feet (210') to the place of beginning, containing one acre and eight hundred and twenty-nine one-thousandths parts of an acre (1.829A).

Barbertown-Delaware Line Road,
Hunterdon County

On recommendation of the State Highway Engineer, Commissioner Kidde moved that a transfer be approved of the sum of $1,000.00 Township Aid funds from the Barbertown-Delaware Line Road to Baptistown to Barbertown Road, both in Kingwood Township, Hunterdon County. This was seconded by Mr. Jelin and adopted.

Bridgeton-Port Norris Road,
Cumberland County

On recommendation of the State Highway Engineer, Commissioner Jelin moved approval of award of contract by Cumberland County on the Bridgeton-Port Norris Road, work to be done from the Motor Vehicle Aid Account, only one bid having been received by the County of Cumberland on the unit price basis. This was seconded by Mr. Stewart and adopted.

Shore Road,
Atlantic County Repairs

State Highway Engineer Sloan presented for the consideration of the Commission the award of contract by Atlantic Coutny for repairs in the amount of $4,110.00 on the Shore Road, Atlantic County. Commissioner Kidde questioned the advisability of ~~spesning~~ spending this sum of money on a short stretch for patching work rather than having a new pavement over the entire section, which was estimated would cost $8,000.00 or $9,000.00. Commissioner Jelin stated that inasmuch as the program of the county was being rushed to completion at this season of the year, the Commission should not stand in the way of getting this small job completed, but that there should be a general study made of the road work being done by the counties with a view toward correcting any faulty conditions, before the new apportionments and schedules are made for the next year. Commissioner Stewart moved approval of the award of contract in Atlantic County for Shore Road repairs. This was seconded by Mr. Jelin and adopted.

Mr. Moore-Injury Claim

The Secretary informed the Commission that Mr. Swackhammer, representing Harry L. Moore, was present and desired a hearing. On motion, duly seconded, a hearing was granted. Mr. Swackhammer appeared before the Commission and explained that Mr. Moore was employed as a laborer by the State Highway Department and was injured during his employment by a truck of the Kolb Bakery Company of Philadelphia. A suit was instituted by Mr. Moore and he recovered the sum of $9,000.00 for his injuries which would maim him for life. During the period of his illness and up to this time the State Highway Commission had paid Mr. Moore $12.00 per week under the Workmen's Compensation Act, same to be remitted out of any award made Mr. Moore, by the courts; the total amount paid now amounting to an excess of $800.00 and Mr. Swackhammer appeared as Attorney for Mr. Moore to request that the Commission allow these payments to remain to the credit of Mr. Moore and not ask for their remittance to the State. Superintendent of Maintenance Muir was present and informed the Commission there was no written agreement on file concerning this case, but when Mr. Moore was injured by the third party, notification was forwarded to the third party that the State would have to be reimbursed for any advance made to Mr. Moore out of whatever award would be made against the Company by the courts. Commissioner Kidde inquired for information concerning the lawyers fees to be taken from Mr. Moore from the award made him. Mr. Swackhammer informed the Commission that he was not sure of the definite amounts. Mr. Kidde further stated that any remittance which might be made by the State would be influenced entirely by the manner in which Mr. Moore was handled by his Attorneys and physicians, it being felt that there may be a possibility of the Commission granting a three month's allowance to Mr. Moore provided a satisfactory statement was presented to the Commission, and Commissioner Stewart moved that the State Highway Commission await a statement from the Attorney for Mr. Moore relative to the amount received by Mr. Moore for his expense incident to his injuries, all of the same to be presented to the Attorney General's Department with a view to ascertaining whether it is legally possible for the State Highway Commission to make any remittance in the case, informing the Attorney General that it is the desire of the State Highway Commission so to do if possible. This was seconded by Mr. Jelin and adopted. Mr. Swackhammer promised the Commission that such a statement would be submitted at an early date.

Township Aid Cancellations

On recommendation of the State Highway Engineer, Commissioner Jelin moved the cancellation of an unexpended balance of $280.77 standing to the credit of Alexander Street, Princeton Township, Mercer County, Township Aid. This was seconded by Mr. Stewart and adopted.

Union Valley-Gravel Hill Road,
Middlesex County

On recommendation of the State Highway Engineer, Commissioner Jelin moved approval of the application of Monroe Township, Middlesex County, for $6,000.00 additional Township Aid to be applied on the Union Valley-Gravel Hill Road. This was seconded by Mr. Stewart and adopted.

Gibbsboro-Kresson Road, Camden Co.

State Highway Engineer Sloan presented for the approval of the Commission Township Aid Force Account agreement for Gibbsboro-Kresson Road, Voorhees Township, Camden County. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission directed the matter to be laid over until the next meeting of the Commission, same to be investigated by Mr. Jelin.

Brunswick Pike

Chairman Scott informed the Commission that he had an engagement to meet President Hibben of the Princeton University, with reference to discussing the road situation as affecting Princeton, it being the desire of President Hibben to exert every effort looking toward the completion of the Brunswick Pike between New Brunswick and Trenton as a main line highway for traffic which must now come through Princeton. Chairman Scott inquired as to the nature of reply to be made to President Hibben, and the general opinion of the Commission was that the feeling could be expressed that the Commission will be very favorable to the construction of this route, but it is only one of several very important projects under consideration by the Commission and cannot be given especial reference at this time without having considered all of the situations confronting the Department. In connection with the discussion relative to the question of Chairman Scott, Commissioner Kidde suggested that the Accounting Department be requested to work out a parallel case to the points raised by Senator Pierson in his recommendation for having the Road Bond Issue extended over a period of 15 years rather than the 10 year period as favored by the State Highway Commission, especially in view of the increase in Motor Vehicle receipts and State Highway receipts due to change in ratables resulting in an increase in Mill Tax receipts.

Special Motor Vehicle Inspector

Commissioner Kidde called the attention of the Commission to the fact that the Secretary to the Commission was not a Special Motor Vehicle Inspector, and he would move that a request be made upon Motor Vehicle Commissioner Dill, that Secretary A. Lee Grover be appointed in the State. This was seconded by Mr. Jelin and adopted.

Right of Way-Route 4 So. Amboy

State Highway Engineer Sloan reported that in accordance with instructions he had prepared a complete report concerning the right of way acquired from the P.R.R. for the construction of Route 4, through South Amboy. On motion, duly seconded, the report was referred to Commissioner Jelin for study and investigation until the next meeting of the Commission.

Route 11, Section 4, Passaic

The State Highway Engineer reported the completion of Route 11, Section 4, Main Street, City of Passaic, and recommended that acceptance and final payment be approved inasmuch as the Union Building & Construction Company is donating to the State the cost of the base in three places where it was found efficient in depth. On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission approved the acceptance of Route 11, Section 4, Main Street in the City of Passaic and authorized final payment to be made in accordance with the recommendation of the State Highway Engineer.

Route 13, Section 5

State Highway Engineer Sloan reported that a request had been made by the Trenton & Mercer County Traction Company for permission to relocate a turnout on Route 13, Section 5, Trenton-Lawrenceville section, from its present location to a point 300 feet beyond, where it would relieve congested conditions in Trenton, and at the same time afford trolley service to residents of Fanwood just outside the Trenton City limits. On motion by Mr. Stewart, seconded by Mr. Jelin, the State Highway Commission unanimously adopted the following resolution authorizing the Trenton & Mercer County Traction Company to relocate a turnout on Route 13, Section 5.

On motion by Mr. Jelin, seconded by Mr. Stewart, the following resolution was adopted:

> WHEREAS, permission has been requested by the Trenton & Mercer County Traction Corporation to remove a siding now located on State Highway Route 13 between Spruce and Mulberry Streets, and relocate same at a point opposite Station 31 plus 50 as shown on the plan of construction of State Highway Route 13, Section 5, Trenton to Lawrenceville, and
>
> WHEREAS, the removal of the present existing siding will result in there being but a single track at the narrow portion of the street where the siding is at present located, and
>
> WHEREAS, the relocation of the siding will place it outside of the paved portion of the said State Highway Route 13, Section 5.
>
> NOW, THEREFORE, BE IT RESOLVED by the State Highway Commission of the State of New Jersey that permission is granted to the Trenton & Mercer County Traction Corporation to remove the siding at present located on State Highway Route 13, between Spruce and Mulberry Streets, to a new location opposite Station 31 plus 50, as shown on the plan of construction of State Highway Route 13, Section 5, Trenton to Lawrenceville, and as shown on blue print hereto attached, it being understood that the said Trenton & Mercer County Traction Corporation will restore the track and overhead structure where the siding is at present located, for a single line track, subject to the approval of the State Highway Engineer, and will construct a new siding at the location and in manner satisfactory to the State Highway Engineer, it being further understood that all expense incident to the removal and relocation of the said siding will be borne by the Trenton & Mercer County Traction Company.

East Landis Road, Cumberland County

On recommendation of the State Highway Engineer, Commissioner Jelin moved the approval of Township Aid Force Account agreement for East Landis Road, Landis Township, Cumberland County, Township Aid. This was seconded by Mr. Kidde and adopted.

Phillipsburg-Belvidere Road,
Section 1.

State Highway Engineer Sloan presented a report on the award of contract by Warren County for the Phillipsburg-Belvidere Road, Section 1, work to be done with Federal Aid funds, and recommended approval of the award by the State Highway Commission. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission approved the award of contract by Warren County for the construction of the Phillipsburg-

Belvidere Road, Section 1, work to be done with Federal Aid funds.

Parallel Road construction discussed

Commissioner Jelin brought up for discussion the question of whether or not it is possible for the Commission to construct a parallel road between points designated in the statutes, and passing through municipalities named in the statutes where an existing road had already been constructed by the Commission, and which would be a parallel line to such an existing road. The Secretary informed the Commission that from a former opinion of the Attorney General it would be possible to construct such a parallel route, citing for example the construction of Route 2, South Broad Street, Trenton, where two distinct parallel lines of travel formed the State Highway. Commissioner Jelin informed the Commission that this would be very valuable in the case of the construction of a parallel road for the relief of shore traffic between Morgan and Keyport. Commissioner Stewart, therefore, moved that an opinion of the Attorney General be obtained which would clearly define the legality of the State Highway Commission's action in constructing a parallel route between points outlined in the State Highway Acts, but in entirely different locations. This was seconded by Mr. Jelin and adopted.

Right of Way, Route 8, Section 2

State Highway Engineer Sloan presented for the consideration of the Commission, the purchase agreement for the property of William Baldwin on Route 8, Section 2, between Montclair and Verona and recommended approval of the payment of $2700.50. Commissioner Kidde stated that he had been advised by Right of Way Engineer Meeker that an effort was being made by certain parties on this road to obtain unreasonable prices from the State for property needed for the realignment and he would suggest that no action be taken relative to any of the property, nor should the contract be finally delivered to the contractor for this work until reasonable arrangements had been made for the acquisition of property in this section. On motion by Mr. Stewart, seconded by Mr. Kidde, the State Highway Commission directed that the purchase of property from William W. Baldwin be held up until the next meeting, during which time Commissioners Jelin and Kidde would further investigate the property with the Right of Way Department looking toward the acquisition on a reasonable basis of property needed for the realignment of the Montclair-Verona Road.

Shore Traffic-Inspection

Commissioner Kidde reported that since the last meeting of the Commission an inspection trip had been made by the Commissioners to Perth Amboy and over the proposed route as recommended by the Special Advisory Board for Shore Traffic between Perth Amboy and Keyport. Commissioner Stewart reported that the State Highway Commission had held a meeting together with the Port Authorities and the Rapid Transit Commission of North Jersey at New York on the 24th instant, where the various problems of the three Commissions were discussed and cooperation was promised by the various parties.

Printing of Minutes

Secretary Grover reported to the Commission that he had investigated the matter of cost for printing one hundred copies of the minutes of the meetings of the Commission and based upon an average of 14 pages of mimeographed minutes as had been furnished the Commission, the cost would be approximately $56.00 for 100 copies in eight-point type similar to samples submitted by Commissioner Kidde. The Secretary informed the Commission that the printing would be done for three months by a local printer but after that the State Use System would have to be involved which would necessitate much delay in the receipt of printed copies. On motion by Mr. Kidde, seconded by Mr. Jelin, the matter was ordered laid on the table for further consideration.

Sign Board Publicity

The Commission next discussed with the Clerk to the Chairman, Frank Reddan, the matter of sign board publicity. Mr. Reddan prepared for the study of the Commission an outline of what such a sign board could provide and suggestions were offered for its improvement with the request that a new sign be prepared for presentation at the next meeting.

On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway

Commission adjourned at 6:00 P.M. to meet in regular session on Wednesday, November 7th, 1923, at 10:30 A.M.

Respectfully submitted,

A. LEE GROVER,

Secretary.

MINUTES OF MEETING - November 7, 1923.

A regular meeting of the State Highway Commission was held at the offices of the Commission, Broad Street Bank building, Trenton, on Wednesday, November 7, 1923. The meeting was called to order at 10:30 A. M., by Chairman Scott.

Present: Gen. H. L. Scott, Chairman, Messrs. Percy H.
Stewart, Walter Kidde and Abraham Jelin.

Automobile Insurance.

The Secretary informed the Commission that Major Stephen H. Barlow, representative of the Commercial Casualty Company, was present and desired a hearing with reference to discussing with the Commission the matter of insurance for trucks and passenger cars of the State Highway Commission. On motion, duly seconded a hearing was granted. Mr. Barlow appeared before the Commission and advised that upon the permission of Commissioner Jelin, his company had made an investigation of the trucks and other automobiles of the State Highway Commission and had arrived at rates of insurance for the State Highway Department which would approximate about 30% of the standard schedule rates, provided there is a blanket policy issued covering all vehicles. The insurance which is permissible for the State to carry would be for fire, theft and property damage on passenger cars, and for fire and property damage on trucks. Commissioner Kidde questioned the necessity for the State Highway Department insuring its automobile equipment through a company when the Commission had sufficient funds and authority in itself to make settlement for claims. Commissioner Jelin informed the Commission that his interest in having a survey made relative to the question of insurance was, mainly, from the fact that the public should be indemnified when damages are caused by State owned vehicles since in the past it had been the case that the State Highway Department could not be held liable for any kind of damage. The Secretary informed the Commission that at the last session of the Legislature provision was made in the Appropriation Acts whereby the State Highway Commission could pay any proper claims from funds available.

After discussion Commissioner Kidde moved that the proposition presented by Major Barlow be forwarded to the Superintendent of Equipment for the purpose of full investigation and report as to the requirements in connection with the automobiles of the State Highway Commission and in line with the recommendations submitted. This was seconded by Mr. Jelin and adopted.

Route #13, Section #6.

State Highway Engineer Sloan directed the attention of the Commission to conditions existing on the construction of Route #13, Section #6, where there were a great number of complaints of residents of Lawrenceville as to the condition of the road work being done by the Utility Construction Company. He advised that he had personally been on this road and found that the contractor was not making the progress which was expected up to this time. On motion by Mr. Kidde, seconded by Mr. Jelin, the Secretary was directed to notify the contractor to appear before the Commission sometime during this meeting.

Football Traffic Question.

State Highway Engineer Sloan presented for the attention of the Commission a report in connection with the handling of traffic for the Harvard-Princeton football game to be played on Saturday, November 10th at Princeton, in which report it was recommended that between the hours of 10:00 A. M. and 2:00 P. M., on November 10th, all northbound traffic between Trenton and New Brunswick with the exception of that bound for Princeton, will be routed over Route #1, by way of Hightstown, and also during the hours of 4:00 P.M., to 8:00 P.M., all southbound traffic between Princeton and New Brunswick will be sent over Route #1. This plan necessitating cooperation with the police authorities of New Brunswick and the State Police. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission unanimously approved of the recommendation of the State Highway Engineer in connection with the traffic situation for the Harvard-Princeton football game to be held at Princeton on Saturday, November 10th, 1923, and authorized the State Highway Engineer to take up the matter of cooperation requested with the police authorities of New Brunswick and the head of the State Police.

Right of Way, Route #8.

State Highway Engineer Sloan reported to the Commission on the matter of property on Route #8, Montclair-Verona Section, that Commissioner Jelin had approached the property owners on this section and much better prices had been agreed upon than was formerlly possible. Commissioner Jelin informed the Commission that he had obtained tentative acceptances from property owners which would make it feasible to proceed with the award of contract for this section of Route #8, re-alignment. On motion by Mr. Kidde, seconded b y Mr. Stewart, the State Highway Commission directed that the Right of Way Department secure properly signed agreements from the property owners on this section in order that the Commission might order procedure on this work at the next meeting.

Reinstatement of Mr. McAleavy.

The Secretary presented a communication received by Chairman Scott from Senator C. E. Case, requesting the reinstatement of Mr. Hugh McAleavy, formerly an inspector in the Highway Department. The Secretary informed the Commission that Mr. McAleavy was a temporary man who had been laid off at the close of work before the present State Highway Commission came into office, and due to an illness failed to take the eligibility examination given to all inspectors of the Highway Department by the present State Highway Commission. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission directed that the Secretary communicate with Senator Case advising him as to all of the circumstances as to Mr. McAleavy's case and also as to a charge made that temporary inspectors were reassigned to the Commission without giving consideration to Mr. McAleavy; the answer to this being that the men assigned were placed back upon jobs which were uncompleted the season before and which were again resumed in the spring and further advising him that Mr. McAleavy could be given consideration in the event an opening should occur.

Morris County Hearing.

The Secretary informed the Commission that a delegation from Morris County was present upon the invitation of the Commission for the purpose of discussing with the Commission, matters regarding highways in Morris County. There appeared Mr. Abell, director of the Board of Chosen Freeholders, Mr. Estler, Chairman of the Road Committee and Freeholder Fritz. Commissioner Kidde, on behalf of the Commission, outlined to the Morris County delegation the feeling of the State Highway Commission with regard to the apparent lack of cooperation on the part of the Morris County Board with the State Highway Commission, citing for example the inability of the Commission to secure cooperation on the East Main Street Boonton improvement and on the Long Valley-Hunterdon County Line Road, together with conditions existing on Speedwell Avenue, Morristown. Mr. Abell, in speaking for the Board of Freeholders of Morris County, advised that it was the purpose of the Board to endeavor to cooperate with the State Highway Commission, but that the circumstances involved in these cases were such that all of the Freeholders did not agree with the advice given by the State Highway Commission, and for this reason could not act agreeable with the Commission. Commissioner Kidde suggested that the Commission and the Board treat the several problems now before it, in a cooperative way in order that they may be finally disposed of.

The first matter taken under consideration was that of East Main Street, Boonton, in connection with which the Morris County Board of Freeholders had requested the Commission to transfer any remaining balance on this road to the credit of the Long Valley-Hunterdon County Line Road in order that the County of Morris, could, from its own funds, proceed with East Main Street, Boonton. Commissioner Kidde informed the Morris County Board that this action appeared questionable to the State Highway Commission because this road had been a contention between the Morris County Board of Freeholders and the State Highway Commission, and the State Highway Commission felt duly bound to allow the funds to remain to the credit of this road and assume jurisdiction in any decision as to its completion.

Freeholder Estler informed the Commission thathe was personally interested in the East Main Street, Boonton improvement and felt that inasmuch as the County of Morris was willing to finance the entire improvement, the County should not be held up. Director Abell stated that he was not in favor of the East Main Street, Boonton improvement since it was not a main county highway. Commissioner Jelin questioned the wisdom of doing the work in accordance with the original plans of the County of Morris, namely: for a concrete base with a bituminous top and suggested that a penetration macadam pavement would serve the traffic on this road for a long time to come. Mr. Estler advised that he was opposed to a penetration type of pavement upon any county road, feeling that it was not a satisfactory type for present-day traffic. Commissioner Kidde stated that he did not feel that the Board of Freeholders of any County should be governed entirely by the views of the local freeholders when it was a matter of expending county finances, and while he believed Mr. Estler was very conscientious in his efforts for the County, yet he did not feel that the county was warranted in going into the high-grade type of road which Mr. Estler recommended. Mr. Estler informed the Commission that in the event the Commission would permit Morris County to proceed from its own funds it was his purpose to have only a five inch concrete base with a two inch asphalt top which would cost approximately two-thirds of what the original pavement type would cost. Commissioner Kidde inquired of State Highway Engineer Sloan what his recommendation would be for the type of construction on East Main Street, Boonton. State Highway Engineer Sloan informed the Commission that he would recommend that a macadam base with a bituminous top be placed on this roadway. Director Abell inquired whether a slag base might be used instead of stone and State Highway Engineer Sloan advised the Commission that this would be acceptable. Commissioner Jelin called the attention of the Commission to the fact that on an investigation made on East Main Street, Boonton, he had discovered that due to development along this roadway, it would be necessary for the road to be torn up in very many places within the next two or three years and he would not approve any type of pavement which would involve large expenditures and could not be easily removed and repelced. Mr. Estler inquired whether in the event the Board of Freeholders was willing to accept a pavement of six inch slag foundation with a two inch bituminous top, the work could proceed at once with the County's forces and with unit prices obtained upon county road work. Commissioner Kidde stated on behalf of the Commission that this would be agreeable in order that the work might proceed at once and he moved that it be the sense of the State Highway Commission that it will approve of an application from the Board of Freeholders of Morris County for the reconstruction of East Main Street, Boonton, with a six inch slag foundation and a two inch topeka top cover on the basis that the county of Morris will proceed with this work with the unit prices prevailing in its maintenance schedule for slag and bituminous concrete, the State Highway Commission to contribute the balance remaining to the credit of East Main Street, Boonton, as the State's share of this work, all of said work to be performed by the County of Morris with its own road forces. This was seconded by Mr. Jelin and adopted.

Long Valley-Hunterdon Co. Line Road.

The next matter taken up for discussion was with reference to the completion of the Long Valley-Hunterdon County Line Road. Director Abell informed the Commission that the objection to the award of contract in accordance with the bids received, was the fact that the bids exceeded the estimated expenditures as laid out for this work due to the fact, to a great extent, by the additional width of pavement imposed by the State, namely: 20' whereas all other county roads are 18' in width. Commissioner Jelin informed the Freeholders that wherever a pavement less than 20' is placed there is a very heavy maintenance charge on account of shoulder work, and this is eliminated to a great extent by extra width, for which wxtra width the State had contributed one-half the estimated cost. Freeholder Fritz informed the Commission that he was personally interested in the Long Valley-Hunterdon County Line Road and felt that the Board of

Freeholders would take it up for consideration and for re-advertisement early in February. Mr. Abell also brought out the fact that the Long Valley-Hunterdon County Line Road was a through route and was of no benefit to Morris County as it was at the extreme end of the county. Commissioner Kidde informed the delegation that the State had assumed an interest amounting approximately $63,000.00, this being due in a great respect to the reasons given by Mr. Abell. Commissioner Kidde suggested that the matter be held in abeyance until after the receipt of bids, preparatory to which the State Highway Commission would make a study of plans for the Long Valley-Hunterdon County Line Road with a view toward eliminating any unnecessary expense toward the work.

Route #5, Section #6, Speedwell Ave.

Commissioner Kidde then asked that the representation consider, together with the Commission, some disposition of Speedwell Avenue, Morristown, where it is understood that a referendum as submitted to the people of the Town of Morristown, requesting the appropriation of 40% of the cost of the work, had been voted down at the November 6th election and the roadway between the tracks was still in a very deplorable condition. He suggested that the Commission might make a request upon the trolley authorities to raise the grade of its tracks and then a penetration macadam pavement could be put in between the tracks. Mr. Estler stated that he felt that the proposition made at Morristown, when the County offered to give 15% of the cost toward the 40% to be raised by the municipality was a good one. Mr. Abell stated that he believed the residents of Morristown were of the belief that the State Highway Commission must assume full jurisdiction on the entire width of pavement on Speedwell Avenue. Mr. Abell further inquired whether the Commission would be willing to pay an additional 10% of the improvement to be made between the tracks on Speedwell Avenue, Morristown, with concrete instead of granite block as originally outlined. Commissioner Jelin suggested that the Morris County Board of Freeholders make such a proposition in writing to the Commission and an investigation would be made by the Commission as to the condition of the concrete between the tracks in Rockaway and Wharton, in order that a definite answer could be made looking toward the improvement of conditions on Speedwell Avenue, Morristown. Mr. Abell promised that this would be given attention by the Board of Freeholders as soon as they were furnished with a transcript of the record of the meeting held this day.

Mr. Estler further inquired concerning Speedwell Avenue job with reference to the condition of sidewalks as left by the contractors on this work. He advised that where flag stones were removed that they were within the graded width of the road, therefore, the contractor was within his rights in moving the same. After discussion Commissioner Jelin moved that the Northern Division Engineer investigate the condition of sidewalks on Speedwell Avenue, Morristown with a view toward ascertaining where the State was at fault in the work done, and that in such cases it be corrected at the expense of the State. This was seconded by Mr. Stewart and adopted. Director Abell also called attention to a number of trees overhanging on Speedwell Avenue and Mr. Kidde moved that the matter be referred to the Maintenance Division for investigation and report.

On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission adjounred for luncheon at 1:15 P.M., to meet in regular session again at 2;30 P.M. The Commission reconvened at 2:30 P.M., as agreed with the same members present as at the morning session.

Bergen and Passaic Invitation.

The Secretary presented an invitation from the Bridge Department advising that the Boards of Freeholders of Bergen and Passaic Counties had invited the State Highway Commission to attend the opening ceremonies in connection with the completion of the Market Street Bridge over the Passaic River at the terminus of Route #10, at Paterson, on November 14, 1923. On motion by Mr. Stewart, seconded by Mr. Jelin, the State Highway Commission directed that the communication be received and accepted the Secretary to notify the Commissioners of the exact time for the ceremonies.

Somerset County Invitation.

The Secretary presented a communication from the Board of Freeholders of Somerset County inviting the Commission to attend ceremonies incident to the opening of State Highways in Somerset County on Armistice Day, November 12th, 1923. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission directed the acceptance of the invitation and suggested that the Secretary notify the members of the exact time for the ceremonies.

Black Horse Pike.

The Secretary presented a communication from the Atlantic City Board of Commissioners requesting information from the Commission as to the facts concerning the proposed width of the Black Horse Boulevard, and whether the Commission intended taking any action in connection/with this road. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission ordered the communication received and the Secretary was directed to inform the Atlantic City Board of Commissioners that there is no information available at the present time as to the width of the Black Horse Pike.

The Secretary presented a communication from the Hamilton Township Committee of Atlantic County, New Jersey, indorsing the Black Horse Pike. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission directed that the communication be received and that the Committee be notified that the Commission is making a study of new routes throughout the State and is glad to have its suggestions.

The Secretary presented a communication from the Keystone Automobile Club of Philadelphia, indorsing the Black Horse Pike. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission directed that the communication be acknowledged and that advice be forwarded to the effect that the Commission is now studying new routes throughout the State and is glad to have its suggestions.

Printing of Minutes.

The Secretary presented to the Commission a further report in connection with the printing of the minutes of the State Highway Commission, advising that the minimum time requested for the release of the printing of the minutes would be ten days from the meeting date with no assurance that this would be maintained when the Legislature is in session. Commissioner Stewart questioned the advantage to be gained by having the minutes printed in view of the fact that the mimeograph copies furnish as legal a document as is possible by having the minutes printed. On motion by Mr. Kidde, seconded by Mr. Stewart, the matter of having the minutes printed was laid on the table at this time.

Grade Crossing Protection.

The Secretary presented a communication from the Hon. H. B. Osborne, President of the Board of Public Utility Commissioners expressing appreciation for the cooperation of the State Highway Commission in assisting the Public Utility Board in its purpose in standardizing grade crossing protection in New Jersey.

Macon Floating Roller.

The Secretary presented a communication from Mr. S. J. Cox, Attorney for the Macon Concrete Roller Company, calling attention to the fact that contractors in New Jersey were using the Macon Floating Roller and Process which was an infringement on a patent owned by his clients. He advised that it was the purpose of his clients to bring suit against contractors using this process and roller without a license and asking cooperation from the State Highway Department in securing respect for his clients established rights. State Highway Engineer Sloan reported to the Commission that any action in this connection would be between the company and the contractor since the contract indemnified the State against any infringement suits. After discussion Commissioner Kidde moved that the communication be received and placed on file, and that a copy of the same be forwarded to each of the contractors at work on State Highway Sections, in order that they may be placed on notice concerning the receipt of the communication from Mr. Cox. This was seconded by Mr. Jelin and adopted.

Route #5, Drainage Conditions.

The Secretary presented a communication from Mr. O.D. Sickley complaining of drainage conditions on Route #5, Morris Avenue about 300 ft., west of the Springfield Hotel at the intersection

Westfield and Morris Avenues. On motion by Mr. Kidde, seconded by Mr. Stewart, the communication was ordered received and referred to the State Highway Engineer for report, and the Secretary was directed to notify Mr. Sickley that the matter will have immediate attention.

Route #16, Section #2.

The Secretary presented a resolution from the Somerset Co., Board of Freeholders requesting the Commission to consider the placing of a curb in front of the Dutch Reformed Church on Route #16, Section #2 at Bedminster, in order that the road bed as well as the sidewalks now being constructed by the church, may not be endangered by a heavy run of water which was caused by the removal of a stone wall at the road line. State Highway Engineer Sloan informed the Commission that this condition has been caused entirely by the stone wall removal, and if the curb is constructed in conjunction with the sidewalk work now under work in front of the church, by the church and town authorities, this drainage condition could be corrected. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission directed that the communication be received and placed on file and that the Secretary notify the Board of Freeholders of Somerset County that the Commission approves of the recommendation of the State Highway Engineer.

Amboy Bridge--New.

The Secretary informed the Commission that a number of general contractors had taken plans for the new Amboy Bridge and it would appear that there would be a much better competition on November 27th that was present at the former letting. In connection with this the Secretary inquired of the Commission whether plans and specifications could be forwarded to interested municipalities when said State Highway work was being performed through that municipality. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission authorized plans and specifications to be forwarded to the Engineering Department of those municipalities where State Highway work was being performed through the municipality and upon request of the local engineer.

The Schedule of Business was next taken up for consideration item by item as follows:

Proposed New Brunswick Bridge

State Highway Engineer Sloan presented a communication received from Mr. Herbert S. Swan, City Planning Engineer for New Brunswick, requesting a copy of plans and estimates as were available, covering the proposed new bridge location at New Brunswick. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission directed that Mr. Swan be notified that the Commission will be very glad to furnish such plans and estimates just as soon as a preliminary decision has been reached by the State Highway Commission concerning the new bridge location.

Route 8, Section 2. Right of Way

State Highway Engineer Sloan resubmitted to the Commission purchase agreements for Route 8, Section 2, Montclair-Verona Section, known as Parcel #3, from William W. Baldwin, for the consideration of $2,750.00. On motion by Mr. Kidde, seconded by Mr. Jelin, the matter was again laid over, pending disposition of remaining properties on this section of the road.

Route 5, Section 11.

State Highway Engineer Sloan reported completion of plans and specifications for the construction of Route 5, Section 11, Delaware-Belvidere Section, and recommended approval and authority to advertise. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission unanimously adopted the following resolution:

RESOLVED, that the State Highway Commission does hereby approve plans and specifications for the construction of Route 5, Section 11, Delaware-Belvidere Section, and

BE IT FURTHER RESOLVED, that the Chairman is authorized to sign the necessary papers when in form and the Chief Clerk is directed to place the necessary advertisements for the same.

Route 5, Section 12.

State Highway Engineer Sloan reported to the Commission the completion of plans and specifications for the construction of Route 5, Section 12, Netcong-Canal Culvert Section, and recommended approval and authority to advertise. On motion by Mr. Kidde, seconded by Mr.

Jelin, the State Highway Engineer unanimously adopted the following resolution:

RESOLVED, that the State Highway Commission does hereby approve plans and specifications for the construction of Route 5, Section 12, Netcong-Canal Culvert Section, and

BE IT FURTHER RESOLVED, that the Chairman is authorized to sign the necessary papers when in form and the Chief Clerk is directed to place the necessary advertisements for the same.

Route 10, Saddle River Bridge

State Highway Engineer Sloan reported the completion of plans and specifications for the bridge over Saddle River at M.P. 2.9 on Route 10, and recommended approval of same, and authority to advertise. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission unanimously adopted the following resolution:

RESOLVED, that the State Highway Commission does hereby approve plans and specifications for the construction of a bridge over Saddle River on Route 10 at M.P. 2.9, and

BE IT FURTHER RESOLVED, that the Chairman is authorized to sign the necessary papers when in form and the Chief Clerk is directed to place the necessary advertisement for the same.

Route 8, Section 5, Extension of Time

State Highway Engineer Sloan reported in connection with the acceptance of completed work on Route 8, Section 5, Sussex-Unionville Section, an extension of time was inadvertently omitted, although it was among the papers brought before the Commission. He recommended that the Commission approve of the extension of time to August 1, 1923, in order that the records may be completed. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission approved of the recommendation of the State Highway Engineer and granted an extension of time to August 1, 1923, on Route 8, Section 5, Sussex-Unionville.

Extension of Time,
Washington-Buttzville, Section 3

On recommendation of State Highway Engineer Sloan, Commissioner Kidde moved approval of an extension of time of twenty working days on the Washington-Buttzville Road, Section 3, Warren County State Aid. This was seconded by Mr. Jelin and adopted.

Tice Lane, Cumberland County

On recommendation of the State Highway Engineer, Commissioner Jelin moved the acceptance and final payment of Tice Lane in Upper Deerfield Township, work done under Cumberland County Township Aid. This was accepted by Mr. Stewart and adopted.

Marlton-Krosson Road, Burlington County

On recommendation of the State Highway Engineer, Commissioner Jelin moved approval of force account agreement on Marlton-Kresson Road, Evesham Township, work to be done under Burlington County Township Aid. This was seconded by Mr. Stewart and adopted.

Unexpended Township Aid Balances

On recommendation of the State Highway Engineer, Commissioner Jelin moved the transfer of $188.39, unexpended balance (Twp.) from work on Tice's Lane, and the sum of $1018.04 unexpended Township Aid balance from work on Walter's Road to the Cake Road, all of these roads being in Upper Deerfield Township, Cumberland County. This was seconded by Mr. Stewart and adopted.

Haddonfield-Coffins Corner Road

State Highway Engineer Sloan presented specifications for Haddonfield-Coffins Corner Road, Camden County, and recommended approval of the Commission. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission approved the specifications as recommended by the State Highway Engineer for the Haddonfield-Coffins Corner Road in Camden County.

Claremont-Post-Kunhardt Road

On recommendation of the State Highway Engineer, Commissioner Jelin moved approval of award of contract on Clairmont-Post-Kunhardt Road, Section 2, Parts 1 & 2, in Bernards Township, work to be done under Somerset County Township Aid. This was duly seconded and adopted.

Employments

State Highway Engineer Sloan presented to the Commission a report on employments since the last meeting of the Commission and recommended ratification of the same as follows. On motion by Mr. Jelin, seconded by Mr. Kidde, the Commission approved the recommendation as submitted.

Nov. 5,	Edw. M. Clarke,	Bridge Const. Insp.	$165.00 mo.
" 15,	Neven C. Hersler,	" " "	165.00 "
Oct. 29,	Earl Holcombe,	Garage Ass't.	.45 hr.
" 31,	F. Earl Wagner,	Mechanic	.60 "

Sick Leave-Maintenance Division

State Highway Engineer Sloan presented for further consideration a report from the Superintendent of Maintenance as to the condition of the health of Matthew Henry and Vincent Loughran, Bridge Tenders, in the employ of the State Highway Department, who have been on sick leave. This report stated that Mr. Henry will return on November 16, 1923, while Mr. Loughran has been admitted to the Rainbow Sanitorium of the Independent Order of Foresters at Rainbow Lake, where he is suffering from Pulmonary Tuberculosis, which will make it impossible to determine when he can return to duty. On motion by Mr. Stewart, seconded by Mr. Jelin, the State Highway Commission approved of an extension of leave of absence, with pay to Mr. Henry to November 16, 1923, and an extension of leave with pay to Mr. Loughran, for further report as to his condition to be presented on December 1st, 1923.

Mill Lane Road, Middlesex County

On recommendation of the State Highway Engineer, Commissioner Stewart moved approval of award of contract to the Utility Construction Company for the construction of the Mill Lane Road, North Brunswick Township, Middlesex County, Township Aid work. This was seconded by Mr. Kidde and adopted.

Springfield Avenue-
New Providence Road, Union County

State Highway Engineer reported to the Commission the completion of Springfield Avenue-New Providence Road, Union County, work having been done under Motor Vehicle Aid, and he recommended inspection and acceptance by the Commission. Commissioner Stewart inquired as to whether core drill specimens had been taken from this work, and was informed in the negative. On motion by Mr. Stewart, seconded by Mr. Kidde, acceptance of this road was laid over, awaiting the report of the core drill tests.

"Gray Giant" Machine

Commissioner Kidde reported that he understood from a representative of the "Gray Giant", a machine which would perform all the operations necessary to restore a macadam road, was to be given a trial on Prospect Avenue Improvement in Essex County, and he suggested that some member of the Engineering Division be detailed to investigate the operation of this machine.

Funds-State Highway Propositions

The Commission next discussed to some length the various propositions concerning which funds of the Commission would have to be provided for, such as the Vehicular Tunnel, the route for the relief of shore traffic, the Camden Bridge route and the taking over of additional routes of the State Highway System. Chairman Scott informed the Commission that he had requested the Secretary to investigate the possibilities in income to be derived from increased motor truck fees, and again the possibility of a gasoline tax such as was in operation in other states. Commissioner Kidde suggested that the Commission set aside one particular day other than Tuesday in the near future, for the discussion of these problems.

Route 5, Section 8,
Great Meadows-Barkers Corner

State Highway Engineer Sloan reported the completion of Route 5, Section 8, Great Meadows-Barkers Corner, and advised that the road was ready for final acceptance, this being the road on which Mr. Salmon, the contractor, had appeared for the remission of the penalty of 16 1/2 days, imposed on the section, such remission on the ground that labor conditions were very bad during the construction of this job. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission authorized an extension of ten days on Route 5, Section 8, Great Meadows-Barkers Corner, thus reducing the penalty to 6½ days, this extension having been granted due to the scarcity of labor experienced on the job by the contractor, and the matter of the acceptance of the road was ordered brought up at the next meeting of the Commission.

Clerk to the Chairman Report - Signs + Publicity

Clerk to the Chairman, Reddan, presented to the Commissioners tentative drafts of the statements to be issued to the press for study by the Commissioners and also presented a form of signboard as sketched by the Trenton Poster Advertising Company, in line with the suggestions of the Commissioners for a road sign which could be placed upon all construction jobs of the Commission. On motion by Mr. Jelin, seconded by Mr. Stewart, the matter was ordered referred to Commissioner Kidde for study and report at the next meeting.

Meeting Dates

On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission determined to meet on Monday and Tuesday, November the 19th and 20th, in order that on Monday there might be considered the special matters now in the hands of the State Highway Engineer and the regular meeting minutes could be considered on Tuesday.

Route 13, Section 6 ✓

The Secretary informed the Commission that pursuant to request made at the morning session, Mr. F. C. Schnieder, representing the Utility Construction Company, contractors on Route 13, Section 6, was presant. State Highway Engineer Sloan outlined before Mr. Schnieder and the Commission the difficulties being involved in the work being done by the Utility Construction Company on their section of Route 13, especially with regard to the situation in Lawrenceville. He stated that he had been informed at the morning session that the materialmen supplying the contractor could not get in to the work, due to the very poor condition of the roadway, which the contractor was supposed to maintain for one-way traffic throughout the work. Mr. Schnieder advised the Commission that it has been the effort of his company to do its best on the work since it started. He advised the Commission of difficulties encountered with the local authorities of Princeton in obtaining a location for a plant and of trouble experienced in Lawrenceville due to the moving of the trolley tracks. He informed the Commission that he was willing to do anything which they might suggest to hasten the work in this connection. State Highway Engineer Sloan recommended that the Maintenance Division be instructed to proceed to haul in the necessary cinders to Lawrenceville in order that the road may be placed in proper shape for one-way traffic; any such material as shall be placed in the road to be removed by the contractor without any claims for extra hauling and removal of material so placed. Mr. Schnieder expressed his willingness to cooperate in this respect. On motion by Mr. Kidde, seconded by Mr. Stewart, the recommendation of the State Highway Engineer was approved, it being understood that in so doing it was not relieving the contractor from his responsibility. State Highway Engineer Sloan also recommended that the contractor be requested to place an additional mixing plant in the work at Lawrenceville.

The contractor informed the Commission that he would be willing to do this provided material could be shipped into the plant. State Highway Engineer Sloan informed the Commission that if the plant was placed by the contractor, materials could be furnished. The contractor stated that he had another mixer which he could place on the work and would do so at once.

On motion by Mr. Stewart, seconded by Mr. Jelin, the State Highway Commission adjourned at 4:30 P.M. to meet in regular session on Tuesday, November 13th, at 10:30 A.M.

Respectfully submitted,

A. LEE GROVER,
Secretary

MINUTES OF MEETING - November 13, 1923.

A regular meeting of the State Highway Commission was held at the offices of the Commission, Broad Street Bank Building, Trenton, on Tuesday, November 13, 1923.

Present: Messrs. Walter Kidde, Percy H. Stewart, and Abraham Jelin.

Absent: General Hugh L. Scott.

In the absence of Chairman Scott, Commissioner Kidde moved the election of Commissioner Stewart as temporary Chairman. This was seconded by Mr. Jelin and adopted.

Chairman Stewart welcomed the attendance at this meeting of Col. W. F. Whittemore, member of the former State Highway Commission, and invited Col. Whittemore to sit through the discussions of the Commission. Col. Whittemore accepted the invitation and remained in the Commission Room.

Minutes Approved

Commissioner Kidde reported the careful reading of the minutes of the State Highway Commission meetings of August 28th, September 11th, and September 18th, and he moved approval of same as mailed to the Commissioners, subject to typographical corrections as explained to the Secretary. This was seconded by Mr. Jelin and adopted.

Route 6, Section 5, Salem County

The Secretary reported to the Commission that Mr. Foster of Pole Tavern, New Jersey, together with his Counsel and representatives of Salem County Board of Freeholders, were present and desired a hearing concerning a claim for property damage. On motion duly seconded, a hearing was granted. There appeared Mr. E. A. Foster, Mr. Hilliard, his Counsel, Director Gray of the Board of Freeholders of Salem County and County Engineer Keasbey. Mr. Hilliard addressed the Commission in behalf of Mr. Foster advising that Mr. Foster is the owner of a garage located on the northwest corner of the crossing of the Malaga-Pennsgrove Road with Route #6, Section #5. He explained that during the construction of Route 6 it developed that a widening would be necessary in the location of the garage which necessitated the cutting off of a corner of the garage property in order to place the property at a point six inches beyond the line of State Highway Route 6. The matter was handled by former State Highway Engineer Wasser, who had reached an agreement with the owner through County Engineer Keasbey, to pay Mr. Foster one-half the cost of moving his garage, which cost amounted to a state's share of $225.00, according to an estimate furnished to Mr. Foster by a contractor. Mr. Hilliard advised that no deed had yet been delivered by Mr. Foster, due to the fact that he had discovered after the work was done that the cost of the change was $947.00 instead of $450.00, and therefore he claimed that his client had a further charge against the state. In order that his client might be properly taken care of, he suggested that Mr. Foster would be willing to dispose of a triangular strip of land at his property location, to the State Highway Commission for the purpose of giving clearance to a travelled corner in return for the sum of $1,000.00. State Highway Engineer Sloan reported that he had investigated the files on the case with Construction Engineer Bedwell, and he produced a communication in which it was stated that Mr. Foster was willing to convey for $225.00 a strip of land six inches wide, immediately adjoining the State Highway, and this offer was accepted by the State Highway Department, thereby making a meeting of minds as to the purchase price for the property. County Engineer Keasbey stated that he felt that in view of the fact that the alteration job cost Mr. Foster $947.00 instead of $450.00, Mr. Foster was entitled to further consideration, since he removed his building without entering in any controversies. Commissioner Kidde stated that he believed that the State Highway Commission could not open up again any contracts entered into for the purchase of property, in view of the precedent which would be established and in this case it quite appeared that the additional cost of the alteration was due entirely to benefits derived by the property owner on account of the work performed. After further discussion, Commissioner Jelin moved that the matter be taken under advisement by the Commission for further consideration. This was seconded by Mr. Kidde and adopted.

East Main Street, Boonton

The Secretary presented a communication from the Morris County Board of Freeholders, enclosing resolutions covering the improvement of East Main Street, Boonton, with a six inch slag foundation and a two inch bituminous concrete top, which was considered at the last meeting between the Morris County Board of Freeholders and the State Highway Commission. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission directed that the communication be referred to the Engineering Department for investigation and report at the afternoon session.

Black Horse Boulevard

The Secretary presented a communication from Hon. F. M. P. Pearse, Secretary to the Governor, transmitting a communication received by him from the Black Horse Pike Association, requesting a hearing with the State Highway Commission relative to the construction of the Black Horse Boulevard. On motion, duly seconded, the communication was ordered received and the Secretary was directed to notify the Black Horse Pike Association that a date will be fixed for a hearing in the near future.

In connection with the foregoing communication, the Secretary reported that he was in receipt of a communication from Mr. Walter J. Buzby, former State Highway Commissioner, and owner of the Hotel Dennis at Atlantic City, inviting the members of the State Highway Commission and their wives to be his guests over the week end period of December 7th, 8th, and 9th, in order that the Commission might attend the sessions of the Good Roads Association conference to be held at Atlantic City on December 7th and 8th, and he also suggested that the Black Horse Pike could be given consideration at the time. Commissioner Jelin stated that it may be possible to hold a regular meeting of the Commission on December 10 at Atlantic City where hearings might be held covering the various South Jersey matters such as the Black Horse Pike and the Cape May-Lewes Ferry. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission directed that the invitation from Mr. Buzby be accepted, with appreciation.

State Highway Engineer Sloan called attention to the fact that on December 3d, 4th, and 5th there would be held the conference of the American Association of Highway Officials at New Orleans, and he felt that it was quite important that representatives of the State Highway Commission attend this meeting. No action was taken at this time.

Cape May-Lewes Ferry

The Secretary presented a resolution from the Borough of Stone Harbor, urging the establishment of the Cape May-Lewes Ferry. On motion by Mr. Kidde, seconded by Mr. Jelin, the communication was ordered received and placed on file for consideration when the Cape May-Lewes Ferry project is taken up.

Cape May-Lewes Ferry

The Secretary presented a similar resolution from the Borough of Avalon, urging the State Highway Commission to establish the Cape May-Lewes Ferry. On motion duly seconded, the communication was ordered received and placed on file.

Commissioner Kidde invited the opinion of Col. Whittemore of the former State Highway Commission, who he understood was very familiar with dock construction and boat service as to his feelings in the matter of the Cape May-Lewes Ferry situation. Col. Whittemore reviewed for the Commission what he believed was the matter as presented before the State Highway Commission when he was a member, and stated that he personally had always looked upon the proposed Cape May-Lewes Ferry propoganda as a very visionary scheme that could not be put into successful practice for the reason that the proposed location in the Delaware Bay is very rough and it will not be possible to run anything but a very sturdy seagoing vessel in such ferry service, which boats it would be practically impossible to run, due to the fact of the shallow water at the location where it was proposed to build the docks. This would necessitate a very great amount of dredging work before any successful plan for ferry service could be put into operation. He stated that he believed that this service might be undertaken from the Atlantic Ocean side of Cape May County; he further stated that he did not believe that the State Highway Commission of New Jersey should undertake any study of the situation the representatives of the State of Delaware would do the same thing. After the discussion, Chairman Stewart thanked Col. Whittemore for his expressions and stated that the information obtained has been very valuable to the State Highway Commission.

American Road Builders' Association

The Secretary presented a communication from the American Road Builders' Association, advising of its convention in Chicago on January 14th to 18th, 1924, and urging that reservations be made as early as possible. On motion by Mr. Jelin, seconded by Mr. Kidde, the communication was ordered received and the Secretary was directed to arrange for reservations after ascertaining the number who would attend the meeting.

Cape May-Millville-Malaga Road - Proposed Routes

The Secretary presented a resolution from the Chamber of Commerce of

Cape May, urging the construction of the road from Cape May through Millville, Vineland and Malaga, as another through route for traffic from Philadelphia to resorts in Cape May County. On motion by Mr. Kidde, seconded by Mr. Jelin, the resolution was ordered received and filed, and the Secretary was directed to notify the Cape May Chamber of Commerce that a hearing date would be set by the Commission at which time the matter could be discussed with the Commission.

Mrs. Lines Property Route #8

The Secretary presented a communication from Mrs. Catherine Lines of Riverdale, N. J. asking the Commission to do certain work in connection with the closing up of her property, partially removed by the State Highway forces. On motion by Mr. Kidde, seconded by Mr. Jelin, the communication was ordered referred to the State Highway Engineer with instructions and he advised Mrs. Lines that the Commission has done everything that it can possibly do under its powers.

On motion by Mr. Kidde, seconded by Mr. Jelin, the Commission recessed for luncheon at 1:00 P.M. to meet in regular session again at 2:00 P.M. The Commission reconvened at 2:00 P.M. as agreed with the same members present as at the morning session.

Mr. Mead - Hearing

The Secretary reported that Mr. Charles A. Mead, Engineer for the Public Utility Commission and former Bridge Engineer of the State Highway Department, was present and desired a conference with the Commission. On motion, duly seconded, a hearing was granted. Mr. Mead called attention to his appointment by the State Highway Commission to continue serving as a member of the sub-committee on bridge specifications, of the American Association of State Highway Officials, and he stated that a meeting of this committee would be held just prior to the convention of the association at New Orleans on December 3d, 4th, and 5th. Commissioner Kidde inquired from Mr. Mead just what benefits the State Highway Commission of New Jersey would derive from the work of his committee, and Mr. Mead advised that the committee had practically completed a standard specification for bridges which reflects the opinion of all the bridge engineers in the country and which would be of great value to the Bridge Department of the State Highway Commission. Mr. Mead further stated that he had been advised by the Public Utility Commission that they would be willing to grant him the time necessary to attend this meeting if the State Highway Commission would pay his expenses. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission ordered the matter held under advisement and informed Mr. Mead that he would be notified of a decision later in the day.

Snow Removal

State Highway Engineer Sloan directed the attention of the Commission to the proposed plan for snow removal for the winter season of 1923-24. He advised that it was proposed to continue the program in the same manner it was conducted during the past three years which was the assigning of trucks to contractors who would arrange for the necessary chauffeurs and laborers necessary to clear snow from sections of State Highways averaging between 10 and 15 miles in length, these contractors to be reimbursed for expenditures plus a percentage averaging 10% over all. The State Highway Engineer presented a chart on which were entered the names of all the contractors who had accepted assignments on sections of state highways and he recommended that the State Highway Commission authorize the assignment of these sections as indicated thereon in order that the program may be put in operation. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission approved the assignment of sections of the State Highways to contractors as recommended by the State Highway Engineer, and authorized the snow removal program as recommended by the State Highway Engineer.

In connection with any discussion concerning the checking of snow removal bills, Commissioner Kidde inquired concerning the audit made of the County Motor Vehicle statements when payments are being made in accordance with work done on schedules approved by the State Highway Commission, he requested that he be furnished with a report as to the procedure in connection with the Motor Vehicle payments in order that he may have an inside view of just how the checking up is done. Commissioner Kidde inquired as to whether trucks as sent out on snow removal work were insured against fire. State Highway Engineer Sloan advised that there was no insurance upon these trucks since it was his feeling that the State should carry its own insurance, in view of the large amount of resources at its disposal. In connection with the question of fire insurance, Chief Auditor Howell was invited to explain the method in which the Equipment Department was carried upon the books of the Commission. Mr. Howell informed the Commission that a depreciation was charged against all the equipment used and apportioned the various construction and maintenance jobs of the Department, although there was no fund set up in a Depreciation Account for renewal of worn out equipment, it being the opinion of the Comptroller's Department, and especially the auditors engaged upon the books of the State Highway Commission and himself, that it is much better in the business of the State Highway Commission to apportion from the funds of the Commission each year a sufficient amount for the purchase of new equipment, rather than to build up a cash reserve which would go unused by the Department. State Highway Engineer Sloan advised that he felt that the proper procedure would be to put a cash reserve aside in the same manner as was done in private corporations, but in view of the fact that the Comptroller's Department had ruled otherwise, the plan now being followed out should be continued.

"Gray Giant" Machine

Commissioner Kidde called the attention of the Commission to the fact that the operations of the "Gray Giant" which will rebuild macadam roads would be started on Thursday, on Prospect Avenue, running beside the Montclair Gulf Club, and he suggested that Maintenance Superintendent Muir be detailed to watch this work. State Highway Engineer Sloan advised that Mr. Muir will be detailed to inspect the work of the Gray Giant.

The Schedule of Business was next taken up for consideration item by item as follows:

Inland Waterway Bridge-Route 4

State Highway Engineer Sloan reported the following bids for the construction of the Inland Waterway Bridge on Route 4, Section 21, and recommended award to S. S. Thompson & Company, Inc. at their's the lowest bid of 99% of the Engineer's estimated units of cost.

S. S. Thompson & Co., Inc.	99%
Colyn Construction Co. & Michael Staub	117%
L. J. Sieling	117.7%
Linds & Griffith	121.5%

On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission adopted the following resolutipn:

RESOLVED, that the State Highway Commission does hereby approve award of contract for the construction of the Inland Waterway Bridge on Route 4, Section 21, to S. S. Thompson & Co., Inc. at their's the lowest bid of 99% of the Engineer's estimated units of cost, amounting to $126,161.08, and

BE IT FURTHER RESOLVED, that the Chairman is authorized to sign the necessary contracts after approved by the State Highway Engineer.

Cedar Bonnet Bridge

State Highway Engineer Sloan presented the following two bids received for the construction of the Cedar Bonnet Bridge over Manahawken Bay, and recommended that a readvertisement of this work be authorized by the Commission in order that greater competition might be secured. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission approved the recommendation of the State Highway Engineer and authorized a readvertisement of the Cedar Bonnet Bridge over Manahawken Bay in Ocean County.

S. S. Thompson & Co., Inc.	121.0%
Louis J. Sieling	123.3%

Route 16, Section 6-A

State Highway Engineer Sloan reported plans and specifications completed for the construction of Route 16, Section 6-A, Bernardsville-Passaic River Section, and recommended authority to advertise same. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission unanimously adopted the following resolution:

RESOLVED, that the State Highway Commission does hereby approve plans and specifications for the construction of Route 16, Section 6-A, Bernardsville to the Passaic River Section, in the Counties of Somerset and Morris, and

BE IT FURTHER RESOLVED, that the Chairman is authorized to sign the necessary papers and the Chief Clerk is directed to place the necessary advertisements for the same.

Route 8, Section 4-A

On recommendation of the State Highway Engineer, Commissioner Jelin moved the acceptance of an assignment of land to be used in the construction of a temporary bridge at M.P. 22.6 on Route 8, Section 4-A, from Jacob Winters for the consideration of $1.00.

Route 5, Section 8

State Highway Engineer Sloan reported the completion of Route 5, Section 8, Great Meadows-Barker's Corner Road, in Warren County, and recommended acceptance and final payment subject to a deduction for an area of 30 lineal feet, one-half width to be paid for at the rate of 81.25% of the contract price. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission approved the acceptance and final payment on Route 5, Section 8, Great Meadows-Barker's Corner Road, as recommended by the State Highway Engineer, and authorized final payment to be made subject to a deduction for 30 lineal feet one-half width at 81.25% of the contract price.

Route 4, South Amboy

State Highway Engineer Sloan presented to the Commission a report on a petition signed by property owners of interested cities relative to their protest for assessment for additional width of pavement on Bordentown Avenue and Pine Avenue on Route 4, through South Amboy. State Highway Engineer Sloan advised that the obligation of the payment of this additional width was assumed by the City of South Amboy and is covered by an agreement with the Commission, and for this reason the State Highway Commission has no interest in the matter. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission approved of the report of the State Highway Engineer and directed that the residents of South Amboy be notified that the State Highway Commission has no interest in their protest.

Cornwell Driver Rd — and

Gibbsboro-Kresson Road

On recommendation of the State Highway Engineer, Commissioner Jelin moved the approval of Township Aid Force Account agreements as follows:

Gibbsboro-Kresson Road, Voorhees Township, Camden County.

Cornwell Driver, Upper Deerfield Township, Cumberland County.

This was seconded by Mr. Kidde and adopted.

Cake Road, Cumberland County

On recommendation of the State Highway Engineer, Commissioner Jelin moved the acceptance and final payment of Cake Road, Upper Deerfield Township, Cumberland County, Township Aid. This was seconded by Mr. Kidde and adopted.

Plainsboro-Cranbury Neck-Princeton Junction

On recommendation of the State Highway Engineer, Commissioner Jelin moved the approval of award of contract for the Plainsboro-Cranbury Neck-Princeton Junction Road, Plainsboro Township, Middlesex County, Township Aid. This was seconded by Mr. Kidde and adopted.

Employments

State Highway Engineer Sloan presented a report on employments as made by him since the last meeting of the Commission and recommended ratification by the Commission. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission authorized the ratification of employments as recommended by the State Highway Engineer.

Nov. 10,	C. H. Tichener,	Clerk Steno.	$80.00 mo.
Oct. 15,	F. O. Wainwright,	Steam Shovel Opr.	150.00

Disabled Veteran - G Petronaki

Commissioner Kidde presented to the Commission a communication from the Melvin Spitz Chapter 3 of the Disabled American Veterans of the World War, expressing interest in the rehabilitation of Guiseppe Petronaki and asking that he be named for the position of Road Inspector in view of the fact that he has been given permission by the Government to select a vocational training course, and would like to start training as a road inspector. On motion by Mr. Kidde, seconded by Mr. Jelin, the communication was referred to the State Highway Engineer in order that Mr. Petronaki might be interviewed with a view toward starting him in training for a highway Inspector.

Hazon-Cornish Road, Warren County

On recommendation of the State Highway Engineer, Commissioner Jelin moved the approval of specifications for the Hazen-Cornish Road, in White Township, Warren County. This was seconded by Mr. Kidde and adopted.

Brass Castle Road, Washington Township

On recommendation of the State Highway Engineer, Commissioner Jelin moved approval of specifications for the Brass Castle Road in Washington Township, Warren County. This was seconded by Mr. Kidde and adopted.

High Point Park Commission

State Highway Engineer Sloan advised the Commission that he had been waited upon by a delegation representing Mr. Staunton, Chairman of the Board of the High Point Park Commissioners, requesting that a truck with driver be assigned to the High Point Park for a short time in order to assist in the fixing up of roads in that vicinity. On motion by Mr. Jelin, seconded by Mr. Kidde, the request of the High Point Park Commission was granted by the State Highway Commission.

Right of Way-New Amboy Bridge

State Highway Engineer Sloan presented a report from the Right of Way Engineer, advising that the National Fire Proofing Company has figured out its damages on the proposed new Amboy Bridge right of way, amounting to $145,716.00, while the appraisals figured for the State Highway Commission are $41,743.50. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission adopted the following resolution authorizing an offer of $41,743.50, and in the event the same is not accepted that condemnation proceedings be instituted:

> RESOLVED, that this Commission hereby determined to acquire in the name of the State of New Jersey, for public use in the construction of State Highway Right of Way, New Amboy Bridge, ALL that certain Lot, tract or parcel of land and premises, situate, lying and being in the State of New Jersey, and more particularly described as follows:

Beginning at a point, said point being the northeasterly corner of lands of the National Fireproofing Company,and opposite Station 7 plus 23, approximately; thence (1) south 11°49' west along the dividing line between said National Fireproofing Company and the Donnell Lumber Company, one hundred and fifty-seven feet more or less; thence (2) south 35°00' west seven hundred and forty-nine feet and eighty-seven one-hundredths of a foot (749.87'); thence (3) south 40°12' west forty-four feet and fifty-five one-hundredths of a foot (44.55') to the northerly Bulkhead line in the Raritan River; thence (4) along said Bulkhead line north 46°53'58" west (magnetic) seventy feet (70') more or less; thence (5) in a northeasterly direction and parallel to the center line of Route 4 for a distance of nine hundred and twenty-five feet (925') more or less to the place of beginning.

Containing one and three-tenths Acres (1.3A) more or less.

Excepting that portion of land belonging to the Raritan and North Shore Railroad.

The State Highway Engineer is hereby authorized and directed on behalf of the Commission, to make an offer of $41,743.50 to the owners or owner of said lands and premises for the conveyance of the same to the State of New Jersey, free and clear of all encumbrances, and, upon the failure of such owner or owners to accept such offer, or if for any other reason said lands and premises cannot be immediately acquired by agreement with such owners or owner, then the Attorney General of the State of New Jersey is hereby authorized and directed to institute condemnation proceedings for the acquisitions of said land and premises.

Right of Way-Amboy Bridge

State Highway Engineer Sloan reported that in the case of the C. Pardee Tile Works that this company is willing to convey to the state its property for $73,968.00, they to remove to their own property, at their own expense, the office building now on the State Highway right of way. Commissioner Kidde stated that he felt the building was of value to the state and should not be turned over complete to the company, in view of the fact that the appraisals of the State Highway Commission were less than the sum requested by the C. Pardee Tile Works and included the tearing down of the entire office building by the State Highway Commission. Commissioner Kidde suggested that arrangements to be made with the C. Pardee Tile Works whereby they would make an allowance for the building which should be turned over to them. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission directed that the proposition of the C. Pardee Tile Works be received and the State Highway Engineer to make a settlement with the C. Pardee Tile Works on the basis of the original appraisal of the State Highway Commission, allowing the C. Pardee Tile Works to move at its own expense the office building standing in the line of the right of way, and in the event of refusal by the C. Pardee Tile Works to accept this offer, that condemnation proceedings be entered into in accordance with the following resolution:

RESOLVED, that this Commission hereby determines to acquire in the name of the State of New Jersey, for public use in the construction of right of way, Amboy Bridge, ALL that certain

Lot, tract or parcel of land and premises, situate, lying and being in the State of New Jersey, and more particularly described as follows:

C. PARDEE TILE WORKS (1)

Beginning at the intersection of the southerly side of Smith Street with the easterly side of Route 4; thence in an easterly direction north 61°28' west along said side line of Smith Street, (12') feet more or less; thence in a southwesterly direction fifty-six (56') feet more or less; thence north twenty-eight degrees thirty-four minutes east, forty-seven (47') feet more or less to the place of beginning.

Containing six one-thousandths of an Acre (0.006A) more or less.

C. PARDEE TILE WORKS (2)

Beginning at the intersection of the southerly side of Smith Street with the westerly side of Route 4; thence south 61°28' east along said southerly side of Smith Street seventy-two (72') feet more or less to the proposed right of way line of Route 4; thence south 26°59' west (true meridian) along said right of way line two hundred fifty-one feet and eighteen one-hundredths of a foot (251.18') to the dividing line between the property of the Donnell Lumber Co. on the south and the C. Pardee Tile Works on the north; thence south 61°26' east along said dividing line one hundred three feet (103') more or less; thence north 28°34' east two hundred fifty feet (250') more or less to the place of beginning.

Containing five-tenths of an Acre (0.5A) more or less.

C. PARDEE TILE WORKS (3)

Beginning at a point twenty-seven feet and five-tenths of a foot (27.5') from and at right angles to the center line of Route 4, at Station 4 plus 79, approximately; thence (1) south 26°59' west (true meridian) and parallel to said center line, two humdred fifty feet (250') more or less to a line dividing land of Donnell Lumber Company and C. Pardee Tile Works; thence (2) along said dividing line of said Donnell Lumber Company and the C. Pardee Tile Works, north 6°37' east ninety-three feet (93') more or less to a point, said point being a corner of land of Donnell Lumber Company and the C. Pardee Tile Works; thence (3) north 50°06' east one hundred seventy-five feet

(175') more or less to the place of beginning.

Containing thirteen one-hundredths of an Acre (0.13A) more or less.

The State Highway Engineer is hereby authorized and directed on behalf of this Commission, to make an offer of the sum of $67,143.77, to the owners or owner of said lands and premises for the conveyance of the same to the State of New Jersey free and clear of all encumbrances, and upon the failure of such owner or owners to accept such offer, or if for any other reason said lands and premises cannot be immediately acquired by agreement with such owners or owner, then the Attorney General of the State of New Jersey is hereby authorized and directed to institute condemnation proceedings for the acquisition of said lands and premises.

Route 8, Montclair-Verona

State Highway Engineer Sloan called attention of the Commission to the conditions existing on Route 8, Montclair-Verona Section, and advised that when the Right of Way Division approached the owners of property needed for this section of road they would not consent to sign agreements for the sale of property at the price suggested by the Commission at its last meeting, and he recommended to the Commission that condemnation proceedings be entered into for the acquisition of property required. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission determined to offer Mr. Cramer for property needed on Route 8, Section 2, the sum of $9,500.00, and to Stasse & Cramer the sum of $4,600.00 and in the event these offers are refused that condemnation proceedings be entered into in accordance with the following resolution:

RESOLVED, that this Commission hereby determined to acquire in the name of the State of New Jersey, for public use in the construction of State Highway Route 8, Montclair-Verona, ALL that certain Lot, tract or parcel of land and premises, situate, lying and being in the State of New Jersey, and more particularly described as follows:

Parcel #2

BEGINNING at an iron pipe in the northerly line of Bloomfield Avenue, said point being in the radius line at the easterly terminus of a curve with a radius of 883.36 feet, and nine and fifteen one-hundredths (.15) feet north of a stone monument which marks the said curve;

Thence (1) in a westerly direction along the arc of a circle with a radius of eight hundred and eighty-three and thirty-six one-hundredths (883.36) feet, a distance of sixty-nine and seventy-eight one-hundredths (69.78) feet to an iron pipe, the chord of said arc bearing north, eighty-eight degrees, thirty-two minutes, west (N88°32'W), and measuring sixty-nine and seventy-five one-hundredths (69.75) feet;

Thence (2) north, eighteen degrees, thirty-seven minutes, west (N18°37'W), fifty-four and ninety-five one-hundredths (54.95) feet, to an iron pipe in the easterly line of Pompton Turnpike, as adopted by a resolution of the Essex Public Road Board on March 19, 1894, and shown on a certain map entitled "Map of Road formerly known as the Newark-Pompton Turnpike, in the Township of Verona, as adopted by the Essex Public Road Board", scale 100 feet to the inch;

Thence (3) north, one degree, west (N1°W) a distance of forty-five and five one-hundredths (45.05) feet to an iron pipe still in the easterly line of said Pompton Turnpike;

Thence (4) south, eighty-eight degrees, fourteen minutes, east (S88°14'E) a distance of fifty-four and fifty one-hundredths (54.50) feet to a point in the line between the lands of Francis J. Marley and Louis Kramer;

Thence (5) in a southeasterly direction along the arc of a circle with a radius of 197.70 feet a distance of two hundred and five and eighty-eight one-hundredths (205.88) feet to an iron spike, the chord of said arc bearing south, sixty-one degrees, five minutes,two seconds, east (S61°5'2"E) and measuring one hundred and ninety-six and seven tenths (196.7) feet;

Thence (6) along the said northerly line of Bloomfield Avenue south, eighty-nine degrees, five minutes, west (S89°5'W) a distance of one hundred and thirty-eight and sixty-nine one-hundredths (138.69) feet to the point or place of beginning.

CONTAINING two hundred and twenty-eight one-thousandths parts of an acre (0.228A), be the same more or less.

All as shown on a map attached hereto entitled "New Jersey State

All as shown on a map attached hereto entitled "New Jersey State Highway Department, Layout & Property Key Map Showing Property to be Acquired on Route No. 8, Section No. 2, Verona-Montclair, Essex County, Scale 1"30', March 1923, Revised Oct. 1923."

The State Highway Engineer is hereby authorized and directed on behalf of the Commission, to make an offer to the owners or owner of the sum of $9,500.00 for the conveyance of the same to the State of New Jersey, free and clear of all encumbrances, and, upon the failure of such owner or owners to accept such offer, or if for any other reason said lands and premises cannot be immediately acquired by agreement with such owners or owner, then the Attorney General of the State of New Jersey is hereby authorized and directed to institute condemnation proceedings for the acquisition of said lands and premises.

RESOLVED, that this Commission hereby determines to acquire in the name of the State of New Jersey, for public use in the construction of Route 8, Section 2, ALL that certain lot, tract or parcel of land and premises, situate, lying and being in the State of New Jersey, and more particularly described as follows:

Parcel #4

BEGINNING at a point in the northerly line of Bloomfield Avenue, at the westerly end of a curve with a radius of eight hundred and eighty-three feet and thirty-six one-hundredths (883.36) feet, said point being eight and ninety-seven one-hundredths (8.97) feet north of a stone monument measured at right angles to the tangent of said curve, running

Thence (1) in a northerly direction along the arc of a circle with a radius of eighty-three and thirty-nine one-hundredths (83.39) feet, a distance of one hundred and thirty-two and three one-hundredths (132.03) feet, the chord of said arc bearing, north, sixty-one degrees, fifty-eight minutes, thirty seconds, east (N61°58'30"E) and measuring one hundred and eighteen and sixty-seven one-hundredths (118.67) feet, to a point;

Thence (2) north, sixteen degrees, thirty-seven minutes, east (N16°37'E) a distance of twenty-two and five one-hundredths (22.05) feet to a stake in the line between the lands of William W. Baldwin on the north and Stasse and Kramer jointly on the south;

Thence (3) along said line between Baldwin and Strasse, south, seventy-six degrees, forty-eight minutes, east (S76°48'E) a distance of fifteen feet and thirty-three one-hundredths of a foot (15.33) to a stake in the extension of the westerly line of Pompton Turnpike, as laid out and shown on a certain map entitled "Map of Road formerly known as Newark and Pompton Turnpike, in the Township of Verona, as adopted by the Essex Public Road Board on March 19, 1894, Scale 100'-1";

Thence (4) along said westerly line of Pompton Turnpike, south, one degree, no minutes, east (S1°00'E) a distance of seventy-one and fifty-two one-hundredths (71.52) feet;

Thence (5) still along said westerly line of Pompton Turnpike, south eighteen degrees, thirty-seven minutes, east (S18°37'E), thirty-five and five one-hundredths (35.05) feet to the intersection of said westerly line of Pompton Turnpike and northerly of Bloomfield Avenue;

Thence (6) along said northerly line of Bloomfield Avenue, on the arc of a circle with a radius of eight hundred and eighty-three and thirty-six one hundredths (883.36) feet, a distance of one hundred and forty-two and eight one-hundredths (142.08) feet, the chord of said arc bearing, north, seventy-seven degrees, fourteen minutes, twenty-eight seconds, west (N77°14'28"W), and measuring one hundred and forty-one and ninety-three one- hundredths (141.93) feet, to the point and place of beginning.

CONTAINING one hundred and nine one-thousandths of an acre (0.109A).

With necessary slope rights;

All as shown on a map entitled "New Jersey State Highway Department, Layout & Property Key Map, showing property to be acquired on Route No.8, Section No. 2, Verona-Montclair, Essex County, Scale 1"-30', March 1923, Revised Oct. 1923."

The State Highway Engineer is hereby authorized and directed on behalf of this Commission, to make an offer of the sum of $4,600.00 to the owners or owner of said lands and premises for the conveyance of the same to the State of New Jersey free and clear of all encumbrances and, upon the failure of such owner or owners to accept such offer, or if for any other reason said lands and premises cannot be immediately acquired by agreement with such owner or owners, then the Attorney General of the State of New Jersey is hereby authorized and directed to institute

condemnation proceedings for the acquisition of said lands and premises.

Route 6, Damage Claim

The Secretary informed the Commission that at the morning session the claim of Mr. Foster for damage to property on Route 6, was not disposed of. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission directed that Mr. Foster be asked to deed to the state six inches of land at the price agreed to in accordance with the purchase agreement on file, namely $225.00.

East Main Street, Boonton

State Highway Engineer Sloan informed the Commission that he had investigated the resolution of the County of Morris for the construction of a six inch slag foundation and a two inch bituminous concrete top for East Main Street, Boonton, improvement, and in view of the fact that the County Engineer estimated the cost of this work to be $40,000.00 he felt that the Commission might be willing to permit the County to expend an additional $10,000.00 in order that a concrete foundation might be placed under the bituminous top. Commissioner Jelin stated that he would not be willing for the county to place a concrete foundation in this road, due to the fact that it may be necessary to tear out considerable portions for utility connections. After discussion, Commissioner Kidde moved that the State Highway Commission accept and approve the resolution of the Morris County Board of Freeholders in order that the county of Morris may be permitted of East Main Street, Boonton, with a six inch slag foundation and a two inch bituminous concrete top, said work to proceed with the county forces and at the unit price prevailing in the maintenance schedule for slag and bituminous concrete now obtained in the County of Morris; the State Highway Commission to contribute the balance remaining to the credit of East Main Street, Boonton, to wit, the sum of $7,000.00, as the state's share of the cost of this work, it being further understood that the work is to be done subject to inspection and the satisfaction of the State Highway Department; the Commission expressing itself as assenting to this method of procedure, owing to the urgency of the conditions in providing road service on East Main Street, Boonton, for the coming winter. This was seconded by Mr. Jelin and adopted.

Route 8, Montclair-Verona Section

State Highway Engineer Sloan presented to the Commission for its approval, the purchase agreement for property of W. W. Baldwin on Route 8, Montclair-Verona Section, for the sum of $2,750.00. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission authorized the purchase of this property as recommended by the State Highway Engineer. On motion by Mr. Jelin, seconded by Mr. Kidde, the Chairman was authorized to sign the necessary contracts for the construction of Route 8, Montclair-Verona Section on Route 8, in order that the work might proceed.

Right of Way, Route 4.

The Commission next discussed the proposition concerning the pavement of the P. R. R. for right of way, taken by the State in the construction of Route 4 through South Amboy. Commissioner Kidde stated that he understood that former State Highway Engineer W. G. Thompson, was now back in Trenton and was entirely familiar with the conditions involved in the acquisition of this property from the Pennsylvania Railroad, since he, personally, had negotiated with the railroad authorities and the city authorities of South Amboy, and he, therefore, moved that an invitation be extended to Mr. W. G. Thompson, former State Highway Engineer, to visit the next meeting of the State Highway Commission, and enlighten the Commission as to the details of the contract with the railroad company; it being understood that any information will be treated by the State Highway Commission in a confidential manner.

GG 5160 - New Orleans Convention

State Highway Engineer Sloan requested the Commission to consider the payment of expenses for Mr. Charles A. Mead, as a representative of the Commission at the conference of the Bridge Committee of the American Association of the State Highway Officials, at New Orleans, on December 3d, 4th, and 5th, which expenses it was estimated would be $200.00. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission authorized Mr. Charles A. Mead as a representative of the Sub-committee on bridge specifications of the American Association of State Highway Officials, to attend the conference at New Orleans on December 3d, 4th, and 5th, and a communication will be forwarded to the Public Utility Commission requesting that Mr. Mead be loaned to the State Highway

Department, it being understood that his expenses would be paid by the State Highway Commission to an amount estimated at $200.00.

On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission adjourned at 4:30 P M. to meet in conference on Monday, November 19th, and in regular session on Tuesday, November 20th, at 10:30 A.M.

Respectfully submitted,

A. LEE GROVER,
Secretary.

MINUTES OF MEETING - November 20, 1923.

A regular meeting of the State Highway Commission was held at the offices of the Commission, Broad Btreet Bank Building, Trenton on Tuesday, November 20, 1923.

Present: - Messrs. Percy H. Stewart, Walter Kidde, and Abraham Jelin.

The Secretary informed the Commission that Chairman Scott could not be present until 11:30 A.M. On motion by Mr. Kidde, seconded by Mr. Jelin, Commissioner Stewart was elected Chairman pro tem.

Route 15, Near Dorchester

The Secretary informed the Commission that a hearing had been requested by Mr. Charles Pettinos relative to his request for permission to construct a grade crossing over Route 15 near Dorchester. On motion, duly seconded, a hearing was granted. Mr. Pettinos appeared before the Commission together with Mr. Richards, his foreman, and he requested that the Commission reconsider its action in denying him permission to construct a grade crossing over State Highway Route 15, south of Millville, in order to gain access to gravel and sand pits. He informed the Commission that it was impossible for him to construct an underpass at that point as was suggested by the State Highway Department, due to the fact that the drainage conditions even at the present time are such as to cause water to remain on the property. He stated that he appreciated the fact that the road was being constructed as a cut-off from a railroad crossing, but unless some provision was made for him his business could not continue. State Highway Engineer Sloan stated that he personally investigated this condition and he had recommended that a grade crossing be not permitted over this section of Route 15, and he had further been advised by Division Engineer Williams that it would be possible to construct an underpass such as was recommended. Chairman Stewart suggested to Mr. Pettinos that he take the matter up with Division Engineer Williams, with a view toward having him go on the ground and make such suggestions as might be of assistance to Mr. Pettinos in carrying on the work of his plant.

Albany Street Bridge, New Brunswick

The Secretary informed the Commission that a hearing was requested by Mr. John L. O'Toole, Vice President of the Public Service Corporation, and Judge Armstrong, Counsel for the Public Service Railway Company, with reference to the tracks over the Albany Street Bridge between New Brunswick and Highland Park where the Commission was receiving bids for the widening of the bridge. On motion, duly seconded, the hearing was granted. The representation appeared before the Commission and stated that they had appeared to answer in person a request made upon them as to what their attitude would be with regard to sharing in the cost of widening of the Albany Street Bridge and the necessary rearrangement of the tracks. Judge Armstrong informed the Commission that so far as the Public Service Railway Company was concerned, it felt that the bridge in its present condition was ample for the use of trolleys but they understood that the increase in motor traffic had made it imperative to widen the structure. He reviewed for the Commission the history of the Traction Company's control over this bridge, and stated that although the franchise of the original company from which the Public Service Company had acquired the railway line, had expired in 1922, the Public Service Corporation was operating under a legislative enactment which gave them the right during their lifetime to occupy the railway line and operate it. He further stated that the Public Service Corporation did not feel that it had any obligations further than the maintenance of its track work, but they would, of course, be willing to assist in the cost if it could be shown that there would be any special construction in the widening of the Albany Street Bridge made necessary because of the fact that the traction company was using the bridge. State Highway Engineer Sloan stated that he believed that were it not for the fact that the Public Service Corporation occupied the bridge, the widening would not be necessary at this time. Judge Armstrong stated that he felt that the trolley cars were as much a part of public travel as any other conveyance, and for that reason were entitled to cross the bridge the same as any other. After general discussion as to the situation, Chairman Stewart summed up the situation by stating that it appeared that the Public Service Corporation was standing upon what it deemed its rights to continue to operate across the Albany Street Bridge, and in the event the same was widened to continue operating without sharing in the cost other than such charges for work as could be legally shown they were obligated for. Judge Armstrong advised that the Public Service Corporation would be willing to hear any suggestion that the State Highway Commission desired to make relative to the costs they would expect the Public Service Corporation to pay, and the company would then be in a position to advise the Commission as to what it could do in the way of cooperation.

Route 4, South Amboy ✓

The Secretary informed the Commission that in accordance with an invitation extended to former State Highway Engineer W. G. Thompson, he was present to confer with the Commission and to give such information as he could recall on the acquirision of property from the P.R.R.Co. on Route 4, through South Amboy. Mr. Thompson was invited into the meeting and a conference was held between the Commission and Mr. Thompson, hearing on the matter of property in South Amboy. No definite action was taken on the matter by the Commission following this conference.

Speedwell Avenue, Morristown ✓

The Secretary presented a communication from Hon. F. M. P. Pearse, Secretary to the Governor, transmitting a letter from Mr. William H. Downs, complaining of conditions on Speedwell Avenue, Morristown. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission directed that the communication be acknowledged to Secretary Pearse and that a letter be forwarded to Mr. Downs, advising that the failure of local authorities to cooperate in the work through the trolley track area of Speedwell Avenue, Morristown, has brought about the existing delays but that the State Highway Commission hopes to have the matter straightened out within the very near future.

Route 16, Section 2, Somerset County ✓

The Secretary presented a communication from the Somerset County Board of Freeholders with further reference to the construction of curbs and gutters on Route 16, Section 2, in front of the Dutch Reformed Church property where an existing stone wall had been taken down in order to permit of the placing of a concrete sidewalk. The Secretary also presented a communication from Rev. Jesse F. Durfee of the Dutch Reform Church, requesting consideration of the state in constructing a curb on Route 16, Section 2, in front of the church property. State Highway Engineer Sloan informed the Commission that it is the opinion of the Engineering Department that the Commission is not justified in placing a curb in front of this property, but that since sidewalks were to be constructed and the wall had been removed if the sidewalks and curbs would be constructed by the property owners, the drainage conditions would be amply taken care of. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission directed that a communication covering the report of the State Highway Engineer be forwarded to the Somerset County Board of Freeholders and to the Rev. Durfee of Bedminster.

Cape May-Lewes Ferry

The Secretary presented a resolution from the City Commission of Cape May City, requesting the Commission to give consideration and early attention to the establishment of a ferry between Cape May Point, New Jersey, and Lewes, Delaware. On motion by Mr. Kidde, seconded by Mr. Jelin, the resolution was ordered received and acknowledged with the advice that the Commission is taking the matter up with the State of Delaware for information concerning wharves already located at Lewes, Delaware.

Westchester Ferry Corp. Markers & Signs

The Secretary presented a communication from the Westchester Ferry Corporation, requesting the Commission to arrange for the erection of markers indicating the direction to Alpine, N.J. for those motorists who are using their new ferry between Alpine in Bergen County, N.J. and Yonkers, New York. The State Highway Commission directed that the communication be received and that they be advised that routes leading to the new ferry are county roads, but that instructions were being given to the Engineering Department to take up the matter with them, and if it will be of any value to place signs on the state highways in the vicinity, that permission is granted for the purpose.

Chairman Scott arrived at the meeting at this time, and assumed the chair.

Damage Claim, Route 13

The Secretary presented to the Commission for consideration the matter of drainage of the property of Mr. Martin on Route 13, on which a report had been requested by Chairman Scott. Superintendent of Maintenance Muir reported that the State Highway Commission has taken all precautions that it is possible in this location and Mr. Martin has no claim against the state. On motion by Mr. Stewart, seconded by Mr. Jelin, the Commission directed that a communication covering that report be forwarded to Mr. Martin from the State Highway Commission.

Naming of Route 8 ✓

The Secretary presented a communication from the State Association of the Daughters of the American Revolution, requesting permission to name Route 8, from Montclair to the State Line at Unionville as the "minnisink Trail" since this right of way follows the old trail of the Minnisink Indians. They also requested information concerning the other state highways in order that they might give them names also. On motion by Mr. Stewart, seconded by Mr. Jelin, the State Highway Commission directed that the communication be acknowledged with the advice that any suggestions for the naming of Route 8 have been placed in the hands of State Highway Commissioner Kidde, with whom they should take the matter up.

Invitation-Washington, New Jersey ✓

The Secretary presented a communication from the Kiwanis Club of Washington, N.J. inviting the Commission to meet with its members during the afternoon of November 27th, in order that they might be shown interesting facts concerning Washington, prior to the dinner to be held at 7:00 P.M. On motion, duly seconded, the Commission directed that the Secretary inform the Kiwanis Club of Washington, N.J. that in view of the fact that bids would be received on the afternoon of the 27th for several important projects, it will be impossible for any of the Commissioners to reach Washington until the time for the dinner.

Newark Auto Exhibition Company ✓

The Secretary presented a communication from the Newark Automobile Exhibition Company, urging the Commission to make up an exhibit to be placed in the Newark Automobile Show, January 12th to the 19th, for which space would be provided gratis. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission directed that the Secretary acknowledge the communication and advise that the Commission has instructed the Secretary and State Highway Engineer to arrange a worthwhile exhibit of State Highway operations to be exhibited at the Newark Automobile Show.

Compensation Claims-Mr. Moore

The Secretary presented a communication from Austin H. Swackhamer, Counsel for Harry Moore, transmitting a certified check for $812.00 as the amount due the State Highway Commission in reimbursements paid to Mr. Moore under the Workmen's Compensation Act arising out of an accident caused by the Kolb Baking Company, injuring Mr. Moore in August 1922. The damages for his injuries have been paid to Mr. Moore by the State Highway Commission. On motion by Mr. Stewart, seconded by Mr. Jelin, the State Highway Commission directed that the communication be received, the check accepted, and a proper release forwarded to Mr. Swackhamer.

American Assoc. State Highway Officials

The Secretary presented a communication from the American Association of State Highway Officials, urging the Commission to forward the names of those in New Jersey who will attend the convention in New Orleans. On motion by Mr. Jelin, seconded by Mr. Stewart, the Secretary was directed to forward the names of those who will attend the New Orleans Convention.

Commendation -
Burlington County Communication

The Secretary presented a communication from the Burlington County Board of Freeholders in commendation of the work of the Commission in Burlington County. On motion by Mr. Jelin, seconded by Mr. Stewart, the communication was ordered received and placed on file.

High Point Park Request

The Secretary presented a communication from Mr. Wayne Dumont, President of the High Point Park Commission, requesting the use of a Ford truck for two or three weeks for the purpose of fixing a road around Lake Marcia, at High Point Park. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission directed that the request be granted.

On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission recessed for luncheon at 12:30 P.M. to meet in regular session at 2:00 P.M. again.

The Commission reconvened at 2:00 P.M. as agreed with the same members present as at the morning session.

Minutes Approved

Commissioner Kidde reported having carefully read minutes of meetings of September 25th and October 2nd, and would recommend approval of the same as submitted with a change in the minutes of September 25th in the section referring to the naming of Eagle Scout Highway to read as follows "Commissioner Kidde suggested that Route 8, Montclair to the State Line at Unionville, is a desirable scenic route, and one greatly frequented by Boy Scout troops, and he moved that the Commission reserve Route 8, Montclair to the State Line at Unionville, for such designation." On motion by Mr. Jelin, seconded by Mr. Stewart, Commissioner Kidde was authorized to canvass the situation locally, and report a suitable designation for this route. Commissioner Jelin seconded the approval of the minutes as corrected and the same were approved.

The Schedule of Business was next taken up for consideration item by item as follows:

Route 15, Section 4, Millville

State Highway Engineer Sloan reported the receipt of the following bids for the construction of Route 15, Section 4, Main Street, Millville, and recommended that award be made to the lowest bidder, the Newark Paving Company, at 99% of the Engineer's estimated units of cost.

Newark Paving Co.	99.0 %
R. L. Bonham Co.	99.8 %
Sutton & Corson Co.	102.8 %
Michael Staub	103.45%
Crilly & Cannon	108.65%
E. Riley Mixner Co.	109.3 %
Public Service Production Co.	110.85%
Fish-Rutherford, Inc.	116.5 %

On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission unanimously adopted the following resolution:

RESOLVED that the State Highway Commission does hereby approve the award of contract for the construction of Route 15, Section 4, Main St., Millville, to the Newark Paving Company of Elizabeth, N.J. at their's the lowest bid of 99% of the Engineer's estimated units of cost, an amount of $141,819.73, and

BE IT FURTHER RESOLVED, that the Chairman is authorized to sign the necessary contracts after approval by the State Highway Engineer.

Route 16, Section 6-A Br. m P 32.2

State Highway Engineer Sloan reported the completion of plans and specifications for the construction of a bridge at M.P. 32.2 over the Passaic River on Route 16, Section 6-A, and he recommended approval of the same with authority to advertise. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission unanimously adopted the following resolution:

RESOLVED, that the State Highway Commission does hereby approve of plans and specifications for the construction of a bridge at M.P. 32.2 over the Passaic River on Route 16, Section 6-A, and

BE IT FURTHER RESOLVED, that the Chairman is authorized to sign the necessary specifications and the Chief Clerk is directed to place the necessary advertisements for the same.

Route 1, Section 12

State Highway Engineer Sloan reported to the Commission that Route 1, Section 12, Rahway Avenue, Elizabeth, was completed and ready for inspection by the Commission. Commissioner Jelin, informed the Commission that he has within the past week gone over this work and he was prepared to recommend its acceptance. Commissioner Stewart inquired whether core tests had been taken and he was informed in the affirmative. Commissioner Jelin, therefore, moved that the State Highway Commission accept the completed work on Route 1, Section 12, Rahway Avenue, Elizabeth, and that final payment be made subject to proper filing of core tests and approval of final papers by the State Highway Engineer. This was seconded by Mr. Stewart and adopted.

Right of Way, Route 4

State Highway Engineer Sloan presented purchase agreement for the acquisition of property on Route 4, known as Parcel #3, at the Bass River Bridge, from Albert L. Hilaman for the consideration of $400.00 and he recommended approval of the same by the Commission. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission authorized the purchase of Parcel #3, on Route 4 at the Bass River Bridge from Albert Hilaman for the consideration of $400.00.

Right of Way, Route 4, Section 21

On recommendation of the State Highway Engineer, Commissioner Jelin moved approval of purchase of property from Mary A. Bennett, known as Parcel #5 on Route 5, Section 21, for the consideration of $500.00. This was seconded by Mr. Stewart and adopted.

Route 5, & 12, Hackettstown-Port Colden

State Highway Engineer Sloan presented to the Commission for its consideration the question of Route 5, and Route 12 in connection with the construction through Port Colden and Hackettstown. State Highway Engineer Sloan presented a plan showing alternate locations for Route 12, approaching Hackettstown, on which the Engineering Department had indicated its recommendation as to the most direct line for Route 12. This would eliminate passing through the Town of Hackettstown. While the residents of Hackettstown were very desirous of having Route 12 continue into the town to the Soldier's Monument, thence striking Route 5, this latter route would compel traffic from Paterson to Phillipsburg to make two sides of a triangle rather than a direct line. As an inducement for the Commission to go into Hackettstown by way of Mountain Avenue, the Borough of Hackettstown has agreed, by resolution, to pave the road to a width of 40 feet at its own expense for the additional width necessary beyond the 22 feet to be paid for by the state. After consideration of the matter, Commissioner Jelin moved that in accordance with the recommendation of the State Highway Engineer, the work on Route 12 be undertaken beginning at Mountain Avenue, the matter of continuing the route to an intersection with Route 5, either by a straight alignment or by way of the monument in Hackettstown, be left for later consideration after study is made of traffic movement in the particular locality. This was seconded by Mr. Kidde and adopted.

Fenwick Creek Bridge Lights

State Highway Engineer Sloan presented to the Commission a resolution from the Common Council of the City of Salem, N.J. placing itself on record as being surprised at the decision of the State Highway Commission not to install electric lights on the new Fenwick Bridge on Market Street in Salem. State Highway Engineer Sloan informed the

Commission that the particular reason why lights were omitted on this structure was the fact that it would establish a precedent for bridge lighting upon small structures, which would involve considerable expense upon the state. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission directed that the resolution be received and a communication be forwarded, advising that from its records there are hundreds of cases of bridge lighting which would have to be gone into by the State Highway Commission if favorable action was taken in this case,and the economy of the situation,therefore, brought forth the denial of the request.

Truck Drivers' Examination

State Highway Engineer Sloan presented a report bearing upon the scheduled examination for Motor Truck Drivers to be held on Wednesday November 28th. He informed the Commission that so much difficulty was experienced under Civil Service lists in securing men to work in different parts of the state, under the maintenance foremen, that it is impracticable for the State Highway Commission to allow the Civil Service Commission to conduct such an examination in order to classify and list such men. He recommended that the State Highway Commission strenously object to the action of the Civil Service Commission in again classifying these men. Commissioner Jelin voices the opinion that he felt the State Highway Engineer was correct in his stand since he believed that in the handling of floating labor such as truck drivers and garage assistants the ability to hire and fire should be vested in the one directly responsible for the work produced from the laborer. Commissioner Kidde stated that he felt that rather than voice a protest, the Commission should inquire from the Civil Service Commission as to why they have changed from their former decision not to conduct further examinations for truck drivers. Commissioner Stewart, therefore, moved that a communication be forwarded to the Civil Service Commission stating that the State Highway Commission is advised that the suggestion has been made that truck drivers employed by the State Highway Department be put on Civil Service lists. While the State Highway Commission appreciates the importance of Civil Service, in this instance it believes that the efficiency of the Department might be seriously assailed if such proposed action should be taken, there being many points on which the matter might be argued. Further, the State Highway Commission would ask that the Civil Service Commission tell from its experience the reasons why it believes it necessary to make the change which has been proposed. This was seconded by Mr. Kidde and adopted. Commissioner Stewart moved that Commissioner Jelin be requested to appear before the Civil Service Commission at its next meeting and bring to its attention the consequences which might follow the classifying of Motor Truck Drivers and Garage Assistants under Civil Service regulations. This was seconded by Mr. Kidde and adopted.

Extension of Time, Yellow Frame-Fredon Road

On motion by Mr. Stewart, seconded by Mr. Jelin, the State Highway Commission approved of extension of time on the Yellow Frame-Fredon Road, Sussex County, to October 20, 1923, the date on which the work was completed.

Extension of Time, Mill Street, Sussex

On recommendation of the State Highway Engineer, Commissioner Jelin moved the approval of an extension of time on Mill Street, Sussex, Sussex County Motor Vehicle Aid, to October 25, 1923, the date on which the work was completed. This was seconded by Mr. Stewart and adopted.

Nichol Avenue, New Brunswick

State Highway Engineer Sloan reported the completion of Nichol Avenue, New Brunswick, approach to the State College for Women, and that the same was ready for inspection. Commissioner Stewart expressed the desire that borings be taken upon every job in which the State Highway Commission is interested, before the papers are presented for acceptance of the road by the Commission, and that no final payments should be made unless borings are made or there is an expressed acceptance outside of this rule. The remaining Commissioners expressed approval concurred in this expression of Commissioner Stewart. On motion by Mr. Kidde, seconded by Mr. Stewart, the work on Nichol Ave., New Brunswick, was referred to Commissioner Jelin for inspection.

Route 9, Section 10

State Highway Engineer Sloan reported Route 9, Section 10, Bound Brook - Lincoln Avenue, as completed on November 15th and ready for inspection. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission referred the final inspection of this work to

Commissioner Stewart for report at the next meeting.

Route 16, Section 3

State Highway Engineer Sloan reported the completion and recommended acceptance of Route 16, Section 3, Bedminster-Pluckemin, work done by Ralph Sangiovanni, and completed as of September 4th, subject to payment of 81.25% of the contract price on 183 1/3 square yards of pavement found to be slightly below the requirements in thickness. Commissioner Jelin reported the inspection of this work and recommended acceptance by the state in accordance with the terms of the Reimbursement Act. This was seconded by Mr. Stewart and adopted.

Route 9, Section 8

State Highway Engineer Sloan reported the completion of Route 9, Section 8, North Branch-Somerville Section, work done by Ralph Sangiovanni, and completed as of September 7, 1923, and he recommended that this work be accepted by the State Highway Commission subject to a deduction of $209.15 for pavement less than the required thickness, although the average over the whole pavement equals or exceeds the thickness specified. Commissioner Jelin reported that he had inspected the work and would move acceptance of the same in accordance with the terms of the Reimbursement Act. This was seconded by Mr. Stewart and adopted.

Detour, Route 5, Section 12

On recommendation of the State Highway Engineer, Commissioner Jelin moved the approval of the following detour for Route 5, Section 12, Netcong-Canal Culvert Section:

> "Beginning on Route 5 at the Canal Culvert at Ledgewood and running thence (1) northerly by the County Road at Landing; continuing thence (2) easterly, northerly and westerly by the County Road to and via Allen Street to Ledgewood Avenue; Netcong, to Main Street; thence (5) southerly on Main Street to Route 5 at Netcong."

This was seconded by Mr. Stewart and adopted.

Atlantic County Cancellation - Shore Road

State Highway Engineer Sloan reported to the Commission that the County of Atlantic had cancelled the contract for the repair of Shore Road in view of the fact that the work could not be begun in time for its completion this season, and he recommended approval of this cancellation by the State Highway Commission. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway approved of the cancellation of the contract for the repair of the Shore Road in Pleasantville, Atlantic County, and directed that the Secretary notify the County of Atlantic that the State Highway Commission concurs thoroughly in this decision to undertake this work on a larger scale upon the return of favorable weather conditions.

Fredon-Stillwater Road, Sussex County

On recommendation of the State Highway Engineer, Commissioner Jelin moved the acceptance and final payment on the Fredon-Stillwater Road in Sussex County, this being a drainage and grading job and the work having been completed on August 30, 1923. This was seconded by Mr. Kidde and adopted.

Right of Way, Route 8

The Secretary informed the Commission that Right of Way Engineer Meeker was present to discuss further the matter of acquisition of property on Route 8, Montclair-Verona Section. Commissioner Kidde called the attention of Mr. Meeker to the fact that he had learned from Mr. Baldwin, the former owner of property of St~~r~~asse & Cramer, that the entire tract was sold for $7500.00, for which the state was offering $4600.00 for one corner, and further that the Paterson Savings Bank had sold the property now occupied by Mr. Cramer as a gas filling station and were prepared to testify as to the amount he paid for this property. Right of Way Engineer Meeker advised that in the case of St~~r~~asse & Cramer, the Commission was taking the best part of their property, and although the prices at which these parcels were purchased by the present owners appear small in connection with the amount for which they offered portions to the state; yet in view of the opinion of the appraisers of the State Highway Commission, it would appear that these people had really purchased bargains in the real estate acquired and it was worth much more than they had actually paid. Mr. Meeker further stated that he felt that the objections as made by the state were reasonable and he would recommend that the Commission stand upon the figures given at the last meeting as a basis for condemnation because of the fact that the same can be substantiated by expert real estate testimony. Commissioner Jelin stated that in view of the fact that the Right of Way Department makes such a recommendation, he would allow the action as taken before to stand.

Yellow Frame-Fredon Road

On recommendation of the State Highway Engineer, Commissioner Jelin moved the acceptance and final payment on the Yellow Frame-Fredon Road, Sussex County State Aid, this being a grading and drainage job. This was seconded by Mr. Stewart and adopted.

Township Road Agreements

On recommendation of the State Highway Engineer, Commissioner Jelin moved approval of Force Account Agreements for the following Township Roads:

Marlton-Kresson, Evesham Township, Burlington County
Telegraph Road, Alloway Township, Salem County.

This was seconded by Mr. Stewart and adopted.

Route 11, Sections 6 & 7.

State Highway Engineer Sloan presented a communication from County Engineer Ferguson of Passaic County, requesting the Commission to consider placing a surface pavement of asphalt on Routell, Main St., Sections 6 & 7, in Passaic County. Commissioner Kidde advised that at the time of his inspection of the Passaic Bridge this matter had been broached to him by the Board of Freeholders of Passaic County and he had requested that the matter be presented to the Commission in writing. He moved that the communication be received and that the Commission advise that it is its opinion that the roadway will not be ready for a top surface until the coming spring, and in any event the work could not be done satisfactorily during the winter, and under the circumstances, it felt that the work could be readvertised in the spring. This was seconded by Mr. Jelin and adopted

Bergen Turnpike

On recommendation of the State Highway Engineer, Commissioner Jelin moved the acceptance and final payment on Bergen Turnpike, from Pleasant Avenue to the Hudson County Boulevard, in Hudson County, work done from the Motor Vehicle Aid account. This was seconded by Mr. Kidde and adopted.

Kaighn Avenue, Extension

On recommendation of the State Highway Engineer, Commissioner Jelin moved the approval of an extension of time to November 20, 1923, on Kaighn Avenue Extension, Camden County Motor Vehicle Aid. This was seconded by Mr. Stewart and adopted.

Hudson County Request

State Highway Engineer Sloan presented a request of the Hudson County Engineer for a transfer of $22,380.00 from Tonnelle Avenue in the 1923 Maintenance Schedule to the credit of Bergen Turnpike in the 1922 Schedule, making a total of $45,000.00 to the credit of this road, and he recommended approval of the action by the State Highway Commission. On motion by Mr. Jelin, seconded by Mr. Stewart, the recommendation for the transfer as presented by the State Highway Engineer was ordered approved.

Revised Schedule-Camden County

On recommendation of the State Highway Engineer, Commissioner Jelin moved the approval of the revised schedule of maintenance and betterment in Camden County. This was seconded by Mr. Stewart and adopted.

Hope-Blairstown Road

State Highway Engineer Sloan presented to the Commission the matter of the final acceptance of the Hope-Blairstown Road, Warren County, Motor Vehicle Aid, where the concrete varied considerably over different areas. He also presented a statement showing the concrete as placed to be of very good texture and exceptionally strong as shown by cores taken from the work. Commissioner Kidde moved that before any approval is given, the Inspector on this work be brought before the State Highway Commission for a hearing, the State Highway Engineer to prepare the charges. This was seconded by Mr. Stewart and adopted.

Conference

State Highway Engineer Sloan requested a conference with the Commission relative to the outlining of work upon which survey parties might begin for the 1924 program. Following this conference, Commissioner Kidde moved that the meeting adjourn at 4:30 P.M., to meet in regular session again on Tuesday, Nov. 27th. This was seconded and the meeting adjourned.

Respectfully submitted,

A. LEE GROVER

Secretary

MINUTES OF MEETING - November 27, 1923.

A regular meeting of the State Highway Commission was held at the offices of the Commission, Broad Street Bank Building, Trenton, on Tuesday, November 27, 1923. The meeting was called to order by Chairman Scott at 10:30 A.M.

Present: General H. L. Scott, Chairman, and
Messrs. Walter Kidde, Percy H. Stewart and Abraham Jelin.

Monmouth County Hearings

The Secretary informed the Commission that County Engineer Allen of Monmouth County, and Freeholder Borden, were present and desired a hearing. On motion, duly seconded, a hearing was granted. Mr. Allen presented plans and specifications for Palmer Avenue and asked the Commission to either grant aid or reject the plans and specifications in order that the County might proceed from its own funds. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission directed that plans and specifications for Palmer Avenue be rejected and State Aid be disapproved on account of lack of funds.

County Engineer Allen also brought up the matter of State Aid for the construction of a storm sewer at West Long Branch, where, before the county could proceed with road work, it is necessary to relieve a drainage condition which it was claimed was caused to a certain extent by water from State Highway Route 4. The city received bids for the construction of this sewer and it was estimated to cost $12,500.00. State Aid was requested to the amount of $3,000.00, or anything which the state saw fit to give to the county. On motion by Mr. Jelin, seconded by Mr. Stewart, the matter was taken under consideration at this time.

Cape May-Lewes Ferry

Commissioner Kidde presented the following resolution for action by the Commission:-

RESOLVED, that the Chairman is hereby authorized to appoint a Committee composed of two State Highway Commissioners and the State Highway Engineer to get in touch with and meet with the authorities who have the matter of the Cape May-Lewes Ferry in hand in the State of Delaware, and present a report to the State Highway Commission with a view toward the formation of a joint Committee of the States of New Jersey and Delaware for the study of the entire question, and

BE IT FURTHER RESOLVED, that it be the sense of the State Highway Commission that there be in mind the formation of an Advisory Committee of experts, who will study the problems of the Cape May-Lewes Ferry thoroughly, in order that the State Highway Commission may have all the information in hand for the proper solution of the question.

This was seconded by Mr. Stewart and adopted.

The Secretary called attention to the requests as received from represnetatives of the Cape May-Lewes Ferry and of the Black Horse Pike, requesting a hearing before the State Highway Commission at Atlantic City, and he advised that the Chairman had advised these people that the Commission would hold a meeting on Saturday, December 8th, at 10:00 A.M.

Commissioner Kidde moved that a regular meeting of the State Highway Commission be held at the Hotel Dennis, Atlantic City, at 10:00 A.M. on Saturday, December 8th, for the purpose of hearing delegations from the Counties of Cape May, Cumberland, Salem, and Atlantic, and such other interested parties as may have matters to discuss concerning South Jersey; this meeting to be held between the hours of 10:00 A.M. and 1:00 P.M. and the Secretary is instructed to prepare a schedule of matters to be treated at this meeting. This was seconded by Mr. Jelin and adopted.

Route 9, Section 10.

Commissioner Stewart reported that since the last meeting of the Commission, he had inspected the work completed on Route 9, Section 10, Bound Brook-Lincoln Avenue, as performed by John Dorer, and he moved that the Commission accept the same and authorize final payment. This was seconded by Mr. Jelin and adopted.

Reimbursement - State Hgwy Routes

County Funds Spent

Commissioner Stewart questioned the matter of funds spent in each county of the state, and Commissioner Kidde suggested that a tabulation be prepared showing the amount of funds which will have been spent on State Highway work in each county of the state at the end of the present construction season.

Bids Received

X

The Commission recessed at 11:30 A.M. to attend the public opening of bids for the Perth Amboy-South Amboy Bridge, Bass River Bridge, widening of the Albany Street Bridge and Route 15, Section 5, Millville-Menantico Section. Bids were opened and read to the public by the Secretary as follows:-

Perth Amboy-South Amboy Bridge

Frederick Snare Corporation	$ 3,778,645.47
Stillman-Delehanty-Ferris Co	3,702,921.97
Patrick McGovern, Inc	3,862,846.89

Bass River Bridge - Route 4

L. J. Sieling	103.9%
F. W. Schwiers, Jr. Co	111.5%
Standard Engr. & Cont. Co	113.5%

Widening Albany Street Bridge

Michael Staub	192.9 %
S. S. Thompson Co. Inc	106.7 %
Krellwitz Contracting Co	107. %

Route ~~16~~ 15, Section 5,
Millville-Menantico Creek

Michael Staub	94. %
Acchione & Canuso	94.9 %
Sutton & Corson	97. %
Crilly & Cannon	100.63%
E. Riley Mixner Co	103.7 %
N. J. Construction Co	105. %
Public Service Production Co	105.9 %
R. L. Bonham Co	106.5 %
Newark Paving Co	107. %
S. S. Thompson & Co	107.2%
Ralph Sangiovanni	109.63%
Gould, Kranz & Mandel	115. %

Following receipt of bids Commissioner Jelin moved that recess be taken for luncheon.

The meeting was resumed at 3:00 P.M. at the offices of the Commission, Broad Street Bank Building, with all the members present as at the morning session.

Hope Blairstown Road

Mark T. Dempsey-Hearing

The Secretary informed the Commission that Mr. Mark T. Dempsey, Inspector on the Hope-Blairstown Road, Warren County, was present at the request of the Commission in order to answer for the deficiency in the thickness of concrete on the Hope-Blairstown Road, Warren County. Mr. Dempsey appeared before the Commission and was questioned concerning his former experience with the Department, and he admitted that he lacked the experience necessary for the work but that he had endeavored to the best of his ability to fulfill the requirements of the plans and specifications, but evidently the contractor had tricked him by some method beyond his control or when he was not aware of it. Commissioner Kidde called attention to the fact that it appeared from the records that Mr. Dempsey was endeavoring to better his education through technical schooling. Commissioner Stewart inquired whether there was anyone else on the job to check up the work of the Inspector. Mr. Dempsey advised that the traveling Inspector Mr. Barry, and also the County Engineer were there, and apparently they did not see the shortage in thickness. Mr. Dempsey admitted to the Commission that a mistake was made on the work, but he could not account for it. After further questioning, Mr. Dempsey was released from the meeting and Mr. Kidde moved the adoption of the following resolution:-

WHEREAS, Mark T. Dempsey, Junior Inspector, has appeared before the Commission and it is apparent from his answers and examination that he was put to that he was not thoroughly competent, and that he had passed work which was not up to specifications, and

WHEREAS, it is deemed by the State Highway Commission that Mr. Dempsey's endeavors were honest but that he lacks the skill and experience necessary for the work,

NOW, THEREFORE, BE IT RESOLVED, that an opportunity be given Mr. Dempsey to resign from the State Highway Department.

This was seconded by Mr. Jelin and adopted.

Market Street Bridge, Route 10

Commissioner Kidde reported that he had inspected the completed work on Market Street Bridge on Route 10, and would recommend acceptance of the same in accordance with the terms of the Reimbursement Act.

Route 7, Section 1, Corlies Avenue

State Highway Engineer Sloan presented a report to the State Highway Commission in connection with the contract of the East Jersey Bridge Company for the construction of Route 7, Section 1, Corlies Avenue, and recommended that in view of the fact that the cores taken on this pavement indicated the base not only thin at points but that the concrete was porous to an extent, making the value questionable, that 25% of the value of the cost of the concrete base; namely, the amount of $7,278.21, be withheld by the state for a period of five years, either in cash or negotiable securities, satisfactory to the State Highway Commission, and that a bond be required from the East Jersey Bridge Company, guaranteeing that the contractor shall maintain the pavement for five years after completion in satisfactory condition against defective workmanship and material as regards the concrete base. State Highway Engineer Sloan also recommended to the State Highway Commission that an extension of time be granted the East Jersey Bridge Company to the date of completion of their work. Commissioner Jelin reported that he had been advised by the creditors of the contractors that the East Jersey Bridge Company was practically in the hands of receivers and all the money due from the state was to go toward paying debts, and he moved that the recommendation of the State Highway Engineer be adopted and that Route 7, Section 1, Corlies Avenue be accepted by the state, subject to satisfactory negotiable securities to the sum of $7,278.21 to be withheld for a period of five years; also that a bond in accordance with the recommendation of the State Highway Engineer shall be furnished by the East Jersey Bridge Company, guaranteeing the pavement and base on this work for a period of five years. This was seconded by Mr. Kidde and adopted.

Route 17 - General -

Route 10, Section 1-C

Commissioner Kidde called attention to the fact that he would attend a hearing to be held at Hackensack on December 3d in connection with the taking over of Route 17, and that at that time he would go over that section of Route 10 given him for inspection. In this connection, State Highway Engineer Sloan reported the completion of Route 10, Section 1-C, Bluff Road to Anderson Avenue and recommended its acceptance by the State after its inspection. On motion by Mr. Jelin, seconded by Mr. Stewart, the work was referred to Commissioner Kidde for inspection.

Albany Street Bridge

State Highway Engineer Sloan reported to the Commission that he was prepared to recommend award of contract of the Albany Street Bridge widening on Route 1, Section 13, at M.P. 31.4 to Michael Staub, the lowest bidder at 102.9% of the Engineer's estimated units of cost. On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission adopted the following resolution:-

RESOLVED, that the State Highway Commission does hereby make award of contract for the widening of the Albany Street Bridge at M.P. 31.4 on Route 1, Section 13, to Michael Staub of Pitman, New Jersey, at his the lowest bid of 102.9% of the Engineer's estimated units of cost amounting to $367.757.04, and

BE IT FURTHER RESOLVED, that the Chairman is authorized to sign the necessary contracts after approval by the State Highway Engineer.

Route 15, Section 5.

State Highway Engineer Sloan recommended to the Commission award of contract for the construction of Route 15, Section 5, Millville-Menantico Section, to Michael Staub of Pitman, N.J. at his the lowest bid of 94% of the Engineer's estimated units of cost. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission unanimously adopted the following resolution:-

RESOLVED, that the State Highway Commission does hereby make award of contract for the construction of Route 15, Section 5, Millville-Menantico Section, to Michael Staub of Pitman, N.J. at his the lowest bid of 94% of the Engineer's estimated units of cost, amounting to $143,034.77, and

BE IT FURTHER RESOLVED, that the Chairman is authorized to sign the necessary contracts after approval by the State Highway Engineer.

Amboy Bridge Bids

On motion by Mr. Kidde, seconded by Mr. Jelin, the bids for the new Amboy Bridge on Route 4, were referred to the State Highway Engineer to be taken up with Mr. C. W. Hudson, Supervising & Designing Engineer, for the purpose of preparing a full report for action of the Commission as to the award at the next meeting of the Commission.

Route 4 Storm Drain-West Long Branch

Commissioner Jelin requested information as to whether there was any justification for the Commission sharing in the cost of the work as requested by Monmouth County, on a storm drain through West Long Branch. State Highway Engineer Sloan advised that while conditions

NOV 2[illegible] 1923

at the present time are all right as far as the State Highway Commission is concerned, the construction of this storm drain will benefit the State Highway to a certain extent, and in view of this, Commissioner Kidde moved that an allotment of $1,500.00 be made from the Motor Vehicle Account to Monmouth County as aid in the construction of a storm sewer in West Long Branch. This was seconded by Mr. Jelin and adopted.

Haddonfield-Coffins Corner Road

Assistant State Highway Engineer Reed informed the Commission that Camden County was very desirous of securing action on the Haddonfield-Coffins Corner Road contract at this meeting. On recommendation of the State Highway Engineer, Commissioner Stewart moved approved of the contract for the Haddonfield-Coffins Corner Road, Camden County, work being done from Motor Vehicle Aid. This was seconded by Mr. Kidde and adopted.

On motion by Mr. Jelin, seconded by Mr. Stewart, the Commission adjourned at 4:30 P. M. in order to go to Washington, N.J. as the guests of the Kiwanis Club of Washington, to discuss matters concerning Warren County Roads.

Respectfully submitted,

A. LEE GROVER,

Secretary

MINUTES OF MEETING - December 4, 1923.

A regular meeting of the State Highway Commission was held at the offices of the Commission, Broad Street Bank Building, Trenton, N.J. on Tuesday, December 4, 1923. The meeting was called to order by Chairman Scott at 11:00 A.M.

Present: General H. L. Scott, Chairman, and
Messrs. Percy H. Stewart, Walter Kidde, and Abraham Jelin.

Minutes Approved

Commissioner Kidde reported having carefully read the minutes of the meeting of October 2d and moved that the same be approved as mailed. This was seconded by Mr. Jelin and adopted.

Commissioner Kidde reported having carefully read the minutes of the meeting of October 9th and he moved the approval of same as mailed. This was seconded by Mr. Jelin and adopted.

Commissioner Kidde reported having carefully read the minutes of the meeting of October 16th and he would move the adoption of the same with several slight typographical changes which he indicated to the Secretary. This was seconded by Mr. Jelin and adopted.

Commissioner Kidde reported having carefully read the minutes of the meeting of October 23d and having indicated several slight changes in the wording which would not interfere with the action of the Commission, and he moved that these minutes be approved as corrected by him. This was seconded by Mr. Jelin and adopted.

Commissioner Kidde reported having carefully read the minutes of October 30th, and moved the adoption of the same as mailed. This was seconded by Mr. Jelin and adopted.

Route No. 17 Hearing

Commissioner Kidde reported that in company with Chairman Scott on December 3d, he had attended the public hearing as arranged at the Court House, Hackensack, in order to hear expressions from the municipalities interested as to the location for State Highway Route 17, prior to its being taken over as a State Highway. He advised that the meeting developed a controversy with regard to the alignment of the route through East Rutherford and Rutherford, there being widely divergent ideas between the representatives of these municipalities, these ideas being involved with local improvements. The Commission requested these municipalities to clear up the questions in dispute and submit a solution for the State Highway Commission to consider. The balance of the proposed line for Route 17 was entirely satisfactory, and the county authorities and the municipalities interested, urged that this route be taken over in view of the fact that it is a very important inter-state highway. He informed the Commission that no promises had been made to the interested parties in view of the fact that there was no bond fund available for the work, and they had been informed that the only consideration which the Commission could give would be toward providing maintenance on the road for the present. A report of the proceedings was taken by a court reporter and a copy of this report will become the official records of the Department.

Route 10, Section 2.

Commissioner Kidde reported that while in Bergen County in company with Chairman Scott, he had inspected Route 10, Section 2, Broad Avenue to Bluff Road, as completed by John J. McGarry on November 17, 1923, and he would recommend acceptance and final payment, subject to a deduction of $27.48 for pavement of less than the required thickness. This was seconded by Mr. Jelin and adopted.

Route 10, Section 1-C.

Commissioner Kidde reported to the Commission that on the Bergen County trip he had inspected Route 10, Section 1-C, completed work on Bluff Road to Anderson Avenue, which was finally completed by John J. McGarry on November 17, 1923, and he moved acceptance of this work by the Commission and final payment to the contractor. This was seconded by Mr. Jelin and adopted.

C.W.Leavitt Conference

The Secretary informed the Commission that Mr. Chas. W. Leavitt, member of the Advisory Board for the study of the Camden Bridge traffic, was present for a conference with the Commission. On motion, duly seconded, the conference was granted. Mr. Leavitt appeared together with Commissioner Middleton of Camden City, and advised that in his duties as Camden City Planning Engineer he had prepared sketches and a map showing his ideas for the development of Camden, in which he had incorporated certain of the ideas as developed by the Camden Advisory Board for roads to relieve traffic to come with the completion of the bridge between Philadelphia and Camden. Mr. Leavitt requested permission from the State Highway Commission to present this sketch and plan to the City Commissioners of Camden and other interested parties with a view toward obtaining approval of the same by the City of Camden, which he felt would be more easily obtained if the prestige of the State Highway Commission studies were added. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission granted permission to Mr. Leavitt to display his plan and sketch to the Commissioners of Camden and to other interested parties without any reference as to what participation the State of New Jersey may take in the final development of the routes.

Atlantic County Invitation

The Secretary presented a communication received by State Highway Engineer Sloan from County Engineer Nelson of Atlantic County, inviting the members of the State Highway Commission to be his guests on Friday evening, December 7th at Atlantic City in order to discuss road matters in general and more specifically those affecting Atlantic County. On motion by Mr. Jelin, seconded by Mr. Stewart, the Secretary was directed to advise Mr. Nelson that the Commission is pleased to accept his invitation in view of the fact that they will be in Atlantic City on Friday afternoon.

Route 11, Main Street, Clifton

The Secretary informed the Commission that a delegation from the Passaic County Board of Freeholders was present and desired a hearing with reference to the placing of surface pavement on Route 11, connecting link, Main Street, Clifton. On motion, duly seconded, a hearing was granted. There appeared County Engineer Ferguson of Passaic County and Freeholders Stalter, Mason and Cross. Mr. Ferguson reviewed the contract for Main Street, Clifton, with the Commission and advised that the base on one-half the roadway is completed and ready for the top paving, and the residents of Clifton are exercised over the fact that the work will be allowed to remain without a surface through the winter. He stated that while at first it was considered best to await better prices for the pavement next spring, it did not appear that a better price could be secured and the delegation was present to urge that the Commission permit the contractor, Mr. Brackett, to proceed with the pavement at his price of $2.07 a square yard. Commissioner Jelin advised the delegation that as far as he was concerned, the price was too high and he believed that if the county would declare an emergency it could get lower bids or it could accept a cheaper price from the contractor now on the job, in view of the fact that prices throughout the state for three inch asphalt have run from $.35 to $1.70 per square yard. County Engineer Ferguson advised that he did not feel that the price was excessive in view of the difficulties under which the contractor was forced to work, since the traffic over the road reduces the efficiency of the contractor by at least fifty per cent. Commissioner Kidde advised that he had looked into the matter on his recent trip of the Market Street Bridge inspection in Passaic County, and he would be favorable to the paving of the completed one-half of the roadway for its full length if the contractor would be willing to accept a lower price for the pavement, and consideration could be given to the closing down of this one-half of roadway while the top surface was being laid. In the discussion by the Freeholders, they stated that they felt that the Commission was placing them in a position where they were receiving a great deal of criticism on account of the non-completion of this pavement, and Commissioner Kidde stated that he felt that the State Highway Commission was desirous of cooperating with the county authorities and that the county officials would receive full credit if an emergency was declared and a lower bid was received, resulting in a cheaper price to the County of Passaic. He moved that the matter be referred to the State Highway Engineer to await a report from the county, as to a lower price for which the contractor would agree to do this paving work. This was seconded by Mr. Jelin and adopted.

State House Conferences

The Commission recessed for conference at 12:00 o'clock noon, with Hon. George S. Silzer, Governor of the State of New Jersey, and with the Republican and Democratic Senators of the State, in order to lay before them a tentative plan for future road improvement.

The meeting of the Commission was resumed at the offices of the Commission, Broad Street Bank Building, at 4:00 P.M. Newspapermen were present and the Commission outlined for the benefit of the newspapermen the plans as laid before the Governor and the State Senators. In view of the fact that this report contained reference to the reports of the three Advisory Boards, appointed by the State Highway Commission for the study of tunnel traffic, Camden Bridge traffic, and Shore Road traffic, Commissioner Jelin moved that the Clerk to the Chairman, Mr. Reddan, be empowered to go over the various reports of the Advisory Boards with such newspapermen as desired reference to the same. This was seconded by Mr. Stewart and adopted.

Budget Commission - Invitation

The Secretary presented a communication from the Budget Commission requesting that representatives of the State Highway Commission appear before that body on Thursday, December 6th at 3:30 P.M. for the purpose of discussing budget matters. On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission authorized Chairman Scott, Commissioner Jelin, Secretary Grover and Chief Auditor Howell, to appear as representatives before the Budget Commission.

Chosen Freeholders' Invitation

The Secretary presented a communication from the Chosen Freeholders' Association of the State, inviting the Commission to attend a "Get Acquainted Dinner" tendered by that Association to the members of the 1923 Legislature, at Hildebrechts, Trenton, N.J. on Monday evening, December 10th, at 6:00 P.M. On motion by Mr. Jelin, seconded by Mr. Stewart, the Secretary was directed to acknowledge this communication and invitation.

Black Horse Pike

The Secretary presented to the Commission a communication from the Atlantic City Rotary Club, with reference to the Black Horse Pike or other alternative routes to the seashore. On motion by Mr. Stewart, seconded by Mr. Jelin, the Secretary was advised to notify the Atlantic City Rotary Club of the fact that the matter of the Black Horse Pike will be discussed at the meeting of the State Highway Commission to be held at Atlantic City on Saturday, December 8th, and an invitation is extended them to attend this meeting.

The Secretary presented to the Commission a communication from the Black Horse Pike Association, advising of a meeting to be held by that Association on December 6th, for the purpose of discussing the Black Horse Pike and extending an invitation to the Commission to be present. On motion by Mr. Stewart, seconded by Mr. Jelin, the State Highway Commission directed the Secretary to acknowledge the communication and advise that the Commission feels that this matter will be properly handled at a hearing to be given the advocates of the Black Horse Pike at its meeting to be held at Atlantic City on December 8th.

West Freehold-Smithburg Road

The Secretary presented a communication from the Monmouth County Board of Freeholders requesting State Aid on the improvement of the West Freehold-Smithburg Road, Monmouth County, the County requesting that a balance of $7,000.00 now available be transferred to this road and such other funds as the Commission can see its way clear to apportion. On motion by Mr. Jelin, seconded by Mr. Stewart, the Commission directed that the communication be acknowledged and that the County be advised that there are no funds in the State Aid Account for 1924, and also whether they desire to make a request for funds from the Motor Vehicle Account.

Additional Bridges or Tunnels to Cross Hudson River

The Secretary presented a communication from the Port of New York Authority, advising of a meeting to be held on the matter of additional bridges or tunnels to cross the Hudson River, said hearing to be held on Wednesday, December 5th, at New York City. On motion by Mr. Stewart, seconded by Mr. Kidde, the State Highway Commission directed that the Secretary acknowledge receipt of the notice of hearing and advise that the State Highway Commission is deeply interested in any suggestions as to additional tunnels or bridges, and as far as its powers extend it will be very glad to cooperate with the Port Authority in providing facilities for new motor vehicle traffic which will be produced by any new situations, it being the feeling of the State Highway Commission that there are many phases of the problem which will be important to them and it believes that any questions of roads can be worked out in conjunction with any reasonable plans the Port Authority might have.

Riparian Grant in Fee - Ocean City Auto Br.

The Secretary presented a communication from the Board of Commerce and Navigation, quoting a price of $2,500.00 for riparian grant in fee, for the Ocean City Automobile Bridge, said grant being purchased from the State Board of Commerce and Navigation. On motion by Mr. Kidde, seconded by Mr. Jelin, the purchase of riparian grant was authorized.

The Schedule of Business was next taken up for consideration item by item as follows:

Amboy Bridge Contract

State Highway Engineer Sloan presented a report from Mr. C. W. Hudson, Supervising & Designing Engineer for the New Amboy Bridge, upon which bids had been taken on November 27th, in which Mr. Hudson recommended award of contract to the lowest bidder, Stillman-Delehanty-Ferris Company at their low bid of $3,702,921.97, this being $75,000.00 lower than the next low bidder and $230,000.00 lower than the lowest bid received at the former letting. There was also presented a financial statement from Stillman-Delehanty-Ferris Company, low bidders on this contract, together with a complete tabulation of all the bids. State Highway Engineer Sloan recommended that award be made to the low bidder, Stillman-Delehanty-Ferris Company, at the price bid.

Mr. Hudson appeared before the Commission and stated that he had examined the bids of all the bidders and after having given consideration to the market conditions on labor and materials, he had decided to recommend award to the low bidder. After discussion by the Commission with Mr. Hudson, concerning the date of completion of the work, Commissioner Kidde moved that in order to have all legal safeguards such as are necessary in awarding a contract of this size, the entire matter be referred to the State Highway Engineer and Commissioner Stewart for conference with the Attorney General in order that when award is made there be an opinion from the Attorney General as to the legality of the same. This was seconded by Mr. Jelin and adopted.

The Secretary directed the attention of the Commission to the fact that there was still being held a check from a third bidder, while the law provides that no check other than those of the two lowest bidders on the work shall be retained longer than three days. Commissioner Kidde moved that the check of Mr. Patrick McGovern be returned by the Secretary. This Was seconded by Mr. Jelin and adopted.

Route 9, Section 9-A.

State Highway Engineer Sloan reported the completion of Route 9, Section 9-A, Still Valley-Bloomsburg Section, as of October 8, 1923, and recommended acceptance of the work in accordance with the terms of the Reimbursement Act. Commissioner Jelin reported having inspected this work, and Commissioner Kidde moved that the State Highway Commission accept Route 9, Section 9-A, Still Valley-Bloomsburg Section, in accordance with the terms of the Reimbursement Act. This was seconded by Mr. Jelin and adopted.

Route 4, Section 11, Avon

State Highway Engineer Sloan reported final completion as of April 23d, 1923, on Route 4, Section 11, Avon, and he recommended acceptance of this work in accordance with the terms of the Reimbursement Act, subject to a deduction of $52.37 on account of pavement of less than the required thickness. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission approved the recommendation of the State Highway Engineer, and ordered the acceptance of Route 4, Section 11, Avon, subject to a deduction of $52.37 in accordance with the terms of the Reimbursement Act.

Amboy Bridge-New

The Secretary informed the Commission that in order to make payment to the City of Perth Amboy for that portion of the State's funds, due on account of work performed on Route 4, connecting Link in Perth Amboy, that a formal resolution must be adopted. Commissioner Jelin moved the adoption of the following resolution:

WHEREAS, the State Highway Commission did by resolution of December 7th, 1922, approve of a contract for the construction of an extension of State Highway Route 4, known as Amboy Avenue, the contract having been awarded by the City of Perth Amboy to Graham & McKeon at a contract amount of $158,216.62, and

WHEREAS, by the same resolution did authorize the setting up of the sum of $75,000.00 as the State's share of the cost of the said construction of the extension of State Highway Route 4 in Perth Amboy, and

WHEREAS, it has been certified to the State Highway Commission by the City of Perth Amboy that work has been performed to the amount of $85,055.24, and request has been made by the City of Perth Amboy for a partial payment on account of the said work as performed.

NOW, THEREFORE, BE IT RESOLVED, by the State Highway Commission of the State of New Jersey that the Commission does hereby approve of the payment of the sum of $21,900.57 as the State's share of cost of the work performed and do hereby request the Hon. N. A. K. Bugbee, Comptroller of the State of New Jersey, to draw his warrant against the State Road Fund in favor of the Treasurer of the City of Perth Amboy in the sum of $21,900.57.

This was seconded by Mr. Kidde andadopted.

Route 10, Section 1-B.

State Highway Engineer Sloan reported the completion of Route 10, Section 1-B, Anderson Avenue to Arcadian Way, as completed by contractor John J. McGarry, and he recommended acceptance of the work in view of the fact that the same had been inspected by Commissioner Kidde on December 3d. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission ordered the acceptance of Route 10, Section 1-B, and final payment on the same.

Route 5, Section 9.

State Highway Engineer Sloan reported the completion of Route 5, Section 9, Barker's Corner-Hackettstown, by the Globe Indemnity Company as surety for Frank J. Groman & Sons, contractors, and he advised that this was now ready for final inspection; also there were some matters to straighten out before final payment could be made. Commissioner Kidde reported that he had inspected the work and he was prepared to move its acceptance, subject to reimbursement terms and also subject to the approval of all final papers by the State Highway Engineer. This was seconded by Mr. Jelin and adopted.

Route 1, Section 12.

State Highway Engineer Sloan reported to the Commission with reference to the final payment and acceptance on Route 1, Section 12, Rahway Avenue-Elizabeth. Tests had revealed the fact that there was some pavement deficient.in bitumen content, and he moved the acceptance and final payment on this work subject to a deduction of $297.26 for deficiency in the pavement. Commissioner Kidde moved that in accordance with the recommendation of the State Highway Engineer, Route 1, Section 12, Rahway Avenue-Elizabeth be finally accepted, and final payment authorized, less a deduction of $297.26 for deficiency in surface pavement. This was seconded by Mr. Jelin and adopted.

Nichol Avenue, New Brunswick ✓

Commissioner Jelin reported having inspected the completed work on Nichol Avenue (approach to the Women's College) at New Brunswick and he moved the acceptance of the same by the Commission. This was seconded by Mr. Stewart and adopted.

Right of Way-Route.14 ✓

On recommendation of the State Highway Engineer, Commissioner Jelin moved that a formal offer of $800.00 be made Harry and Martha L. Dowman for property required on Route 14, Section 9, and in the event they fail to accept that condemnation proceedings be instituted in accordance with the following resolution:

> RESOLVED, that this Commission hereby determines to acquire in the name of the State of New Jersey, for public use in the construction of State Highway Route 14, Section 9, ALL that certain Lot, tract or parcel of land and premises, situate, lying and being in the State of New Jersey, and more particularly described as follows:

Tract #1

BEGINNING at a point in the westerly side of the main seashore road,otherwise known as Route 14 of the New Jersey State Highway System, said point being twenty (20) feet westwardly from the center line of said road as measured at right angle thereto, and in the line of lands of Mrs. Stowe, and extending,

Thence (1) along said Stowes line north fifty-one degrees, forty-six minutes, and fifteen seconds west (N51°46'15") thirteen (13) feet to a point in said line.

Thence (2) along other lands of the granter of which this is a part, north thirty-three degrees, thirteen minutes, and forty-five seconds east (N33°13'45"E) two-hundred and twenty-three and one tenth (223.1) feet to a point of curve.

Thence (3) curving to the right with a radius of eleven thousand four hundred and ninety-two and nineteen hundredths (11492.19) feet, a distance of two hundred and thirty-six and six-tenths (236.6) feet to a point of tangency.

Thence (4) still along said other land of the grantor north thirty-four degrees, twenty-four minutes and thirty seconds east (N34°24'30"E) two-hundred and seventy-one and one-tenth (271.1) feet to a point in the line of lands of Frank Shaw;

Thence (5) along said Shaw's land south fifty-two degrees, fifteen minutes, and thirty seconds east (S52°15'30"E) thirteen (13) feet to a point in the westerly side of said road;

Thence (6) along the westerly side of said road south thirty-four degrees, twenty-four minutes, thirty seconds west (S34°24'30"W) three-hundred eighty-eight and five tenths (388.5) feet to an angle in said road;

Thence (7) still along the westerly side of said road south thirty-three degrees, thirteen minutes and forty-five seconds west (S33°13'45"W) three-hundred and forty-two and thirty-nine hundredths (342.39) feet to the point and place of beginning. Containing two hundred seventeen thousandths (0.217) Acres, be the same more or less together with.

Tract #2

BEGINNING at a point in the easterly side of said road, said point being twenty (20) feet eastwardly from the center line of said road as measured at right angle thereto, and in the line of lands of L. Eddy.

Thence (1) along the easterly line of said road north thirty-three degrees, thirteen minutes and forty-five seconds east (N33° 13'45"E) a distance of three hundred and forty-five and forty-nine hundredths (345.49) feet to an angle in said road;

Thence (2) still along the easterly side of said road north thirty-four degrees, twenty-four minutes and thirty seconds east (34°24'30"E) a distance of three hundred eighty five and seventy-eight hundredths (385.78) feet to a point in the line of lands of Frank Shaw;

Thence (3) along said Shaw's line south fifty-two degrees fifteen minutes and thirty seconds east (S52°15'30"E) a distance of thirteen (13) feet to a point in said line;

Thence (4) along other lands of the grantor of which this is a part, south thirty-four degrees, twenty-four minutes, thirty-seconds west (S34°24'30"W) a distance of two hundred and sixty-seven and three tenths (267.3) feet to a point;

Thence (5) still by said grantor's land, curving at the left with a radius of eleven thousand, four hundred and twenty-six and nineteen hundredths (11426.19) feet a distance of two hundred and thirty-five and two tenths (235.2) feet to a point;

Thence (6) still by said other lands of the grantor south thirty-three degrees, thirteen minutes and forth-five seconds west (S33°13' 45"W) a distance of two hundred and twenty-eight and nine tenths (228.9) feet to a point in the line of lands of the aforesaid L.Eddy;

Thence (7) along said Eddy's land north fifty-one degrees, forty-six minutes, and fifteen seconds west (N51°46'15"W) a distance of thirteen (13) feet to the point and place of beginning.

Containing two hundred and eighteen thousandths (0.218) Acres be the same more or less.

The State Highway Engineer is hereby authorized and directed on behalf of this Commission to make an offer of the sum of $800.00 to the owners or owner of said lands and premises for the conveyance of the same to the State of New Jersey free and clear of all encumbrances, and upon the failure of such owner or owners to accept such offer, or if for any other reason said lands and premises cannot be immediately acquired by agreement with such owner or owners, then the Attorney General of the State of New Jersey is hereby authorized and directed to institute condemnation proceedings for the acquisition of the said lands and premises.

This was seconded by Mr. Stewart and adopted.

Right of Way, Route 4, Section 20 ✓

State Highway Engineer Sloan reported to the Commission that Mr. Biggot, owner of property on Route 4, Section 20, was dissatisfied with the agreement he had executed covering the transfer of part of his property to the State, in view of the damage he had suffered on account of the removal of electric light posts and electric signs. Mr. Biggot feels that if he were provided with a concrete driveway as shown on the plan attached, he would consider this satisfactory compensation for changes made in his property, which driveway was estimated to cost $1,250.00. State Highway Engineer Sloan recommended that in view of the fact that the original agreement called for $794.00, the sum of $456.00 additional be allowed Mr. Biggot on account of the damage above mentioned. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission authorized an additional agreement for the payment of $456.00 for land of Mr. Biggot on Route 4, making a total payment of $1,250.00.

Right of Way, Route 5, Section 12.

On recommendation of the State Highway Engineer, Commissioner Jelin moved the acceptance of purchase agreements and the purchase of the following property on Route 5, Section 12, for the amounts indicated, and that where property is given for $1.00 that communication of thanks be forwarded.

PARCEL	NAME	AMOUNT
17 & 18	Silas Elmer King	$742.00
19	" " "	81.00
20	" " "	25.00
21	Martin Lane	1.00
22	Silas Elmer King	1.00
23	Frank J. Turner	1.00
24	Dorson S. Drake	200.00
25	Frank J. Turner	80.00
26	" " "	1.00
27 & 28	" " "	1.00
29 & 30	Wm. E. Karlson	75.00
32	Samuel Johnson	400.00
34	" "	1.00
35	" "	1.00

This was seconded by Mr. Stewart and adopted.

Right of Way-Route 14, Section 8.

On recommendation of the State Highway Engineer, Commissioner Jelin moved the approval of purchase by quit claim deed of property on Route 14, Section 8, from Joseph Lybrand Corson and Emma C. Corson for $1.00 and from Daniel G. and Jennie Stizza for $1.00. This was seconded by Mr. Stewart and adopted.

Route 4, Bass River Bridge

State Highway Engineer Sloan recommended to the Commission the approval of award of contract to L. J. Sieling for the construction of the Bass River Bridge at M/P 13.9 on Route 4 on which he was the lowest bidder. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission unanimously adopted the following resolution:

> RESOLVED, that the State Highway Commission does hereby make award of contract for the construction of the Bass River Bridge at M.P. 13.9 on Route 4, to L. J. Sieling of Red Bank, N.J. at his, the lowest bid received, amounting to $106,860.11, and

BE IT FURTHER RESOLVED, that the Chairman is authorized to sign the necessary contracts after approval by the State Highway Engineer.

Route 15, Section 4.

State Highway Engineer Sloan presented to the Commission an agreement submitted by the Cumberland County Traction Company covering change of location of its tracks and the paving of the same through the City of Millville on Route 15, Section 4. He called attention to the fact that this agreement as drawn is not in accordance with the agreement submitted for their signature, which was based on an understanding approval by the State Highway Commission, and representatives of the Cumberland County Traction Company, when they appeared in Trenton on October 16, 1923. He recommended to the Commission that in view of the fact that an agreement has been executed with the City of Millville for the work on this section that the State Highway Commission proceed with the construction of this section in accordance with the plans as made to include the relocation of the tracks and paving and that suit be instituted by the State Highway Commission against the Cumberland County Traction Company to cover whatever cost the track changes have involved. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission directed that the recommendation of the State Highway Engineer be accepted and that Route 15, Section 4, be proceeded with in accordance with original plans and specifications and that due notice be forwarded to the Traction Company advising that the State Highway Commission will do everything in its power to protect its rights.

Right of Way-Route 8, Section 2

The State Highway Engineer presented for approval of the Commission, purchase agreements for property of Francis J. Marley on Route 8, Section 2, Parcel #1, for the consideration of $2,200.00. On motion by Mr. Jelin, seconded by Mr. Stewart, this purchase was ordered laid over for further report and appraisals.

Right of Way-Route 5, Section 12.

On recommendation of the State Highway Engineer, Commissioner Jelin moved the purchase of property on Route 5, Section 12, from Mary Leonora Wills, as follows:

Parcel #12 & #12, for the consideration of $1.00
" #15 " " " " $1.00
" #16 " " " " $1.00

This was seconded by Mr. Stewart and adopted.

Employments

State Highway Engineer Sloan presented the following list of employments as approved by him during the past two weeks and recommended approval of same by the Commission. On motion by Mr. Kidde, seconded by Mr. Stewart, the recommendation of the State Highway Engineer for the approval of employments for the past two weeks was unanimously approved by the Commission.

Nov. 1,	Thos. C. Shreve	Inspector	$125.00	mo.
" 21,	H. J. McAleavy,	"	125.00	
" 19,	Frank DelPeano,	Mechanic	.60	hr.
" 20,	Alex. Anderson,	"	.50	
" 27,	J. H. Brearley,	Motor Tr. Dr.	.45	
" 21,	Harry Cahill,	" " "	.50	
" 17,	Arnold Edwards,	" " "	.40	
" 23,	Joseph Constantine,	Mechanic	.60	
" 15,	Paul Denneler	Mot. Tr. Dr.	.45

" 14,	A. K. Mayer,	Clerk Steno.	80.00	mo.
" 28,	Wm. Callahan,	" "	80.00	
Dec. 1,	Benedict Ludwig,	Draftsman	90.00	

Alpha Boro Road, Warren County

On recommendation of the State Highway Engineer, Commissioner Jelin moved the approval of award of contract on the Alpha Boro Road, Warren County, Motor Vehicle Aid, the State's share having already been set up for the work. This was seconded by Mr. Stewart and adopted.

High Point Park Request

State Highway Engineer Sloan reported to the Commission that Mr. Stanton of High Point Park had advised that the two one-ton Ford trucks were not able to make the hills with any heavy load and he would request that two three-ton trucks be sent to High Point Park for its use in road maintenance work for several weeks. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission authorized the assignment of two three-ton trucks for High Point Park Road maintenance purposes.

Fredon-Stillwater Road-Sussex County

On recommendation of the State Highway Engineer, Commissioner Kidde moved the approval of award of contract for the Fredon-Stillwater Road, Section 2 & 2-A, Sussex County, Township Aid. This was seconded by Mr. Jelin and adopted.

Route 6 MP 9.7W

Pavement of Bridges & Approaches, Woodstown

State Highway Engineer Sloan reported in connection with the pavement on bridge and approach at M.P. 9.7 over the Pennsylvania Railroad at Woodstown, that he would recommend that the P. R. R. be requested to place a pavement on this bridge without reimbursement to the State, it being more expeditious and economical for the railroad company to do this work while its plant and equipment are available. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission approved the recommendation of the State Highway Engineer and authorized a request to be made of the P. R. R. to place a pavement on bridge and approach of bridge at M.P. 9.7-W at Woodstown without reimbursement to the State.

Hazen-Cornish Road, Warren County

On recommendation of the State Highway Engineer, Commissioner Jelin moved the approval of award of contract for the Hazen-Cornish Road, White Township, Warren County. This was seconded by Mr. Stewart and adopted.

Brass Castle Road, Warren County

On recommendation of the State Highway Engineer, Commissioner Jelin moved approval of award of contract for the construction of the Brass Castle Road, Washington Township, Warren County. This was seconded by Mr. Stewart and adopted.

Province Line Road, Mercer County

On motion by the State Highway Engineer, Commissioner Jelin moved acceptance and final payment on Province Line Road, Lawrence Township, Mercer County, Township Aid. This was seconded by Mr. Stewart and adopted.

Township Aid Force Account Agreements

On recommendation of the State Highway Engineer, Commissioner Kidde moved the approval of the following Township Aid Force Account agreements:

Willow Grove Road, Pittsgrove Township, Salem County,
Naylor's Corner, Shamong Township, Burlington County,
Crosswick's-Ellisdale Road, Chesterfield Township, Burlington County,
Canton & Greenwich Road, Greenwich Township, Cumberland County,
Springtown-Roadstown Road, " " " "
Lincoln Avenue-Buena Vista, Vista Township, Atlantic County,
Baptistown-Barbertown Road, Kingwood Township, Hunterdon County.

This was seconded by Mr. Jelin and adopted.

Plainsboro-Cranbury Neck-Princeton Jct.

On recommendation of the State Highway Engineer, Commissioner Jelin moved approval of additional application and agreement for Township Aid to the extent of $4,500.00 for the Plainsboro-Cranbury Neck-Princeton Junction Road, Middlesex County, Plainsboro Township Aid. This was seconded by Mr. Stewart and adopted.

Hope-Blairstown Road, Warren County

State Highway Engineer Sloan presented to the Commission for its approval, the final acceptance of the Hope-Blairstown Road, Warren County, Motor Vehicle Aid, concerning which Inspector Dempsey was before the last meeting, and he recommended the final acceptance be made by the Commission subject to a deduction of $4,387.44 on account of a deficiency in the thickness of the pavement over practically the entire work. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission approved the recommendation of the State Highway Engineer and authorized the acceptance of the Hope-Blairstown Road, Warren County, Motor Vehicle Aid, and final payment subject to a deduction of $4,387.44 for deficient concrete.

Springfield Ave

New Providence Road, Union County

State Highway Engineer Sloan reported the completion of core drill tests on Springfield Avenue-New Providence Road, Union County, Motor Vehicle Aid, and he recommended acceptance of this work subject to a deduction of $145.28 for a deficiency in the concrete pavement thickness on a small section of this work. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission approved the acceptance by the Commission of Springfield Avenue, New Providence Road, Union County, Motor Vehicle Aid, in accordance with the recommendation of the State Highway Engineer.

Tabernacle-Indian Mills Road

On recommendation of the State Highway Engineer, ,Commissioner Jelin moved the acceptance and authorized final payment on the Tabernacle-Indian Mills Road, Tabernacle Township, Burlington County. This was seconded by Mr. Kidde and adopted.

Moss Mill Road, Atlantic County

On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission approved acceptance and authorized final payment on the Moss

Mill Road, Atlantic County, Galloway Township.

Liberty Corner-Bernardsville Road.

On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission approved acceptance and authorized final payment on the Liberty Corner-Bernardsville Road, Bernards Township, Somerset County.

Great Creek Road, Atlantic County

On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission approved acceptance and authorized final payment on the Great Creek Road, Galloway Township, Atlantic County.

Cross Keys Road, Camden County

On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission approved final acceptance and authorized final payment on the Cross Keys Road, Berlin Township, Camden County.

Mill Street, Sussex, Sussex County

On recommendation of the State Highway Engineer, Commissioner Jelin moved the acceptance and final payment on Mill Street, Sussex, Sussex County, Motor Vehicle Aid. This was seconded by Mr. Kidde and adopted.

On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission adjourned at 6:45 P.M. to meet in regular session on Saturday, December 8th, at 10:00 A.M. in Atlantic City at Hotel Dennis.

Respectfully submitted,

A. LEE GROVER,

Secretary

DEC 8 1923

MINUTES OF MEETING - December 8, 1923.

A regular meeting of the State Highway Commission was held at the Hotel Dennis, Atlantic City, on Saturday, December 8, 1923. The meeting was called to order by Chairman Scott at 10:30 A.M.

Present: General H. L. Scott, Chairman, and Messrs. Walter Kidde, Percy H. Stewart and Abraham Jelin.

In addition, at the direction of the Commission, there had been invited to the meeting representatives of the Counties of Atlantic, Cape May, Cumberland, Salem and Gloucester, and also those favoring the establishment of additional State Highway routes in South Jersey. All of these representatives were present when the meeting opened, and are noted in these minutes.

The Chairman explained that the Commission had arranged this meeting to be held in Atlantic City in order to give the citizens of South Jersey an opportunity to be heard on matters concerning roads through the South Jersey counties.

Mr. Leeds, President of the Atlantic City Chamber of Commerce, was first requested to speak, and he arose to introduce Mr. Walter J. Buzby of Atlantic City, and former member of the New Jersey State Highway Commission, as the representative of all interests in Atlantic City. Mr. Buzby commended the activity of the State Highway Commission and spoke of the tremendous increase in the amount of traffic coming over the White Horse Pike to Atlantic City, and he urged as the recommendation of all people of Atlantic City that the White Horse Pike be widened to at least forty feet of driveway, which he felt would answer for present needs, but would not begin to take care of traffic when the Camden Bridge was opened. For this additional traffic, Mr. Buzby recommended another line of 20 or 25 feet, with a gravel space between, so that traffic could flow in one direction on each roadway.

Chairman Scott inquired as to whether the right of way would be expensive, and was informed that at the present time, the expense would be small compared to later when the built up sections would be spread. Mr. Buzby also offered the services of any organization in Atlantic City to assist in the securing of right of way along Route 3.

Mr. Buzby also presented before the Commission a map of the situation in Hammonton, and a suggestion for an alternate line through the Town of Hammonton, via Wilsey Mill Road, across Third Street, thence to the Pennsylvania Railroad, and along a paved street to the

DaCosta-Hammonton Road, and to Route 3. This was offered as a cheaper line than the widening of the Hammonton Section of Route 3 over Hammonton Lake.

Mr. Buzby expressed approval of any additional routes the Commission might lay out to the South Jersey shore resorts.

Mr. Stewart inquired of Mr. Buzby whether he did not feel that the traffic over the White Horse Pike was principally a commutor traffic, that is, one way at one time and the other way all at one time. Mr. Buzby stated that from his own observations, there was no time during the entire summer season that there was not a great deal of traffic in both directions at the same time. Mr. Jelin stated that he believed any widening beyond 30 feet would mitigate against other parallel roads or a connection with Cape May. Mr. Stewart also called attention to the fact that there is being carried twice the traffic of the White Horse Pike on the Lincoln Highway Section of Route 1.

Mayor Bader of Atlantic City, next addressed the Commission and urged that the White Horse Pike be widened to 40 feet, with some law compelling slow moving vehicles to keep far to the right. He also asked that a shoulder be put on the roadway for pedestrians. Mr. Kidde inquired whether the county authorities could do anything to put sidewalks along the White Horse Pike.

Judge E. A. Higbee, County Counsel for Atlantic County, advised that when the County acquires right of way for roads, it always secures sufficient for shoulders width and for future sidewalks, but the actual laying of sidewalks is up to the municipalities.

Mr. A. K. White of the Marlborough-Blenheim Hotel, stated that he believed a great number of people now refused to ride over the White Horse Pike, due to the delays involved in waiting at the Camden Ferries, and all of these would be added to the present traffic when the new Camden-Philadelphia Bridge is completed and opened. He also urged a two way traffic on two distinct roadways, with some separation between them such as a gravel stretch.

The Atlantic City hearing was closed by Mr. Buzby and he asked for consideration of the completion of Route 4. although it was not as important to Atlantic City as the widening of the White Horse Pike.

Atlantic County-Hearing

The next matter taken up for consideration was that of the County of Atlantic. Judge Higbee, as spokesman for the County Board of Freeholders, addressed the Commission in behalf of a larger apportionment of Motor Vehicle funds to Atlantic County to meet the increase in maintenance costs on roads. He also spoke of the benefits secured on gravel roads by treating with an application of calcium chloride, for laying the dust. He asked that the Commission allot to Atlantic County for 1924 the sum of $150,000.00 from its Motor Vehicle funds. In addition to the statements of Judge Higbee, there was submitted a communication from the Board of Chosen Freeholders of the County of Atlantic, requesting the sum of $150,000.00 for maintenance work. On motion by Mr. Kidde, seconded by Mr. Stewart the communication was ordered received and filed for consideration. In addition to Judge Higbee, there were present Mr. A. H. Nelson, County Engineer for Atlantic County, and members of the Atlantic County Road Committee.

Black Horse Boulevard Association

Mr. R. A. Russell, representing the Black Horse Boulevard to the Sea Association, as its President, was the next speaker to appear before the Commission. He headed a large delegation from his Association, and stated that the membership of the Association was 600. He explained the projected improvement urged by his Association extended from Camden to Mount Ephriam, Blackwood, Cross Keys, Downstown to Mays Landing, to the seashore, which would open up a section of South Jersey which is now out of reach. He mentioned the endorsements his Association had received from all the Boards of Freeholders in South Jersey and automobile clubs. He also mentioned endorsement of the Rotary, Kiwanis and Lions Clubs of Atlantic City. He called on Mr. Harry Snyder of Turnerville, to make a statement. Mr. Snyder addressed the Commission and advised that the line proposed was known as the Stage Route along the old Mt. Ephriam Pike. He stated that from Camden to Mays Landing is a distance of 38 miles. He urged the improvement of the Black Horse Pike as a relief route to the White Horse Pike, and asked that it be made of sufficient width to take care of future traffic.

Mr. Jelin inquired as to the amount of new pavement which would be necessary in the Black Horse Pike. He was informed that there would be 18 miles required through undeveloped country,where the property owners would be willing to give their land free.

Mr. Jelin inquired as to the features in connection with this route that would make it more desirable than some other route. Mr. Snyder stated that the Black Horse Boulevard would be 9 or 10 miles shorter to Atlantic City from Camden than any other route under consideration, and also the fact that the right of way would be provided in most part, and the construction work would be performed on high ground and not through marshland. Mr. Russel advised the Commission that practically all the property owners along the line of the Black Horse Pike were ready to donate their land to the State, and he called upon Mr. Fuller who had gone about to find out the feeling of the property owners.

Mr. Fuller eloquently outlined for the Commission the virtues of the Black Horse Pike in bringing the people through what is now an entirely undeveloped section of the State, and at the same time affording those farmers along the line of the road a chance to reach the main towns during the winter months, which it is now impossible to do.

Mr. Frank Pine, Assemblyman from Blackwood, New Jersey, next addressed the Commission in behalf of the Black Horse Pike, urging its improvement because of the fact that the White Horse Pike is so terribly congested.

Chairman Scott inquired whether he felt that the improvement of Black Horse Pike was the most important of all the means for relieving traffic in this vicinity. Mr. Pine stated that he did.

Commissioner Jelin inquired the reason for this statement and Mr. Pine's reply was that it is a shorter route than any other by about two miles.

The Chairman of the delegation stated that it was the purpose to have a bill introduced in the coming session of the Legislature which would make the Black Horse Pike part of the State Highway System and they would be very glad to have the indorsement of the State Highway Commission.

DEC 8 1923

Harding Highway

The next matter taken up for consideration was that of the Harding Highway, the designation given to the route from Pennsgrove to Atlantic City, which was adopted at the last session of the Legislature as a State Highway Route, over the Governor's veto. Senator Borton of Salem County, acted as Chairman of the delegation, which numbered fifty individuals, all of whom wore badges with "Harding Highway" imprinted thereon. Senator Borton addressed the Commission and exhibited upon a map the various lines of travel through South Jersey. He explained that the road from Pennsgrove to Atlantic City was made a State Highway at the last session of the Legislature and the delegation appeared to urge the State Highway Commission to take the same over as part of the System and improve the same with a hard surface. He urged the Commission to this end and introduced Mr. Keasbey, County Engineer of Salem County, to give more specific data on the route.

Mr. Keasbey appeared before the Commission and advised that of this route, there were 23.29 miles between Pennsgrove and the Salem County Line below Malage, and 5 miles between Malaga and Downstown in Gloucester County, not hard surfaced. He also explained that of the 23 miles in Salem County, 9 1/2 miles from Pennsgrove to Woods Tavern are hard-surfaced with sheet asphalt, amiesite and concrete. Mr. Jelin inquired whether they were considered good roads and Mr. Keasbey replied in the affirmative. Mr. Keasbey advised that the maintenance charges on the gravel sections of this road are very heavy since the gravel is in poor condition and unable to stand the traffic. He explained that this line would make a parallel road to the White Horse Pike, it being spoken of as the "Back Road to Camden" and being not much longer.

Chairman Scott inquired as to Mr. Keasbey's opinion in the event funds were not sufficient to do all the projects in South Jersey, which he considered to be the most imperative. Mr. Keasbey advised that the Harding Highway would furnish, in addition to another route from Camden to the seashore, the main line from Washington and the south to Atlantic City. He informed the Commission that the right of way was practically secured since the road is already in existence, and on which it needed only to have a concrete pavement placed.

Mr. Jelin inquired of the number of miles on the whole road at the present time which are not surfaced, and Mr. Keasbey advised that in all about 19 or 20 miles were needed to be surfaced through Salem County and Gloucester County.

Senator Borton called upon Mr. George Wilson, manager of the Ferry Company operated at Pennsgrove, to state how the traffic has increased over the ferry. Mr. Wilson addressed the Commission and stated that during the year 1912 when the ferry was first placed in operation, there were handled approximately 900 vehicles, the following year there were 3500 vehicles handled and in 1920 this jumped to 53,000 and in 1921 to 61,000 and in 1922 to 72,000. He also stated that in the eleven months of 1923 there were handled 90,881 vehicles, and it was estimated that the total would exceed 100,000 for the year 1923.

Commissioner Kidde inquired as to the number of vessels used in this service. Mr. Wilson stated that in the summer months when the heavy volume period began, three ferries were operated with a maximum of twenty-eight departures each way, the schedule being every hour each way, with boats in between when traffic required. He advised that the coming summer it was expected to operate from the new city terminal in Wilmington, and there will be four to five departures every two hours. He advised that the ferries average about 36 cars to a load.

Chairman Scott inquired of Mr. Wilson whether he could estimate the delays caused to traffic in view of the congestion at the ferry.

Mr. Wilson stated that the peak of delay was reached on Labor Day last when the volume was so heavy that there was a maximum delay of three or four hours. Mr. Wilson compared the traffic handled on Labor Day 1922 with Labor Day of 1923, and stated that in 1922 they handled 822 vehicles while on Labor Day 1923 they handled 1500, the rate charged being $1.00 for automobile and driver, with a charge for trucks of $1.00 per ton capacity, the distance covered by the ferry being between four and five miles, regulation ferry boats being used.

Mr. Borton next asked Mr. Cattell, County Engineer of Gloucester

County to speak to the Commission. Mr. Cattell addressed the Commission and stated that he was prepared with remarks covering both the Pennsgrove-Atlantic City Road and the Westville-Millville Road in Gloucester County. Hr presented each Commissioner with a map showing the line of each of these roads. He stated that from an engineering standpoint he believed the State Highway Commission was interested in determining how to accommodate the greatest amount of traffic at the least possible expense in view of the fact that the funds of the Commission are limited in the same way as the County funds are limited. He stated that the Westville-Malaga Road extends through more populated sections than other roads and connects with more improved roads as feeders. He stated it would not only accommodate traffic to Atlantic City by way of Philadelphia, but would also accommodate traffic to such cities as Wildwood, Avalon, Cape May, and other seashore resorts and furnish a connection with Route 14, which traverses the southerly end of the State. He presented an estimate of the cost of constructing both the Westville-Millville Road and the Pennsgrove-Atlantic City Road within the County of Gloucester, basing his estimate on the price of $42,000.00 per mile. On the Westville-Millville Road there are 11.62 miles in Gloucester County at a total cost with bridges of $502,040.00. On the Pennsgrove-Atlantic City Road there are 7.75 miles in Gloucester County and with bridges the total cost would be $331,500.00, these estimates being for a 20 foot roadway with 8 inch concrete. He suggested that Federal Aid could be applied on this road which would yield an additional $15,000.00 per mile to the State.

Mr. Borton next called upon Mr. Roscoe Ward, County Counsel of Cumberland County, to speak to the Commission on the Harding Highway. Mr. Ward spoke in favor of the Harding Highway and stated that all of Cumberland favored the construction of this road, and he also favored the Westville-Millville Route, since both of these lines would afford communication in and out of South Jersey to Philadelphia, New York and Atlantic City, which is now practically impossible to a great part of the district.

Mr. Borton next called upon Assemblyman Stiles, representing the Pennsgrove Chamber of Commerce. Mr. Stiles presented a resolution adopted by the Chamber of Commerce of Pennsgrove, approving of the completion of the Harding Highway.

Mr. Borton next called upon Mr. Jemes Sparks, Assistant County Counsel and President of the Salem Chamber of Commerce. Mr. Sparks spoke of the progress that would come to South Jersey and the relief to traffic which would occur if the Harding Highway was constructed. He advised that the construction of this road would give impetus to the construction of a South Jersey port at Salem and that the matter would be presented to the next congress when it went into session. He presented a resolution from the Salem Chamber of Commerce requesting the State Highway Commission to take over the Harding Highway as soon as practicable and complete the same with concrete.

Addresses were also made by Mr. William Richaner and former State Highway Engineer Wasser in behalf of the Harding Highway. Mr. Wasser specifically urged consideration in view of the fact that it was just as essential to open territory in South Jersey as in any other part of the State. Mr. John Weldon of the Salem County Board also spoke on this matter.

Westville-Millville Highway

The matter of the Westville-Millville Road as broached by Mr. Cattell was next discussed before the Commission by Mr. A. R. Kohler of the Board of Freeholders of Gloucester County, who urges consideration of this route by the Commission at the earliest date possible.

Chairman Scott inquired of Mr. Kohler as to which one of the routes suggested before the meeting, he would consider the Commission should take up for early action. He stated that in view of the fact that the Westville-Malage Road would accommodate the most people and has the most population along the line, that it should be earliest considered, and he also felt that fully one-third to one-half of the traffic on the White Horse Pike would take this road.

Mr. Howard Hitchner, Secretary of the Woodstown Chamber of Commerce, presented a resolution to the Commission, approving the Harding Highway, and asked early consideration for the same.

The Commission next considered the problems of Cumberland County and called upon Senator Reeves for a statement. Senator Reeves advised that there were a number of people who desired a hearing on Camden County road matters, and he called upon Mr. A. R. Slade of

Millville, New Jersey. Mr. Slade addressed the Commission and stated that he would urge the completion of the Westville Line to Millville, in order that traffic might reach Route 15.

Mr. John Horton, City Clerk of Millville, next spoke, representing a large organization of business men and business officials of Woodbury, asking for the completion of the Westville-Millville Road. He advised that at the present time there were a number of State Institutions in Vineland to which there would be furnished access in the event this was completed, and below Millville there is a State Prison Farm. He stated that this line would make a splendid relief road for the White Horse Pike which now taken considerable amount of travel bound for the southern part of the State.

Senator Reeves asked former Senator Sturgess of Gloucester County to make a statement. Mr. Sturgess spoke very highly of the projects for opening uo the territory in South Jersey, and urged especially the improvement of the road from Westville to Millville and also the Harding Highway because of the fact that these roads not only furnish the means for relief to the White Horse Pike, but at the same time provided highways for the greatest part of the population of South Jersey. He felt that the road from Glassboro to Millville and from Malaga to Downstown would relieve the White Horse Pike considerably.

The next one called upon was Mayor Courtright Smith of Wildwood, who stated that the City Counsel of Wildwood was favorable to the paving of the line from Westville to Millville because of the fact that it is only by connecting up Route 15 with the road in Gloucester and Salem, that Cape May County will be benefitted.

The next speaker was Mr. Samuel Leeds of Atlantic City, who expressed interest in the figures given of the growth of traffic on the Pennsgrove ferries. He also enlightened the Commission of the fact that the seacoast has an assessed valuation of $300,000,000, of which two-thirds is in Atlantic City, and he expressed favorable opinion as to any other routes which the State Highway Commission might designate through South Jersey as stimulating the progress of that section of the State. Senator Reeves thanked the State Highway Commission for the courtesy of the hearings and closed the Cumberland

County part of the program.

Cape May County and Lewes Ferry

The next matter given consideration by the Commission was that concerning the highway situation in Cape May County, and also the Cape May-Lewes Ferry. Senator Bright headed the delegation from Cape May County and acted as spokesman. He pointed out the fact that the County of Cape May has assessed values in excess of the counties of Cumberland and Salem and Gloucester, and was very close to that of the County of Burlington, and that the County of Cape May is practically Number 10 in the range of counties in the State of New Jersey. He outlined for the Commission the value of the shore resorts in Cape May County and their bearing upon the wealth and prosperity of the State as a whole, and he accredited any increase in wealth in Cape May County to the construction of good roads and he said that he would vote affirmatively on any other bond issue, even larger than that of the past, which would permit the building of additional highways connecting one part of the State with another. He stated that he felt that the $40,000,000 bond issue should be applied only to the State Highway System as existing in 1922, without taking into consideration the problems at Jersey City and Camden and on the shore routes, for which he felt additional money should be provided for. He also stated that for those additional routes which the Legislature had adopted during the 1923 session, additional funds should be provided. He asked that the Commission give consideration to the completion of Route 14 from Tuckahoe to Marshall's Corner, a distance of 7 1/4 miles.which will complete the Highway System through Cape May County up to the Atlantic County Line. He also informed the Commission that no work has as yet been done on the Cape May Section of Route 15, which he felt was just as essential as any other part of the County. He also stated that the section of Route 6, between Salem and Bridgeton should be completed as soon as possible in order that Route 15 might join up with these communities at some later time. Senator Bright stated that he was also interested in a bridge across from Somers Point to Beesley's Point, but inasmuch as this was of the secondary system, it should not be considered until funds are provided. He also requested that the Commission consider the Cape May-Lewes Ferry to relieve congestion over highway routes in this State. He stated that the Cape May-Lewes Ferry would open up the county of Cape May as part of a National Highway System, instead of it being the dead end part of New Jersey. He asked Mr. Leeds of Atlantic City to speak in behalf of the Cape May-Lewes Ferry.

Mr. Leeds addressed the Commission and stated that he was pleased to give his support to the movement for the completion of the Cape May-Lewes Ferry.

Mr. Luther C. Ogden next addressed the Commission on behalf of the Cape May-Lewes Ferry and stated that the matter was very vital to the welfare of his county. He explained with a map the method of travel which would be used by people coming up to New York and to Atlantic City from the south, which would be by way of the Cape May-Lewes Ferry. He stated that some years ago transportation was provided by ferry across this point and this could not survive in view of the fact that the corporation was not strong enough. He stated that he would provide information concerning this ferry operation if the Commissioners so desired.

Senator Bright next called upon Mr. Buzby of Atlantic City to make a statement. Mr. Buzby stated that he was in favor of any method by which the tourist traffic from the south could come to Atlantic City and to Cape May County.

Judge Eldridge was next called upon by Senator Bright and he stated that the people of Cape May are all in favor of the Delaware to New Jersey Ferry, and stated that he represented the Progressive League of Cape May, with a membership of 325 and all interested in the development of Cape May County. He stated that the very fact that at the present time there are delays of as high as two and three hours in crossing the ferry at Pennsgrove, it would indicate that there is room for additional ferry service in New Jersey .

The next speaker was Joseph Champion, Director of the Board of Freeholders of Cape May County, who also explained the value of the construction of Cape May-Lewes Ferry and the completion of Route 14. in the County of Cape May.

An address was made by Hon. Robert J. Kay. Hr urged the completion of Route 14 and Route 15 in Cape May County, in view of the fact that Cape May County has not urged too great expenditure by the State in the County, and any of the roadways placed in the county were of great assistance in relieving traffic generally throughout the State.

County Engineer C. Fendall Smith also addressed the meeting in favor of the Cape May-Lewes Ferry project. He urged the State Highway Commission to relieve the County of Cape May from the maintenance cost on Route 15, which was costing the county between $500.00 and $2500 per mile to maintain.

Chairman Scott called the attention of the CapeMay delegation to the fact that the State Highway Commission had appointed a Committee of its membership, together with the State Highway Engineer, to study the situation in Cape May County covering the Cape May-Lewes Ferry, and this Committee would be very glad to receive any facts concerning the Cape May-Lewes Ferry situation, and he requested from Senator Bright which route of all those discussed before the Commission in the various counties for the relief of traffic, would be most desirable from his viewpoint. Senator Bright stated that he, of course, was more particularly favorable to Cape May County, and he felt that as far as the question of completing the Highway System in Cape May as against the completion of the Cape May-Lewes Ferry is concerned, he would favor the completion of the Ferry first.

Chairman Scott also called attention to the fact that under the law the State of New Jersey cannot proceed with an Inter-State proposition such as this would be without a fifty-fifty arrangement on the part of Delaware, ~~which~~ and it was understood that that state had only authorized the expenditure of $30,000.00 up to this time. He also stated that the Highway Commission felt that it was primarily a road building board and not an operating board for steamship lines, and he inquired whether it would be agreeable to the people of this State if the Highway Commission would build the docks and approaches and necessary buildings on the New Jersey end and Delaware upon its end, and leave the navigating to some company to which the privilege might be leased.

Senator Bright stated that this would be a matter for decision at a later date, and that he did not believe that the Highway Commission was an operating board, although the Palisades Inter-State Park Commission owns and controls the operation of steamboat lines on the Hudson River. He further stated that he did not believe the people would object if the State of New Jersey saw fit to allow a private individual to handle the ferry boat control, except that some supervision should be carried by the State as to the rate of fare which should be charged motorists and passengers using the ferry. Chairman Scott stated that the matter would be carefully looked into, and that a conference would be held with the State of Delaware.

Commissioner Stewart made a request that Mr. Ogden get all the facts in connection with the former operation of ferries on this location and send same to the Special Committee in order that some idea might be gained as to the type of boats operated at that time.

Commissioner Jelin inquired as to whether any investigations had been made concerning approaches and roads in the State of Delaware. Senator Bright advised that he understood that the State of Delaware had commenced the building of a road to Lewes.

New Routes

The next speaker was Mr. O. E. Eckland of the South Jersey Automobile and Good Roads Association, who stated that he appeared to direct the attention to the expenditure necessary for the reconstruction of the Buena-Tuckahoe Section of Route 15, this road being a straight strip of 15 miles. The completion of this section, he stated, would save from 8 to 10 miles of the journey from Buena to Tuckahoe by way of Mays Landing, and would make a direct shortened route from Camden to the South Jersey resorts, such as Sea Isle City and Cape May. He presented his arguments in writing and the Chairman requested that the same be received and placed on file for consideration.

On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission recessed for luncheon at 2:00 P.M. to meet in regular session again at 3:00 P.M. The meeting was resumed again at 3:00 P.M. as agreed with the same members present as at the morning session.

New Routes

Mr. Frank Fisher appeared before the Commission and presented a plan representing the Automobile Club of Atlantic City, which he said was the beginning of the Good Roads Association of New Jersey. He called attention to a route which would relieve the White Horse Pike, which would take traffic direct to the south from Camden to Tuckahoe, and the construction of the twelve miles of road would furnish all relief needed at this time.

Salem County-General

The Commission next considered the question of county requirements in Salem County and Mr. Keasbey, County Engineer, advised that the county was very desirous of the completion of the road from Clinton to Marlboro to Bridgeton, and also the Harding Highway. He further inquired as to the reason for the Fenwick Creek Bridge not being lighted by the State. Chairman Scott advised that the recommendation of the State Highway Engineer in this connection was that no lights be placed on this bridge in view of the fact that there were street lamps all around and on the bridge and also in view of the fact that if a precedent were established by placing lights on this bridge, there were hundreds of bridges throughout the State on which the State would have to provide lights. Mr. Keasbey also requested that the Commission consider granting State Aid on the Carll's Corner road between Bridgeton and Vineland which the county proposed to complete this year with county funds.

The delegation from Cumberland and Cape May Counties advised that they would submit their county problems in writing to the Commission.

Commissioner Kidde requested that all the displays used in connection with the Good Roads Association Convention held at Atlantic City, together with charts, be arranged in form in order that they might be used for reference by the State Highway Commission.

On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission meeting adjourned at 4:00 P.M.

Respectfully submitted,

A. LEE GROVER,

Secretary

DEC 11 1923

MINUTES OF MEETING - December 11, 1923.

A regular meeting of the State Highway Commission was held at the offices of the Commission, Broad Street Bank Building, Trenton, New Jersey, on Tuesday, December 11, 1923. The meeting was called to order at 11:00 A.M. by Chairman Scott.

Present: General H. L. Scott, Chairman, and
Messrs. Percy H. Stewart, Walter Kidde and Abraham Jelin.

Commissioner Kidde reported having read the minutes of the meeting of November 13th and moved that the same be approved as mailed to each member of the Commission. This was seconded Mr. Mr. Jelin and adopted.

Middlesex County Hearing

The Secretary reported that a hearing had been requested by the Middlesex County Board of Freeholders with reference to Motor Vehicle apportionment for 1924. There appeared Freeholders Haight, Quackenbush, Vandenberge and Dr. Beloff. Mr. Haight advised that the County of Middlesex was preparing its budget for 1924 and was desirous of ascertaining the amount of Motor Vehicle apportionment which would be allotted to Middlesex County for 1924. The Chairman informed the delegation that the Commission intended taking up the matter of the apportionment of Motor Vehicle funds at the afternoon session of this day's meeting, and that the county would be informed of the action taken. State Highway Engineer Sloan, in view of the appearance of the Freeholders of Middlesex County, directed attention of the Commission to a report from Assistant State Highway Engineer Reed, advising that the sum of $19,916.40 has not yet been paid Middlesex County on its 1923 Motor Vehicle Schedule, due to the fact that he feels that the work has not been done in a satisfactory manner and for this reason has not been recommended for payment. Assistant State Highway Engineer Reed had also reported that the method employed by Middlesex County in taking care of its maintained work was not a satisfactory one, since each Freeholder was responsible for the roads in his particular territory while the County Supervisor of Roads was not held strictly accountable for the maintenance in the county. He recommended that the Supervisor be placed in complete charge of all county maintenance work. Mr. Haight informed the Commission that he had been advised by Assistant State Highway Reed that the County Officials would be invited to accompany Mr. Reed to

Bergen County in view of the results obtained there under the County Supervisor of Roads with the type of road and traffic similar to that in Middlesex County. Commissioner Kidde advised the Freeholders that this ~~was a very good idea~~ and that the State Highway Commission considered Bergen County the "Blue Ribbon" county of the state as regards the maintenance of county highways.

Road to Institution

Mr. Vanderberge asked that the Commission take over for Maintenance the road leading to the State Home in Jamesburg, this road being one mile in length and built at the county expense. Following the departure of the Middlesex County Freeholders, the Commission entered into a discussion as to the payment to Middlesex County of the $19,916.40 on work which they claimed complete in accordance with the schedule and vouchers submitted. Assistant State Highway Engineer Reed advised that while the work may have been done, there was not the proper organization in the county to do the work economically or efficiently, nor had the proper results been obtained upon money expended up to this time. After further discussion, Commissioner Kidde moved that Assistant State Highway Engineer Reed and Commissioner Jelin appear before the Board of Freeholders of Middlesex County, and offer the following suggestions to them from the State Highway Commission:

First, that the State Highway Commission would urge the Board of Chosen Freeholders to concentrate the responsibility for its road maintenance in a Supervisor who would have complete charge of the work for 1924.

Second, that the State Highway Commission ~~shall~~ will insist upon certain of the poorly repaired roads being put in good shape, the State Highway Commission will with its own forces, if satisfactory to the county, do such maintenance work as is necessary and charge the maintenance cost against the balance due the county. This was seconded by Mr. Stewart and adopted.

Cape May-Lewes Ferry

Special Committee Appointment

The Secretary informed the Commission that Chairman Scott had appointed as a Committee with the State Highway Engineer, for the investigation of the Cape May-Lewes Ferry, Commissioner Kidde and Commissioner

Jelin, and he presented this information to the Commission at this time in order that the names might go into the records.

Hunterdon County Request

The Secretary presented to the Commission a communication from the Hunterdon County Board of Freeholders, requesting a hearing before the State Highway Commission on Hunterdon County Road matters. On motion by Mr. Jelin, seconded by Mr. Stewart, the Commission authorized a hearing to be granted to Hunterdon County at its next meeting.

Route 12, Section 2.

The Secretary presented a communication from Albert J. King, Esq. representing the Oak Ridge Construction Company, contractors on Route 12, Section 2, Morris County, requesting a hearing before the State Highway Commission, with reference to final payment on the contract. On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission directed that the Secretary notify Mr. King that the Commission has already placed itself on record concerning this work and will stand upon the action as taken.

Route 17 - Taking Over

The Secretary presented to the Commission a communication from the Board of Chosen Freeholders of Bergen County, together with a transcript of the hearing taken at Hackensack on December 3d, on the matter of the taking over of Route 17 from Newark to the New York State Line. The communication urged the State Highway Commission to take over Route 17 as soon as possible in order that the county may be relieved of the high maintenance cost as applied on this road, and requesting that the county be informed of the State Highway Commission's action before preparing its budget for next year's road maintenance. Commissioner Kidde stated that he felt that the Commission had committed itself to a promise to take over Route 17 in Bergen County, although there was no commitment as to the line through East Rutherford and Rutherford, where there was some question between the municipalities. Commissioner Stewart raised the question as to whether or not any action in taking over a new route at this time would not be giving preference to one county over another. Commissioner Jelin stated that Route 17 was the only route officially approved by the Governor at the last session of the Legislature, all others having been passed over the Governor's veto, and from the great amount of travel that was present on Route 17, the State Highway Commission was duty-bound to take over all or a section of the said route. After further discussion, Commissioner Kidde moved the adoption of the following resolution:

WHEREAS, under Chapter 5 of the Laws of 1923, there was defined State Highway Route 17, from Newark by way of Kearney, Rutherford, Hackensack, Ridgewood and Ramsey to the New York State Line, and

WHEREAS, there was held a public hearing on December 3d, 1923, in accordance with the law thereunto appertaining, preliminary to the taking over the said route, or part thereof, as a State Highway.

NOW, THEREFORE, BE IT FURTHER RESOLVED, that the State Highway Commission does hereby take over for [illegible] ~~further~~ Maintenance, effective January 1, 1924, that portion of State Highway Route 17 from the northerly limits of the City of Hackensack to the New York State Line, at or near Suffern, in accordance with the provisions of Section 3, Chapter 14, Laws of 1917.

This was seconded by Mr. Jelin and adopted.

On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission directed that the County of Bergen be notified of the action taken in the taking over of a portion of State Highway Route 17, and that they be advised that the State Highway Commission is studying the remaining section southerly from Hackensack to the Essex County Line as to its alignment before taking any action thereon. X

Route 17-Taking Over

The Secretary presented a resolution from the Town of Kearney, New Jersey, objecting to the proposed line for Route 17, through Kearney. On motion duly seconded, the communication was ordered received and the Secretary was directed to notify the Town of Kearney that the Commission is still considering the alignment southerly from the Town of Hackensack on Route 17.

Route 20, West Berlin-Haddonfield

The Secretary presented a communication from former Senator Jos. F. Wallworth of Camden County, requesting the Commission to give consideration to the improvement on Route 20 from West Berlin to Haddonfield and to the Delaware River Bridge. On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission directed that the communication be received and Senator Wallworth be informed that the State Highway Commission is now studying the entire matter of additional State Highway routes, and when Route 20 is taken up for consideration, the Commission will be very glad to meet with Senator Wallworth and go over the situation.

Robbinsville-Crosswicks Creek Road

The Secretary presented a communication from the Mercer County Board of Freeholders, forwarding a resolution requesting aid from the State on the Robbinsville-Crosswicks Creek Road as a connecting link between Route 1 and 2, without passing through the City of Trenton. On motion by Mr. Stewart, seconded by Mr. Kidde, the State Highway Commission directed that the communication be received and the county be informed that the State Highway Commission at the present time has no funds from which this work might be done and regretted that this condition existed.

Attorney General's Opinion on Additional Routes

The Secretary presented an opinion from the Attorney General advising that he sees no objection to the State Highway Commission constructing an additional route as a State Highway between intermediate points as designated for any particular section, as defined in the Statute. Commissioner Stewart questioned the Secretary as to whether the Attorney General was aware of the proposed line between Perth Amboy and Asbury Park, and whether it was clearly presented to the Attorney General that this proposition would construct two complete highways between two points on the State Highway System. The Secretary informed the Commission that he had himself presented to the Attorney General's Department, maps covering the work of the Advisory Board on Shore Route traffic and he had personally explained the conditions to the Attorney General and that the entire project was before the Attorney General at the time his opinion was written. On motion by Mr. Stewart, seconded by Mr. Kidde, the State Highway Commission directed that the Opinion of the Attorney General be received and spread in full upon the minutes.

DEC 11 1923

November 7, 1923.

Hon. Thomas F. McCran,
Attorney-General,
State House,
Trenton, N. J.

Dear Mr. McCran:

I am directed by the State Highway Commission to respectfully request your opinion as to whether the State Highway Commission may construct highways for two lines of traffic touch the intermediate points as called for in the legislation defining the routes.

Your opinion as to this matter is desired on account of the fact that the traffic congestion on many of the highways is becoming a very serious question, necessitating a division of the same at many points.

Shall you desire information as to the specific points in question, I will be very glad to come to your office and discuss the matter in more detail.

Very truly yours,

A. Lee Grover,

Secretary.

Trenton, N.J.,November 28, 1923.

A. Lee Grover, Secretary,
State Highway Commission,
Broad Street Bank Building,
Trenton, New Jersey.

Dear Mr. Grover:

I am replying to your letter of recent date, in which you ask to be advised as to whether the State Highway Commission may construct highways for two lines of traffic to comprise a single highway where the two lines of traffic touch the intermediate points as called for in the legislation defining the routes.

The Legislature has provided in section 1 of Chapter 14, with its various amendments, that the Commission may lay out, open, and improve new roads over acquired rights of way, and may also lay out routes in continuation of, connecting with, or in addition to the routes specified in the section.

I, therefore, see no objection to your Commission constructing an additional route as a State Highway between intermediate points as designated for any particular section as defined in the statute.

Very truly yours,

Thomas F. McCran,

Attorney-General.

Commissioner Kidde stated that in view of the opinion received from the Attorney General, the Commission should take steps to complete the necessary engineering work on the Shore Route report of the Advisory Board, and he moved that in the matter of the report of the Advisory Board covering Shore Routes, that the State Highway Engineer be authorized to proceed with the necessary preliminary surveys and preparation of construction plans, the same to be presented to the State Highway Commission in order that steps might be taken to complete the work. This was seconded by Mr. Stewart and adopted.

Proposed Extension-Route 1

Commissioner Kidde inquired as to whether it would be possible for the engineering forces to be organized to undertake the engineering duties in connection with the proposed extension of Route 1 from Elizabeth through Newark and Jersey City. Commissioner Stewart voiced the opinion that before anything was done relative to the Vehicular Tunnel routes that all legal phases of the matter be clearly defined by the Attorney General and he moved that the State Highway Commission request an opinion from the Attorney General in view of the fact that the passage of Chapter 199 of the Laws of 1923, leaves the Commission in doubt as to whether it is authorized to construct a highway from Jersey City to Elizabeth, and further the State Highway Commission desires information as to whether the $40,000,000 is available for the purpose of constructing such a highway. This was seconded by Mr. Kidde and adopted. In further reference to the above resolution, Commissioner Stewart directed that the Secretary present the Attorney General with a map of the proposed route as outlined by the Vehicular Tunnel Advisory Board.

Route 11, Main St., Clifton

The Secretary presented a communication from Hon. Wm. V. Negus, Assemblyman from Passaic County, regarding the surface pavement on Route 11, Main Street, Clifton, stating that while it may be wisdom to seek a cheaper price for the work, that this part of Clifton is the actual retail center of the City and store-keepers are facing ruin because of their inaccessibility to traffic. The State Highway Commission expressed the feeling that Mr. Negus was right in his contention that the storekeepers were being embarrassed by the long delay, but they did not feel that the delay could be placed at the doore of the State Highway Commission. After discussion, Commissioner Stewart moved that a communication be forwarded to Assemblyman Negus, a copy to be transmitted to the Paterson Evening News, which had requested a statement from the State Highway Commission, advising that from the records of the State Highway Commission, this matter was first taken up when the contract was presented by Passaic County for approval by the Commission, at which time the State Highway Commission was determined to reject all bids and direct the County to readvertise the work. The suggestion was made at the time by the State Highway Engineer that if the County was willing to proceed with the construction of the base, the Commission may consider the approval of the base construction, leaving the surface pavement to be considered after readvertisement in the spring. Approval of the plan was expressed by the County Board of Freeholders and it was on this basis that the State Highway Commission permitted the work to proceed on the base, it being their feeling that the objection to the contract was the high charge for asphalt pavement, similar work having been performed in other counties at a price of between $1.35 and $1.70 per square yard, while the price indicated in this contract was $2.07 per square yard. There was no further discussion on the matter of the contract for Main Street until the next meeting of the Commission, when a delegation from the Board of Freeholders of Passaic County appeared with a claim for the paving of one-half the street on which the concrete base had been installed. The State Highway Commission suggested to the Board of Freeholders that if it was deemed essential to complete this work at the present time that an emergency be declared and emergency bids advertised for the said asphalt pavement. Up to this time no word has yet been received from the County Board of Freeholders on the matter and the State Highway Commission, while expressing regret at the inconvenience and loss caused, feels that any such cannot possibly be laid at the door of the State Highway Commission, since they are prepared at any time to approve a price for the surface pavement on this section of road which is reasonable and in accord with the prices prevailing this year throughout the State. This was seconded by Mr. Jelin and adopted.

On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission adjourned for luncheon at 1:00 P.M. to meet in regular session again at 2:00 P.M. The Commission reconvened at 2:00 P.M. as agreed, with the same members present as at the morning session.

Route 4, Grade Crossing Elimination

The Secretary presented a communication from the Kiwanis Club of New Brunswick, urging the elimination of the grade crossing at Morgan on Route 4. On motion by Mr. Jelin, seconded by Mr. Stewart, the communication was ordered received and the Secretary was directed to notify the Kiwanis Club of New Brunswick that the elimination of the Morgan Grade Crossing is one of the matters already under consideration by the State Highway Commission.

Route 5, Madison-Chatham

The Secretary presented a communication from Joseph M. Tuttle, Esq. offering a suggestion for remedying the dangerous condition of the road between the trolley tracks from Madison to Chatham on Route 5 in Morris County. The suggestion was offered that one of the Inspectors of the State Highway Commission ask the Judge, under whose jurisdiction the receiver for the trolley company on this road acts, to ride over this portion and ascertain for himself the dangerous conditions existing in order that he might authorize and direct the repair and to apply for the issuance of receivers certificates in sufficient amount to make enough repairs to the most dangerous spots. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission directed that the communication be acknowledged and that a copy of the same, together with a letter of transmittal be forwarded to the Judge having jurisdiction over the bankrupt Morris County Traction Company, through Madison and Chatham.

A. G. A. Signs

The Secretary presented a communication from the Pennsylvania Railroad, requesting removal of A. G. A. sign on Route 14 near the Wildwood Junction Station, which conflicts with a newly installed automatic signal of the company. On motion by Mr. Kidde, seconded by Mr. Jelin, the communication was ordered received and referred to the Public Utility Commissioners with the request that the matter be investigated, and orders be issued to the State Highway Commission for such changes as the Public Utility Commission might direct.

Flemington-Clinton Road ✓

The Secretary presented a communication from Mr. F. H. C. Pfeiffer of Middle Valley, N.J., suggesting the adoption of a direct route from Flemington to Clinton. On motion by Mr. Jelin, seconded by Mr. Kidde, the communication was ordered received and the Secretary was directed to notify Mr. Pfeiffer that the road in question is under county jurisdiction and not part of the State Highway System.

Cedar Bonnet Bridge

The Secretary presented a communication from the Sherzer Rolling Lift Bridge Company, requesting consideration of its designs for the construction of Cedar Bonnet Bridge over Manahawken Bay. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission directed that the Secretary notify the Sherzer Rolling Lift Bridge Company that the matter of the type of construction for the Cedar Bonnet Bridge had only recently been determined upon receipt of competitive bids held and that the work is not advertsied for construction.

Amboy Bridge-New

The Secretary presented to the Commission an opinion from Assistant Attorney-General Newcorn on the matter of the award of contract for the new Amboy Bridge, Federal Aid Project #20, in which opinion Judge Newcorn advised that the State Highway Commission had the necessary authority for the award on the basis of the low bid price submitted on the blue print of the State Highway Engineer, and that the State Highway Commission was authorized to place such sidewalks on the bridge as were necessary for the convenience of pedestrians over the bridge. State Highway Engineer Sloan informed the Commission that he had recommended at the last meeting of the Commission that award of contract be made to the low bidder, Stillman-Delehanty-Ferris Company of Jersey City, at their's the lowest bid of $3,702,921.97. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission directed that the opinion of the Attorney General, together with the request for the same be written as part of the minutes of this meeting.

December 10, 1923.

Mr. Thomas F. McCran,
Attorney General, State of New Jersey,
Trenton, New Jersey.

My dear Mr. McCran:

I am directed by the State Highway Commission to respectfully request your opinion as to the following questions in reference to the matter of the award of contract for the construction of the new bridge over the Raritan River, between Perth Amboy and South Amboy.

1. Bids were received for the construction of this bridge on the 27th day of November, 1923. There were three bids received. The first item on which bidders submitted figures in each case was a lump sum price for the clearing of the site, and there is submitted herewith blue print of tabulation showing the various bids received. In the case of the low bidder, Stillman-Delehanty-Ferris Company, the price bid for

the first item as stated in numerals was $40,973.00, whereas the written words covering this same amount read $4,973.00. Whichever amount is used covering this first item in the Stillman-Delehanty-Ferris Company's bid, their bid is still the lowest of those received. Your opinion is requested as to whether the State Highway Commission may accept the bid of Stillman-Delehanty-Ferris Company, in view of the discrepancy above stated, and in the event of their accepting said bid, whether the written words or the numerals shall govern, as to the amount to be paid for this item of work.

2. The plans and specifications prepared covering the work to be done in the construction of the Perth Amboy bridge, provide for the construction of sidewalks. There is submitted herewith plans of the bridge, showing the details of such construction and also photographs and a sketch showing the sidewalks leading up to the present Perth Amboy bridge.

On the present Perth Amboy Bridge structure property there are no sidewalks, but as shown by the photographs, sidewalks do exist on the streets leading up to the bridge, to a point immediately adjacent to the beginning of the bridge. The areas designated as sidewalks operate not only to provide a way for pedestrian traffic, but also are used for the carrying of ducts, which carry the electric wires and cables used for operating and lighting the bridge, and the curb and rail in connection with same serve as a buffer which protects vehicular traffic from running into the rail of the bridge and into the river. Likewise, the presence of this area which is designated as sidewalk, by affording a space for pedestrian travel, removes such travel from the space devoted to the vehicular travel, which permits a greater capacity for vehicular travel, than would otherwise obtain, it being a fact that if such pedestrian travel were not taken care of on sidewalk area, the area given over to vehicular travel would have to be made wider. In the above reasons, consideration has not been given to the further important consideration of the great danger to both pedestrian and vehicular traffic, if the same are permitted to occupy the same area. Attention is called to the fact that the whole of the structure, both driveway and sidewalk area, are on state property, and that the construction of such sidewalks would in no way enhance the value of any private abutting property. The bridge, affording as it does the only means of communication between comparatively large centers of population, and being on a direct through route of a heavily travelled State Highway, there is bound to be in addition to the heavy vehicular travel, a very considerable travel by pedestrians and provision for them would seem to be an essential consideration.

In view of all the above considerations, the Commission feel that the sidewalks should be incorporated in the construction of this bridge. The plans as prepared are practically identical with those approved by the previous State Highway Commission, which would indicate that their opinion in the matter was the same.

It is now requested that you advise this Commission as to whether or not a contract can be let for the construction of this bridge under the plans and specifications as now drawn and under the bids which have been received for the construction thereof.

Very truly yours,

A. Lee Grover,

Secretary.

DEC 11 1923
2783

Trenton, N. J., Dec. 11, 1923.

Mr. A. Lee Grover,
Secretary, State Highway Commission,
Broad Street Bank Bldg.,
Trenton, N. J.

Dear Sir:

This is to acknowledge receipt of your letter of the 10th instant, submitting to this Department two questions in re the award of the contract for the construction of the new bridge over the Raritan River between Perth Amboy and South Amboy, the first being whether the State Highway Commission may accept the bid of Stillman-Delehanty-Ferris Company, in view of the discrepancy in the price bid for the first item, to wit, a lump sum price for the clearing of the site, which bid, in numerals was $40,973.00, and the written words covering the same item reading at length $4,973.00, and in the event of their accepting said bid, whether the written words or the numerals shall govern as to the amount to be paid for this item of work.

The second question submitted for an opinion sets forth that the plans and specifications prepared covering the work to be done in the construction of the Perth Amboy Bridge, provide for the construction of sidewalks, and you request advice as to whether or not a contract can be let for the construction of this bridge under the plans and specifications as now drawn, and under the bids which have been received for the construction thereof (sidewalks).

1. Replying to the first query, I desire to state that if the bid of the Stillman-Delehanty and Ferris Company is the lowest price bid for the entire work over all other bidders, using the item of $40,973.00 for the work of the first item as expressed in the numerals, it is unnecessary to readvertise for bids, as none of the other contractors who submitted bids would be affected by the error contained in the Stillman-Delehanty and Ferris Company bid, and the disposition of the matter simply lies between the State Highway Commission and the successful bidder.

2. The rule of construction of contracts is that where there is a discrepancy between the written statement of an amount and the numerals, the written statement controls. Therefore, if the Stillman-Delehanty and Ferris Company accepted the bid, the written words set forth in their estimate would control.

Replying to the second query submitted as to the right of the State Highway Commission to award the contract upon the plans and specifications proposed, which contemplate the construction of sidewalks on the bridge proper, I desire to state that no authority vests in the State Highway Commission for the construction of sidewalks upon any highway, which sidewalks are contiguous to the property of private owners. The State has delegated, by a special provision, to the municipalities the right to compel private property owners to lay sidewalks adjacent to their properties.

Chapter 14 of the Laws of 1917 defines what constitutes a highway, as being any public right of way, whether opened or improved or not, including all existing factors of improvements, and the State Highway System is defined as all highways included in the routes set forth in the Act and others added thereto, including all bridges, culverts, and such necessary gutters and guard rails along the route thereof.

Chapter 15 of the Laws of 1917 vests in the Commission certain powers, none of which, however, refer to the laying of sidewalks. Section 12, however, does say "to do and perform whatever may be necessary or desirable to effectuate the object and purposes of this Act", and that the powers are to be liberally construed.

The bridge in question as laid out, contemplates the use of the same by vehicles and pedestrians. There is no limitation in the Act itself as to how the bridge shall be constructed. Therefore, it would be within the power of the Highway Commission, in the interests of the safety of the users of the bridge, when constructed, to segregate the pedestrians from the vehicular traffic. This might be done by laying sidewalks. It might be done by the construction of a viaduct over the bridge, which would permit the use of one tier by vehicular traffic and the other by pedestrians.

I am, therefore, of the opinion that the State Highway Commission is within its rights in awarding the contract according to the plans and specifications submitted, which provide for the construction of sidewalks upon the bridge proper. This power, however, is not to be construed as conferring power upon the State Highway Commission to lay sidewalks along highways other than bridge.

Very truly yours,

William Newcorn,

Ass't. Attorney General.

Commissioner Kidde, therefore, moved the adoption of the following resolution:

> BE IT RESOLVED, that the State Highway Commissior does hereby make award of contract for the construction of the Amboy Bridge-New, Federal Aid Project #20, to Stillman-Delehanty-Ferris Company of Jersey City, New Jersey, at their's the lowest bid submitted, amounting to $3,702,921.97, and
>
> BE IT FURTHER RESOLVED, that the Chairman is authorized to sign the necessary contracts after approval by the State Highway Engineer.

This was seconded by Mr. Jelin and adopted.

On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission directed that the check of the second low bidder on this work be returned with the thanks of the Commission for courtesies extended.

Chairman Scott advised the Commission that upon special call it was necessary for him to go to Washington at this time and he left the meeting. Commissioner Kidde moved that Commissioner Stewart act as temporary Chairman. This was seconded by Mr. Jelin and adopted.

1924 Motor Vehicle Funds

Commissioner Kidde moved that the Commission give consideration to the apportionment of Motor Vehicle funds for the year 1924, to the several counties of the State, and he stated that he believed in view of the changes of several county road mileages which would rearrange the amounts allotted last year, it was his feeling that the Commission should not apportion to any county any sum that is not equal to or above the amount given during 1923, and he suggested that apportionments be made on the basis of allotting $2,600,000. After discussion as to the methods arrived at in the apportionment to the counties which was explained by Assistant State Highway Engineer Reed as being the average percentage of the population, area of the county and the county road mileage, Commissioner Kidde moved that the State Highway Commission approve the apportionment of $2,600,000 from Motor Vehicle Funds for the year 1924, to the several counties of the State for distribution, to be made on the basis of a schedule of percentages as presented to the State Highway Commission: said counties to be officially informed of the apportionment as made, said apportionment in each case to be made subject to such schedules and contracts as the State Highway Commission may later approve, and a part of said apportionment of each county to be used for the provision of proper cautionary and directionary signs throughout each county to a total of $2000.00, individual apportionment to each county being as follows:

County	Average	Apportionment Based on $2,600,000.00
Atlantic	5.061	131,586.00
Bergen	6.003	156,078.00
Burlington	6.646	172,796.00
Camden	4.181	108,706.00
Cape May	3.323	36,398.00
Cumberland	4.750	123,500.00
Essex	9.129	237,354.00
Gloucester	3.189	82,914.00
Hudson	7.422	192,972.00
Hunterdon	2.827	73,502.00
Mercer	4.351	113,126.00
Middlesex	5.725	148,590.00
Monmouth	5.787	150,462.00
Morris	5.004	130,104.00
Ocean	4.907	127,582.00
Passaic	5.686	147,836.00
Salem	3.405	88,530.00
Somerset	2.759	71,734.00
Sussex	3.725	96,850.00
Union	3.329	86,554.00
Warren	2.801	72,826.00
	100.000	2,600,000.00

This was seconded by Mr. Jelin and adopted.

The Schedule of Business was next taken up for consideration item by item as follows:

Route 5, Section 12

State Highway Engineer Sloan reported receipt of the following bids for the construction of Route 5, Section 12, Netcong-Canal Culvert Section, the low bid being by Crilly and Cannon Construction Company of Phillipsburg, N.J. at 92.18% of the Engineer's estimate and he recommended that the State Highway Commission authorize award of contract to the second low bidder, Salmon Brothers Company of Netcong, N. J.

Crilly & Cannon	92.18%
Salmon Bros	92.7
Graham VanKeuren	94.0
New Jersey Const. Co	97.9
Newark Paving Co	97.9
Charles T. Kavanaugh	97.97
Ralph Sangiovanni	98.0
Public Service Production Co	98.9
S. S. Thompson & Co	101.9
J. F. Chapman & Son	102.3

The Secretary reported that Mr. Brady, representing the firm of Crilly & Cannon Construction Company, was present and desired a hearing. On motion duly seconded, the hearing was granted. Mr. Brady appeared and requested consideration for the bid presented from his company. Chairman Stewart informed Mr. Brady that the Commission objected to the award of contract to his company for the fact that the financial statement of the company made a very poor showing with respect to the award of a contract from the State of such a magnitude. Mr. Brady advised that his corporation had completed work for the State Highway Department on two section of road and that he stood ready to furnish additional capital to the amount of $20,000.00 and a statement from a reputable bank that an additional $25,000.00 would be loaned to the company for its use in carrying out this contract. After the statements of Mr. Brady and further questions of the Commissioners on his financial standing, the Commission went into executive session and when the meeting was again resumed, informed Mr. Brady that the matter would be laid over for one week and taken up at the next meeting of the Commission, the Commission not yet being satisfied as to the financial standing of his company.

Route 16, Section 6-A

State Highway Engineer Sloan reported the receipt of the following bids for the construction of Route 16, Section 6-A, Bernardsville-Passaic River Section, and recommended award of contract to Daniel Klockner, Jr., at his the lowest bid submitted, amounting to 95.9% of the Engineer's estimate.

Daniel Klockner, Jr.	95.9%
Charles T. Kavanagh	96.8
New Jersey Construction Co	97.5
C. H. Winans	97.78
Ralph Sangiovanni	98.9
J. F. Chapman & Son	102.0
John W. Heller	104.7
Public Service Production Co	104.0

On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission unanimously adopted the following resoltuion:

> RESOLVED, that the State Highway Commission does hereby make award of contract for the construction of Route 16, Section 6-A, Bernardsville-Passaic River, to Daniel Klockner, Jr. of Trenton, N.J., at his, the lowest bid received of 95.9% of the Engineer's estimate, amounting to $167,237.66, and
>
> BE IT FURTHER RESOLVED, that the Chairman is authorized to sign the necessary contracts after approval by the State Highway Engineer.

Route 10, Saddle River Bridge

State Highway Engineer Sloan reported the receipt of the following bids for the construction of Saddle River Bridge at M. P. 2.9 on Route #10, the lowest bidder being Hennessey & Sowell of Hightstown, N.J. at $28,356.00.

P. A. Hennessey & Sowell	$28,356.00
B. H. Card	32,929.00
F. W. Schwiers Jr. Co	42,490.00
Arnolt-More, Inc	44,600.00
Tuller Construction Co	44,980.00
Linde & Griffith	46,000.00

State Highway Engineer Sloan recommended that all bids on this work be rejected and that readvertisement take place in the early part of next year. The Secretary informed the Commission that Mr. Sowell was present and desired a hearing with reference to this contract. On motion, duly seconded, a hearing was granted. Mr. Sowell appeared and informed the Commission that his company stood ready, if the Commission saw fit to award the contract to his company, to complete the same. He then advised that a mistake had been made in calculating the steel figures, although this did not account for the difference between his bid and the Engineer's estimate, his bid being $28,356, and the Engineer's estimate being $38,895. Mr. Sowell advised that he was a partner of Mr. Hennessy, newly formed for the conduct of this work. After further discussion and questioning, Mr. Kidde moved that all bids for the construction of the Saddle River Bridge on Route 10 be rejec ted at this time, and that readvertisement of this work take place early in the year 1924. This was seconded by Mr. Jelin and adopted.

Cedar Bonnet Bridge Bids ✓

State Highway Engineer Sloan presented the following bids received for the construction of the Cedar Bonnet Bridge over Manahawken Bay, Ocean County, and recommended that all bids be readvertised, due to the high price on the work, and he recommended that bids be received again early in the spring of 1924.

Krellwitz Contracting Co...........	116.9 %
Louis J. Sieling...................	117.3 %
S. S. Thompson & Co. Inc...........	124.75%

The Secretary advised that Mr. Krellwitz, low bidder on this work, was present and desired a hearing. On motion, duly seconded, a hearing was granted. Mr. Krellwitz appeared before the Commission and advised that he felt that the Commission should award the contract to him in view of the fact that the prices submitted by the Engineer as his estimates were very low. He presented for the Commission's consideration, quotations from steel companies covering the items required for this work, and stated that he believed his price to be a fair one. He informed the Commission that he is now completing the construction of a sewer in North Bergen Township, which will amount to approximately $150,000.00. After further discussion and inquiry from Mr. Kidde concerning his prices, Commissioner Jelin moved that the matter be laid over for one week for further consideration. This was seconded by Mr. Kidde and adopted.

Hadfield-Penfield Graders

The State Highway Engineer presented to the Commission for its approval a recommendation from the Superintendent of Plant & Equipment of two Hadfield-Penfield graders, equipped with Fordson tractors complete to be used for snow removal and maintenance work, at an estimated cost of $1,500.00 each. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission approved of the purchase of two Hadfield-Penfield graders, as recommended by the State Highway Engineer.

Route 4, Inland Waterway Intersection

State Highway Engineer Sloan reported to the Commission that it was very necessary in the progress of work on Route 4, to ascertain from the Board of Commerce & Navigation as to its intentions and contemplated improvement at the point where the Inland Waterway is crossed by State Highway Route 4. On motion by Mr. Kidde, seconded by Mr. Jelin the State Highway Commission authorized a request to be made of the Board of Commerce & Navigation to ascertain what it has in contemplation at the intersection of Route 4 with the Inland Waterway.

Atlantic City Conference

Commissioner Kidde made the request that a copy of all the photographs and statistics compiled for use at the Atlantic City Conference, held on December 7th and 8th, be mounted and presented to each Commissioner for their personal use and study.

Employments

State Highway Engineer Sloan presented to the Commission for its approval a report of employments as made by him since the last meeting of the Commission. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission authorized the following employments as recommended by the State Highway Engineer:

Dec. 1, 1923	Wm. Baldwin	M. T. D.	$ .45 hr.
" 4, "	Robert Hyer	Gar.Asst.	.40
" 3, "	Albert E. Tranter	Mechanic	.55
" 3, "	Wm. E. Killy	Gar. Asst.	.50
" 4, "	Isaac Wisotsky	Chauffeur	.45

Extension of Time-Barnegat-Buddtown Rd.

State Highway Engineer Sloan resubmitted to the Commission the request for an extension of time on Barnegat-Buddtown Road, Section 2, Ocean County State Aid, to August 29, 1923, in order to complete the records. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission approved the extension of time on Barnegat-Buddtown Road, Section 2, Ocean County, State Aid, to August 29, 1923.

Commissioner Jelin informed the members of the Board that it was necessary for him to keep an appointment with the Comptroller regarding Motor Equipment, and left the meeting at four o'clock. There being but two members remaining, no official action could be taken, but Commissioner Kidde offered for the attention of the State Highway Engineer, a communication which he had received from the Robert W. Hunt Company of New York, requesting consideration as Inspectors on structural steel for the Perth Amboy Bridge, and he requested the State Highway Engineer to prepare a report as to services being rendered on present inspection with a view toward ascertaining what action the Commission will take with reference to the inspection of steel for the new Amboy Bridge.

Annual Report ✓

Commissioner Kidde also called the attention of the State Highway Engineer to the fact that it is very important that the Annual Report of the Commission to be presented to the Legislature, be outlined at this time in order that it may be brought to a close and printed before the legislative session. State Highway Engineer Sloan reported that preliminary work was already under way on the report, and that the material would be arranged in the nature of a report from the Division Engineers to him, and his report to the State Highway Commission.

Route 5, Speedwell Avenue ✓

Commissioner Kidde suggested to the State Highway Engineer that arrangements be made for estimates to be presented to the Commission as to the cost of repairing with stone ballast, Route 5, through Speedwell Avenue, Morristown, as soon as the pavement work was accepted from the contractor.

The meeting was declared adjourned at 4:00 P.M. to meet in regular session on Tuesday, December 18th at 10:30 A.M.

Respectfully submitted,

A. LEE GROVER,

Secretary

DEC 18 1923
[illegible]

MINUTES OF MEETING - December 18, 1923.

A regular meeting of the State Highway Commission was held at the offices of the Commission, Broad Street Bank Building, Trenton, on Tuesday, December 18th, 1923. The meeting was called to order at 10:30 A.M. by Chairman Scott.

Present: General H. L. Scott, Chairman; and
Messrs. Walter Kidde and Abraham Jelin.

Absent: Percy H. Stewart.

Morris Canal Commission

The Secretary informed the Commission that a hearing had been arranged by Governor Silzer between the members of the State Highway Commission and the Special Morris Canal Commission, to be held at 11:00 o'clock at the office of the Governor on this day. The Commission, therefore, proceeded with its business until the time of this meeting.

Route 5, Section 12,
Netcong-Canal Culvert.

The Secretary informed the Commission that Mr. Brady and Mr. Cannon, representing the Crilly & Cannon Construction Company, were present with reference to the award of contract for Route 5, Section 12, as laid over from the last meeting. State Highway Engineer Sloan reported that since the last meeting of the Commission he had received advice that Crilly & Cannon Construction Company had added to its cash capital and had also the promise of banks for additional capital, and he would recommend award of contract at 92.18% of the Engineer's estimate. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission adopted the following resolution:

> RESOLVED, that the contract for the construction of Route 5, Section 12, Netcong-Canal Culvert Section, be and the same is hereby awarded to Crilly & Cannon Construction Company at their's the lowest bid, amounting to 92.18% of the Engineer's estimated units of cost in the sum of $208,987.82, and
>
> BE IT FURTHER RESOLVED, that the Chairman is authorized to sign the necessary contract after approval by the State Highway Engineer.

Route 9, Section 9.

The Secretary informed the Commission that Crilly & Cannon Construction Company were awaiting final acceptance of Route 9, Section 9, Phillipsburg-Still Valley Section. State Highway Engineer Sloan presented the final papers on this road with the recommendation that of the 78 working days used by the contractor, in addition to the time specified in the contract, an extension of 64 days be granted, bringing the time to October 1st, the penalty to apply on the balance of the time, or 14 days. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission approved the acceptance of Route 9, Section 9, Phillipsburg-Still Valley Section, Warren County, as completed by the Crilly & Cannon Construction Company in accordance with the terms of the Reimbursement Act, subject to a penalty of 14 days on account of the noncompletion of the work within the time specified.

Main Street, Clifton , Route 11

The Secretary presented a communication from Mr. Garwood Ferguson, County Engineer of Passaic County, forwarding a notice of advertisement for sheet asphalt pavement over one-half of Main Street, Clifton, bids to be opened on December 26th. There was also inclosed a communication from contractor George F. Brackett, advising the Board of Freeholders of Passaic County that he could not give the county a lower price than the one he bid originally for the work. State Highway Engineer Sloan recommended to the Commission that in view of the fact that December 26th is a date for bids, after which it would be very costly to place asphalt top on Route 11, that the Passaic County Board of Freeholders be advised to hold the advertisement off until early spring. The Secretary read to the Commission the minutes of the former meetings of the Commission, when the matter of the contract for Route 11 was before the Commission, which bore out the fact that there was mutual understanding that the surface pavement would be readvertised in the spring. After further discussion, Commissioner Kidde moved that a communication be forwarded to the Board of Freeholders of Passaic County, advising that in view of the fact that the season has advanced so far and there will surely be bad weather conditions in the months of January and February, which will follow the date of receipt of bids on December 26th, and in view of the fact that this matter has been so long delayed for many reasons beyond the control of the State Highway Commission, and there is doubt as to whether the bids received in the middle of winter would be acceptable bids for the work, the State Highway Commission urge that the matter of advertisement be withheld and the original suggestion as made for advertisement in the early spring be adhered to. In doing this the State Highway Commission stands entirely upon its agreement as entered into with the County of Passaic, because it was definitely understood that the County Board would be satisfied with a concrete base on this road during the winter season. This was seconded by Mr. Jelin and adopted.

Shore Route,-Route 1, through Jersey City, and Camden Bridge

The Secretary presented a communication from the City of Jersey City, requesting that the Commission arrange for a conference with the City Officials of Jersey City on the matter of the proposed Advisory Board Route 1 through Jersey City. Commissioner Kidde advised that he had received a similar request for information as to the proposed Vehicular Tunnel Route from the Hoboken Chamber of Commerce. The Secretary also advised that there was a communication from Mr. B. M. Seabrook concerning the route recommended to the Commission at Camden. Commissioner Kidde moved that a communication be forwarded to all of the interested parties and municipalities along the line of the proposed route at Jersey City, along the Shore, and at Camden, that the State Highway Commission has these Advisory Reports before it, and the Engineering Division is at the present time investigating the conditions existing thereabout, and that the State Highway Commission will arrange in the very near future to invite the interested municipalities to conference in order that the entire matter might be gone over thoroughly. This was seconded by Mr. Jelin and adopted.

Commissioner Kidde called attention to the fact that it would be desirable to forward all the interested municipalities a copy of the Advisory Board Report, as affecting their particular locations, and he moved that the Secretary be directed to have advance copies of the Advisory Board Reports printed for distribution, said printing to be in such form as will make these reports suitable for inclusion in the Annual Report of the State Highway Commission to the Legislature. Commissioner Jelin further moved that a copy of the Advisory Board Report of the Vehicular Tunnel Route be forwarded to the Hoboken Chamber of Commerce, with the request that it be returned, and in the event that they desire to study the maps covering this route that they be asked to call on Commissioner Kidde. This was seconded by Mr. Kidde and adopted.

Commissioner Kidde suggested that inquiry be made of Director MacDonald of the Bureau of Public Roads, as to whether the Vehicular Tunnel Route could be put under a special classification in order that extra Federal Aid might be allotted thereto, in view of the fact that it will be a very important Inter-State Line. Commissioner Kidde, therefore, moved that the State Highway Engineer forward a copy of the Vehicular Tunnel Advisory Board Report to Mr. MacDonald of the Bureau of Public Roads at Washington, advising that it is a matter receiving serious consideration and it will be very difficult to accomplish without special aid, and as soon as Director MacDonald has acquainted himself with the conditions of this Report, it is the Commission's desire that he accept an invitation to the Newark Athletic Club to meet with the Commissioners in order that the entire matter might be thoroughly gone into. This was seconded by Mr. Jelin and adopted. Commissioner Jelin informed the Commission that it was his intention to be in Washington the latter part of the week, and he would be very glad to transmit the Advisory Board Report to Director MacDonald.

The time being 11 o'clock, the Commission proceeded to its conference at the Governor's Office, with the Special Morris Canal Commission.

The regular meeting was resumed at the offices of the Commission, Broad Street Bank Building, with the same members present as at the morning session.

Route 14, Section 8. ✓

The Secretary informed the Commission that Mr. T. J. Wasser, former State Highway Engineer, was present in reference to the acceptance and final payment of Route 14, Section 8, Swainton to Oceanview Section. Commissioner Jelin reported that he had inspected this work and was prepared to recommend its acceptance. State Highway Engineer Sloan stated that this work was completed in 65% of the allotted time and that he would recommend that the Commission accept the work, subject to final papers coming through in proper shape.

He reported that cores had been taken and showed up very good. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission approved the acceptance of Route 14, Section 8, Swainton-Oceanview Section, Cape May County, and authorized final payment to be made subject to all necessary papers coming through to the satisfaction of the State Highway Engineer, and that a communication be forwarded to the Public Service Production Company, expressing thanks for the work done and congratulations for the results obtained on this section of the road.

Route 11-Belleville.

The Secretary reported to the Commission that Mr. Frank A. Neary, Commissioner of Streets and Highways of Belleville, N.J. was present and desired a hearing. Commissioner Kidde requested that this hearing be granted and introduced Mr. Neary to the members of the Commission. Mr. Neary appeared and advised that he was interested in ascertaining what the State Highway Commission intended to do on Washington Avenue, which is the Main Street of Belleville and a section of Route 11. He advised that it was the intention of Belleville to widen this roadway throughout to 60' if the State Highway Commission would assist in the moving of the tracks, and paving its 22'; the City of Belleville would also do the additional widening to the curbs. After discussing the matter, Commissioner Kidde moved that the matter be referred to the Engineering Department for complete report as to what the City of Belleville has in mind and to prepare an estimate of cost and statement as to what the Commission can do with this section of road.

Hunterdon County Hearing

The Secretary informed the Commission that he had been requested by the Hunterdon County Board of Freeholders for a hearing with reference to securing additional aid from the state for Hunterdon County work. This delegation was now present. On motion, duly seconded, a hearing was granted. There appeared Judge Large, Counsel for the Board of Freeholders of Hunterdon County, County Engineer Davis, Road Supervisor Updyke,and Freeholders of the Hunterdon County Board. Judge Large acted as spokesman for the delegation, presenting a comprehensive outline of the needs of Hunterdon County, advising that ratables of the county were decreasing instead of increasing, due to the fact that the roads were in a very poor condition. He asked for consideration for improvement on the road from Flemington to Frenchtown and from Flemington to White House to connect with Route 9. He advised that the total requirements of expenditure on roads was $446,000.00, against which there were revenues from the Motor Vehicle allotment, from the State, of $72,000.00: and $50,000.00 from the county Tax Budget for road repairs and improvement plus an additional $60,000.00 to be raised by taxation for the retirement of existing bonds. The Commissioners present voiced their sympathy with the conditions existing in Hunterdon County, and stated that it was the feeling of the Commission that whatever assistance could be granted Hunterdon County, would be given, bearing in mind that the Commission must consider the matters of the other twenty counties of the State. Commissioner Kidde presented the idea that the county might engage upon a three year program of construction which would not require as much funds in any one year and could probably be accomplished in this length of time. Judge Large requested that the Commission give this matter early consideration in order that the county might prepare its Budget for 1924, near the beginning of the year. After general discussion by all present as to the urgent necessity for additional aid to Hunterdon County, Commissioner Kidde moved that the matter be taken under advisement with the assurance to Hunterdon County that assistance would be given by the state when funds become available. This was seconded by Mr. Jelin and adopted.

Market St. Br., Route 10, Bergen County ✓

The Secretary presented a resolution from the Bergen County Board of Freeholders advising of the acceptance of the Market Street Bridge on Route 10. The Secretary informed the Commission that in view of the fact that this work has already been accepted by the State Highway Commission, this matter is for report only.

Market Street Bridge, Bergen County ✓

The Secretary presented a resolution from the Bergen County Board of Freeholders advising that the County Engineer is authorized to place a name-plate upon the Market Street Bridge, bearing the names of the State Highway Commission of 1922 and the State Highway

Commission of 1923. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission directed that the Secretary acknowledge the gracious suggestion of the Bergen County Board of Freeholders for the placing of a name-plate on the Market Street Bridge on Route 10, and notifying them that there would be no objection raised to the same, there being extended with this communication the sincere thanks of the Commission for the courtesy of the Board of Freeholders of Bergen County.

Proposed Bridge-Tottenville to Perth Amboy

The Secretary presented a communication from Mr. C. M. Holland, Chief Engineer of the New Jersey Inter-State Bridge and Tunnel Commission, advising that his Commission had been authorized to conduct a joint investigation into the desirability and practicability of a bridge or tunnel between Tottenville, New York, and Perth Amboy, New Jersey, for pedestrian and vehicular traffic, and requesting the State Highway Commission to cooperate with such aid as it may give on the conditions existing in the vicinity of Perth Amboy. On motion by Mr. Jelin, seconded by Mr. Kidde, the communication was ordered received and the matter was referred to the State Highway Engineer for such cooperation as he may be able to give.

Inland Waterway, Route 4.

The Secretary presented a communication from S. S. Thompson & Company, contractors on the Inland Waterway Bridge on Route 4, West Point Pleasant, advising that it is impossible for them to proceed with their contract in view of the fact that the contractor for the Inland Waterway at this point has not yet excavated the channel at the point where the bridge is located. The Secretary informed the Commission that following instructions at the last meeting,he had communicated with the Secretary of the Board of Commerce and Navigation to learn what that Commission intended to do at this location, but that he had received no definite reply.

State Highway Engineer Sloan informed the Commission that the contract with S.S.Thompson & Company provided for no damages to be allowed in the event of loss of time, but that extensions of time may be granted covering these time losses. After discussion of the matter, Commissioner Kidde moved that the State Highway Engineer be instructed to communicate with the members of the Department of Commerce and Navigation, and determine the procedure to be employed for dredging at this location on the Inland Waterway in order that Contractor S. S. Thompson & Company may be advised of the time when they can begin their work, and further that a communication be forwarded to Mr. Thompson to the effect that the State Highway Commission acknowledges his communication and is undertaking to follow the matter up vigorously in order that he might be informed when he can proceed with his contract. This was seconded by Mr. Jelin and adopted.

Randolph Township Complaint

The Secretary presented a communication from Mr.James Andrews, Chairman of the Randolph Township Committee in Morris County, complaining of conditions on the road through Randolph Township used as a detour during the construction of Route 5 at Mine Hill, and he claimed that while this was not an official detour, traffic was sent across this road by the State Police. State Highway Engineer Sloan stated that an estimated cost for the repair of this road was placed at $600.00. Commissioner Jelin voiced the opinion that in view of the fact that the State Police had sent traffic over this road, the road was, therefore, in the nature of an official detour, and he moved that the Maintenance Division be instructed to make necessary repairs on this road to an amount not to exceed $300.00, payment to be made from the maintenance account. This was seconded by Mr. Kidde and adopted.

Freehold-Smithburg Road, Monmouth County

The Secretary presented a communication from the Board of Freeholders of Monmouth County, advising that they were not particular as to what fund aid is to be granted on the Freehold-Smithburg Road, but they did not desire that their Motor Vehicle apportionment be reduced on account of this work. On motion by Mr. Jelin, seconded by Mr. Kidde, the communication was ordered received for later consideration.

Barnegat-Buddtown Road

The Secretary presented a communication received by Chairman Scott from William H. Reeves, County Clark of Burlington County on the matter of the Barnegat-Buddtown Road, and offering facilities for taking the Commission over this road at any time. In connection with this matter the Secretary informed the Commission that he had received a request from the Burlington County Board of Freeholders for a hearing before the Commission at its next meeting. On motion by Mr. Kidde, seconded by Mr. Jelin, the Secretary was directed to acknowledge the communication with the advice that the Board of Freeholders of Burlington County will be granted a hearing at the next meeting on December 28th, 1923, at which time they would be very glad to consider this matter.

Proposed Harding Highway

The Secretary presented a communication from Mr. William C. Cattell, County Engineer of Gloucester County, enclosing a communication from the Boro of Pitman, endorsing the proposed "Harding Highway" and the "Westville-Millville" road as presented to the State Highway Commission at Atlantic City. On motion by Mr. Jelin, seconded by Mr. Kidde, the communication was ordered placed on file.

Burlington Township Complaint

The Secretary presented a communication from the Township Clerk of Burlington Township, New Jersey, advising that contractors in hauling materials for State highways are ruining portions of the River Road and the Dutch Neck Road, and requesting the State Highway Commission to repair the same. He also presented a report of the Construction Engineer, advising that in view of the fact that the township roads are public roads, the contractor cannot be prevented from traversing these roads and that the State Highway Commission cannot assume any responsibility for the same. On motion by Mr. Jelin, seconded by Mr. Kidde, the communication was ordered received and placed on file.

Motion Picture Filming

The Secretary presented a communication from the Parmount Theatrical Supply Company, requesting permission to quote a special price for filming the construction activities of the State Highway Department. On motion by Mr. Jelin, seconded by Mr. Kidde, the communication was ordered received and the Secretary was directed to advise that the Commission cannot undertake a proposition such as this at the present time.

The Schedule of Business was next taken up for consideration, item by item as follows:

Cedar Bonnet Bridge

State Highway Engineer Sloan resubmitted for action of the Commission the bids received for the construction of the Cedar Bonnet Bridge over Manahawken Bay, Ocean County, and recommended that all bids be rejected and that the work be readvertised in the early spring. Commissioner Kidde inquired whether or not the estimates of the Engineering Division were proper, since he had interviewed an outside contractor and had received the opinion that the bid as received from the Krellwitz Contracting Company of 116.9% was a fair bid for the work. He requested that the matter be again referred to the State Highway Engineer for determination as to the exact amount of steel in the bascule span to determine whether there is any serious discrepancy in the factors arrived at and he moved that the entire matter be laid over until the meeting of the Commission on December 28th. This was seconded by Mr. Jelin and adopted.

Christmas Greeting

Commissioner Kidde moved that the State Highway Commission forward the following greeting to the officers and employees of the State Highway Department:

> "Reviewing the work of the past year, the New Jersey State Highway Commissioners extend to the officers and employees of the State Highway Department their sincere appreciation for the loyal and energetic efforts and acknowledge with pleasure the hearty cooperation given, and send to one and all their best wishes for a very Merry Christmas and a Happy New Year.
>
> H. L. SCOTT — WALTER KIDDE
> PERCY H. STEWART — ABRAHAM JELIN"

This was seconded by Mr. Jelin and adopted.

Dinner with Department Heads

Commissioner Kidde expressed to the Commission the fact that it would be desirable to meet the heads of the Divisions of the State Highway Department at luncheon at the Stacy-Trent Hotel, Trenton, on the date of the next meeting, December 28th, at noon, and on motion duly seconded, the Secretary was directed to make the necessary arrangements.

Governor Silzer Greeting

Commissioner Kidde moved that the Chairman be entrusted with the writing of a proper greeting to Hon. George S. Silzer, Governor, expressing the pleasure of the State Highway Commission at having undertaken its work for the benefit of the State and wishing His Excellency a Merry Christmas and a Happy New Year. This was seconded by Mr. Jelin and adopted.

Route 5, Section 10.

State Highway Engineer Sloan reported the completion of Route 5, Section 10, Chatham-Brantwood Section, as of December 15, 1923, and he recommended that the same be finally inspected. On motion by Mr. Kidde, seconded by Mr. Jelin, the matter was referred to Commissioner Stewart for final inspection.

Route 5, Section 2-A

The State Highway Engineer reported the completion of Route 5, Section 2-A, Drakestown-Hackettstown, as of December 15, 1923, and recommended that the same be finally inspected. On motion by Mr. Jelin, duly seconded, this matter was referred to Commissioner Kidde for final inspection.

Route 5, Section 6

State Highway Engineer Sloan reported to the Commission that Route 5, Section 6, Speedwell Avenue, Morris County, was completed and he would recommend acceptance and final payment on the same. He also called attention to the fact that the contractors on this work had forwarded a notice that they are preparing a statement of extra cost on account of delay due to injunction proceedings and for which they are expecting the State to give them additional reimbursement. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission authorized the acceptance of Route 5, Section 6, Speedwell Avenue, Morristown, and final payment to be made subject to the contractor, furnishing complete releases in view of all claims against the State; said acceptance being in accordance with the terms of the Reimbursement Act. Commissioner Kidde further moved that in the event J. S. Geiger Sons, contractors on Route 5, Section 6, will not furnish a complete release at this time, that they be requested to appear before the next meeting of the State Highway Commission relative to these claims.

DEC 18 1923

Bridge Division Moving

State Highway Engineer Sloan recommended to the Commission that in connection with the moving of the Bridge Division to Trenton, the married personnel be allowed expenses for moving for themselves and families not exceeding $100.00 each, or in lieu thereof, travelling expenses between Trenton and Newark from the date of moving up to May 1st, 1924. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission approved the recommendation of the State Highway Engineer as affecting the following Bridge Division Personnel:

John L. Vogel
C. Harold Pope
John Hankin
Frank Bird
Lillian Barrett
Lawrence Peterson
Mahlon Stokes
James Minnick
John Evens
Adele Madden

Right of Way, Route 8, Section 2

On recommendation of the State Highway Engineer, Commission Kidde moved the approval of purchase agreement for Parcel #1 on Route 8, Section 2, from Francis L. Marley for the consideration of $2,200.00. This was seconded by Mr. Jelin and adopted.

Property-Dover, New Jersey

On recommendation of the State Highway Engineer, Commissioner Kidde moved that the Commission approve the payment of a bill amounting to $5,926.40 covering payment in full on all claims against the State for deed to property in Dover, New Jersey, on which the State has erected a garage, purchase of this property having been authorized by the former State Highway Commission in 1920. This was seconded by Mr. Jelin and adopted.

Right of Way, Route 3, Section 4.

On recommendation of the State Highway Engineer, Commissioner Jelin moved approval of purchase of property known as Parcel #12 on Route 3, Section 4, from Fred and Anna Bange for the consideration of $15.00. This was seconded by Mr. Kidde and adopted.

Complaint -

Route 15, Morris Ave., Springfield

The State Highway Engineer presented to the Commission a report from the Construction Engineer concerning the complaint of O. D. Sickley as to the drainage conditions in front of his property on Route 5, Morris Avenue, Springfield. The Construction Engineer advised

DEC 18 1923

that the complaint registered by Mr. Sickley will be entirely eliminated when the construction of a state highway in this neighborhood goes ahead. In the meantime it was recommended that the Maintenance Department be requested to perform the necessary maintenance work properly, in order that the drainage facilities now present may function properly. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission approved the report of the Construction Engineer and directed that the Maintenance Department take the matter in hand in accordance with the suggestions as made.

Route 13, Section 6.

State Highway Engineer Sloan presented to the Commission a correspondence he had had with the Bureau Roads Engineer, Mr. Mincher, relative to the work being done by the Utility Construction Company on Route 13, Section 6, Lawrenceville-Princeton Road, Federal Aid Project #58, in which communication Mr. Mincher complained of the unsatisfactory progress on the work and the faulty conditions existing in advance of the contract mixer and in the poor subgrade. There was also presented a report from the Construction Engineer in which it was advised that the conditions mentioned by the Federal Aid Engineer were due to the fact that the contractors on the work had not properly organized their forces and so far as the concrete was concerned, the consistency has been generally good and in fact above the average. After discussion of the matter, Commissioner Kidde moved that the State Highway Engineer be directed to get in touch with the contractors and call their attention to the contents of the communication from the Federal Bureau of Public Roads, advising that the State Highway Commission will expect all defects on this work to be corrected before any final acceptance is made; further directing that the State Highway Engineer communicate with the Federal Bureau of Public Roads, advising that the work on this section will be forced to stop for the winter and it will be necessary for the contractor to organize his forces better for work early in the spring. This was seconded by Mr. Jelin and adopted.

Speedwell Avenue, Morristown

State Highway Engineer Sloan presented a report of the Construction Engineer relative to the situation in the trolley tracks on Speedwell Avenue, Morristown, in which report it was stated that the Morris County Traction Company was ready to assume its obligation for the necessary regrading to be done on the tracks, but in view of the fact that it is too late to consider going ahead with any such work if concrete paving is used, it is recommended that an understanding be arrived at with the Town of Morristown that no parking of any such sort or description be permitted on Speedwell Avenue when track work or paving is proceeded with, and further recommending that the Maintenance Division prepare an estimate of the cost of temporary work necessary to fill holes and patch up pavement to make it safe for winter travel. In connection with the matter, State Highway Engineer Sloan advised that an estimate had been prepared for patching along the trolley tracks in the amount of $3,407.50, and he recommended that the work be authorized by the Commission. Commissioner Kidde stated that he felt that this amount was considerable money to spend for temporary repair and he moved that the recommendation of the State Highway Engineer be adopted with the suggestion that the Maintenance Division be advised to save as much as possible on the estimate as submitted by eliminating any unnecessary work. This was seconded by Mr. Jelin and adopted.

Route 4, Perth Amboy

State Highway Engineer Sloan presented to the Commission the matter of partial payment to the City of Perth Amboy in accordance with resolution adopted by the State Highway Commission and directed attention to the fact that the State Highway Commission has not approved of an extension of 50 working days as granted by the City on this work, which would necessitate the deduction of a penalty. After discussion, Commissioner Kidde stated that in view of the fact that this was for partial payment on work completed, that he would move that the State Highway Commission approve of an extension of time to October 29th as granted by the City of Perth Amboy on Route 4, Extension, with the understanding that the State Highway

Commission will grant no further extensions of time on this contract, thus permitting payment of the amount held. This was seconded by Mr. Jelin and adopted.

Route 1, Lincoln Highway Section

State Highway Engineer Sloan reported to the Commission the renewal of the upper and lower tracks of the wheels for the turntable in the crossing of the Lincoln Highway and Passaic River Bridge, together with drum girders and adjustment of machinery which is requested at this time. Plans and estimates of the work have been prepared at an estimated cost of between $75,000 and $100,000.00 the high cost being due to the fact that the difficult work must be accomplished while the bridge is in operation. He recommended that authority be granted to advertise for this work on a pound price basis for the various pieces of casting and also on a lump sum price for the entire work. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission directed the State Highway Engineer to arrange for the necessary advertisement for the purpose of renewing the turntable on the Passaic River Bridge on Route 1.

Warren County, 7% Federal Aid System

The State Highway Engineer presented a communication from Warren County, requesting the inclusion of road beginning at the Delaware River Bridge and running by way of Finesville, Warren Glen, Springtown and Alpha Boro, to Route 9, in the Federal Aid 7% System. State Highway Engineer Sloan recommended that this be not approved by the Commission in view of the fact that all mileage is now tentatively absorbed. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission approved the recommendation of the State Highway Engineer.

Hudson County-Motor Vehicle Funds

State Highway Engineer Sloan directed the attention of the Commission to a report in connection with the Motor Vehicle Funds allotted to Hudson County, which advised that of the total allotment to Hudson County of $186,025.00, there was set aside the sum of $30,000.00 for lighting, cleaning, policing and maintenance of the county roads. The Secretary informed the Commission that under a ruling of the Attorney General in 1914 where County roads are virtually city streets, the county may use its Motor Vehicle funds for such purposes as those being used in Hudson County. This being a report only, there was no action to be taken by the Commission; the payment to be made through the usual procedure.

Right of Way-Route 4, South Amboy

State Highway Engineer Sloan presented to the Commission a communication received from the General Superintendent of the Pennsylvania Railroad, requesting information as to the disposition of their claim on account of the right of way of the bridge construction on Route 4, at South Amboy. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission directed that the Secretary advise the P. R. R. Company that the State Highway Commission recognizes that a claim exists and that some provision must be made to make settlement and it hopes that the matter will be brought to a satisfactory conclusion before very long.

National Pavement-Route 11

State Highway Engineer Sloan advised that information was requested by Passaic County as to whether or not the State Highway Commission would accept at its full price, certain National Pavement laid on Route 11, Passaic Avenue, Passaic, which was slightly deficient in bituminous content, under that required by the new specifications covering this season's work on that job. He advised that due to the character of the material used in the aggregate, the pavement as laid is better than would have been the case if the minimum asphalt requirement had been adhered to, and he recommended that the county be advised that the State Highway Commission will approve the acceptance of this portion of the pavement at the contract price. On motion by Mr. Jelin, seconded by Mr. Kidde, the Commission directed that the recommendation of the State Highway Engineer be approved and the County of Passaic be advised in accordance therewith.

Employments

State Highway Engineer Sloan presented to the Commission the following list of employments as made by him since the last meeting of the Commission, and recommended ratification of the same by the Commission. On motion by Mr. Kidde, seconded by Mr. Jelin, the State

Highway Commission ratified the following employments as recommended by the State Highway Engineer:

Dec. 15,	Wm. R. Farrell,	Rodman	$ 90.00 mo.
" 10,	Tracy Perrine,	M.T.D.	.40 hr.
" 11,	R. B. Caldwell,	M.T.D.	.45 hr.

Route 13, Somerset Street

State Highway Engineer Sloan presented to the Commission blue prints and estimates covering additional width of the pavement and drainage, together with the construction of an intersection at Somerset Street and State Highway Route 13, at the entrance to New Brunswick. State Highway Engineer Sloan reported to the Commission that the pavement at this point was justified in view of the fact that it is necessary for the proper drainage of the State Highway at this location. Commissioner Kidde stated that he favored the construction of this intersection, but he believed that the municipality of New Brunswick should share in the cost of extra width pavement and he moved that the matter be referred to Commissioner Jelin for negotiation with the City authorities of New Brunswick, looking toward the City paying a portion of the cost of this improvement from the roadway to the curb line since it will be possible to assess abutting property for such an improvement. This was seconded by Mr. Jelin and adopted.

Shipetaukin Creek Bridge Route 13

State Highway Engineer Sloan submitted to the Commission a communication from Judge Armstrong of Newark in which he suggested that the Commission arrange its plan for Shipetaukin Creek Bridge on Route 13 in such a way that four ornamental lamps might be placed on the same in order to commemorate the four signers of the Declaration of Independence of New Jersey; namely:

John Witherspoon	Richard Stockton
John Hart	Abraham Clark

it being proposed to have the lamps donated for each corner. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission authorized the Engineering Division to arrange for the installation of conduits in the Shipetaukin Creek Bridge at an expense not to exceed $50.00; this promising no obligation as to the lighting on this brige.

Flemington-Frenchtown-Milford Road

The State Highway Engineer presented to the Commission a request of Hunterdon County for the inclusion of the Flemington-Frenchtown-Milford Road in the 7% System of the State Highways, and explained that this was one of the matters presented by the Hunterdon County Board when they were present before the Commission and which the Commission did not give consideration at the time.

Material Inspectors. Amboy Bridge

State Highway Engineer Sloan recommended to the Commission that the inspection of materials for the Perth Amboy Bridge not inspected by the members of the State Highway Department, be handled by the Robert W. Hunt Company at prices named in the recommendation. Commissioner Kidde stated that he did not believe the State Highway Commission should concentrate all its inspection work in any one company, but might very properly divide the Amboy Bridge work from other work of the Department now being handled by Hildreth & Company and he moved that in accordance with the recommendation of the State Highway Engineer, the inspection work on the materials for the Perth Amboy Bridge such as are not inspected by the State Highway Department employees, be awarded to the R. W. Hunt Company. This was seconded by Mr. Jelin and adopted.

Middlesex Township Aid Balance

On recommendation of the State Highway Engineer, Commissioner Jelin moved the approval of application by Middlesex County for $5,950.00 Township Aid balance to be used in the construction of Mill Lane Road, Section 2, North Brunswick Township, Middlesex County. This was seconded by Mr. Jelin and adopted.

Cohansey-Husted Station Road

On recommendation of the State Highway Engineer, Commissioner Kidde moved the acceptance and final payment of Cohansey-Husted Station Road, Cumberland County, Motor Vehicle Aid. This was seconded by Mr. Jelin and adopted.

Hope-Blairstown, Extension of Time

On recommendation of the State Highway Engineer, Commissioner Jelin moved the approval of an extension of time granted by Warren County for 50 working days to Korp & Korp, contractors of the Hope-

Blairstown Road, Warren County, Motor Vehicle Aid. This was seconded by Mr. Kidde and adopted.

Paulsboro-Swedesboro Road

On recommendation of the State Highway Engineer, Commissioner Jelin moved approval of contract for the Paulsboro-Swedesboro Road, Section 1, Gloucester County, Motor Vehicle Aid. This was seconded by Mr. Jelin and adopted.

Right of Way-Route 15, Section 5

On recommendation of the State Highway Engineer, Commissioner Jelin moved that an offer of $200.00 be made to H. Ackley for Parcel #3, on Route 15, Section 5, and in the failure to accept that condemnation proceedings be instituted in accordance with the attached resolution:

> RESOLVED, that this Commission hereby determines to acquire in the name of the State of New Jersey, for public use in the construction of State Highway Route 15, Section 5, ALL that certain lot, tract or parcel of land and premises situate, lying and being in the State of New Jersey, and more particularly described as follows:

Beginning at a point in the existing easterly side line of the road leading from Millville to Port Elizabeth, distant three and eight tenths (3.8) feet westerly from, measured at right angles to, the proposed new center line of Route 15, Section 5 of the New Jersey Highway System, at Station 164/84, as shown on a plan hereto attached entitled "New Jersey State Highway Department, Route 15, Section 5, Property to be acquired from Harry Ackley, City of Millville, Cumberland County, Scale 1"= 50', April 1923:"

Thence (1) along the aforesaid existing easterly side line of the road leading from Millville to Port Elizabeth, north fifteen degrees, five minutes west (N15°5'W) a distance of eight hundred and twenty-seven and six tenths (827.6) feet to a point;

Thence (2) still along aforesaid existing easterly side line of the road leading from Millville to Port Elizabeth, north fifteen degrees and thirty-eight minutes West (N15°38'W) a distance of ninety-nine and eight tenths (99.8) feet to a point of curvature in the proposed new easterly Right of Way line of Route 15, Section 5, said point being distant thirty-three (33) feet from, measured at right angles to, the proposed new center line of Route 15, Section 5, at Station 155/56.7;

Thence (3) along the proposed new easterly right of way line of Route 15, Section 5, on a curve to the left with a radius of 5697.00 feet a distance of one hundred and ninety-eight and nine tenths (198.9) feet to a point of tangency, thirty-three (33) feet from, measured at right angles to, the aforesaid center line of Route 15, Section 5, at Station 157/56.7;

Thence (4) still along aforesaid proposed new easterly right of way line of Route 15, Section 5, South seventeen degrees, thirty-eight minutes east (S17°38'E) a distance of seven hundred fifteen and eight tenths (715.8) feet to a point in the High Water Line on the northwest bank of Menantico Creek;

Thence (5) along the High Water Line of Menantico Creek, south fifty-three degrees and forty-five minutes west (S53°45'W) a distance of thirty-nine (39) feet to the point and place of Beginning; containing thirty-four one hundredths (0.34) of an acre, be the same more or less, as shown on said plan.

Intending to convey all that land now owned or controlled by the party of the first part that lies between the existing easterly side line of the road from Millville to Port Elizabeth, and the proposed new easterly right of way line of Route 15, Section 5, parallel to and thirty-three (33) feet from the proposed center line, between the point of curvature at Station 155+56.7 where the two lines meet and the southeasterly property line of grantor at Menantico Creek, as shown on said plan, together with all rights, titles, or interest to said Creek between the said lines.

The State Highway Engineer is hereby authorized and directed, on behalf of this Commission, to make an offer of $200.00 to the owners or owner of said lands and premises for the conveyance of the same to the State of New Jersey free and clear of all encumbrances, and upon the failure of such owner or owners to accept such offer, or if for any other reason said lands and premises cannot be immediately acquired by agreement with such owners or owner, then the Attorney General of the State of New Jersey is hereby authorized and directed to institute condemnation proceedings for the acquisition of said lands and premises.

Traffic Signals-Routes 9, and 16.

State Highway Engineer Sloan presented to the Commission a report of the Superintendent of Maintenance on the request of the Borough of Somerville for the installation of two traffic signals on Route 9 and Route 16, and recommended that the previous action of the State Highway Commission in denying such installation be reconsidered, and permission be granted for the erection of signals with the Department understanding that the Borough of Somerville will assume all responsibility in connection with the placing of the signals, and in view of the fact that the roadway at both points is 50 feet wide, leaving ample room for traffic. On motion by Mr. Jelin, seconded by Mr. Kidde, the recommendation of the State Highway Engineer regarding traffic signals was ratified, confirmed and approved, this action, tending to rescind any former action taken with regard to dividing this application.

Amboy Bridge Lighting-Route 4

State Highway Engineer Sloan presented a report of the Superintendent of Maintenance with recommendation for approval of agreement with the Public Service Electric Company for the lighting of the northerly end of the Amboy Bridge. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission authorized the Chairman to sign the necessary contract for the lighting of the northerly end of the Amboy Bridge in accordance with the recommendation of the State Highway Engineer.

Route 15, Section 5-Easement.

On recommendation of the State Highway Engineer, Commissioner Kidde moved that the State Highway Commission accept an easement for the right to make slopes on the property of Daniel Kernis, known as Parcel #1 on Route 15, Section 5. This was seconded by Mr. Jelin and adopted.

Route 16, Section 6, Primrose Brook Bridge,-Extension of Time

On recommendation of the State Highway Engineer, Commissioner Jelin moved that an extension of time of 20 working days be granted to the Hoffman Construction Company on the construction of Primrose Brook Bridge at M.P. 33.7 on Route 16, Section 6, this extension being granted for the reason that supplemental orders for construction have been issued. This was seconded by Mr. Kidde and adopted.

On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission adjourned at 5:45 P.M. to meet in regular session on Friday, December 28th, at 10:30 A.M.

Respectfully submitted,

A. LEE GROVER,

Secretary

MINUTES OF MEETING - December 28, 1923.

A regular meeting of the State Highway Commission was held at the offices of the Commission, Broad Street Bank Building, Trenton, on Friday, December 28, 1923. The meeting was called to order by Chairman Scott at 10:30 A.M. in the new meeting room of the Commission, on the 9th Floor of the Broad Street Bank Building.

Present: General H. L. Scott, Chairman, and
Messrs. Percy H. Stewart, Walter Kidde and Abraham Jelin.

Route 5, Section 2-A.

The Secretary reported that Mr. Charles T. Kavanagh, contractor on Route 5, Section 2-A, was present with reference to the acceptance of his work. Commissioner Kidde reported that he had inspected the completed work on Route 5, Section 2-A, Hackettstown-Drakestown, as constructed by Mr. Kavanagh, and also that this work was completed within 75% of the time actually given the contractor for doing the work. He moved that the State Highway Commission accept the completed work on Route 5, Section 2-A, Hackettstown-Drakestown section, and extend congratulations to the contractor for completing the work ahead of scheduled time. This was seconded by Mr. Jelin and adopted.

Route 4, Section 19.

Commissioner Jelin reported that he had inspected the completed work on Route 4, Section 19, Sea Girt-Belmar Section, as constructed by Mr. Kavanagh, and this work was completed in 77% of the allotted time, and he moved that the State Highway Commission accept the completed work on Route 4, Section 19, and express its congratulations to the contractor for having the work completed before the specified time. This was seconded by Mr. Kidde, and adopted.

Mr. Kavanagh took occasion to state to the Commission that in all his connections as contractor in the State of New Jersey he had never been given such cooperation as was extended to him by the officers and employees of the present State Highway Commission.

Route 5, Section 10.

The Secretary reported that Mr. Ralph Sangiovanni, contractor on Route 5, Section 10, Chatham-Brantwood, was present with reference to the completed work on this section. Commissioner Stewart reported having inspected this work and that although the work was done under traffic, it was done before the scheduled time of completion, and he moved that the State Highway Commission accept the completed work on Route 5, Section 10, Chatham-Brantwood Section, and authorized final payment to be made. This was seconded by Mr. Jelin and adopted.

U. S. Department of Agriculture-Communication

The Secretary presented a communication received from Hon. Henry C. Wallace, Secretary of the U. S. Department of Agriculture in Washington, addressed to General H. L. Scott, expressing appreciation for the cooperation extended by the New Jersey State Highway Commission to the Federal Department of Agriculture during the year 1923. On motion by Mr. Jelin, seconded by Mr. Kidde, the communication was ordered received and properly acknowledged.

Improper Distribution of Motor Vehicle Funds

The Secretary presented a communication received by General Scott from Mr. S. P. Leeds, President of the Atlantic City Chamber of Commerce, in which communication Mr. Leeds called attention to what he believed an improper distribution of Motor Vehicle Funds to the counties on the basis of the Census population, since the shore roads received their greatest wear from a population which only increases during the summer months. Commissioner Stewart stated that he believed that Mr. Leeds should be informed that it is necessary for the Commission to lay down a general rule which was done after careful consideration and he moved that the communication from Mr. Leeds be acknowledged and the Secretary advise that the method now employed in the distribution of Motor Vehicle Funds is patterned after the methods employed by the U. S. Government in the allocation of Federal Aid funds to the States of the United States, and is considered to be a fair one after having been considered from all angles, and after having been in use for three years.

Route 1, Through Jersey City

The Secretary presented an opinion from the Attorney General of the State with reference to the funds applicable for the construction of Route 1, through Jersey City, to the Hudson River

Vehicular Tunnel, in which opinion the Attorney-General ruled that Route 1 extends from Trenton to the entrance to the Vehicular Tunnel and that the Bond Act of 1922 is applicable for its construction. On motion by Mr. Stewart, seconded by Mr. Jelin, the opinion was ordered received and spread in full upon the minutes, together with the request for the same:

December 14, 1923.

Hon. Thomas F. McCran,
Attorney General, State of New Jersey,
Trenton, New Jersey.

Dear Mr. McCran:-

I am directed by the State Highway Commission to request your opinion as to whether under present existing legislation State Highway Route 1 includes that portion from the limits of the City of Elizabeth to the entrance to the Hudson River Vehicular Tunnel at Jersey City.

State Highway Route 1 was originally defined in Chapter 14, Laws of 1917. Chapter 322 of the Laws of 1921 supplemented this Act by an extension to the entrance of the Hudson River Vehicular Tunnel at Jersey City. Chapter 199 of the Laws of 1923 describes Route 1 as extending to Elizabeth.

It is in view of these facts that your opinion is requested as above. In this connection, your opinion is also requested as to whether the $40,000,000.00 bond issue can be used for the purpose of construction of the portion of Route 1 from Elizabeth to the entrance to the Hudson River Vehicular Tunnel at Jersey City.

Very truly yours,

A. LEE GROVER

Secretary

Trenton, N. J., Dec. 18, 1923.

A. Lee Grover, Secretary,
State Highway Commission,
Broad Street Bank Bldg.,
Trenton, N. J.

Dear Mr. Grover:

I have your letter of the 14th instant, in which you ask to have defined for your Commission State Highway Route No. 1 as outlined in the various acts of the State, beginning with the year 1917 to date, and in which you also ask whether the act authorizing the bond issue of $40,000,000 is applicable to the construction of the portion of the route from Elizabeth to the entrance of the Hudson River Vehicular Tunnel at Jersey City.

Route No. 1, as described in Section 1 of Chapter 14 of the Laws of 1917, ran from Elizabeth to Trenton.

Section 1 as amended by Chapter 104 of the Laws of 1920, also described Route No. 1 as running from Elizabeth to Trenton.

In 1921, by Chapter 322, a supplement to the State Highway Act of 1917, namely; Chapter 14, provided that Route No. 1 should begin at the entrance of the Vehicular Tunnel under the Hudson River, instead of at the point of beginning as described in Section 1 of the act to which that act was a supplement, namely; that the route should begin at the entrance of the Vehicular Tunnel, rather than at Elizabeth.

Chapter 253 of the Laws of 1922 amended the supplement above referred to, which for the purposes of this opinion, is to the same effect.

In 1923 numerous acts were passed describing State Highway routes.

Chapter 177 of the Laws of that year describe Route No. 1 as running from Elizabeth to Trenton; likewise, Chapter 181, also Chapter 183, Chapter 184 and Chapter 199.

In my opinion, the supplement of 1921 and the amendment thereto of 1923, above referred to, merely added to the length of Route No. 1 the distance between Elizabeth and the entrance to the Vehicular Tunnel under the Hudson River, and the fact that in 1923 Route No. 1 was again described in Section 1 as running from Elizabeth to Trenton did not affect the supplementary legislation, which extended that route from Elizabeth to the entrance to the tunnel.

I am further of the opinion that the Bond Act of 1922, namely; Chapter 262 of the laws of that year, is applicable to the construction of Route No. 1 not merely from Elizabeth to Trenton, but from the entrance to the Vehicular Tunnel to and through Elizabeth to the City of Trenton as otherwise described in the various acts referring thereto and authorizing its construction. I think that the Legislature intended that the route should run and should be subject to construction from the moneys derived from the sale of bonds as authorized from the whole distance, from the entrance to the tunnel to Trenton.

Very truly yours,

THOMAS F. McCRAN,

Attorney General.

Injury Claims - Opinion

The Secretary presented an opinion from the Attorney General concerning the payment of claims for injuries received on State highways, with special reference to a claim for damages by Miss Anna Lawrence of Bridgeton, New Jersey, in which opinion the Attorney General advised that "It is unsafe to pay damages to persons for the use of the State highways under the terms of the appropriation as provided in the Act in question, namely; Paragraph J-3 of Chapter 165 of the Laws of 1923." On motion by Mr. Stewart, seconded by Mr. Jelin, the State Highway Commission directed that the opinion of the Attorney General be received and spread in full upon the minutes and filed, and that the Attorney for Miss Lawrence be advised that acting under the advice of the Attorney General, there is no possibility for her recovering any damages from the State.

Trenton, N.J., Dec. 18, 1923.

A. Lee Grover, Secretary,
State Highway Commission,
Broad Street Bank Building,
Trenton, New Jersey.

Dear Mr. Grover:

I am replying to your letter in reference to the claim for damages by Miss Anna Lawrence of 100 Oak Street, Bridgeton, N. J.

The Appropriation Act of 1923 provides for the payment of damages for the violation of any law for the protection of roads pursuant to Chapter 15, P.L. 1917 and the amount of accruing thereto, pursuant to Chapter 230, P.L. 1917.

While this provision for damages may have been intended by the draftsman to provide for the payment of damages to persons injured by accident in the use of the State highways, I am unable to advise you that it is in any way a violation of Chapter 15 of the Laws of 1917.

I, therefore, am of the opinion that it is unsafe to pay damages to persons for the use of the State highway under the terms of the appropriation as provided in the act in question, namely; Paragraph J3 of Chapter 165 of the Laws of 1923.

Very truly yours,

THOMAS F. McCRAN,

Attorney-General

Somerset Street-Route 13

Commissioner Jelin reported that following the reference to him at the last meeting of the proposed construction and drainage work at the intersection of Somerset Street and Route 13, New Brunswick, that he had taken up with the city authorities of New Brunswick the matter of their paying for additional width of pavement necessary to be made in order to carry this work to the gutter line and for which they could levy assessments. He stated, however, that the city authorities laid no claim to this roadway lying one-half within Somerset County and one-half in Middlesex County. Assistant Construction Engineer Moore was present and explained to the Commission the need for this intersection and drainage work in order to take water from Route 13. It was estimated that the minimum amount of work necessary for this purpose would be about $8,000.00. After further discussion, Commissioner Stewart moved that authority be given for the necessary reconstruction and drainage at the intersection of Somerset Street and Route 13 at New Brunswick, said work to be performed at a cost not to exceed $8,000.00, funds to be provided from the Motor Vehicle Reserce Account for 1923. This was seconded by Mr. Jelin and adopted.

New Jersey Construct~~ion~~ors Assoc.

The Secretary reported to the Commission that Mr. A. L. Barrett, Executive Secretary of the New Jersey Contractors Association was present and desired personally to present a resolution unanimously adopted by his Association on December 27th in which resolution the New Jersey Construction Association expressed confidence in the New Jersey State Highway Commission and extended its greetings of the season. General Scott extended the thanks of the Commission to Mr. Barrett and expressed appreciation of the good work being accomplished by the highway contractors of the State in carrying on their work so efficiently as to accomplish the same within the time specified by the contract. Commissioner Kidde moved that the State Highway Commission send a communication to the New Jersey Highway Contractors' Association, expressing appreciation for the cooperation given, and with the hope that the year 1924 will be a prosperous year for them all. This was seconded by Mr. Jelin and adopted.

Route 11, Main St., Clifton

The Secretary presented a communication with resolution from the City of Clifton in Passaic County, informing the Commission that unless the asphalt top dressing is laid immediately on the east side of Main Avenue, the City of Clifton will not pay any share of the cost of the said asphalt dressing inasmuch as this has proven a serious detriment. In connection with this resolution the Secretary presented a communication from Mr. Garwood Ferguson advising that bids had been received on the advertisement for pavement on the east side of Main Avenue, Clifton, and two bids had been received, one from the Union Building & Constructing Company at $2.22 per square yard. Mr. Ferguson requested information as to whether the State Highway Commission would approve of the county laying this pavement, the weather permitting. Commissioner Kidde stated that the action of the City of Clifton had no bearing upon the question of approval by the State, and that the communication from Mr. Ferguson in which the lowest price was placed at $2.05 per square yard, was not satisfactory, in view of the fact that the bids received could not be considered as final bids by the State

Highway Commission, since there was no approval to the advertisement as placed; further, since it has been the judgment of the Commission that the work could not be done during the winter, which information has already been forwarded to Passaic County. Commissioner Stewart inquired as to the comparison of these prices with other prices in the State and State Highway Engineer Sloan informed the Commission that the City of Newark had let a contract for asphalt paving at an average cost of $1.30 per square yard, and under the most adverse conditions such as the Lawrenceville-Princeton Road and the Perth Amboy Bridge, the price had not exceeded $1.70 per square yard, where the hauls were seven and ten miles, respectively. Commissioner Jelin, therefore, moved that the State Highway Commission deny approval of award of contract for the surface pavement on East Main St., Clifton, on the basis of prices received up to this time. This was seconded by Mr. Stewart and adopted.

Route 17-Taking Over

The Secretary presented a communication from Mr. J. E. Thier, Supervisor of Roads of Bergen County, enclosing a copy of the report made by him to the Board of Freeholders of Bergen County as to the taking over of a part of Route 17, in which report he stated to his Board that the County of Bergen will effect a saving of approximately $50,000.00 on maintenance alone on that section of Route 17 from Hackensack to the New York State Line, and expressing regret that the Commission did not take over the balance of Route 17 to Newark. Commissioner Stewart moved that the communication be received and filed and that proper acknowledgment be made. This was seconded by Mr. Jelin and adopted.

Sussex County Road Program Hearing

The Secretary reported that a hearing had been requested by Senator Kays, County Counsel for Sussex County and County Engineer Harvey Snook, on the matter of the Sussex County road program. On motion, duly seconded, a hearing was granted. Senator Kays and Mr. Snook appeared, together with the Freeholders of Sussex County, and the Senator inquired of the Commission as to what disposition was made of a special allotment promised to Sussex County from the

Motor Vehicle Fund in the amount of $30,000.00 and against which the County of Sussex had entailed obligations. The Secretary informed the Commission that this $30,000.00 item was placed on the priority list for consideration in the event there were any additional Motor Vehicle funds available. He further advised that the amount was set aside to Sussex County by the former State Highway Commission but was not made payable by the present Commission. After further discussion, Commissioner Stewart moved that an allotment of $30,000.00 to Sussex County be made, a preferred claim to be paid from the 1924 Emergency Reserve Fund, in order that the County of Sussex might be assured of receiving these funds and in order that they might straighten out their finances. This was seconded by Mr. Jelin and adopted.

Sparta-Woodport Road

Senator Kays also brought before the Commission the matter of the present pavement on a section of the Sparta-Woodport road in Sussex County, which he stated was an important road between Sussex and the County of Morris. Commissioner Kidde advised that the State Highway Commission found it necessary at this time not to authorize any funds for road work beyond the very important State Highway construction, and he moved that the application be received and when there is opened for consideration any new projects, that the matter be taken up for consideration.

Senator Kays also brought up before the Commission the matter of ~~the~~ taking over the construction of that section of Route 8, between Newfoundland and Sussex, where it was proposed to establish a new alignment in order to eliminate existing grade crossings, and he suggested that the Commission give the County of Sussex an opportunity to be heard with reference to agreements entered into with the Railroad Company before any actual work was advertised. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission directed that before approval is given to plans for that section of Route 8, the Freeholders of Sussex County be given an opportunity for a hearing with the State Highway Commission.

Excess Loading of Trucks

Commissioner Kidde advised that at his suggestion, Mr. Jaeger of Newark, a mover of equipment for contractors was present for the purpose of ascertaining whether he could secure permission for carrying excess loads over State highways. On motion duly seconded, a hearing was given Mr. Jaeger, who advised that he had been doing a great deal of heavy building for highway contractors covering such road building machinery and bridge girders, etc. for which he had patented a special wide-wheeled trailer, which he believed did not harm the roadway; also the loads sometimes placed upon the road were in excess of the amount allowed by law. He advised that the present law required that where it was proposed to transport any over-loads on State highways that permission must be secured from the State Highway Engineer. Mr. Kidde stated that he could vouch for the efficiency of Mr. Jaeger and he felt that he would exercise caution and care in the transporting of heavy machinery over the roadway. Mr. Jaeger inquired whether he could be granted a blanket permission to continue his business without having recourse every time he moved anything,to the State Highway Engineer. Commissioner Stewart advised that he did not feel that any blanket permit should be given. Commissioner Jelin also stated that he did not believe that this could be granted, in view of the fact that during the spring months it would be ruinous to the roads to have any kind of overloading placed upon them. State Highway Engineer Sloan stated that he felt that the overloading of highways was a very bad thing, and he would recommend that Mr. Jaeger submit to the Department diagrams of the equipment used by him and a request for permission to make his movements, describing what type of truck will be used in making them. On motion, the plan suggested by the State Highway Engineer, was adopted.

Route 7, Section 1, Corlies Avenue

The Secretary presented a communication from the East Jersey Bridge Company, advising that in the event of their acceptance of the proposition as made by the State in accepting the construction of Route 7, Section 1, Corlies Avenue, subject to filing with the State, cash or negotiable securities in the sum of $7,278.21 to be

DEC 2 8 1923

for a period of five years thereto, they were ready to deposit with the State, installment stock of the Peoples' Building & Loan Association of Perth Amboy, having a cancellation value equal to this amount. Commissioner Stewart stated that while the security offered may be satisfactory, he had never considered the same as security for the State, and he moved that the matter be referred to the Attorney General for his opinion as to whether the offer made is proper security. This was seconded by Mr. Jelin and adopted.

Traffic Congestion on Route 1.

The Secretary presented a communication from the Automobile Club of Hudson County, directing attention to its suggestion for the relieving of traffic congestion on Route 1 by making Tonnele Avenue, Jersey City, a State highway. On motion by Mr. Kidde, seconded by Mr. Stewart, the communication was ordered received and the Secretary was directed to advise that in the Advisory Board report covering Route 1 traffic, Tonnele Avenue is considered one of the arteries which would be improved in connection with the county authorities, but the entire plan is at present subject to very careful consideration and until it is finally decided upon there can be no definite statements issued.

Atlantic County Request

The Secretary presented a communication from the Boro of Folsom in ~~the~~ Atlantic County, requesting the Commission's consideration of the building of a road from Berlin to Mays Landing, by way of what is known as "The Old Stage Road." On motion by Mr. Stewart, seconded by Mr. Jelin, the communication was ordered received and placed on file.

Change of Date-Burlington County

The Secretary informed the Commissioners that the Burlington County Board of Freeholders had requested the date of their hearing to be set for Tuesday, January 8th.

Bridge M.P.32.2, Route 16, Sec. 6-A

The Secretary informed the Commission that bids had been requested to be received at 12o'clock at the State House for the construction of a bridge over the Passaic River at M.P. 32.2 on

DEC 2 8 1923

Route 16, Section 6-A. It was now 12 o'clock and Mr. Vogel had brought all the bids from the State House to the Commission Meeting room for opening. The Chairman declared the receipt of bids closed and they were opened for reading as follows:

Hoffman Construction Co..........	$31,951.88
Grant & Driver..................	34,935.00
A. L. Trimpi....................	35,680.00
Dover Boiler Works..............	36,348.00
S. S. Thompson & Co.Inc..........	36,980.00
John W. Heller..................	37,640.00
Louis J. Sieling................	38,650.00
P.A.Hennessy & Sowell............	39,430.00
Tuller Construction Co...........	39,900.00
L. H. Card......................	40,667.00
Arnolt-More, Inc................	42,000.00
F. W. Schwiers Jr. Co............	42,436.00
Krellwitz Contracting Co.........	46,000.00
Jobson-Gifford Co...............	50,100.00

Commissioner Jelin moved that the certified checks of all the bidders with the exception of the two lowest be returned at this time. This was seconded and adopted.

Amboy Bridge - New

State Highway Engineer Sloan presented to the Commission a report on the matter of piling for the new Amboy Bridge, in which he stated that the specifications as drawn would necessitate the shipment of the long sticks from the Pacific Coast in order that the requirements for an eight inch point might be met. This would necessitate a delay of possibly six months in securing this piling and in view of the fact that yellow pine piling from the south could be secured for immediate delivery, provided a minimum of six inches at the point be allowed, and in further view of the fact that in his opinion the yellow pine piling would better serve the purpose than the western piling, he recommended that the specifications covering the piling for the job be modified as follows:

Piles up to sixty-five feet long, eight inches in diameter under the bark at the point;

Piles sixty-six feet to seventy-nine feet long, seven inches in diameter under the bark at the point:

Piles eighty to ninety-five feet long, six inches in diameter under the bark at the point.

After discussion Commissioner Kidde moved that the recommendation of the State Highway Engineer for change of specifications for piling for the New Amboy Bridge be accepted, allowance being made by the contractor if it could be shown that the change in the specifications operated to his advantage, so far as the actual purchase of the piling is concerned. This was seconded by Mr. Jelin and adopted.

Route 15, Section 5

On recommendation of the State Highway Engineer, Commissioner Kidde moved the acceptance of an offer made by the State Board of Commerce and Navigation to make a grant under water of Menantico Creek on Route 15, Section 5, Millville-Menantico section, for the consideration of $1.00 per foot for each side of the roadway and a dollar additional for crossing right. This was seconded by Mr. Stewart and adopted.

Right of Way-Route 3, Section 4.

On recommendation of the State Highway Engineer, Commissioner Kidde moved the approval of purchase agreement for the acquisition of the property of Charles H. Dorengach and wife on Route 3, Section 4, for the consideration of $18.00. This was seconded by Mr. Stewart and adopted.

Right of Way-Route 5, Section 12

On recommendation of the State Highway Engineer, Commissioner Stewart moved the approval of the purchase of the following property on Route 5, Section 12, Netcong-Canal Culvert section:

Parcel	#11	Andrew McCabe	Consideration	$87.50
"	#36	Wm. E. King Estate	"	1.00
"	#37	Wm. E. King Estate	"	1.00

This was seconded by Mr. Kidde and adopted.

Right of Way-Route 15, Section 5.

On recommendation of the State Highway Engineer, Commissioner Kidde moved the acceptance of quit claim deed on Route 15, Section 5, Millville-Menantico Creek section, from Wilfred Holzinger for the consideration of $1.00, with the provision that if the existing ditch along lands of the grantor required relocation, it shall be piped and covered with earth. This was seconded by Mr. Jelin and adopted.

Olcott Square-Route 16, Section 6-A

State Highway Engineer Sloan presented for the approval of the Commission, agreements to be entered into with the Township of

DEC 2 3 1923

Bernards covering the cost of extra width of pavement to be done at Olcott Square in Bernardsville on Route 16, Section 6-A, Bernardsville-Passaic River section. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission authorized approval of agreement with the Township of Bernards and directed the Chairman to sign the necessary papers after approval by the State Highway Engineer.

Route 1, Mercer County ✓

On recommendation of the State Highway Engineer, Commissioner Kidde moved the approval of agreement with Mercer County covering the construction of a storm drain on Route 1 at the intersection of Nottingham Way and Hamilton Avenue and authorized the Chairman to sign the same after approval by the State Highway Engineer. This was seconded by Mr. Jelin and adopted.

Dinner ✓ ✓

Highway Commission Luncheon

The Secretary informed the Commission that arrangements have been made as requested for the State Highway Commission to lunch with the various heads of the Divisions of the Highway Department at the Stacy-Trent Hotel at 1 o'clock this day.

On motion by Mr. Kidde, seconded by Mr. Jelin, the meeting recessed for lunch at 12:45 P.M. The meeting was resumed by the Commission at 3:00 P.M. with the same members present as at the morning session.

Signs on State Highways ✓

Commissioner Kidde presented for the consideration of the Commission, two plans submitted by the U. S. Advertising Company for the erection of signs on State highway construction, and he suggested that the Maintenance Division advise the Commission as to what the cost would be for the painting and erection of such signs, and he moved that there be prepared a comparison of the proposition offered by the U. S. Advertising Corporation and the Maintenance Division, in order that the Commission might give the same consideration. State Highway Engineer Sloan suggested that it might be possible to have the erection of these signs made a part of the contract to be entered into by each contractor for his particular work. This, of course, would carry with it specifications in order that all the signs might be identical.

Route 12, Penalty Claim

State Highway Engineer Sloan presented to the Commission a communication received from the Dover Boiler Works in which a claim was made for the remittance of penalty on the construction of bridges on Route 12, it being their claim that they were unduly held up for one month between July 27th,1921 and August 27th, 1921 in the receipt of a signed contract from the State for their work. State Highway Engineer Sloan reported that this work was accomplished prior to his assuming office as State Highway Engineer, and the records would indicate that there was a delay as claimed by the Dover Boiler Works, and in view of the fact that the total penalty involved covered 91 days, he would recommend a remittance of 30 days of this penalty, due to the fact that the contract was not delivered to the Dover Boiler Works at the proper time. Commissioner Kidde stated that he recalled that this matter was referred to him and there had been so much delay on the work it was his purpose to penalize the contractors for the work, but he felt ~~felt~~ that the claim made was a fair one and he moved that an allowance be made to the Dover Boiler Works of 30 days time, and that the application of the penalty be made for the remaining days overtime. This was seconded by Mr. Stewart and adopted.

Passaic River Bridge

State Highway Engineer Sloan stated to the Commission that he was ready to recommend award of contract for the construction of the Passaic River Bridge at M.P. 32.2 to the Hoffman Construction Company of Bernardsville, the lowest bidder on this work at $31,951.88. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission unanimously adopted the following resolution:

> RESOLVED, that the State Highway Commission does hereby make award of contract for the construction of the Passaic River Bridge at M.P. 32.2 on Route 16, Section 6-A, to the Hoffman Construction Company of Bernardsville, New Jersey, at their's, the lowest bid, amounting to $31,951.88, and

BE IT FURTHER RESOLVED, that the Chairman is authorized to sign the necessary contracts after approval by the State Highway Engineer.

Cedar Bonnet Bridge,
Over Manahawkin Bay

State Highway Engineer Sloan resubmitted to the Commission the report of bids received on December 10th for the Cedar Bonnet Bridge over the Manahawkin Bay, the lowest bid being by the Krellwitz Contracting Company at 116.9% of the Engineer's estimate, and he recommended the rejection of all the bids and the re-advertisement of this work early in the spring. State Highway Engineer Sloan advised that his recommendation in this case was due to the fact that he did not feel that the Krellwitz Contracting Company was a responsible construction firm, having neither the experience nor the financial ability to justify the State in trusting the work of such a nature to that firm. Commissioner Kidde inquired whether in the event it was to be readvertised, there would be any change in the specification. State Highway Engineer Sloan advised that it would be necessary to revise the estimate for steel for the work, and Commissioner Stewart moved that the recommendation of the State Highway Engineer be approved, and that all bids be rejected, and be readvertised early in the spring, and in the meantime plans to be carefully studied by the State Highway Engineer with a view toward making such revisions as are necessary on the work. This was seconded by Mr. Kidde and adopted.

Communication-Thomas H. MacDonald

The Secretary presented to the Commission a communication received from Hon. Thomas H. MacDonald, Chief of the Bureau of Public Roads at Washington, advising that he will give careful consideration to the Advisory Board reports as presented to the Commission, and will be very glad to arrange to talk over the problems with any members of the State Highway Commission who might come to Washington in the near future. On motion by Mr. Stewart, seconded by Mr. Jelin, the matter was referred to Commissioner Kidde and State Highway Engineer Sloan to take the same up in Washington with Director MacDonald.

Charles A. Mead-Communication

The State Highway Engineer presented a communication from Mr. Charles A. Mead, Engineer of Bridges & Structures for the Board of Public Utility Commissioners, transmitting a copy of the report of the Sub-Committees on Bridges and Structures, as made to the American Association of State Highway Officials at New Orleans on December 3d, at which time he acted as representative of the State Highway Department. On motion by Mr. Stewart, seconded by Mr. Kidde, the communication was ordered received and the report placed on file for study.

Poles and Wires on State Highways

State Highway Engineer Sloan presented to the Commission an opinion from the Attorney General on the matter of the installation of poles and wires, in which he advised that under an existing law, the Public Service Corporation has permission to use public roads for the purpose of the erection of poles to sustain the necessary wires and fixtures, and it is the duty of the State Highway Commission in the place of the municipality to so designate such route or routes over which such wires and poles may be placed. State Highway Engineer Sloan presented a report on the matter, together with a recommendation that a conference of the Public Utility Commission be held and a general form of agreement be arranged satisfactory to all concerned, which will cover all cases of installation of poles and wires and which agreement will provide that for each specific case the Public Utility Commission shall obtain a permit from the State Highway Department, designating the specific location and the conditions to be fulfilled in such installation. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission approved the recommendation of the State Highway Engineer, and directed that the matter be referred to Commissioner Stewart for the purpose of drawing up a proper agreement form.

Maintenance
Glutrin-Atlantic County

Commissioner Kidde advised that it was necessary for him to leave the meeting at this time, but before going he would report that he had received a communication from Mr. S. P. Leeds, President of the Atlantic City Chamber of Commerce, in which Mr. Leeds expressed interest in the price of Glutrin as purchased by Atlantic County with the approval of the State Highway Commission during the fall of this year, and he suggested that the Secretary forward to Mr. Leeds such records concerning the approval as was contained in the minutes of the State Highway Commission, especially where it was shown that the work was accomplished as an emergency measure.

Staten Island-South Elizabeth Bridge

Commissioner Kidde also advised that Senator Pierson was in the office in the morning and read before the members of the Commission a plan in which Union County was very much interested, which had for its purpose the building of a bridge which would form a connection between Staten Island, New York, and South Elizabeth. Such a bridge would form a continuation of the proposed crescent road construction around Elizabeth and would shorten the distance between New York and New Jersey, and at the same time relieve Route 1, through Newark and Jersey City, of considerable traffic.

Invitation-New Jersey Chamber of Commerce

Commissioner Kidde advised that he had received an invitation from the Special Highway Committee of the New Jersey Chamber of Commerce, inviting the Commission to Newark on January 4th at 6:30 P. M. as its guests at a dinner meeting, and he moved that the invitation be accepted. This was seconded by Mr. Jelin and adopted, the Secretary being directed to notify the Commissioners of this appointment.

Route 10, Section 2, Sidewalks

State Highway Engineer Sloan presented a report as made in connection with the construction of sidewalks on Route 10, Section 2, Broad Avenue-Glenn Road, in which report it was stated that the previous Commission obligated to provide these sidewalks at the street intersections at the time the property was acquired for right of way. On motion duly seconded, the report was referred to Commissioner Kidde, since he had made inquiry in the matter.

DEC 23 1923

Policy - Highway Comm.

Prospective Bidders' Names

State Highway Engineer Sloan submitted for the consideration of the Commission the question of whether or not the State Highway Department should furnish the names of prospective bidders on State Highway road and bridge work to interested parties. He advised the Commission that numerous requests were received for this information and it had not been the policy in the past to grant this information. He recommended that the Commission authorize that these names be given upon request for same. On motion by Mr. Jelin, seconded by Mr. Stewart, the recommendation of the State Highway Engineer was adopted.

Route 11, Passaic Avenue

State Highway Engineer Sloan reported to the Commission that a resolution had been adopted by the Passaic County Board of Freeholders, accepting the completed work on Route 11, Passaic Avenue, in Passaic, and authorizing final payment to be made subject to the approval of the State Highway Engineer. On motion by Mr. Jelin, seconded by Mr. Stewart, the matter was referred to Commissioner Kidde for inspection prior to final acceptance.

Expenses-Ocean City Bridge

State Highway Engineer Sloan presented to the Commission a communication received from J. D. Loizeaux Lumber Company of Plainfield, N. J. in which they expressed the fact that they are under no obligations to stand for expenses incurred by Mr. N. J. McGowan in assisting them with the release of lumber from the south on their contract for the Ocean City Bridge, since Mr. Loizeaux had personally gone south at considerable expense to perform this work, and that they had been obligated to purchase a considerable amount of lumber in the open market. On motion by Mr. Stewart, seconded by Mr. Jelin, the State Highway Commission directed that the amount of $439.95 as charged for the expenses of Mr. N. J. McGowan, be remitted to the J. D. Loizeaux Lumber Company of Plainfield, N. J.

Employments

On recommendation of the State Highway Engineer, Commissioner Stewart moved the ratification of the following list of employments as approved by the State Highway Engineer since the last meeting of the Commission:

Jan. 1st, 1924	G. H. Atwood,	Amboy Br. Drafts.	$226.00 mo.
Dec. 18th, 1923	M. J. Daitz,	Chauffeur	.45 hr.
" 17th, "	C. J. Speck,	Motor Truck Dr.	.45 "
" 17th, "	Harry Jordan,	" " "	.40 "
" 17th, "	E. E. Russell,	" " "	.45 "
" 15th, "	W. S. Pittenger,	Laborer	.45 "

Kaighn Ave. Extension, Camden Co. ✓

On recommendation of the State Highway Engineer, Commissioner Jelin moved the acceptance and final payment on the Kaighn Avenue Extension, Camden County, Motor Vehicle Aid work. This was seconded by Mr. Stewart and adopted.

Inland Waterway, Route 4. ✓

The Secretary advised the Commission that Mr. S. S. Thompson, low bidder on the Inland Waterway Bridge on Route 4, was present at this meeting to ascertain what decision the Commission would make with reference to the taking over of the work. State Highway Engineer Sloan stated that he had received a communication from Victor Jelineau, Director of the Board of Commerce & Navigation, in which it was stated that the contractor for dredging the Inland Waterway Canal could not give a satisfactory answer as to when he could start this work, but he was sure that he would finish his contract for the canal before the date set for the completion, which was July 1st, 1924. State Highway Engineer Sloan advised that he had received a proposition from Mr. Thompson whereby he would enter upon the work and perform the necessary excavation for piers at an additional cost of $35,000.00. The Commission directed that Mr. Thompson be given a hearing at this time. Mr. Thompson appeared and was questioned as to his ability to complete the work within the time specified, even though the award of contract was held up until this time. Mr. Thompson advised that he could not definitely agree to complete the work on July 1st, 1924, but he would be willing in the event a contract was awarded to him at once, to fix the date of completion in the contract at August 1st, 1924. Commissioner Jelin inquired of Mr. Thompson whether he would be willing to accept the award of contract and hold up the work until after the canal had been excavated by the dredging contractor. Mr. Thompson advised that he had taken this contract with a view toward keeping his forces employed during the winter, and he would prefer to have the contract entirely cancelled rather than to hold the same for any length of time. After further discussion, Commissioner Stewart moved that in view of the circumstances the contract be signed and returned to Mr. Thompson with the date of completion fixed at August 1st, 1924, and that a statement be requested from Mr. Thompson that he will make every effort to push the work through before that date, it being further understood that an extra allowance of $3,500.00 will be allowed Mr. Thompson for excavation work to permit of the placing of piers at this time. This was seconded by Mr. Jelin and adopted.

Commissioner Stewart moved that the next meeting of the Commission be held on Thursday, January 3d, at 10:30 A.M. and at this time the matters concerning the annual report will be taken up for consideration. This was seconded by Mr. Jelin and adopted.

On motion by Mr. Jelin, duly seconded, the meeting adjourned at 5:00 P.M. to meet in regular session on Thursday, January 3d, 1924.

Respectfully submitted,
A. LEE GROVER
Secretary

MINUTES OF MEETING - January 3, 1924.

A regular meeting of the State Highway Commission was held at the offices of the Commission, Broad Street Bank Building, on Thursday, January 3, 1924. The meeting was called to order by Chairman Scott at 10:30 A.M.

Present: - General H. L. Scott, Chairman, and
Messrs. Percy H. Stewart, Walter Kidde and
Abraham Jelin.

The Commission, after opening the meeting, immediately went into conference on matters concerning necessary legislation which were to be taken up at the next session of the Legislature.

On motion by Mr. Kidde, seconded by Mr. Jelin, the Commission recessed for luncheon at 1:00 P.M. to meet in regular session again at 2:00 P.M. The Commission resumed its meeting as agreed at 2:00 P.M. with the same members present as at the morning session.

Right of Way-Route 4, Perth Amboy

State Highway Engineer Sloan presented to the Commission an agreement for the purchase of property from the C. Pardee Works as necessary to be acquired on the right of way for the New Amboy Bridge, in which agreement the C. Pardee Works conveyed to the State for the sum of $67,143.77, three parcels of their property, it being understood that the office building now on this property reverts to the C. Pardee Works and shall be removed to their own property within sixty days from the date of the approval of title. Commissioner Kidde moved that the State Highway Commission approve the purchase of property necessary for the right of way on the New Amboy Bridge from the C. Pardee Works of Perth Amboy for the sum of $67,143.77 in accordance with an agreement of sale dated December 6th, 1923, subject to approval of the said agreement by the Attorney General's Department. This was seconded by Mr. Jelin adopted.

A. G. A. Signs

The Secretary presented a communication from Mr. H. V. Osborne, President of the State Board of Public Utility Commissioners, requesting the removal of highway light-house, located at the approach of the tracks of the West Jersey & Seashore Railroad, Wildwood Branch, where it crosses State Highway Route 14, in view of the fact that the Railroad Company has installed a standard red light flashing signal. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission directed that in accordance with the instructions from the Public Utility Commissioners, a notification be forwarded to the American Gas Accumulator Company, requesting them to remove the highway light-house now in this location,

New Jersey Constructors' Ass'n.

The Secretary presented a communication from the New Jersey Constructors' Association advising that a Committee of its membership was considering changes in the standard specifications as now used by the New Jersey State Highway Department, and in a spirit of cooperation were desirous of a hearing before the State Highway Commission with a view toward explaining such changes as they might deem beneficial to the tax-payers of the State, and to the contractors. On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission directed that the communication be received and acknowledged, the Secretary to advise the New Jersey Constructors' Association that a hearing would be granted its Specifications Committee on Tuesday, January 8th, for one hour, beginning at 10:00 o'clock. In connection with the foregoing matter, State Highway Engineer Sloan advised that the County Engineers were also taking up the matter of specification revision with a view toward having uniformity in State, county and township specifications. The County Engineers were desirous of ascertaining whether the State Highway Commission would permit the inclusion of patented types of paving as a part of the standard specifications, inasmuch as these patented pavements had been omitted from the specifications during the year 1923. State Highway Engineer Sloan stated to the Commission that the specification was merely used as a reference book, and for this reason he would recommend the inclusion of the most important types of patented bituminous paving as part of the specification book in order that the counties may use these types in obtaining competition under the provisions of the Mathis Act. After further discussion on this matter, Commissioner Jelin moved that it be placed on the table for two weeks. This was seconded by Mr. Kidde and adopted.

The Secretary informed the Commissioners that the meeting of the Highways Committee of the New Jersey Chamber of Commerce, to which the Commission had been invited, would be held on Friday, January 4th at 6:00 P M. at the Hotel Robert Treat, Newark, N. J.

Cape May-Lewes Ferry

Commissioner Kidde directed the attention of the Commission that in connection with the study to be made of the Cape May-Lewes Ferry, a promise had been made at the Atlantic City meeting by one of those in attendance that the Commission would be furnished with a history of the ferry boat services, which plied between Cape May County and Delaware in past years. The Secretary informed the Commission that this had been promised by Mr. Ogden of the Cape May Chamber of Commerce, and he was directed to get in touch with Mr. Ogden and have this information forwarded for the use of the Committee.investigating the Cape May-Lewes Ferry.

Route 16, Section 2

State Highway Engineer Sloan reported the completion of Route 16, Section 2, Mine Mount Road to Bedminster Corner, as of December 22, 1923. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission directed that this matter be referred to Commissioner Stewart for final inspection.

Route 6, Section 12-A.

State Highway Engineer Sloan reported to the Commission the completion of Route 6, Section 12-A, Broad Street, Bridgeton. On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission directed that final inspection of this work be referred to Commissioner Jelin.

County Avenue, Hudson County

Commissioner Kidde reported that he had inspected and was ready to move acceptance and final payment on County Avenue, between County Road and the Paterson Plank Road in Hudson County, work done under Motor Vehicle Aid. This was seconded by Mr. Jelin and adopted.

Asphalt Mixing Machinery

Commissioner Stewart offered the following resolution and moved its adoption:

> RESOlVED, that the State Highway Engineer be requested to prepare estimates as to the cost of procuring suitable asphalt mixing machinery, portable in nature, for the laying of bituminous surfaces on small sections of road in isolated localities where satisfactory competition cannot be secured and further that the Maintenance Department be requested to furnish an estimate of cost for providing and laying such short sections of Sheet Asphalt pavement, as would be necessary in the case of Main Street, Clifton.

New Brunswick Bridge

State Highway Engineer Sloan reported that the Chairman had made inquiry concerning the progress on the new bridge at New Brunswick, and he had informed him that the only action which could be taken was the same as he had recommended to the Commission before, namely: that the Commission could place itself on record with the State House Commission as to its purpose and the route to be followed. Commissioner Jelin inquired whether there was any opinion from the Attorney General as to the right of the State Highway Department to condemn property owned partly by the State. The Secretary advised that an opinion had been verbally received to the effect that the State cannot condemn public, ecclesiastical and cemetery property, but this was not in written form. Commissioner Kidde, therefore, moved that the Secretary be requested to obtain the decision of the Attorney General in writing relative to whether or not the State Highway Commission can condemn property partly purchased by endowment and partly owned by the State.

Excess Loading on State highways

State Highway Engineer Sloan reported to the Commission that he had held a conference with Motor Vehicle Commissioner Dill, relative to the granting of permission for the carrying of excess loads beyond that specified by the Law over the highways, and it was the feeling of Commissioner Dill that the present law was entirely adequate, if not already excessive, and he did not believe that the State Highway Commission should grant any authority beyond that already specified in the law.

Route 11, Belleville

State Highway Engineer Sloan presented to the Commission as requested at a former meeting, a statement of the estimate of cost of the reconstruction of Route 11, through the Town of Belleville, which statement showed a total cost of reconstruction in the amount of $371,380.00, of which the State's share of 22 feet width, inclusive of the trolley track area, was $167,727.50, and the extra widening to be paid for by the Town of Belleville amounted to $203,652.50. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission directed that the matter be placed on the list of projects to be considered when money is found available. State Highway Engineer Sloan called attention to the fact that just as this estimate is submitted for Belleville, in all future improvements where trolley tracks are to be considered in the improvement, plans were being made to have the trolley track area included as part of the 22 feet of the paved width to be provided by the State, since it was found that where there was no provision for the trolley track paving, these 22 feet, as furnished by the State with two 11 foot strips on each side of the trolley tracks, became nothing more than parking space for automobiles, through municipalities. All of the Commissioners expressed approval of the plan suggested by the State Highway Engineer for the inclusion of trolley track width of pavement in the amount to be paid for by the State.

Added Routes for Federal Aid 7%

State Highway Engineer Sloan presented to the Commission a report with maps showing routes to be added to the Federal Aid 7% System, and which would take all the remaining mileage necessary to complete this 7% System. Commissioner Kidde stated that he desired more information concerning the fact as to whether it would be possible to make any changes in this system after the total mileage had been agreed upon and he moved that the matter be referred to the Committee to take up with Mr. MacDonald, Chief of the Bureau of Public Roads, in Washington, on Wednesday next, in order to determine whether any substitutes might be made in this final mileage report after same was rendered to the Federal Department. This was seconded by Mr. Jelin and adopted.

Extension of Time-Springfield Avenue-New Providence Road

On recommendation of State Highway Engineer Sloan, Commissioner Jelin moved the approval of an extension of time to November 1st, 1923, on Springfield Avenue-New Providence Road, Warren County, Motor Vehicle Aid. This was seconded by Mr. Kidde and adopted.

Georgetown Road, Salem County

On recommendation of the State Highway Engineer, Commissioner Jelin moved the acceptance and final payment on the George town Road, Upper Penns Neck Township, Salem County, Township Aid. This was seconded by Mr. Kidde and adopted.

Employment

On recommendation of the State Highway Engineer, Commissioner Jelin moved the ratification of the following employment as made since the last meeting of the Commission: Harry Baum, Gravel Patrolmen, effective January 1st, 1924 at $93.00 per month. This was seconded by Mr. Stewart and adopted.

Right of Way-Route 1

On recommendation of the State Highway Engineer, Commissioner Jelin moved approval of the purchase of property needed on Route 1, Nottingham Way, for drainage purposes from the Estate of C. C. Rogers, for the consideration of $1,000.00. This was seconded by Mr. Stewart and adoped.

American Road Builders' Convention

The Secretary called the attention of the Commission to the fact that the American Road Builders' Convention would be held during the week beginning January 14th and reservations were being made for the Commissioners who would attend this meeting.

Annual Report

The Commission next took up for discussion with the State Highway Engineer, the matter of the Annual Report for the year 1923. State Highway Engineer Sloan informed the Commission that the report was now in preparation and could be prepared, with the exception of the financial statements, early in January, but the financial statements, due to the closing of the books on December 31st, would take approximately one month for completion. Commissioner Stewart stated that in view of the fact that the Legislature would convene early in January and may desire such information and statistics which would be contained in the report of the Commission,he would suggest that a skeleton form of the subjects covered in the Annual Report be prepared for the Legislature, with a statement advising that these are matters being considered and on which there is information available, but that owing to mechanical impossibilities of completing the report because of the ending of the fiscal year on December 31st, this skeleton outline is prepared in order that if any facts are necessary which may have a bearing on legislation, which they have in mind, the same will be immediately made available. After further discussion, Commissioner Kidde suggested that the State Highway Engineer present his Annual Report, which would include reports from all the Division Heads, to the Chairman of the State Highway Commission on or before February 2nd, 1924, and that the Chairman prepare the Annual Report for the State Highway Commission as soon thereafter as possible in order that sufficient copies of the report might be prepared and forwarded to the Governor.

On motion by Mr. Jelin, seconded by Mr. Kidde, the meeting adjourned at 4:45 P.M. to meet in regular session on Tuesday, January 8th, at 10:30 A.M.

Respectfully submitted,

A. LEE GROVER,

Secretary

MINUTES OF MEETING - January 8th, 1924.

A regular meeting of the State Highway Commission was held at the offices of the Commission, Broad Street Bank Building, Trenton, on Tuesday, January 8th, 1924. The meeting was called to order at 10:30 A.M. by Chairman Scott.

Present: General H. L. Scott, Chairman, and
Messrs. Percy H. Stewart, Walter Kidde and
Abraham Jelin.

Minutes Approved

Commissioner Kidde reported having carefully read the minutes of November 20th, and moved the same be approved as mailed. This was seconded by Mr. Jelin and adopted.

Commissioner Kidde reported having carefully read the minutes of November 27th and moved the same be approved as mailed. This was seconded by Mr. Jelin and adopted.

Commissioner Kidde reported having carefully read the minutes of December 4th and moved the same be approved as mailed. This was seconded by Mr. Jelin and adopted.

Burlington County Hearing

The Secretary advised the Commission that a delegation from the Burlington County Board of Freeholders was present concerning Burlington County Highway matters. On motion, duly seconded, a hearing was granted. There appeared Mr. Charles E. Stout, Chairman of the Road Committee, J. L. Wright, Director of the Board, County Engineer H. P. Smith, and County Road Supervisor McFarland. Mr. Stout acted as spokesman for the delegation and advised that the County of Burlington was very desirous of securing, in the improvement by the State, that portion of the Mathis Highway which lies in Burlington County from Browns Mills to the Ocean County Line. They also desired State Aid upon a section of Road between Medford and Hammonton, the same being an important connecting link to Atlantic City. In addition to this, aid was requested on a length in the Kings Highway from Moorestown to Haddonfield. On these latter two sections it was proposed to reconstruct with gravel, making the same suitable for traffic. The County officials spoke of the satisfactory results obtained in Burlington County by the placing of bituminous surface upon the old macadam and telford foundations, and stated that at the present time these roads were better than a section of concrete on Route 2 as improved three years ago.

Commissioner Kidde undertook to explain to the County Board that the State Highway Commission was very desirous of assisting the various counties of the State in their road undertakings, but due to the major projects at Jersey City and Camden, the State Highway Commission had no funds with which to construct or maintain those additions to the State Highway System which were adopted by the Legislature after the $40,000,000 Bond Act became effective. He suggested that the county officers use their influence in order that the Legislature might determine means whereby funds could be made available for such work. As far as the State Aid was concerned, there appeared to be no funds from which at the present time this could be granted, but as soon as there were funds available the request would be given consideration.

New Jersey Constructors' Ass'n.

The Secretary informed the Commission that in accordance with invitation extended at the last meeting, a delegation from the New Jersey Constructors' Association was present to discuss matters of revision in the 1924 specifications. On motion, duly seconded, a hearing was granted. There appeared Mr. T. J. Wasser, of the Public Service Production Company, Mr. Kavana~~u~~gh and Mr. Erwin of the Union Paving Company, all of these composing the Specifications Committee from the New Jersey Constructors' Association. Mr. Wasser advised that although a definite appointment was made for this day, the Specifications Committee was not yet ready with all of its recommendations, and he expressed a desire that the privilege be extended to his Committee for the submitting of a brief on the matter of specification revision to the State Highway Commission, and that after ample time had been given for the subjects to have consideration, that another date be set for a hearing. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission directed that a hearing be granted the Committee from the New Jersey Constructors' Association after a brief has been submitted by them.

Postponement of Bids

Mr. [illegible] further inquired of the Commission whether it would be possible to arrange the postponement of the receipt of bids on Route [illegible], Section 11, from January 21st to January 28th, in view of the fact that a number of contractors will be in attendance at the American Road Builders' Association Convention in Chicago, and will not have sufficient time to make up bids on the work. On motion by Mr. Kidde, seconded by Mr. [illegible], the State Highway Commission directed that the receipt of bids for Route [illegible], Section 11, be changed from January 21st to January 28th, at the same hour.

Request for Aid-Monmouth County

The Secretary informed the Commission that a delegation from the Monmouth County Board of Freeholders was present concerning aid on the Smithburg-Freehold Road. There appeared Mr. H. G. Borden, Chairman of the Road Committee, and George K. Allen, County Engineer. Mr. Allen presented completed plans for the Smithburg-Freehold Road, Section [illegible], and advised that aid was requested from the State on this work which was [illegible].13 miles long, at a total estimated cost of $108,000.00. He informed the Commission that it was proposed to apply the State Aid balance existing in the amount of $7,[illegible].00 on this work, and the county desired aid from the State to the extent of 40%. Mr. Kidde explained to the delegation that projects now under consideration by the Commission are such that it was impossible at the present time to determine whether there are any funds available to the State Highway Commission. Mr. Allen stated that Monmouth County had received no aid from the State for new construction projects during the last two years. The Secretary informed the Commission that a request for aid on this work was placed in the special file until such time as it was determined that balances would remain to the State Highway Commission that would be applicable for such work, and he also advised that until the closing of the books, this balance would not be determined upon. On motion by Mr. Kidde, seconded by Mr. [illegible], the plans and specifications were ordered received and the matter of aid was held up for later consideration.

Reimbursement-Monmouth Co.

Mr. Borden inquired as to the date when reimbursement would be paid by the State upon work which the county had performed in the amount of $200,000.00, being due in 1924. The Secretary advised that as soon as the 1924 funds were certified to the State Highway Commission, same could be authorized to the several counties, which was expected to be on or before March 1st.

Good Roads Association

The Secretary presented a communication received by the Chairman from Harry J. Meixell, Secretary of the Good Roads Association of New Jersey, in which a request was made for various statistics and data in connection with the Advisory Board Reports and funds of the State Highway Commission. On motion by Mr. Stewart, seconded by Mr. Kidde, the State Highway Commission directed that the communication be acknowledged and that Mr. Meixell be advised that the State Highway Commission will be glad to have him come to Trenton and obtain any information that may be available in the records of the State Highway Department on the subjects mentioned in his communication.

Mr. Schiller's Appointment Requested

The Secretary presented a communication received from Senator Pierson by Chairman Scott, recommending the appointment of a Mr. Schiller for the position of Title Searcher, since he had passed the recent examination. A similar communication was presented from David S. Forman of Elizabeth, New Jersey, on behalf of Mr. Schiller. The Secretary informed the Commission that the certification had not yet been made by the Civil Service Commission of the eligible list for this position. On motion by Mr. Stewart, seconded by Mr. Kidde, the communication was ordered received and acknowledged with the advice that the State Highway Commission will be glad to consider the matter of appointment when the certification list of those who passed the examination are received from the Civil Service Commission.

Request Aid- Warren Co.
Bristol Corner-West Portal Road

The Secretary presented a communication from Mr. H. M. Riddle of Asbury, New Jersey, requesting the consideration of the Commission toward giving aid on the Bristol Corner-West Portal Road, in

Bethlehem Township, Warren County. State Highway Engineer Sloan advised that this was entirely a township road and outside the jurisdiction of the State. On motion by Mr. Kidde, seconded by Mr. Stewart, the communication was ordered acknowledged with the advice that the State Highway Commission can do nothing in the matter, since it is entirely a township project.

J. Arthur Stowe-Communication

The Secretary presented a communication from J. Arthur Stowe, enclosing a copy of a communication forwarded by him to the Hudson County Consolidation League, on the matter of highway traffic in the vicinity of Jersey City and the New Vehicular Tunnel. On motion by Mr. Kidde, seconded by Mr. Stewart, the communication was ordered received and placed on file with thanks.

Hoboken Chamber of Commerce Meeting

Commissioner Kidde took occasion at this time to advise that he had attended a meeting on the 7th inst. with a group of men from the Chamber of Commerce of Hoboken, N. J., and advised that it was their desire to have an outlet for traffic from Hoboken to the Vehicular Tunnel, which would require the widening of Hoboken streets to connect with Grove and Henderson Streets. This would also form a connection from the Vehicular Tunnel to the Paterson Plank Road. State Highway Engineer Sloan advised that in the Advisoyr Board report of the Vehicular Tunnel traffic, special mention was made that the existing streets would provide for traffic to Hoboken and any connections were necessarily local improvements. Commissioner Kidde stated that this matter would be brought out at the hearings to be held by the Commission at a later date.

Highway Lighthouse Removal

The Secretary presented a communication from the Central Railroad of New Jersey, requesting the removal of a highway lighthouse from the Seventh Avenue grade crossing in Belmar, N.J. to another point on the highway where it would not conflict with the new automatic flashing signal of the Railroad Company. On motion by Mr. Kidde, seconded by Mr. Stewart, the matter was ordered referred to the Public Utility Commission for their investigation and advice on the matter, and that a communication be forwarded to the Central Railroad of New Jersey, advising them of this action.

State Highway Commendation-Hackettstown

The Secretary presented a resolution from the Common Council of the Town of Hackettstown, commending the State Highway Commission for its cooperation in the vicinity of Hackettstown. On motion by Mr. Stewart, seconded by Mr. Jelin, the resolution was ordered received and acknowledged with thankful appreciation.

Pensauken Township Request

The Secretary presented a communication from Senator Albert S. Woodruff of Camden County, New Jersey, with advice that the people of Pensauken Township and Town of Merchantville are to hold a meeting on Tuesday evening, January 15th, and desired permission for Mr. Williams, Division Engineer of the State Highway Department to appear before the meeting to discuss the Crescent Highway where it cuts through these places. State Highway Engineer Sloan advised that Mr. Williams will be in Chicago, attending the American Road Builders' Association conferences on the 15th and it would not be possible for him to be present at that time. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission directed that the communication be acknowledged, and that Senator Woodruff be advised that it would be impossible for Mr. Williams to attend and that it will probably be much better to have the local body formulate their ideas among themselves and have the same ready for presentation when public hearings are arranged, to which they will certainly be invited.

Morris County-Motor Vehicle Funds

The State Highway Engineer presented a resolution from the Morris County Board of Freeholders, requesting that the State Highway Commission reserve from the 1924 Motor Vehicle Funds the same allotment as was made in 1923, for the Long Valley Road in order that the 1923 account might be released for the payment to the county of the account as already rendered to the Commission. State Highway Engineer Sloan recommended action in view of the fact that work on the Long Valley Road could not be undertaken until the present year. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway

Commission approved the recommendation of the State Highway Engineer and authorized the release of 1923 Motor Vehicle Funds to Morris County as set up for the Long Valley Road, and directed that an account be set up from the 1924 funds in the same amount covering this improvement.

Route 5, Section 13-Right of Way

On recommendation of the State Highway Engineer, Commissioner Jelin moved the purchase of property on Route 5, Section 13, Budd Lake-Netcong section, from Mrs. Ellen J. Allen, for the consideration of $140.00. This was seconded by Mr. Kidde and adopted.

Newton-Yellow Frame Road, Sussex Co.

State Highway Engineer Sloan presented to the Commission for its approval, a resolution from the Board of Freeholders of Sussex County, rescinding action taken by that Board in authorizing a Bond Issue of $190,000.00 for financing the construction of the Newton-Yellow Frame Road under Federal Aid, in view of the fact that the County of Sussex was unable to undertake this improvement. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission directed the approval of the resolution as adopted by the Sussex County Board of Freeholders, and rescinding action taken by that Board in authorizing a bond issue to finance the Federal Aid construction on the Newton-Yellow Frame Road, this approval carrying with it a withdrawal from Sussex County of any Federal Aid or State Aid granted on this project heretofore.

Perth Amboy Bridge-New, Route 4

The State Highway Engineer presented to the Commission communications from Stillman-Delehanty-Ferris Company, general contractors on the New Perth Amboy Bridge, asking approval of award of subcontracts for the grading and approach work to Graham & McKeon of Perth Amboy, and with the Bethlehem Steel Company for the machinery steel work and electrical work for the operation on the draw span. State Highway Engineer Sloan recommended approval of these subcontracts in accordance with the provisions of the general contract. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission approved the subcontracting of work as recommended by the State Highway Engineer on the contract for the New

Perth Amboy Bridge to Graham & McKeon, of Perth Amboy, and the Bethlehem Steel Company, in accordance with the provisions of the contract.

Cumberland Causeway, Cumberland Co.

On recommendation of the State Highway Engineer, Commissioner Jelin moved the approval of plans and specifications for the Cumberland Causeway, Cumberland County, Motor Vehicle Aid work. This was seconded by Mr. Stewart and adopted.

Buena-Tuckahoe Road

On recommendation of the State Highway Engineer, Commissioner Jelin moved approval of plans and specifications for the Buena-Tuckahoe Road, Section 2, Weymouth Township, Atlantic County, Township Aid. This was seconded by Mr. Kidde and adopted.

Employments

On recommendation of the State Highway Engineer, Commissioner Jelin moved the approval of the following list of employments made since the last meeting of the Commission:

Jan. 1, 1924	Geo. Rainey	Motor Truck Driver	$ .40 hr.
" 2, "	Jos.E.Brettell	Mechanic	.60 hr.

This was seconded by Mr. Stewart and adopted.

Bridge Street, Somerville

Request for Aid

State Highway Engineer Sloan presented to the Commission a communication from Mr. L. H. Schenck, Borough Attorney of Somerville, relative to the condition on North Bridge Street, Somerville, which he claims was used as a detour while the road to Pluckemin was being constructed. State Highway Engineer Sloan advised that the road mentioned by Mr. Schenck was not designated as an official detour and if traffic made use of the same, the State Highway Commission could not be responsible. State Highway Engineer Sloan further recommended that the Borough of Somerville be advised that the State Highway Commission is unable to make the necessary repairs in view of the fact that this road was not an official detour. Commissioner Kidde moved the approval of the action of the State Highway Engineer, which was seconded by Mr. Stewart and adopted.

Patented Paving

Commissioner Jelin moved that patented paving specifications as laid on the table at the last meeting be brought up for consideration at this time. This was seconded by Mr. Stewart and adopted. Commissioner Kidde moved that the State Highway Engineer be instructed not to include patent paving specifications in either the State Highway or State Aid specifications for 1924. This was seconded by Mr. Jelin and adopted.

Right of Way-Route 10

Commissioner Jelin presented a communication received from the Councilman (Mr. H. D. Shall) of Fort Lee, New Jersey, in which communication Mr. Shall expressed desire that the Commission arrange for the return of property taken from Mrs. Anna B. Williams, on the line of Route 10, Bluff Road, at Fort Lee, which land was acquired for road construction purposes, but the highway was moved from this location to what is known as the Blue Route. The Secretary informed the Commission that after the line of Route 10 had been changed from the Bluff Road to what is known as the Blue Route, legislation having been passed which would permit the State Highway Commission to give notice of intention to sell property acquired by the State for which there is no use, to the abutting property owners, and that after this notice the property could be disposed of either by private or public sale. Commissioner Jelin moved that before any action is taken, a report be submitted to the State Highway Engineer by the Right of Way Division with advice as to the conditions now existing along the line of this property, and in order that proper notice may be given to abutting property owners in accordance with the Statute of the intention to sell, and that opportunity be extended to the said owners to repurchase the property at a price not less than that paid by the State, and in the event that the owners do not accept, that the same be offered at public or private sale. This was seconded by Mr. Stewart and adopted.

Township Road Maintenance

State Highway Engineer Sloan presented for the consideration of the Commission the matter of township road maintenance as reported to him by Assistant State Highway Engineer Reed. He advised that Mr. Reed recommended that the State Highway Commission set aside the sum of $100,000.00 in order to place the townships of the State in a fair way to properly maintain their roads after they have been once improved with Township Aid funds. State Highway Engineer Sloan advised that inasmuch as the Township Act made it mandatory upon the township receiving aid to set aside $100.00 per mile annually for the maintenance work, he did not feel that the State Highway Commission could give additional funds on this account. Commissioner Kidde moved that a communication be forwarded to each beneficiary of the Township Aid fund, advising them that under the law they are responsible for the maintenance of the roads to the amount of $100.00 per mile, and that the State Highway Commission desires evidence of the fact that the said sum has been expended upon roads or has been set up in budget form to take care of the same. This was seconded by Mr. Jelin and adopted.

On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission directed that copies of the Legislative bills, affecting Highway matters, be reforwarded to each Commissioner by the Secretary.

On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission adjourned its meeting at 2:00 P. M. to meet in regular session on Tuesday, January 22nd, the week of January 14th being given over to the American Road Builders' Association conferences at Chicago.

Respectfully submitted,

A. LEE GROVER

Secretary

MINUTES OF MEETING - January 22, 1924.

A regular meeting of the State Highway Commission was held at the offices of the Commission, Broad Street Bank Building, Trenton, on Tuesday, January 22, 1924. The meeting was called to order at 10:30 A.M. by Chairman Scott.

Present: General H. L. Scott, Chairman, and
Messrs. Percy H. Stewart, Walter Kidde and
Abraham Jelin.

Minutes Approved

Commissioner Kidde reported having carefully read the minutes of December 18th as mailed by the Secretary and he moved that the same be approved with a correction on Page 4, Paragraph 1, to read "with the assurance to Hunterdon County that assistance would be given by the State when funds become available." This was seconded by Mr. Jelin and adopted.

Commissioner Kidde reported having carefully read the minutes of the meeting of December 28th, and he moved that the same be approved as mailed. This was seconded by Mr. Jelin and adopted.

Route 16, Section 2

Commissioner Stewart informed the Board that he had inspected the completed work on Route 16, Section 2, Mine Mount Road to Bedminster Corner, and eh would recommend acceptance of the same by the Commission. State Highway Engineer Sloan informed the Commission that acceptance of this work should carry with it an extension of time to the date of completion in view of the fact that the contractor had complied with the demand that the road be opened to traffic in September. Commissioner Stewart, therefore, changed his motion to read as follows:

That the State Highway Commission does accept the completed work on Route 16, Section 2, Mine Mount Road to Bedminster Corner in accordance with the terms of the Reimbursement Act, as entered into with Somerset County, the said acceptance to carry with it an extension of time to date of completion of the contract. This was seconded by Mr. Jelin and adopted.

Washington Township Committee-Hearing

The Secretary informed the Commission that a hearing had been requested by Mr. L. F. Castle, Chairman of the Washington Township

Committee, Morris County, with reference to Township roads, and reported that Mr. Castle was present at this time. On motion, duly seconded, a hearing was granted. Mr. Castle appeared and stated that he desired the Commission to reconsider action taken by the former State Highway Commission, withholding the sum of $6,000.00 as State Aid on the Long Valley-Fairmount Road in Washington Township. He explained that the funds for this work had been borrowed by the Township and they were as yet unable to make payment. He advised the Commission that the money was withheld due to the fact that controversy arose between the Township Aid Division of the State Highway Department and the Township Committee as to the manner in which the work on the Township roads was performed. He went into detail to explain to the Commission the methods employed by the Township in road construction, and stated that the results were very satisfactory. He also informed the Commission that applications were being made by Washington Township for State Aid on other projects and he desired information as to whether or not the State Highway Commission had any further instructions to give Washington Township in order that there might be no difficulty in obtaining payment when due. Commissioner Kidde stated that as far as he could see, there is no reason to persecute Washington Township, but rather to help them, and it would also be necessary for the Township authorities to work with the officers of the State Highway Commission. After further discussion, Commissioner Jelin moved that one of the Commissioners be delegated to visit Washington Township in company with Mr. Reed, Assistant State Highway Engineer, for an inspection of the Long Valley-Fairmount Road and to take up such other propositions as Washington Township might have. This was seconded by Mr. Stewart and adopted. Mr. Jelin accepted the detail of this inspection.

Hunterdon County-Additional State Aid Request

The Secretary informed the Commission that a delegation from Hunterdon County Board of Freeholders was present at this time and desired a hearing. On motion duly seconded, a hearing was granted. There appeared County Counsel Judge Large, County Engineer Davis and members of the Road Committee. Judge Large acted as spokesman and advised that they appeared to find out whether the State Highway Commission could give any definite information as to the possibility of Hunterdon County receiving additional aid from the State upon the improvements contemplated by the county for 1924, in order that they might indicate this amount in the County Budget which was to be prepared on Friday next. Commissioner Stewart informed the delegation that there had been no meeting of the Commission for the past two weeks, and the Secretary advised that as far as the Motor Vehicle funds were concerned, the final statment of the year had not yet been made up, due to the fact that the December receipts had not yet been reported upon by the Motor Vehicle Department. Judge Large reviewed the requests of Hunterdon County as follows:

For the	Flemington-Frenchtown Road -	estimated	cost	$ 75,000
"	" Flemington-White House Road-	"	"	256,500
"	" Maintenance of Roads -	"	"	90,000
"	" Lambertville-Hampton Program-	"	"	25,000

All these amount to a total of $446,000.00, against which the estimated receipts were $122,000.00. He also advised that the county was compelled to raise $80,000.00 in its tax budget to provide for interest on existing bonds. Commissioner Jelin stated that he felt that the proposition as submitted by the county was an ambitious one, and could probably be divided into a three-year program with the assistance of the State. Commissioner Stewart inquired as to whether the county would have use for an additional $20,000.00 allotment if the Commission could see its way clear to give it, and Judge Large advised that Hunterdon County would be very glad to get this, if it would not be misconstrued as interfering with the requests of Lambertville and Hampton, and also the Borough of Frenchtown, since it was felt that the county projects were paramount to the local propositions. The Commission did not agree definitely to give this amount, but asked that the county officers prepare an estimate for the construction of three miles of the most needed highway in the county, which was agreed to be the Flemington-White House Road.

Road Maps ✓

The Secretary informed the Commission that Mr. Ernest Alpers, Secretary of the General Drafting Company, Inc., of New York City.

was present to discuss the matter of a State Road Map. On motion, duly seconded, the hearing was granted. Mr. Alpers was introduced to the Commissioners by Mr. Stewart and advised that being a "Jerseyman" he was interested in having the story of New Jersey's natural assets brought before every auto user in the State, and he felt that the best means to secure this would be to have the State Highway Department distribute to each auto owner a road map which would primarily feature the State Highway System and County Road Systems and would also indicate all good roads in the State suitable for travel on and after May 1st, 1924. He suggested that his company could publish this map in the quantities required for distribution to all automobile owners at a cost of approximately two and four-tenths cents per copy. He exhibited for the information of the Commission the type of map he would recommend, the same being similar to those produced by his company for the Standard Oil Company in 1923. He also advised that if the State Highway Commission desired, his company would be glad to undertake the addressing and mailing of all of these maps at two cents per copy additional, providing the State Highway Commission would furnish the company with the names of the individual car owners. It was estimated that with the furnishing of 400,000 copies the total map cost would be $9,600.00. He guaranteed that delivery could be made of the completed maps in ten weeks from the date of the receipt of the order. The State Highway Commissioners inquired of Mr. Alpers as to the variations in cost in the event the Commission did not desire to send out these maps direct to all car owners, and they were advised that the quantity could be dropped to 200,000 without materially changing the unit price, but below this figure there would be a change since the greatest cost is in the preparation of the map plate. Mr. Alpers also advised that in the event the State Highway Commission undertook to place an order for the maps furnished by his company, there would be an exclusive right to the State Highway Commission in that no other company or individual could secure the privilege of use of the New Jersey map. Mr. Alpers explained to the Commission the methods employed by other states in distributing road maps, and he emphasized the advantages to be accrued by the population in securing a road map, upon the back of which would be sufficient information to make it desirable for the people to make use of the highways. Mr. Alpers presented to the Commission in writing the proposal as made by himself, and he requested the earnest consideration of the State Highway Commission. On motion duly seconded, the matter was taken under advisement by the Commission at this time.

Route 10, Bluff Road

The Secretary informed the Commission that Mr. Shaw, representing a property owner~~s~~ on Route 10, Bluff Road Section, was in the office and requesting that early action be taken on the disposition of property of his client~~s~~. He had been informed of the action of the Commission in extending the privilege to each property owner to repurchase the property at the same price at which the State was the purchaser. In this particular case the Secretary explained that the price paid by the State was $450.00. This was at the time it was proposed to place a new highway on Bluff Road. The owner had a purchaser for the balance of the lot at that time at a price of $2,000.00 but inasmuch as the roadway was deviated off Bluff Road, the purchaser would not pay more than $1,500.00 for that particular lot and the present owner would offer the State $100.00 in return for the property previously taken. The Secretary advised that there was still a further difficulty in the matter of the disposal of property on the Bluff Road, in that a verbal opinion from the Attorney General had informed him to the effect that where property is on a public highway and land is purchased therefrom for the purpose of widening the highway, and the widening is not proceeded with, access must be furnished to the owner of the property to the public road as existing, and it would not be possible to sell at public sale, any of this land which was bought on the Bluff Road. Commissioner Kidde stated that in view of this the Commission should not make any effort to dispose of land on the Bluff Road until a written opinion had been received from the Attorney General's Department covering this point, and Mr. Stewart moved that the Secretary be instructed to request a written opinion from the Attorney General's Department on the matter of procedure and title to property on Route 10, Bluff Road section. This was seconded by Mr. Kidde and adopted. Commissioner Kidde also moved that the State Highway Engineer be directed to prepare a property map, showing the location of all property along Route 10, such as has been acquired by the State Highway Commission, and also those in the process of condemnation. This was seconded by Mr. Jelin and adopted.

Route 7, Corlies Avenue

The Secretary presented a communication from the Borough Clerk of Bradley Beach, New Jersey, requesting the Commission to place that section of State Highway Route 7, from Corlies Avenue to Freehold, in the 1924 Road Building Program, in view of the deplorable condition of the road at this time. State Highway Engineer Sloan informed the Commission that he was prepared to recommend the inclusion of that part of Route 7, between Corlies Avenue and Colts Neck in the State Highway Road Program for 1924, same being part of the road recommended by Bradley Beach. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission directed that the communication from the Bradley Beach Commissioners be acknowledged with the advice that the State Highway Engineer is prepared to recommend to the State Highway Commission the construction of the portion of Route 7 between Corlies Avenue and Colts Neck for inclusion in the 1924 Construction Program.

Cape May-Lewes Ferry-Information

The Secretary presented a communication from the Clerk of Cape May City, forwarding information as requested by the State Highway Commission concerning the ferry boat service between Cape May and Lewes, Delaware, which was operated and discontinued some years ago. On motion by Mr. Stewart, seconded by Mr. Kidde, the State Highway Commission directed that the Secretary acknowledge receipt of this information with thanks, and that the same be referred to the Special Committee on the study of the Cape May-Lewes Ferry.

Camden Civic Improvements

The Secretary presented a communication from the Camden Civic Club advising that on Tuesday evening, January 29th, at the North Baptist Church, a meeting will be held to secure opinions concerning the proposed Camden Civic improvements, and requesting that a representative of the State Highway Commission be present to take part or listen. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission authorized Mr. J. A. Williams, Southern Division Engineer, to attend this meeting as a listener, as a representative of the State Highway Commission, and the Secretary was so directed to advise the Camden Civic Club.

Pensauken Township, Change of Date

The Secretary presented a communication from the Pensauken Township Board of Trade, advising that the meeting scheduled for January 15th was postponed to January 22nd at 8:00 P.M. in order that a representative of the State Highway Commission might be present to hear what the Borough of Merchantville and Pensauken Township desire with reference to the construction of the Crescent Route around the City of Camden. On motion duly seconded, Mr. J.A. Williams, Division Engineer, was instructed to attend the meeting of Pensauken Township and the Borough of Merchantville and the Secretary was directed to so inform the local authorities, it being understood that Mr. Williams would not take part in the discussions but will merely act as a listener for the State Highway Commission.

Merchantville Hearing-Request

The Secretary presented a communication from the Mayor of the Borough of Merchantville, requesting a hearing for his Borough in the matter of the Camden Advisory Board plans after the same is arranged. On motion duly seconded, the State Highway Commission directed the Secretary to notify the Borough of Merchantville to the effect that due opportunity will be given for a hearing when same is arranged.

Route 1, through Elizabeth

The Secretary informed the Commission that communications were received with resolutions protesting against the proposed Advisory Board report for Route 1 through the City of Elizabeth and suggesting another route from the City Commissioners of Elizabeth, from the Board of Public Works of the City of Elizabeth, and from the Chamber of Commerce of the City of Elizabeth. On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission directed that these communications be respectfully acknowledged with the advice that the interesting information contained therein will be carefully reviewed by the State Highway Commission, and at the proper time a hearing will be arranged, bearing on this subject.

Federal Aid for Advisory Board Routes

Commissioner Kidde informed the Commissioners that he had received a copy of a bill introduced in Congress which would give the Bureau of Public Roads $100,000,000 for road purposes and to which was attached a "rider" which would give forest roads a flat sum of $10,000,000. He recommended that some method be employed whereby the sum of $5,000,000 could be requested to be allocated for the Gateway Road from the Hudson Tunnels to Jersey City and from Philadelphia by way of the Bridge to Camden. He further discussed with the Commission the results of a conference held with the Chief of the Bureau of Public Roads, Mr. T. H. MacDonald at Washington, at which time Mr. MacDonald stated that the Advisory Board reports as presented by the State of New Jersey were, to his knowledge, the highest type of highway engineering which had as yet come to his attention, and he believed that the matter of providing proper terminals for entrance and exit of highways by the states should receive proper consideration from the Government in the distribution of Federal Aid funds. He advised that the bill for Post Roads, as introduced, was known as H. R. 4971. Commissioner Stewart suggested that it might be well for the Commission to prepare a suitable resolution which could be forwarded to the New Jersey Senators and Representatives at Washington, which would further the request for additional aid to the State of New Jersey on account of these Advisory Board problems. The further discussion of this matter was, however, laid over for later consideration.

Chestnut Neck Battle Monument

The Secretary presented a communication from Mrs. Joseph Thompson of Ventnor, New Jersey, advising that in accordance with the suggestion of the State Highway Commission, the General Lafayette Chapter of the D. A. R. had introduced a bill in the Legislature for the apportionment of funds sufficient to move the Chestnut Neck Battle Monument and requesting that the State Highway Commission give such aid as possible in bringing about the passage of this bill. On motion by Mr. Stewart, seconded by Mr. Kidde, the State Highway Commission directed that the Secretary acknowledge receipt of the communication and advise that the State Highway Commission will be very glad to furnish any Senators or Assemblymen with information such as is in the hands of the State Highway Department bearing on the subject of the Chestnut Neck Battle Monument.

King George's Road, Woodbridge

The Secretary presented a communication from the "Woodbridge Leader" complaining on behalf of the residents, of the condition of King George's Road to Fords and New Brunswick, which road was recently reconstructed and later used as a detour while the Amboy Road was impassable, due to paving operations. On motion by Mr. Jelin, seconded by Mr. Kidde, the matter was ordered referred to the Engineering Department for report and investigation at the next meeting of the Commission.

Amboy Bridge-Route #4

The Secretary presented a communication from the Stillman-Delehanty-Ferris Company, contractors on the New Amboy Bridge, advising that they have received a copy of a notice from McCarter & English, Attorneys for the Donnell Lumber Company with regard to providing that there may be delay on this account in the completion of the Amboy Bridge. In this connection the Secretary informed the Commission that under date of January 16 a legal notice was received by the State Highway Commission advising that in taking possession of the property of the Donnell Lumber Company by virtue of a petition dated December 11th, 1923, the owners of the property, W. J. Donnell Company, were prevented from access from one part of said property to the other, and giving notice that access should be provided forthwith; further advising that upon disregard of the notice, the Highway Commission and the contractors will be considered as trespassers. State Highway Engineer Sloan also informed the Commission that in line with this same matter there had arisen a condition with the National Fire Proofing Company, whereby they have made no provision as yet for the rebuilding of kilns which are in the line of the right of way where it was necessary for the contractors to commence to place the fill for the approaches to the Amboy Bridge. Any delay in the time required for the construction of the kilns would restrict the work of the contractor on the Amboy Bridge, and for this reason he had arranged a conference with the contractor on Wednesday, January 23d, for the purpose of ascertaining just how serious a delay of this kind will be in the work. Commissioner Stewart stated that in view of all of these matters there were presented a number of legal questions which should be considered with the Attorney General's Department. Commissioner Jelin advised that in this connection Assistant Attorney General Newcorn had handled the Amboy Bridge problems and in view of the fact that the office of the Attorney General is to be placed in the hands of Mr. Katzenbach, there was reason to believe that some other arrangements would have to be made in order to retain the services of Mr. Newcorn for the Amboy Bridge work, and he suggested that the entire matter be held over for further consideration at the next meeting.

Right of Way Agent Vollmer was present at this meeting, and stated that the Donnell Lumber Company was not restrained from access to any part of its property, and he suggested that arrangements be made for the State to dedicate for a public highway the said strip of land connecting one part of the Donnell Lumber Company with the other, and as an entrance on Route 4. No action was taken by the Commission at this time.

On motion by Mr. Jelin, seconded by Mr. Kidde, the Commission recessed for luncheon at 1:30 P.M., to meet in regular session again at 3:00 P.M. The Commission reconvened at 3:00 P.M. as agreed with the same members present as at the morning session.

Route #9, Section 7, Somerville

The Secretary presented a communication from the Borough of Somerville, advising of the acceptance of Route 9, Section 7, Main Street, Somerville, on January 18, 1923. The Secretary explained that in checking over the records of the Department, it was discovered that former State Highway Commissioner Thomas E. Collins had inspected Route 9, Section 7, on December 26, 1922, with a view to acceptance on the part of the State Highway Commission. This could not be confirmed by the Commission because of the fact that no final resolution of acceptance had been received from the Borough Counsel, and in view of the receipt of this at the present time, it was recommended that the Commission accept the completed work on

Route 9, Section 7, Main Street, Somerville, in accordance with the terms of the Reimbursement Act as entered into with the Borough of Somerville. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission accepted the completed work on Route 9, Section 7, Main Street, Somerville, in accordance with the terms of the Reimbursement Act.

Shore Relief Route Protest

The Secretary presented a communication from the Community Club of South Amboy protesting against the proposed Shore Relief Route between South Amboy and Keyport, and requesting an opportunity to take the matter up with the State Highway Commission at a meeting at Cheesequake Community Club on January 24th next. On motion by Mr. Jelin, seconded by Mr. Kidde the communication was ordered received and acknowledged with the advice that the State Highway Commission will be very glad to learn and consider any suggestions the people along the line of the Advisory Board Routes may have, and that at a later date a duly advertised hearing will be held at which time all interested parties will be given a hearing on the matter as a whole.

Road and Bridge Bonds

The Secretary presented a communication from the Kiwanis Club of South Orange and Maplewood, requesting the State House Commission to consider the advisability of increasing the life of road bonds from 10 to 15 years, and bridge bonds from 15 to 30 years. On motion by Mr. Jelin, seconded by Mr. Stewart, the communication was ordered received and placed on file.

Route 9, Section 11

The Secretary presented a communication from Judge William A. Coddington of Plainfield, requesting a hearing, if same was deemed necessary, on the matter of the construction of Route 9, Section 11, Plainfield to Lincoln Avenue. The Secretary informed the Commission that State Highway Engineer Sloan had forwarded a communication to Judge Coddington bearing on this matter. On motion by Mr. Stewart, seconded by Mr. Jelin, the State Highway Commission directed the Secretary to advise Judge Coddington that if a hearing was still desired the same could be arranged for Tuesday, January 29th.

Morgan Grade Crossing Elimination

Commissioner Kidde advised that he had received a communication from the Kiwanis Club of Newark, requesting that special attention be given to the elimination of the grade crossing at Morgan, and he requested that the Secretary forward him a copy of the communication which was being sent to all who make inquiries of this kind, in which was indicated the fact that the State Highway Commission had already authorized the work to proceed toward the elimination of the Morgan Grade Crossing. State Highway Engineer Sloan advised the Commission that a difficulty had arisen in connection with the elimination of the Morgan Grade Crossing, in that the railroad company is not willing to pay the entire cost of the bridge structure, which amounts to $97,000.00, but is willing to pay the sum of $60,000.00. This matter had been the subject of controversy between the railroad and the State Highway Commission, and the Public Utility Commissioners' Representative, Mr. Maybury, and the State Highway Engineer had finally advised that he would recommend for acceptance an offer of $75,000.00 from the railroad, which, however, had not yet been received. Commissioner Stewart advised that he had recently learned of a Supreme Court decision, in which the railroad company was duty-bound to pay for the cost of a new bridge wherever the highway is changed and a necessity for elimination could be shown. State Highway Engineer Sloan advised that this was realized by the railroad company, but that it would be necessary to take considerable time in compelling the railroad company to entirely pay for the cost of an overhead structure. Commissioner Stewart recommended that the entire matter be held in abeyance until a conference could be arranged with the incoming Attorney General in order that it may be definitely settled, and he moved that a conference be held with the Attorney General on the question of the obligation of the railroad company to pay the necessary expenses to make a proper elimination and what procedure should be followed toward this end. This was seconded by Mr. Kidde and adopted.

Somerset Crystal Spring Farms Complaint

The Secretary presented a communication from the Somerset Crystal Farms, Inc., complaining of the condition at their property due to the construction of Route 16, Section 6, and advised that damages will be sought for inconveniences caused the business at this place. On motion by Mr. Jelin, seconded by Mr. Kidde, the matter was ordered referred to the State Highway Engineer for investigation and report.

Rancocas Hunt Club

The Secretary presented a communication from the Rancocas Hunt Club, at Brown's Mills in the Pines, advising that a hunt club is being developed between Whitings and Browns Mills, and offering the State Highway Commission use of gravel on adjoining lands for the repair of the Browns Mills-Lakehurst Road. On motion by Mr. Stewart seconded by Mr. Kidde, the communication was ordered received and the Secretary was directed to notify the Rancocas Hunt Club to the effect that this road is not yet a part of the State Highway System

State Highway Commendation

The Secretary presented a communication from the Harding Township Committee expressing appreciation for the efficient work of the State Highway Department in maintaining the detour of roads of Harding Township as used during the construction of Route 16, Section 6, Passaic River to Morris Township Line. On motion by Mr. Stewart, seconded by Mr. Kidde, the communication was ordered received with thanks and appreciation.

Contractors'Bonds

Commissioner Jelin moved that with a view of reviewing the high cost of the contractors' bonds, representatives of the large bonding companies be requested to meet with the Commission at the meeting next Tuesday for the purpose of going over such facts as they may wish to present to the State Highway Commission as justification for the present rate of State Highway contract bonds. This was seconded by Mr. Kidde and adopted.

Newark Auto Show Exhibit

The Secretary presented to the Commission a report on the Exhibit of the State Highway Department at the Newark Auto Show, held January 12th to 19th, and in which the Department was complimented by the Manager of the Newark Auto Show for the manner in which the exhibit was conducted. On motion by Mr. Kidde, seconded by Mr. Jelin the State Highway Commission directed that the Secretary forward a letter complimenting the members of the Department who were responsible for the assembling of such a splendid exhibit as was presented at the Newark Auto Show. The Secretary advised that inquiries had been received as to whether the State Highway Commission would permit the showing of this exhibit at other automobile shows around the State as would be held, and on motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission approved of the placing of a State Highway Exhibit at each of the automobile shows where space will be provided for the Highway Department.

The Schedule of Business was next taken up for consideration item by item as follows:

Route 11, Passaic Avenue, Clifton

The State Highway Engineer presented to the Commission reports concerning the inspection of Route 11, Passaic Avenue, Clifton, by Commissioner Kidde together with the Northern Division Engineer, and he recommended that this work be accepted by the State. On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission accepted the completed work on Route 11, Passaic Avenue, Clifton, in accordance with the recommendation of the State Highway Engineer.

Blackwell Street, Dover, Route 5

State Highway Engineer Sloan presented a report in connection with the proposed paving of Blackwell Street, Dover, a section of Route 5, and he recommended to the Commission that notification be forwarded to the Morris County Traction Company of the intention to proceed at once with the paving of Blackwell Street, Dover, making a demand on them that they at the same time comply with the conditions of their franchise and install a pavement of similar character to that to be placed by the State, between the rails of their tracks and for two feet outside, which paving will make it necessary for the Traction Company to reconstruct its tracks. On motion by Mr. Stewart, seconded by Mr. Jelin, the State Highway Commission approved of the inclusion of Blackwell Street, Dover, a section of Route 5, in the construction program for 1924, and directed that notification be forwarded to the Morris County Traction Company as recommended by the State Highway Engineer.

Route 14, Section 9, Right of Way

On recommendation of the State Highway Engineer, Commissioner Kidde moved the acceptance of the following quit claim deeds on Route 14, Section 9, Swainton to Oceanview, with an expression of thanks from the Commission for the cooperation extended. This was seconded by Mr. Stewart and adopted.

Frank Capelli, Barthelomew Campodonico & Wife	consideration	$1.00
Annie M. Willette & Henry W. Townsend	"	1.00
Kathleen R. VanDright	"	1.00
Eugene Meher & Wife	"	1.00
Belle S. Coleman et als	"	1.00

Route 14, Section 8, Right of Way

On recommendation of the State Highway Engineer, Commissioner Stewart moved the acceptance of quit claim deeds as follows on Route 14, Section 8, Oceanview to Seaville, and directed that a communication of thanks be forwarded:

Joseph B. Thomas & Wife	consideration	$1.00
Alla D. Sherry	"	1.00
Ralph Burton Evans	"	1.00
John Hancock	"	1.00
Minnie W. Holmes	"	1.00
Lilburn H. Townsend	"	1.00

This was seconded by Mr. Kidde and adopted.

Route 3, Right of Way

On recommendation of the State Highway Engineer, Commissioner Kidde moved the approval of purchase of property from William G. Frank on Route 3 at Waterford for the sum of $50.00. This was seconded by Mr. Stewart and adopted.

Route 15, Section 5, Right of Way

On recommendation of the State Highway Engineer, Commissioner Kidde moved the approval of purchase agreement for Parcel #3 on Route 14, Section 5, Millville-Menantico section, from Harry Ackley for $200.00, this purchase to put an end to condemnation proceedings now under way. This was seconded by Mr. Stewart and adopted.

Route 2, Section 4, Right of Way

On recommendation of the State Highway Engineer, Commissioner Kidde moved the approval of purchase of Parcel #10 on Route 2, Section 4, in the City of Burlington, from the Holland Company, for the consideration of $1.00. This was seconded by Mr. Stewart and adopted.

Route 16, Section 6-A, Right of Way

On recommendation of the State Highway Engineer, Commissioner Kidde moved the approval of purchase agreement for Parcel #10, at Bridge 32.2 on Route 16, Section 6-A, from Edward W. Scudder for $1.00 and for easement over Parcel #14 for $1.00 from the same owner. This was seconded by Mr. Stewart and adopted.

Route 14, Section 8, Right of Way

On recommendation of the State Highway Engineer, Commissioner Kidde moved the approval of purchase agreement from Charles J. Hassiepan and wife for the consideration of $20.00, and from Emma V. Godfrey for the consideration of $1.00, on Route 14, Section 8, Swainton to Ocean View. This was seconded by Mr. Stewart and adopted.

Route 14, Section 8, Right of Way

On recommendation of the State Highway Engineer. Commissioner Jelin moved the approval of purchase of Parcel #4 on Route 14, Section 8, from William S. Small & wife for the consideration of 100.00 ~~$1.00.~~ This was seconded by Mr. Kidde and adopted.

Route 14, Section 9, Right of Way

On recommendation of the State Highway Engineer, Commissioner Jelin moved the approval of purchase agreements for the acquisition of quit claim deed from R. H. Clayton for property on Route 14, Section 9, Ocean View to Seaville, for the consideration of $1.00, and by purchase from Rodney VanGilder for the sum of $35.00 and from George E. Gandy for the sum of $40.00. This was seconded by Mr. Kidde and adopted.

Federal Aid Seven Percent System

State Highway Engineer Sloan again presented to the Commission~~ers~~ the matter of specifying the completed Seven Percent System of Federal Aid Highways in New Jersey, and he recommended the adoption of the following Routes as completing the Seven Percent System, subject to the possibility of making a substitution and changes as agreed upon with the Chief of the Bureau of Public Roads, Mr. T. H. MacDonald at Washington, at a conference between Commissioners Kidde and Jelin, and the State Highway Engineer:

Trenton,-New Brunswick (via Brunswick Pike) - - - - - - - -	22.5 mi.
Camden, Mt. Holly, Pemberton, Browns Mills, Lakehurst, Toms River -	52.0 mi.
Far Hills, Chester, Netcong, Newton, Branchville, Layton, Dingmans -	47.0 mi.

Bordentown, Mt. Holly, Medford, Indian Mills, Hammonton 41.0 mi.

On motion by Mr. Jelin, seconded by Mr. Stewart, the recommendation of the State Highway Engineer for the completion of the 7% Federal Aid System was unanimously approved.

Bergen Turnpike, Hudson County

On recommendation of the State Highway Engineer, Commissioner Jelin moved that $3,171.25 be transferred from the 1923 Motor Vehicle Aid apportionment to Hudson County, to work on the Bergen Turnpike, Hudson County, in order to pay for supplemental contract on this work. This was seconded by Mr. Kidde and adopted.

Route 5 Section 6

Speedwell Avenue, Morristown

The State Highway Engineer presented to the Commission, as requested, two estimates for the concrete paving of the area occupied by the Morris County Traction Company on Route 5, Section 6, Speedwell Avenue, Morristown. The total estimated cost for a single track from Station 0 plus 65, and double track from Station 51 plus 65 to Station 75 plus 16 was $85,484.50, and the estimate for paving double track width for the entire length of the project is $96,001.00. After discussion, Commissioner Kidde moved that a report be made to the City Officials of Morristown and County Officials of Morris County, transmitting the figures and reciting the fact that the State Highway Commission has revised the estimates on the concrete and is still prepared to pay 60% of the cost of the work, provided arrangements are made for the payment of the balance. This was seconded by Mr. Jelin and adopted.

Route 4, Ocean County

State Highway Engineer Sloan presented to the Commission a form of resolution and notice to the Board of Freeholders of Ocean County covering the abandonment of certain sections of the Route 4, between Laurelton and Lakewood, occasioned by the revisions in the line after the route was constructed, and he recommended that a proper resolution be forwarded to the County of Ocean. On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission adopted the following resolution and directed that the same be forwarded to the Board of Freeholders of Ocean County:

WHEREAS, in accordance with the provisions contained in Article #3, Chapter #14, Laws of 1917, and the amendments thereto in Chapter 20, Laws of 1919, the State Highway Commission may, by resolution, take over as a State Highway, any routes, route, or parts thereof, or vacate parts thereof,

BE IT RESOLVED, that the State Highway Commission does abandon and vacate as part of the State Highway Route #4, effective February 1, 1924, certain described portions, and thus relinquish responsibility for the improvement and maintenance of such portions of the said route taken over May 1, 1920, between Laurelton and Lakewood, in Brick Township, Ocean County, being more particularly described as follows:

Portion #1

Beginning at a point on the center line of the road, as taken over, between Laurelton and Lakewood, said point being thirty-three (33) feet from the center line of the present State Highway Route 4, Section 14, as constructed, at a Station 53 plus 14, more or less; thence (1) north fourteen degrees, thirty-six minutes west (N14°36'W) a distance of three hundred sixty-five (365) feet more or less to a point; thence (2) north eighty-six degrees, fifty-seven minutes west (N86°-57'W) a distance of two hundred seventy-two (272) feet more or less, to a point on the center line of the road, as taken over, said point being thirty-three (33) feet from the center line of the present State Highway Route #4, Section #14, as constructed, at Station 58 plus 14, more or less.

Portion #2

Beginning at a point on the center line of the road, as taken over, between Laurelton and Lakewood, said point being thirty-three (33) feet from the center line of the present State Highway Route #4, Section #14, as constructed, at Station 59 plus 71, more or less; thence (1) north eighty-six degrees, fifty-seven minutes west (N86°-57'W) a distance of one hundred sixty-nine (169) feet, more or less to a point; thence (2) north thirty-nine degrees, fifty-two minutes west (N39°-52'W) a distance of two hundred forty-six (246) feet, more or less to a point on the center line of the road as taken over, said point being thirty-three feet (33') from the center line of the present State Highway Route #4, Section #14, as constructed, at Station 63 plus 47, more or less, and

BE IT FURTHER RESOLVED, that it is the intention of the State Highway Commission to vacate and abandon those portions of the old road as taken over May 1, 1920, lying outside the limits of the required right of way of the new road as constructed sixty-six feet (66') wide, between Station 53 plus 14, more or less, and Station 63 plus 47, more or less.

State Highway Engineer Sloan requested information from the Commission as to whether such procedure would be approved for use in all cases of abandonment and on motion by Mr. Stewart, seconded by Mr. Jelin, the State Highway Commission approved of the form of resolution being used in all cases where sections of road are abandoned on account of the reconstruction of routes involving new alignments

Route 4, Grade Crossing Elimination

State Highway Engineer Sloan presented to the Commission a form of agreement to be entered into with a Pennsylvania Railroad Company, covering the proposed grade crossing elimination on Route 4, at Manasquan, whereby the railroad company will share to the extent of $35,000.00. On motion by Mr. Stewart, seconded by Mr. Kidde, the matter was ordered held until after conference on the matter with the Attorney General's Department.

Route 7, Section 1, Corlies Avenue

State Highway Engineer Sloan presented a communication received by him from the East Jersey Bridge Company, requesting further hearing in the matter of guarantees covering defective work under contract completed by them for Corlies Avenue on Route 7, Section 1. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission directed that a hearing be given the East Jersey Bridge Company on Tuesday next, January 29th, between 12:00 and 12:30 P.M.

Employments

On recommendation of the State Highway Engineer, Commissioner Kidde moved the approval of the recommendations for employments in the State Highway Department since the last meeting of the State Highway Commission as follows:

Jan.	14,	1924	Morris Balbresky	Office Boy	$ 40.00	month
"	7	"	Arthur K. Warner	Sr. Clerk	115.00	
"	16	"	Wm. C. Umberger	Br. Detailer	165.00	
"	7	"	Augustus T.Weisse	Br.Const.Insp.	165.00	
"	16	"	Harry R. Hill	Cost Clerk	90.00	
"	23	"	Oakley A.Johnson	Br.Const.Insp.	165.00	
"	28	"	Geo. Lytle	Br.Const.Insp.	165.00	
"	28	"	W.F.Karl	Resident Eng.	225.00	
"	28	"	Theresa Gasser	File Clerk	90.00	
Feb.	24	"	Alice Carrol	Sr.Clerk Steno.	115.00

Increases

State Highway Engineer Sloan also at this time presented recommendations received from the Construction Division for change of grade in accordance with examinations held and also for promotions and increases in the construction Division preparatory to the beginning of work on the 1924 Program, and he recommended that the same be approved by the Commission. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission adopted and approved the Schedule of increases and promotions as recommended by the State Highway Engineer for the Construction Division.

High Street, Newton

On recommendation of the State Highway Engineer, Commissioner Jelin moved the acceptance of the completed work on High Street, Newton, in Sussex County, work done from Motor Vehicle Aid, and in view of the fact that the 1922 schedule of Sussex County has been entirely paid, no State money can further be furnished on this project. This was seconded by Mr. Kidde and adopted.

Three Bridges-Centerville Road

On recommendation of the State Highway Engineer, Commissioner Jelin moved the acceptance and final payment on the Three Bridges-Centerville Road, Readington Township, Hunterdon County, Township Aid. This was seconded by Mr. Stewart and adopted.

Swedesboro-Harmony School Road

On recommendation of the State Highway Engineer, Commissioner Jelin moved the acceptance and final payment on the Swedesboro-Harmony School Road, Harrison Township, Gloucester County, Township Aid. This was seconded by Mr. Stewart and adopted.

Gloucester County-Township Aid

On recommendation of the State Highway Engineer, Commissioner Stewart moved the acceptance and final payment on the Bridgeport-Mullica Hill Road, Woolwick Township, Gloucester County, Township Aid. This was seconded by Mr. Kidde and adopted.

Gloucester County-Township Aid

On recommendation of the State Highway Engineer, Commissioner Jelin moved the acceptance and final payment on the Richwood-Pitman-Mullica Hill Road, Section 1, Harrison Township, Gloucester County, Township Aid. This was seconded by Mr. Stewart and adopted.

Township Aid Applications

On recommendation of the State Highway Engineer, Commissioner Stewart moved the approval of the following Township Aid applications:

Great Creek Road, Galloway Twp., Atlantic Co.	$1,028.51
Denville-Mountain Lakes Road, Denville Twp., Morris County	750.00
Buena-Tuckahoe Road, Section 3, Weymouth Twp., Atlantic Co.	10,500.00
Pamona Road, Galloway Twp., Atlantic County	6,000.00

This was seconded by Mr. Jelin and adopted.

Salem County, Township Aid

On recommendation of the State Highway Engineer, Commissioner Kidde moved the approval of Township Aid Force Account Agreement on the Garden Road, Pittsgrove Township, Salem County, Township Aid. This was seconded by Mr. Jelin and adopted.

Extension of Time-Morris County

On recommendation of the State Highway Engineer, Commissioner Kidde moved the approval of an extension of time to June 1, 1924, on the Denville-Mountain Lakes Road, Denville Township, Morris County, Township Aid. This was seconded by Mr. Jelin and adopted.

Extension of Time- Cape May County

On recommendation of the State Highway Engineer, Commissioner Kidde moved the approval of an extension of time to May 1, 1924, on Grassy Sounds Bridge, Cape May County, State Aid, due to the fact that the structure was damaged by fire. This was seconded by Mr. Stewart and adopted.

Hunterdon County-Township Aid.

On recommendation of the State Highway Engineer, Commissioner Kidde moved the acceptance and final payment on the Stockton-Rosemont Road, Delaware Township, Hunterdon County, Township Aid. This was seconded by Mr. Jelin and adopted.

Route #4, Detour

On recommendation of the State Highway Engineer, Commissioner Jelin moved the adoption of the following official detour for Bridge at M.P. 66.6 on Route 4, Inland Waterway:

> Beginning on Route 4, West Point Pleasant, at Osborne Ave., thence (1) northerly on Osborne Avenue to Pine Bluff Ave.; thence (2) easterly on Pine Bluff Ave. to Arnold Avenue; thence (3) southerly on Arnold Avenue to Route 4 at the Ocean Road.

This was seconded by Mr. Stewart and adopted.

Request to Scrap Useless Equipment

State Highway Engineer Sloan presented to the Commission a report from the Superintendent of Plant and Equipment and recommended that permission be granted by the Commission to scrap the following useless equipment in accordance with the regulations of the U. S. Department of Agriculture and to sell at public auction such as is of no further economical use to the State Highway Department. On motion by Mr. Jelin, seconded by Mr. Kidde, the State

Highway Commission directed that the State Highway Engineer be instructed to scrap such of the following material as is useless equipment and to dispose at public sale of such saleable material as is of no further economical use to the State Highway Department:

1 Seldon 3½ ton dump truck,
1 G.M.C. Ambulance,
3 Fox Rotary Brooms used for snow removal,
1 Hurlbert five ton dump truck,
1 Hurlbert Five ton dump truck,
1 " " " " "
1 " " " truck,
1 Pierce Arrow two ton dump truck,
1 " " " " " "
1 G.M.C. Ambulance,
1 G.M.C. Ambulance,
1 Denby three ton dump truck,
1 " " " " "
1 Cletrac (Caterpiller Type) Tractor,
1 " " " "
1 " " " "
1 " " " "
1 " " " "
1 " " " "
1 Parsons Trench Digger,
1 White Car (Staff Touring Body),
1 Koehring Loader (Model 74),
1 " " " "

Route 8, Montclair-Verona

Commissioner Kidde called attention to the fact that the lessee of property being acquired on Route 8, Montclair-Verona Section was having difficulty with the owners of the property covering the restoration of business facilities, and he suggested that this matter be looked into by the Legal Department of the Commission.

On motion by Mr. Jelin, seconded by Mr. Stewart, the meeting adjourned at 6:00 P.M. to meet in regular session on Tuesday, January 29th at 10:30 A.M. it being the purpose to hold a conference on Friday, January 25th at Trenton.

Respectfully submitted,

A. LEE GROVER

Secretary

2671
JAN 29 '24

MINUTES OF MEETING - January 29, 1924

A regular meeting of the State Highway Commission was held in the meeting rooms of the Commission, Broad Street Bank Building, Trenton, N. J. on Tuesday, January 29, 1924. The meeting was called to order by Chairman Scott at 10:30 A.M.

Present: General H. L. Scott, Chairman, and Messrs. Percy H. Stewart, Walter Kidde, and Abraham Jelin.

Lee Highway Convention Delegation

The Secretary presented a communication from the Secretary to the Governor, Mr. Pearse, requesting that the Commission suggest the names of delegates to the Lee Highway Convention. Commissioner Jelin suggested that the matter be discussed at noon luncheon in order that an answer might be forwarded to the Governor early in the afternoon.

Carll's Corner Road, Salem County

The Secretary presented a resolution from the County of Salem with reference to the construction of the Carll's Corner Road, in which resolution the County of Salem requested that an apportionment be made by the State from the 1924 Emergency Account toward this work, in view of the fact that it is an important inter-county connecting route and the Township will pay only 10% of the cost. The estimated cost of this work was placed at $85,000.00. Commissioner Jelin advised that in view of the fact that the Commission had urged the completion of this improvement upon the County of Salem and that through the efforts of the county the township had contributed 10% of the cost, he would move that the sum of $30,000.00 be set up from the Emergency Reserve Account of 1924, for aid to Salem County in the construction of the Carll's Corner Road, 1st Section. This was seconded by Mr. Stewart and adopted.

State Highway Engineer Sloan informed the Commission that specifications for the Carll's Corner Road were presented and he would recommend the approval of the same in order that the county might proceed with the advertisement for this work. On motion by Mr. Stewart, seconded by Mr. Jelin, the State Highway Commission approved plans and specifications for the Carll's Corner Road, 1st Section, Salem County, Motor Vehicle Aid work.

Legislation

On motion by Mr. Stewart, seconded by Mr. Jelin, the State Highway Commission went into executive session for the purpose of discussing legislative matters as affecting the State Highway Commission. When the meeting was resumed, Commissioner Kidde moved that the communication as prepared and forwarded to Hon. William J. Mackay, Senator from Bergen County, and Chairman of the Senate Highways Committee, be ratified, confirmed and approved and a copy of the same be spread in full upon the minutes of this meeting. This was seconded by Mr. Stewart and adopted.

January 25, 1924.

Hon. William B. Mackay,
Chairman, Senate Highways Committee,
State House, Trenton, N. J.

Dear Sir:

In compliance with your request, we are sending you herewith two proposed bills which will assist the State Highway Commission in the performance of its duties. The other matters which were the subject of our conversation are explained in a memorandum that we are sending you herewith. We would esteem it a great favor if you will kindly see that these bills come before the Senate for action.

We are also sending you herewith a copy of the reports of the Advisory Boards on Vehicular Tunnel Traffic Study in and about Jersey City and Newark; Delaware River Bridge Traffic Study in and about Camden; Study of Traffic on State Highway Route 4 to Shore Points; and also a copy of the Ad Interim Report which was presented to the incoming Legislature on December 4th last.

We feel that we would fall short of doing our full duty to the people of the State, as members of this Commission, if we failed to impress again upon the Legislature the importance of carrying out the recommendations as to the major problems that have been presented to us by the distinguished engineers who serve upon the Three Advisory Boards, which reports we are submitting herewith as stated above.

From a careful consideration of these reports and from our observation of conditions throughout the State, as well as from the complaints that are reaching us from every part of the State in regard to the present crowded condition of our highways, and having in mind our obligation for the completion of the work under the forty million dollar bond issue, we feel that provision should be made to take care of these problems in whole or in part.

If the Legislature cannot find the means at this session to finance the entire program, would the Legislature concur in any of the suggested plans in our Ad Interim Report? Might this not be accomplished in a simple manner by a joint resolution?

The Ad Interim Report embodies the views of the State Highway Commission as to the wisest method of proceeding, both from an engineering and financial point of view, to meet the emergencies that are facing this Commission in the performance of its duty to the people of this State.

In addition to the considerations stated above, we are being solicited by the Boards of Chosen Freeholders throughout the State to indicate to them our plans for the current year, upon which their budgets depend, and our engineering and other departments are anxious to have the program settled in order that they may proceed with the necessary surveys.

We shall be glad to confer with your Committee or with such representatives of the Senate and of the Assembly as may be appointed to discuss these matters, and we again urge upon you the importance of speedy action.

Very truly yours,

STATE HIGHWAY COMMISSION

Gen. H. L. Scott, Chairman.

Route 9, Section 11 - Trolley tracks

The Secretary informed the Commission that Judge William A. Coddington of Plainfield, N. J. was present at the invitation of the Commission with reference to the construction of Route 9, Section 11, between Plainfield and Middlesex Borough. On motion duly seconded, a hearing was granted. Judge Coddington appeared, together with Mayor Harris and Councilmen of Middlesex Borough and advised that Middlesex Borough was extremely interested in the manner of construction of Route 9, Section 11, in that they understood that the construction contemplated by the Department was to move the trolley tracks to the center of the roadway and pave for 22 feet, including the trolley area, which would not give sufficient room on either side of the trolley tracks for traffic to move. He informed the Commission that the trolley company had occupied its present location for more than twenty years and there was the possibility of an objection on the part of the trolley company to the moving of the tracks, although he believed this matter could be satisfactorily straightened out. He stated, however, that Middlesex Borough was financially unable to tax its citizens for the cost of acquiring the necessary additional right of way to affect the widening of this roadway, and he believed a number of the citizens were opposed to giving their land free, inasmuch as the State had already acquired several parcels of property in this neighborhood and had paid full value for the same. He also advised that Middlesex Borough was particularly interested in eliminating the dangerous curves existing at the present time on this roadway before Gallagher's Corner is reached. He advised that it was the feeling of Middlesex Borough that this road would be used for the most part as a through State

Highway, and would be of no direct benefit to the Borough in comparison with the thousands of people who would make use of it from outside the Borough. He also advised that the Borough did not feel that the ratables along the line of the new road would be increased to any considerable extent, in view of the fact that the Plainfield sewage disposal plant is located close to this road and the odors keep people from establishing residences along this highway. State Highway Engineer Sloan explained to the State Highway Commission that in line with the policy recommended to the State Highway Commission at a former meeting, it was the purpose to move the trolley tracks to the center of the roadway and construct 22 feet of highway, inclusive of the trolley track area, in the event the Borough would build two seven foot wings on either side of the pavement to be laid by the State. If, however, the Borough of Middlesex would not do this, he would recommend that the road be constructed on its present line, leaving the trolley tracks on the side of the roadway and making slight changes in alignment in order to reduce the dangerous curves existing. He stated, however, that notice should be given to the Middlesex Borough authorities that a mistake would be made if they did not enter into the project as proposed by the State Highway Engineer and carry out the widening of the roadway to the gutter line, in view of the fact that the Commission would no longer permit the construction of pavement on either side of a track area where no permanent construction was placed between the tracks, for the reason that it was proven in other municipalities where this was done that the two strips on each side of the trolley tracks were used for parking automobiles while the through traffic of necessity, had to make use of the trolley track area where there was no satisfactory pavement.

Mayor Harris stated that the property owners were apparently satisfied with the layout of the plans of the State, but did not feel that the Borough should be called upon to add anything to the proposed improvement.

Judge Coddington suggested that the Engineering Division of the Commission furnish to the Mayor and Councilmen of the Borough of Middlesex an estimate of the cost of the construction of the additional seven feet of pavement on either side of Route 9, Section 11, in order that the Borough authorities could make arrangements to have this work done in the event the State Highway Department is successful in inducing the trolley company to allow the moving of its tracks to the center of the roadway.

Bonding Companies-Hearing

The Secretary informed the Commission that in accordance with its instructions at the last meeting, an invitation was extended to the representatives of some of the bonding companies to be present at this meeting for a discussion of the matter of surety bonds on State Highway construction. There were present on this matter Mr. E. W. Bush and Mr. Hager, representing the Aetna Casualty & Surety Company, and Mr. Voltz of the U. S. Fidelity and Guarantee Company. On motion duly seconded, a hearing was granted. The Secretary read a communication from Mr. Rathbone, Vice Chairman of the National Surety Company, advising that his company will be very glad to do anything to be of service to the State Highway Commission, but if it is to be a discussion of rates on bonds, this matter should be taken up with the Towner Rating Bureau of #120 Liberty Street, New York City, which all important companies are subscribers to, and which "under the Law, we must quote the rates which this Bureau advises." Commissioner Jelin informed the visitors that the State Highway Commission was interested in securing, if possible, a lower rate of premium on bonds to the contractors than was the case, since it was not felt that municipalities in the State would be granted a one percent bond while the State Highway work should be charged one and one-half percent.

Mr. Bush acted as spokesman for the bonding men, advising that the reference to the Towner Rating Bureau was correct and that any question of rates should be discussed with Mr. R. H. Towner. He further advised that it was the belief that there was a difference in the risk as between municipal street paving and State Highway construction, and he further cited the fact that in a number of states, especially North Carolina, Missouri, West Virginia and New York, there were considerable failures among the contractors, and while New Jersey had within the last few years, been fortunate in this respect, there was no telling when conditions would arise which would cause the failure of a number of the contractors at one particular time.

Commissioner Kidde stated that he believed that the State of New Jersey should be considered in the light of its own experiences as far as rates on bonds were concerned, and in view of the fact that the losses incurred since the beginning of the State Highway construction work were so very low, the bonding companies should make some reduction in rate to New Jersey contractors. He further stated that the bonding companies should secure the appearance of Mr. Towner before the Commission. in view of the fact that the State Highway Commission has no knowledge of the existence of such a Rating Bureau. He further cited for the representatives of the bonding companies the methods employed by the State Highway Commission, in securing satisfactory contractors for the State: of the decision in one instance to reject a bidder because of the fact that he was financially unable to proceed with the work and in another case where the bidder had been requested to add to his cash capital before being awarded the contract, and in both of these instances the bonding company had already assured the Commission that they would furnish the bonds for the contractors. Mr. Bush advised that in the States of Connecticut and New York the rate was one percent, due to the fact that surety is not liable for unpaid bills for labor and materials. Mr. Hager advised that he believed that Mr. Towner would be very glad to cooperate with the State Highway Commission when he has returned from a trip to Texas, where rates are being established for highway work in that State.

Commissioner Kidde requested of the bonding representatives that the Highway Commission be furnished with a statement of experience during the last three or four years, and to cite the instances where the bonding companies were compelled to make a charge against their income for bonding.

Commissioner Stewart stated that he believed the entire situation would be very materially changed if the law would permit an individual to place collateral with the State as an alternative to a surety bond, and he believed that some method should be looked into, whereby such a procedure could be arrived at. Mr. Hager, of the Aetna Company, stated that he believed that his company would be very glad to start the ball rolling toward obtaining for the Commission such information as was desired if they were instructed to do so, but as an individual corporation it was not possible for them to change their rating since their company had an understanding with the Towner Rating Bureau that the rates established by the Bureau would be used.

Commissioner Stewart inquired whether there would be any difference in the rate charged if the amount of the bond was reduced to 50% of the contract and Mr. Bush advised that the regulations were that the bond premium shall be paid on the total amount of the contract where the bond specified is above 20% of the amount of the contract, and there could only be a difference in the event the contractor was bonded for less than 20% of his contract. The Commission thanked the representatives of the bonding companies for their appearance and advised that the matter would be given further consideration.

East Jersey Bridge Company-Hearing-
Route 7, Section 1

The Secretary informed the Commission that in accordance with the hearing granted at the last meeting of the Commission to the East Jersey Bridge Company, the officers of this company were present at this time. On motion duly seconded, a hearing was granted. Mr. E. G. Fraser, Treasurer of the East Jersey Bridge Company, and Mr. John Brennen, President, appeared before the Commission and advised that they desired the Commission to reconsider its action in requesting a cash deposit in addition to the filing of a bond for the satisfactory performance of the Warrenite pavement, and foundation, on Route 7, Section 1, Corlies Avenue, on which they had performed the contract. He claimed that the State Highway Commission had sufficient protection in the bond and should not request the holding of cash which was a hardship upon their company. State Highway Engineer Sloan informed the Commission that the cash deposit was required, due to the faulty condition of the base and the bond covered the condition of the surface pavement, and the only alternative to the matter would be to have the contractors tear out the faulty material and replace the same. Mr. Fraser further stated that he felt that the condition of the roadway was due in a measure to the failure on the part of the inspectors to discover the conditions existing before the work was completed, since it was shown that there was no attempt to "skin" the work in the quantity of material, but the mix of the concrete was not entirely up to the requirements of the specifications. State Highway Engineer Sloan informed the Commission that an inspection was made of this work by Mr. Gage, Chemical Engineer. The work performed while he was on the job was entirely satisfactory, but the work performed without the presence of Mr. Gage was not carried out as directed. Mr. Fraser also inquired of the Commission as to whether any decision was reached on the matter of accepting paid up building and loan books as collateral in lieu of cash. The Secretary informed the Commission that the matter was referred to the Attorney General, but on account of the fact that the Attorney General's office was undergoing a change of administration, no advice had been received. Commissioner Kidde suggested that if the Attorney General's Department would advise that this building loan could be accepted, it would be acceptable to the Commission.

Minutes Approved

Commissioner Kidde reported to the Commission that he had carefully read the minutes of the meeting of January 3d, and would move that the same be approved with the amendment on Page 4 to give the names of those who seconded the motions. This was seconded by Mr. Jelin and adopted.

Commissioner Kidde reported having carefully read the minutes of the meeting of January 8th and moved that the same be approved as mailed. This was seconded by Mr. Jelin and adopted.

On motion by Mr. Kidde, seconded by Mr. Jelin, the meeting recessed for luncheon at 1:00 P.M., to meet in regular session at 2:30 P.M. The meeting reconvened again at 2:30 P.M. with the same members present as at the morning session.

Right of Way-Route 13

The Secretary informed the Commission that Mr. Stockton and Mr.

Pyne, representing the Moses Taylor Pine Estate, were present to discuss the matter of change of line on Route 13 in front of the property of the Moses Taylor Pyne Estate. On motion duly seconded, a hearing was granted. Chairman Scott in detail explained to Mr. Pyne and Mr. Stockton, the concern felt by himself in the question involved in taking over a part of the Pyne land in Princeton, to correct a dangerous curve existing at that point. He reviewed his associations with the Moses Taylor Pyne family and stated that the State Highway Commission had the greatest respect and sympathy for Mrs. Pyne and would do everything in its power to treat amicably with her with regard to the line of Route 13 at Princeton. He requested State Highway Engineer Sloan to outline the situation as existing. Major Sloan advised that it was proposed to take from the Pyne Estate a total of .126 acres which stood out directly in the line of the new right of way for Route 13, and eliminate what at present is a very dangerous curve at that point. The only alternative from this would be the shifting of the entire line at that point so that it would necessitate the taking of a section of the Russel Property on the opposite side and this plan would not be as desirable as that of cutting the corner off the Pyne property and would involve a difference in cost of about $17,000.00, while the estimated cost of a nurseryman for making changes in the Pyne Property was $2,800.00. Mr. Pyne stated that he believed that there was some error in the estimate obtained by the Highway Department since most of the planting was done under the personal supervision of Moses Taylor Pyne, and there were a number of very valuable trees and plants which could hardly be replaced without a considerable expense. Mr. Stockton also stated that in addition to the replacing of the landscape, there was involved the question of whether there would not be interference with the natural drainage of this part of the work, and also the fact that it would be necessary to rebuild a walk alongside the property and to make compensation for several large trees which could not be successfully replanted, and he stated that this damage would in all probability, greatly exceed the estimate placed by the State Highway Department, and would more nearly equal the cost of the line against the Russell property.

Commissioner Kidde advised that he believed the matter should be determined for the Pine Estate by an outside surveyor, who should be employed by them to consult with the State Highway Engineer with a view to determining whether or not there could be another method arrived at for the realignment of Route 13 at this point and how this could be done at a minimum of loss to the Pine Estate. This suggestion was agreeable to Mr. Pine, and Chairman Scott directed that the State Highway Engineer arrange to halt all work in connection with the line of Route 13 at the Pine property in order that this matter could be straightened out before any serious damage is done.

Monmouth County Request for Aid

The Secretary informed the Commission that Senator Stevens, County Counsel for Monmouth County, and the County Engineer George K. Allen, were present for conference with the Commission. On motion by Mr. Kidde, seconded by Mr. Jelin, the Commission went into executive session at this time. When the executive session was ended Commissioner Jelin moved that the County of Monmouth be requested to submit its request for aid through Red Bank in written form in order that the same might be given proper attention by the Commission.

Route 5, Section 6, Speedwell Ave.

The Secretary informed the Commission that Mr. John S. Geiger, and Mr. John Heller, were present with reference to the final payment on Route 5, Section 6, Speedwell Avenue, Morristown. On motion duly seconded, a hearing was granted. Mr. Geiger appeared before the Commission and explained that he was anxious to secure his final payment on Route 5, Section 6, Speedwell Avenue, Morristown, but was unable to do so in view of the fact that he was requested to furnish a full release, and Mr. John W. Heller, subcontractor on the bridge on this section of the road, had a claim for damages due to delays caused him by an injunction secured against proceeding with the bridge work. Mr. Heller was asked to explain his claim to the Commission and advised that due to the injunction placed upon the work, he had suffered a loss in tied up equipment and was forced to do the work during winter weather when prices were much bigger than he had figured. State Highway Engineer Sloan advised that any stoppage of work on any contract, due to any reason whatever, carried with it only an extension of time to the contractor and such an extension was granted in this case. Commissioner Kidde stated that in view of this fact and the fact that the contractor had delayed in ordering the stone ring for the bridge, he did not feel that the Commission could be held responsible, and he moved that the claim of the subcontractor, John Heller, against J. S. Geiger's Sons, contractors on Route 5, Section 6, be denied. This was seconded by Mr. Jelin and adopted.

Mr. Heller advised Mr. Geiger that he would not press his claim against the original contract and Mr. Geiger, therefore, advised the Commission that he would accept the final payment on this contract in full of all claims that have arisen or may arise in the future. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission, therefore, accepted the statement of Mr. Geiger and authorized final payment to be made in accordance with the terms of the Reimbursement Act.

Cedar Avenue, Long Branch

The Secretary presented a communication from the City of Long Branch, requesting joint conference with the Board of Freeholders of Monmouth County and a representative of the State Highway Department, concerning Cedar Avenue, Long Branch. On motion by Mr. Jelin, seconded by Mr. Kidde, the communication was ordered referred to the State Highway Engineer for report to the Commission and to have a representative at this conference.

New Jersey Constructors' Ass'n.

The Secretary presented a communication from the New Jersey Constructors' Association, advising the State Highway Commission that suit has been brought against the Public Service Production Company of Newark for the infringement of patents of the Macon Concrete Roller Process used in accordance with the State Highway Specifications, and requesting the cooperation of the State Highway Department to help fight this suit. On motion by Mr. Kidde, seconded by Mr. Jelin, the communication was ordered acknowledged and the Commission directed that the Secretary advise the Contractors' Association that it is at liberty to secure any information of data in the possession of the State Highway Department that may be of assistance in this particular case.

Camden Advisory Board

State Highway Engineer Sloan reported to the Commission that the work of the Camden Advisory Board has been completed and he presented to the Commission on behalf of the Advisory Board its report and recommendations. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission directed that the report be accepted and that the Advisory Board members who prepared this report be extended thanks in a formal manner on behalf of the Commission.

Standard Highway Specifications

State Highway Engineer Sloan reported to the Commission that the standard specifications for State Highway construction were being revised and have reached the point where they are ready for the printer. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission directed that the revised specifications for 1924 be proceeded with at once, and that proof copies of the same be placed in the hands of the State Highway Commissioners at the earliest possible date in order that the same may be carefully studied and duly passed upon.

S#3

Right of Way-New Amboy Bridge

The Secretary again presented for the attention of the Commission, as directed at the last meeting of the Commission, the communication received from McCarter & English, representing the Donnell Lumber Company, and from Stillman-Delehanty-Ferris Co., concerning right of way at the new Amboy Bridge. State Highway Engineer Sloan recommended to the Commission that formal steps be taken to lay out a section of Route 4 along the right of way of the new Amboy Bridge in order to permit ingress and egress from the Donnell Lumber Company's lands. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission directed that the Engineering Division proceed with the laying out and construction of an auxiliary line for Route 4 at the location of the new Amboy Bridge over State property in order to afford an ingress and egress to property located beside this land.

Lee Highway Convention Delegates

Commissioner Jelin reported for the minutes of the meeting the fact that the State Highway Commission had determined to suggest the following names to the Governor as delegates to the Convention of the Lee Highway Association, at the Willard Hotel in Washington:

> Commissioners Kidde and Stewart, Assistant State Highway Engineer Reed, Senator Arthur N. Pierson, Mr. H. J. Meixell, Secretary of the Good Roads Ass'n., T. J. Wasser, Former State Highway Engineer, Palmer A. Campbell of the New Jersey State Chamber of Commerce, Walter J. Buzby, President of the Good Roads Ass'n., Senator Morgan F. Larson, County Engineer of Middlesex County, and J. E. Thier, Supervisor of Roads of Bergen County.

The Schedule of Business was next taken up for consideration item by item as follows:

Route 5, Section 11

State Highway Engineer Sloan presented the following list of bids received on January 28th for the construction of Route 5, Section 11, Delaware-Belvidere, and recommended the award of contract to the lowest bidder, Salmon Brothers of Netcong, New Jersey at their bid of 90.1% of the Engineer's estimated units of cost.

Salmon Bros	90.1%
Smith Bros. Co	97.5
Chas.T.Kavanagh	97.77
Ralph Sangiovanni	98.5
C. H. Winans Co	99.14
Ross & Whelan	99.49
Public Service Prod. Co	101.44
Sutton & Corson	103.98
Freehold Construction Co	104.
John Dorer	107.6
Newark Paving Co	107.9
N. J. Construction Co	111.5
Union Paving Co	112.7

On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission unanimously adopted the following resolution:

> RESOLVED, that the State Highway Commission does hereby make award of contract for the construction of Route 5, Section 11, Delaware-Belvidere section, to Salmon Bros., of Netcong, New Jersey, at their's the lowest bid of 90.1% of the Engineer's estimated units of cost, said bid amounting to $353,428.33, and
>
> BE IT FURTHER RESOLVED, that the Chairman is directed to sign the necessary contracts after approval by the State Highway Engineer.

Commissioner Jelin called attention to the members of the Board to the fact that he believed a saving had been made on this contract to the amount of $40,000.00, due to the fact that bids for this work were received so early in the year, and he recommended to the

Commission that efforts be made to let as much of the year's work as possible in the early months of the year.

Route 1, Lincoln Highway Section

State Highway Engineer Sloan reported that no formal bids had been received in response to advertisement for repairs to the Turntable on the Passaic River Bridge at M.P. 56.7, on Route 1, Lincoln Highway Section, and he recommended that State House Commission permission be requested for the making of such repairs at a cost estimated to be $100,000.00 without advertising. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission approved of the recommendation of the State Highway Engineer, and directed that the Secretary make the necessary request for permission from the State House Commission to make repairs to the Turntable on the Passaic River Bridge on Route 1, Lincoln Highway Section, without advertising for bids, at a cost estimated to be $100,000.00.

Route 4, Detour Complaint

State Highway Engineer Sloan presented to the Commission a report on the damage to pavement on King George's Road, used as a detour during the construction of Route 4 connecting link on Amboy Avenue, Perth Amboy, and as complained of in a communication from the "Woodbridge Leader". He advised that an examination made of this pavement brought out the fact that the failure now existing is largely due to an increase in traffic over the road, due to its use as a detour and he did not believe that the contractor, Mr. M. I. Demarest should be held responsible for the replacement of the work which had failed, inasmuch as the maintenance of this detour should be a proper charge against the construction work on Route 4, which necessitated the detour, and he recommended that the necessary repairs be made and the cost of the same be deducted from the $75,000.00 as set up for the State's allotment on Route 4, connecting link, the estimated cost of the work being $7,500.00 work to be done either by the Maintenance Division or by agreement with the Township, whereby they will accept a certain sum and make the repairs themselves. State Highway Engineer Sloan informed the Commission that County Engineer Larson felt there may be some question as to the legality of this procedure, although it was his own contention that inasmuch as funds were set up for detour work on all State Highway construction, this could be applicable. On motion by Mr. Jelin, seconded by Mr. Stewart, the matter was ordered held in abeyance until it could be taken up with the Attorney General's Department in order to determine the legality of the question.

Blackwell Street, Dover, Rt. 5

State Highway Engineer Sloan presented a communication from the Morris County Traction Company advising that they expect to be able to arrange for the rehabilitation of their tracks when the highway is improved, but it does not feel that its responsibility will apply beyond this cost, in view of the fact that the financial condition of the company will not permit of their repaving between the tracks on this work. State Highway Engineer Sloan recommended to the Commission that the work on Blackwell Street, Dover, be proceeded with on the basis of charging the cost of any of the items included in their franchise, against the Traction Company. On motion by Mr. Stewart, seconded by Mr. Jelin, the State Highway Commission approved the recommendation of the State Highway Engineer and authorized proceeding with the construction of Blackwell St., Dover, with the understanding that before any active steps are taken relative to the trolley track area, the method of procedure be with the direction and approval of the Attorney General's Department.

Right of Way-Hackensack River Bridge

State Highway Engineer Sloan directed the attention of the Commission to the fact that under date of August 21, 1923, instructions were given for the acquisition of the entire property of James Bowen on the Hackensack River where a temporary bridge over the Hackensack occupied his property. He stated, however, that in view of the fact that the portion taken by the State was only a small corner of the property, the Commission should not acquire more land than was actually needed for the work. Commissioner Kidde, therefore, moved that an offer of $6,000 be made to James Bowen for his property located on the Hackensack River on the site of the present temporary Hackensack River Bridge, together with a ten foot strip on the south side, and in the event that same is refused by the owner to institute condemnation proceedings in accordance with the following resolution:

> RESOLVED, that this Commission hereby determines to acquire in the name of the State of New Jersey, ALL that certain Lot, tract or parcel of land and premises, situate, lying and being in the State of New Jersey, and more particularly described as follows:
>
> East Approach-Temporary Hackensack River Bridge,
> Route 1, M. P. 57.8

"Beginning at a point in the north right of way line of Communipaw Avenue, (also known as Lincoln Highway) distant 1791 feet in a northwesterly direction from the center line of Marcy Avenue, or distant 454 feet in a northwesterly direction from east side of Dover Avenue; thence N 34°-15' W, a distance of 310 feet; thence N 57°-55'-50" W a distance of 98 feet plus to the shore line of the Hackensack River; thence along the bank of the Hackensack River, approximately a southern direction, a distance of 59.12 feet more or less and in an irregular line; thence S 49°-13'-01" E, a distance of 72.61 feet; thence S 38°-06'-12" E 125.39 feet; then S 32°-04'-10"W 19.0 feet intersecting the north right of way line of Communipaw Ave.: thence along the north right of way line of Communipaw Avenue S 57°-55'-50" E 166.0 feet to point of beginning, said tract containing 0.41 Acre."

The State Highway Engineer is hereby authorized and directed on behalf of this Commission to make an offer of $6,000.00 to the owner or owners of said lands and premises for the conveyance of the same to the State of New Jersey free and clear of all encumbrances, and upon the failure of such owner or owners to accept such offer, or if for any other reason said lands and premises cannot be immediately acquired by agreement with such owner or owners, then the Attorney General of the State of New Jersey is hereby authorized and directed to institute condemnation proceedings for the acquisition of said lands and premises.

This was seconded by Mr. Stewart and adopted.

Commissioner Stewart moved that in view of the foregoing action of the Commission, that action taken by the State Highway Commission under date of August 21, 1923, in the matter of the acquisition of the property of James Bowen, at the location of the Hackensack River Bridge, be rescinded. This was seconded by Mr. Kidde and adopted.

Route 12, Hackettstown-Port Colden ✓

State Highway Engineer Sloan presented for the Commission's attention Federal Aid Project Statement as required for the construction of Route 12, Hackettstown-Port Colden Section, and recommended that the same be approved, said approval to carry with it approval of plans and specifications and order to advertise this work. On motion seconded by Mr. Stewart, the State Highway Commission adopted the following resolution:

> RESOLVED, that the State Highway Commission does hereby approve plans and specifications for the construction of Route 12 Hackettstown-Port Colden Section, and does also approve of Federal Aid Project Statement as required by the Federal Government covering this work, and
>
> BE IT FURTHER RESOLVED, that the Chairman is authorized to sign the necessary plans and specifications and the Chief Clerk is directed to place the necessary advertisement for the work, after approval by the State Highway Engineer and Federal Bureau.

Federal Aid Project-Route 10,Section 6 ✓

State Highway Engineer Sloan presented for the Commission's attention Federal Aid Project Statement as required for the construction of Route 10, Section 6, Hackensack-Paterson Section, and recommended that the same be approved, said approval to carry with it approval of plans and specifications, and ordered the advertisement of this work. On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission adopted the following resolution:

> RESOLVED, that the State Highway Commission does hereby approve plans and specifications for the construction of Route 10, Section 6, Hackensack-Paterson Section, and does also approve of Federal Aid Projects statement as required by the Federal Government covering this work, and
>
> BE IT FURTHER RESOLVED, that the Chairman is authorized to sign the necessary plans and specifications and the Chief Clerk is directed to place the necessary advertisement for the work after approval by the State Highway Engineer and Federal Bureau.

Federal Aid-Route 9, Section 13 ✓

State Highway Engineer Sloan presented for the Commission's attention Federal Aid Project Statement as required for the construction of Route 9, Section 13, White House-County Line Section, and recommended that the same be approved, said approval to carry with it approval of plans and specifications and ordering the advertisement of the work. On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission adopted the following resolution:

> RESOLVED, that the State Highway Commission does hereby approve plans and specifications for the construction of Route 9, Section 13, White House - County Line Section, and does also approve of Federal Akd Projects Statement as required by the Federal Government covering this work, and
>
> BE IT FURTHER RESOLVED, that the Chairman is authorized to sign the necessary plans and specifications and the

Chief Clerk is directed to place the necessary advertisement for the work after approval by the State Highway Engineer and Federal Bureau.

Womens' Reformatory Entrance ✓

State Highway Engineer Sloan presented to the Commission a report from the Central Division Engineer on the cost of the reconstruction of the entrance to the Womens' Reformatory at Clinton New Jersey, the estimated cost of the work being $338.00, and he recommended that authority be given for the work to be done by the Maintenance Department. On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission authorized the reconstruction of the entrance road to the Womens' State Reformatory at Clinton, New Jersey, work to be done by the Maintenance Department at an estimated cost of $338.00.

Compensation Award ✓

State Highway Engineer Sloan presented to the Commission a report as to the compensation award by the Workmen's Compensation Bureau of the State Department of Labor to Salvatore Nicotra, a laborer of the State Highway Department who was injured on June 9th, 1922, at Asbury Park. The compensation awarded Mr. Nicotra, on the basis of commutation, since Mr. Nicotra was desirous of returning to Italy to remain with his family, was $1368.00, and the State Highway Engineer recommended that in view of this there be no appeal in the case, and that this amount be authorized for payment by the State Highway Commission. On motion by Mr. Stewart, seconded by Mr. Kidde, the State Highway Commission directed payment of $1,368.00 to Salvatore Nicotra in view of all claims against the State Highway Department on account of injuries received.

Employments ✓

On recommendation of the State Highway Engineer, Commissioner Kidde moved the ratification of the following employments as approved by the State Highway Engineer since the last meeting of the Commission. This was seconded by Mr. Stewart and adopted.

Feb. 1	J. C. Edwards	Gravel Patrolman	$ 85.00	mo.
Jan. 16	Michael Pulenich	Foreman Maint.	155.00	
" 16	Thomas Jones	Bridge Tender	90.00	
Feb. 1	Morris L. Pitman	Gravel Patrolman	85.00	
Jan. 22	Oscar Richmond	Gar. Assistant	.45	hr.
" 23	N. Deckelnich	" "	.45	

V. J. Loughran-Sick

State Highway Engineer Sloan presented a certificate under date of January 1, 1924, from the Medical Superintendent of the Rainbow Sanatorium, Independent Order of Foresters, advising that Mr. V. J. Loughran, former Bridge Tender in the State Highway Department, was still in that institution receiving treatment for pulmonary tuberculosis. The Secretary informed the Commission that at the end of February the State Highway Commission will have paid Mr. Loughran for six months in full. Commissioner Stewart moved that a communication be forwarded to Mr. Loughran regretting to inform him that the State Highway Commission must terminate its payment of compensation at the end of six months period which will be on February 29th, and advising him that the State Highway Commission will be very glad to present his case to the officials of the Glen Gardner Sanatorium if he desires to avail himself of treatment offered at that State Institution.

Primrose Brook Bridge, M. P. 33.7

State Highway Engineer Sloan reported to the Commission the completion of the Primrose Brook Bridge at M.P. 33.7, Route 16, Section 6, January 5, 1924, including two standard approaches, and recommended acceptance on the part of the Commission. On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission approved the acceptance and final payment of Primrose Brook Bridge at M.P. 33.7 on Route 16, Section 6, in accordance with the recommendation of the State Highway Engineer.

Right of Way, Route 5, Section 11

On recommendation of the State Highway Engineer, Commissioner Stewart moved the approval of the purchase of Parcel #23, on Route 5, Section 11, Delaware-Belvidere Section, from Harvey Hoffman and wife for the consideration of $2,000.00. This was seconded by Mr. Kidde and adopted.

Supervisor of Traffic Position

State Highway Engineer Sloan reported to the Commission that he deemed it essential to establish the position of Supervisor of Traffic, whose duties it will be to prepare the monthly detour bulletin, to compile results of data secured, to select traffic counting stations and to investigate and report traffic conditions on state highway routes and make analysis of accidents on State Highways, and he recommended that Mr. E. B. Loughran be appointed to this position temporarily, effective March 1st, 1924, subject to the approval of the Civil Service Commission. On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission approved the recommendation of the State Highway Engineer to the Civil Service Commission, that the position of the Supervisor of Traffic be established with a range of $200. to $250. per month, effective March 1st, 1924, and that Mr. E. B. Loughran be given temporary appointment to this position subject to Civil Service examination.

Long Valley-Hunterdon County Line

On recommendation of the State Highway Engineer, Commissioner Kidde moved the approval of plans and specifications for the construction of the Long Valley-Hunterdon County Line Road, Morris County. Motor Vehicle Aid work. This was seconded by Mr. Stewart and adopted.

Cumberland Causeway

On recommendation of the State Highway Engineer, Commissioner Stewart moved the approval of contract for the Cumberland Causeway, Cumberland County, Motor Vehicle Aid work. This was seconded by Mr. Kidde and adopted.

Imlaydale Road, Warren County

State Highway Engineer Sloan recommended to the Commission that a resolution be adopted, approving of the action of Warren County Board of Freeholders in making application for the construction of a highway between Imlaydale and the Borough of Washington in accordance with the requirements of the Bureau of Public Roads. On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission unanimously adopted the following resolution:

> WHEREAS, under date of September 12, 1923, the County of Warren did pass a resolution expressing its desire to include the road beginning at the dividing line between Hunterdon and Warren Counties at Imlaydale and running by way of Marlatt's Corner, Washington, Oxford and connecting with State Highway Route 5 at Buttzville, a total distance of 11.46 miles in the Seven Percent System or Highways of New Jersey, and

WHEREAS, the County of Warren is desirous of improving that portion of said highway between Imlaydale and the Boro of Washington, a total distance of 3.26 miles, and

WHEREAS, the County of Warren did agree to comply with all requirements of the Bureau of Public Roads and Federal Aid Act of 1921.

NOW, THEREFORE, BE IT RESOLVED, that the State Highway Commission does hereby ratify, confirm, and approve the action of the Warren County Board of Freeholders, and

BE IT FURTHER RESOLVED, that a Project Statement be executed and forwarded to the Bureau of Public Roads of the United States Department of Agriculture on account of this improvement.

Township Aid Funds for 1924

State Highway Engineer Sloan presented for Commission consideration the approval of application covering balance of Township Aid funds available in the 1924 Township Aid Account. On motion by Mr. Kidde, seconded by Mr. Stewart, the matter was laid over until the next meeting of the Commission.

Cape May County-Township Aid

On recommendation of State Highway Engineer Sloan, Commissioner Kidde moved the approval of Force Account Agreement on Breakwater or Jerry Eldridge Road, Lower Township, Cape May County, Township Aid. This was seconded by Mr. Stewart and adopted.

Cape May County-Township Aid

On recommendation of the State Highway Engineer, Commissioner Kidde moved the approval of Force Account Agreement on the Shunpike Road, Lower Township, Cape May County, Township Aid. This was seconded by Mr. Stewart and adopted.

New England Road, Cape May County Township Aid

On recommendation of the State Highway Engineer, Commissioner Kidde moved the approval of Force Account Agreement on the New England Road, Lower Township, Cape May County, Township Aid. This was seconded by Mr. Stewart and adopted.

Button Mill Road, Cumberland County, Township Aid

On recommendation of the State Highway Engineer, Commissioner Kidde moved the acceptance and final payment on the Button Mill Road, Upper Deerfield Township, Cumberland County, Township Aid. This was seconded by Mr. Stewart and adopted.

Cumberland County-Township Aid

On recommendation of the State Highway Engineer, Commissioner Kidde moved the acceptance and final payment on the North East Boulevard Section, Landis Township, Cumberland County, Township Aid. This was seconded by Mr. Stewart and adopted.

Unexpended Township Aid Balance

On recommendation of the State Highway Engineer, Commissioner Kidde moved the approval of the transfer of unexpended balances from the Button Mill Road in the sum of $96.55 and from the Cake Road in the sum of $162.35, to be applied to the Cornwell Drive in Upper Deerfield Township, Cumberland County. This was seconded by Mr. Stewart and adopted.

Somerset County-Township Aid

On recommendation of the State Highway Engineer, Commissioner Kidde moved the approval of agreement for the construction of the Shultz-Stone House Village Road, Bernards Township, Somerset County, Township Aid. This was seconded by Mr. Stewart and adopted.

Cumberland County-Township Aid

On recommendation of the State Highway Engineer, Commissioner Kidde moved the acceptance and final payment on the Heislerville Road, Maurice River Township, Cumberland County, Township Aid. This was seconded by Mr. Stewart and adopted.

On motion by Mr. Stewart, seconded by Mr. Kidde, the meeting adjourned at 5:00 P.M. to meet in regular session on Tuesday, February 5 at 10:30 A.M.

Respectfully submitted,

A. LEE GROVER,

Secretary

MINUTES OF MEETING-February 5, 1924

A regular meeting of the State Highway Commission was held in the meeting room of the Commission, Broad Street Bank Building, Trenton, N.J. on Tuesday, February 5, 1924, The meeting was called to order by Chairman Scott at 11:00 A.M.

Present: General H. L. Scott, Chairman, and Messrs.
Percy H. Stewart, Walter Kidde and Abraham Jelin.

Morgan Grade Crossing-Route 4

State Highway Engineer Sloan informed the Commission that he had been in conference prior to the meeting, with representatives of the Central Railroad of New Jersey, relative to arriving at some decision on the matter of the share to be borne by the Railroad Company in the cost of the elimination of the Morgan Grade Crossing. He introduced to the Commission, Mr. C. H. Stein, General Manager of the Central Railroad of New Jersey, Mr. A. E. Owens, Chief Engineer, and W. A. Barkalow, Assistant General Counsel. On motion by Mr. Stewart, seconded by Mr. Jelin, the Commission went into executive session with the officers of the Central Railroad of New Jersey. No definite action was reported for the minutes of the meeting.

Advisory Board Route-North Camden

The meeting was resumed and the Secretary informed the Commission that a delegation representing North Camden was present with reference to the Advisory Board Route in the City of Camden. On motion, duly seconded, a hearing was granted. There appeared, Rev. Thomas J. Whelan, Paston of the Holy Name Church: Mr. J. W. Slim, representing the Camden Civic Club, and Rev. Elwood A. Harvar, representing the Ministerial Union of Camden. Mr. Slim stated that the delegation represented the residents of North Camden who were desirous of obtaining more information on the matter of the Advisory Board Route through Camden, especially with regard to the railroad freight line existing on Main Street, and which it was proposed to permit to exist in its present location, except for the elimination of the grade crossing over Penn and Linden Streets, part of which would form the new entrance to the Bridge Plaza. Mr. Slim stated that the residents of North Camden were interested in having the railroad place the tracks on a proposed Belt Line which would take the tracks entirely off Main Street and place them close to the water edge on the outside of Camden. State Highway Engineer Sloan informed the delegation and the Commission that the matter of track elimination on the Boulevard was considered of prime importance. The Advisory Board, in making its study, was assured by the railroad officials that if right of way would be provided parallel with the bridge boulevard, the railroad company would be willing to expend the necessary amount of money to move the tracks to the new location, but the railroad company was not satisfied to enter upon the construction of a new Belt Line at this time. In view of this, the Advisory Board felt that any change in the track situation other than as recommended must necessarily be a local Camden proposition. Commissioner Kidde urged upon the delegation the necessity for viewing the Camden problem with sufficient foresight to see its value at the end of 25 to 50 years from the present.

General Scott informed the delegation that the State Highway Commission was now bringing before the Legislature the matter of providing such additional funds as are necessary to carry out the major projects at Jersey City and Camden, and he further advised that the State Highway Commission would not adopt any particular line as recommended by the Advisory Board until a fair opportunity had been given to all interested parties to be heard.

Right of Way-Route 13

State Highway Engineer Sloan directed the attention of the Commission to the necessity for clearing up the situation existing at the Pyne property on Route 13, and he advised that Mrs. Pyne had engaged the services of Mr. MacMillan, the Superintendent of Grounds and Buildings at the Princeton University, to go over the property with the State Highway Department, and ascertain whether a more suitable line than that recommended by the Engineering Department of the Commission could be found. He reported that Mr. MacMillan was present at this time if the Commission desired to interview him. An invitation was extended by the Commission for Mr. MacMillan to explain the situation as he found it, which was as follows:-

> "That if the State Highway Commission will only acquire the 23' of right of way needed for roadway purposes and sidewalk, leaving the acquisition of the remaining right of way till a later period, there would be a minimum of damage done to the Pine Property and he believed that after a conference with Mrs. Pine he would be able to have Mrs. Pine agree to the change."

State Highway Engineer Sloan presented a sketch as drawn up by the State Highway Department in accordance with the suggestion of Mr. MacMillan, and he recommended that the Commission approve of the sketch as presented and authorize the acquisition of the right of way in accordance therewith at the present time. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission approved the line as indicated on the revised sketch presented by State Highway Engineer Sloan, showing only such property taken for road purposes as would be necessary for the actual road and sidewalk. Mr. MacMillan advised the Commission that he would at once proceed to endeavor to have Mrs. Pine agree to the change, since, in his opinion, State Highway Engineer Sloan was entirely within his rights in asking for full right of way.

Commissioner Kidde informed the Commission that he believed the State Highway Commission should also arrange for an independent investigation by a competent landscape engineer as to the damages to be caused to the Pine Estate by the proposed change, and he moved that Mr. Charles W. Leavitt of New York City, be employed as Consulting Engineer to study the conditions existing on the Pine Property on Route 13 in Princeton, with a view toward making an independent report for the State Highway Commission as to the nature of damage to the said property. This was seconded by Mr. Jelin and adopted.

State Highway Annual Report

State Highway Engineer Sloan presented to the Commission, in accordance with instructions previously given, the Annual Report of the State Highway Department, in which there appeared his own report and the reports of the various Divisions and also the report of the Secretary to the Commission. On motion by Mr. Kidde, seconded by Mr. Jelin, the report was ordered received and referred to the Chairman of the Board for preparation of the report of the Chairman.

On motion by Mr. Kidde, seconded by Mr. Jelin, the Commission recessed for luncheon at 1:00 P.M. to meet in regular session again at 2:30 P.M. The meeting reconvened at 2:30 P.M. as agreed, with the same members present as at the morning session.

American Ass'n of State Highway Officials

The Secretary presented a communication received by Chairman Scott from Mr H. M. Toy, Chairman of the California Highways Commission, seeking information as to whether the State Highway Commission would favor the holding of the next convention of the American Association of State Highway Officials in SanFrancisco, and how many delegates would be able to attend. On motion by Mr. Stewart, and seconded by Mr. Jelin, the communication was ordered received and acknowledged with the advice that, due to the fact that the consensus of opinion has already been taken to hold the convention in SanFrancisco, the State Highway Commission is glad to learn of the selection of that City, but will be limited in the number of representatives because of the great distance to travel. This representation will probably be limited to one individual.

Schreiber Recommendation

The Secretary received a communication from General Frederick Gilkyson, recommending Mr. William F. Schreiber, Jr. for the position of Administrative Clerk in the State Highway Department. State Highway Engineer Sloan explained that Mr. William Campbell was now holding this position in a temporary capacity and he had secured the highest average at the recent examination, but was prevented from going to the top of the list because of the fact that Mr. Schreiber was a wounded veteran. On motion by Mr. Kidde, seconded by Mr. Stewart, the Commission approved of the appointment of Mr. William Campbell as Administrative Clerk from the eligible list of the Civil Service Commission, and directed that General Gilkyson be advised that in view of the experience of Mr. Campbell and the fact that his services have been satisfactory, the State Highway Commission will retain him in it's employ.

Route 7 - Lighting

The Secretary presented a communication from Senator William A. Stevens, transmitting a petition received by him, requesting the lighting of Route 7 at a dangerous corner in the vicinity of Hamilton in Shrewsbury Township. State Highway Engineer Sloan informed the Commission that a Highway Lighthouse was at present on this location as a danger indication, but that the matter of additional lights on the highways must be a matter for the local municipality. On motion by Mr. Jelin, seconded by Mr. Stewart, the communication and petition were ordered received and acknowledged with the advice to Senator Stevens that the policy of the State Highway Commission as now in effect is that there can be no lighting along highways other than that provided by local municipalities, and further to advise that the State Highway Commission has already provided the proper signal for the dangerous condition existing at the point named in the petition.

Shore Route Improvement-Hearing

The Secretary presented a petition from the residents of Middlesex and Monmouth Counties received by Commissioner Jelin, requesting a hearing before the State Highway Commission on the matter of the Shore Road Improvement, as presented by the Special Advisory Board. On motion by Mr. Jelin, seconded by Mr. Stewart, the Petition was ordered received, ~~and~~ proper notice to be given of the hearing to be held on the matter of Advisory Board Routes before any definite action is taken as to the laying out of said routes.

Route 4, Rahway Avenue

The Secretary presented a communication from Leo Goldberger, requesting information as to whether the State Highway Commission intends to take over the road known as Rahway Avenue, leading from Woodbridge to Rahway. On motion by Mr. Jelin, seconded by Mr. Stewart, the communication was ordered received and the Secretary was directed to notify Mr. Goldberger that the highway mentioned has not, as yet, been designated by the Legislature as a State Highway Route, and for this reason it is not within the power of the State Highway Commission to take the same over.

Passaic River Bridge Repairs

The Secretary presented a communication from the Frederick Snare Corporation, bearing on the matter of quotation for the repairs to the Passaic River Bridge on Lincoln Highway Section of

Route 1, in which they advised that the nature of this work was so different that it would not seem desirable to have it done by public letting and they would offer their services on a fee basis. On motion by Mr. Kidde, seconded by Mr. Stewart, the communication was ordered received and filed.

Right of Way-Route 5

The Secretary presented a communication from Mrs. Anna F. Emery concerning property occupied by her at Buttzville, N. J. on Route 5, in which she stated that she would desire very much to be permitted to occupy this property until it was needed by the State, in view of the fact that she was a widow with seven small children and with no means for support. Right of Way Agent Vollmer was present at the meeting and informed the Commission that the Buttzville Hotel property, which was occupied by Mrs. Emery, was to be sold at Sheriff's sale in order to satisfy mortgages, at which time the State was to purchase this for right of way purposes. On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission directed the communication of Mrs. Emery be replied to, advising that if the State Highway Commission is successful in purchasing the property at Sheriff's sale, the Commission will permit Mrs. Emery to remain until the property is actually needed, for a very nominal rental fee, in view of the facts of the case, said rental to be on a month to month basis in order that the property might be obtained whenever it was deemed necessary. This was seconded by Mr. Stewart and adopted.

Bonding-

Aetna Casualty & Surety Company

The Secretary presented a communication from Mr. E. W. Bush, Engineer for the Aetna Casualty & Surety Company, in which he set forth in written confirmation the appearance of the bonding men before the State Highway Commission at its last meeting. On motion by Mr. Jelin, seconded by Mr. Kidde, the communication with enclosures, was ordered received and placed on file.

Route 1, through Elizabeth

The Secretary presented a communication and resolution from the Elizabeth Improvement Association favoring the proposed alternate route suggested by the City Engineer of Elizabeth for the line of

Route 1, through Elizabeth, as offsetting the Advisory Board recommendation in this matter. On motion by Mr. Jelin, seconded by Mr. Stewart, the communication was ordered received and the Secretary was directed to notify the writer to the effect that the State Highway Commission will give due and proper hearing to all interested parties with reference to the Advisory Board sections before any definite decision is reached.

Motor Vehicle Allotment-Hunterdon Co.

The Secretary presented a communication from the Hunterdon County Board of Chosen Freeholders, advising that the Hunterdon County Board has appropriated for road repairs for 1924 the sum equal to the Motor Vehicle allotment from the State for this year; namely, $73,502.00. On motion by Mr. Jelin, seconded by Mr. Stewart the communication was ordered received and placed on file.

Inquiry on New State Highway Route 18

The Secretary presented a communication from the Boro Clerk of Tenafly, N. J. making inquiry as to the probable time when the State Highway Commission would undertake the construction of the new State Highway Route known as State Highway Route 18. State Highway Engineer Sloan informed the Commission that preliminary surveys of this line indicated that the cost of the work will be very expensive. On motion by Mr. Jelin, seconded by Mr. Kidde, the communication was ordered received and placed on file with the information to be forwarded to the Boro of Tenafly to the effect that the State Highway Commission cannot give any definite information at this time in regard to their inquiry.

Trunk Highways

The Secretary presented a resolution adopted at a conference on Thursday, January 31st, between the New Jersey State Chamber of Commerce and the Good Roads Association of New Jersey, in which resolution the conference indorsed the projects submitted by the Advisory Boards for the construction of Trunk Highways to take care of traffic which will use the New York and New Jersey Tunnel, the Philadelphia and Camden Bridge and the New Jersey Shore Road, and urged upon the Legislature to provide adequate means for the carrying out of these projects. On motion by Mr. Jelin, seconded by Mr. Stewart, the resolution was ordered received and acknowledged with thanks and returned to the files.

Commissioner Kidde informed the Commission that he had attended a meeting held under the auspices of the New Jersey State Chamber of Commerce, bearing on the matter of Advisory Board Reports: that he had addressed the meeting, and had found much sympathy and support for the project.

Carll's Corner Road, Salem County

The Secretary presented a communication from Senator J. Gilbert Borton of Salem County, in which he expressed thanks to the State Highway Commission for its generous contributions to Salem County for the construction of Carll's Corner Road. On motion by Mr. Kidde, seconded by Mr. Jelin, the communication was ordered received and thankfully acknowledged.

Route 2-Lighting

The Secretary presented a communication from the Boro of Palmyra in Burlington County, inquiring as to the matter of better lighting along this portion of Route 2. On motion by Mr. Stewart, seconded by Mr. Jelin, the communication was ordered received and the Secretary directed to notify the Boro of Palmyra to the effect that the policy of the State Highway Commission is not to light any part of the State Highway System other than bridges, where lighting existed before the same were taken over.

Route 16, Section 4, Somerset County

The Secretary presented a communication from the Board of Freeholders of Somerset County, enclosing resolution for the acceptance of the completed work on Route 16, Section 4, from the Boro of Somerville to the Village of Pluckemin. Commissioner Jelin advised that he had been over this road and was prepared to recommend its acceptance. Commissioner Stewart also stated that he had inspected this work and was ready to recommend its acceptance. State Highway Engineer Sloan informed the Commission that in accepting this particular work there was the question of extension of time, in view of the fact that the contractor had consumed 240 working days while his contract provided for 150 working days, and that the penalty would apply in the event the Commission accepted the work at the present time without granting any further extensions.

Commissioner Stewart informed the Commission that in going over this particular section of road, he had noticed the difficulties of the contractor in the handling of the labor, and he moved that an extension of time be granted on Route 16, Section 4, for forty working days, the penalty to apply beyond that time. This was seconded by Mr. Jelin and adopted.

Commissioner Jelin moved that the State Highway Commission accept the completed work on Route 16, Section 4, Somerville to Pluckemin, in accordance with the terms of the Reimbursement Act. This was seconded by Mr. Kidde and adopted.

The Schedule of Business was next taken up for consideration item by item as follows:

Route 9, Section 14.

The State Highway Engineer presented plans and specifications for the construction of Route 9, Section 14, from the Hunterdon County Line to North Branch in Somerset County, which represents a continuation of that section of Route 9 which was approved by the State Highway Commission on January 29th, and he recommended that the same be approved and that an order to advertise be given. On motion by Mr. Jelin, the State Highway Commission unanimously adopted the following resolution:

> RESOLVED, that the State Highway Commission does hereby approve plans and specifications for the construction of Route 9, Section 14, Hunterdon County Line to North Branch, and
>
> BE IT FURTHER RESOLVED, that the Chairman is authorized to sign the necessary papers when in form and after approval by the State Highway Engineer, and the Chief Clerk is directed to place the necessary advertisement for the same.

Route 6, Cumberland County

Commissioner Kidde inquired as to whether there were any additional plans and specifications in shape in order that the Commission might arrange for the early advertisement on the work. State Highway Engineer Sloan reported that plans and specifications were practically completed for the construction of Route 6 from Bridgeton in Cumberland County to Quinton in Salem County, on which section there is a gravel foundation which had been placed and allowed to settle for the past year. Commissioner Kidde moved the adoption of the following resolution:

> RESOLVED, that the State Highway Commission does hereby approve plans and specifications for the construction of Route 6, from Bridgeton to Quinton, and
>
> BE IT FURTHER RESOLVED, that the Chairman is authorized to sign the necessary papers and the Chief Clerk is directed to place the necessary advertisement after approval by the State Highway Engineer.

This was seconded by Mr. Jelin and adopted.

Route 4, Right of Way

State Highway Engineer Sloan presented a report on the property of Mr. A. L. Hilaman, at the Bass River Bridge, New Gretna Township, Burlington County, on Route 4, and recommended that the Commission cancel the original agreement as made for the purchase of this property and provide a total payment of $2,690.00 in addition to the $400.00 already paid for the purchase of this property, due to the fact that at the time negotiations were being carried on with the property owner he was misinformed as to the grade of the new highway in front of his dwelling, being told that the grade would be raised only two feet, whereas it was raised ten feet. On motion by Mr. Stewart, seconded by Mr. Jelin, the State Highway Commission approved the recommendation of the State Highway Engineer and authorized the approval of a new purchase agreement for the property of Mr. A. L. Hilaman at a price of $2,690.00.

Right of Way-Route 5, Section 11

State Highway Engineer Sloan presented purchase agreements for Parcels #21 and 21-A, Route 5, Section 11, Delaware-Belvidere Section, from Eliza Miller for the consideration of $211.00. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission approved the purchase of Parcels #21 and 21-A from Eliza Miller on Route 5, Section 11, for the consideration of $211.00.

Albany Street Bridge-Right of Way

State Highway Engineer Sloan presented to the Commission purchase agreements for the acquisition of property necessary for the widening of the Albany Street Bridge on Route 1 at New Brunswick, from the U. S. Rubber Company for the sum of $11,181.78, which consideration is to cover the value of the land and the cost of removing, repairing and reconstruction of buildings, fences and appurtenances affected; in addition the State to replace part of a bulkhead which is destroyed. Commissioner Jelin inquired as to the items composing this total and stated that it was his understanding that a depreciation was to be charged against the buildings rather than to have the State pay the entire cost of replacing. He advised that a deduction which he understood was to be made would be in the amount of $3,100.00, and he suggested that such an offer be made the U. S. Rubber Company. Commissioner Kidde, therefore, moved that an offer be made the U. S. Rubber Company for property necessary for the widening of the Albany Street Bridge on Route 1 in the amount of $8,085.78, the State also to rebuild the bulkhead necessary and in the event of refusal, that condemnation proceedings be entered into in accordance with the following resolution:

> RESOLVED, that this Commission hereby determines to acquire in the name of the State of New Jersey, for public use in the widening of the Albany Street Bridge on Route 1, at New Brunswick, ALL that certain Lot, tract or parcel of land and premises, situate, lying and being in the State of New Jersey, and more particularly described as follows:

Parcel #2

BEGINNING at a point in the southerly side line of Albany Street, said point being a cross cut in the concrete walk thirty-three (33) feet from the P. I. marked 3+28.05, as shown on a plan entitled "State of New Jersey, Highway Department, Route 1, Section No.____"; map showing property to be acquired along southerly side of Albany Street, also showing general layout of new trolley location, line of proposed retaining wall, curbs, etc., in connection with the proposed widening of Albany Street Bridge over the Raritan River in the City of New Brunswick and the Borough of Highland Park, January 1923, Scale 1" = 10'," and running,

Thence (1) along the existing southerly side line of Albany Street, north eighty-nine degrees, forty-six minutes and thirty seconds east (89°-46'-30"E), a distance of one hundred and forty-three and fifty-seven one-hundredths (143.57) feet to a point where the line of the west abutment produced intersects the existing southerly line of Albany Street;

Thence (2) along said line of west abutment produced, south twelve degrees, fourteen minutes and twenty seconds east(S12°-14"20'E) a distance of seven and fifty-seven one-hundredths (7.57) feet to a point;

Thence (3) along the proposed new southerly right of way line, north eighty-seven degrees, seventeen minutes and forty seconds west, (N 87o-17'-40"W) a distance of one hundred and forty-five and thirty-four one-hundredths (145.34) feet to the point and place of Beginning; containing twelve one-thousandths (0.012) of an Acre, be the same more or less.

The State Highway Engineer is hereby authorized and directed on behalf of this Commission, to make an offer of the sum of $8,085.78

to the owner or owners of said lands and premises for the conveyance of the same to the State of New Jersey free and clear of all encumbrances, and, upon the failure of such owner or owners to accept such offer, or if for any other reason said lands and premises cannot be immediately acquired by agreement with such owner or owners, then the Attorney General of the State of New Jersey is hereby authorized and directed to institute condemnation proceedings for the acquisition of said lands and premises.

This was seconded by Mr. Jelin and adopted.

Right of Way-Route 15, Section 5.

State Highway Engineer Sloan presented purchase agreements for Parcel #5 on Route 15, Section 5, from Paul Ackley and wife, and recommended that an offer of $500.00 be authorized, and in the event of failure to accept said offer that condemnation proceedings be entered into. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission directed that an offer of $500.00 be made to Paul Ackley and wife for Parcel #5, on Route 15, Section 5, Millville-Menantico Creek Section, and in the event of failure to accept that condemnation proceedings be instituted in accordance with the following resolution:

> RESOLVED, that this Commission hereby determines to acquire in the name of the State of New Jersey, for public use in the construction of State Highway Route 15, Section 5, ALL that certain Lot. tract or parcel of land and premises, situate, lying and being in the State of New Jersey, and more particularly described as follows:

Parcel #5

BEGINNING at a point in the easterly side line of the road leading from Millville to Port Elizabeth, where the same is intersected by the northerly line of Paul Ackley, said point being in the southeasterly bank of Menantico Creek and distant eight and six tenths (8.6) feet westerly from, measured at right angles to the proposed center line of Route 15, Section 5. of the New Jersey State Highway System at Station 186/23 as shown on a plan entitled "New Jersey State Highway Department, Route 15, Section 5, Property to be acquired from Paul Ackley, Maurice River Township, Cumberland County, Scale 1"= 50', January 1924":

Thence (1) along aforesaid northerly line of lands of Paul Ackley and the southeasterly bank of Menagtico Creek, south eighty-four degrees and twenty minutes east (S84 -20'E) a distance of forty-five (45) feet to the proposed new easterly right of way line of Route 15, Section 5;

Thence (2) along said proposed new easterly right of way line of Route 15, Section 5, south seventeen degrees and thirty-eight minutes east (S17°-38'E) a distance of fifty-eight (58) feet to a point of curvature, distant thirty-three (33) feet from, measured at right angles to, the proposed new center line of Route 15.

Section 5, at Station 166+99.5;

Thence (3) still along said proposed new easterly right of way line of Route 15, Section 5, on a curve to the left with a radius of fifty-six hundred and ninety-seven (5697) feet, a distance of two hundred and ninety-one (291) feet to the line of lands of William Holzinger, the chord for this course bearing south nineteen degrees and six minutes east (S19°-06'E) and being two hundred and ninety and nine tenths (290.9) feet long;

Thence (4) along the line of lands of said Holzinger and Ackley south seventy-seven degrees and thirty-three minutes west (S77 -33'W) a distance of fourteen and five-tenths (14.5) feet to the easterly side line of the road leading from Millville to Port Elizabeth;

Thence (5) along the existing easterly side line of the road leading from Millville to Port Elizabeth north twenty-four degrees and thirty-six minutes west (N24°-36'W) a distance of three hundred and one and five tenths (301.5) feet to an angle in said road;

Thence (6) still along aforesaid existing easterly side line, north fifteen degrees and forty-three minutes west (N15°-43'W), a distance of sixty-six (66) feet to the point and place of beginning; containing two hundred and forty-six thousandths (.246) of an Acre, to be the same more or less, as shown on said plan.

The State Highway Engineer is hereby authorized and directed on behalf of this Commission to make an offer of the sum of $500.00 to the owner or owners of said lands and premises for the conveyance of the same to the State of New Jersey free and clear of all encumbrances and upon the failure of such owner or owners to accept such offer, or if for any reason said lands and premises cannot be immediately acquired by agreement with such owner or owners, then the Attorney General of the State of New Jersey is hereby authorized and directed to institute condemnation proceedings for the acquisition of said lands and premises.

Right of Way-Route 5, Section 11.

On recommendation of the State Highway Engineer, Commissioner Jelin moved the approval of the purchase of Parcel #19 on Route 5, Section 11, Delaware-Belvidere Section, from Harry Searles and wife, for the consideration of $1,040.00. This was seconded by Mr. Stewart and adopted.

Right of Way-Route 10, Section 1-B

State Highway Engineer Sloan reported to the Commission the fact that the Right of Way Division has given him the names of the property owners on Route 10, Section 1-B, Bluff Road Section, on which property it will be necessary to notify the owners of an intention of the State Highway Commission to dispose of the said land in accordance with the provisions of the statute, and he recommended that a proper resolution be adopted authorizing such action.

On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission unanimously adopted the following resolution:

> WHEREAS, by reason of the relocation of Section 1-B, of the State Highway Route 10, certain lands lying in the Borough of Fort Lee, Bergen County, heretofore acquired by the State are no longer needed for Highway purposes.
>
> RESOLVED, that the present owners of lands abutting the lands so acquired, and described in the deeds as set forth below, be notified of the intention of the State Highway Commission to dispose of said lands in accordance with the provisions of the Statute in such case made and provided and that said owners be offered a conveyance to them of such lands upon the payment to the State not later than March 1st next of the amount paid by the State for the acquisition of such lands.

Detour-Route 9, Sections 13 & 14.

State Highway Engineer Sloan presented to the Commission a report with reference to the matter of adoption of a detour for Route 9, Sections 13 and 14, between White House and North Branch, together with a recommendation from the Construction Engineer to the effect that it will be desirable to establish such a detour rather than have traffic go through the contract while under construction. On motion by Mr. Stewart, seconded by Mr. Kidde, the matter was referred back to the State Highway Engineer for presentation at the next meeting with estimate of cost for the maintenance of such a detour, in view of the fact that the detour will be of much greater than the actual distance of the road to be constructed.

Grade Crossing Elimination-Route 4

State Highway Engineer Sloan presented a report to the Commission in which he advised that notification had been received from the Pennsylvania Railroad Company to the effect that unless the State Highway Commission is ready to begin work on the proposed elimination of the grade crossing at Manasquan on Route 4, Section 20, at M.P. 71.3, the railroad company, of necessity, will need to withdraw that item from its budget for 1924, which includes their portion of the cost for the contemplated improvement, which would defer the work for an entire year, and he recommended that the agreement as already submitted, be approved. Commissioner Stewart advised that in view of the fact that a decision was awaited from the Attorney General's Department as to the form of agreement which might be entered into between the State Highway Department and the railroad company, relative to the elimination of grade crossing, he would move that this matter be approved subject to the approval of the Attorney General. This was seconded by Mr. Jelin and adopted.

Amboy Bridge Drainage-Route 4

State Highway Engineer Sloan presented a report from the Construction Engineer as to the proposed drainage improvement on Route 4 near the easterly end of the Amboy Bridge, in which report it was recommended that the burden of procuring the right of way for property damage, be placed upon Middlesex County, particularly as the State can be only slightly interested in the improvement, the State's interest being nothing more than the reconstruction of a culvert on State Highway Route 4, where the proposed storm drain will pass under the State Highway. State Highway Engineer Sloan recommended to the Commission that when the improvement is made by the County of Middlesex, authority be granted for the State to reconstruct a culvert passing under the State Highway at this point. Commissioner Kidde moved that the recommendation of the State Highway Engineer be approved and that information as to this matter be transmitted to the authorities of Middlesex County. This was seconded by Mr. Stewart and adopted.

Cumberland County-Township Aid

On recommendation of the State Highway Engineer, Commissioner Jelin moved the acceptance and final payment on East Landis Avenue, (Vineland Home for Feeble Minded Road) Cumberland County, Township Aid work. This was seconded by Mr. Stewart and adopted.

Burlington County-Township Aid

On recommendation of the State Highway Engineer, Commissioner Jelin moved the approval of Township Aid Force Account Agreement for Chambers Corner-Jobstown Road, Springfield Township, Burlington County, Township Aid. This was seconded by Mr. Stewart and adopted.

Burlington County-Motor Vehicle Aid

On recommendation of the State Highway Engineer, Commissioner Jelin moved the acceptance and final payment of the work on Front St., Florence, Burlington County, Motor Vehicle Aid. This was seconded by Mr. Jelin and adopted.

Extension of Time-Crown Point Road

On recommendation of the State Highway Engineer, Commissioner Kidde moved the approval of extension of time from October 31, 1923, to January 4, 1924, on Crown Point Road, Section 5, Gloucester County, work being done with Motor Vehicle Aid, said extension being necessary, due to unavoidable delays caused by the widening of a long causeway adjacent to the bridge over Woodbury Creek. This was seconded by Mr. Jelin and adopted.

Appointment-C. J. Whiteley

On recommendation of the State Highway Engineer, Commissioner Kidde moved the approval of the appointment of Mr. C. J. Whiteley as Assistant Civil Engineer (Projects) in accordance with a communication from the Civil Service Commission, at $185.00 per month, effective February 1st, 1924, said title of Assistant Civil Engineer to be effective as of June 1st, 1923. This was seconded by Mr. Jelin and adopted.

Employments

On recommendation of the State Highway Engineer, Commissioner Jelin moved the approval of employments as made since the last meeting. This was seconded by Mr. Stewart and adopted.

2-1-24	Rhoda Sidders	Sr. Clk. & Bookkeeper	$115.00 mo.
1-22-24	Walter Shiller	Title Searcher	150.00
2-1-24	Walter Aydelotte	Gravel Patrolman	90.00
2-1-24	George C. White	Draftsman	100.00
2-1-24	J. W. Aydelotte	Gravel Patrolman	100.00
2-1-24	Murray J. Doitz	Cost Clerk	90.00
1-22-24	Wm. H. Marshall	Garage Ass't.	.50 hr.

Detour-Route 12, Sections 6 & 7.

State Highway Engineer Sloan presented for the approval of the Commission a detour for Route 12, Sections 6 & &, the greater part of which is over improved State Highways, and he recommended approval of the same by the Commission. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission approved the adoption of the following official detour during the construction of Route 12, Sections 6 & 7.

> "Beginning at the intersection of Route 12 and Mountain Ave., Hackettstown, near the bridge over the Musconetcong River, and running thence (1) in a northerly direction to Route 5 at the fountain in Hackettstown: thence (2) over Route 5 in a general Westerly direction through Vienna, Great Meadows, Townsbury and Pequest to the Washington-Buttzville Road at Buttzville: thence (3) in a general southerly direction over the Washington-Buttzville Road, through Oxford Furnace to Route 12 at the Square in Washington: thence (4) in a general easterly direction over Route 12 to the Bridge over the D. L. & W. Railroad at Port Colden."

Rahway Reformatory Request

State Highway Engineer Sloan presented a communication from Dr. Frank Moore, Superintendent of the Rahway Reformatory, requesting the repair of cracks in the pavement leading to the Reformatory. He recommended to the Commission that authority be given for the Maintenance Department to make the necessary repairs. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission approved the recommendation of the State Highway Engineer.

Washington Township Roads-Morris Co.

Commissioner Jelin reported that in company with Mr. Reed, he had inspected the roads of Washington Township, Morris County, concerning which Mr. Castle, Chairman of the Washington Township Committee, had appeared before the Commission at its last meeting. He advised that with reference to the road spoken of by Mr. Castle only one-half of the same had been completed and he had recommended that instead of the Township making a request for three separate sections of road, they concentrate their application for funds to complete this line known as the Long Valley-Fairmont Road, and he had further requested the township to resubmit this matter in written form to the State Highway Commission, which they had consented to do.

Minutes Approved

Commissioner Kidde reported having carefully read the minutes of the meeting of December 11, 1923, and finding no errors moved that the same be approved as mailed. This was seconded by Mr. Jelin and adopted.

Road Maps

Commissioner Kidde requested that one of the matters to be put on the calendar of business for the next meeting, be that of the Annual Road Map distribution.

On motion by Mr. Jelin, seconded by Mr. Kidde, the meeting adjourned at 6:00 P.M. to meet in regular session on Monday, February 11, at 10:30 A.M.

Respectfully submitted,

A. LEE GROVER,

Secretary.

MINUTES OF MEETING-February 11, 1924.

A regular meeting of the State Highway Commission was held in the Commission Rooms, Broad Street Bank Building, Trenton, on Monday, February 11, 1924. The meeting was called to order at 11:00 A.M. by Chairman, General H. L. Scott.

Present: General H. L. Scott, Chairman, and
Messrs. Percy Stewart, Walter Kidde and Abraham Jelin.

East Front Street, Plainfield

The Secretary informed the Commission that Mr. A. M. Vars, City Engineer of Plainfield, and Mayor Loizeaux were present for a hearing with the Commission. On motion, duly seconded, a hearing was granted. Mayor Loizeaux appeared before the Commission and advised that the City of Plainfield was interested with Union County in the joint improvement of East Front Street, through Scotch Plains to Irvington. He advised that the County of Union was to pave 22 feet of the entire width, provided the City of Plainfield could widen the roadway to 36 feet and place the necessary curbs and gutters within the municipalities. He requested aid from the State to the extent of $50,000.00 on this improvement in view of the fact that it will afford relief to Route 9. County Engineer Vars explained that the total length of the project is 13,000 feet, of which 3,500 feet is in the Township of Scotch Plains, and 9,500 feet in the City of Plainfield. The Secretary informed the Commission that State Aid could not be granted in the City of Plainfield, but the State could share in the cost of the improvement outside of the city limits. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission directed that the application of the City of Plainfield be taken under advisement at this time. Commissioner Kidde inquired of the Secretary whether all of the priorities which the Commission had asked to be filed against Motor Vehicle balances were provided for. The Secretary advised that a statement would be prepared at the next meeting of the Commission showing available Motor Vehicle balances, together with the list of priorities already before the Commission.

Main Street, Frenchtown

The Secretary presented a communication from the Borough of Frenchtown, requesting further information as to a hearing before the Commission, relative to their request for aid on Main Street, Frenchtown. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission directed that the matter be deferred at this time.

Proposed Routes

Browns Mills Improvement Association

The Secretary presented a communication from the Browns Mills Improvement Association and also from the Browns Mills Auditorium Company, urging the taking over of the road from Camden to Toms River as a State Highway. The Secretary explained that this section was known as the Mathis Route. On motion by Mr. Jelin, seconded by Mr. Stewart, the Commission requested that the communications be acknowledged and that the Secretary advise that the State Highway Commission is not yet able to consider the taking over of this Route on account of lack of funds to provide for its maintenance and construction.

Route 7, Corlies Ave., -Freehold

The Secretary presented a communication from the Lions Club of Asbury Park and from the American Legion of Asbury Park and from the Board of Commissioners of Bradley Beach, urging the construction of Corlies Avenue, Route 7, to Freehold. On motion by Mr. Stewart, seconded by Mr. Jelin, the Secretary was directed to acknowledge the communications and to advise that the Commission has tentatively considered the construction in 1924, of that portion of Route 7, between Corlies Avenue and Colts Neck Road.

State Road Maps

The Secretary informed the Commission that at the last meeting it was directed that the matter of publication of the State Road Maps for 1924 be given discussion. Commissioner Kidde stated that he felt that the issuing of a Road Map was just as important to the people of the State as the marking of roads and detours, and also he did not know in what manner the best distribution of these maps could be obtained. The secretary informed the Commission that during the past year, distribution was made to all large hotels, garages, and clubs having contact with auto owners and users. Commissioner Kidde moved that a request be made as to the cost of publication and

and printing of 100,000 maps similar to the sketch presented by the General Drafting Company of New York, and also secure a quotation for the furnishing of 100,000 additional maps later in the season, if need for the same is found. This was seconded by Mr. Jelin and adopted. Commissioner Kidde suggested that the Secretary arrange for the descriptive material and legend which will be placed upon the map when the same is ordered.

South Avenue-White Horse Pike

The Secretary presented a communication from Senator A. S. Woodruff of Camden County with reference to the washout conditions existing on White Horse Pike at South Avenue. On motion by Mr. Jelin, seconded by Mr. Stewart, the communication was ordered received and referred to the State Highway Engineer for investigation and report.

Advisory Board Route thru Elizabeth

The Secretary presented a communication from the First Street Association of Elizabeth and the Elizabeth Avenue Improvement Association, enclosing a resolution protesting against the route as laid out by the Advisory Board, through the City of Elizabeth. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission directed the acknowledgment of the resolutions with the advice that it is the intention of the Commission to hold hearings for all interested municipalities and other persons before the adoption of any route between Elizabeth and Jersey City.

Morgan Grade Crossing-Route 4

The State Highway Engineer informed the Commission that he had received advice from the Central Railroad of New Jersey that they were satisfied with the arrangements made for the construction of the Morgan Grade Crossing with reimbursement to be made to the State in the sum of $75,000.00 in three equal yearly installments without interest, as the railroad company's share of the cost of this work. 2 The Secretary informed the Commission that conference had been held with the Attorney General's Department and that a written opinion was to be issued to the effect that, in view of the fact that the State Highway Commission is authorized to arrange for the grade crossing elimination, it is lawful that an agreement be entered into with the railroad company for such improvements. On motion by Mr. Stewart, seconded by Mr. Jelin, the State Highway Commission directed that the agreement for the construction of the grade crossing at Morgan be approved subject to the receipt of a written opinion from the Attorney General on the matter of agreements with railroad companies with respect to grade crossing elimination.

The Schedule of Business was next taken up item by item as follows:-

Township Aid Applications

On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission directed that the matter of township aid applications to take up balance of funds in the 1924 Township Aid Account be laid over until the next meeting.

Route 12, Section 5, Warren County

The State Highway Engineer presented for partial payment to Warren County, the papers on Route 12, Section 5, and he recommended that the Commission approve of the partial payment to Warren County in accordance with the Reimbursement Act and as provided in Chapter 91, Laws of 1922. Commissioner Kidde stated that in view of the fact that a number of reimbursement accounts are coming due in 1924, that a statement be prepared for the State Highway Commission, showing those counties where obligations will fall during the year, and he moved that the State Highway Commission approve of the partial payment to Warren County on account of reimbursement on Route 12, Section 5, as of Chapter 91, Laws of 1922, in view of the recommendation of the State Highway Engineer. This was seconded by Mr. Stewart and adopted.

On motion by Mr. Kidde, seconded by Mr. Jelin, the Commission recessed for lunch at 1:00 P.M. to meet in regular session again at 2:30 P.M. The Commission reconvened at 2:30 P.M. as agreed, with the same members present as at the morning session.

Right of Way-Route 6, Section 8.

State Highway Engineer Sloan presented a purchase agreement for the acquisition of right of way to construct a storm sewer through the land of Mr. A. P. Seabrook on Route 6, Section 8, for the consideration of $175.00. On motion by Mr. Jelin, seconded by

Mr. Kidde, the State Highway Commission approved the purchase of easement rights on Route 6, Section 8, from Mr. A. P. Seabrook for the consideration of $175.00.

Right of Way-Route 5, Section 11

On recommendation of the State Highway Engineer, Commissioner Jelin moved the approval of purchase of several parcels of land on Route 5, Section 11, Delaware-Belvidere Section, known as Parcels 14, 14-A/14-B and 14-C, from Mary C. VanKirk for the consideration of $1750.00, the State to build a toe wall of 150'. This was seconded by Mr. Stewart and adopted.

Material Inspection Contract

State Highway Engineer Sloan presented to the Commission proposals received from the Hildreth Company, the Robert W. Hunt Company and the Pittsburg Testing Laboratories, for the inspection of steel, piling and lumber, both treated and untreated, for use in the 1924 construction season, and he recommended that this work be authorized to be awarded to the Robert W. Hunt Company, which is now doing the inspection work on the Perth Amboy Bridge. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission approved the recommendation of the State Highway Engineer and awarded the contract for the inspection of materials for the 1924 construction season to the Robert W. Hunt Company.

Manasquan Grade Crossing Elimination-Route 4

State Highway Engineer Sloan presented for the Commission's consideration the agreement with the Pennsylvania Railroad Company covering the elimination of Grade Crossing on Route 4 at Manasquan, and he advised that this was also one of the matters which would be covered by the written opinion of the Attorney General's Department. He called attention, however, to the fact that the title to the bridge, after construction, will be vested in the State of New Jersey; also the Pennsylvania Railroad Company, is responsible at all times for its maintenance and repairs. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission directed approval of this agreement with the Pennsylvania Railroad Company, subject to the receipt of a written opinion from the Attorney General as to its legality.

Extension of Time-Somerset County

On recommendation of the State Highway Engineer, Commissioner Jelin moved the approval of extension of time to November 28, 1923, on the Clairmont-Post-Kundhardt Road, Bernards Township, Somerset County. This was seconded by Mr. Stewart and adopted.

Federal Aid-Route 6.

State Highway Engineer Sloan recommended to the Commission the approval of Project Statement for Federal Aid on Route 6, Salem to Bridgeton, which includes the construction in 1924 of that section from Bridgeton through Marlboro to Quinton. On motion by Mr. Jelin seconded by Mr. Kidde, the State Highway Commission approved the Project Statement for Route 6, Salem-Bridgeton Section.

Route 7, Freehold-Colts Neck

State Highway Engineer Sloan recommended to the Commission the approval of Projects Statement for Federal Aid on Route 7, between Freehold and Ocean Grove, which includes the construction of Corlies Avenue to Colts Neck Road, and he moved that the same be approved by the Commission. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission approved the projects statement for Federal Aid on Route 7, Freehold-Ocean Grove for submission to the United States Department of Public Roads.

Hainesburg-Columbia Road-Federal Aid

On recommendation of the State Highway Engineer, Commissioner Jelin moved the approval of Projects Agreement for Federal Aid application on Project #52, known as the Hainesburg-Columbia Road in Warren County, no State funds being involved at this time. This was seconded by Mr. Stewart and adopted.

Employments

On recommendation of the State Highway Engineer, Commissioner Stewart moved the approval of the following list of employees as made since the last meeting of the Commission:

Wm. J. Fitzpatrick	- Junior Inspector	$125.00 mo.	2-1-24
Samuel Beaumont	- Mechanic	.65 hr.	2-5-24
Raymond Brady	- Mechanic	.70 hr.	2-4-24

This was seconded by Mr. Jelin and adopted.

Township Aid Report

The State Highway Engineer presented a report from Assistant State Highway Engineer Reed, advising that of 127 townships, which have received Township Aid, 17 have advised that the required maintenance money has been appropriated. On motion by Mr. Stewart, seconded by Mr. Kidde, the State Highway Commission directed that Assistant State Highway Engineer Reed be requested to prepare a memorandum as to the townships on which additional Township Aid had been granted from balances available, in order that the Commission might determine whether they are willing to furnish the necessary maintenance funds each year. This was seconded by Mr. Kidde and adopted.

Route 5, Delaware-Belvidere

The Secretary informed the Commission that Mr. Houston and Mr. Quay of Delaware, N. J. were present with reference to the line of Route 5, between Delaware and Belvidere. They protested the moving of the route away from the limits of the Town of Delaware without providing a means of access from the Railroad Station directly to the road, without adding an extra distance of one-half mile. Construction Engineer Bedwell was present with plans of this section of the route, and explained that the existing road was not a public road, but was owned privately and was formerly a toll road, leading to the toll bridge over the Delaware River at Delaware. Commissioner Kidde stated that the plan as submitted appeared to have merit, but that a means should be afforded for direct communication between the Township of Delaware and the new highway, and he suggested that the Engineering Division make a further study of this particular location to ascertain whether the claims presented should be further considered. He asked that the matter be again brought before the Commission at its next meeting.

On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission adjourned its meeting at 4:00 P.M. to meet in regular session on Tuesday, February 19, 1924, at 10:30 A.M.

Respectfully submitted,

A. LEE GROVER,

Secretary.

MINUTES OF MEETING-February 19, 1924.

A regular meeting of the State Highway Commission was held in the Commission meeting room, Broad Street Bank Building, Trenton, New Jersey, on Tuesday, February 19th. The meeting was called to order by Chairman Scott at 10:30 A.M.

Present: Chairman, General Hugh L. Scott, and Messrs.
Percy H. Stewart, Walter Kidde and Abraham Jelin.

County Fund Distribution

The Secretary presented to the Commission a statement prepared by the Chief Auditor and Accountant, showing the distribution of funds for reimbursement to the several counties of the State, said payments to be made during the years 1924, 1925 and 1926. The Commission carefully considered this statement and Mr. Kidde moved that the statement as submitted by the Chief Auditor be approved, ratified and confirmed, and that authorization be given for payment of all 1924 reimbursement accounts to counties where proper vouchers are submitted. This was seconded by Mr. Stewart and adopted, as shown on the following list:

Bergen County	$ 248,796.18
Camden "	200,000.00
Cape May "	124,855.58
Cumberland "	209,161.06
Gloucester "	200,000.00
Mercer "	65,329.66
Monmouth "	200,000.00
Morris "	200,000.00
Ocean "	200,000.00
Passaic "	48,796.17
Salem "	200,000.00
Somerset "	200,000.00
Warren "	391,567.43
City of Bridgeton	170,351.50
Boro of Somerville	23,200.69
	$2,682,058.27

Convention-American Concrete Institute

State Highway Engineer Sloan recommended to the Commission that permission be given to Bridge Engineer, John L. Vogel, to attend the American Concrete Institute at Chicago, Illinois, his necessary expenses to be paid by the State Highway Department. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission adopted the recommendation of the State Highway Engineer.

Maplewood Township-Essex County

The Secretary informed the Commission that a delegation of representatives of Maplewood Township in Essex County were present and desired a hearing before the Commission in the matter of the construction of Route 5 through the township. On motion duly seconded, a hearing was granted. There appeared County Engineer Stickel of Essex County, Freeholder Hynes of Essex County and Township Engineer Halsey of Maplewood Township. Mr. Stickel addressed the Commission, and advised that the delegation appeared to ascertain what plans the Highway Commission had in contemplation for the improvement of Route 5 on Springfield Avenue, Maplewood. He explained that this roadway had car tracks on either side of the road, and the township would like to see these car tracks moved to the center and a proper construction, 50 feet in width, be placed upon this road. Chairman Scott inquired as to the franchise rights of the trolley company and was informed that in general in this locality, the trolley company had the privilege of placing its tracks on the side of the road and was expected to maintain a proper macadam roadway between its tracks and 18 inches outside thereof. State Highway Engineer Sloan advised the Commission that present plans, as being drawn, contemplated the moving of the trolley tracks to the center of the roadway with a 22 foot strip to be paid for by the State, inclusive of the trolley track area. He advised that the work on this section of Route 5 was in the program for early construction.

Township Engineer Halsey cautioned the Commission against any roadway less than 50 feet in width, stating that with the trolley tracks in the center, there should be at least a sufficient roadway on either side for vehicles to pass each other, and he felt that in view of the fact that the township would have to place necessary drainage, plus curbs and gutters, the State Highway Commission should increase the width of the roadway beyond that suggested by the State Highway Engineer. County Engineer Stickel made a plea before the Commission that the policy as to width if adopted by the State Highway Commission, was a 22 foot maximum. He felt that the State Highway Commission should be ready to build a width of highway, depending in every case, upon the requirements of traffic, and he pointed out the fact that this road was the second heaviest travelled roadway in Essex County, showing a count in ten hours of 9,400 vehicles. Commissioner Kidde called the attention of the delegation to the fact that the State Highway Commission had a definite amount of resources at its command which must be expended over a number of road miles and regardless of what the present feelings of the Commission might be, they could only build such a width as was felt necessary to accommodate through travel without taking into consideration any local improvements whatever. State Highway Engineer Sloan advised that in very few of the cases the through traffic requires more than the 22 feet, but the policy has always been to pave such a width as was necessary for the through traffic, and as a matter of fact, in the more outlaying districts, a 20 foot width is ample to take care of this traffic. He further advised that in this particular case it was planned to place a 22 foot width in the roadway including the car track area, provided the municipality will give a 36 foot width between curbs. Commissioner Kidde inquired as to the policy of Essex County in dealing with its subdivisions and Mr. Stickel advised that the procedure has been to ask at least a 40 foot paved roadway with 30 feet to be paid for by the county. Where car tracks are involved, a 50 foot roadway is required, of which 40 feet is paid for by the county. The State Highway Engineer advised that the State Highway Department was not concerned as to whether the local municipality desired a width greater than the 36 feet and any additional width could be arranged by agreement. Commissioner Stewart inquired as to the maximum width which the State has, up to this time, approved where traffic has so warranted. State Highway Engineer Sloan advised that a roadway of 29 feet in width was approved by the State on Route 1 between Rahway and Elizabeth. Commissioner Kidde suggested that in the event the State should undertake to build a 29 foot roadway, including the car tracks, then the County of Essex should add 10 feet and the municipality the balance, making a 50 foot width possible. Mr. Halsey protested the fact that the State work would be done inclusive of the trolley tracks, and stated that so far as the municipality was concerned, nothing would be gained other than the paving of the trolley tracks of the Public Service Corporation, without giving the municipality any improved roadway. Chairman Scott explained that the purpose of the work of the Commission was to provide a through route for traffic and in no case to make a parking space for vehicles in municipalities, which would be the case if paving was done on each side of the car tracks, leaving the car tracks unimproved. After further discussion, County Engineer Stickel stated that it will be preferable to the municipality and to the County of Essex that no work be done in this location if the State was only to pave 22 feet, inclusive of car tracks, and he would favor the holding up of the improvement until such time as the State Highway Commission feels that the traffic on the roadway warranted a greater width. Commissioner Stewart suggested that the municipality and the county prepare expert traffic counts showing the traffic existing on this roadway and present a proposition to the State Highway Commission, together with all its arguments for a greater width of pavement than 22 feet in order that special merit might be shown to the Commission for departing from its fixed policy in this improvement.

Union County Hearing ✓

The Secretary informed the Commission that a delegation headed by Mr. Force of Springfield Township, in Union County, which adjoins Maplewood Township in Essex County, was present and desired a hearing. On motion duly seconded, a hearing was granted. There appeared Mr. Force and Freeholder Meisel of Union County and citizens of Springfield Township. Mr. Force explained that it was understood that Morris Avenue, Springfield, part of Route 5, was to be improved by the State Highway Commission, and they were desirous of presenting to the Commission a description of the congested conditions existing on Morris Avenue with the double trolley track line and its intersections, in order that the State Highway Commission might be convinced that a greater width of pavement than the ordinary 22 foot width is necessary on Morris Avenue. Freeholder Meisel explained that he was present through the hearing given to Maplewood Township in Essex County and all of the arguments as presented in that hearing were practically those of Morris Avenue in Springfield Township, and the Springfield Township problem was even more alarming than that in Maplewood Township, in view of the built up conditions existing on Morris Avenue. He also questioned the drainage conditions which must be remedied in this particular location. He called the attention of the Commission to the fact that it was now necessary to maintain four to five traffic officers at the Seven Bridge Road corner to take care of traffic congestion at this point, and he advised that the Commission must certainly take some means for widening this thoroughfare when the construction was undertaken, if public life was to be conserved. He stated that he believed that the State Highway Department should widen this roadway from curb to curb, and the municipality would be willing to pay what was considered a just portion of any extra widening, also he felt that the State Highway Commission should not build less than 29 feet in width, inclusive of car tracks. Commissioner Kidde called the attention of the Commission to the fact that State Highway Commission funds were limited, and if 40 foot widths were to be placed instead of 20 foot widths, there could only be one-half the mileage actually improved with the same amount of funds. Commissioner Kidde further suggested that the County of Union give assistance to the municipality in the extra widening of this roadway in the same manner as was suggested to Essex County in Maplewood Township. Mr. Meisel advised that he would be glad to take this up with the Board of Freeholders. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission directed that a detailed report be presented by the State Highway Engineer on the conditions existing in Springfield Township, Union County, and in the meantime Mr. Meisel take up with the County of Union the possibilities of their participation when the improvement is finally put through.

V. J. Loughran-Sick Leave

State Highway Engineer Sloan recommended to the Commission that an extension of leave of absence be granted to Mr. V. J. Loughran, who is suffering from Tuberculosis, it being understood that he is desirous of securing admittance to the Glen Gardner Sanatorium where proper treatments will place him in a position to return to work. On motion by Mr. Stewart, seconded by Mr. Kidde, the State Highway Commission approved of an extension of leave of absence of 60 days with pay to Mr. V. J. Loughran, Bridge Tender and the

Secretary was directed to write to the Superintendent of the Glen Gardner Sanatorium, requesting special consideration for Mr. Loughran in view of the fact that he is a State employee.

Grade Crossing Eliminations

The Secretary presented a communication from the Attorney General advising that it is within the power of the State Highway Commission to continue as heretofore to contract with railroad companies for the elimination of grade crossings. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission directed that the opinion as received be spread in full upon the minutes and filed.

Trenton, N. J., February 12, 1924.

A. Lee Grover, Secretary,
State Highway Commission.
Broad Street Bank Bldg.,
Trenton, New Jersey.

Dear Sir:

I have your letter of the 7th inst. concerning the elimination of grade crossings with relation to the statuatory authority of the Public Utility Commissioners, and the obligations of the railroad thereunder.

The Public Utility Act authorizes the Commission to order the elimination of grade crossings by railroads after following the procedure as provided therein.

Chapter 14 of the Laws of 1917 also authorizes the State Highway Commission to eliminate grade crossings.

In my opinion, these two acts are not inconsistant, and it is not necessary to obtain an order from the State Board of Public Utility Commissioners for the elimination of grade crossings, and that, therefore, it is within the power of the Commission to continue as heretofore to contract with railroad companies for such work.

Very truly yours,

(signed) EDWARD L. KATZENBACH,

Attorney-General.

Special Counsel-Perth Amboy Bridge

The Secretary presented a communication received from the Attorney General, advising that he has designated Mr. William Newcorn as special legal assistant to handle condemnation proceedings now pending in connection with the Perth Amboy Bridge, and requesting that whatever papers are in the possession of the State Highway Department be turned over to Judge Newcorn. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission directed that the communication be acknowledged and that all papers in connection with the condemnation proceedings on the new Amboy Bridge be referred to Mr. Newcorn.

Shore Route Traffic Relief

The Secretary presented a communication received from Governor Silzer transmitting a copy of a letter received by him from Mr. A. W. Morton, recommending an alternate route for shore traffic relief, which matter has been presented to the State Highway Commission in a report of the Special Advisory Board. On motion by Mr. Jelin, seconded by Mr. Stewart, the communication was ordered acknowledged to the Governor, and the Commission directed that the letter from Mr. Morton be referred to the State Highway Engineer.

1924 State Road Maps

The Secretary presented for further consideration of the Commission a communication received from the General Drafting Company of New York, advising that they will furnish to the Commission 100,000 copies of the road map of New Jersey as explained in previous estimates in the sum of three cents per map, or a total of $3,000.00, this price to include the folding of maps and will permit the Commission to place any reading material it desires upon any of the space of the map, without additional expense. This quotation also advised that in the event an additional lot of 100,000 maps is desired, there could be furnished at two and four-tenths cents each. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission authorized the purchase of 1924 road maps at a cost of $3,000.00 with an option of purchasing an additional 100,000 at a later date at a price not to exceed $2,400.00, said maps to be properly folded and to contain thereon any material which the State Highway Commission might desire, and the Secretary was directed to arrange for the necessary purchase through the regular channels of the State.

Salem County-Communication

The Secretary presented a communication from the Salem County Board of Freeholders, enclosing a resolution placing on record the appreciation of the County for the emergency allotment granted by the State for work on the Carll's Corner Road, Salem County. On motion by Mr. Jelin, seconded by Mr. Stewart, the resolution was ordered acknowledged with proper thanks.

Millville Request

The Secretary presented a communication from the City Clerk of Millville in which they advised that a petition had been presented to the City Commission of Millville by the Citizens' Committee for permission to erect a monument directly opposite the Millville Hospital on North High Street, permission being asked for the monument to be placed in the center of the road, which is part of the proposed Route #20. On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission directed that the Citizens' Committee of Millville be informed that inasmuch as the State Highway Commission has not yet taken over Route 20, no action can be taken at this time with reference to their request; the Commission, however, would be very glad to have a sketch showing the proposed location of the monument and probable area to be occupied, for consideration, before any work on the erection of the monument is proceeded with.

Route 7-Improvement

The Secretary presented a communication from Mayor Hetrick of Asbury Park, requesting a copy of plans for the construction of Route 7, between Corlies Avenue and Freehold. On motion by Mr. Stewart, seconded by Mr. Jelin, the State Highway Commission directed that the communication be acknowledged with the advice that the plans for the improvement of Route 7 have not yet been completed but that the Commission will be glad to have Mayor Hetrick call at the office in Trenton and take up with the Construction Engineer any matters concerning this improvement.

Route 5, through Madison and Chatham

The Secretary presented a communication from the Morris County Board of Freeholders, transmitting a letter received by them concerning Route 5, through Madison and Chatham. On motion by Mr. Stewart, seconded by Mr. Kidde, the communication was ordered received and placed on file.

On motion by Mr. Stewart, seconded by Mr. Kidde, the Commission recessed for lunch at 1:00 P.M., to meet again at 2:30 P.M. in regular session. The Commission reconvened at 2:30 P.M. as agreed, with the same members present as at the morning session.

State Highway Conference-Passaic River Bridge.

Commissioner Kidde reported that on Thursday evening, February 14th, a special conference was held by the members of the State Highway Commission, at which time the emergency caused by the breakdown of the Passaic River Bridge was taken up. Recommendations were made by the Engineering Division for preventing serious disaster because of the breakdown of this bridge, and he moved that the action as taken by the State Highway Commission at this conference, in which it was decided that the State Highway Commission could not take the responsibility for continuing the operation of the Passaic River Bridge and issued instructions for its closing in order to prevent disaster, be approved. This was seconded by Mr. Stewart and adopted.

State Highway Engineer Sloan presented to the Commission the proposed contract with the Frederick Snare Corporation for the necessary repairs to the Passaic River Bridge, and he called attention to the fact that arrangements were made for the furnishing of castings within two weeks with complete delivery in four weeks as against two months, originally planned.

Commissioner Kidde moved that an expression of appreciation and thanks be given by the Commission to the Engineering forces which assisted in preventing serious disaster because of the breakdown of the Passaic River Bridge and for the character of the contract as arranged with the Frederick Snare Corporation for the emergency repair of the structure. He reported that he was satisfied that moderate prices for the use of equipment and services had been secured, and he further moved that the State Highway Commission ratify, confirm and approve the contract as entered into with the Frederick Snare Corporation, and the Chairman be authorized to sign the necessary contract on behalf of the State Highway Commission. This was seconded by Mr. Stewart and adopted.

Fender Racks, Passaic River Bridge

State Highway Engineer Sloan called the attention of the Commission to the fact that the fender racks on the Passaic River Bridges are practically in need of replacement, and that due to the closing down of the bridge it would be possible to drive the outside piles much easier than when the bridge was in use. It was estimated that the cost of fender racks would be $65,000.00. On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission authorized competitive bids to be obtained for the furnishing of fender racks on the Passaic River Bridge when plans for the same were completed and approved by the State Highway Engineer.

State Highway Engineer Sloan reported to the Commission that even after the Passaic River Bridge was repaired that the present structures over the Hackensack and Passaic Rivers, on Route 1 Extension, will not be up to the standard of the present day traffic.

Amboy Bridge-Subcontracts ✓

State Highway Engineer Sloan presented a communication from Stillman-Delehanty-Ferris Company, making application for permission to sublet contracts for the construction of Piers 11, 12, 13, 14, 15 and 16 to the Foundation Company ofNew York City, and for award of subcontract for water-proofing and bituminous cement to the New Jersey Roofing Company of Perth Amboy. There was also presented a recommendation from Mr. C. W. Hudson, Supervising Engineer on this work, recommending the approval of subcontractors named. On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission approved of subcontracting for construction on Piers 11, 12, 13, 14, 15 and 16 of the new Amboy Bridge to the Foundation Company of New York City, and also the sub-letting of contract for water-proofing and furnishing of bituminous cement and insulating joints to the New Jersey Roofing Company of Perth Amboy, New Jersey, in accordance with the recommendation of the State Highway Engineer.

Route 16, Section 4 ✓

The Secretary informed the Commission that Senator Case of Somerset County was present with Mr. Peckworth of the PeConCo Engineering & Construction Company on the matter of penalty placed on their contract for the construction of Route 16, Section 4. On motion, duly seconded, a hearing was granted. Senator Case appeared before the Commission and advised of the delays encountered by the PeConCo Engineering & Construction Company in their work on this work on this section. He called attention to the fact that the contractors were held up for a long time due to the work in Somerville, which they themselves had decided to omit until the remainder of the job had been completed. This had caused the work to be held over an entire winter, and had resulted in much delay. In addition to this fact, the delay had resulted in causing an increase in the cost of labor, and materials on the work, and the contractors suffered very much financial difficulties in trying to keep the work moving. He advised that as far as the County of Somerset was concerned, a full extension of time had been given to the contractor, subject to approval by the State, because of the fact that this delay had occurred and also in view of the fact that the contractors had succeeded in finishing the work despite financial difficulties. He informed the Commission that the contractor had estimated his loss on this work at $25,000.00, and further due to the fact that the work was opened to traffic on November 20th last, he asked that the Commission grant an extension of time to the actual completion of the work, and remit any penalties which have been inflicted. State Highway Engineer Sloan informed the Commission that there was no question as to the quality of work performed, but the contractor failed to follow out instructions which were given to him by the Engineering Division, which would have brought the work to a close within the time specified, and in view of this absolute neglect the delay occurred, and it appeared that the contractor was willing to take the penalty rather than to proceed under the arrangements prescribed by the Engineering Division. Mr. Peckworth explained the actual conditions existing on the work, and advised that he was prepared to follow out the recommendations of the Engineering Division and had gone to the expense of $9,000.00 to further equip his stone plant to take care of the work, but he was unable to proceed according to instructions. Commissioner Stewart informed Senator Case that the State Highway Commission fully understood the difficulties involved in contracting work, and it is always very generous in its handling of contractors. However, there was a great deal of confidence in the engineering forces and if it is necessary to enforce discipline by inflicting penalties, this must be done. After the delegation departed, the Commissioners considered the additional facts presented in the case, and Mr. Jelin stated that the situation as brought out concerning the work in Somerville was not clear in his mind at the last meeting, and it appeared that the contractor was entitled to some consideration on this account, and he moved that in view of the additional facts presented at this meeting that one-half the penalty be remitted to the contractor with the recommendation of the State Highway Engineer. This was seconded by Mr. Kidde and adopted.

Middlesex County Road Repair Moneys ✓

The Secretary presented a communication from the Middlesex County Board of Freeholders, requesting that the Commission consider the matter of payment of road repair moneys due Middlesex County. Assistant State Highway Engineer Reed was asked for report as to conditions in Middlesex County, and he advised that a number of roads in the County Schedule ~~was~~ ere placed in proper condition by the county, but there were still a number of roads which would cost in the neighborhood of $15,000.00 to place in proper shape. On motion by Mr. Stewart, seconded by Mr. Kidde, the State Highway Commission directed that the sum of $15,000.00 be withheld from the balance due Middlesex County on the 1923 Motor Vehicle Schedule, and that the remainder of the funds be forwarded to Middlesex County, with a statement from the State Highway Engineer, advising that the other roads should be repaired before the full amount of repair funds is released to the county.

Right of Way-Route 9, Section 13. ✓

On recommendation of the State Highway Engineer, Commissioner Stewart moved the acceptance of easement for drainage rights on Route 9, Section 13, White House to Somerset County Line, known as Parcel #2 from Samuel Daggett for the consideration of $1.00. This was seconded by Mr. Jelin and adopted.

Right of Way-Route 5, Section 12. ✓

On recommendation of the State Highway Engineer, Commissioner Jelin moved the purchase of Parcel #7 on Route 5, Section 12, Netcong-Canal Culvert Section, from Robert J. Pettit for $150.00, this action rescinding a former agreement with Mr. Pettit for the acquisition of Parcel #7-A on Route 5, Section 12, due to change in Line. This was seconded by Mr. Kidde and adopted.

Right of Way-Route 5, Section 12.

On recommendation of the State Highway Engineer, Commissioner Kidde moved the approval of purchase of Parcel #31 on Route 5, Section 12, from Phoebe M. King for the consideration of $700.00, plus construction of a driveway and steps. This was seconded by Mr. Stewart and adopted.

Right of Way-Route 5, Section 11.

On recommendation of the State Highway Engineer, Commissioner Jelin moved the purchase of Parcel #16, on Route 5, Section 11, Delaware-Belvidere Section from S. J. Stackhouse, for the consideration of $750.00. This was seconded by Mr. Kidde and adopted.

Labor Union-Hearing.

Commissioner Jelin introduced to the Commission at this time Mr. Flynn, representing the Labor Unions of Middlesex County. Mr. Flynn informed the Commission that he represented the trades of New Brunswick and vicinity and they were having difficulty in unionizing the work on the Albany Street Bridge at New Brunswick. He advised that all building trades are 100% union in New Brunswick and the Perth Amboy Bridge was being constructed with Union labor, and he requested the cooperation of the State Highway Commission in securing the consent of Michael Staub, contractor on the Albany Street Bridge, to unionize the labor employees on the work. Commissioner Jelin stated that he had proceeded to take the matter up with Mr. Staub and he had expressed his willingness to employ union labor where it was necessary, but up to this time he had failed to do so. Commissioner Kidde advised that while he was personally in favor of Labor Unions, yet he did not believe the State Highway Commission had any authority under its contract with Mr. Staub, to enforce the employment of union labor, and he felt that Mr. Staub himself would probably see the wisdom of hiring union labor, in view of the fact that all trades in New Brunswick are unionized, and it will be difficult to handle his work when skilled technical labor is needed. The Commission advised Mr. Flynn that they would inform Mr. Staub of Mr. Flynn's request.

Ocean County Request

State Highway Engineer Sloan presented the application of Long Beach Township, Ocean County, requesting permission to proceed with the work on 16th Street, 20th Street, 21st Street, 28th Street, Culber Avenue, Sigsbee Avenue, Pennsylvania Avenue, Baltic Avenue, Maryland Avenue, and Stanton Avenue, under the terms of the Township Aid Account, funds to be provided by the Township until funds become available on January 1st, 1925, and he recommended to the Commission that this application be denied in view of the fact that it is illegal for the Commission to approve the allotment of any funds not actually in the hands of the Commission. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission approved the recommendation of the State Highway Engineer and directed that the application of Long Beach Township, Ocean County, be held until the 1925 funds become available.

Monmouth County Surface Treatment.

State Highway Engineer Sloan presented to the Commission for approval, specifications for surface treatment with tars Grade "B" and "UB" for various roads in Monmouth County, and he recommended that same be approved by the Commission. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission approved the recommendation of the State Highway Engineer.

Lignin Binder, Monmouth County

State Highway Engineer Sloan presented to the Commission the specifications for Lignin Binder surface treatment of roads in Monmouth County, for dust laying purposes during the year 1924, and he recommended that the same be approved with a change in sentence on Page 2-A to read "The contractor shall provide material in requisite amount to carry out the intent of this contract" in the place of "The contractor must be prepared to supply the County, if so ordered, with Lignin Binder in the amount of at least 20,000 gallons per day." On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission approved the recommendation of the State Highway Engineer, and authorized approval of Monmouth County specifications for Lignin Binder as amended by the State Highway Engineer.

Crescent Boulevard, Advisory Board

The Secretary presented a communication from Mr. J. C. Remington Jr., requesting a copy of the Advisory Board Report and plans affecting the Crescent Boulevard in the vicinity of Camden. On motion by Mr. Stewart, seconded by Mr. Kidde, the Secretary was directed to inform Mr. Remington that this report is now in the hands of the Printer, and a printed copy will be forwarded him when same is received, but in the meantime Mr. Remington is privileged to call at the office at Trenton and inspect the copy on file at this office.

Employments

State Highway Engineer Sloan presented the list of employments as approved by him since the last meeting of the Commission and recommended ratification of the same. On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission unanimously approved the follwoing employments as made by the State Highway Engineer.

3-1-24	Virgil Markle	Resident Engineer	$240.00 mo.
3-1-24	Harry Houck	Traffic Examiner	100.00 mo.
2-4-24	John Copelli	Motor Tr. Driver	.45 hr.

Carll's Corner Road, Salem County

State Highway Engineer Sloan recommended to the Commission for its approval the award of contract by Salem County for the Carll's Corner Road, 1st Section, to Mr. Charles T. Kavanagh, the lowest bidder. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission approved the award of contract for the Carll's Corner Road, Salem County,by Salem County, as recommended by the State Highway Engineer.

Right of Way-Route 5, Section 11

State Highway Engineer Sloan requested Right of Way Engineer Meeker to explain to the Commission the difficulties involved in connection with the right of way on Route 5, Section 11, Belvidere-Delaware, and he advised that in making a change in line, in order to build the road and obtain sufficient width, it will be necessary to use property which is owned in fee by the P. R. R. but which has been used as a public road for many years past, and in endeavoring to obtain approval from the Railroad Company, to the use of this road as a State Highway, the railroad company will give the road to the State provided the State will be willing to take care of future developments of the railroad system, which would necessitate a cutting off of a part of the width of the roadway by a toe wall. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission directed that the entire matter, together with papers and maps be submitted to the Attorney General's Department for information as to whether the railroad company has the right to take any part of the road in the event they so request.

Hunterdon County-Township Aid

On recommendation of the State Highway Engineer, Commissioner Kidde moved the acceptance and final payment on the Baptistown-Barbertown Road, Kingwood Township, Hunterdon County, Township Aid. This was seconded by Mr. Jelin and adopted.

Salem County-Township Aid

On recommendation of the State Highway Engineer, Commissioner Jelin moved that the request of Lower Penns Neck Township, Salem County, for additional aid on the Harrisonville-Lighthouse-Cemetery Road, be denied at this time with the request that the same be presented at a later date when 1925 funds become available. This was seconded by Mr. Kidde and adopted.

Detour-Route 9, Sections 13 and 14

State Highway Engineer Sloan presented to the Commission a further report on the matter of detour for Route 9, Sections 13 and 14 and advised that it is estimated that the cost of this detour will be $28,840.00, and he recommended that this detour be approved in view of the convenience of traveling public, in not having to pass over the highway while under construction and in the saving in price which will be affected, due to the evicting of traffic while work is going on. On recommendation by Mr. Kidde, seconded by Mr. Jelin, the following official detour for Route 9, Sections 13 and 14, White House to North Branch, was approved:

Beginning in Somerville at the intersection of Routes 9 and 16; thence (1) northerly over Route 16, 7.8 miles to Bedminster; thence (2) westerly 5.7 miles over County Roads via Lamington to New Germantown or Oldwick: thence (3) southerly over County Road 3.2 miles to Route 9 at White House.

Extension of Time-Newton-Stanhope

On recommendation of the State Highway Engineer, Commissioner Kidde moved approval of extension of time to June 1st, 1924, on the

Newton-Stanhope Road, Section 3-A, Sussex County, Motor Vehicle Aid, due to the fact that a change in the road made an additional fill necessary. This was seconded by Mr. Jelin and adopted.

Morris County-Township Aid

On recommendation of the State Highway Engineer, Commissioner Kidde moved approval of plans and specifications for the Dover- Mt. Freedom Road, Section 1, Randolph Township, Morris County, Township Aid. This was seconded by Mr. Jelin and adopted.

Right of Way-Route 15, Section 5

On recommendation of the State Highway Engineer, Commissioner Kidde moved the acceptance of grant for right of way to widen fills over land of John Goodagage on Parcel #2 of Route 15, Section 5, without any consideration being expressed. This was seconded by Mr. Jelin and adopted.

Township Aid Applications

State Highway Engineer Sloan presented to the Commission for its approval the applications for township aid from the balance remaining in the 1924 Township Aid Fund. The total amount of the applications remaining on file are $439,022.38, with a sum available for distribution of only $76,239.49. Assistant State Highway Engineer E.E.Reed, in charge of Township Projects, advised the Commission that recommendations were made in all cases where the work was considered of prime importance as important county road connecting links and where they will furnish extensions of roads already undertaken by some of the townships.

State Highway Engineer Sloan reported that he was prepared to recommend approval of the requests as presented by the Assistant State Highway Engineer, and that all of the counties had signified their willingness to provide adequate maintenance with the exception of one township. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission unanimously approved the recommendations of the State Highway Engineer, and directed the approval of Township Aid applications for the remainder of funds in the 1924 account as follows, the apportionment to Mantua Township, on Gloucester County to be held up until definite information is received that the Township will provide the maintenance as requested under the statute after completion of the work:

Township	Road Name	Length	State's Share $	Township's Share $
BERGEN CO.				
Franklin	Crescent Rd.Sec.1	.75	5,885.00	1,961.67
CAMDEN CO.

Washington	Brass Castle Rd.	2.74	2,206.20	735.40

Assembly Bill #259

Commissioner Jelin informed the Commission that he had been advised that Assembly Bill #259, which provided an Arbitration Board for the settlement of controversy between the State Highway Commission and contractors, had been passed by the House of Assembly, and he moved that a communication be forwarded to the Senate President and to the Chairman of the Senate Highways Committee, requesting that before any action is taken on this Bill by the Senate, that a hearing be granted to the State Highway Commission, in view of the fact that the adoption of this Bill would have effect upon State Highway contracts. This was seconded by Mr. Kidde and adopted.

On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission adjourned at 5:00 P.M. to meet in regular session on Tuesday, February 26th, at 10:30 A.M.

Respectfully submitted,

A. LEE GROVER,

Secretary.

MINUTES OF MEETING-February 26, 1924.

A regular meeting of the State Highway Commission was held at the Commission Room, Broad Street Bank Building, Trenton, New Jersey, on Tuesday, February 26, 1924. The meeting was called to order by Chairman Scott at 10:30 A.M.

Present: General H. L. Scott, Chairman. and
Messrs. Percy H. Stewart, Walter Kidde and Abraham Jelin.

Springfield Avenue, Essex County ✓

The Secretary presented a communication from the Township Committee of Maplewood Township, Essex County, advising that in the event the State Highway Commission will widen Springfield Avenue, when repaved through the Township to a 50 foot width, then the Township will undertake to relay all curbs and gutters and sewer and gas connections to the curb line and the laying of 10 feet of pavement. On motion by Mr. Kidde, seconded by Mr. Stewart, the communication was ordered received and referred to the Construction Division awaiting advice from Essex County as to what share of the work will be borne by the County.

Anticipated Motor Vehicle Receipts ✓

The Secretary presented to the Commission a statement prepared by the Chief Auditor, covering the proposed distribution of Motor Vehicle receipts for the year 1924. On motion by Mr. Kidde, seconded by Mr. Jelin, the statement was ordered received and held for later consideration.

Passaic River Bridge ✓

Commissioner Kidde reported that he had met Mr. Buttenheim of the Frederick Snare Corporation and that efforts were being made by that Corporation to organize so as to speed up the work of repairing the Passaic River Bridge.

Ocean City-request ✓

The Secretary informed the Commission that a delegation from Ocean City was present for the purpose of a hearing before the Commission. On motion duly seconded, a hearing was granted . There appeared Mayor Champion of Ocean City, who was the director of the Board of Freeholders of Ocean County and Mr. Bovinger. Mr. Champion informed the Commission that it was the purpose of the delegation to make request that the road known as the Somers Point-Ocean City Bridge Road be given a hard surface pavement. He explained that this road was purchased by the State from the toll bridge company and was now owned solely by the State although there was a county road on each end of this stretch. Mr. Bovinger also urged the improvement of the roadway as a benefit to Ocean City and through traffic into Cape May, and advised that although the paying of the actual toll was removed there still was paid a great toll in the cost of wear upon the automobiles in traversing this stretch of gravel road. The distance of the roadway includes 5,900 feet, and the bridge itself is one mile long. State Highway Commissioner Kidde informed the delegation that the State Highway Commission was now maintaining this strip of the roadway on a stretch of road which is not a part of the State Highway System. It is in reality a part of the county road system, and is distinctly of advantage to Cape May County, in which it lies. He further stated that although the Commission was responsible for the maintenance of this road, he would not approve of hard surfacing this roadway unless there was some participation in the work by the county authorities. The representatives of Ocean City presented to the Commission resolution from the Chamber of Commerce of Ocean City, from the Kiwanis Club of Ocean City, the Ocean City Real Estate Board, and the Young Mens Progressive League of Ocean City, also the Chamber of Commerce of Somer's Point: all urging the improvement of this road. The estimated cost of the improvement was placed at between $50,000.00 and $60,000.00. Commissioner Jolin expressed the belief that the State Highway Commission would consider favorably sharing one-half of the cost on this work; namely, that if the County of Cape May would undertake to share 50% of the cost of the improvement, then the State Highway Commission would consider paying the remaining 50% and he suggested that the county might cover this improvement by arranging to use the Motor Vehicle receipts given by the State over a period of two years. Mr. Champion, who was also Director of the Board of Freeholders, advised that he would take the matter up with the Board, anf if it is legally possible to contribute to the State one-half the cost of this work, he felt that the Board would consider the matter favorably.

Injury Claim-Request

The Secretary presented a communication from Frank S. McKee, Jr., Attorney for Miss Anna Lawrence, requesting a copy of the opinion of the Attorney General, wherein he advised that the State Highway Commission cannot pay claims for injuries sustained on highways. The Secretary inquired of the Commission whether the opinion of the Attorney General should be forwarded. Commissioner Stewart advised that legal opinions received are generally of a confidential nature, and he would move that Attorney McKee make application to the Attorney General for release of this opinion. This was seconded by Mr. Jelin and adopted.

Ocean County Request

The Secretary presented to the Commission a communication received from Assemblywoman, Mrs. L. W. Thompson, of Ocean County, referring to the State Highway Commission resolutions received from the Boroughs of Seaside Heights, Point Pleasant Beach, and Mantoloking, requesting that the State Highway Commission take over for construction the road from Point Pleasant to Seaside Heights. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission directed that the communication and resolutions be received, properly acknowledged and filed.

Raritan River Bridge, New Brunswick

The Secretary presented an opinion received from the Attorney General, advising that the State Highway Commission may not construct a bridge over the Raritan River, which would interfere with the property of the Women's College at New Brunswick. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission directed that the communication of inquiry, together with the opinion received from the Attorney General, be spread in full upon the minutes and the same be given fullest publicity.

January 9, 1924.

Hon. Thomas F. McCran,
Attorney General,
State House, Trenton, N. J.

Dear Mr. McCran:-

I am directed by the State Highway Commission to respectfully request your advice in connection with the proposed construction of a new bridge over the Raritan River between New Brunswick and Highland Park in order to afford a relief route for the State Highway Routes through New Brunswick.

One of the lines under consideration intersects the property of the New Jersey Women's College. Your advice is respectfully requested as to whether the State Highway Commission can condemn as against an institution of learning, and especially since this institution is a branch of the State Government.

Very truly yours,

A. LEE GROVER,

Secretary.

February 12, 1924.

A. Lee Grover, Secretary,
State Highway Commission,
Broad Street Bank Building,
Trenton, New Jersey.

Dear Sir:-

Your letter to Mr. McCran of January 9th last has been received and considered.

The State Highway Commission desires to be advised as to whether they can condemn land as against the State, which is being used for the erection of a new bridge over the Raritan River between New Brunswick and Highland Park, where one of the lines under consideration intersects the property of the New Jersey Women's College.

It is not to be presumed that the Legislature intended to allow land devoted to one public use to be subjected to another, unless the authority is given in express words or by necessary implication.

It must be clear from the nature of the mischiefs to be reached, or the language used, that the Government was in the contemplation of the Legislature before a court could be authorized to put a construction on a statute which would affect the rights of the State. The Government is not bound unless the statute does expressly or by necessary implication extend to it.

I am, therefore, of the opinion that the State Highway Commission may not construct a bridge over the Raritan River which would interfere with the property of the New Jersey Women's College.

Very truly yours,

EDWARD L. KATZENBACH,

Attorney-General.

Route 7, Section 1, Corlies Avenue

The Secretary presented an opinion from the Attorney General's Department, in which he advised that the shares of the Building and Loan Association stock, such as those referred to in the matter of security for Route 7, Section 1, Corlies Avenue, are not negotiable securities and therefore may not be accepted as security under the requirements of the State Highway Commission as stated. The Secretary explained that in verbal discussion of the matter, the Attorney General's Department had advised that if the Commission did not express a desire for negotiable security, it could be arranged to accept the Building and Loan shares, if properly turned over. Commissioner Stewart advised that he would favor the acceptance of the shares if it would not act as a precedent for the Commission. Commissioner Kidde moved that the Building and Loan shares as offered for security on the construction of Route 7, Section 1, Corlies Avenue, contract of the East Jersey Bridge Company, be accepted in this particular case because of the conditions involved and that the instrument for the acceptance of these shares be drawn by the Attorney General's Office in order to safe-guard the State Highway Commission in every possible way so that the security may be delivered in such a manner as to give the State Highway Commission power to use the proceeds of the same if it should become necessary to do so. This was seconded by Mr. Stewart and adopted.

Route 10, Section 2, Bluff Road.

The Secretary presented an opinion from the Attorney General, advising that in the matter of Route 10, Section 2, Bluff Road property, the State Highway Commission is not authorized to shut off access to the existing road on highways precluding the abutting owners from the use thereof, which they propose, and further advising that in accordance with the deeds, the property cannot be used for other than highway purposes. On motion by Mr. Stewart, seconded by Mr. Jelin, the State Highway Commission directed that the opinion be received and that the action for the disposal of Bluff Road stand as at present, the Commission to sell that land where the offer from the property owner is the same as was paid by the State; otherwise, the property is to remain in possession of the State.

Passaic River Bridge-Complaint

The Secretary presented a communication from the Meadow Taxpayers' Association of Kearny, New Jersey, protesting against the method of transportation used in the conveying of the public over the Passaic River, due to the Lincoln Highway bridge being closed for repairs. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission directed that the matter be referred to the State Highway Engineer for investigation and study as to the improvements which may be made in the transportation methods employed over the Passaic River.

New Perth Amboy Bridge-Route 4 -

The Secretary presented a communication from J. L. Clevenger, Editor of the Perth Amboy Evening News, informing the Commission that Assembly Joint Resolution #3. has been passed by the Legislature, making the new Amboy Bridge a State Memorial for the New Jersey boys who fought in the World War, and asking that the State Highway Commission take up the memorial project with the purpose in view of making the bridge a worthy memorial for New Jersey. The Secretary informed the Commission that since the receipt of the letter from Mr. Clevenger, Governor Silzer has signed the measure, thus making it a law. Commissioner Kidde stated that he believed an Advisory Board should be formed for the purpose of giving the Commission a report on artistic decorations for the new Amboy Bridge in order to make it a War Memorial. Commissioner Jelin stated that he believed that when such an Advisory Board was formed, it should be headed by Chairman Hugh L. Scott of the State Highway Commission, and he offered the following resolution for adoption:

> WHEREAS, by Assembly Joint Resolution #3, which has been adopted by the Legislature of New Jersey, session of 1924, and signed by the Governor, the bridge over the Raritan River, between Perth Amboy and South Amboy, is dedicated as a memorial in commemoration of the services of New Jersey's sons who served in the World War, and provides that the said bridge be called "Victory Bridge", and
>
> WHEREAS, the said Assembly Joint Resolution #3 provides that the State Highway Commission shall cause to be erected on said bridge suitable tablets and ornamentations in accordance with the provisions of the said resolution, and
>
> WHEREAS, the State Highway Commission is in full accord with purpose of the said Assembly Joint Resolution #3, having recognized the possibilities of making this bridge a memorial to the valiant sons of New Jersey who served our country so well in the great World War, many of whom gave their lives in the service of our country.
>
> NOW, THEREFORE, BE IT RESOLVED, that the State Highway Commission does hereby appoint an Advisory Board for the special purpose of making a study of such suitable memorial features. the said Advisory Board to be composed of General Hugh L. Scott, Chairman of the New Jersey State Highway Commission, as Chairman, and such eminent architects and artists as may be invited by the State Highway Commission to serve as members of said Advisory Board, the said Advisory Board to give its services to the State without remuneration other than necessary expenses, in view of the great patriotic nature of this work, and

BE IT FURTHER RESOLVED, that the work of the said Advisory Board shall be submitted to the State Highway Commission for its careful consideration in order that suitable recommendations may be made to the Legislature of New Jersey for the carrying of the provisions of Assembly Joint Resolution #3 into effect.

On motion by Mr. Jelin, seconded by Mr. Stewart, the communication of Mr. Clevenger was ordered received and properly acknowledged, with a copy of the action taken by the State Highway Commission in this matter.

Proposed Belt Line thru Camden

The Secretary presented a resolution from the City Commission of Camden, placing the Board of Commissioners of Camden on record as favoring the proposed Belt Line along the river front and opposing the railroad line proposed adjoining the Camden and Philadelphia Bridge where same runs over the city streets of Camden. On motion by Mr. Jelin, seconded by Mr. Stewart, the resolution was ordered received and placed on file.

Beachwood Property Owners' Ass'n.

The Secretary presented a communication received from the Beachwood Property Owners' Association, advising that the annual dinner of the Association will be held on March 29th in New York City, and inviting a member of the State Highway Commission to be the guest of the Association at that time, and tell something of the highway construction for 1924. On motion by Mr. Jelin, seconded by Mr. Stewart, the communication was ordered received and properly acknowledged with the advice that an effort will be made by one of the members of the Commission to be present on March 29th.

PeConCo Engineering & Construction Co.

The Secretary presented a communication from the PeConCo Engineering & Construction Company, placing themselves on record in writing as to the fact concerning delays in their contract. On motion by Mr. Jelin, seconded by Mr. Stewart, the communication was ordered received and placed on file in view of the fact that the contractors had not been appraised, when this letter was written, of the action taken by the State Highway Commission at its last meeting.

Snow Removal Commendation

The Secretary presented a communication from Col. H. N. Schwarzkopf, head of the State Police, commending the State Highway Department for its work in removing snow from State Highways, together with his reply thereto. On motion by Mr. Jelin, seconded by Mr. Stewart the communication was ordered acknowledged with thanks and filed.

State Highway Route 3-Complaint

The Secretary presented a communication from Mr. Charles E. Hall, protesting the flooding of his property from water on State Highway Route 3. On motion by Mr. Stewart, seconded by Mr. Jelin, the State Highway Commission directed that the matter be referred to the State Highway Engineer for the purpose of investigating and correcting, if possible, drainage conditions on Route 3.

On motion by Mr. Stewart, seconded by Mr. Jelin, the State Highway Commission adjourned for luncheon at 1:00 P.M., to meet in regular session at 2:30 P.M. The Commission reconvened at 2:30 P.M., as agreed, with the same members present as at the morning session.

The Schedule of Business was next taken up for consideration item by item as follows:

Route 5, Section 11-Right of Way

On recommendation of the State Highway Engineer, Commissioner Jelin moved the acceptance of purchase agreement for Parcel #33 on Route 5, Section 11, Delaware-Belvidere Section, from Helen L. Massenat, for the consideration of $1,168.00. This was seconded by Mr. Stewart and adopted.

Right of Way Division

In connection with the matter of rights of way, Mr. Jelin inquired as to whether along with the work of the Right of Way Division, if its volume could not be accelerated, and he moved that the State Highway Engineer consult with the Right of Way Engineer, Mr. Hecker, and develop a definite plan in order that the Right of Way Division may better function. This was seconded by Mr. Kidde and adopted.

Route 5, Section 11-Right of Way

On recommendation of the State Highway Engineer, Commissioner Stewart moved the approval of the purchase of the following parcels of Route 5, Section 11, Delaware-Belvidere Section:

Parcel #9,	Mrs. Mary E. Swartwout	-	consideration	$320.00
" #15,	Louisa R. Kimenour,	-	"	$253.00

This was seconded by Mr. Kidde and adopted.

Route 16, Section 6-A-Easement

On recommendation of the State Highway Engineer, Commissioner Jelin moved the acceptance of easement granted by the Somerset Crystal Springs Farms Corporation on Parcel #13, Route 16, Section 6-A. for the consideration of $100.00. This was seconded by Mr. Stewart and adopted.

Woodbury-Blackwood Road, Section 2

State Highway Engineer Sloan presented plans and specifications for the construction of the Woodbury-Blackwood Road, Section #2, Gloucester County, and advised that the County was desirous of having the Commission reject these in order that it might proceed from its own funds. On motion by Mr. Stewart, seconded by Mr. Jelin, the State Highway Commission directed that plans and specifications for Woodbury-Blackwood Road, Section #2, Gloucester County, be rejected because of lack of funds, this permitting the county to perform the work from its own moneys.

Bridgeton-Port Norris Road

On recommendation of the State Highway Engineer, Commissioner Stewart moved approval of plans and specifications for the Bridgeton-Port Norris Road, Section #1, Cumberland County, Federal Aid Project #60. This was seconded by Mr. Jelin and adopted.

Bergen County-Township Aid

On recommendation of the State Highway Engineer, Commissioner Kidde moved the approval of plans and specifications for Crescent Avenue, Section 1, Franklin Township, Bergen County, Township Aid. This was seconded by Mr. Stewart and adopted.

Federal Aid-Route 4.

State Highway Engineer Sloan presented to the Commission for its approval Projects Statement, making request for Federal Aid Apportionment on State Highway Route 4 from Asbury Park to Toms River. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission approved the statement for Federal Aid on Route 4, Asbury Park to Toms River, and authorized the Chairman to sign the same.

Federal Aid-Route 15

On recommendation of the State Highway Engineer, Commissioner Kidde moved the approval of Project Statement for Federal Aid on

State Highway Route 15 from Bridgeton to Rio Grande, and authorized the Chairman to sign the same. This seconded by Mr. Stewart and adopted.

Employments

On recommendation of the State Highway Engineer, Commissioner Kidde moved the approval of the following employment, as made by the State Highway Engineer since the last meeting of the Commission. This was seconded by Mr. Stewart and adopted.

3-1-24	W. J. Wall	Assistant Civil Engineer	$165.00 month.

Cape May County-Township Aid

On recommendation of the State Highway Engineer, Commissioner Kidde moved the approval of force account agreements as follows on Township Aid work:

Wildwood Junction Road, Middle Twp., Cape May County,
Norbury Landing Road, Middle Twp., Cape May County,
Swainton-Goshen Road, Middle Twp., Cape May County,
Shell Bed Landing Road, Middle Twp., Cape May County,
Cape May Court House-Dias Creek Road, Middle Twp., Cape May Co.

This was seconded by Mr. Jelin and adopted.

Extension of Time-Burlington County

On recommendation of the State Highway Engineer, Commissioner Kidde moved the approval of extension of time for the completion of the Crosswicks-Chesterfield Road, Section 1, in Chesterfield Township, Burlington County to May 1st, 1924. This was seconded by Mr. Stewart and adopted.

Camden County-Township Aid

On recommendation of the State Highway Engineer, Commissioner Jelin moved the acceptance and final payment on Raritan Avenue, Sections 1 and 2, Waterford Township, Camden County, Township Force Account work. This was seconded by Mr. Stewart and adopted.

Unexpended Balances-Gloucester County

On recommendation of the State Highway Engineer, Commissioner Jelin moved the approval of transfer of unexpended balance amounting to $1,643.19, from the Pitman-Richwood-Mullica Hill Road, Section 1, to Section 2 of the same road in Harrison Township in Gloucester County. This was seconded by Mr. Stewart and adopted.

Right of Way-Route 5, Section 11.

State Highway Engineer Sloan recommended to the Commission that an offer of $879.00 be made to Mr. William J. Burd to Parcel #6-A on Route 5, Section 11, and in the event of failure to accept the offer, that the land be acquired by condemnation. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission approved the recommendation of the State Highway Engineer, and authorized an offer of $879.00 to be made to Mr. William J. Burd for Parcel #6-A on State Highway Route 5, Section 11, and in the event of failure to accept that condemnation proceedings be entered into in accordance with the following resolution:

> RESOLVED, that this Commission hereby determines to acquire in the name of the State of New Jersey, for public use in the construction of State Highway Route 5, Section 11, ALL that certain Lot, tract, or parcel of land and premises, situate, lying and being in the State of New Jersey, and more particularly described as follows:

Parcel #6-A

BEGINNING at a point in the division line between land of grantor on the northwest, and land of Edwin M. Allen on the southeast, said point being opposite Station 80 plus 36.67 of center line of pavement of State Highway Route 5, Section 11, and forty-nine and twenty-two hundredths (49.22) feet southwesterly at right angles therefrom, as shown on plan entitled "New Jersey State Highway Department, Route 5, Section 11, Property to be acquired from Dr. W. J. Burd, Township of Knowlton, County of Warren, Scale 1"= 50', March 6, 1924", thence;

(1) North thirty-four degrees, forty-six minutes, thirty-five seconds west (N34°46'35"W) through land of grantor one hundred sixty and ninety-one one hundredths (160.91) feet to a point opposite Station 68 plus 76.13 of said center line, and distant sixty (60) feet therefrom at right angles, thence; (2) north thirty degrees, nine minutes, ten seconds west (N30°09'10"W) still through land of grantor, one hundred fifty-seven and seventy-seven one hundredths (157.77) feet to a corner, distant radially sixty (60) feet from Station 67 plus 20, of said center line, thence: (3) south eighty-five degrees, nineteen minutes, fifty seconds west (S85°19'50"W) through land of grantor, sixty-five and ninety-seven one-hundredths (65.97) feet, to a corner distant radially one hundred twenty (120) feet from Station 66 plus 93, of said center line, thence; (4) north twenty-eight degrees, fifty-seven minutes west (N28°57'W) through land of grantor, thirty-one and eight-tenths (31.8) feet, to a corner, distant radially one hundred twenty (120) feet from Station 66 plus 61.85, of said center line, thence; (5) north fifty-six degrees, fifty-two minutes, seventeen seconds east (N56°52'17"E) through land of grantor, eighty-seven and twenty-five one-hundredths (87.25) feet, to a point on proposed southwesterly right of way line of said State Highway Route, distant thirty-three (33) feet southwesterly at right angles from Station 66 plus 55.3 of said center line, thence: (6) north twenty-eight degrees, forty-three minutes, thirty seconds west (N28°43'30"W) through land of grantor parallel to the thirty-three (33) feet distant southwesterly at right angles from said center line, one thousand, one hundred seventy-three and sicty-seven one hundredths (1,173.67) feet, to a point of curve at Station 54 plus 81.63, thence; (7) still northwesterly through land of grantor by a curve to the left, having a radius of six thousand, eight hundred forty-two and fifty-five hundredths (6.842.55) feet, parallel to and thirty-three (33) feet distant radially in a southwesterly direction from said center line, four hundred fifty-five and forty-seven one hundredths (455.47) feet, to a point in the division line between land of grantor, and land of Mary E. Swartwout, the chord of this course being four hundred fifty-five and thirty-nine hundredths (455.39) feet, and bearing north thirty degrees, thirty-eight minutes west (N30°39'00"W) thence: (8) north sixty-one degrees, twenty-eight

minutes, thirty seconds east (N61°28'30"E) along said division line between land of grantor and land of Swartwout, sixty-six and seventeen hundredths (66.17) feet, to a point in the southwesterly right of way line of the Delaware, Lackawanna, and Western Railroad Company at Station 50 plus 26.55, thence: (9) south twenty-eight degrees, forty-three minutes, thirty seconds east (S28°43'30"E) along the said southwesterly right of way line of the railroad company, one thousand four hundred fifty-two and five hundredths (1,452.05) feet, to a monument (rail set on end) of the railroad company, at Station 64 plus 78.60. The last nine hundred ninety-six and ninety-seven hundredths (996.97) feet of this course being parallel to and eighteen (18) feet distant northeasterly at right angles from said center line of pavement of State Highway Route 5, thence: (10) north sixty-one degrees, sixteen minutes, thirty seconds east (N61°16'30"E) along land of said railroad company, twenty (20) feet to a corner, thence: (11) south twenty-eight degrees, forty-three minutes, thirty seconds east (S28° 43'30"E) along the southwesterly right of way line of said company, five hundred sixty-four and sixty-six one hundredths (564.66) feet, to a point in the aforesaid division line between land of grantor and land of Edwin M. Allen. The first one hundred seventy-six and seven tenths (176.7) feet of this course being parallel to and thirty-eight (38) feet distant northeasterly at right angles from said center line of pavement, thence: (12) south sixty-four degrees, fifty-four minutes west (S64°54'W) along said division line between land of grantor and land of Allen, seventy-six and eighty-seven hundredths (76.87) feet, to the point of beginning.

Containing two and nine hundred fifteen thousandths (2.915) Acres.

It being the intention of the grantor to convey to the State of New Jersey all that portion of his land which lies between land of the Delaware, Lackawanna and Western Railroad Company on the northeast, a line parallel to and thirty-three (33) feet distant southwesterly at right angles from proposed center line of pavement of State Highway Route 5, Section 11, and extending from land of Edwin M. Allen on the southeast to land of Mary E. Swartwout on the northwest, together with an additional parcel, as shown on plan, at the southwesterly end, lying adjacent to, but southwesterly of the line thirty-three (33) feet from center line of same, to provide for construction and maintenance of new channel for brook, between Stations 66 plus 55.3 and 70 plus 36.67.

State Highway Engineer Sloan is hereby authorized and directed on behalf of this Commission, to make an offer of $379.00 to the owner or owners of said lands and premises for the conveyance of the same to the State of New Jersey free and clear of all encumbrances, and, upon the failure of such owner or owners to accept such offer, or if for any other reason said lands and premises cannot be immediately acquired by agreement with such owner or owners, then the Attorney-General of the State of New Jersey is hereby authorized and directed to institute condemnation proceedings for the acquisition of the said lands and premises.

This was seconded by Mr. Stewart and adopted.

Proposed Change in Line-
Route 5, Section 11.

Commissioner Kidde reported to the Commission that he had made a study of the proposed change in line for Route 5, Section 11, Delaware-Belvidere Section, where it approaches the Town of Delaware, and he would move the adoption of a change of line as recommended by the Engineering Division, which would follow the present roadway on right of way of the railroad company in accordance with sketch submitted. This was seconded by Mr. Jelin and adopted.

On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission adjourned its meeting at 4:00 P.M. to meet in regular session again on Tuesday, March 4th, 1924.

Respectfully submitted,

A.LEE GROVER,

Secretary.

MINUTES OF MEETING-March 4, 1924.

A regular meeting of the State Highway Commission was held in the Commission Meeting Room, Broad Street Bank Building, Trenton, on Tuesday, March 4th, 1924. The meeting was called to order by Chairman Scott at 11:00 A.M.

Present: General H. L. Scott, Chairman, and Messrs.
Percy Stewart, Walter Kidde and Abraham Jelin.

Cumberland County-Hearing

The Secretary informed the Commission that a delegation headed by Senator Reeves of Cumberland County was present for a hearing with the Commission. On motion, duly seconded, a hearing was granted. Senator Reeves appeared, together with Mayor McCray of Cape May City, and Col. Charles Gandy of Cape May, New Jersey. He advised that Senator Bright, also of Cape May County, expected to appear with the delegation to urge the attention of the State Highway Commission to the early completion of a route from Westville to Millville, by way of Malaga and Vineland. He introduced Mayor McCray, who also urged this improvement on the basis that it will open up a section of southern New Jersey, a great part of which has no access to Camden and to the southern shore resorts. He also called attention to the fact that this line will relieve the traffic over the White Horse Pike which is headed for the coast resorts below Atlantic City. The State Highway Commission assured the delegation that the State Highway Commission is heartily in accord with the route urged by the representation, and were it not for the difficulties of financing projects other than those included in the original $40,000,000.00 bond act, the work on this route would be undertaken. Senator Reeves pointed out to the Commission that with the improvement of only 14 miles of highway, the extension of this route would give an entirely new relief route to Atlantic City and then with the addition of 11 miles from Malage to Millville the route would be extended so that it would open up the resorts in Cape May County. Senator Reeves expressed his confidence in the fact that the Highway Commission was trying to find the funds to give the necessary relief demanded by this action. Col. Gandy addressed the Commission, urging the improvement of this road as being more important than any local project in Cape May or Cumberland County.

Main Avenue, Clifton

State Highway Engineer Sloan brought before the Commission the application of Passaic County for reimbursement on account of work completed on Main Ave., Clifton, in which request there was an item for inspection in the amount of $1,825.51, on which State Highway Engineer Sloan desired authority for payment. Secretary Grover explained to the Commission that under the law it is entirely legal for the State Highway Commission to pay inspection charges on reimbursement work. Commissioner Kidde, therefore, moved that the reimbursement due to Passaic County on account of Main Ave., Clifton, be paid, inclusive of an item for inspection in the amount of $1,825.51. This was seconded by Mr. Stewart and adopted.

Ocean County-Township Aid

The Secretary presented a communication from Senator Thomas A. Mathis of Ocean County, New Jersey, calling attention to the application of Long Beach Township, Ocean County, for aid in improving its township roads, and urging consideration of the Commission to permit the Township to proceed with the work with the assurance that the State will reimburse the Township from funds to become available after January 1, 1925. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission directed that the matter be presented to the Attorney General for his opinion as to whether the State Highway Commission is permitted to allow townships to proceed with the financing and improvement of township roads with the understanding that State Aid will be granted when the same become available, and the Secretary was directed to advise Mr. Mathis of the action taken.

Reckless Place, Red Bank, Monmouth Co.

The Secretary presented a communication from Mr. Warren H. Smock of Red Bank, New Jersey, urging the improvement of Reckless Place, Red Bank, for which the County had made a request sometime ago. The total cost of the improvement was estimated to be $13,500.00. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission approved the award of State Aid from the Motor Vehicle Reserve Account to the extent of 40% of the cost of the improvement of

Reckless Place, not to exceed the sum of $5,500.00.

Victory Bridge-Advisory Board

The Secretary presented a communication from Miss Katherine Linehan of New York City, and with a residence in Orange, New Jersey, making application for the Commission of embellishing the Perth Amboy Memorial Bridge. On motion by Mr. Stewart, seconded by Mr. Kidde, the State Highway Commission directed that this communication be acknowledged and referred to the newly appointed Memorial Bridge Committee, of which General Scott is Chairman. In connection with the consideration of the foregoing item, State Highway Engineer Sloan presented to the Commission a list of names which he would recommend to compose the Advisory Board on the study of memorial features which might be embodied in the Perth Amboy Bridge, now designated by the Legislature as "Victory Bridge." The names presented were

William Otis Post, of the firm of George B. Post & Sons,
James Bettelle, of the firm of Gilbert & Bettelle,
Shirley Morgan, of the Princeton University Department of Architecture,
Alan B. Mills, Director of the Department of Architecture of the State of New Jersey,
B. F. Davis, Designer of the Wilmington Memorial Bridge,
John Rowland, Architect, Jersey City,
C. W. Hudson, Consulting Engineer on the Perth Amboy Bridge.

Commissioner Kidde suggested that the name of Joseph VanVleck of Montclair, be added to this list, together with that of the State Highway Engineer. Commissioner Jelin suggested that J. L. Clevenger of Perth Amboy, be named as Secretary to this Advisory Board. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission approved the appointment of the following Advisory Board for the study of memorial features on the Amboy Bridge in accordance with the resolution adopted at the last meeting of the Commission, all of these men to serve without compensation and to receive their necessary expenses:

Gen. H. L. Scott, Chairman
J. L. Clevenger, Secretary

William Otis Post
Shirley Morgan
B. F. Davis
Joseph VanVleck

James Bettelle
Alen Mills
John Rowland
C. W. Hudson

Major W. G. Sloan.

Right of Way-Perth Amboy Bridge

The State Highway Engineer informed the Commission that in company with special Counsel William Newcorn he had held an interview with the National Fire Proofing Company at the office of McCarter & English, Newark, and an agreement had been reached whereby the National Fire Proofing Company would proceed at once with the construction of kilns which are to be torn down on the line of the work, the State agreeing to give 60 days time for this work, with extension if justified, and in consideration of this, the National Fire Proofing Company has agreed not to include any charge for damages due to loss of business on account of the moving. The members of the Commission congratulated the State Highway Engineer and special Counsel Newcorn, and expressed its appreciation for the arrangements made.

V. J. Loughran-Leave of Absence

The Secretary presented a communication from Dr. S. B. English, Superintendent of the New Jersey Sanatorium at Glen Gardner, advising that he had communicated with the Rainbow Sanatorium where Mr. V. J. Loughran was a patient and had been advised that Mr. Loughran must have infirmary or bed care and for this reason could not be moved to Glen Gardner, where only ambulant patients are taken care of, and he suggested that application be made for Mr. Loughran to be transferred to the Hudson County Tuberculosis Sanatorium where proper care would be given him. Commissioner Jelin requested that the communication in the matter be referred to him in order that he might take the matter up with Jersey City residents for the purpose of complying with the suggestions offered by Dr. English. On motion by Mr. Kidde, seconded by Mr. Stewart, the communication was referred to Commissioner Jelin for disposition.

Middlesex County-Request for Hearing

The Secretary presented a communication from Thomas J. Mulvihill, Clerk of the Board of Freeholders of Middlesex County, requesting opportunity for the Board to be heard before the Commission on Tuesday March 11, 1924. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission granted a hearing to Middlesex County as requested.

Toms River-Lakewood, Route 4.

The Secretary presented a communication from the New Jersey Courier, requesting information as to the time when the State Highway Commission will take up for improvement the Toms River-Lakewood

Section of Route 4 in Ocean County, and also what disposition is being made of the alignment through Toms River at the location of the Bank property. State Highway Engineer Sloan informed the Commission that the Toms River-Lakewood Road was in the 1924 construction program as prepared and that the alignment at the Bank property was still undecided and plans were being developed for study by the Commission. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission directed that a public hearing be arranged for at Toms River in order that the State Highway Commission might arrive at a definite conclusion as to the alignment through the Town and further that a communication be forwarded to the New Jersey Courier with the advice that the State Highway Commission has been studying the problems at Toms River for over a year and personally visited Ocean County when it first came into office, and it is hoping that plans will be developed in a short time which will bring the matter to a final decision and in any case a public hearing will be arranged for at Toms River before any final decision is reached.

Traffic Enumerator Maphet

The Secretary presented communications from Senator Hamilton Kean and Mrs. Charles Maphet, urging the consideration for continuing in employment Mr. Maphet who is a temporary Traffic Enumerator in the State Highway Department. but who failed to qualify sufficiently high on the Civil Service eligible list to permit of his permanent appointment. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission directed that the communications be acknowledged and that Senator Kean be advised that the situation hasbeen looked into and the conditions of the case are such that the State Highway Commission finds it necessary to lay off Mr. Maphet and appoint a veteran at the head of the list, and also to call attention to the fact that Mr. Maphet has already been employed in a temporary capacity for six months, and in the event that an opportunity occurs for placing Mr. Maphet in a position, the State Highway Commission will bear him in mind.

The Schedule of Business was next taken up for consideration item by item as follows:

Amboy Bridge-Route 4

State Highway Engineer Sloan presented a report in connection with the construction of the new Amboy Bridge relative to giving access to the property of the W. J. Donnell Company during the time of the construction, and he recommended that a temporary opening be constructed through the embankment forming the approach to the bridge and that a temporary wooden bulkhead be constructed in order to permit the work of the construction of the embankment to proceed pending the removal of kilns which are at the property of the National Fire Proofing Company. State Highway Engineer Sloan informed the Commission that this work will relieve the State Highway Commission of damage on account of the delay to the contractor, and also on account of the shutting down of kilns of the National Fire Proofing Company and is also due to the fact that the Donnell Lumber Company must be given a road between its property. Mr. Stewart moved that the recommendation of the State Highway Engineer be approved and that the Chairman be authorized to sign the necessary supplemental agreements with the contractor for the construction of the necessary bulkhead and openings. This was seconded by Mr. Kidde and adopted.

Route 15, Section 4, Millville

State Highway Engineer Sloan presented a form of agreement between the Cumberland County Traction Company and the State of New Jersey on the matter of relocation, reconstruction and paving of the trolley tracks in the City of Millville on Route 15, Section 5, by which agreement the matter of the obligations for the paving is left open for court decision and the State Highway Commission is given the right to move the trolley tracks to the center of the road. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission authorized the Chairman to sign the agreement as prepared for work in the City of Millville on behalf of the State Highway Commission.

Crosswicks Creek Bridge-Route 2

State Highway Engineer Sloan presented to the Commission a report on the sale of the Crosswicks Creek Bridge on Route 2, and he recommended that the span as removed from the Crosswicks Creek Bridge on Route 2, be sold to the Counties of Burlington and Mercer at a price of two cents per pound. He explained that the bridge would be taken and placed over an inter-county stream by the Boards of Freeholders of the counties. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission approved the sale of a 75 foot truss span as removed from the Crosswicks Creek Bridge on Route 2, to the Counties of Burlington and Mercer at a price of two cents per pound, estimated to yield the sum of $600.00.

Route 3-Complaint

State Highway Engineer Sloan presented a communication received from Senator Woodruff of Camden County, bringing before the Commission the request of the Borough of Laurel Springs for the correcting of drainage conditions on South Avenue at the White Horse Pike, it being claimed that there is a washdown of gravel on Route 3 at Linden Avenue, which condition can only be corrected by the construction of a curb and gutter on the east side of Linden Avenue to the sewer intake. The State Highway Engineer presented a report on the matter as made by Division Engineer Williams in which he advised that the placing of curbs and gutters in this particular location is entirely a local matter. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission directed that Senator Woodruff be advised that it is the report of the Engineering Division that the correction of drainage conditions in this location is entirely a local improvement and will be for the benefit of the municipality affected.

Right of Way-Route 4

On recommendation of the State Highway Engineer, Commissioner Jelin moved that Parcel #11, Route 4, be acquired from John W. Greenwood for the sum of $35.00 on condition that Mr. Greenwood will sign and deliver a deed for that amount without delay, this action rescinding action taken by the Commission on July 31, 1923, authorizing this purchase for the sum of $1.00. This was seconded by Mr. Stewart and adopted.

Right of Way-Route 1, New Brunswick

State Highway Engineer Sloan presented to the Commission a communication received from the United States Rubber Company, advising that after conference with Commissioner Jelin on the 2[illegible]th ult.

they were willing to accept the sum of $9,085.78 for their properth in New Brunswick needed for the widening of the Albany Street Bridge. On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission authorized the purchase of property needed for the widening of Route 1 at the Albany Street Bridge, from the United States Rubber Company for the sum of $9,085.78 plus the replacing of as much of the existing bulkhead as is necessary to be replaced on account of the widening of the Bridge. Commissioner Kidde called attention to the fact that Mr. Jelin had succeeded in securing a reduction of $2,000.00 over the original price asked for this property.

Right of Way-Route 5, Section 11

On recommendation of the State Highway Engineer, Commissioner Kidde moved the approval of the purchase of Parcel #17 on Route 5, Section 11, Delaware-Belvidere Section, from Joseph A. Jones for the sum of $50.00 and Parcel #18 on the same line for $150.00. This was seconded by Mr. Jelin and adopted.

Right of Way-Route 4

State Highway Engineer Sloan recommended to the Commission the approval of purchase agreement for Parcel #12, Route 4, at the New Amboy Bridge approach, from Richard Rue and Wife for the consideration of $1.00 plus the transfer of a triangular parcel of land which the State is obtaining from Henry Wolf by agreement already approved by the Commission. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission approved the purchase of property from Richard Rue and Wife as recommended by the State Highway Engineer, subject to the retention by the State of all riparian rights in this property during the construction of the bridge.

Employments

On recommendation of the State Highway Engineer, Commissioner Stewart moved the approval of employments as made by the State Highway Engineer since the last meeting of the Commission:

3-3-24	Seymour E. Weil	Cost Clerk	$ 90.00 mo.
3-5-24	Arthur Taylor	Traffic Enumerator	100.00 "
3-1-24	T. J. Reardon	" "	100.00 "
3-1-24	Arthur Rymond	Mechanic(increase)	.60 to .65 hr.
3-1-24	Richard Raab	" "	.60 to .65 "
3-1-24	Edw. O'Brien	Gar. Ass't. "	.45 to .50 "
1-16-24	R.C.McKenny	Title Searcher	$140 to 150 mo. (change to entrance rate)

This was seconded by Mr. Jelin and adopted.

Extension of Time-Essex County

On recommendation of the State Highway Engineer, Commissioner Kidde moved the approval of extension of time of 20 working days on Valley Street, Maplewood Township, Essex County, Township Aid. This was seconded by Mr. Stewart and adopted.

Extension of Time-Hunterdon County

On recommendation of the State Highway Engineer, Commissioner Kidde moved the approval of extension of time to November 1, 1923, on the Pittstown-Quakertown Road, Franklin Township, Hunterdon County, Township Aid. This was seconded by Mr. Jelin and adopted.

Camden County-Township Aid

On recommendation of the State Highway Engineer, Commissioner Kidde moved the acceptance and final payment on the New Freedom Road, Clementon Township, Camden County, Township Aid. This was seconded by Mr. Jelin and adopted.

Hunterdon County-Township Aid

On recommendation of the State Highway Engineer, Commissioner Kidde moved the acceptance and final payment on Old Brunswick Pike, West Amwell Township, Hunterdon County, Township Aid. This was seconded by Mr. Stewart and adopted.

Essex County-Township Aid

State Highway Engineer Sloan presented for acceptance by the Commission, the completed work on Valley Street, Maplewood Township, Essex County, the total cost of which was $119,219.28. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission directed that this matter be referred to Commissioner Kidde for final inspection before acceptance by the Commission.

Cumberland County-Township Aid

On recommendation of the State Highway Engineer, Commissioner Jelin moved the acceptance and final payment of the Cumberland and Port Elizabeth Road, Maurice River Township, Cumberland County, Township Aid. This was seconded by Mr. Stewart and adopted.

Ocean County-Township Aid

On recommendation of the State Highway Engineer, Commissioner Jelin moved the approval of application and agreement for Township

Aid on the Laurelton-Allen Osborne Bridge Road in Brick Township, Ocean County, Township Aid. This was seconded by Mr. Kidde and adopted.

Township Aid Funds Transferred

On recommendation of the State Highway Engineer, Commissioner Jelin moved the approval of the action of Lakewood-Township Committee in releasing $4,000.00 from the Township Aid funds to the credit of Lakewood Township in Ocean County, for the use of Brick Township in Ocean County on the Laurelton-Allen Osborne Bridge Road. This was seconded by Mr. Stewart and adopted.

Hunterdon County Repairs- 1924

On recommendation of theState Highway Engineer, Commissioner Kidde moved the approval of maintenance specifications for repair and maintenance work in Hunterdon County during 1924 for bituminous materials, slag, gravel and broken stone. This was seconded by Mr. Stewart and adopted.

State Highway Maintenance Materials

Commissioner Kidde took occasion at this time to make inquiry as to the progress being made with specifications covering the materials needed for State Highway maintenance and was advised that the Maintenance Division is working upon these specifications and is only awaiting the definite conclusions as to the construction program to be adopted by the Commission.

Township Aid Force Account Agreements

On recommendation of the State Highway Engineer, Commissioner Stewart moved the approval of the following Township Aid Force Account agreements:

Turkey Point Road, Downe Township, Cumberland County,
Great Creek Road, Section 2, Galloway Twp., Atlantic County,
Pamona Road, Galloway Township, Atlantic County.

This was seconded by Mr. Jelin and adopted.

Atlantic County Aid Balance Cancellation

On recommendation of the State Highway Engineer, Commissioner Kidde moved the approval of cancellation of balance of $0.48 remaining to the credit of the Moss Mill Road, Galloway Township, Atlantic County. This was seconded by Mr. Stewart and adopted.

Long Valley-Fairmount Road

State Highway Engineer Sloan presented to the Commission the resolution of Washington Township, Morris County, requesting the transfer of funds set aside for the Schooley's Mountain-Drakestown Road and the Valley Brook Road, for the construction of Fairmount-Long Valley Road, Section 2, and further requesting that the sum of $6,000.00 which was withheld by the former State Highway Commission on account of the work on the Long Valley-Fairmount Road, Section 1, be paid to the Township. Commissioner Jelin informed the Commission that he had held a conference with the Washington Township authorities and had suggested to them this course of action, since he believed that it would be to the advantage of the State and Township to have one road completed for its entire distance rather than permitting short sections of entirely different roads to be undertaken. Assistant State Highway Engineer Reed presented a report advising that it will cost in the neighborhood of $1,100.00 to place Section 1 of the Fairmount-Long Valley Road in condition satisfactory to the State Highway Department. Commissioner Jelin, therefore, moved that permission be granted to Washington Township for the transfer of Township Aid funds set aside on Schooley's Mountain-Drakestown Road and Valley Brook Road to the construction of the Fairmount-Long Valley Road, Section 2, and further that Washington Township be advised that if it will place Section 1 of this road in proper repair at a cost of approximately $1,100.00, the State Highway Commission will be favorable to granting the $6,000.00 requested by the Township from the funds to become available after July 1, 1924. This was seconded by Mr. Kidde and adopted.

Crown Point Road, Gloucester County

On recommendation of the State Highway Engineer, Commissioner Kidde moved approval of specifications for Crown Point Road, Section #6, Gloucester County work to be done with Motor Vehicle funds. This was seconded by Mr. Stewart and adopted.

Mercer County Repairs- 1924

On recommendation of the State Highway Engineer, Commissioner Kidde moved the approval of specifications for maintenance materials to be used in the maintenance of roads in Mercer County in 1924.

This was seconded by Mr. Stewart and adopted.

Mercer County-Township Aid

On recommendation of the State Highway Engineer, Commissioner Stewart moved the approval of plans and specifications for the Cedar Grove Road, Princeton Township, Mercer County, Township Aid. This was seconded by Mr. Jelin and adopted.

Warren County Repairs- 1924

On recommendation of the State Highway Engineer, Commissioner Kidde moved the approval of specifications for materials to be used on maintenance repair work on Warren County roads during 1924. This was seconded by Mr. Stewart and adopted.

Middlesex County-Township Aid

On recommendation of the State Highway Engineer, Commissioner Kidde moved the approval of plans and specifications for the Union Valley-Gravel Hill Road, Monroe Township, Middlesex County, Township Aid. This was seconded by Mr. Stewart and adopted.

Somerset County-Township Aid

On recommendation of the State Highway Engineer, Commissioner Kidde moved the approval of plans and specifications for the Bolmer Corner-Blawenbury Road, Montgomery Township, Somerset County, Township Aid. This was seconded by Mr. Stewart and adopted.

Passaic County-Mountain View Hearing

The Secretary informed the Commission that a delegation from Mountain View, New Jersey, was present with Assemblyman Hershfield of Passaic County, on the matter of grade crossing elimination. On motion, duly seconded, a hearing was granted.

Mr. Hershfield appeared before the Commission and advised that the delegation of his constituents from Mountain View were desirous of obtaining information as to the work contemplated by the State Highway Commission. He advised that at the instance of the State Highway Department he had introduced a Bill which would permit the State Highway Commission to acquire necessary property from the Morris Canal Commission on which it was proposed to erect piers for a viaduct over the D. L. & W. Railroad. This Bill was passed by the Assembly and upon notice to him from Mountain View was recalled from the Senate, and was now in his own possession awaiting a common understanding between the residents of Mountain View and the State Highway Commission. He introduced Judge Randall of Paterson as representing the Chamber of Commerce of Mountain View. Judge Randall informed the Commission that the business interests of Mountain View were of the opinion that their business street would be wiped out if a viaduct was constructed on the main street and they would suggest, if possible that an undergrade crossing be made. State Highway Engineer Sloan explained for the delegation and Commission the conditions existing at this location and advised that it was not proposed to place the viaduct on the main street, but rather to have it run back of the buildings, thus leaving the roadway in the business district in its present location. He called attention to the fact that in order to produce an underground crossing, it would cause a tunnel to be constructed which would bring the grade of the road below the line of the business houses and would cause a drainage condition which would flood this particular district in time of storm. Commissioner Kidde informed the Commission that he had personally gone upon the ground when he first became a member of the Commission and he had made a study with the end in view of making improvement upon the line of the Department, if possible, and he had discovered that the plans of the State Highway Department for this crossing elimination were the best that could be secured without an expense beyond the economical benefits involved.

Mr. Carl [illegible]. Forsberg, Engineer for Mountain View explained to the Commission a plan prepared by himself when this project was first spoken of, in which he presented a very comprehensive idea for an underground crossing at this point, together with two other locations if the railroad company would be willing to raise its tracks. Commissioner Kidde informed Mr. Forsberg that his plan was a very good one, but the State Highway Commission could not be involved in any proposition where the same was not a part of the State Highway System and furthermore he did not believe that the railroad company could be induced to expend the funds needed to change the grade of the tracks.

Mr. A. H. Henkle, Assistant Division Engineer of the D. L. & W. Railroad, was present and explained that the proposition as outlined by the State Highway Commission was agreeable to the railroad company and would be shared in to the extent of $124,000.00 of money from the D. L. & W. R. R. Company. Commissioner Jelin called the attention of the residents of Mountain View to the fact that in practically every district where the highways were planned for the main streets, the residents were asking that the Commission keep the traffic outside of the municipality, and he was sure that the business people of Mountain View would be unwilling to have a viaduct directly in front of their property and for this reason the Engineering Division had laid out this viaduct in the rear of the main street. After further discussion, Mr. Hoffman of the Township Committee, informed the Commission that as for himself he was satisfied with the plan laid out by the State Highway Engineers.

Mr. Frank Fay of Mountain View also advised that he was satisfied with the explanation offered by the State Highway Commission.

Assemblyman Hershfield then requested that he be given instructions as to the Assembly Bill in his possession, giving the State Highway Commission the right to proceed upon the plans as originally projected. It was practically the unanimous consent of the delegation present that the Bill be sent through the Legislature at once for passage and adoption and Mr. Hershfield advised that this would be done.

On motion by Mr. Jelin, seconded by Mr. Kidde, the Commission recessed for luncheon at 2:00 P.M. to meet in regular session again at 3:00 P.M. The Commission reconvened at 3:00 P.M. as agreed, with the same members present as at the morning session.

Middlesex County-Hearing

The Secretary informed the Commission that a hearing had been requested by Mr. Housman of Madison Township, Middlesex County, on the matter of the road in Madison Township, between Old Bridge and Englishtown. On motion, duly seconded, a hearing was granted. Mr. Housman appeared, together with Mr. Dill of the Township Committee, and Mr. Fallacc, and explained that they desired to present to the Commission the advantages of the line between Old Bridge and Englishtown as a short route to the Shore from New Brunswick, and he understood that this was not included in the $40,000,000.00 Bond Act.

He asked the good officers of the Commission to urge some repairs to this road by the Freeholders of Middlesex County. He explained that this line would furnish a valuable relief route for shore traffic.

Westville-Glassboro Road ✓

The Secretary informed the Commission that Mr. William C. Cattell, County Engineer of Gloucester County, was present for a hearing. On motion, duly seconded, a hearing was granted. Mr. Cattell informed the Commission that the County was desirous of improving the road from Westville to Glassboro in order to furnish a hard surfaced road throughout which would be a relief route to the White Horse Pike. He informed the Commission that at the present time the road is improved with sheet asphalt pavement from Westville to Glassboro, except for one-half mile in Westville: the road is then gravel from Glassboro to Malaga a distance of 10 miles and to Downstown a distance of 6 miles, thus making 16 miles of road to be improved between Westville and Atlantic City. He advised that the County of Gloucester stood ready to furnish the engineering for this work if the State would furnish funds from the Motor Vehicle Account or otherwise. The Commission advised Mr. Cattell that this road was a very desirable one and would be given consideration just as soon as the Commission could find funds for the same.

Prison Farm at Leesburg ✓

State Highway Engineer Sloan presented to the Commission an estimate and blue print covering the proposed improvement of Highway leading from Leesburg to connect with State Highway Route 15, and recommended that this road be improved with gravel at a cost estimated to be $4,000.00. The Secretary explained that Senator Reeves at the morning session had advised that this construction was advisable in order to furnish an outlet forthe Prison Farm at Leesburg. On motion by Mr Stewart, seconded by Mr. Kidde, the State Highway Commission approved the recommendation of the State Highway Engineer.

Detour-Route 8, Section 2 ✓

On recommendation of the State Highway Engineer, Commissioner Jelin moved the adoption of the following official detour for Route

8, Section 2, Montclair-Verona Section:

> "Beginning at the intersection of Clairmont Avenue and Pompton Turnpike and running thence (1) over Clairmont Avenue in an easterly direction a distance of approximately 500 feet to the intersection of Clairmont and Bloomfield Avenues."

This was seconded by Mr. Stewart and adopted.

Route 4, Inland Waterway Bridge

State Highway Engineer Sloan presented to the Commission a petition from the County of Monmouth, requesting that the State Highway Commission turn over to Monmouth County materials and parts of a temporary lift bridge stored at the site of the bridge location at the Inland Waterway on Route 4, this material and equipment not being used by the State Highway Department, and he recommended that the petition of Monmouth County be approved. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission approved the request of Monmouth County and authorized the transfer to Monmouth County of the material and parts of a temporary bridge stored at the site of the bridge location at the Inland Waterway on State Highway Route 4.

Fenwick Creek Bridge, Salem ~~Camden~~ County

State Highway Engineer Sloan presented to the Commission a Bill of Summons and Complaint in connection with a suit being instituted by Samuel Campbell against Salem County on account of construction of Fenwick Creek Bridge and he recommended that these papers be forwarded to the Attorney-General with the request that he give such attention as will protect the State's interest. On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission directed that the matter be referred to the Attorney General, the State Highway Engineer to furnish all papers in connection thereto.

Long Valley-Hunterdon County Line Road

On recommendation of the State Highway Engineer, Commissioner Jelin moved the approval of award of contract by Morris County for the Long Valley-Hunterdon County Line Road, Morris County, work to be done with State Aid and Motor Vehicle Aid, the lowest bid being by the Public Service Production Company of Newark, at $163,632.25. This was seconded by Mr. Kidde and adopted.

Warren County-Federal Aid Project 43

On recommendation of the State Highway Engineer, Commissioner Kidde moved the approval of Project agreement and County-State agreement on the Phillipsburg-Belvidere Road, Section 1, Warren County, Federal Aid Project #43. This was seconded by Mr. Jelin and adopted.

Township Aid - Hunterdon County Unexpended Balance

On recommendation of the State Highway Engineer, Commissioner Jelin moved the approval of transfer of unexpended balance of $249.12 from the Baptistown-Barbertown Road to the Barbertown-Delaware Line Road in Kingswood Township, Hunterdon County. This was seconded by Mr. Stewart and adopted.

Springdale-Tranquility Road

On recommendation of the State Highway Engineer, Commissioner Jelin moved the approval of cancellation of balance of $226.96 remaining to the credit of the Springdale-Tranquility Road, Green Township, Sussex County, from the emergency funds. This was seconded by Mr. Stewart and adopted.

State Highway Bidding

Commissioner Jelin called attention to the fact that it would be desirable for the Commission to approve plans for early bidding, if same were completed by the Engineering Division.

Route 7, Corlies Avenue

State Highway Engineer Sloan informed the Commission that he was prepared to recommend approval of plans and specifications for Route 7, Corlies Avenue to Colts Neck Road. On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission unanimously adopted the following resolution:

> RESOLVED, that the State Highway Commission does hereby approve plans and specifications for the construction of Route 7, Corlies Avenue to Colts Neck Road, and
>
> BE IT FURTHER RESOLVED, that the Chairman is authorized to sign the necessary papers after approval by the State Highway Engineer, and the Chief Clerk is directed to place advertisement for same.

Route 9, Plainfield-Westfield

State Highway Engineer Sloan advised the Commission that he was prepared to recommend for approval the plans and specifications for Route 9, from Plainfield to Westfield. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission unanimously adopted the following resolution:

> RESOLVED, that the State Highway Commission does hereby approve plans and specifications for the construction of Route 9 from Plainfield to Westfield, and
>
> BE IT FURTHER RESOLVED, that the Chairman is authorized to sign the necessary papers after approval by the State Highway Engineer, and the Chief Clerk is directed to place advertisement for the same.

Route 5, Essex County

Commissioner Kidde inquired as to whether there was any decision in the matter of width of pavement to be specified for Route 5 in Maplewood Township, Essex County. State Highway Engineer Sloan informed the Commission that traffic counts taken would indicate that the State Highway Commission is justified in placing a 29 foot pavement on that section of Route 5 between Farmer's Hotel and Irvington, and he recommended that a 29 foot pavement be approved, provided the municipalities or counties involved would pave the road to a minimum width of 36 feet. On motion by Mr. Kidde, seconded by Mr. Jelin the State Highway Commission directed that a communication be forwarded to the authorities involved, advising that the State Highway Commission is willing to arrange for the construction of Route 5 from Farmer's Hotel to Irvington, and will share on the basis of 29 feet inclusive of the trolley track area, if the municipalities or counties involved will guarantee to complete the road to a minimum of 36 feet.

White Horse Pike-Widening

State Highway Engineer Sloan informed the Commission that plans were prepared for the widening of 13 miles of the White Horse Pike during the year 1924, and he would recommend that the same be approved by the Commission. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission unanimously adopted the following resolution:

> RESOLVED, that the State Highway Commission does hereby approve plans and specifications for the widening of 13 miles of the White Horse Pike, State Highway Route 3, to a width of 29 feet at an amount estimated to cost $300,000.00, and
>
> BE IT FURTHER RESOLVED, that the Chairman is authorized to sign the necessary papers and the Chief Clerk is directed to place advertisement for the same after approval by the State Highway Engineer.

Route 2, Burlington

State Highway Engineer Sloan informed the Commission that he was prepared to recommend the reconstruction of four miles of Route 2, south of Burlington, with a bituminous surface placed on the macadam foundation. On motion by Mr. Stewart, seconded by Mr. Jelin, the State Highway Commission approved the following resolution:

> RESOLVED, that plans and specifications are hereby approved for the reconstruction of four miles of Route 2 from Burlington south toward Camden, at an estimated cost of $100,000.00, and
>
> BE IT FURTHER RESOLVED, that the Chairman is authorized to sign the necessary papers and the Chief Clerk is directed to place advertisement for this work, after approval by the State Highway Engineer.

On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission adjourned at 4:30 P.M. to meet again in regular session on Tuesday, March 11th, 1924, at 10:30 A.M.

Respectfully submitted,

A. LEE GROVER,

Secretary

MINUTES OF MEETING-March 11, 1924

A regular meeting of the State Highway Commission was held in the Commission meeting room, Broad Street Bank Building, Trenton, on Tuesday, March 11, 1924. The meeting was called to order by Chairman Scott at 10:30 A.M.

Present: General H. L. Scott, Chairman, and Messrs.
Percy H. Stewart, Walter Kidde and Abraham Jelin.

Minutes Approved

Commissioner Kidde reported having carefully read the minutes of the special meeting of December 8th, 1923, and he moved that the same be approved as mailed. This was seconded by Mr. Jelin and adopted.

Legislation

The Commissioners conferred on the matter of legislation now before the Governor for signature and upon which reports had been requested by the Governor.

A communication was framed to the Governor on his request, on the matter of a new route from Trenton to Buttzville via Pennington, Clinton and Washington.

College Farm Roads, New Brunswick

The Secretary informed the Commission that Dr. J. G. Lippman, Director of the Agricultural Experiment Station at New Brunswick was present on the matter of roads through the State Farms property. On motion duly seconded, a hearing was granted. Dr. Lipman appeared and informed the Commission that the highways through the grounds of the Experiment Station in New Brunswick were in very bad condition and efforts have been made to have the inclusion of an amount for the repair of these roads in the Annual Appropriation Bill, but same was not granted, and he desired such assistance as the State Highway Commission could give in the improvement of these highways, calling particular attention to the road running from George Street and Nichol Avenue to Rider's Lane, which road was in existence before the Experiment Station was placed in this location and was used considerably by local traffic. He inquired whether it would be possible for the State Highway Commission to work out some experimental road work on this section of road, and stated that he would be willing to give such assistance as was possible from the Agricultural College. State

Highway Engineer Sloan informed the Commission that the Attorney General had ruled in the past that the State Highway Commission has a right to make experiments for the betterment of highway work, and in view of the fact that there was being shipped to the State of New Jersey from the war surplus equipment, a complete Asphalt Plant, through the efforts of the Superintendent of Plant and Equipment, Jacob Hagin, there would be justification for the use of this Plant on a short section of road in order to acquaint the employees of the Department with the operation of an Asphalt Plant. On motion by Mr. Kidde, seconded by Mr. Stewart, the Commission directed that the State Highway Engineer and Commissioner Jelin investigate the roads at the State Agricultural Experiment Station and determine as to their value for experimental work, together with a report as to the cost.

Asphalt Plant

On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission directed that a communication of thanks be forwarded by the Chairman to Director MacDonald of the Bureau of Public Roads in Washington, extending the thanks of the Commission for the Asphalt Plant as shipped.

On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission directed that the Asphalt Plant be brought to the Fernwood Service Station and unloaded at that point.

Old Bridge-Matawan Road

The Secretary informed the Commission that a hearing had been requested by the Middlesex County Board of Freeholders with reference to the construction of the Matawan-Old Bridge Road, and this delegation was now present. On motion, duly seconded, a hearing was granted. There appeared Director Dey of the Board of Freeholders and Freeholders Vandenburge and Applegate. Director Dey informed the Commission that the construction ofthe Matawan-Old Bridge Road was now before the Board of Freeholders and he had appeared to clear up the misunderstanding which existed to the effect that the former State Highway Commission had pledged itself to contribute $45,000.00 toward this improvement. Secretary Grover explained that at a meeting of the former State Highway Commission there was action taken advising Middlesex County that assistance would be given by the State ot the extent of

$45,000.00 on the Matawan-Old Bridge Road "when funds became available." He further explained that in order to make such funds available it would have been necessary to set up an amount for this purpose from the Motor Vehicle Reserve Account for 1923. This, however, the former State Highway Commission failed to do, and as far as the records of the State Highway Department are concerned, there is no fund set up for this purpose. Director Dey advised the Commission that he now understood the reason why the $45,000.00 was not granted to Middlesex County and he appeared to inquire whether the State Highway Commission would be willing to assist in the construction of one mile of this road during 1924 with concrete. Commissioner Jelin called attention to the fact that this road is one of the most important secondary roads in the State, for, by the connection of these four miles and four miles at Bound Brook, there will be an entire new route paved between North and South Jersey for relief to the Shore traffic, and he recommended that the State assist in the construction of the four miles between Old Bridge and Matawan in view of the fact that the construction of these four miles this year will eliminate 25% of the traffic over the existing Morgan Route. The State Highway Engineer estimated that the four miles of this improvement, in view of the fact that there is a very little grading to be done, would cost $200,000.00.

Director Dey informed the Commission that he personally felt that this improvement was of prime importance to the county, but because of the fact that the county is divided into districts under the supervision of each of the Board of Freeholders; and in view of further fact that there are road demands in each one of these districts, he did not feet that the county could finance such a large improvement in his district this year. Commissioner Jelin informed the Freeholders that the reason that the State Highway Commission is desirous of improving the entire road is due to the congestion existing at the Morgan Crossing, and if an early start was made on the work, the entire four miles could be completed before the first or fifteenth of July, when the heaviest traffic is using this road. He recommended to the Commission that the State share on a fifty-fifty basis with Middlesex County in this improvement and he advised the Freeholders that an effort should be made toward this improvement at once for the entire distance, since any shorter length would not help the State Highway Commission. Commissioner Kidde called the attention of the Freeholders present to the fact that the system in vogue in Middlesex County for the division of county authority among the Freeholders was antiquated and s tood in the way of the County receiving the benefit of important improvements to the County and the State.

Director Dey informed the Commission that he was willing to return to the Board of Freeholders with the proposition of the State to go fifty-fifty on the construction of the road, if he was assured by the Commission that they would participate. Each of the Commissioners in turn expressed their willingness to vote in favor of a fifty-fifty allotment, from the Motor Vehicle Reserve Account, to the extent of $100,000.00 if the County of Middlesex would undertake the entire improvement at once.

Invitation

The Secretary presented an invitation received from the National Conference on State Parks, inviting the Commission to attend the Fourth National Conference to be held at Gettysburg, Pa. on May 26th, 27th and 28th. On motion by Mr. Stewart, seconded by Mr. Jelin, the communication was ordered received and filed.

Advisory Board-Victory Bridge

The Secretary reported that letters have been received from Mr. James L. Bettele, Allen B. Mills, C. W. Hudson and John T. Rowland, Jr., accepting the invitation of the State Highway Commission to be members of the Advisory Board on the study of suitable memorial features for the Amboy Bridge. On motion, duly seconded, the communications were ordered received and placed on file.

Attorney-General Opinion, Route 5, Section 11

The Secretary presented an opinion received from the Attorney General on the question of the right of the State Highway Department to enter into a contract with the Pennsylvania R. R., whereby in consideration of the conveyance of certain lands by the railroad company to the State, the Highway Department agrees to build a toe wall along the right of way of the railroad in the event that the railroad company should desire to double the present line on Route 5, Section 11, Delaware-Belvidere. He advised that he is of the opinion that the proposed agreement cannot be carried out in view of the fact that it is a contract to perform work of an indefinite character and extent, and at an undetermined price. State Highway Engineer Sloan informed the Commission that since investigating the situation further, it was shown that it will be necessary to go outside the line originally proposed in order to avoid the snow and ice from the railway fill adjacent to the road. On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission directed that the opinion of the Attorney General be spread in full upon the minutes and that the matter of the road, in view of the recommendations of the State Highway Engineer, is referred to the Engineering Division with instructions to work out the most satisfactory line for this section of Route 5.

Trenton, N.J., March 5, 1924.

A. Lee Grover, Secretary,
State Highway Commission,
Broad Street Bank Bldg.,
Trenton, New Jersey.

Dear Sir:-

I am asked for an opinion as to the right of the State Highway Department to enter into a contract with the Pennsylvania Railroad Company, whereby in consideration of the conveyance of certain lands by the Pennsylvania Railroad Company to the State, the Highway Department agrees to build a toe wall along the right of way of the railroad company, in the event that the railroad company should desire to double track its present lines.

As I understand the facts, the present road parallels the right of way of the railroad company at the point where it may be necessary to construct the toe wall; that this road is of such width that if the Pennsylvania Railroad Company desired to double track its lines at the present time it would have to construct a toe wall, otherwise its slope would encroach within the present lines of the road. If that were all, of course the Pennsylvania Railroad Company would be obliged to construct its own tow wall, in order to prevent encroachment of its slope upon the highway itself. The question here presented, however, is the validity of an agreement whereby the Pennsylvania Railroad Company agrees to convey certain land for highway purposes in consideration the State Highway Department build the toe wall, if it were necessary.

I have no doubt that the State Highway Department could purchase the land in question, or, if it were not actually used for railroad purposes, might condemn it and thus acquire title. I doubt, however, whether it could enter into a contract to perform work of an indefinite character and extent, and at an undetermined price, in consideration of the conveyance of the land to it.

I am, therefore, of the opinion that the proposed agreement cannot be carried out, and so advise you.

Very truly yours

H. R. COULOMB,

Assistant Attorney-General.

Route 10, Section 6, Hackensack-Paterson.

The Secretary presented a resolution from the Board of Freeholders of Bergen County, directing the attention of the State Highway Commission to the desirability of providing a width of 26 feet of pavement on Route 10 between Hackensack and Paterson. State Highway Engineer Sloan informed the Commission that this section of road was already advertised for construction and from traffic counts taken did not show that the extra width was warranted at this time, and if future traffic demands an extra width, the same can be added without difficulty. Commissioner Kidde stated that he felt, in view of the fact that the Commission was planning for traffic 25 years in advance, it would be warranted in making an extra width pavement at this time. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission approved of the plans as drawn and advertised on a 20 foot basis, Mr. Kidde voting in the negative.

State Aid -

Turtle Gut Inlet, Cape May County

The Secretary presented a resolution from the Cape May County Board of Freeholders, advising of the successful closing of the Turtle Gut Inlet on the Cape May-Wildwood Road, Section 2 and requesting payment in the sum of $12,500.00, which is held to the credit of Cape May County on account of this additional work. State Highway Engineer Sloan informed the Commission that he had examined this work and was prepared to recommend the payment of the State's share. On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission approved the payment of the State Aid to the amount of $12,500.00 to Cape May County on account of the closing of the Turtle Gut Inlet.

Detours, Route 14, Section 5.

The Secretary presented a resolution from the County of Cape May requesting payment by the State of the sum of $995.40 which amount has been paid from the Cape May County funds on account of detours used during the construction of Route 14, Section 5, under the terms of the Reimbursement Act. On motion by Mr. Stewart, seconded by Mr. Jelin, the State Highway Commission authorized the payment of $995.40 to Cape May County, the same to be included in reimbursement to be made to Cape May County on account of construction of Route 14, Section 5.

Route 12, Section 2, Pine Brook-Parsippany.

The Secretary presented a communication from Mr. Thomas Haggerty, requesting an appointment before the State Highway Commission for the Attorneys representing the Oak Ridge Constuction Company's contract on State Highway Route 12, Section 2, between Pine Brook and Parsippany. On motion by Mr. Stewart, seconded by Mr. Jelin, the State Highway Commission directed that a hearing be granted in view of the fact that it understands that there are additional facts to be presented in the case.

Route 11, Belleville

The Secretary presented a communication from the Town Clerk of Belleville, New Jersey, advising that the Town is prepared to proceed with the improvement of Washington Avenue on Route 11 through Belleville with the understanding that this improvement will not cost the Town of Belleville over $210,000.00. State Highway Engineer Sloan informed the Commission that before any work could be done in Belleville, negotiations would have to be made with the Public Service Railway for the relocation of its tracks. He stated that he understood that this work would be done at the expense of the Traction Company, if the construction of the road could be held up until the Traction Company was ready to relay its rails, which would be within the next two or three years. He further stated that the State Highway Bond Issue funds were not available for this improvement, in view of the fact that this road was taken over after the Bond moneys became applicable, but that surplus funds in the Mill Tax Account could be used when available. Commissioner Stewart moved that State Highway Engineer Sloan and Commissioner Kidde arrange to make an inspection of Route 11, through Belleville on the ground and enter into such negotiations looking toward a report to the State Highway Commission as to the situation existing with the Traction Company and the local authorities. This was seconded by Mr. Jelin and adopted.

Hildreth & Company- Material Inspectors

The Secretary presented a communication from Hildreth & Company, requesting the Commission to give some explanation for the cancellation of the contract for the inspection of construction materials. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway

Commission directed that the communication be referred to the State Highway Engineer for proper reply.

Advisory Board Route-Camden

The Secretary presented a communication from Mr. H. L. Sinexon, enclosing a clipping in which suggestion was made for a change in the proposed Crescent Boulevard in the vicinity of Camden. On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission directed that the clipping be acknowledged and that Mr. Sinexon be advised that the State Highway Commission hold public hearings on all of these important projects, at which time he will be given an opportunity to submit a brief to the Commission.

Burlington County-Request for Aid

The Secretary presented a communication from Mr. William H. Reeves, County Clerk of Burlington County, requesting aid in the improvement of a connecting road now being built by Ocean County from Barnegat to the Burlington County Line with the New Lisbon-Four Mile Road. State Highway Engineer Sloan explained that this improvement could only be made from State Aid funds for which there was no appropriation set aside by the Legislature. He further advised that Motor Vehicle funds could not be used, in view of the fact that this was an unimproved road. The only State Aid funds, therefore, that might be used on the project would be from the Township Aid Account. On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission directed that the Burlington County authorities be advised to the effect that there are no State Aid or Motor Vehicle Aid funds available other than that which could be applied through application from the Townships in this particular locality, for aid from the Township Aid funds.

Inland Waterways

The Secretary presented a communication from the Real Estate Purchasing Agent of the Board of Commerce and Navigation, inquiring as to the details of the proposed Shore Road improvement in connection with the right of way for the proposed new Ship Canal in New Jersey. On motion by Mr. Kidde, seconded by Mr. Jelin, the communication was ordered received and referred to the State Highway Engineer for proper disposition.

Request for Aid-Camden County

The Secretary presented a communication from J. J. Albertson, County Engineer of Camden County and Charles Wise, Chairman of the County Road Committee, requesting, first, that the Commission grant aid on the improvement of five borough roads used as detours while Route 3, Section 8, was being built and also for detours on the Blackwood-Clementon-Berlin Road; and in addition the County was anxious to learn whether the Commission would extend Kings Highway from Colestown to the Burlington County Line. The Secretary informed the Commission that at the time of the construction of the White Horse Pike in Camden County the State Highway Commission granted a special allotment to the County of $120.000.00 for the reconstruction of the Marlton Pike, which the County accepted in lieu of any requests for detour funds from the State. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission directed that this information be forwarded to the County of Camden and that consideration of the request for Kings Highway improvement be taken under consideration at a later date.

On motion by Mr. Kidde, seconded by Mr. Jelin, the Commission recessed for luncheon at 1:30 P.M. to meet in regular session again at 3:00 P.M. The Commission reconvened at 3:00 P.M. as agreed with the same members present as at the morning session.

Ocean City Bridge Road, Cape May County

The Secretary informed the Commission that Mr. Buvinger of Ocean City in Cape May County, was present and desired a hearing with reference to the paving of the Ocean City Bridge Road, on which matter a delegation had appeared at the last meeting. On motion, duly seconded, a hearing was granted. Mr. Buvinger appeared and advised that in line with the suggestion of the State Highway Commission at its last meeting, he had taken up with the county authorities of Cape May County, the question of setting aside 50% of the cost of improving the one mile of road on the Ocean City Bridge approach, but had been advised that the County had already allocated all of its Motor Vehicle funds as apportioned by the State, and would not be able to undertake this work during the present year. He suggested that it might be possible for a number of public-spirited citizens to raise sufficient money to pay one-half of this work, if a guarantee was given by the State that this money would be returned from funds to be given to Cape May County. He outlined for the Commission the importance of this road. Commissioner Jelin suggested that it might be possible for the Commission to experiment upon this strip of road with a new oil which was being successfully applied to gravel roads in Long Island. Mr. Buvinger requested permission to return to Ocean City and make a further effort to secure funds with which to finance the hard surfacing of this roadway to the extent of 50%, since the State had assured his delegation that it would share 50% of the cost.

Roads to State Institutions-Jamesburg

The Secretary presented a communication received from T. R. Roselle, Superintendent of the State Home of Boys, at Jamesburg, New Jersey, requesting the Commission to place in proper condition, the road leading to that institution. On motion by Mr. Kidde, seconded by Mr. Jelin, the communication was ordered referred to the Maintenance Division for further report.

The Schedule of Business was next taken up for consideration item by item as follows:

Albany Street Bridge-Route 1

State Highway Engineer Sloan informed the Commission that it will be necessary to close the Albany Street Bridge at New Brunswick, to traffic from twelve o'clock midnight on Thursday, March 13th, to five o'clock in the morning of the 14th, and that arrangements have been made with the State Police to assist in the detouring of traffic. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission approved the action of the State Highway Engineer in closing the Albany Street Bridge at New Brunswick and directed that proper advertisement of the same be placed in the New Brunswick Home News.

New Amboy Bridge, Route 4.

State Highway Engineer Sloan presented a communication received from Stillman, Delehanty-Ferris Company advising that the contract for the ornamental rail on the Amboy Bridge has been awarded to the Vulcan Rail and Construction Company of Brooklyn, N. Y. and he recommended that the same be approved by the Commission. On motion by Mr. Stewart, seconded by Mr. Jelin, the State Highway Commission approved the recommendation of the State Highway Engineer and accepted the sub-contract for the ornamental rail on the Perth Amboy Bridge from the Vulcan Rail and Construction Company.

Route 11, Main Street, Clifton

State Highway Engineer Sloan presented a communication from Garwood Ferguson, County Engineer of Passaic County, inquiring as to whether the County may proceed with the advertisement for the laying of an asphalt top on Main Street, in the City of Clifton, and the completion of concrete base and top on the remaining half of this work. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission directed that the County of Passaic be advised that approval is given to the readvertisement for the entire remaining work to be done on Main Street, Clifton, in one contract, the State Highway Commission reserving the right, in the event the bids are considered unsatisfactory, to enter upon and do this work with its own repair forces.

Route 1, Hightstown Bridge

On recommendation of ~~the~~ State Highway Engineer Sloan, Commissioner Kidde moved that the State Highway Commission contribute $1,100.00 toward the cost of the construction of a balustrade wall on the Main Street Bridge in Hightstown, agreement to be made with the Town of Hightstown looking toward this work to be done in accordance with the plans ofthe City of Hightstown. This was seconded by Mr. Jelin and adopted.

Route 6, Section 16-Drainage

State Highway Engineer Sloan presented to the Commission a plan showing improvement in drainage conditions on Route 6, Section 16, at Woodbury, the proposed work to be paid for jointly by the State, the City of Woodbury and a private owner in the name of D. Darms, in the following proportion:

State	City	D. Darms
$ 1738.25	$ 223.00	$ 199.05

He recommended that the Commission approve of this work being done under proper agreement. On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission approved the recommendation of the State Highway Engineer, and authorized the Chairman to approve such agreement as would be drawn up by the State Highway Department, and City of Woodbury, covering improvement in drainage conditions, on Route 6, Section 16, in accordance with the plans submitted.

Route 16, South Somerville,
Grade Crossing Elimination.

State Highway Engineer Sloan presented for the consideration of the Commission alternate schemes for grade crossing elimination in South Somerville, in which he recommended the adoption of plan "C" at a total estimated cost of $109,024.00, involving a structure with a center pier in the highway, leaving 18 feet of roadway on each side of the pier, the railroad company to share in the cost of this improvement to the extent of $40,000.00. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission approved plan "C" for the elimination of Lehigh Valley Railroad Crossing at South Somerville, and directed that this elimination be proceeded with and that $40,000.00 be accepted from the Lehigh Valley Railroad Company as its proportionate share of the cost.

Right of Way-Route 5, Section 12.

On recommendation of the State Highway Engineer, Commissioner Stewart moved the approval of purchase of Parcel #14-A on Route 5, Section 12, Netcong-Canal Culvert, from Helen S. Wolverton, for the consideration of $1.00. This was seconded by Mr. Kidde and adopted.

Right of Way-Route 9, Section 14

On recommendation of the State Highway Engineer, Commissioner Stewart moved the approval of purchase of Parcel #1 on Route 9, Section 14, from the North Branch Community Club for the consideration of $141.00. This was seconded by Mr. Kidde and adopted.

Right of Way-Route 13, Section 6.

On recommendation of the State Highway Engineer, Commissioner Stewart moved the approval of purchase agreement for Parcel #6 on Route 13, Section 6, Lawrenceville-Princeton from Moses Tayloe Pyne Estate, for the consideration of $1700.00. This was seconded by Mr. Kidde and adopted.

Employments

State Highway Engineer Sloan presented a list of employments as made by him since the last meeting of the Commission, and recommended ratification of the same by the Commission. On motion by

Mr. Kidde, seconded by Mr. Stewart, the following list of employments as made by the State Highway Engineer since the last meeting of the Commission, was unanimously approved by the Commission:

3-10-24	Oreste E. Gianni	Transitman-Amboy Br.	$175.00 mo.
3-8-24	H. Kirkpatrick	Right of Way Agt.Spec.	15.00 day.
3-17-24	Theresa Gasser	Sr.Clk. - Bkkp.	100.00 mo.

Salem County-Township Aid-Cancellation

On recommendation of the State Highway Engineer, Commissioner Jelin moved the approval of the cancellation of unexpended balance remaining to the credit of the Georgetown Road, Upper Penns Neck Township, Salem County, in the amount of $17.89. This was seconded by Mr. Stewart and adopted.

Hunterdon County-Township Aid

On recommendation of the State Highway Engineer, Commissioner Jelin moved the acceptance and final payment on the Pittstown-Quakertown Road, Franklin Township, Hunterdon County, Township Aid. This was seconded by Mr. Stewart and adopted.

Gloucester County-Township Aid

On recommendation of the State Highway Engineer, Commissioner Stewart moved acceptance and final payment on the Pitman-Richwood-Mullica Hill Road, Section 2, in Harrison Township, Gloucester County, Township Aid. This was seconded by Mr. Jelin and adopted.

Gloucester County-Township Aid

On recommendation of the State Highway Engineer, Commissioner Stewart moved approval of application of Township Aid on the Pitman-Richwood Road in Mantua Township, Gloucester County. This was seconded by Mr. Jelin and adopted.

Farmingdale-Manasquan Road

State Highway Engineer Sloan presented plans and specifications for the construction of the Farmingdale-Manasquan Road, Section 2, in Monmouth County, with the request for State Aid on the same, and he recommended that these plans be rejected on account of lack of funds in order that the county might proceed with its own moneys. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission approved the recommendation of the State Highway Engineer and rejected the plans and specifications for the Farmingdale-Manasquan Road, Section 2, in Monmouth County, in order that the County might proceed with its own funds.

Passaic County-Maintenance Materials

On recommendation of the State Highway Engineer, Commissioner Stewart moved the approval of specifications of Passaic County for materials for repairing sheet asphalt and amiesite or topeka pavements, tars and asphalts for surface treatment, and hot and cold patching, broken stone and slag for 1924 work. This was seconded by Mr. Jelin and adopted.

Union County-Maintenance Materials

On recommendation of the State Highway Engineer, Commissioner Jelin moved the approval of Union County specifications covering maintenance materials for 1924, which included coal tar, water gas tars, crushed stone and bituminous concrete, types "A" and "CA". This was seconded by Mr. Stewart and adopted. In connection with the surface treatment approval, Commissioner Jelin advised that he had received information to the effect that certain members of the State Highway Department had been seen lobbying at the Legislature in behalf of certain Bills on paving materials, and he advised that this should never be permitted in the Department. State Highway Engineer Sloan informed the Commission that instructions were given to all employees that lobbying was not permitted during the sessions of the Legislature.

State Highway Maintenance Materials

State Highway Engineer Sloan reported to the Commission that Maintenance Superintendent Muir had presented to him an estimate of materials which would be required for maintenance work on State Highways during the year 1924, and he recommended to the Commission that authorization be given for advertisement on materials as reported. On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission approved the recommendation of the State Highway Engineer, and authorized the advertisement for the following maintenance materials for the year 1924:

Crushed Stone	Approximately	52,000 tons
Crushed Slag Dustless Screenings	"	8,000 "
Liquid Bitumens for surface treatment and penetration work	"	363,000 gals.
Liquid Bitumens for Cold Patching	"	155,000 "
Bituminous Concrete and Sheet Asphalt for patching - Amiesite	"	9,000 tons

Lignin Binder for surface treatment of gravel roads	Approximately 395,000 gals.
Paint for painting guard rail and bridges	" 5,500 "

In connection with this action, Commissioner Jelin advised that there was a complaint during the past year to the effect that where the application of surface treatment was awarded to specialized companies there was a tendency, in some instances, to do the work in a careless manner, and the pavement holes were not cut square in order to hold the materials after they are placed. Commissioner Kidde suggested that in giving approval to the maintenance materials that a notice be given to the Engineering Division that it is the wish of the State Highway Commission that the necessary cut and patching work be done wherever possible by the forces of the State Highway Department. In further connection with the foregoing, Commissioner Jelin brought up the matter of competition in the use of patent materials for surface treatment on gravel roads, such as Lignin Binder, and he inquired as to what recommendation the State Highway Engineer would have in the event competition was desirable. State Highway Engineer Sloan informed the Commissioners that Calcium Chloride could be used successfully for dust laying purposes, and as a road preservative, and that after suitable experiment it may be possible to use a new grade of asphaltic oil, produced by the Texas Company. After further discussion, Commissioner Jelin moved that in advertising for 395,000 gallons of Lignin Binder, there be advertised in addition an equivalent amount of Calcium Chloride and Texas Oil #55, the Commission to determine the type of which the major portion of the work shall be performed. This was seconded by Mr. Kidde and adopted.

State Highway Engineer Sloan called attention to the fact that amounts specified for advertisement on account of maintenance work for 1924 are less than that required in 1923, in view of the fact that the roads have not been subjected to the severe winter conditions that are usual and will be in much better shape in the spring than is usually the case. The diminishing quantity was also due to the high class maintenance work performed during 1923 on a number of heavy travelled State Highway sections.

Mercer County-Maintenance Materials

On recommendation of the State Highway Engineer, Commissioner

Kidde moved the approval of tars for surface treatment of Mercer County roads for 1924. This was seconded by Mr. Jelin and adopted.

Burlington County-Maintenance Materials

On recommendation of the State Highway Engineer, Commissioner Jelin moved approval of specifications for maintenance materials to be used in Burlington County in 1924, same to include coal tars, water gas tars, lignin binder, Calcium Chloride, washed pebbles and broken stone. This was seconded by Mr. Stewart and adopted.

Monmouth County-Maintenance Materials

State Highway Engineer Sloan presented to the Commission for its approval, award of contract in Monmouth County to W. R. Young for furnishing and applying Lignin Binder, known as Glutrin, at 14¢ per gallon, to roads in Monmouth County, this being the lowest of two bids received. Commissioner Kidde inquired as to whether the percentage of dilutions with water for each mile was provided in the specifications, and he was informed in the affirmative. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission approved the award of contract by Monmouth County to W. R. Young for furnishing and applying Lignin Binder in 1924, funds for this work to come from the Monmouth County Motor Vehicle Allotment.

Monmouth County-Maintenance Materials

On recommendation of the State Highway Engineer, Commissioner Kidde moved the approval of award of contract by Monmouth County to W. G. Harrison, for furnishing and applying tar at 45½¢ per gallon, this including sweeping, furnishing and applying chips, on the roads of Monmouth County. This was seconded by Mr. Jelin and adopted.

Federal Aid Project-Routes 2 and 6

On recommendation of the State Highway Engineer, Commissioner Jelin moved the approval of Federal Aid Project Statement on State Highway Routes 2 and 6 for the proposed Crescent Road and Boulevard from Burlington to Camden and from Camden to Westville. This was seconded by Mr. Stewart and adopted.

Cape May County-Extension of Time

On recommendation of the State Highway Engineer, Commissioner Jelin moved the approval of two extensions of time by the Cape May County Board of Freeholders on the Roosevelt Boulevard in Cape May

County, the first being to January 1st, 1924, and the second being to February 20th, 1924, subject to a deduction in inspection costs from December 1st to January 31st, amounting to $378.50, work done under Motor Vehicle Aid. This was seconded by Mr. Stewart and adopted.

Federal Aid Project-Route 14, Cape May County

On recommendation of the State Highway Engineer, Commissioner Jelin moved approval of Federal Aid Project Statement for State Highway Route 14 between Egg Harbor and Cape May. This was seconded by Mr. Stewart and adopted.

Motor Vehicle Aid-Cape May County

On recommendation of the State Highway Engineer, Commissioner Jelin moved the acceptance and final payment on Roosevelt Boulevard, Cape May County Motor Vehicle Aid work. This was seconded by Mr. Stewart and adopted.

Roosevelt Boulevard, Section 2, Cape May County.

On recommendation of the State Highway Engineer, Commissioner Stewart moved the approval of plans and specifications for Roosevelt Boulevard Section 2, in Cape May County, work to be done from the Motor Vehicle Aid Account. This was seconded by Mr. Jelin and adopted.

Motor Vehicle Fund-General

On recommendation of the State Highway Engineer, Commissioner Kidde moved that the following amounts be credited to the General Motor Vehicle Account of each of the counties mentioned, and that payment by the State be made upon proper audit:

Allotment E-1919, Lincoln Highway, Essex Co. Balance of $3,857.37
" F-1919, " " Hudson Co. " " $1,824.66

This was seconded by Mr. Stewart and adopted.

Cape May County-Township Aid

On recommendation of the State Highway Engineer, Commissioner Jelin moved approval of Township Force Account Agreement on Sea Isle Junction Road in Dennis Township, Cape May County. This was seconded by Mr. Stewart and adopted.

Burlington County-Township Aid

On recommendation of the State Highway Engineer, Commissioner Jelin moved the acceptance and final payment on the Juliustown-

Jobstown-Hancock's Corner Road, Springfield Township, Burlington County, Township Aid. This was seconded by Mr. Stewart and adopted.

Cumberland County-Township Aid Transfer.

On recommendation of the State Highway Engineer, Commissioner Jelin moved approval of transfer of $3000.00 from Westfield-Taylor Road, Dennis Township, Cape May County, Township Aid, to Eldora-Belle-Plain Road in Maurice River Township, Cumberland County. This was seconded by Mr. Stewart and adopted.

Route 13-Lawrenceville-Princeton

State Highway Engineer Sloan advised the Commission that it may be desirable to close Route 13 to traffic between Stony Brook and the Princeton Line, in order to affect the construction of a concrete pavement for the full width. This will incur the closing of the highway for 30 days and inasmuch as there are only three abutting property owners along this section of highway, two of whom have other entrances, it would not be such a serious inconvenience. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission authorized the Engineering Department to close Route 13 between Stony Brook and the Princeton Line in the event it is found desirable so to do.

Right of Way-Amboy Bridge-New

State Highway Engineer Sloan presented a communication received by him from William Newcorn, Special Attorney on the matter of the W. J. Donnell Lumber Company's condemnation, advising that if agreeable to the Commission, April 21st will be fixed for the taking of testimony on this condemnation proceeding. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission approved of a date being set as April 21st for the taking of testimony in the condemnation suit of the W. J. Donnell Lumber Company, on Route 4, New Victory Bridge site.

Construction Program 1924.

The State Highway Commission next discussed the question of a complete construction program for 1924, in order that plans and specifications might be prepared and the work advertised at the earliest possible date. State Highway Engineer Sloan presented for the consideration of the Commission, an outline of projects on which surveys could be completed and construction work started, which would provide construction covering an amount which the State Highway Commission could expend from the Bond Issue Act. Each one of these items was taken up individually by the Commission, and after conference, Commissioner Jelin moved the approval of the following resolution:

> RESOLVED, that the State Highway Commission does hereby approve plans and specifications for the construction of the following roads, bridges and grade crossing eliminations, on Sections of the State Highway System for the year 1924, and
>
> BE IT FURTHER RESOLVED, that the Chairman is authorized to sign the necessary plans and specifications after approval by the State Highway Engineer and the Chief Clerk is directed to place the necessary advertisement for the same.

ROUTE	SECTION	COUNTY

16	L.V.R.R. Crossing	Somerset

This was seconded by Mr. Stewart and adopted.

Route 18, Englewood-New York State

On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission adopted the following resolution:

> RESOLVED, that the State Highway Commission does hereby approve of the construction of two miles of State Highway Route 18, in Bergen County, between Englewood and the New York State Line, at an estimated cost of $300,000.00.

Route 11, Belleville

On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway

Commission confirmed its action taken earlier at this meeting, looking toward negotiations to be entered into between State Highway Engineer Sloan, Commissioner Kidde and the Town of Belleville for the improvement of Washington Avenue in Belleville, a section of Route 11.

Construction Program-1924.

Commissioner Jelin offered the following resolution for adoption by the Commission:

> RESOLVED, that plans and specifications be approved for the construction of Route 16, Harlingen Cutoff, Route 2, South of Burlington, for four miles, and Route 3, widening of White Horse Pike, funds to be provided from the Motor Vehicle Account, and
>
> BE IT FURTHER RESOLVED, that the Chairman is authorized to sign necessary plans and specifications after approval by the State Highway Engineer, and the Chief Clerk is directed to place the necessary advertisement for this work.

It was understood in these motions that the summary as made may include authorizations already given.

Additional State Highway

The Commission next discussed the matter of taking over additional sections of State Highways for maintenance by the State, especially these considered of prime importance to the State Highway System. After this duscussion, Commissioner Stewart moved that in accordance with the statute the State Highway Commission direct that the Secretary arrange the necessary preliminary steps for the purpose of taking over the sections of the State Highway System between Westville and Millville, and between Pennsgrove and Atlantic City, and a suitable date would be fixed for hearings on these routes. This was seconded by Mr. Kidde and adopted.

Advisory Board Projects.

Commissioner Kidde brought up the matter of the Advisory Board Projects and moved that the State Highway Engineer be instructed to present a report to the Commission at its next meeting of any proposed increase in force, together with the steps necessary to be taken in order for the State Highway Commission to actively undertake the work of the Advisory Board reports, in order that at the next meeting the State Highway Commission can plan to undertake the proceeding with the execution of this work after proper hearings are held, and further that arrangements be made for a conference with the Attorney General of the State on the next meeting date of the Commission, at which time the State Highway Commission will thoroughly discuss the legality of plans presented by the State Highway Engineer. This was seconded by Mr. Jelin and adopted.

Inmate Labor

Commissioner Kidde inquired as to the progress made with Inmate Labor on State Highway work, and State Highway Engineer Sloan explained that a conference must be held with the Department of Institutions & Agencies before any active work is undertaken with Convict forces in 1924. Commissioner Stewart moved that Commissioner Lewis of the Department of Institutions & Agencies, be invited to appear at the next meeting of the Commission and explain the progress made by convict labor on State Highways. This was seconded by Mr. Stewart and adopted.

On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission meeting was adjourned at 6:30 P.M. to meet in regular session again on Tuesday, March 18th, 1924 at 10:30 A.M.

Respectfully submitted,

A.LEE GROVER,

Secretary.

MINUTES OF MEETING - March 18, 1924.

A regular meeting of the State Highway Commission was held in the Commission meeting room, Broad Street Bank Building, Trenton, on Tuesday, March 18, 1924. The meeting was called to order at 10:30 A.M. by Chairman Scott.

Present: General H. L. Scott, Chairman, and Messrs.
Percy H. Stewart, Walter Kidde and Abraham Jelin.

Minutes Approved

Commissioner Kidde reported having carefully read all the minutes of the Commission meeting up to and including March 11, 1924, and he had made several minor changes in the typing, etc. He moved approval of the minutes of January 22nd as mailed. This was seconded by Mr.Jelin and adopted. Commissioner Kidde moved approval of the minutes of January 29th as mailed. This was seconded by Mr. Jelin and adopted. Commissioner Kidde moved the approval of minutes of February 5th as mailed. This was seconded by Mr. Jelin and adopted. Commissioner Kidde moved the approval of the minutes of February 11th as mailed. This was seconded by Mr. Jelin and adopted. Commissioner Kidde moved the approval of the minutes of February 19th with the inclusion of the counties and their amount of 1924 reimbursement due. This was seconded by Mr. Jelin and adopted. Commissioner Kidde moved the approval of the minutes of February 26th as mailed. This was seconded by Mr. Jelin and adopted. Commissioner Kidde moved the approval of the minutes of March 4th as mailed. This was seconded by Mr. Jelin and adopted. Commissioner Kidde moved the approval of the minutes of March 11th as corrected. This was seconded by Mr. Jelin and adopted.

1924 Reorganization

The Secretary informed the Commission that a reorganization for the year 1924 should take place at this time, in view of the fact that the law provides for such reorganization at the end of each year of service by the Commission. Commissioner Stewart moved that reorganization take effect and that the Commission consider the nomination of General H. L. Scott for re-election as Chairman of the Commission for the ensuing year. In making this nomination, Mr. Stewart expressed the thanks for the other members of the Commission for the devotion of the Chairman and the time spent by him in the office in looking after the affairs of the Commission, and he complimented the harmony existing among the members of the Commission as due, largely, to the splendid example set by the Chairman in his magnanimity of point of view. He assured Chairman Scott that if he would accept this nomination, the Commissioners would pledge their hearty support and extend to him its kindest respects and affection. Both Commissioners Kidde and Jelin seconded the motion of nomination and remarks of the Commissioner Stewart. The Secretary thereupon cast a unanimous ballot for the election of General H. L. Scott as Chairman for the ensuing year 1924.

Chairman Scott expressed his thanks to the Commissioners for their kind expression and for the re-election. He stated that it was a very agreeable duty to serve with the other members of the Commission and he further stated that the reason for the harmony which has existed in the Commission was the fact that the Commission, individually and together, have desired the same results, and as far as he knows there has never been an unworthy project advanced during the past year.

A. Lee Grover-Reappointed

Commissioner Jelin moved the re-appointment of A. Lee Grover as Secretary to the State Highway Commission for the ensuing year. This was seconded by Mr. Kidde and adopted.

Charles Fishberg-Reappointed

Commissioner Jelin moved the re-appointment of Charles Fishberg as Assistant Secretary to the State Highway Commission for the ensuing year. This was seconded by Mr. Stewart and adopted.

Commissioner Kidde stated that while the re-appointment of the State Highway Engineer was not necessary, in view of his election for a term of four years, yet the character of his work during the past year has been so acceptable and his contribution to the Highway History of New Jersey has been so valuable, that he would be glad to show appreciation of his efforts in a more material way, and he moved that the salary rate of Major W. G. Sloan be advanced 10%, making his salary $13,200.00 per annum. This was seconded by Mr. Stewart and adopted.

State Highway Engineer Sloan expressed his appreciation for the consideration of the Commission.

Commissioner Jelin voiced the expression that the administrative force of the Department had carried on its work so efficiently during the past year that it would be very agreeable, if arrangements could be made, to give a general increase in compensation. He spoke particularly of the work of Mr. Jacob Hagin, Superintendent of Plant and Equipment, during the past year, and he moved that an increase in compensation be granted Mr. Hagin from $5,400.00 to $6,000.00 per annum. This was seconded by Mr. Stewart and adopted.

Valley Street, Essex County

Commissioner Kidde reported that he had inspected the completed work on Valley Street, Maplewood Township, Essex County, and he moved acceptance and final payment by the State. This was seconded by Mr. Jelin and adopted.

Inmate Labor

The Secretary informed the Commission that Mr. Burdette G. Lewis, Commissioner of Institutions and Agencies, together with Alan B. Mills, State Architect, and Mr. Charles H. Clayton of the State Prison, were present for a hearing with the Commission on the matter of convict labor work. On motion, duly seconded, a hearing was granted. Mr. Lewis appeared and informed the Commission that the Department of Institutions and Agencies was very anxious to undertake a further demonstration of the work of Inmate Labor on State Highway work if the opportunity was given by the State Highway Commission. He advised that an inspection was made of the location of the Toms River-Lakewood section of Route 4, and it was felt that by the construction of a convict camp, this work could be carried on successfully and with a profit to the Department of Institutions & Agencies. Chairman Scott inquired as to the accomplishments with Inmate Labor on the work of the past year. Mr. Lewis advised that in 1923 there were two projects undertaken by the Department of Institutions & Agencies, one being on Route 2 between Crosswicks Creek and Bordentown, and the other being on Route 15 at Leesburg. He advised that the completed concrete construction on Route 2 was of very fine character, but that the financial results were not entirely satisfactory, there being a deficit of approximately 13% on the Engineer's estimate as allowed by the State Highway Engineer. He advised that this was due, from all reports, to the character of supervision which was only part time, and it was the purpose to improve these conditions this year by the employment of a competent full time supervisor of construction. He advised that it would be possible for the Department of Institutions & Agencies to finance this new work from its own funds during 1924, and further that arrangements would be made whereby the State Highway Commission would be reimbursed for the amount of funds expended in excess of the Engineer's estimate on the Route 2 work. He further advised that the deficit was due, in part, to the hold up on track work during the strike of the Public Service Corporation, and also due to the fact that a greater quantity of material was put in the road than was actually specified. State Highway Engineer Sloan informed the Commission that he had previously conferred with Commissioner Lewis and he had been given the assurance of a competent head being placed in charge of the construction work, full time, during the next year. He attributed any failures of the past year to the lack of responsible control and with this corrected he was prepared to recommend award of additional work to the Department of Institutions & Agencies. After further discussion as to the number of inmates available for the work, Commissioner Kidde moved that the State Highway Engineer be instructed to prepare plans and specifications and a suitable contract form to cover the matters discussed in connection with the work on Route 4, between Toms River and Lakewood, the State Highway Commission being favorable to enter into a contract with the Department of Institutions and Agencies for having this work done with Inmate Labor upon presentation of a suitable contract in detail and subject to the proper State House Commission permission for doing this work. This was seconded by Mr. Jelin and adopted. In connection with the award of contract for this work, Commissioner Jelin inquired as to whether the Department of Institutions & Agencies were prepared to set a time limit for the completion of the work, and he was informed in the affirmative to the effect that the work would be completed during the 1924 construction season.

Route 12, Section 2, Pine Brook-Parsippany.

Secretary Grover informed the Commission that Mr. A. J. King, representing the Hartford Accident & Indemnity Company, who were the guarantors for the Oak Ridge Construction Company on Route 12, Section 2, Pine Brook-Parsippany improvement in Morris County, was present in accordance with the hearing granted by the Commission at its last meeting. On motion, duly seconded, a hearing was granted. Mr. King appeared and reviewed for the Commission the history of the Oak Ridge Construction Company's contract, and he informed the Commission that his purpose in appearing was to secure the approval of the State Highway Commission to the acceptance of a five-year bond from his company on a section of about 600 feet, which the State Highway Commission had refused to accept because of the fact that the depth was 3" in the concrete base, instead of 6" as specified. The reason explained by him for the shortage in concrete over this section was the fact that the contractor had found a very firm macadam base and felt that this would serve the same as though the full amount of 6" had been placed. He advised that the County of Morris was prepared to accept the proposition as offered by his company, if the same was agreeable to the State Highway Commission. Commissioner Stewart informed Mr. King that this entire matter had been reviewed by the present State Highway Commission in every detail and it was felt that the decision arrived at, wherein it was requested that the contractor accept payment for his work, minus that portion on which there was a deficiency in the thickness of concrete, and in addition furnish a five-year bond, guaranteeing the surface pavement over this particular section, and the only alternative to this would be the replacement of the deficient work by the contractor or the surety company. After further discussion, Commissioner Kidde moved that the decision of the State Highway Commission as arrived at on the matter of the construction of Route 12, Section 2, be confirmed and stand as already adopted. This was seconded by Mr. Jelin and adopted.

Chestnut Neck Battle Monument

The Secretary presented a communication received by Chairman Scott from Mrs. David G. Baird, Regent of the Annis Stockton Chapter of the D. A. R., with reference to the moving of the Chestnut Neck Battle Monument and urging consideration from the State Highway Commission on this work. The Secretary explained that a Bill had passed the Legislature providing funds for the removal of this monument, but the same was vetoed by Governor Silzer. He further advised that the Attorney General had ruled that State funds are not applicable for this work. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission directed that a communication to this effect be forwarded to Mrs. Bair.d

Cape May-Lewes Ferry

The Secretary presented a communication from Mr. C. D. Buck, Chief Engineer of the Highway Department of Delaware, advising that he will be pleased to meet in conference with the Cape May-Lewes Ferry Committee at Philadelphia on any day in the next week. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission directed the Secretary to make arrangements for this conference to be held in Philadelphia on Friday, March 21st.

Advisory Board-Victory Bridge

The Secretary presented communications from Mr. J. L. Clevenger and Mr. Shirley W. Morgan, accepting the appointment of the State Highway Commission to serve as members of the Memorial Bridge Advisory Board. On motion by Mr. Stewart, seconded by Mr. Jelin, the Commission directed that acknowledgment be made of these acceptances and that they be advised to hold themselves in readiness for a meeting to be called by Chairman Scott.

Advisory Board-Jersey City

The Secretary presented a resolution from the Business Men's and Citizen's Progressive League of Jersey City, protesting against the proposed cut through Jersey City, as presented in the Advisory Board report on Vehicular Tunnel Traffic through Jersey City and Newark. This resolution recommended to the Commission consideration of a surface line route through Jersey City which would not destroy the business sites in the municipality. On motion by Mr. Stewart, seconded by Mr. Jelin, the communication was ordered received and the Secretary was directed to notify the Business Men's and Citizen's Progressive League of Jersey City that an opportunity will be given for a public hearing for the presentation of protests to the State Highway Commission.

Route 5, Madison-Chatham

The Secretary presented a communication from the Morris County Board of Freeholders with reference to the condition of State Highway Route 5 through Madison and Chatham, in which communication the County Board asked relief from the State Highway Commission in the improvement of the pavement between the trolley tracks of the Morris County Traction Company. State Highway Engineer Sloan advised the Commission that there is involved in the reconstruction of the trolley track area, the placing of the tracks to grade, which would involve considerable expense unless the trolley company was willing to do the work. Commissioner Kidde stated that he believed that, in view of the stand taken on Speedwell Avenue, the State Highway Commission should take the same attitude in Madison and Chatham, when funds are available. Commissioner Jelin moved that the same proposition as made on Speedwell Avenue be made for Madison and Chatham; namely, that the State will share 60% if the County and municipality will share the remaining 40%, this to be done when State money is available. This was seconded by Mr. Kidde and adopted.

Hearing-Texas Company

The Secretary informed the Commission that Mr. R. R. Barrett, representative of the Texas Company, together with Mr. Gartland, District Sales Manager, were present and desired a hearing. On motion duly seconded, a hearing was granted. Mr. Barrett informed the Commission that this hearing was requested in order to bring to the attention of the State Highway Commission the method of surface treating gravel road which has been very successfully applied on Long Island. He called attention to the fact that the State Highway Commission intended to advertise for the use of material, which is known as Texas #55, and his company was very desirous of making satisfactory test on New Jersey roads with this material, in order to determine just what may be accomplished with the gravels in this State. He informed the Commission that this particular oil treatment has been developed by his company for the past six years and has been used on Long Island highways very successfully since that time. He also called attention to the fact that the Counties of Salem and Camden had used his material with a great amount of success. He invited the Commission to inspect the work done on Long Island with a view to assuring themselves that the result is entirely satisfactory. He explained that the method employed was to scrape the gravel roads bare to the hard material, then to apply two or three applications of the asphaltic oil #55 and drag the loose gravel into the surface, thus forming a mastic top layer upon the gravel which, after two or three years' application, almost assumes the proportions of a bituminous top. He requested that the Commission point out a particular section of roadway upon which his material could be given a fair chance because it was not the purpose of the Texas Company to place something upon New Jersey roads which would not give thorough satisfaction. State Highway Engineer Sloan informed the Commission that he would like to try an experiment of this particular type of surface on the road between the bridges in Ocean County, on which road the residents of Ocean City had requested the State to place a permanent pavement. Mr. Barrett advised the Commission that in view of the delivery of materials, it prefers the designation of some main artery of travel for a continuous stretch of a number of miles for this work. Commissioner Jelin suggested that a fair opportunity might be given if the gravel portions of the Pennsgrove-Atlantic City route were placed under experimental treatment by the Texas Company. After further discussion, Commissioner Kidde moved that the State Highway Engineer be requested to prepare estimates of providing adequate maintenance on the gravel sections of the Pennsgrove-Atlantic City road, and the Ocean City Bridge Road with Texas #55, and that the same be presented at the next meeting with a complete history from the Texas Company as to what guarantee they will make covering the use of their material in this particular location. This was seconded by Mr. Jelin and adopted.

Request for Aid-Camden County

The Secretary reported to the Commission that Mr. J. J. Albertson, County Engineer of Camden County, was present and desired a hearing at this time. On motion duly seconded, a hearing was granted. Mr. Albertson appeared and advised that the County of Camden was very much interested in the permanent improvement of an extension of Kings Highway, which runs between Moorestown in Burlington County and

Haddonfield in Camden County. He advised that the total length of this project is just over two miles, and the section in Camden County will cost $32,000.00. He further advised the Commission that Camden County would not undertake this work unless the County of Burlington would complete its section of this road. Upon inquiry Mr. Albertson stated that the County would be willing to share 60% of the cost of this work, if State Aid was granted by the State, in the event that Burlington County will proceed with the completion of this improvement. Mr. Albertson also brought before the Commission the matter of sidewalks upon the White Horse Pike through the Town of Magnolia. He informed the Commission that at the last session of the Legislature a bill was passed giving the State Highway Commission the right to provide sidewalk space upon highways. He suggested that the State Highway Commission move the various properties back from the line at a small cost in order that proper sidewalk space might be provided. State Highway Engineer Sloan informed the Commission that the width of pavement on this particular location was in dispute, and one of the cases had been turned over to the Attorney General, in order to ascertain by test case whether the properties as now located are not encroachments upon the right of way of the highway, and if it is proven that such is the case, then the property owners must move the property back off the right of way at their own expense. Mr. Albertson urged the Commission to clear the matter up as soon as possible in view of its bearing upon other improvements in Camden County where the width of the roadway was not actually determined. Mr. Albertson also called the attention of the Commission to the fact of the reimbursement due to Camden County for work done on State Highway projects. He presented to the Commission correspondence received from former State Highway Engineer Wasser, purporting to give to Camden County the cost of detour repairs while sections of Route 3 were under construction. The Secretary pointed out to the Commission that subsequent to this letter the Commission had taken action whereby the County of Camden was given State Aid to the extent of the improvement of Marlton Pike in lieu of any charge which might be made for interest or detour repairs or Camden County reimbursement work. Mr. Albertson informed the Commission that the County had expended $52,000.00 upon its detour work and desires assistance from the State in the payment of this account. Mr. Jelin inquired whether the County had received its payment on the Marlton Pike and was advised in the affirmative. He then stated that it appeared to him that there was some understanding between the County of Camden and the State Highway Commission, whereby this amount was paid to the County; otherwise the State Highway Commission would have acted as in other counties where the maintenance work was entirely paid for without granting any additional aid to the County, and he moved that the matter be taken under advisement at this time. This was seconded by Mr. Kidde and adopted.

M.V. Aid - Camden County Repairs

While Mr. Albertson was present, State Highway Engineer Sloan presented the matter of an extra work order for the extension of the improvement in the Haddonfield-Coffin's Corner Road, Camden County, under the arrangements made in the original contract. Mr. Albertson informed the Commission that the prices obtaining on the original contract were so favorable to the County that the County desired to take advantage of the same in this improvement. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission approved the extra work order and supplemental agreement for the extension of Haddonfield-Coffin's Corner Road in Camden County to Coffin's Corner, work to be done from the Motor Vehicle Aid account.

Route 5, Madison, Main Street

The Secretary informed the Commission that Mr. Pilch, Attorney for the Town of Madison was present and desired a hearing. On motion duly seconded, a hearing was granted. Mr. Pilch appeared and advised that he came upon resolution of the Borough authorities of Madison to lay before the State Highway Commission the conditions obtaining on Main Street, where the trolley track area is in very poor condition and dangerous to the traveling public. The Commission informed Mr. Pilch that action had been taken earlier in the meeting in response to a communication from the Morris County Board of Freeholders to the effect that the State would be willing, when funds become available, to share 60% in the cost of the improvement of the trolley track area in both Madison and Chatham, if the county and municipalities would be willing to provide the remaining 40%. Mr. Pilch advised that he felt that this was a very fair proposal for the construction work and he would communicate this information to his Borough. He urged, however, that some measure be taken whereby the existing holes in the pavement could be filled with some materials in order to prevent serious accidents. He stated that the Borough was ready to do this work, but he had advised them against this procedure in view of the fact that the roadway is under the control of the State Highway Department. On motion by Mr. Stewart, seconded by Mr. Jelin, the State Highway Commission directed that the State Highway Engineer arrange to fill the most dangerous holes in the trolley track area in Madison and Chatham, in order to protect the traveling public as far as possible.

Hackensack River Bridge

State Highway Engineer Sloan called attention to the fact that the War Department permit for the temporary Hackensack River Bridge will end in 1925, and some provision should be made for carrying traffic over the old Hackensack River Bridge, by the replacing of the draw span, and he recommended to the Commission that provision be made for the reconstruction of the draw bridge on the Hackensack River Bridge as soon as possible. Commissioner Jelin moved that the State Highway Engineer be authorized to proceed with plans based on the repairing and replacing the draw span on the Hackensack River Bridge, and that the War Department be advised of the preparation of such plans in order that an extension might be secured of temporary permit for the existing bridge over the Hackensack River. State Highway Engineer Sloan estimated that the cost of the reconstruction of the Hackensack River Bridge would be approximately $450,000.00, which could be considered as part of the Advisory Board project in the Jersey City area.

4.

Attorney General-Conference

The Secretary informed the Commission that arrangements had been made for a conference with the Attorney General of the State, to be held at 2:30 P.M.

Mr. Kidde moved that a recess be taken for lunch in order that this conference might be held with the Attorney General at the proper time. This was seconded by Mr. Jelin and adopted.

The Commissioners reconvened at the office of the Attorney General, State House, and went into conference on the matters of the Advisory Board projects. Following this conference, the Commission reconvened at the offices of the Commission, Broad Street Bank Building at 3:30 P.M. for the continuation of the regular business.

Proposed New State Highway Route

The Secretary presented a communication from Mr. Millard Sampson of Winslow, calling attention to the advantages of the Old Stage Coach Road as a State Highway Route in South Jersey. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission directed that the communication of Mr. Sampson be acknowledged with the advice that the State Highway Commission is considering the taking over of the Westville-Millville Road and the Pennsgrove-Atlantic City Road as part of the State Highway System, after public hearing is held.

Advisory Board-Jersey City

Commissioner Kidde called the attention of the Commissioners to the presence of Mr. T. J. Wasser, former State Highway Engineer, and he suggested that Mr. Wasser be invited to be present when the Advisory Board minutes are taken up with the City authorities of Jersey City and the County Freeholders of Hudson County. Mr. Wasser expressed his pleasure in serving the State Highway Commission in any capacity in connection with the Advisory Board Routes. Commissioner Kidde moved that arrangements be made by Commissioner Jelin for a conference with the City Commissioners of Jersey City on the matter of Advisory Board projects in Jersey City. This was duly seconded and adopted.

American Association of State Highway Officials

The Secretary presented a communication from Mr. Charles A. Mead, Chief Engineer of Bridges and Grade Crossings of the Public Utility Commission, forwarding a copy of standard specifications for concrete highway bridges as prepared by the Sub-Committee on Bridges and Structures of the American Association of State Highway Officials.

On motion by Mr. Jelin, seconded by Mr. Kidde, the specification on bridges was ordered referred to the State Highway Engineer.

The Schedule of Business was next taken up for consideration, item by item, as follows:

Route 10, Section 2-A,
Broad Avenue, Ridgefield

State Highway Engineer Sloan made a report to the Commission that plans and specifications for Route 10, Section 2-A, Broad Avenue, Ridgefield, Bergen County, were approved and advertisement had been placed. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission unanimously ratified, approved and confirmed the action of the State Highway Engineer in making said approval and placing advertisement.

Route 16, Section 7,
Bayard Lane, Princeton

State Highway Engineer Sloan reported to the Commission the approval of plans and specifications for Route 16, Section 7, Bayard Lane, Princeton, and that advertisement had been placed. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission ratified, confirmed and approved the action of the State Highway Engineer.

Route 4, Sections 23 and 24.

State Highway Engineer Sloan reported the completion of plans and specifications for the construction of Route 4, Sections 23 and 24, between Toms River and Lakewood, and that the same were approved by him and ready for advertisement. Commissioner Kidde moved that these plans be referred to the State Highway Engineer in order that a proper contract might be negotiated with the Department of Institutions and Agencies for the construction of these sections of Route 4 with Inmate Labor. This was seconded by Mr. Jelin and adopted.

Calyx Core Drill Purchase.

On recommendation of the State Highway Engineer, Commissioner Jelin moved the approval of purchase of one Calyx Core Drill outfit at an estimated cost of $950.00. This was seconded by Mr. Kidde and adopted.

Route 4, Section 21,
Laurelton-Point Pleasant.

State Highway Engineer Sloan reported the completion of Route 4, Section 21, Point Pleasant-Laurelton, and that same was now ready for inspection and acceptance. On motion by Mr. Kidde, duly seconded, this section of road was referred to Commissioner Jelin for final inspection and acceptance.

Route 9, Section 11, Lincoln Avenue

State Highway Engineer Sloan reported the receipt of a communication from Judge Coddington of Plainfield, New Jersey, advising that the Mayor or Council of Middlesex Borough had informed him that the Borough is not in a position to assume any part of the cost of the construction of Route 9, Section 11, Lincoln Avenue, Plainfield, between Conover's Corner and Gallagher's Corner, and he recommended to the Commission that authority be granted for the paving of a strip 20 feet in width, leaving the trolley tracks on the side of the roadway as now located in this particular location. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission approved the recommendation of the State Highway Engineer and authorized construction of Route 9, Section 11, Lincoln Avenue, Plainfield, by the placing of a 20 foot pavement along the trolley tracks on this roadway.

Route 3, Absecon-Egg Harbor

State Highway Engineer Sloan reported to the Commission that Route 3 between Absecon and Egg Harbor had not yet been taken over officially as part of the State Highway System, and he recommended the adoption of the following resolution:

WHEREAS, under the provision of Article 3, Chapter 14, Laws of 1917, the State Highway Commission, may, by resolution, take over as a State Highway, any routes, route or part thereof, of those highways designated by Act to be taken over as State Highways, and

WHEREAS, the said State Highway Commission has maintained the following described road as a part of State Highway Route 3 since August 31st, 1921, and

WHEREAS, no resolution has been passed by the State Highway Commission authorizing the taking over of said road.

NOW, THEREFORE, BE IT RESOLVED, that that portion of Route 3 known as the White Horse Pike and located in the City of Absecon and Galloway Township to the Boundary Line between Galloway Township and Egg Harbor City, more particularly described in the records on file, be and the same is hereby taken over as part of State Highway Route 3, according to the statute of such cases made and provided, and

BE IT FURTHER RESOLVED, that the property authorities of Atlantic County be notified by the Secretary of this Commission of this action and that from and after the date hereof, the said road will constitute a part of State Highway Route 3, and the State Highway Commission will be responsible for the improvement and maintenance of the same, and

BE IT FURTHER RESOLVED, that the County of Atlantic be requested to file with the State Highway Department, within thirty days of the date hereof, any agreements or copies of franchises they may have with any public utilities or any other company, firm, individual, or corporation, effecting the construction, maintenance or use of the above described road.

Route 4, in Brielle.

State Highway Engineer Sloan recommended to the Commission the adoption of a resolution for the taking over of Route 4, located in the Borough of Brielle, Monmouth County, in accordance with provisions of Chapter 14, Laws of 1917. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission adopted the following resolution:

WHEREAS, under the provisions of Article 3, Chapter 14, Laws of 1917, the State Highway Commission, may, by resolution, take over as a State Highway, any routes, route or part thereof, of those highways designated by the Act to be taken over as State Highways.

NOW, THEREFORE, BE IT RESOLVED, that the following described road or parts thereof be and the same are hereby taken over as part of State Highway Route 4, according to the Statute in such case, made and provided, viz:

All that certain portion of Higgins Avenue lying between the northwesterly line of Riverview Avenue, and the northwesterly line of Ashley Avenue, located in the Borough of Brielle, Monmouth County.

RESOLVED FURTHER, that the proper authorities of the Borough of Brielle be notified by the Secretary of this Commission of such action and that from and after the date hereof the said road will constitute part of State Highway Route 4, and that this Commission will be responsible for the improvement and maintenance of the road described above.

BE IT FURTHER RESOLVED, that the Borough of Brielle be requested to file with the State Highway Department within thirty (30) days of the date hereof, any agreement or copies of Franchises they may have with any public utilities or any other company, firm, individual or corporation, effecting the construction, maintenance or use of the above described road.

Passaic River Bridge, Route 1, Extension.

State Highway Engineer Sloan presented to the Commission a copy of a communication forwarded by him to the Frederick Snare Corporation, contractors on the repairs of the Passaic River Bridge, Lincoln Highway Extension, Route 1, in which he advised the contractors to the effect that it will be necessary to replace granite bridge seat on this pier, which was found to be cracked upon the removal of the lower track. He also presented to the Commission an estimate of cost of repairing these granite cap stones, which involved an expenditure of approximately $30,000.00 and he recommended to the Commission that approval be given to the award of this work to the Frederick Snare Corporation in addition to their contract now under way for the repair of this bridge. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission authorized the State Highway Engineer to present a request to the State Highway Commission for permission to increase the amount of expenditure on the Passaic River Bridge repairs to an amount which will permit the extra work of granite replacement on the Passaic River Bridge, and he further moved that the contract arrangements as outlined for this work be ratified, confirmed and approved. This was seconded by Mr. Jelin and adopted.

Warren County Maintenance Materials

On recommendation of the State Highway Engineer, Commissioner Kidde moved the approval of the award of maintenance material contracts for Warren County for 1924. This was seconded by Mr. Jelin and adopted.

Camden County Township Aid Transfer

On recommendation of the State Highway Engineer, Commissioner Kidde moved the approval of the transfer of $2500.00 from Gibbsboro-Kresson Road in Voorhees Township, Camden County Township Aid, to the Old Burnt Mill Road, Voorhees Township, Camden County, Township Aid. This was seconded by Mr. Jelin and adopted.

Employments

State Highway Engineer Sloan presented to the Commission for approval, the following list of employments as made by him since the last meeting of the Commission.

March 21, 1924	Emily B. Janecek,	Clk. Steno.	$115.00 mo.
" 13 "	Wm. K. Hunter,	Pro. Insp.	155.00
" 19 "	Andrew Zahn,	Cost Clk.	90.00
" 2 "	Patrick Regan,	Gar. Asst.	.45 hr.

On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission approved the employments as made by the State Highway Engineer since the last meeting.

Salem County Repairs

On recommendation of the State Highway Engineer, Commissioner Kidde moved the approval of specifications for 208,000 gallons of S.C.O. on the Motor Vehicle Aid jobs in Salem County, as follows:

Elmer-Centerton, Ft.Elfsburg, Hancock's Br., Pedricktown-Woodstown, Pointers-Auburn, 4th Section, and Pole Tavern-Monroeville.

This was seconded by Mr. Jelin and adopted.

Salem County Repairs

On recommendation of the State Highway Engineer, Commissioner Kidde moved the approval of plans and specifications for surface treatment on the Pennsgrove Road, Section 5, Salem County, Motor Vehicle Aid work. This was seconded by Mr. Jelin and adopted.

Bridgeton-Port Norris Road,
Section 2, Cumberland County.

On recommendation of the State Highway Engineer, Commissioner Kidde moved approval of plans and specifications for Bridgeton-Port Norris Road, Section 2, Cumberland County Federal Aid Project #61. This was seconded by Mr. Jelin and adopted.

Sussex County Maintenance

On recommendation of the State Highway Engineer, Commissioner Kidde moved approval of payment to Sussex County of the sum of $30,000.00, this to include an allotment of $17,000.00 on the final statement of High Street, Newton, Sussex County, and $13,000.00 for general maintenance of roads on the Motor Vehicle Schedule for 1923. This was seconded by Mr. Jelin and adopted.

Salem County-Motor Vehicle Aid.

On recommendation of the State Highway Engineer, Commissioner Kidde moved the approval of specifications for a penetration macadam pavement on a portion of the Pedricktown-Woodstown Road, Hancock's Bridge Road, Section 1, and Pennsgrove-Pedricktown, Section

2, Salem County, Motor Vehicle Aid work. This was seconded by Mr. Jelin and adopted.

On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission meeting adjourned at 4:30 P.M., to meet in regular session again Tuesday, March 25th, at 10:30 A.M.

Respectfully submitted,

A. LEE GROVER,

Secretary.

MINUTES OF MEETING- March 25th, 1924.

A regular meeting of the State Highway Commission was held in the meeting room, Broad Street Bank Building, Trenton, on Tuesday, March 25th, 1924. The meeting was called to order by Chairman Scott at 10:30 A.M.

Present: General H. L. Scott, Chairman, and Messrs.
Percy H. Stewart, Walter Kidde and Abraham Jelin.

Hunterdon County Hearing

The Secretary informed the Commission that a number of hearings had been requested for this meeting, the first of which was from Hunterdon County, Board of Freeholders. On motion, duly seconded, the hearing was granted. There appeared a delegation, headed by Judge Large, County Counsel. Judge Large addressed the Commission and expressed the thanks of the Hunterdon County Board of Freeholders for the assistance given by the State Highway Commission in securing the Governor's approval to Senate Bill #4, at the last session of the Legislature, extending a State Highway Route from Trenton to Buttzville, through Hunterdon County. He stated that the County of Hunterdon was very anxious to have the State Highway Commission take favorable action, at the earliest possible moment, in order to have this road made officially a part of the State Highway System, even though the County was aware of the fact that the State Highway Commission had stated there would be no funds available for some time for the proper maintenance of this route. Chairman Scott informed Judge Large that the State Highway Commission felt very strongly that this was an important part of a comprehensive system of State highways, but until the funds were available for its maintenance, the road could not be taken over.

Judge Large also called attention to the fact that his County had not yet heard from the State Highway Commission as to what it proposed to contribute to Hunterdon County in the way of extra Motor Vehicle allotments for the maintenance or reconstruction of its county roads. He informed the Commission that the County had appropriated an amount equal to the State's share from its taxable income and he presented a list showing the needs of Hunterdon County in this respect. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission directed that the schedule of road expenditures, as presented by Judge Large, be referred to the State Highway Engineer for investigation and report. Chairman Scott informed Judge Large that Hunterdon County would be notified when the Commission had properly digested the report presented.

In connection with this hearing, the Secretary informed the Commission that a petition had been received from R. A. Conover of Pittstown, sent with numerous names, requesting that the Trenton to Buttzville Road be taken over as soon as possible. On motion by Mr. Jelin, seconded by Mr. Kidde, the petition was ordered received and the petitioners advised that the State Highway Commission cannot take this road over at an early date on account of the fact that no funds are available.

Union County Hearing

The Secretary informed the Commission that a delegation from the County of Union and the City of Plainfield was present for a hearing. On motion, duly seconded, a hearing was granted. There appeared County Engineer J. L. Bauer and City Engineer A. W. Vars, together with Freeholder Hatfield of Union County. Mr. Bauer explained to the Commission the road improvement work being accomplished in Union County and advised that the County and City were interested in the improvement of the Scotch Plains Road, a distance of 2½ miles, which it was contemplated to improve from curb to curb with a concrete base and a sheet asphalt top. Mr. Vars informed the Commission that this matter was presented at a former meeting by himself. Both Commissioners Jelin and Stewart voiced their opinion that this improvement was a very important one in Union County. Mr. Stewart inquired whether it would not be a hindrance to the county road program to have work on State Highway Route 9 between Westfield and Plainfield under way at the same time the Scotch Plains Road would be under improvement. Mr. Bauer stated that proper detours could be established for traffic even though both projects were under way at one time. State Highway Engineer Sloan informed the Commission and the visiting delegation that in addition to the financial problem, there was a legal difficulty involved if the amount of funds could be apportioned, in view of the fact that the State funds could not be applied within a municipality with a population of 16,000 in existance. County Engineer Bauer suggested that in the event the State Highway Department could not apportion funds directly to this work, they may desire to give Union County a special allotment in order that the county might release funds from some other project toward this improvement. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission directed that the application for aid on this work be placed on the preferential list for consideration in the very near future.

George Street, New Brunswick

The Secretary informed the Commission that a delegation from New Brunswick was present and desired a hearing at this time. On motion, duly seconded, a hearing was granted. There appeared before the Commission a delegation headed by Mr. Thomas H. Hagerty, City Attorney of New Brunswick, and City Commissioner Houghton. Mr. Hagerty addressed the Commission and stated that the City was now ready to proceed with the improvement of George Street, New Brunswick, which formed a connecting link for State Highway Route 1. He advised that the Commission at a previous meeting sometime ago, had allocated one-half the cost of this improvement. There was a difficulty, however, with the Public Service Corporation which occupied a double track area and two feet outside thereof in the center of this roadway wherein the company claims that it cannot afford the paving of this section of road at this time, but would be willing to do the work if the same could be financed by the City or the State over a period of a number of years. The estimated cost given by City Engineer Atkinson for the work between the trolley tracks, was placed at $39,697.00 if new granite block was used, or $32,707.00 if reclipped granite block was used. Commissioner Stewart advised the delegation that the State Highway Commission would not consider any financing over a period of three years. Commissioner Jelin inquired of the delegation whether, in the event the State Highway Department would finance the improvement over a period of three years, the City of New Brunswick would be willing to guarantee to the State the bond given by the Public Service Corporation. After further discussion, the State Highway Commission, on motion by Mr. Jelin, seconded by Mr. Kidde, directed that the matter be taken under advisement at this time, the City of New Brunswick to determine whether the Public Service Corp. is willing to accept a three year reimbursement plan and the City to guarantee the Bond of the Public Service Corporation.

Cedar Avenue, Long Branch

The Secretary informed the Commission that a hearing had been requested by the Board of Commissioners of Long Branch and this delegation was now present. On motion, duly seconded, a hearing was granted. There appeared a delegation from Long Branch, together with Senator William A. Stevens, County Counsel. Senator Stevens informed the Commission that the delegation appeared to request aid for Long Branch for the paving of Cedar Avenue extending from Route 4 at Shadow Lawn to the Ocean Boulevard. Senator Stevens informed the Commission that prior to the meeting he had taken the matter up with Secretary Grover in order to determine whether there was any legal way in which the City of Long Branch could receive aid from the State in view of the fact that it was pointed out that the State could not aid municipalities with a population of more than 16,000. He advised that the estimated cost of the improvement would be $100,000.00. Commissioner Kidde informed the delegation that the resources of the Department for this particular work were very limited, even in the event that enabling legislation could be found, and he advised that a plan might be worked out whereby the county and municipality would contribute a large proportion to the work and the State could give the County of Monmouth some assistance toward this end, and he moved that the matter be referred to the State Highway Engineer for further report and to be taken up with the Attorney General for an opinion as to whether the State can legally aid in this work. This was seconded by Mr. Jelin and adopted.

Amboy Bridge-Conference

The Secretary informed the Commission that Judge William A. Newcorn who was Special Counsel on the matter of the Amboy Bridge, was present for a conference with the Commission. Chairman Scott declared the meeting in recess until after the conference was held with Judge Newcorn.

Request for Aid-Burlington County

The Commission resumed its meeting after this conference and the Secretary informed them that a delegation from Burlington County was present with reference to State Aid. On motion, duly seconded, a hearing was granted. There appeared Director Stout of the Board of Freeholders, County Engineer Smith and Mr. McFarland, County Supervisor of Roads. Mr. Stout addressed the Commission and urged State Aid on the Completion of the King's Highway in Burlington County from Moorestown to Camden County Line. He advised that this was the Burlington County section of roadway concerning which County Engineer Albertson had addressed the meeting at its last session. The total length of this road was given as two miles, to cost about $90,000.00. Mr. Stout also asked aid from the Commission in the repair and maintenance of the road between Pemberton and Brown's Mills, and also in the reconstruction of the Moorestown-Riverton Road. He advised the Commission that the county was willing to undertake the improvement of the Moorestown-Riverton Road under the provisions of Chapter 164 of the Laws of 1921. He suggested that if the State Highway Commission could see its way clear to allow Burlington County to use the sum of $20,000.00, which is owing to the State on account of the work of the Mile Hollow Road, the County would take over the road from Brown's Mills to the Burlington County Line and properly maintain it. He also requested that the State share 40% of the cost of the Kings' Highway and the County would arrange for the balance of the funds in order to permit the rebuilding of this road. On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission directed that the matter be taken under advisement at this time.

The Chairman informed the Commissioners that the Governor had accepted an invitation from the Commission to luncheon at one o'clock and it was approaching this hour. On motion by Mr. Jelin, seconded by Mr. Kidde, the Commission recessed for luncheon, to meet again at 3:00 P.M.

The meeting was resumed at 3:00 P.M. as agreed.

Route 4, Laurelton-Point Pleasant

Commissioner Jelin reported that he had inspected the completed work on Route 4, Laurelton to Point Pleasant, and he would recommend its acceptance by the State even though he had noticed that there was a slight scale on the surface of the road. He advised that he was satisfied that the work was satisfactorily completed. On motion by Mr. Stewart, seconded by Mr. Jelin, the State Highway Commission accepted the completed work on Route 4, Laurelton-Pt. Pleasant, and authorized final payment after final papers had been approved by the State Highway Engineer.

Attorney General's Opinion-
Route 4-Detour, Woodbridge Twp.

The Secretary presented a communication received from the Attorney General's Department advising that the State Highway Commission would not be justified in deducting $7,500.00, the cost of repairing a detour in Woodbridge Township, from the allotment of $75,000.00 given to the City of Perth Amboy as an aid toward the construction of a connecting link on Route 4 through Perth Amboy. On motion by Mr. Jelin, seconded by Mr. Stewart, the opinion of the Attorney General was ordered received and spread in full upon the minutes and that thanks be forwarded to the Attorney General of the State for his courtesy in the matter.

Trenton, N.J., March 17, 1924.

Mr. A. Lee Grover, Secretary,
State Highway Commission,
Broad Street Bank Building,
Trenton, New Jersey.

In re payment of cost of
Repairing Detour, Route 4,
through Perth Amboy.

Dear Sir:-

Replying to your letter of February, which has awaited reply until we could get some information concerning the contract between the Highway Commission and the City of Perth Amboy in the above matter, permit me to say that I am of the opinion that the State Highway Commission would not be justified in deducting the $7,500.00, the cost of the repairs of the detour, from the allotment of $75,000.00 made to the City of Perth Amboy as an aid toward the construction of a connecting link on State Highway Route 4, passing through Perth Amboy.

Unquestionably the City of Perth Amboy has entered into its contracts and made the appropriations, &c necessary therefor, upon the proposition that it was to receive $75,000.00 from the State Highway Commission. If this be true, then if the deduction were made, it would mean that the City of Perth Amboy would be obliged to make a further appropriation, which might jeopardize the contract already made.

Very truly yours,

H. R. COULOMB,

Assistant Attorney General.

Approved:

Edward L. Katzenbach,

Attorney General.

On motion by Mr. Jelin, seconded by Mr. Stewart, further consideration of the matter of this detour was deferred.

Attorney General's Opinion- Township Aid

The Secretary presented an opinion from the Attorney General advising that the State Highway Commission cannot approve applications on Township Aid matters in anticipation of funds becoming available on July 1st. Assistant State Highway Engineer Reed raised the question as to whether, in view of this opinion, the Townships had the right to raise the entire funds for the work even if the State had authorized the allotment of State moneys. On motion by Mr. Jelin, seconded by Mr. Stewart, the opinion was referred to the Secretary with the request that he advise further with the Attorney General's Department on the matter of the requirement concerning the raising of the entire funds by the Township.

Attorney General's Opinion, Route 5, Section 11

The Secretary presented an opinion received from the Attorney General's Department with additional reference to the purchase of right of way from the P. R. R. on Route 5, Section 11, Delaware-Belvidere, in which opinion it was brought out that there was no objection to the State Highway Commission purchasing the land in question, or if it were in actual use for railroad purposes, to condemn it and thus acquire title. State Highway Engineer Sloan informed the Commission that negotiations were under way with the railroad company whereby a price could be arrived at for the cost of a toewall which would have to be constructed and which could be paid to the railroad company as the cost of the land taken. He stated that he did not believe the State could condemn this property in view of the fact that the railroad company could claim that it was for railroad purposes. Commissioner Jelin suggested that the matter be negotiated with the railroad company on the basis of entering into an agreement, if possible, whereby the State would acquire the property for the consideration of $1.00, and a toe wall could be placed when the same was needed by the railroad company. On motion by Mr. Stewart, seconded by Mr. Jelin, the matter was referred back to the State Highway Engineer for further conference and negotiation with the Railroad Company.

Request for Aid - Laurel Springs, Camden County

The Secretary presented a communication from Senator A. S. Woodruff of Camden County, in which he advised that he communicated with the Borough of Laurel Springs and they desired that the State Highway Commission should bear some portion of the expense of curbing and gutters, due to the fact that change in the grading on the White Horse Pike makes this necessary. State Highway Engineer Sloan informed the Commission that he had personally investigated this matter and the placing of curbs and gutters in Laurel Springs was entirely a local matter. On motion by Mr. Jelin, seconded by Mr. Stewart, the Communication was ordered acknowledged and filed.

Crescent Boulevard, Camden County

The Secretary presented a communication from Senator Woodruff of Camden County, requesting that consideration be given the relocation of the Crescent Boulevard through Merchantville and Pensauken when the same is constructed by the State Highway Commission. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission directed that the communication be acknowledged and that the Senator be advised that every angle existing in the situation in Camden and the surrounding territory will be thoroughly gone into at the time hearings are held at that location.

Absecon Boulevard, Atlantic Co.

The Secretary presented clippings from the Atlantic City Daily Press, as directed presented by the Chairman, in which it was stated that the County of Atlantic would look to the State Highway Commission for aid in the construction of the Absecon Boulevard, in view of the fact that they had agreed to change the type of construction to a competitive type of highway, namely, sheet asphalt with concrete base. State Highway Engineer Sloan stated that he had also received a communication from County Engineer Nelson of Atlantic County, in which he informed the Commission that the County of Atlantic stood ready to have the specification in any manner which would secure the approval of the State Highway Commission. On motion by Mr. Jelin, seconded by Mr. Stewart, the matter of aid to Atlantic County was ordered laid over at this time.

Good Roads Association Convention

The Secretary presented a communication received by Chairman Scott, from James A. French, State Highway Engineer of New Mexico, inviting the State Highway Commission to attend the United States Good Roads Conference at Albuquerque, New Mexico. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission directed that the invitation be acknowledged with the advice that Chairman Scott will represent the State Highway Commission as a delegate.

Township Aid-Monmouth County

The Secretary presented a communication from R. V. Kuser, addressed to Chairman Scott, advising that the Township Committee of Wall Township, had agreed to pay one-quarter of the cost of the Turnpike, in the event the State Highway Commission would grant aid in the amount of three-quarters of the cost, the distance being three miles. On motion by Mr. Stewart, seconded by Mr. Jelin, the matter was ordered held over for later consideration.

Commendation-
Route 7, Corlies Avenue

The Secretary presented a communication from the Board of Commissioners of Bradley Beach, extending the commendation of the Board of Commissioners of that Borough to the State Highway Commission for its action in the improvement of Corlies Avenue on Route 7. On motion by Mr. Jelin, seconded by Mr. Stewart, the communication was ordered received and placed on file.

Invitation-American Road Builders'

The Secretary presented a communication from the American Road Builders' Association, inviting the State Highway Commission and members of the Department to attend an open air exhibit and so-called "Shirt Sleeve Road Show" to be conducted in North Carolina, June 4th, 5th, 6th and 7th. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission directed that the communication be acknowledged with the advice that if the State Highway Commission can send any representatives at the time of the Show, they will be glad to do so.

Route No. 18 and Route No. 20.

The Secretary informed the Commission that arrangements had been made for a public hearing in the matter of taking over of the Westville-Millville and the Atlantic City-Pennsgrove Roads, to be held at Atlantic City on Saturday, April 12th at 10:30 A.M., and he informed the Commission that reservations would be made.

Experimental Roads-Maint. Material

State Highway Engineer Sloan presented to the Commission a report on the matter of the use of Texas #55 on sections of State Highway work for the purpose of experiment, and he was ready to report that he would recommend the application of Asphaltic Oil Type S. C. O., under which classification the Texas #55 could be obtained, for treating eight and three-tenths miles of road in Gloucester County on the Gloucester County section of the Pennsgrove-Atlantic City Route, and the road known as the Ocean City Bridge Road, which is under the control of the State Highway Commission, making a total of nine and five-tenths miles. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission authorized the treatment of gravel roads as recommended by the State Highway Engineer with Asphaltic Oil Grade S. C. O., after public hearings had been held on the matter of the taking over of the Atlantic City-Pennsgrove Route.

In connection with the above, Mr. Jelin moved that the Secretary inform the Freeholders of Cape May County and the authorities of Ocean City to the effect that the State Highway Commission, in view of their not having heard as to their decision concerning the sharing in one-half the cost of the hard surface improvement of the Ocean City Bridge Road, had determined to place asphaltic oil thereon for experimental purposes. This was seconded by Mr. Stewart and adopted.

Invitation-
Beechwood Property Owners' Assn.

The Secretary called attention of the Commission to an invitation received from the Beechwood Property Owners' Association, inviting a representative of the Commission to be present at a dinner meeting to be held at the Hotel Astor on March 29th. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission delegated Mr. Kidde as representative of the Commission on that occasion.

The Schedule of Business was next taken up item by item as follows:

Route 9, Section 12

State Highway Engineer Sloan reported having approved plans and specifications for the construction of Route 9, Section 12, Plainfield-Westfield section, and that advertisement for the same had been placed. On motion by Mr. Stewart, the State Highway Commission ratified and confirmed the action of the State Highway Engineer in approving plans and specifications for the construction of Route 9, Section 12, Plainfield-Westfield section, and ordered advertisement of the same.

Route 6, Section 13

State Highway Engineer Sloan reported having approved plans and specifications for the construction of Route 6, Section 13, from Bridgeton to Marlboro and that advertisement for the same had been placed. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission ratified and confirmed the approval given by the State Highway Engineer for the construction of Route 6, Section 13, Bridgeton to Marlboro and the placing of advertisement for the same.

Amboy Bridge-Route 4

On recommendation of the State Highway Engineer, Commissioner Jelin moved the approval of the payment of $100.00 to the Central

Railroad of New Jersey on account of encroachments of the Amboy Bridge abutment on Route 4, at the new Amboy location. This came recommended by Special Attorney William Newcorn and was seconded by Mr. Stewart and adopted.

Right of Way-Route 10, Sec. 1-C

On motion by Mr. Kidde, seconded by Mr. Jelin, the Commission approved of purchase of Parcel #5 on Route 10, Section 1-C, from W. Emerson Barger for a consideration of $300.00.

Right of Way-Route 9, Sec. 14

On recommendation of the State Highway Engineer, Commissioner Jelin moved the approval of purchase of Parcel #2 on Route 9, Section 14, County Line-North Branch section from Samuel Fineman and Wife for the consideration of $600.00. This was seconded by Mr. Stewart and adopted.

Right of Way-Route 16, Section 6-A

On recommendation of the State Highway Engineer, Commissioner Jelin moved the approval of the purchase of Parcel #12 on Route 16, Section 6-A, Blazier's Corner-VanDorn's Mills, from Mary Cavanaugh, for the consideration of $200.00. This was seconded by Mr. Stewart and adopted.

Right of Way-Route 16, Section 8

On recommendation of the State Highway Engineer, Commissioner Jelin moved the approval of the purchase of the following Parcels of property on Route 16, Section 8, Harlingen Cut-Off:

Parcel #2, from Dr. L.D.Tomkins, consideration $50.00
Parcel #4, from Hueston LaBaw and Sarah LaBaw, consideration $272.60.

This was seconded by Mr. Stewart and adopted.

Right of Way-Route 9, Section 8-A

On recommendation of the State Highway Engineer, Commissioner Jelin moved the approval of purchase of Parcel #2 on Route 9, Section 8-A, at the North Branch River Bridge, from Edwin M. Sutton and wife for the consideration of $25.00. This was seconded by Mr. Stewart and adopted.

Albany Street Bridge, Route 1

On recommendation of the State Highway Engineer, Commissioner Jelin moved the acceptance of the authorization given by the P. R. R.

to extend Route 1, Albany Street Bridge, New Brunswick, over the Raritan Canal without any further formalities. This was seconded by Mr. Stewart and adopted.

Detour-Route 4

On recommendation of the State Highway Engineer, Commissioner Jelin moved the approval of the following official detour on Route 4, Sections 23 and 24, Lakewood-Toms River section:

> "Beginning on Route 4 at Lakewood-Lakehurst Road and running thence (1) in a general southwesterly direction along the Lakewood-Lakehurst Road a distance of approximately 8.8 miles through Whitesville and White's Bridge to Lakehurst; thence (2) in a general southeasterly direction along the Lakehurst-Toms River road through Pine View a distance of approximately 7.6 miles to Route 4 at Toms River."

This was seconded by Mr. Stewart and adopted.

Somerset County-Township Aid

On recommendation of the State Highway Engineer, Commissioner Jelin moved acceptance and final patment on Clairmont-Post Kuhnhardt Road, Section 1, Bernards Township, Somerset County, Township Aid. This was seconded by Mr. Stewart and adopted.

Federal Aid-Route 5, Section 11

On recommendation of the State Highway Engineer, Commissioner Jelin moved the approval of project agreement for Federal Aid on Route 5, Section 11, Delaware-Belvidere Section. This was seconded by Mr. Stewart and adopted.

Maintenance-Mercer County Roads

On recommendation of the State Highway Engineer, Commissioner Jelin moved the approval of award of contract by Mercer County to Theodore Tobish, at his low bid of $69,504.97 for the furnishing and applying of surface dressing of tars to approximately 114 miles of roads located in various parts of Mercer County. This was seconded by Mr. Stewart and adopted.

Maintenance-Morris County Roads

On recommendation of the State Highway Engineer, Commissioner Jelin moved approval of Morris County specifications for materials and equipment to be used on road maintenance for 1924. This was seconded by Mr. Stewart and adopted.

Salem County-Township Aid

On recommendation of the State Highway Engineer, Commissioner

Jelin moved approval of Township Aid Force Account Agreement for Daretown-Woodstown Road, Upper Pittsgrove Township, Salem County, Township Aid. This was seconded by Mr. Stewart and adopted.

Gloucester County-Township Aid

On recommendation of the State Highway Engineer, Commissioner Jelin moved the approval of Township Aid Force Account Agreement for the Glassboro Road, Monroe Township, Gloucester County, Township Aid. This was seconded by Commissioner Stewart and adopted.

Ocean County-Township Aid

On recommendation of the State Highway Engineer, Commissioner Jelin moved the approval of the following Township Aid Agreements in Lakewood Township, Ocean County:

Fourteenth Street	State's Share	$ 1500.00
County Line Road	" "	4500.00
Lexington Avenue	" "	2250.00
Meadow Avenue	" "	2906.25
Clifton Avenue	" "	2250.00
John Street	" "	2156.25
Birch Street	" "	450.00

This was seconded by Mr. Stewart and adopted.

Employments

State Highway Engineer Sloan presented for ratification by the Commission, the following list of employments as made by him since the last meeting of the Commission:

April 1,	B. J. W. Culhane,	Bridge Designer	$250.00 mo.
March 24,	R. C. MacMullin,	Jr. Engineer	100.00
" 24,	John Hemsath,	Rodman	90.00
April 1,	R. J. Waugh,	Jr. Engineer	125.00
" 1,	J. S. VanNeup,	" "	125.00
" 1,	J. E. Cunningham,	" "	110.00
March 24,	T. W. Stewart,	Rodman	90.00
" 24,	E. G. Crarup,	Jr. Inspector	125.00
" 21,	Horace Eaton,	Resident Engr.	240.00

This was seconded by Mr. Stewart and adopted.

Lakeside Boulevard, Motor Vehicle Aid, Sussex County

On recommendation of the State Highway Engineer, Commissioner Jelin moved approval of plans and specifications for Lakeside Boulevard, Sussex County, Motor Vehicle Aid. This was seconded by Mr. Stewart and adopted.

Camden County-Township Aid Transfer

On recommendation of the State Highway Engineer, Commissioner Jelin moved the approval of transfer of Township Aid funds from Gibbsboro-Kresson

Road to the Haddonfield-Kresson Road, both in Voorhees Township, Camden County, in the amount of $1875.00. This was seconded by Mr. Stewart and adopted.

Request for Aid-Union County

State Highway Engineer Sloan presented a communication from the Township Engineer of Westfield, Mr. Alexander Blair, requesting State Aid for the resurfacing of East Broad Street in Westfield. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission ordered this matter laid over for later consideration with other requests of similar character.

Specifications

State Highway Engineer Sloan presented to the Commission a letter proposed to be forwarded to the contractors who are now working on State Highway contracts, advising of a change in the 1924 Specifications whereby they can dispense with the use of a roller for finishing concrete and giving contractors, having outstanding contracts, the advantage of some other method, in the same way that 1924 contractors will be benefitted. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission ratified and confirmed the communication as presented by the State Highway Engineer, and directed that the same be forwarded to all contractors now working for the State Highway Commission.

Detour-Route 10, Section 6

State Highway Engineer Sloan presented an official detour for Route 10, Section 6, Hackensack-Paterson section, and recommended approval of same. On motion by Mr. Jelin, seconded by Mr. Stewart, the following official detour for Route 10, Section 6, was ordered established:

> "Beginning at Route 10, First Street, Hackensack; thence (1) northerly on First Street about one (1) mile to Passaic Street; thence (2) northwesterly on Passaic Street, seven-tenths (.7) mile to Paramus Road, the beginning of Route 17; thence (3) northwesterly on Route 17 via Maywood, two and four-tenths (2.4) miles to Broadway at Arcola; thence (4) westerly on Broadway two and three-tenths (2.3) miles to the River Road at the easterly side of the Passaic River; thence (5) southeasterly on the River Road one and one-tenth (1.1) mile to Route 10 at the easterly end of the Market Street Bridge."

Right of Way-Route 10

On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission approved the purchase of Parcel #1, on State Highway Route 10, Section 6, from Jacob W. Wisse and Wife, for the consideration of $100.00.

On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission meeting was adjourned at 4:15 P.M., to meet in regular session again on Tuesday, April 1st, 1924, at 10:30 A. M.

Respectfully submitted,

A. LEE GROVER,

Secretary.

MINUTES OF MEETING - April 1, 1924.

A regular meeting of the State Highway Commission was held in the Commission's rooms, Broad Street Bank Building, Trenton, Tuesday, April 1st, 1924. The meeting was called to order at 10:30 A.M. by Chairman Scott.

Present:- General H. L. Scott, Chairman, and Messrs.
Thomas J. Stewart, Walter Kidde and Abraham Jelin.

Right of Way - New Amboy Bridge

The Secretary informed the Commission that Hon. William Newcorn, Special Attorney in the matter of the Amboy Bridge right of way, had been negotiating for the property of the National Fire Proofing Company. Judge Newcorn appeared before the Commission and presented a communication in which he advised that he had succeeded in securing the acceptance of the National Fire Proofing Company of an offer of $[illegible],000.00 for their property, including kilns, [illegible], etc., in the line of the right of way for the new Amboy Bridge. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission directed that Special Attorney Newcorn prepare the proper resolutions necessary to be adopted by the State Highway Commission for approval by the Commission, for the purchase of the National Fire Proofing Company's property for the sum of $[illegible],000.00. Special Attorney Newcorn also informed the Commission that hearings would be carried on at an early date in the matter of the acquisition of the W. J. Donnell Lumber Company's property, and asked whether there would be authority granted for the employment of a court stenographer to take proceedings, and he recommended the name of the official stenographer of Middlesex County, Mr. O'Brien. On motion by Mr. Jelin, seconded by Mr. Stewart the State Highway Commission authorized the employment of Mr. O'Brien as Special Court Stenographer in the W. J. Donnell Lumber Company hearings to be held by Special Attorney William Newcorn. Mr. Newcorn informed the Commission that he would arrange for these hearings to be held, if possible, in the Court House, at New Brunswick.

Experimental Roads

The Secretary informed the Commission that Mr. H. A. [illegible] of New York City, was present and desired a hearing, although he had not made any formal request for the same. On motion duly seconded, a hearing was granted. Mr. Terry appeared and informed the Commission of a preparation in which he was interested by the name of "Waxoil" which was a by-product of the wax industry, it being an oil with a paraffine base and when put upon the road results in a mucky layer on the surface which hardens and gives firmness to the surface of gravel roads. He expressed a desire to do an experimental stretch of this work in New Jersey. State Highway Engineer Sloan inquired whether Mr. Terry was prepared to make this test without cost to the State, and he advised that he would not be able to do this, but would rather expect the State to purchase the material at the regular price. Chairman Scott then requested that Mr. Terry submit a detailed report in writing as to "Waxoil" in order that the same might have the proper attention of the Engineering Department.

Route 9, Section 13 ✓

The Secretary informed the Commission that Mr. Chapman of the firm of J. F. Chapman & Son, was present to ascertain whether the State Highway Commission would award the contract on which his firm was low bidder. State Highway Engineer Sloan presented to the Commission the following list of bids received on Route 9, Section 13, White House-County Line Section, and recommended that the contract be awarded to J. F. Chapman & Son at their's, the lowest bid,of 97% of the Engineer's estimated value of cost.

J. F. Chapman & Son........................	97. %
Public Development & Contracting Co....	99.4 %
Public Service Production Co............	102.95%
C. H. Winans Co............................	103.59%
John [illegible]...............................	109. %
F. [illegible] Gibbs Construction Co.............	121.1[illegible]

Mr. Chapman was asked whether his firm was financially capable of prosecuting the work and whether it could be done within the time specified. He informed the Commission that with the experience gained by last year's work in the same vicinity, he felt that the work of his company could be more efficient and since their finances were in better shape than last year, this would also assist them in completing the work on time. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission unanimously adopted the following resolution:

RESOLVED, that the contract for the construction of Route 9, Section 3, White House-County Line Section, be and the same is hereby awarded to J. F. Chapman & Son, at their's the lowest bid amounting to 97% of the Engineer's estimated units of cost, or $179,642.40, and

BE IT FURTHER RESOLVED, that the Chairman is authorized to sign the necessary contracts after approval by the State Highway Engineer.

Route 9, Section 14.

State Highway Engineer Sloan reported to the Commission the receipt of bids as follows for the construction of Route 9, Section 14, County Line-North Branch Section, and recommended that this contract be awarded to J. F. Chapman & Son, the low bidders at 98% of the Engineer's estimated units of cost.

J. F. Chapman & Son	98. %
Public Development & Cont.Co.	99.3%
Freehold Construction Co.	103.5%
John Dorer	106. %
C. H. Winans	108.8%

On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission unanimously adopted the following resolution:

RESOLVED, that the contract for the construction of Route 9, Section 14, County Line-North Branch Section, be and the same is hereby awarded to J. F. Chapman & Son, at their's the lowest bid of 98% of the Engineer's estimated units of cost in the amount of $120,821.16, and

BE IT FURTHER RESOLVED, that the Chairman is authorized to sign the necessary contracts after approval by the State Highway Engineer.

Route 10, Section 6.

The State Highway Engineer informed the Commission that the following bids had been received for the construction of Route 10, Section 6, Hackensack-Paterson, and he recommended the award of contract to George M. Brewster & Son, the lowest bidder at 99% of the Engineer's estimated units of cost.

Geo. M. Brewster & Son	99. %
N.J. Construction Co.	99. %
John J. McGarry	99. %
Public Service Prod. Co.	104.98%
John Dorer	105.6 %

On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission unanimously adopted the following resolution:

RESOLVED, that the contract for the construction of Route 10, Section 6, Hackensack to Paterson, be and the same is hereby awarded to George M. Brewster & Son, at their's the lowest bid of 99% of the Engineer's estimated units of cost, amounting to $214,474.02, and

BE IT FURTHER RESOLVED, that the Chairman is authorized to sign the necessary contracts after approval by the State Highway Engineer.

Route 10, Saddle River Bridge

State Highway Engineer Sloan reported to the Commission the bids received for the construction of the Saddle River Bridge at M.P. 2.9 on State Highway Route 10, and he reported to the Commission that after investigation, he was prepared to recommend award of contract to the lowest bidders, the Tunnel Construction Corporation of New York City, at their's, the lowest bid, of $28,875.00.

Tunnel Construction Corporation..........	$28,875.00
L. H. Card..............................	32,429.00
A. H. Alfast............................	33,422.35
Dansen Construction Co..................	33,524.00
P. A. Hennesy & Sewell..................	33,889.00
Kuchar Bros.............................	37,000.00
James Mitchell, Inc.....................	37,256.00
F. W. Schwiers Jr. Co...................	38,323.00
Arnolt-More, Inc........................	41,500.00
Tuller Construction Co..................	43,400.00
Thomas Shehan...........................	43,863.00

Commissioner Jelin stated that he had spoken to the representative of this company when the bids were received and he believed that this firm was capable of properly prosecuting the work, and he moved the adoption of the following resolution:

RESOLVED, that the State Highway Commission does hereby make award of contract for the construction of Saddle River Bridge at M.P. 2.9 on State Highway Route 10, to the Tunnel Construction Corporation on their's the lowest bid in the sum of $28,875.00, and

BE IT FURTHER RESOLVED, that the Chairman is authorized to sign the necessary contracts after approval by the State Highway Engineer.

Bonds-Towner Rating Bureau.

The Secretary presented a communication from Governor Silzer, transmitting letter received by him from the Towner Rating Bureau of New York City, concerning surety bonds and outlining the risk taken by the Surety Companies in furnishing bonds for low bidders even though there is great variation between the lowest bidder and the next higher one. On motion by Mr. Stewart, seconded by Mr. Kidde, the communication was ordered acknowledged to the Governor and placed on file.

Commissioner Kidde informed the Commission that he had been given to understand that offers are being made of 75% of premium charges to contractors from bonding company agents.

United States Good Roads
Convention

The Secretary presented a communication from the Hon. F. M. P. Pearse, Secretary to the Governor, calling attention to the fact of the United States Good Roads Association Convention in Albuquerque, New Mexico, and asking for suggestions as to delegates. On motion by Mr. Stewart, seconded by Mr. Jelin, the communication was ordered acknowledged with the advice that the State Highway Commission had already taken cognizance of this matter and has appointed General H. L. Scott as a delegate to the Convention.

Memorial Bridge Advisory Board

The Secretary presented a communication from Messrs. George B. Post & Sons, Architects, calling the attention of the State Highway Commission to the appointment of Mr. William Otis Post, since the members of the firm are William S. Post and J. Otis Post. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission directed that the Secretary advise George B. Post & Sons that Mr. J. Otis Post is the one suggested for the position, in view of the fact that he is already serving the State as a member of the Advisory Board of Architects to the Board of Control of the Department of Institutions and Agencies. Commissioner Kidde advised the Commission that this was an opportune time to advise that he was also a member of the Advisory Board to the Department of Institutions & Agencies and served without compensation, and he desired information as to whether this was not in conflict with his position on the State Highway Commission. The Secretary informed the Commission that inasmuch as there was no salary attached to the position held by Mr. Kidde, there was no reason why he could not serve in an Advisory capacity to the Department of Institutions and Agencies.

The Secretary presented a communication from Mr. D. M. Davis, Consulting Engineer, advising that he accepted appointment as a member of the Memorial Bridge Advisory Board. Mr. Kidde also reported that Mr. Joseph Van Vleck, who was appointed a member of the Advisory Board, had just returned from the South, and he had informed him that he would be glad to serve as a member of this Advisory Board, and would place his acceptance in writing within a few days.

Route 16, Section 6, Claim

The Secretary informed the Commission that he had been requested by Mr. Charles T. Kavanagh, contractor on State Highway Route 16, Section 6, for a hearing with reference to claims against his contract on Route 16. On motion, duly seconded, a hearing was granted. Mr. Kavanagh appeared and informed the Commission that he had taken up with State Highway Engineer Sloan, the interpretation of the supplemental contract, known as #3, issued to him on the construction of Route 16, Section 6, which called for the "placing" of a new fill on a section of new right of way and which the State Highway Engineer interpreted as including the maintenance of traffic over the new fill during the entire winter. He advised the Commission that from his own interpretation of the supplemental agreement, it provided only that he "place" the fill and not maintain the same, since he had not set a price for the maintenance, nor had he expected that any of the fill would have to be carried over the winter season. State Highway Engineer Sloan informed the Commission that a supplemental contract was merely an addition to the general provisions of the specification or original contract, which called for the maintenance of traffic for local residents at all seasons of the year. After Mr. Kavanagh had placed all of his claims before the Commission, Commissioner Jelin moved that the matter be taken under consideration at special conference. This was seconded by Mr. Kidde and adopted.

Route 14, Egg Harbor City

The Secretary informed the Commission that Mr. [illegible] of Egg Harbor was present with a delegation from Egg Harbor City on the matter of the alignment of Route 14 at the point where it leaves Egg Harbor City. He presented to the Commission a sketch in which there was an alignment shown, making a road 100 feet shorter than the existing route. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission directed that the matter be received with thanks and held for consideration at the time the alignment of route 14 in Egg Harbor City was taken up for consideration.

Route 1, George St., New Brunswick

Commissioner Jelin directed the attention of the Commission to the fact that after the appearance before the Commission at the last meeting of the representatives of the City of New Brunswick on the matter of the paving of the Public Service Railway tracks on George Street, a section of Route 1, the Board of Freeholders of Middlesex County were in meeting on this day and they had informed him to the effect that the Public Service Railway Company are furnishing a bond by the Globe Indemnity Company, guaranteeing the reimbursement of any moneys expended by the State on this work over a period of three years. Without taking any formal action, the State Highway Commissioners all expressed satisfaction with such a bond with the Globe Indemnity Company, as suggested by Mr. Jelin.

Route 7, Corlies Ave.-Colt's Neck

The Secretary informed the Commission that a delegation of residents of Hamilton, New Jersey, on the right of way of Route 7, was present and desired a hearing. On motion, duly seconded, a hearing was granted. This delegation was headed by Francis L. Stone and Mr. Archer Hight. Mr. Hight informed the Commission that in the proposed construction of Route 7, Colts Neck to Corlies Avenue Road, the Town of Hamilton, which comprises thirty-six buildings, was entirely shut off the main highway. He stated that there was alarm in the community of Hamilton, due to the fact that the realty value will depreciate, and also due to the fact that an existing Bus Line, which now traverses Route 7 between Freehold and Asbury Park, will be diverted to the new road, which is about a quarter of a mile from the present line of Route 7. He urged the Commission to consider continuing the road on the existing line for Route 7. Commissioner Kidde endeavored to impress the delegation with the fact that a number of municipalities in the State were very desirous of having the main highways diverted from their streets in order to prevent congestion. The delegation cited the instance of Port Republic, which was cut off in the construction of a new line for Route 4 near Atlantic City, which resulted in the desolation of Port Republic and the discontinuance of Bus Lines to Atlantic City. After further discussion, Commissioner Jelin moved that the matter be referred to the State Highway Engineer for further consideration. This was seconded by Mr. Kidde and adopted.

Gloucester County Maintenance

The Secretary informed the Commission that County Engineer W. C. Cattell of Gloucester County, was present and had several matters to bring before the Commission. On motion, duly seconded, a hearing was granted. Mr. Cattell appeared and presented the bids received by Gloucester County for its maintenance materials for 1924. He called attention to the fact that all bidding was regular except that for lignin binder, in which case a bid had been submitted in improper form, but the lowest bid was in regular shape. He advised that the Board of Freeholders of Gloucester County would recommend approval by the State of all contracts. Commissioner Kidde called attention of the Commissioners to the fact that it appeared that every time bids were received for lignin binder, there was some irregularity involved in the bidding, and he was prepared to recommend that the County consider the placing of some other type of surface treatment in competition with lignin binders. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission approved the award of contract by Gloucester County for all its maintenance materials except lignin binders, the said lignin binders to be readvertised for, with the recommendation to the Board of Freeholders of Gloucester County that they look into the matter of advertising as well for some other materials in competition with lignin binders.

County Engineer Cattell informed the Commission that he had prepared specifications for emulsion and patching materials to be used on the maintenance work in 1924, and was ready to present same to the Commission. On motion by Mr. Kidde, seconded by Mr. Stewart, the specifications of the County for emulsion and patching materials were ordered referred to the State Highway Engineer for investigation and approval.

County Engineer Cattell also called the attention of the Commission to the fact that bids had been received for the improvement of Crown Point Road, Section 2, the lowest bid being by the Union Paving Company at 84% of the Engineer's estimate, and he was desirous of determining whether the State Highway Commission would approve the award of this contract if the same was made by the Board of Freeholders. The State Highway Commission could take no official action in this matter but assured Mr. Cattell that the award of this contract by the county would be proper.

Right of Way-Route 1, Section 14

The Secretary informed the Commission that he had just received a report from Right of Way Agent Vollmer, to the effect that the Condemnation Commission in the matter of Mr. Rothstein on Route 1, Section 14, at Metuchen, had made an award of $125.00 to Mr. Rothstein. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission directed that the findings of the court in the matter of award of $125.00 to Mr. Rothstein be confirmed and the property acquired.

Hackettstown-Invitation

The Secretary informed the Commission that an invitation had been received for a dinner of the Board of Trade of Hackettstown, and he desired to ascertain whether the Commission intended to take this trip. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission directed that the invitation be accepted on the part of the Commission and that the Secretary arrange for the necessary transportation facilities.

Right of Way-New Amboy Bridge

The Secretary informed the Commission that Special Attorney William Newcorn had prepared a proper resolution for the acquisition of the property of the National Fire Proofing Company on the line of the new Amboy Bridge, and presented same for the consideration of the Commission. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission unanimously adopted the following resolution:

WHEREAS, under resolution of the State Highway Commission on or about the eleventh day of December, nineteen hundred and twenty three, the Attorney General of the State of New Jersey filed a petition for the purpose of condemning the lands therein described and the buildings thereon for the use of the proposed new bridge at Perth Amboy, belonging to the National Fireproofing Company, and rule to show cause having been issued, and upon a return date Commissioners having been appointed to condemn the said lands, ascertain the value thereof and the damage to the remainder, the said Commissioners having qualified and viewed the land, and

WHEREAS, since the institution of these proceedings, negotiations have been under way between the State Highway Commission and the said National Fireproofing Company through their respective attornies for a compromise settlement of the losses to be sustained by the National Fireproofing Company as the result of the said taking of the land and demolition of the said buildings, and the replacement value thereof, and

WHEREAS, the original appraisals submitted by the National Fireproofing Company for the value of the lands and the replacement value of the buildings to be destroyed and the damage to the remainder, amounted to $149,507.00 and as the result of the said negotiations the said National Fireproofing Company has expressed its willingness to accept the sum of $65,000.00 as a compromise settlement for the lands to be taken and the damages incurred by reason of the said taking, and to execute proper instruments [illegible] conveying the title in the land to the State of New Jersey, and releasing the State of New Jersey from any loss or damage caused by said taking, and

WHEREAS, the said compromise offer is less than the amount estimated by the Engineering Department of the State Highway Commission as to the value of the lands and in the judgment of the State Highway Commission, said offer is fair and reasonable, and

WHEREAS, by reason of the uncertainty of an award in this complicated taking and litigation that might ensue, it is for the best interest of the State to accept the said proposition.

NOW, THEREFORE, BE IT RESOLVED, that the proposition of the National Fireproofing Company to accept the sum of $65,000.00 in full settlement of all its claims and demands against the State of New Jersey for lands and replacement values and damages be and the same is hereby accepted, and

BE IT FURTHER RESOLVED, that William [illegible], Special Counsel to the Attorney General, designated to conduct these proceedings be and he is hereby authorized to take such proceedings to effectuate the settlement and obtain the necessary instruments, releasing the State of New Jersey from any damages by reason of the said taking, and conveying the title in the lands to the State of New Jersey, and

BE IT FURTHER RESOLVED, that upon the execution of the said instruments and such other proceedings as said Counsel may take in the matter, the consideration of $65,000.00 be paid to the National Fireproofing Company.

On motion by Mr. Kidde, seconded by Mr. [illegible], the Commission recessed for luncheon at 1:00 P.M., to meet in regular session again at 2:30 P.M. The meeting reconvened again at 2:30 P.M. as agreed, with the same members present as at the morning session.

Request for Aid-Warren County

The Secretary informed the Commission that Senator Barber of Warren County and Mr. Stryker of the Board of Freeholders, were present with reference to aid on the Warren Glen Road in Warren County, which extended from the Interstate Bridge at Rigglesville to Route 9, at Phillipsburg. Mr. Stryker advised that this road was now being graded by the County and they were very desirous of having the State aid in the completion of the surface of the road. Senator Barber informed the Commission that the completion of this road was very important from the standpoint of the tourists from that section of the county who are now forced to travel on the Pennsylvania side, on the River Drive, which is a hazardous trip on account of its proximity to the water's edge. The representative advised that the total cost of the improvement is $262,000.00. Chairman Scott informed the delegation that the Commission had not the means to give very much aid to the counties, and this request would be filed with the remaining requests for consideration when funds in hand were disposed of.

State Highway Engineer Sloan advised the Commission that he would recommend that action be taken as soon as possible on the matter of the requests for emergency aid, from the Motor Vehicle Reserve Account that have been made by the several counties of the State, in view of the fact that it will be necessary for the counties to prepare plans and specifications before award of contracts. The Commission requested that the Secretary bring up for consideration the requests as now before the Commission, in order that the same might be disposed of.

Road Leading to Soldiers' Home Vineland.

The Secretary presented a communication from Mr. Barton [illegible]. Fell, Superintendent of the Soldiers' Home at Vineland, requesting that the State Highway Commission reconstruct the road leading to the Soldiers' Home, in accordance with the provisions of the Act permitting the State Highway Commission to pay the cost of construction of roads leading to State Institutions. On motion by

Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission directed that there be apportioned for the reconstruction of the road leading to the Soldiers' Home at Vineland the sum of $5,000 which has already been set up toward this account, work to be of penetration slag or macadam and to be done by the Maintenance forces of the Department. On motion by Mr. Kidde, seconded by Mr. Jelin, a communication to this effect was ordered forwarded to Superintendent Fell of the Soldiers' Home.

Scotch Plains Road, Union County

The Secretary informed the Commission that the application of Union County for aid on the Scotch Plains Road has not yet been acted upon. Commissioners Stewart and Jelin both expressed the desire to aid in this improvement in view of its benefits to congested traffic in this location, and also in view of the fact that aid from the state will permit the building of this road to its full width. Commissioner Kidde, therefore, moved that the County of Union be allotted the sum of $25,000.00 to be applied to the construction of the Scotch Plains Road, full width, funds to come from the Motor Vehicle Reserve Account. This was seconded by Mr. Jelin and adopted.

Kings Highway, Camden County

The Secretary informed the Commission that a request was received from Camden County for aid in the reconstruction of the Kings Highway in Camden County, for about one-half mile in length. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission ordered the allotment of $9,000.00 from the Motor Vehicle Reserve Account as State Aid in the reconstruction of the Kings Highway in Camden County.

Browns Mills-Ocean County Line, & Kings Highway, Burlington County

The State Highway Engineer informed the Commission that an application had been received from Burlington County for aid in the construction of the Kings Highway in that County, and also for the reconstruction of the road between Brown's Mills and the Ocean County Line. Commissioner Kidde moved that there be allotted to Burlington County, the sum of $35,000.00 from the 1924 Motor Vehicle Reserve Account for the reconstruction of the Kings Highway in

Burlington County, and $21,000.00 from the State Aid Account for the reconstruction of the Brown's Mills-Ocean County Line Road, both of these apportionments being made with the understanding that the County of Burlington will pass a proper resolution in which the County will take over as a county road for future maintenance, the road between Brown's Mills and the Ocean County Line. This was seconded by Mr. Jelin and adopted.

Old Bridge-Matawan Road

The Secretary informed the Commission that a further communication had been received from the Board of Freeholders of Middlesex County, advising that the County was prepared to proceed with the improvement of the Old Bridge-Matawan Road for its entire length, work to be done in two sections, and requesting aid from the State in this improvement. Commissioner Kidde advised that in view of the assurance given by the Commission that it would share in this improvement to the extent of one-half the sum, not to exceed $100,000.00, he would move that the communication be acknowledged and that there be allotted to Middlesex County from the Motor Vehicle Reserve Account, one-half the cost of the improvement of the Old Bridge-Matawan Road, provided this work is let as one contract by the County of Middlesex, and under specifications which shall be approved by the State Highway Commission, it being understood that the total cost of this improvement will be approximately $200,000.00, so that the participation of the State will not exceed the sum of $100,000.00. This was seconded by Mr. Stewart and adopted.

Motor Vehicle Aid-Hunterdon County

The Secretary informed the Commission that the County of Hunterdon had presented a request for aid in the County Repair Program for the year, and he presented a report from Assistant State Highway Engineer Reed in which there was outlined the various roads upon which Hunterdon County should concentrate its repair. The most important of these roads was the one between Flemington and White House. Commissioner Jelin moved that in view of the report from Assistant State Highway Engineer Reed, the State Highway

Commission authorize the allotment of $30,000.00 from the Emergency Reserve Account to the County of Hunterdon, the same to be applied to the extraordinary repair or reconstruction of the Flemington-White House Road, plans and specifications to be approved by the State Highway Engineer. This was seconded by Mr. Kidde and adopted.

Request for Aid-Boro of Frenchtown

On motion by Mr. Kidde, seconded by Mr. Jelin, the Secretary was directed to inform the Borough of Frenchtown that its application for State Aid in the improvement of Main Street, in that Borough, was denied, due to the fact that it was entirely a local improvement and that no funds were available for that purpose.

Freehold-Smithburg Road

The Secretary informed the Commission that Monmouth County had made a request for State Aid in the improvement of the Freehold-Smithburg Road, which is part of an improvement program to replace the Shore Road between Allentown and Freehold with a hard surface pavement. Commissioner Kidde moved that the sum of $25,000.00 be apportioned from the Motor Vehicle Reserve Account for the paving, with concrete, of the road between Freehold and Smithburg, work to be done under plans and specifications to be approved by the State Highway Commission.

Motor Vehicle Aid-Monmouth County

The Secretary advised the Commission that on a previous case there had been allotted from the Motor Vehicle Reserve Account the sum of $6,000.00 for State Aid in the improvement of Reckless Place in Red Bank, Monmouth County.

Absecon Boulevard, Atlantic Co.

The Secretary informed the Commission that the County of Atlantic had presented plans and specifications to the State Highway Commission for the Absecon Boulevard, and the County Engineer had requested information as to whether the State Highway Commission would give aid in this improvement. Commissioner Kidde moved that in view of the communication from the County Engineer of Atlantic County and the desire on the part of the Freeholders to proceed with the Absecon Boulevard, on a new type of specification which would be satisfactory to the State Highway Commission, the State Highway Commission authorize the sum of $50,000.00 from the Motor Vehicle Reserve Account as State Aid participation in the Absecon Boulevard improvement, subject to plans and specifications and contract being approved by the State Highway Commission in accordance with Chapter 395, Section 27. This was seconded by Mr. Jelin and adopted.

M.V. Aid -
Pennington Borough, Mercer County

The Secretary presented a communication received from the Board of Freeholders of Mercer County, advising that the County of Mercer and Borough of Pennington were jointly to proceed with the paving of a section of road through the Borough of Pennington and calling attention to the fact that this roadway is a section of the new highway route adopted by the recent Legislature, from Trenton to Buttzville. This communication made the request that the State Highway Commission might share in the cost of this improvement to pave within the car track area, which will cost approximately $40,000.00 if reclipped granite block is used. State Highway Engineer Sloan informed the Commission that the improvement of this section of road will reduce the State's cost on the improvement of the route when the same is taken over as a State Highway, and he was prepared to recommend participation by the State in this work. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission authorized the allotment of $25,000.00 from the Motor Vehicle Reserve Account as the State's share of the cost of the improvement of the car track area through the Borough of Pennington, subject to approval of plans and specifications by the State Highway Engineer, of the work to be done in the Borough. This was seconded by Mr. Jelin and adopted.

Cape May - Lewes Ferry

Commissioner Kidde reported to the Commission that, in company with Commissioner Jelin and Secretary Grover, and the State Highway Engineer, a meeting was held in the Bellevue-Stratford Hotel in Philadelphia, with Chief Engineer Buck of the Delaware State Highway Commission and Senator Bright, on the matter of the possibilities for proceeding with the Cape May-Lewes Ferry. He asked the Secretary to read a report of the proceedings of that meeting. Mr. Grover read this report in which it was brought out that Senator Bright had indicated that the necessity for the ferry would exist chiefly between the summer months, that is, from June 1st to October 1st. Chief Engineer Buck had informed the meeting that he did not believe the standard type of ferry boat would be capable of rendering the service required of such a ferry, due to the heavy weather encountered frequently in the vicinity of the Delaware Breakwater. It was determined that a definite decision as to the type of vessel must be left to a competent Marine Engineer. A suggestion was made that a joint committee be formed to consist of two members of the State Highway Commission of Delaware and two members of the State Highway Commission of New Jersey, and a Consulting Engineer, to be employed to work out the best solution of the problems presented by this proposed ferry. Commissioner Kidde moved that this report be accepted by the State Highway Commission, giving authority to the Commissioners already appointed by the State Highway Commission to serve on this Committee and that authorization be given by the State Highway Commission to employ a Marine Engineer on the basis of one-half his salary to be paid by the State of New Jersey and one-half by the State of Delaware, the cost to the State of New Jersey not to exceed the sum of $1,000.00. This was seconded by Mr. Stewart and adopted.

Advisory Board Projects

Commissioner Kidde inquired of the Secretary whether any opinion had yet been received from the Attorney General on the matter of Advisory Board projects, and he was advised in the negative. He then suggested that the Secretary and the State Highway Engineer arrange to see the Attorney General at the earliest possible date, in order to have a clear report ready for the next meeting of the Commission. The Secretary informed the Commission that in line with the expressed purpose of the Commission on the matter of the Advisory Board routes, he would like to have a suggestion as to the day of the week on which these hearings, when arranged, might fall. Thursday was the day generally approved for this purpose, and the Secretary declared the arrangements would be made at the direction of the Commission, on this day of the week.

Invitation-Sussex County

The Secretary presented a communication from the Sussex County Board of Freeholders, inviting the State Highway Commission to come to Sussex County and meet with the Board of Freeholder at Newton. On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission directed the Secretary to notify the Board of Freeholders of Sussex County that it cannot fix a date at the present time, but will notify them later if arrangements can be made to go to Sussex County.

"American Highways" Magazine

The Secretary presented a communication from the American Association of State Highway Officials, advising of the purpose of the Association to continue the publication of the "American Highways" is postage in the amount of three cents per copy would be supplied. The number of magazines to be allotted to New Jersey is thirty copies. On motion by Mr. Jelin, seconded by Mr. Kidde, the Commission directed that the Secretary forward sufficient postage to cover the thirty copies of the "American Highways" magazine to be sent to New Jersey.

Route 3, General-Camden County

The Secretary presented a communication from J. J. Albertson, County Engineer of Camden County, requesting information as to whether the Commission would take up the matter of reimbursement to Camden County for detours maintained by Camden County during the construction of Route 3, Sections 8, 9, and 10, on the White Horse Pike. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission directed that the County of Camden be advised that due to the fact that these detours were not made official detours by the State, there are no funds available for that purpose.

Invitation-
National Association of Railroad
& Utility Commissioners

The Secretary presented a communication from the National Association of Railroad & Utility Commissioners, extending an invitation to the Commission to attend a conference at Chicago on

April 30th and May 1st, on the matter of grade crossing danger elimination. Commissioner Kidde suggested that Judge Osborne, President of the Board of Public Utility Commissioners, may attend this Convention, and in that event he may be able to furnish the State Highway Commission with any interesting material taken therefrom, and he moved that a communication be forwarded to Judge Osborne, asking that in the event he goes to the Convention at Chicago, that he represent the State Highway Commission as well. This was seconded by Mr. Jelin and adopted.

Route 5, Madison-Chatham

The Secretary presented a communication from the Borough of Madison with reference to the paving of the portion of trolley track area of Route 5 in that Borough. On motion by Mr. Kidde, seconded by Mr. Stewart, the communication was ordered received and placed on file.

Ocean Boulevard-Ocean Grove

The Secretary presented a communication from the Board of Commissioners of Bradley Beach, New Jersey, requesting a conference with the Commission on the matter of the continuation of the Ocean Boulevard through Ocean Grove, as part of the State Highway Ocean Boulevard. In connection with this matter the Secretary presented a communication received by General Scott from the Asbury Park Press, requesting a statement from the Chairman as to his views on the subject of opening up the Shore Boulevard through Ocean Grove. After discussion of the matter, Commissioner Stewart moved that the following communication be forwarded by Chairman Scott to the Asbury Park Press with a copy to the Board of Commissioners of Bradley Beach:

"Gentlemen:-

We beg leave to acknowledge receipt of your favor of the 31st ult., in reference to the taking over of the Shore Boulevard as a State Highway, and thank you for your courtesy in the matter.

At the present time the State Highway Commission is without the power to do any of the things referred to in your communication, and, therefore, it would be unnecessary for this Commission to express any opinion in the matter."

This was seconded by Mr. Jelin and adopted.

Right of Way-Route 4

The Secretary requested the Commission to fix a date for the hearing to be held at Toms River on the matter of alignment of State Highway Route 4 at that point. On motion by Mr. Jelin, seconded by Mr. Stewart, the Commission directed that the hearing be held on Friday, April 11th at 2:30 P.M.

Invitation-Connecticut

The Secretary presented an invitation received by Chairman Scott from the State of Connecticut, inviting the State Highway Commission to attend a convention of Motor Vehicle Traffic to be held at Yale University on April 9, 10, and 11. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission delegated Commissioner Stewart to represent the Commission, if possible for him to do so.

Route 16, Section 6

Commissioner Stewart moved that the matter as presented by Charles I. Kavanagh at the morning meeting, and which was reviewed by the Commission in conference during the luncheon hour, be referred to the State Highway Engineer with power to make final adjustment. This was seconded by Mr. Jelin and adopted.

Morgan Grade Crossing Elimination

The Secretary presented an editorial which appeared in the Perth Amboy Evening News of March 2[illegible]th, complaining of the delay on the undertaking of work on the Morgan Grade Crossing Elimination, together with a communication of reply to the Perth Amboy Evening News by Commissioner Jelin, explaining that the actual undertaking of the work could not be started until an opinion had been received from the Attorney General's Department and a contract was let by the Pennsylvania Railroad. On motion by Mr. Kidde, seconded by Mr. Stewart, the reply of Commissioner Jelin was ratified, confirmed and approved, and publicity was directed to the effect that the Morgan Crossing would be begun about May 1st.

Extension of Time-Route 5, Sec. 9

The Secretary presented a communication received from the Globe Indemnity Company, requesting favorable consideration by the State Highway Commission for extension of time on the contract of

Frank J. Groman & Sons on Route 5, Section 9, which was abandoned by the contractor on account of his death, and completed by the Globe Indemnity Company, as surety. The Bonding Company requested that the Commission approve an extension of time of 60 additional days, in view of the fact that the work was diligently prosecuted by the bonding company and any delays were occasioned entirely by the organization necessary. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission approved of an additional extension of time of 60 days on Route 5, Section 9, as requested by the Globe Indemnity Company, due to the fact that the Globe Indemnity Company as surety has completed this work as expeditiously as possible after the death of Frank J. Groman, proprietor of the original contract.

Shirt Sleeve Road Show, American Road Builders' Association

The Secretary informed the Commission that solicitation had been made for the State Highway Commission to invite the "Shirt Sleeve Road Show" of the American Road Builders' Association, to the State of New Jersey for the year 1925. The exhibit is being held this year in North Carolina. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission authorized that an invitation be forwarded to the American Road Builders' Association Executive Committee, inviting it to give favorable consideration to locating the scene of the open air road equipment exhibit, known as the "Shirt Sleeve Road Show" in the State of New Jersey. In connection with the above, the Secretary informed the Commission that there would be no expense occasioned by such a show on the part of the State Highway Commission.

Right of Way-Route 16, Section 7.

On recommendation of the State Highway Engineer, Commissioner Kidde moved the approval of purchase, with thanks, of Parcel #1 on Route 16, Section 7, Bayard Lane, Princeton, from Albert S. Leigh for the consideration of $1.00. This was seconded by Mr. Stewart and adopted.

Right of Way-Route 12, Section 7.

On recommendation of the State Highway Engineer, Commissioner Jelin moved the approval of purchase of Parcel #21 on Route 12, Section 7, from J. A. & Emma J. Johnson, for the consideration of $716.00. This was seconded by Mr. Stewart and adopted.

Right of Way-Route 5, Section 11.

State Highway Engineer Sloan recommended approval by the Commission to the purchase agreements for Parcels #10 and #10A, on Route 5, Section 11, from Gertrude E. Alliger, for the consideration of $4,500.00, this item including the destruction of fifty twelve-year old apple trees which were valued between $50.00 and $75.00 each. On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission directed that further information be obtained concerning the trees on this property, and for this purpose Dr. J. G. Lipman, Superintendent of the State Agricultural Farms at New Brunswick, be asked to send the proper individual.

Right of Way-Route 9, Section 11

State Highway Engineer Sloan recommended approval of the purchase of Parcel #1 on the Estate of Adam Dealaman on Route 9, Section 11, Lincoln Avenue, Plainfield City Line for the consideration of $2,400.00, this including the removal of house. On motion by Mr. Kidde, seconded by Mr. Jolin, the matter was ordered referred to Commissioner Stewart for investigation and report.

Right of Way-Route 4, Section 20.

On recommendation of the State Highway Engineer, Commissioner Jolin moved the approval of change in the description of Parcel #4 condemnation resolution as adopted by the State Highway Commission on August 2[illegible], 1926, for the condemnation of land required on the [illegible]-Parker property on Route 4, Section 20, Manasquan River Bridge, a portion to be modified as per revised map and following description in order to reduce the length of retaining wall. This was seconded by Mr. Jolin and adopted.

Parcel #2

BEGINNING at the point of intersection of the southerly line of Stockton Lake Drive and the westerly line of Hobert Street, and running thence (1) along said westerly line of Hobert street, south twenty-eight degrees, fifty-one minutes east, two hundred and sixty-six feet and seventy-nine one hundredths of a foot (266.79') to a point in the northwesterly line of Taylor Avenue; thence (2) along said northwesterly line of Taylor Avenue, South forty-eight degrees and thirty seconds West, twenty-two feet and eighty-five one hundredths of a foot (22.85') to a point in the division line between the Pearse and Parker tract and lands now or formerly of A. J. Armstrong; thence (3) along said division line, North thirty-one degrees, fifty-two minutes and forty-five seconds West, five feet and three one hundredths of a foot (5.03') to a point distant twenty-six feet (26'), measured radially from the center line of State Highway Route 4; thence (4) in a northwesterly direction, on a curve to the left, being the arc of a circle concentric with the curve of the center line of said State Highway and having a radius of five and forty-seven feet and sixty-nine one hundredths of a foot (547.69'), one hundred and nine feet and four-tenths of a foot (109.4') to a point of tangency; thence (5) North twenty-eight degrees and fifty-one minutes East, forty-eight feet and five one hundredths of a foot (48.05') to a point of curve; thence (6) in a northerly direction, on a curve to the left, being the arc of a circle concentric with a curve of the center line of said State Highway and having a radius of nine hundred ~~feet~~ and twenty-nine feet and thirty-seven one hundredths of a foot (929.37'), one hundred and thirty-three feet and twenty-two one hundredths of a foot (113.22') to a point in the aforesaid southerly line of Stockton Lake Drive distant twenty-six feet (26') measured radially, from the center line of said State Highway; thence (7) along said southerly line of Stockton Lake Drive South forty-two degrees, twenty-four minutes and thirty seconds East, eleven feet and twelve one hundredths of a foot (11.12') to a point or place of beginning; containing twenty-four one thousandths (0.024) of an Acre, more or less; as laid down on a certain map entitled "New Jersey State Highway Department, Section of Route #4, Property to be acquired from the Pearse & Parker Estate, in the Borough of Manasquan, Monmouth County, December 1922."

Parcel #3

BEGINNING at the point of intersection of the southeasterly line of Parker Avenue and the southerly line of Stockton Lake Drive, and running thence (1) along said southerly line of Stockton Lake Drive, South forty-two degrees, twenty-four minutes and thirty seconds East, fifty feet and sixty-three one hundredths of a foot (50.63') to a point of curve; thence (2) in a northwesterly direction, on a curve to the left, being the arc of a circle with a radius of fifty feet (50'), seventy-nine feet and seventeen one hundredths of a foot (79.17') to a point of tangency in the southeasterly line of Parker Avenue; thence (3) along said southeasterly line of Parker Avenue, North forty-six degrees, fifty-two minutes and thirty seconds East, fifty feet and sixty-three one hundredths of a foot (50.63') to the point or place of BEGINNING; containing thirteen one thousandths (0.013) of an Acre, more or less, as laid down on the map hereinabove referred to.

Parcel #4

BEGINNING at the point of intersection of the northeasterly line of Stockton Lake Drive and the westerly right of way line of the New York and Long Branch Railroad and running thence (1) along said northeasterly line of Stockton Lake Drive, North forty-two degrees, twenty-four minutes and thirty seconds West, one hundred and sixty-eight feet and sixty-one one hundredths of a foot (168.61') to a point; thence (2) North, sixty-six degrees, seventeen minutes and forty-three seconds East, sixty-five feet and thirty-seven one hundredths of a foot (65.37') to a point distant fifty feet (50') from the center line of State Highway Route #4, measured along a radius drawn through a point of tangency at Station 92 plus 26.87; thence (3) North, five degrees, seven minutes and fifty-five seconds East, two hundred and eighty-nine feet and ninety-four one hundredths of a foot (289.94') to a stone monument in the southerly right of way line of the Pennsylvania Railroad at the jog in said right of way from sixty feet (60') to fifty feet (50'); thence (4) along said right of way line, in a northeasterly direction, on a curve to the left, being the arc of a circle with a radius of fourteen hundred and sixty-two feet and sixty-nine one hundredths of a foot (1462.69'), two hundred and ten feet and forty-four one hundredths of a foot (210.44') to a point distant fifty feet (50'), measured southwestwardly along said right of way line, from its intersection with a radius drawn through a stone railroad monument on the northwesterly right of way line; thence (5) south, sixteen degrees, twenty minutes and forty-five seconds West, five hundred and sixty feet and seventy-four one hundredths of a foot (560.74') to a point or place of BEGINNING; containing one Acre and two hundred and ninety-nine one thousandths of an Acre (1.299), more or less, as laid down on the map hereinabove referred to.

Route 10, Section 1-A

State Highway Engineer Sloan reported approval of plans and specifications and the placing of advertisement on Route 10, Section 1-A, Arcadian Way-Fort Lee Ferry section, and recommended ratification of this action. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission ratified, confirmed and approved the action of the State Highway Engineer on Route 10, Section 1-A, Arcadian Way - Fort Lee Ferry.

Route 12, Section 6

State Highway Engineer Sloan recommended approval of plans and specifications and the placing of advertisement on Route 12, Section 6, Port Colden-Stephensburg Section. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission ratified, confirmed and approved the recommendation of the State Highway Engineer.

Route 12, Section 7

State Highway Engineer Sloan recommended approval of plans and specifications and the placing of advertisement on Route 12, Section 7, Stephensburg-Hackettstown section. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission unanimously ratified, confirmed and approved the action of the State Highway Engineer.

Route 7, Detour.

On recommendation of the State Highway Engineer, Commissioner Stewart moved approval of the following official detour for Route 7, Sections 2 and 3, Golf Course-Colts Neck Road:

> "Beginning on Route 7 at its intersection with the Farmingdale-Colts Neck Road and runs thence (1) in a southerly direction along the Farmingdale-Colts Neck Road to Farmingdale; thence (2) in a general easterly

> direction along the Farmingdale-Glendola Road; thence (3) northeasterly through Remsen Mills and Hamilton Mills to Route 7."

This was seconded by Mr. Jelin and adopted.

Route 10, Official Detour

On recommendation of the State Highway Engineer, Commissioner Stewart moved the adoption of the following official detour for Route 10, Section 2-A, Broad Avenue-Ridgefield. This was seconded by Mr. Jelin and adopted.

> "Beginning at the intersection of Broad Avenue and Elm Avenue in the Borough of Ridgefield and runs thence (1) northwesterly along Elm Avenue to Grand Avenue; thence (2) southwesterly on Grand Avenue to Route 10 at Broad Avenue."

Route 9-Official Detour

State Highway Engineer Sloan recommended adoption of official detour for Route 9, Sections 12 and 15, Plainfield-Westfield and Westfield-Lehigh Valley Railroad sections. Commissioner Stewart requested that this matter be laid over until an investigation was made by him of the same. This was seconded by Mr. Jelin and adopted.

Route 4, Beaver Dam Bridge

On recommendation of the State Highway Engineer, Commissioner Stewart moved the acceptance of the completed work on the Beaver Dam Bridge at M.P. 65.3 on Route 4 and directed that final payment on same be made. This was seconded by Mr. Jelin and adopted.

Equipment-Automobiles

State Highway Engineer Sloan presented to the Commission the recommendation of the Superintendent of Plant and Equipment for the purchase of ten new Ford touring cars to be used by additional Survey Parties, at a price of $428.15 each, same to be purchased by the State Purchasing Department. On motion by Mr. Stewart, seconded by Mr. Kidde, the State Highway Commission approved the purchase of ten new Ford touring cars, orders for the same to be placed by the State Purchasing Agent.

State Highway Road Signs

State Highway Engineer Sloan presented to the Commission the matter of road signs to be placed on the State Highway construction, together with estimates as furnished by the Maintenance Division, showing that it will cost approximately $60.00 to dismantle and re-erect these signs on additional jobs. Commissioner Jelin suggested that a smaller sign than that indicated be made, which could be transported easily by small trucks to the various jobs of the State. Chairman Scott suggested that the size of this sign might be 5' X 10' and capable of easy erection and dismantling. On motion by Mr. Stewart, seconded by Mr. Jelin, the Commission directed that the matter of signs be referred to the State Highway Engineer with directions that estimates be obtained for signs of a size not to exceed 5' X 10' and that the same be again presented to the Commission for consideration.

Employments —

On recommendation of the State Highway Engineer, Commissioner Kidde moved the approval of the following list of employments as made by the State Highway Engineer since the last meeting of the Commissipn:

April 1, 1924	Michael H. Boss	Rodman	$90.00 mo.
" 1, "	J. E. L. Knox	"	90.00 "
March 19, "	Andrew J. Aber	Mot. Tr. Dr.	.40 hr.

This was seconded by Mr. Stewart and adopted.

Township Aid Force Account-Camden Co.

On recommendation of the State Highway Engineer, Commissioner Kidde moved the approval of the following Township Aid Force Account agreements in Camden County:

Haddonfield-Kresson Road, Voorhees Township, Camden County.
Burnt Mill Road, Voorhees Township, Camden County.
Erial Road, Section 2, Gloucester Township, Camden County.

This was seconded by Mr. Jelin and adopted.

Township Aid Force Account-Cumberland County

On recommendation of the State Highway Engineer, Commissioner Stewart moved the approval of the following Township Aid Force Account Agreements in Cumberland County:

Heislerville Road, Maurice River Township, Cumberland Co.
Cumberland & Port Elizabeth Road, Maurice River Twp., Cumberland Co.
Eldora-Belle Blain Road, Maurice River Twp., Cumberland Co.

This was seconded by Mr. Stewart and adopted.

Sussex County-Township Aid

On recommendation of the State Highway Engineer, Commissioner Jelin moved the approval of Township Force Account supplemental agreement on the Newton-Swartswood Road, Hampton Township, Sussex County, Township Aid. This was seconded by Mr. Stewart and adopted.

On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission adjourned at 6:30 P.M., to meet in regular session again on Tuesday, April 8th, at 10:30 A.M.

Respectfully submitted,

A. LEE GROVER,

Secretary.

MINUTES OF MEETING- April 8, 1924

A regular meeting of the State Highway Commission was held in the Commission meeting room, Broad Street Bank Building, Trenton, on Tuesday, April 8th. The meeting was called to order at 11:00 A.M. by Chairman Scott.

Present: General H. L. Scott, Chairman, and Messrs.
Percy H. Stewart, Walter Kidde and Abraham Jelin.

Minutes Approved

Commissioner Kidde reported having carefully read the minutes of the meeting on March 18th, and he moved that the same be approved with a correction on Page 7, last paragraph, by inserting the words "invited to be" in the third line. This was seconded by Mr. Jelin and adopted.

Burlington County-Motor Vehicle Aid

The Secretary informed the Commission that a delegation was present from the County of Burlington with further reference to the matter of State Aid allotments granted at the last meeting. On motion, duly seconded, a hearing was granted. There appeared Mr. Charles Stout, Director of the Board of Freeholders, Mr. MacFarland, Supervisor of Roads, and other Freeholders of the County. Mr. Stout, as spokesman, informed the Commission that Burlington County was very much gratified to learn of the allotment of aid in the amount of $36,000.00 on the Kings Highway, but it was at a loss to determine how to proceed with the improvement of the Brown's Mills-Lakehurst Road with the amount of $21,000.00 as approved by the Commission. Mr. Stout stated that it was the purpose of the County to reshape this section and reconstruct it with gravel or cinders and place thereon an oil treatment. He suggested to the Commission that the County be permitted to apply toward this work an amount of $20,000.00 which the County was owing the State on account of the completed work on the Four Mile Colony Road in Burlington County. Commissioner Kidde informed the delegation that the State Highway Commission had treated Burlington County very well in the apportionments as made, in view of the requirements in the other counties of the State, but he called attention to the fact that when the Commission to make their first request, they asked a total sum of $62,500.00, which was only $6,500.00 in excess of the amount then granted by the State. Director Stout informed the Commission that if the State Highway Commission would grant a total sum of $62,500.00, the County of Burlington would proceed with the construction of the Kings Highway and the reconstruction of the Brown's Mills-Lakehurst Road in Burlington County. Commissioner Kidde, therefore, moved that the Commission reconsider the allotments made to Burlington County at the last meeting, and at this time there be allotted for the purpose of providing the State's share of the Kings Highway reconstruction in Burlington County, and for the reconstruction with cinders or gravel of the Brown's Mills-Lakehurst Road in Burlington County, and the application of surface treatment thereon, the total sum of $42,500 in cash from the Motor Vehicle Reserve Account and State Aid funds, it being also determined by the Commission to cancel the charge against the County of Burlington in the amount of $20,000.00 as due on account of the county's share on the improvement of the Four Mile Colony Road in Burlington County, providing a resolution is received from the County of Burlington to the effect that the Brown's Mills-Lakehurst Road will be taken over by the County and maintained hereafter. This was seconded by Mr. Jelin and adopted.

Institutional Roads-
Nichol ave., New Brunswick.

The Secretary presented a communication received by Chairman Scott from Mrs. Mabel S. Douglass, Dean of the New Jersey State College for Women, requesting aid on the extension of Nichol Avenue, the approach to the State Institution, in view of the fact that the College is completing a second "horseshoe" of houses during the coming summer. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission directed that the communication be acknowledged and Mrs. Douglass be advised that the application will receive consideration by the Commission. It was generally understood, however, that until the building projects they have in mind are further along, the State should not be called upon to expend money in anticipation of what is going to be done, and the State

Highway Commission is not disposed to expend its money until the need for the road is more apparent.

Attorney General's Opinion,
Riparian Grants

The Secretary presented an opinion received from the Attorney General of the State on the matter of the obtaining of riparian grants for lands under water, in which he states that the Board of Commerce & Navigation has authority to convey lands necessary for the construction of bridges without payment of rent or other charge. On motion by Mr. Kidde, seconded by Mr. Stewart, the communication from the Attorney General was ordered received and placed on file with directions that proper information concerning this opinion be transmitted to the Board of Commerce & Navigation for its information.

Application-William Vanderbilt

The Secretary presented a communication addressed to Commissioner Jelin, from Mayor F. W. Donnelly of Trenton, requesting that the State Highway Commission find some kind of work for Mr. William Vanderbilt, former employee of the Department, who suffered an accident and could not continue his employment. Commissioner Jelin stated that he had asked the Secretary to read this letter before the Commission in order that the case might be given consideration. Commissioner Kidde stated that he felt the Department should not be burdened with the services of men who are physically incapable of performing required duties, although he felt that some means of employment should be open to Mr. Vanderbilt. Mr. Jelin stated that he might find it possible to secure a position for Mr. Vanderbilt with a contractor, and suggested to the Secretary that Mayor Donnelly be requested to have Mr. Vanderbilt appear at the offices in Trenton on Monday next in order that he might determine what the possibilities were for giving him employment.

Advisory Board-Victory Bridge

The Secretary presented communications from Mr. Joseph VanVleck and Mr. James Otis Post, accepting the invitation to serve as members of the Advisory Board for the Victory Bridge. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission directed that the communications be acknowledged and that they be advised to hold themselves in readiness for a meeting of the Advisory Board to be called by Chairman Scott in the near future.

Exhibit-
N. J. State Hotelmens' Association

The Secretary presented a communication from the New Jersey State Hotelmens' Association, inviting the State Highway Commission to exhibit at the Annual Spring Hotelmens' Exposition Exposition, to be held in Atlantic City the week of May 5th, and offering an exhibit space free of cost to the Commission. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission approved the offer of exhibiting at the Hotelmens' Exposition and authorized the Secretary to accept the invitation on behalf of the Commission.

MAPS

In connection with the foregoing, Commissioner Kidde requested information on the progress being made with the completion of the new State Highway Map. He was informed that it was unlikely that this map would be ready in time for May 5th. Commissioner Kidde suggested that in the literature to be on the back of this map there be included a history on the proposed Advisory Board projects at Jersey City, Camden and Keyport.

Route 15-General

The Secretary presented a communication from the Cape May County Chamber of Commerce, suggesting a change in State Highway Route 15. On motion by Mr. Kidde, seconded by Mr. Jelin, the Commission directed that the communication be received and the Chamber of Commerce of Cape May County be advised that the Commission has taken no action relative to any change in the alignment of Route 15, and at any rate, the new line suggested would have additional grade crossings which would serve to complicate rather than clarify the alignment on this route.

Materials-Maintenance

The Secretary presented a communication from Mr. M. A. Terry, who had appeared at a former meeting of the Commission, in which communication Mr. Terry explained the merits of "Waxoil" as a preparation for gravel road binder. Commissioner Kidde moved that the communication be filed and that no further action be taken in view of the lack of knowledge of cost of application and the value of the material. This was seconded by Mr. Jelin and adopted.

Proposed New Routes

The Secretary presented a communication from Mr. J. A. Stowe, President of the Sterling Trolley Base Company, giving in detail his opinion in favor of an elevated trestle to connect the Town of Kearney with other direct routes over the railroad tracks on the meadows of Jersey City. On motion by Mr. Jelin, seconded by Mr. Kidde, the communication was ordered received and filed with the thanks of the Commission for the study made of the situation.

The Schedule of Business was next taken up for consideration, item by item as follows:

Route 16, Section 7.

State Highway Engineer Sloan presented a report of the following bids for the improvement of Route 16, Section 7, Bayard Lane, Princeton, and recommended award of contract to the lowest bidder, Graham VanKeuren, amounting to $64,465.50.

Graham VanKeuren	$ 64,465.50
T. H. Riddle	68,863.50
Ross & Whelan	69,064.48
Utility Construction Co.	69,354.20

On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission unanimously adopted the following resolution:

> RESOLVED, that the State Highway Commission does hereby make award of contract for the construction of Route 16, Section 7, Bayard Lane, Princeton, to Graham VanKeuren of Jersey City, at his, the lowest bid submitted, amounting to $64,465.50, and
>
> BE IT FURTHER RESOLVED, that the Chairman is authorized to sign the necessary contracts after approval by the State Highway Engineer.

Route 10, Section 2-A.

State Highway Engineer Sloan presented the following bids received for the improvement of Route 10, Section 2-A, Broad Ave., Ridgefield and recommended award of contract to E. C. Humphrey, the lowest bidder, in the sum of $25,314.40.

E. C. Humphrey & Co.	$ 25,314.40
J. J. McGarry	26,200.00
Ciril C. Job & Son	27,420.45
Graham VanKeuren	27,480.15
R. A. Hamilton	28,696.40

On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission unanimously adopted the following resolution:

RESOLVED, that the State Highway Commission does hereby make award of contract for the construction of Route 10, Section 2-A, Broad Avenue, Ridgefield, to E. C. Humphrey & Company, at their's the lowest bid submitted, amounting to $25,314.40, and

BE IT FURTHER RESOLVED, that the Chairman is authorized to sign the necessary contracts after approval by the State Highway Engineer.

Route 14, Section 9.

State Highway Engineer Sloan reported to the Commission the final completion of Route 14, Section 9, Oceanview-Seaville, which was finally completed on February 28th, 1924. Commissioner Jelin informed the Commission that he had inspected this road and he moved that the same be accepted by the Commission. This was seconded by Mr. Kidde and adopted.

Route 6, Section 12-A.

State Highway Engineer Sloan recommended to the Commission the acceptance of the completed work on Route 6, Section 12-A, Shiloh Road and Broad Street, Bridgeton, as of October 2, 1923, the date of its final completion,and he recommended its acceptance and that extension of time be granted to the completion of the work, due to the fact that the contract was held up by trolley work in the City of Bridgeton. Commissioner Jelin reported having inspected this road and moved that the same be accepted by the Commission, said acceptance to carry an extension of time to the final completion of the work. This was seconded by Mr. Kidde and adopted.

Route 6, Section 10.

State Highway Engineer Sloan reported to the Commission that he had approved plans and specifications and the placing of advertisement for Route 6, Section 10, Marlboro-Quinton section. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission ratified, confirmed and approved the action of the State Highway Engineer in his approval of plans and specifications and advertisement of Route 6, Section 10, Marlboro-Quinton.

Route 7, Section 3.

State Highway Engineer Sloan reported the approval of plans and specifications and the placing of advertisement on Route 7, Section 3, Anderson's Corner to Colts Neck, and recommended ratification by the Commission. On motion by Mr. Kidde, seconded by

Mr. Jelin, the State Highway Engineer in approving plans and specifications and placing of advertisement for Route 7, Section 3, Anderson's Corner-Colts Neck Road.

Manasquan River Bridge, Route 4

State Highway Engineer Sloan reported approval of plans and specifications and the placing of advertisement on the Manasquan River Bridge in Monmouth and Ocean Counties, and recommended ratification of the same by the Commission. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission unanimously ratified, confirmed and approved the recommendation of the State Highway Engineer for Manasquan River Bridge to be constructed with double leaf bascule span.

Route 9, Section 12

State Highway Engineer Sloan presented an agreement to the Commission as approved by the Town of Westfield, whereby the Town of Westfield will reimburse the State Highway Commission for 403 square yards of reinforced concrete and 85 lineal feet of concrete curbing, this work representing 50% of the street intersections in the road contract on Route 9, Section 12, Plainfield-Westfield section, and he recommended approval of the same by the Commission. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission directed the approval of the agreement with the Town of Westfield on Route 9, Section 12, Plainfield-Westfield section, as recommended by the State Highway Engineer.

Route 16, Section 7, Princeton

State Highway Engineer Sloan recommended to the Commission the acceptance of an agreement whereby the Borough of Princeton will pay for work representing all the curbing and that portion of the concrete outside of the 22' width on Route 16, Section 7. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission approved the acceptance of agreement with the Borough of princeton, as recommended by the State Highway Engineer.

Federal Aid-
Route 16, Princeton-Somerville

On recommendation of the State Highway Engineer, Commissioner Kidde moved the approval of Federal Aid project statement for

Route 16, Princeton-Somerville section. This was seconded by Mr. Jelin and adopted.

Right of Way-Route 12, Section 6

On recommendation of the State Highway Engineer, Commissioner Jelin moved the approval of purchase of agreements on Route 12 property, as follows:

Parcel #2,	Section 6,	Wm. C. Rupell & Wife	-consideration	$ 50.00
" #17	" 7,	Wm. H. Hazen & Wife	- "	257.40
" #20	" 7,	Lars Swenson,	- "	300.00

This was seconded by Mr. Kidde and adopted.

Right of Way-Route 5, Section 11

On recommendation of the State Highway Engineer, Commissioner Jelin moved the approval of purchase agreements for Parcels #6 and #6-C, on Route 5, Section 11, Delaware-Belvidere section, from Dr. William J. Burd, for the consideration of $255.00. This was seconded by Mr. Kidde and adopted.

On recommendation of the State Highway Engineer, Commissioner Jelin moved that Parcel #6-A on Route 5, Section 11, be also purchased from Dr. Burd at the total sum of $1,229.00, it being understood that Dr. Burd will build his own fences and that his acceptance of this amount will stop condemnation proceedings now in progress. This was seconded by Mr. Kidde and adopted.

Right of Way-Route 12, Section 6

On recommendation of the State Highway Engineer, Commissioner Jelin moved the approval of the following purchase agreements on Route 12, Section 6:

Parcels # 5 and 6, John Vannatta, consideration $200.00 plus the cost of moving building, should the same be desired by the Commission in the future.
Parcel #7, Stewart Fritts & Wife, consideration $200.00.
Parcel #8, Stewart Sharp Estate, " $450.00.
Parcel #11, Geo. & Elizabeth Weidner, " $ 50.00 plus the cost of moving building, should the Commission so desire it in the future.

This was seconded by Mr. Kidde and adopted.

Detour-Route 6, Section 7.

On recommendation of the State Highway Engineer, Commissioner Kidde moved the approval of the following official detour for Route 16, Section 7, Bayard Lane, Princeton:

> "Beginning at the intersection of Route 13 and Route 16 (Bayard Lane and Nassau Street) in the Borough of Princeton and runs thence (1) easterly by Route 13 (Nassau Street) to Witherspoon Street; thence (2) northerly on Witherspoon

Street to Route 16 at Bolmer's Corner Road." This was seconded by Mr. Jelin and adopted.

Right of Way-Route 5, Section 8A

State Highway Engineer Sloan reported to the Commission that in the acquisition of the Merril property on Route 5, Section 8A, Great Meadows Grade Crossing Elimination, the action of the Commission formerly taken was to the effect that Mr. Merrill proceed with the moving of his own house and that the State pay the sum of $1,500.00. It has developed since, however, that the contract for the work at this point includes the moving of the house and Mr. Merrill is, therefore, satisfied to take the sum of $1,000.00 for his land, the house to be moved by the State. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission approved the payment of $1,000.00 to Mr. Merrill, for his property on Route 5, Section 8-A, Great Meadows Grade Crossing and condemnation proceedings now under way should now be withdrawn.

Perth Amboy Bridge-Federal Aid

State Highway Engineer Sloan presented to the Commission a proposed letter to be forwarded to the Federal Government on the matter of Federal Aid on the Perth Amboy Bridge. On motion, duly seconded, this matter was held until the next meeting of the Commission.

Cape May-Lewes Ferry

State Highway Engineer Sloan presented a communication received from C. D. Buck, Chief Engineer of the State Highway Department of Delaware, in which he advised that following the meeting held in Philadelphia with the State Highway Commission, he had conferred with the State Attorney of Delaware and he had been advised that the Delaware law bearing on the ferry is not properly drawn; therefore the State of Delaware cannot further consider this project until proper legislation is passed by the General Assembly which does not convene until January 2nd, 1925. On motion by Mr. Kidde, seconded by Mr. Jelin, the communication was ordered received and acknowledged, and the Secretary was directed to inform Mr. Buck that it may be possible for the Committee to meet during the coming summer at Cape May and discuss any action in furtherance of the project.

Advisory Board-Vehicular Tunnel

The Secretary presented a communication received from the Jersey City Chamber of Commerce, extending an invitation to the Commission for a conference with the Board of Directors of that body with reference to the Tunnel Approach Route as presented by the Jersey City Advisory Board. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission directed that the communication be acknowledged with the advice that the Commission will be glad to notify the Jersey City Chamber of Commerce when arrangements are being made for the Commissioners to accept their invitation. This will, however, be a few weeks later than the date in their letter.

On motion by Mr. Kidde, seconded by Mr. Jelin, the meeting was adjourned for luncheon at 1:30 P.M. to meet in regular session again at 3:00 P.M. The Commission reconvened again at 3:00 P.M. as agreed, with the same members present as at the morning session.

Equipment-War Surplus Materials

State Highway Engineer Sloan presented to the Commission a report from the Superintendent of Plant & Equipment concerning his activities at Washington in connection with the proposed legislation for the distribution of War Surplus Material. He explained that this report was presented in order that the Commission might become acquainted with the progress being made. On motion by Mr. Kidde, seconded by Mr. Stewart, the report was ordered received and placed on file.

Federal Aid Funds-General

State Highway Engineer Sloan presented to the Commission a statement showing 1923 Federal Aid funds reserved for county use, and against which the counties have not yet submitted plans and specifications. In connection with this matter the State Highway Engineer presented a list of State Highway projects for which plans are ready to be submitted to the Federal Government for Federal Aid, but which cannot proceed under Federal Aid until funds are provided by Congress for the years 1924 and 1925. He recommended to the Commission that in view of the fact that the counties have not yet submitted their plans and specifications that the Government give approval to five State Highway projects now ready for the Federal Aid, funds to come from the 1923 account, and the amount reserved for the counties to be taken from the 1924 and 1925 Federal Aid funds when apportioned and after plans and specifications are submitted from the counties. In this case the counties will lose $1,250.00 per mile, due to deductions in the Federal Aid per mile in the new allotments. On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission directed that the recommendation of the State Highway Engineer on the matter of Federal Aid for 1923, be approved and that the counties which have failed to take up their Federal Aid up to this time, be informed of this fact, and that the State Highway Commission does not desire these funds to remain dormant and is making use thereof, providing at the same time for the advancement of the county projects to the Federal Aid for the years 1924 and 1925. This was seconded by Mr. Stewart and adopted.

Road to State Institution-Jamesburg.

State Highway Engineer Sloan presented a report from the Superintendent of Maintenance, advising that the estimate of cost for the reconstruction of the approach to the New Jersey State Home for Boys at Jamesburg, would be in the sum of $11,897.15. On motion by Mr. Stewart, seconded by Mr. Kidde, the State Highway Commission directed that the Maintenance Department be authorized to reconstruct the approach to the New Jersey State Home for Boys at Jamesburg, in accordance with the estimate submitted, funds to be derived from General Maintenance funds of the Department.

Route 14-Egg Harbor

State Highway Engineer Sloan presented to the Commission a communication and resolution from the Common Council of Egg Harbor on the matter of new alignment for the State Highway between Mays Landing and Egg Harbor. State Highway Engineer Sloan informed the Commission that the plans as prepared for this section do not contemplate any construction at the point covered in the resolution. On motion by Mr. Stewart, seconded by Mr. Kidde, the resolution was ordered received and placed on file.

Essex County Road Repairs

On recommendation of the State Highway Engineer, Commissioner Stewart moved the approval of specifications for the furnishing and applying of surface dressing materials and broken stone for repair on various roads in the County of Essex in accordance with the Motor Vehicle Schedule. This was seconded by Mr. Kidde and adopted.

Sussex County Road Repairs

On recommendation of the State Highway Engineer, Commissioner Kidde moved the approval of specifications for maintenance materials for Sussex County to be used during 1924. This was seconded by Mr. Stewart and adopted.

Passaic County Road Repairs

State Highway Engineer Sloan presented for the approval of the Commission, with his recommendation, the award of contract for maintenance materials such as broken stone, slag and bitumen in Passaic County for 1924. He advised the Commission that Passaic County had exercised the privilege of making award to the bidder who submitted the lowest price on the largest amount of materials required on any road section. On motion by Mr. Stewart, seconded by Mr. Jelin, the State Highway Commission ordered the approval of contract as awarded by Passaic County for maintenance materials for 1924. Commissioner Kidde inquired whether any action had been taken toward investigating the conditions of the base as laid on Main Street, Clifton, in Passaic County, and suggested that this be done.

Employments

On recommendation of the State Highway Engineer, Commissioner Kidde moved the ratification of the following employments as made by the State Highway Engineer, since the last meeting of the Commission:

4-1-24	C. J. O'Brien	Rodman	$ 90.00 mo.
4-1-24	Jas. A. Darling,	"	90.00
4-1-24	Paul Kauffman,	"	90.00
4-1-24	Herbert Hartman,	Jr. Engineer	125.00
4-1-24	Carl Shurts,	Hr. Hwy.Insp.	125.00
4-1-24	Owen Malone,	Rollerman	150.00
4-1-24	Chas.O.Robbins,	Lab.Helper	90.00
4-7-24	Edw.J.Ricer,	Rodman	90.00
4-7-24	Thos.P.Pierce,	"	90.00
4-7-24	Wm.Ostenhout,	"	90.00
4-15-24	Henry Vandenberge,	Br. Foreman	155.00
3-28-24	Andrew Maroschek,	Br. Draftsman	175.00
4-2-24	Leo McCue,	Mechanic	.60 hr.
4-1-24	Jas. J. Lawlow,	"	.60
4-2-24	A. Frank,	"	.50
4-2-24	C. R. Moore,	"	.50
4-2-24	Frank G. Becker,	Gar. Asst.	.45
		" "	.50

This was seconded by Mr. Jelin and adopted.

Belmont Ave., Haledon
Passaic County, State Aid

On recommendation of the State Highway Engineer, Commissioner Jelin moved the acceptance and final payment on Belmont Avenue, Haledon, Passaic County, State Aid work, subject to a deduction of $71.31 on account of deficient material. This was seconded by Mr. Stewart and adopted.

Essex County-Motor Vehicle Aid

On recommendation of the State Highway Engineer, Commissioner Jelin moved the approval of the award of contract for the construction of a storm water drain system on Harrison Avenue, Roseland in Essex County to Joseph R. Fusco for the sum of $6,018.20. This was seconded by Mr. Stewart and adopted.

On recommendation of the State Highway Engineer, Commissioner Stewart moved the approval of the award of contract for a storm water drain system on Central Avenue, West Caldwell in Essex County, to Peter Scola, for the sum of $7239.00. This was seconded by Mr. Kidde and adopted.

Mercer County-Township Aid

On recommendation of the State Highway Engineer, Commissioner Jelin moved the acceptance and final payment on Hobson Avenue Drain in Hamilton Township, Mercer County, Township Aid, said acceptance carrying with it an extension of time from September 26th to November 24th. This was seconded by Mr. Kidde and adopted.

Essex County-Motor Vehicle Aid

On recommendation of the State Highway Engineer, Commissioner Kidde moved the approval of specifications for a storm water drain system on Stuyvesant Avenue, Irvington, Essex County. This was seconded by Mr. Stewart and adopted.

Essex County-Motor Vehicle Aid

On recommendation of the State Highway Engineer, Commissioner Jelin moved the approval of plans and specifications for the widening of pavement on Sanford Avenue, Irvington in Essex County, work to be done with asphaltic concrete. This was seconded by Mr. Stewart and adopted.

Morris County-Township Aid

On recommendation of the State Highway Engineer, Commissioner Kidde moved the approval for contract for the Dover-Mt. Freedom Road, Section 1, Randolph Township, Morris County, Township Aid. This was seconded by Mr. Stewart and adopted.

Morris County-Township Aid

On recommendation of the State Highway Engineer, Commissioner Stewart moved the approval of plans and specifications for Main and Central Avenues, Passaic Township, Morris County, Township Aid. This was seconded by Mr. Kidde and adopted.

Somerset County-Township Aid

On recommendation of the State Highway Engineer, Commissioner Kidde moved the approval of plans and specifications for Neshanic-Clover Hill Road with spur to Montgomery, Hillsborough Township, Somerset County, Township Aid. This was seconded by Mr. Stewart and adopted.

Mercer County-Motor Vehicle Aid

On recommendation of the State Highway Engineer, Commissioner Stewart moved the approval of Motor Vehicle Aid maintenance and betterment schedules and agreements for 1924 for Mercer County. This was seconded by Mr. Kidde and adopted.

Ocean County-Township Aid

On recommendation of the State Highway Engineer, Commissioner Jelin moved the approval of Township Aid Force Account agreements for Laurelton-Allen Osborne Bridge Road, Brick Township, Ocean County, Township Aid. This was seconded by Mr. Stewart and adopted.

Cape May County Repairs

On recommendation of the State Highway Engineer, Commissioner

Kidde moved approval of contract between the County of Cape May and Brown & Mathis for painting fences and posts along Wildwood Boulevard and the North Wildwood Road. This was seconded by Mr. Stewart and adopted.

Route 5, Section 12.

On recommendation of the State Highway Engineer, Commissioner Kidde moved that a formal communication be addressed to the Morris Canal & Banking Company, asking whether it would be possible to immediately abandon and unwater the old Morris Canal between the inclined plane and Ledgewood and the plane at Landing in order that the State Highway Commission could, in conjunction with its contract for work between Netcong and the Canal Culvert on Route 5, arrange to cut through the canal embankments and continue the work on State Highway Route 5 so as to eliminate the dangerous and unsatisfactory condition in the existing culvert under the canal and endeavor to have that work completed at the same time the pavement is ready for traffic on Route 5 between Netcong and the Canal Culvert. This was seconded by Mr. Stewart and adopted.

Route 7, Hamilton

On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission directed that a hearing be granted to the residents of Hamilton on Route 7 at the next meeting of the Commission, in order to determine the right of way for this section of road which is about to be advertised.

Detour-Route 9, Sections 12 & 15.

On recommendation of the State Highway Engineer, Commissioner Stewart moved the approval of the following revised detour for Route 9, Sections 12 and 15 on the Plainfield-Westfield and Westfield-Lehigh Valley Sections.

> "Beginning on Route 9 at Terrill Road, Fanwood; thence, northwesterly over Terrill Road to North Avenue; thence, easterly over North Avenue to the Plaza at Westfield; thence, southerly over the Plaza to South Avenue; thence, easterly over South Avenue to Ross Place, still easterly over Ross Place to Central Avenue; thence, southwesterly over Central Avenue to Lenox Corner; thence, southerly and easterly to Grand Street, Rahway; thence, easterly over Grand Street, Rahway to Route 1; thence, in a generally northeasterly direction along Route 1 through Wheatsheaf to Cherry Street, Elizabeth; thence, still along Route 1 over Cherry Stret to Westfield Avenue, Elizabeth, the extension of Route 9."

Also the following detour for west bound traffic:

> "Beginning on Route 9 in the Borough of Roselle at its intersection with Walnut Street (for trucks requiring high clearance) and Locust Street (for light taffic) and runs thence (1) by either of these two streets to First Avenue; thence (2) over First Avenue to Chestnut Street; thence (3) over Chestnut Street in a southerly direction to Route 1 at Wheatsheaf; thence (4) over Route 1 as described in the main detour above.

This was seconded by Mr. Jelin and adopted

Luppatcong Creek Bridge-Route 4

State Highway Engineer Sloan presented a report from the Construction Division on the unsatisfactory progress being made by the contractor on the construction of the bridge over Luppatcong Creek at M.P. 100.9 on Route 4, and he recommended to the Commission that the contractor be notified that all possible steps are to be taken to secure the completion of the Bridge on or before the adjusted time of completion, which is May 1st, and further that no request for extension of time will be given favorable consideration. On motion by Mr. Jelin, seconded by Mr. Stewart the State Highway Commission approved the recommendation of the State Highway Engineer and directed that a communication in accordance therewith be sent to the Bentley-Morrison Corp. for the construction of the bridge over the Luppatcong Creek at M.P. 100.9 on Route 4 at Keyport.

Passaic River Bridge-Route 1

Commissioner Kidde stated that he was in touch with the Superintendent of the work on the Passaic River Bridge and he had been informed that the granite work had been completed at a cost of about one-half the estimate. State Highway Engineer Sloan advised the Commission that the progress on the Passaic River Bridge was such that the bridge would swing for traffic on Friday, April 11th, and the entire work on the bridge would not exceed in cost the original estimate of $100,000.00.

Hearings-
Route 4-Toms River, & Routes 18 & 20

The Secretary reported that arrangements were made for the conducting of hearings on April 11th at Toms River on the matter of alignment of Route 4, and on April 12th at Atlantic City, preliminary to the taking over of Route 18 and 20, Westville-Millville and Pennsgrove-Atlantic City.

On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission adjourned at 4:30 P.M., to meet in regular session again on Tuesday, April 15th, at 10:30 A.M.

Respectfully submitted,
A. LEE GROVER,
Secretary.

MINUTES OF MEETING - April 15, 1924.

A regular meeting of the State Highway Commission was held at the Commission meeting room, Broad Street Bank Building, Trenton, on Tuesday, April 15, 1924. The meeting was called to order at 10:30 A. M. by Chairman Scott.

Present: Gen. H. L. Scott, Chairman, Messrs. Percy H. Stewart, Walter Kidde and Abraham Jelin.

Minutes Approved.

Commissioner Kidde reported having carefully read the minutes of the meeting held April 1, and he moved that the same be approved as mailed. This was seconded by Mr. Jelin and adopted.

Route #15, Millville.

State Highway Engineer Sloan brought before the Commission a communication from Mr. McAllister, Counsel for the Cumberland County Traction Company, together with a contract to be entered into between the State and the Cumberland County Traction Company for the necessary work in the track area through Millville. State Highway Engineer Sloan advises that while he was not in accord completely with the statements made by Mr. McAllister, yet it was very necessary that the work proceed at once, and he was present to recommend that the contract be approved with a proper letter to be forwarded to the Cumberland County Traction Company. After consideration Commissioner Stewart moved that the Chairman be authorized to execute the contract on behalf of the Commission and that the State Highway Engineer prepare a report for filing with the records, covering the position taken by him in this connection, and further that a communication be forwarded to the Cumberland County Traction Company advising that while the State Highway Commission does not agree with the Statement of facts presented in the communication of their Attorney, in the interest of harmony, the contract has been executed and a letter stating that the State Highway Commission agrees to pay for necessary excavation, be sent. This was seconded by Mr. Jelin and adopted.

Route #9, Section #12.

The State Highway Commission was informed by the Secretary that representatives of P. Camillo & Co. of Westfield, N. J., were present on the matter of the bids for Route #9, Section #12, Plainfield-Westfield Section. State Highway Engineer Sloan presented to the Commission the following report of bids received for this work and recommended that award of contract be made to P. Camillo & Co., the lowest bidders in the amount of $122,945.90.

P. Camillo & Co.	$122,945.90
Jos. F. Burke	127,943.76
Public Development & Cont. Co.	128,491.20
C. H. Winans Co.	129,809.05
Public Service Production Co.	130,805.75

On motion by Mr. Stewart, seconded by Mr. Kidde, the State Highway Commission unanimously adopted the followinf resolution:

> RESOLVED, that the State Highway Commission does hereby make award of contract for the construction of Route #9, Section #12, Plainfield-Westfield Section, to P. Camillo & Co., at their's the lowest bid amounting to $122,945.90, and
>
> BE IT FURTHER RESOLVED, that the Chairman is authorized to sign the necessary contracts after approval by the State Highway Engineer.

Route #6, Section #13.

The Secretary informed the Commission that representatives of the Acchione & Canuso Paving Company were present on the matter of bids received for Route #6, Section #13, Bridgeton-Marlboro, on which they were the low bidders. State Highway Engineer Sloan presented the following bids received for the construction of Route #6, Section #13, Bridgeton-Marlboro Section, and recommended award of contract to Acchione & Canuso Paving Company of Philadelphia, at their's the lowest bid in the amount of $255,283.54.

Acchione & Canuso Paving Co.	$ 255,283.54
E. Riley Mixner Co.	259,841.35
R. L. Bonham Co.	266,805.40
Michael Staub	268,483.75

Union Paving Co.	301,468.62

On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission unanimously adopted the following resolution:

> RESOLVED, that the State Highway Commission does hereby make award of contract for the construction of Route #6, Section #13, Bridgeton-Marlboro Section to Acchione & Canuso Paving Co., of Philadelphia, at their's the lowest bid in the amount of $255,283.54 and
>
> BE IT FURTHER RESOLVED that the Chairman is authorized to sign the necessary contracts after approval by the State Highway Engineer.

Fenwick Creek Bridge, Route #6.

The Secretary presented to the Commission a communication from the Attorney General on the matter of the Claim of Campbell Company on the Fenwick Creek Bridge on Route #6, and he requested that the Commission go into conference on this matter. After the conference was over Commissioner Stewart moved that in the case of Campbell vs. the County of Salem, the State Highway Commission advise the Attorney General that, in the judgment of the Commission, it is a most unjust claim and that it is the desire of the State that the suit be prosecuted. This was seconded by Mr. Jelin and adopted.

State Highway Route #7, through Hamilton.

The Secretary informed the Commission that, in accordance with directions, the residents along State Highway Route #7 at Hamilton, were invited to appear before the State Highway Commission today for the purpose of granting a hearing on the matter of alignment on Route #7 at that point, and he informed the Commission that the delegation from Hamilton was now present. On motion, duly seconded, a hearing was granted. The Secretary presented in this connection a telegram from Mayor C. E. Hetrick of Asbury Park, protesting against the change in Route #7 at Hamilton. The Secretary also presented a resolution from the Board of Freeholders of Monmouth County protesting against the change in alignment for Route #7 in the vicinity of Hamilton and against the abandonmnet of the existing Route #7 when such a change is made. On motion by Mr. Jelin, seconded by Mr. Stewart, the telegram and resolution were ordered received and placed on file.

Mr. Hight of Hamilton acted as spokesman for the delegation and stated that the residents were still interested in having the State Highway Commission consider the construction of Route #7 upon the existing alignment through Hamilton rather than making a change therein to the line proposed by the Engineers. A plan was exhibited and the residents of Hamilton were asked what proposition they would have to make as to a straightening of the line through Hamilton. Assistant Construction Engineer Moore was present in the matter and presented the program of the Engineering Department for the change of alignment in the vicinity and stated that the line proposed by the Engineers would save $130,000 in the cost over the construction through Hamilton on the present line, due, in a great part, to the need for a new bridge construction. After considerable discussion Chairman Scott informed the visiting delegation that the State Highway Commission has the power to lay out routes in any way it sees fit, but it is not desirous of using steam roller methods anywhere. He asked whether there was any opposition from residents of the locality, and Mr. Flitcroft, of Farmingdale, presented a communication from Mr. S. L. Vanheusen, President of the Rural Letter Carrier's Association, expressing the hope that the Commission will lay out a straight line for Route #7 in this vicinity. Mr. Flitcroft also stated that he was a contractor and realized the value, in the future, of the constructing of roads of as perfect alignment as possible. After further discussion Commissioner Stewart moved that the Engineering Department be instructed to prepare plans and specifications for the advertisement of Route #7 in the vicinity of Hamilton on the alignment as recommended by the Engineers. This was seconded by Mr. Jelin and adopted.

Morris Canal Route #5.

The Secretary presented a communication from the Morris Canal & Banking Company on the matter of the drainage of the Morris Canal on Route #5 between Ledgewood and Landing, which was requested by the State Highway Commission at its last meeting. In this communication Dr. Kummel, Secretary to the Morris Canal & Banking Company, requested information as to the particular location desired to be drained by the Commission and, on motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission directed that the communication be referred to the State Highway Engineer in order that he might be furnished with all the necessary data and reports.

Browns Mills-Lakehurst Road, Burlington County

The Secretary presented a resolution from the Burlington County Board of Freeholders, in which they take over the road from Browns Mills to Lakehurst at the Ocean County Line, as a county road in accordance with agreement with the State Highway Commission at its last meeting. On motion by Mr. Jelin, seconded by Mr. Kidde, the resolution was received and placed on file.

APR 15 1924

Route #14, between Egg Harbor and Mays Landing

The Secretary presented a communication from the Egg Harbor Chamber of Commerce requesting an appointment in the very near future on the matter of State Highway improvements on Route #14 between Egg Harbor and Mays Landing. In this connection the Secretary presented a communication from Mr. William E. Bayer on the matter of railroad crossings and curves on the Mays Landing-Egg Harbor Road. Commissioner Kidde directed the attention of the Commission to the fact that there was consideration ~~being~~ given at the conference held in Atlantic City on Saturday, April 12, for a plan whereby the work on the Egg Harbor-Mays Landing Road would be delayed in order to provide funds for the early completion of Route #20 from Westville to Malaga and also for the completion of State Highway Route #4.

White Horse Pike Widening.

State Highway Engineer Sloan inquired whether the State Highway Commission would take any action at this time with reference to the widening of the White Horse Pike, and he recommended to the Commission that a gravel widening be made for ten feet on one side of the present pavement with a view toward placing permanent pavement thereon and making a hard surfaced road 29' in width. After further discussion, Commissioner Kidde moved that that the State Highway Engineer be instructed to prepare plans and specifications for the widening of the White Horse Pike from Berlin to Absecon, necessary for widening a ten foot strip on which, at some later date, a hard surface pavement may be placed, and that these plans be presented to the State Highway Commission at the earliest possible moment for approval and advertisement. This was seconded by Mr. Jelin and adopted.

Route #14, Egg Harbor-Mays Landing.

Commissioner Kidde moved that in view of the fact that the State Highway Commission has taken over Routes #18 and #20, effective May 1st, the Egg Harbor-Mays Landing Section of Route #14 is not so much a necessity at the present time and the State Highway Engineer be instructed to abandon work on the Egg Harbor-Mays Landing Road for the present season and transfer the survey corps from this work to the work on the White Horse Pike. This was seconded by Mr. Jelin and adopted.

In this connection Commissioner Jelin moved that the Egg Harbor Chamber of Commerce be advised of the Commission's action and that an appointment will, therefore, not be necessary at this time. This was seconded by Mr. Kidde and adopted.

On motion by Mr. Jelin, seconded by Mr. Stewart, the communication from Mr. William E. Bayer was ordered received and placed on file.

Westville Invitation.

The Secretary presented a communication from Mayor A. E. Heal of Westville, New Jersey, inviting the Commission to attend a shad dinner especially arranged for them at Topin Inn in Westville, at some date which the Commission may select. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission directed that the invitation be accepted and the Mayor of Westville be advised that when the State Highway Commission takes up for consideration the hearing in the City of Camden, on the proposed Crescent Boulevard, at that time a date will be fixed for the dinner.

The Schedule of Business was next taken up for consideration item by item as follows:

Route #9, Section #11, Lincoln Ave., Plainfield.

State Highway Engineer Sloan reported to the Commission the approval of plans and specifications and the placing of advertisement on Route #9, Section #11, Lincoln Avenue, Plainfield Section. On motion by Mr. Stewart, seconded by Mr. Jelin, the State Highway Commission unanimously ratified, confirmed and approved this action on the part of the State Highway Engineer.

Route #16, Section #8 Harlingen Cut-Off

State Highway Engineer Sloan reported to the Commission the approval of plans and specifications and the placing of advertisement on Route #16, Section #8, Harlingen Cut-Off. On motion by Mr. Stewart, seconded by Mr. Jelin, the State Highway Commission unanimously ratified, confirmed and approvee the action of the State Highway Engineer.

Beaver Brook Bridge, Route #5, Section #11

State Highway Engineer Sloan reported the approval of plans and specifications and the placing of advertisement for the Beaver Brook Bridge at M.P. 5.3 on Route #5, Section #11. On motion by Mr. Stewart, seconded by Mr. Jelin, the State Highway Commission unanimously ratified, confirmed and approved this action on the part of the State Highway Engineer.

Route #12, Section #6, Right of Way.

On recommendation of the State Highway Engineer, Commissioner Stewart moved the approval of the following purchase agreements on Route #12, Section #6, Port Colden-Stephensburg:

Parcel #3,	Estate of Alfred H. Hann,	consideration	$1,608.10
Parcel #4,	Hattie Johnson, widow,	"	173.45
Parcel #9,	Jacob Watters & Wife,	"	85.50

This was seconded by Mr. Jelin and adopted.

Route #12, Section #7, Right of Way.

On recommendation of the State Highway Engineer, Commissioner Stewart moved the approval of purchase agreements for property on Rt. #12 Section #7, Stephensburg-Hackettstown as follows:

Parcel #12,	Robert A. Osmun,	consideration	$297.75
Parcel #14,	Frederick Buckeley,	"	690.00
Parcel #18,	Wm. J. Axford,		18.60
Parcel #19,	Harry M. Allen	"	28.00
Parcel #23,	Edward Babcock,	"	1131.90

This was seconded by Mr. Jelin and adopted.

Route #8, Section #11, Right of Way.

On recommendation of the State Highway Engineer, Commissioner Stewart moved approval of purchase agreement for Parcel #4 on Route #8, Section #11, Delaware-Belvidere Section grom Philip B. Bean Estate, for the consideration of $600.00. This was seconded by Mr. Jelin and adopted.

Route #9, Section #12, Right of Way.

On recommendation of the State Highway Engineer, Commissioner Jelin moved approval of purchase of Parcel #1 on Route #9, Section #12, Plainfield-Westfield Section, from P. Erbotta & Wife for the consideration of $117.00. This was seconded by Mr. Stewart and adopted.

Route #16, Section #3, Right of Way.

On recommendation of the State Highway Engineer, Commissioner Jelin moved approval of purchase agreements for Parcels #4A, #4B and #4C on Route #16, Section #3, Somerville-Pluckemin, from the Far Hills Land Corporation, for the consideration of $1800.00. This was seconded by Mr. Stewart and adopted.

Route #4, Section #21, Right of Way.

State Highway Engineer Sloan recommended to the Commission that in view of the fact that Mrs. Ethelwyn Brower has rebudiated her agreement to convey to the State Parcel #3 on Route #4, Section #21, Point Pleasant-Laurelton, for the sum of $121.00, the State Highway Commission authorize that the property be acquired by condemnation. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission directed that the agreement as signed by Mrs. Brower be placed on record by the Department and that no further action be taken at this time.

Route #8, Mountain View Right of Way.

On recommendation of the State Highway Engineer, Commissioner Stewart moved approval of an offer of $3,750.00 to be made to George Zeliff for Parcel #6 on Route #8, Mountain View Grade Crossing Elimination, and in the event of his failure to accept that amount, that condemnation be entered into in accordance with the following resolution:

> RESOLVED, that this Commission hereby determines to acquire in the name of the State of New Jersey, for public use in construction of State Highway Route #8, Mountain View, ALL that certain Lot, tract or parcel of land and premises, situate, lying and being in the State of New Jersey, and more particularly described as follows:

PARCEL #6

Beginning at a point in the Northerly side line of the Beavertown Road where the same is intersected by the proposed new Westerly right of way line of State Highway Route 8 of the New Jersey State Highway System at Station 12 plus 22.04 said point being distant twenty-five (25') feet westerly from measured at right angles to the proposed center line of Route #8, as shown on a plan entitled "New Jersey State Highway Department Route #8, Elimination of R.R. Grade Crossing, Property to be acquired from George Zeliff, Borough of Mountain View, Wayne Township, Passaic County, Scale 1" = 40' March 1924."

Thence (1) through property of grantor parallel to and twenty-five (25') feet distant from said proposed new center line of Rt. 8 North three degrees, ten minutes East (N 3°-10'E) a distance of sixty-three (63') feet to the Southerly line of the Morris Canal;

Thence (2) along the Southerly line of the Morris Canal, South sixty-nine degrees, eight minutes, thirty seconds East (S.69°-08'-30"E) a distance of fifty-two and forty-eight one-hundreths (52.48) feet to the Easterly right of way line of said Route 8, said point being twenty-five (25') feet distant Easterly from, measured at right angles to the proposed new center line at Station 11 plus 75.0;

Thence (3) along said Easterly right of way line of Route 8 through land of grantor parallel to and twenty-five (25') feet distant from proposed center line South three degrees, ten minutes West (S.3°-10'W) a distance of forty-six (46') feet to the present Northerly side line of Beavertown Road;

Thence (4) along the said present Northerly side line of the Beavertown Road north eighty-eight degrees, two minutes, eight seconds West (N.88°-02'-08"W) to the point and place of beginning.

CONTAINING sixty-three one-thousandts (0.063) acres, be the same more or less, as shown on said plan.

Intending to convey all that land now owned or controlled by the party of the first part that lies between the proposed right of lines twenty-five (25') feet on each side of the proposed center line of Route #8 from the Northerly side line of the Beavertown Road on the South to the Southerly line of the Morris Canal on the North as shown on said plan hereto attached.

It is hereby understood and agreed that all buildings now encroaching on the property hereinabove described are to be removed from within the limits of the right os way by the grantor at his own cost and expense within 30 days from the date of acceptance of this agreement by the State Highway Commission.

The State Highway Engineer is hereby authorized and directed on behalf of this Commission, to make an offer of the sum of $3,750.00 to the owners or owner of said lands and premises for the conveyance of the same to the State of New Jersey free and clear of all encumbrances, and, upon the failure of such owner or owners to accept such offer, or if for any other reason said lands and premises cannot be immediately acquired by agreement with such owner or owners, then the Attorney General of the State of New Jersey is hereby authorized to institute condemnation proceedings for the acquisition of said lands and premises.

This was seconded by Mr. Jelin and adopted.

Right of Way-Route 5, Section 11

State Highway Engineer Sloan reported to the Commission that a representative of the State Agricultural College had gone to the property of Gertrude Alliger, Parcels #10 and #10-A on Route 5, Section 11, Delaware-Belvidere section, and he would recommend that an offer of $2275.00 be made to Gertrude Alliger and in the event of failure to accept, that the property be acquired in accordance with the following resolution:

> RESOLVED, that this Commission hereby determines to acquire in the name of the State of New Jersey, for public use in the construction of State Highway Route 5, Section 11, ALL that certain Lot, tract or parcel of land and premises, situate, lying and being in the State of New Jersey, and more particularly described as follows:

PARCEL #10

BEGINNING at a concrete monument in the dividing line between lands of grantor on the southwest, and lands of now or formerly of the Delaware, Lackawanna, and Western Railroad Company on the northeast, said point being forty-seven and ninety-six one hundredths (47.96) feet northeasterly from, measured normal to Station 70 plus 74.13 of proposed center line of State Highway Route 5, Section 11, as shown on plan entitled "New Jersey State Highway Department, Route 5, Section 11, Property to be Acquired from Mrs. Gertrude E. Alliger, Township of Knowlton, County of Warren, Scale 1" = 50', Nov. 20, 1923"; and running

Thence (1) along said dividing line, South twenty-eight degrees, forty-six minutes East (S28°46'E) a distance of five hundred two and eighty-nine one hundredths (502.89) feet to another concrete monument at a corner of said Company's land;

Thence (2) along land of said Railroad Company, South seventy-one degrees, forty-three minutes West (S71°43'W) a distance of sixteen and seventy-seven one hundredths (16.77) feet, to another corner of land of said Railroad Company at the southwesterly side of State Highway Route 5, Section 11, as now existing;

Thence (3) still along land of the said Railroad Company, South twenty-eight degrees, thirty-one minutes, thirty seconds East (S 28° 31'30"E) a distance of eight hundred eighty and eleven one hundredths (880.11) feet to a point in the dividing line between lands of the grantor and lands of the Delaware Cemetery Association:

Thence (4) along said dividing line, South sixty-five degrees, fifty-seven minutes West (S65°57'W) a distance of forty-three and fifty-two one hundredths (43.52) feet to a point in the proposed southwesterly right of way line of said State Highway Route 5, distant forty-six (46) feet southwesterly at right angles from proposed center line of pavement, thereof, at Station 84 plus 49.99;

Thence (5) parallel to and forty-six (46) feet distant southwesterly at right angles from said proposed center line, North twenty-eight degrees, no minutes and thirty seconds West (N28°0'30"W) a distance two hundred seventy-eight and seventy-two one hundredths (278.72) feet , to a point opposite Station 81 plus 71.27 of said center line;

Thence (6) North twenty-nine degrees, no minutes, nine seconds West (N29°0'9"W) a distance of six hundred six and thirty-five one hundredths (606.35) feet to a point opposite Station 75 plus 62.78 of said proposed center line of pavement, and thirty-three (33) feet distant southwesterly at right angles therefrom;

Thence (7) parallel to and thirty-three (33) feet distant southwesterly at right angles from said proposed center line, North thirty degrees, fifty-six minutes West (N30°56'W) a distance of four hundred ninety-six and ninety-two one hundredths (496.92) feet to a point in the dividing line between lands of grantor, and lands of now or formerly Edwin M. Allen;

Thence (8) along said dividing line between land of grantor, and said land of Allen, and continuing in the same direction along dividing line between lands of grantor, and land of the said Railroad Company, North sixty-four degrees, fifty-four minutes East (N 64°54'E) a distance of eighty-one and thirty-eight one hundredths (81.38) feet to the point and place of Beginning;

CONTAINING one and six hundred thirteen one thousandths (1.613) acres, exclusive of existing roadway, be the same more or less;

It being the intention of the grantor to convey to the State of New Jersey all that portion of her land lying between land of the Delaware, Lackawanna and Western Railroad Company on the northeast, the proposed southwesterly right of way line of State Highway Route 5, Section 11 on the southwest, (varying from forty-six (46) feet to thirty-three (33) feet southwesterly from the center line of pavement thereof) and extending from land of the Delaware Cemetery Association on the southeast, to land of Edwin M. Allen on the northwest;

Together with all her right, title and interest, in and to the former Township Road (now State Highway Route 5, Section 11) lying adjacent to the southerly portion of the parcel hereby conveyed, and on the northeast side thereof, and extending from land of the Rector, Warden and Vestryment of the St. James Church, Knowlton (original graveyard) on the southeast, to the northwest end of land conveyed by John Burd January 16, 1869, to the Delaware, Lackawanna and Western Railroad Company on the northwest;

Together with the right to deepen existing ditch on land of grantor adjacent to the northwesterly side of land of the Delaware Cemetery Association, about opposite Station 84 plus 48, so as to permit the flowage of water from storm water drain in front of the Cemetery;

Together with Parcel #10-A described as follows:

PARCEL #10-A

BEGINNING at a point in the dividing line between lands of grantor on the northwest, and land of now or formerly of Mary C. VanKirk on the southeast, said point being forty-six (46) feet distant southwesterly at right angles from Station 90 plus 00.06 of proposed center line of pavement of State Highway Route 5, Section 11, as shown on plan attached hereto, entitled "New Jersey State Highway Department, Route 5, Sec. 11. Property to be Acquired from Mrs. Gertrude M. Alliger, Township of Knowlton, County of Warren, Scale 1"= 50' Nov. 19, 1923"; and running

Thence (1) parallel to and forty-six (46) feet distant at right angles from said center line of pavement, North twenty-eight degrees, no minutes, thirty seconds West (N28°0'30"W) a distance of two hundred fifty-seven and six tenths (257.60) feet to land of Devisees of John Burd;

Thence (2) along land of Devisees of John Burd, North sixty-three degrees, fifty-six minutes, thirty seconds East (N63°56'30"E) a distance of forty-six and eleven one hundredths (46.11) feet to a point in the existing State Highway Route 5, Section 11, in the line of lands of the Delaware, Lackawanna and Western Railroad Company;

Thence (3) along said line, South twenty-eight degrees, thirty-one minutes, thirty seconds East (S28o31'30"E) a distance of two hundred fifty-five and seventy-four one hundredths (255.75) feet to a point in the aforesaid dividing line between land of grantor and land of Mary C. VanKirk;

Thence (4) along said dividing line, South sixty-one degrees, thirty-eight minutes, thirty seconds West (S61°38'30"W) a distance of forty-eight and thirty-five one hundredths (48.35) feet to the point and place of Beginning;

CONTAINING twenty-four one hundredths (0.24) acres, be the same more or less, exclusive of existing roadway;

It being the intention of the grantor to convey to the State of New Jersey all that portion of her land which lies between land of the Delaware, Lackawanna and Western Railroad Company on the northeast, a line parallel to and forty-six (46) feet distant southwesterly at right angles from proposed center line of pavement of State Highway Route 5, Section 11, on the southwest, and extending from land of Mary C. VanKirk on the southeast, to land of the Devisees of John Burd (separate new cemetery lots) on the northwest.

Together will all her right, title, and interest, to and in the former Township Road adjacent to the above described parcel on the northeast side thereof, and extending from land of Mary C. VanKirk on the southeast, to land of the Rector, Warden and Vestryment of the St. James Church, Knowlton (original grave yard) on the northwest.

The State Highway Engineer is hereby authorized and directed, on behalf of this Commission, to make an offer of the sum of $2,275.00 to the owner or owners of said lands and premises for the conveyance of the same to the State of New Jersey free and clear of all encumbrances, and upon the failure of such owner or owners to accept such offer, or if for any other reason said lands and premises cannot be immediately acquired by agreement with such owner or owners, then the Attorney General of the State of New Jersey is hereby authorized and directed to institute condemnation proceedings for the acquisition of said lands and premises.

This was seconded by Mr. Stewart and adopted.

Right of Way-Route 14, Section 7.

On recommendation of the State Highway Engineer, Commissioner Stewart moved the adoption of the following condemnation resolution for the acquisition of Parcel #1, on Route 14, Section 7, Petersburg-Greenfield section, in view of the fact that this property title belongs to unknown heirs and title cannot be given to the State by Mrs. Laura Lewis. This was seconded by Mr. Kidde and adopted.

RESOLVED, that this Commission hereby determines to acquire in the name of the State of New Jersey, for public use in the construction of State Highway Route 14, Section 7, ALL that certain Lot, tract or parcel of land and premises, situate, lying and being in the State of New Jersey and more particularly described as follows:

Beginning at a corner to lands of Laura Lewis and Emma Townsend in the westerly line of State Highway Route 14, Section 7, known as the New Bridge Road, leading from Seaville to Tuckahoe, sixteen feet and five tenths of a foot (16.5') from the center line thereof as measured at right angles thereto at Station 1228 plus 50.57 and running

Thence (1) along the line of lands of said Lewis and Townsend, South sixty-nine degrees, forty-nine minutes and no seconds West, sixteen feet and five tenths of a foot (16.5') to a point;

Thence (2) through the lands of Laura Lewis, of which this tract about to be conveyed is a part, North twenty-one degrees and twenty-nine minutes West, one hundred and thirty-nine feet and forty-two one hundredths of a foot (139.42') to a point;

Thence (3) still through the lands of Laura Lewis, curving to the right with a radius of fifty-seven hundred and sixty-two feet and sixty-five one hundredths of a foot (5762.65') a distance fifty-six feet and sixty-eight one hundredths of a foot (56.68') to the lands of Frank J. Wilson Estate;

Thence (4) along the line of lands of said Lewis and Wilson North sixty-nine degrees and forty-nine minutes East, sixteen feet and five tenths of a foot (16.5') to the westerly side of the New Bridge Road;

Thence (5) along the westerly side line of New Bridge Road and lands of said Lewis, South twenty-one degrees, and twenty-nine minutes East, one hundred and ninety-six feet and one tenth of a foot (196.1') to the point of beginning.

CONTAINING seventy-three one thousandths parts of an acre (0.073A) more or less.

The State Highway Engineer is hereby authorized and directed on behalf of this Commission, to make an offer to the owner or owners of said lands and premises for the conveyance of the same to the State of New Jersey free and clear of all encumbrances, and upon the failure of such owner or owners to accept such offer, or if for any other reason said lands and premises cannot be immediately acquired by agreement with such owners or owner, then the Attorney General of the State of New Jersey is hereby authorized and directed to institute condemnation proceedings for the acquisition of said lands and premises.

Right of Way-Route 9, Section 11

State Highway Engineer Sloan presented to the Commission a report from the Right of Way Engineer Meeker on an inspection made in company with Commissioner Stewart, of the property of the Estate of Adam Dealaman on Route 9, Section 11. Commissioner Stewart informed the Commission that he had personally viewed this property and he would move approval of purchase agreement for the sum of $2400.00. This was seconded by Mr. Jelin and adopted.

Amboy Bridge-New

State Highway Engineer Sloan presented a proposed communication to be forwarded to the Federal Government on the matter of Federal Aid for the Perth Amboy Bridge. On motion by Mr. Jelin, seconded by Mr. Stewart, the communication was ordered laid over for later study.

Township Aid-Morris County.

Commissioner Kidde reported to the Commission the fact that during the morning he had received a delegation from Washington Township, Morris County, headed by Mr. Cassel, Chairman of the Township Committee,on the matter of Township roads to be improved in Washington Township. He informed the Commission that the difficulties in this case were apparently closed when he suggested that Assistant State Highway Engineer Reed furnish to the Township the necessary specifications and that the work be let by contract rather than force account; further, he had suggested that the Inspector on this work be changed.

Route 11, Washington Ave.,Belleville

Commissioner Kidde also reported that he had made a visit to the Town of Belleville and he had gone over specifications and estimates for the cost of the improvement of Washington Avenue, Belleville. He advised that he had informed the Town of Belleville that the State was ready to pay for a 22' width including the trolley track area, if the Town of Belleville would provide necessary drainage and extra width pavement. He stated that the Town of Belleville was anxious to secure a 60' width pavement but this width would destroy about 200 trees now existing on Washington Avenue, which was the intention of the local authorities to cut in order that Washington Avenue might become a public thoroughfare. He inquired whether the Commission would interfere in the matter of the removal of trees. Commissioner Stewart stated that he felt that this matter was entirely out of the jurisdiction of the Commission, the State Highway Commission being only concerned in a 22' pavement.

State Highway Engineer Sloan inquired whether the property now existing on Washington Avenue could bear assessment for a width of pavement from 22' to 60'. Commissioner Kidde stated that during his conference with the Mayor of Belleville he had suggested that they take up with the County of Essex the question of receiving additional aid from County funds. On motion by Mr. Stewart, seconded by Mr. Jelin, the reports as presented by Commissioner Kidde were ordered received and properly recorded.

State Automobiles

State Highway Engineer Sloan directed the attention of the Commission to the fact that in a number of instances State Departments, who already have automobiles, are calling upon the State Highway Department garage for automobile service and he requested information as to what extent the State Highway Department was to supply cars to other State Departments. No definite action was taken by the Commission on the matter at this time.

On motion by Mr. Kidde, seconded by Mr. Stewart, the Commission recessed for luncheon at 1:30 P.M. to meet in regular session again at 3:00 P.M. The Commission meeting reconvened at 3:00 P.M. as agreed, with the same members present as at the morning session.

Route 1, Lincoln Highway Bridge, over Hackensack River

State Highway Engineer Sloan presented to the Commission a communication from Col. H. C. Newcomer of the War Department Engineers' Office, on the matter of application filed by the State Highway Commission for Federal permit to reconstruct the draw span on the Lincoln Highway Bridge across the Hackensack River between Jersey City and Kearny, New Jersey. Col. Newcomer advised that in his opinion, the draw spans proposed are inadequate to provide for the needs of the present navigation, and he further advised that navigation required a draw of at least 125' and as much wider as practicable. He further informed the Commission that a proper hearing on the question of all bridges affected in this vicinity, will be held, and he suggested that the State Highway Commission make some modifications in its plans prior to that meeting and have a representative in attendance at the meeting.

State Highway Engineer Sloan informed the Commission that to arrange for the openings as requested by the War Department, would require an additional expenditure above the $450,000.00 estimated for the work, of a sum of $250,000.00 and he recommended that the Engineering Department be authorized to prepare a preliminary sketch showing a double leaf bascule span to replace the present drawspan on the Hackensack Bridge, which would probably give a clear opening of 150'. State Highway Engineer Sloan called attention to the fact that there would be credited to this work the sum of $100,000.00 which the Counties of Essex and Hudson had received on account of damage to the Hackensack Bridge by collision in 1922. After discussion, Commissioner Jelin moved that the recommendation of the State Highway Engineer be approved and that the Engineering Department be authorized to prepare a sketch showing double leaf bascule span in this location, same to be used in connection with the hearing to be held by the War Department and that Mr. Vogel, Bridge Engineer be delegated to attend this hearing.

Route 5, Madison-Chatham

State Highway Engineer Sloan presented to the Commission a statement prepared by the Construction Division for the improvement of the trolley track area on Route 5 in the Borough of Madison and in the Borough of Chatham, showing a total cost, including new track material in the Borough of Madison of $220,811.50 and in the Borough of Chatham of $192,140.50. On motion by Mr. Jelin, seconded by Mr. Kidde, the report was ordered received and placed on file.

Route 8, Mountain View Grade Crossing

State Highway Engineer Sloan presented to the Commission a communication received from Carl T. Forsberg, in which he requested plans and agreements for the Lackawanna Railroad grade crossing elimination at Mountain View. He informed the Commission that Mr. Forsberg had been previously informed that these documents were on file in the Trenton Office and were open to inspection. He recommended to the Commission that the policy of not furnishing copies of agreements and plans for such work be continued, and that Mr. Forsberg be advised of this policy. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission directed that Mr. Forsberg be advised that the documents are on file in the office of the Commission at Trenton and are available for public inspection at any time.

Permits

On recommendation of the State Highway Engineer, Commissioner Stewart moved approval of permission being granted to the Fire

Department of Hightstown for the closing of Route 1 in the Town of Hightstown, from 8:00 P.M. to midnight on May 30th, 1924, for the purpose of holding a benefit dance for the Fire Department. This was seconded by Mr. Kidde and adopted.

Employments

On recommendation of the State Highway Engineer, Commissioner Stewart moved the approval of the following list of employments as made by the State Highway Engineer since the last meeting of the Commission:

4-16-24	F. L. Hest,	Br. Insp.Amboy Br.	$ 200.00 mo.
4-3-24	John M. Pickell,	Rollerman,	150.00
4-1-24	L. E. Andrew,	Reg.Appt.Div.Engr.	325.00
4-9-24	Jas. H. Curran,	Asst.Foreman(reapp)	125.00
4-7-24	Peter Mitchell,	Mechanic	.60 hr.
4-10-24	T. S. Gravatt,	"	.65
4-7-24	Wallace Lozaw,	Motor Truck Driver	.40
4-1-24	F. W. Vanaman,	" " "	.40
4-7-24	Franklin Wilbert,	" " "	.40
4-7-24	Albert Worth,	" " "	.40
4-7-24	Jos. Hand,	" " "	.40
4-1-24	Jas. R. Day,	" " "	.40
4-7-24	Jester Vanaman,	" " "	.40
4-1-24	H. G. Forth,	" " "	.40
4-7-24	Cashman Vaughn,	" " "	.40
4-1-24	C. T. Gilliland,	" " "	.40
4-7-24	Paul Ditton,	" " "	.40
4-7-24	Earl Bonnell,	" " "	.40
4-1-24	Alvin Gannt,	" " "	.40
4-7-24	Bertrina Cranmer,	" " "	.40
4-7-24	Alvin Jillson,	" " "	.40
4-7-24	Thomas Gordall,	" " "	.40
4-7-24	Fred Ridgway,	" " "	.40
4-7-24	J. Smires, Jr.	" " "	.40
4-7-24	Oscar Couch,	" " "	.40

This was seconded by Mr. Jelin and adopted.

Township Aid Cancellations

On recommendation of the State Highway Engineer, Commissioner Stewart moved the approval of the cancellation of the following unexpended balances on Township Aid work:

Claremont-Post-Kuhnhardt Rd. Sec. 1, Bernards Twp., Somerset County, - $590.71.
Pittstown-Quakertown Rd., Franklin Township, Hunterdon County - $10.43.
Great Creel Rd., Galloway Township, Atlantic County - $ .04.
Swedesboro-Harmony School Rd., Harrison Township, Gloucester County, $10.87.
Mullica Hill-Bridgeport Rd., Woolwich Township, Gloucester County - $368.92.
East Landis Ave., Landis Township, Cumberland County - $ .46.

This was seconded by Mr. Jelin and adopted.

Freehold-Smithburg Road, Monmouth Co., Twp. Aid.

On recommendation of the State Highway Engineer, Commissioner Jelin moved approval of plans and specifications for the Freehold-Smithburg Road, Section 2, Monmouth County, funds to be provided from State Aid and Motor Vehicle Aid Account. This was seconded by Mr. Kidde and adopted.

Township Aid-Atlantic County

On recommendation of the State Highway Engineer, Commissioner Jelin moved approval of award of contract by Weymouth Township on the Buena-Tuckahoe Road, Section 2, Atlantic County, Township Aid. This was seconded by Mr. Stewart and adopted.

Motor Vehicle Aid-Hunterdon Co.

On recommendation of the State Highway Engineer, Commissioner Jelin moved approval of specifications for repairs to the White House-Flemington Road in Hunterdon County, work to be done from Motor Vehicle Aid Account at an estimated cost of $40,000.00. This was seconded by Mr. Stewart and adopted.

Sussex-Port Jervis Road, High Point Park Road.

State Highway Engineer Sloan presented a report from Assistant State Highway Engineer Reed on the maintenance of the road leading to High Point Park, in which Mr. Reed quoted correspondence with Mr. J. J. Stanton, Secretary of the High Point Park Commission, in which request was made that the State Highway Commission send men and trucks to haul shale to make passable the mountain from the Lodge to the New York State Line. In connection with this matter, State Highway Engineer Sloan reported that he had discussed the matter of Federal Aid on the Sussex-Port Jervis Road, which goes through High Point Park, with Senator Kays, County Counsel for Sussex County, and he was informed by Senator Kays that the County would not be able to enter into an agreement for Federal Aid, due to the fact that the Government was not satisfied with a shale constructed road, but wanted assurance that the County would place a concrete road in this section. He recommended to the Commission that the State set aside for the aid of the County in the construction of this road, an amount equal to the Federal Aid applicable thereto, and that the Federal Aid which would otherwise have gone with the road, be used on some part of the State Highway System. On motion by Mr. Stewart, seconded by Mr. Kidde, the matter was ordered deferred at this time.

Request for Aid - Sussex Co.

Sparta-Woodport Rd., Sussex County

State Highway Engineer Sloan also presented the request of Sussex County that the Commission share in the cost of one-half the paving of the Sparta-Woodport Road, estimated to be $40,000. On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission directed that the County of Sussex be notified that the Commission has no funds to apply on the Sparta-Woodport Road.

Appointment-L. E. Andrews

State Highway Engineer Sloan reported to the Commission that Mr. L. E. Andrews, Acting Northern Division Engineer, had successfully passed the Civil Service examination and he recommended that his permanent appointment be made at once at the entrance rate of $325.00 per month, which he is now receiving. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission approved the recommendation of the State Highway Engineer and authorized the permanent appointment of Mr. L. E. Andrews as Northern Division Engineer of the State Highway Department, effective at once.

Route 5, Morris Turnpike, Springfield Township

State Highway Engineer Sloan presented to the Commission a communication from Mr. J. L. Bauer, Township Engineer of Springfield Township, Union County, advising that the Township of Springfield is now prepared to proceed with the widening and curbs on the Morris Turnpike, Route 5, and he recommended that the Commission proceed with the construction of the Morris Turnpike Section of Route 5 in this years program. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission approved the recommendation of the State Highway Engineer and authorized negotiations to be entered into with Springfield Township for the construction of the entire work on the basis of the State paying for 29' of pavement. In connection with this, Commissioner Kidde moved that a communication be written to Maplewood and South Orange in Essex County advising that if it is their intention to proceed with the improvement on Route 5 on Springfield Avenue, it will be necessary that they get under way at once with the water and sewer connections in order that the pavement can be provided for in the 1925 construction program. This was seconded by Mr. Stewart and adopted.

Route 1, Passaic River Bridge

State Highway Engineer Sloan presented a request from the Superintendent of the Lincoln Highway Police, asking that there be turned over to them the small office building which was erected on account of repairs to the Passaic River Bridge on Route 1, Lincoln Highway section. On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission approved of the transfer of the building on Route 1, at the Passaic River Bridge, to the Lincoln Highway Police, providing they move the same from its present location where it is unsightly.

Equipment-State Highway

State Highway Engineer Sloan presented to the Commission the request of the Superintendent of Plant & Equipment, Jacob Hagin, for the purchase of four Ford one-ton trucks, equipped with dump bodies, and eight tractor graders of the Hadfield-Penfield type, for use on maintenance of gravel roads, in view of the fact that the State had determined to take over Routes 18 and 20 in South Jersey. State Highway Engineer Sloan informed the Commission that these Ford Tractor graders were giving excellent service and were doing the work at a much cheaper overhead than the large tractors. On motion by Mr. Stewart, seconded by Mr. Kidde, the State Highway Commission approved the purchase of four one-ton Ford trucks equipped with dump bodies, and eight tractor graders of the Hadfield-Penfield type for use on gravel maintenance work.

On motion by Mr. Kidde, seconded by Mr. Jelin, the meeting adjourned at 4:30, P.M., to meet again in regular session on

APR 15 1924

Tuesday, April 22nd, 1924, at 10:30 A. M.

Respectfully submitted,

A. LEE GROVER,

Secretary.

MINUTES OF MEETING- April 22, 1924.

A regular meeting of the State Highway Commission was held in the Commission meeting room, Broad Street Bank Building, Trenton, on Tuesday, April 22, 1924. The meeting was called to order by Chairman Scott at 10:30 A. M.

Present: General H. L. Scott, and Messrs. Percy H. Stewart, Walter Kidde and Abraham Jelin.

Route Numbers 18 and 20

The Chairman presented a communication from Mr. S. P. Leeds, President of the Atlantic City Chamber of Commerce, and requested the Secretary to read the same to the Commission. Mr. Leeds, in his letter, expressed his appreciation of the action of the State Highway Commission in taking over Routes 18 and 20, and asked for information as to the maintenance and construction that might be expected on same. On motion by Mr. Jelin, seconded by Mr. Kidde, the Secretary was directed to reply to Mr. Leeds, advising him that it is the intention of the Commission to treat approximately eight and one-half miles from Elmer to the Atlantic County Line with an oil treatment, the balance to be maintained as regular gravel State Highway Routes. Mr. Kidde suggested that Mr. Leeds be advised of the estimated cost that will be expended in the maintenance of this route, and also that it is not expected to take care of any of the hard surfacing until sufficient funds are found to proceed with the same.

Route 5, Blackwell St., Dover

The Secretary presented an opinion received from the Attorney General, in connection with the paving of trolley track area on Route 5, Blackwell Street, Dover. On motion by Mr. Stewart, seconded by Mr. Kidde, the opinion of the Attorney General was ordered received and spread in full upon the minutes.

A Lee Grover, Esq., Secretary,
State Highway Commission,
Broad Street Bank Building,
Trenton, New Jersey.

Dear Sir:

Replying to your letter of February 26th, wherein you ask the opinion of the Attorney General as to whether or not the obligation of the Morris County Traction Company with reference to the paving and repaving of Blackwell Street in the Town of Dover, is of such nature and character as to authorize and empower the State Highway Commission to recover from the Traction Company its proportionate share of the cost of such paving, permit me to say:

Section 4 of the ordinance of the Town of Dover, authorizing and empowering the Morris County Traction Company to lay its tracks and operate and maintain a street railway through certain streets of the Town of Dover, provides, interalia, that;

> "If at any time hereafter, said street on which said tracks are or may be laid, shall be paved or repaved by the Town of Dover, then the company shall at the same time and at its own expense pave or repave the space between its said tracks, and for twenty-four inches on the outside of each and all rails thereof, with the same material and in the same manner as the rest of said street is so paved by said Town."

Section 6 of Chapter 396 of the Laws of 1912, Page 630, provides that;

> "Whenever the governing body or other jurisdiction from which said road is taken over, has rights or benefits by virtue of an understanding, agreement or contract with any street railway company, * * * * to repair, maintain or construct any part of such highway, * * * * said undertaking shall remain in force and all such contractual or agreement rights and benefits shall pass to and be taken over for the State by the State Department of Public Roads. All the terms, conditions and requirements of such agreements or contracts shall be fulfilled to the State by said street railway company, * * * * in the same manner as if they had been originally made between the State and said companies, firm or corporation."

This same provision was re-enacted in Chapter 14 of the Laws of 1917, Page 27, Section 3.

There is no doubt, therefore, that the State Highway Commission had power to compel the Morris County Traction Company to repave in accordance with the type of paving proposed to be done by the State Highway Commission.

The fact, however, that this company is now in the hands of a Receiver, presents serious obstacles. There is no doubt that, if the Receiver sells the property and franchises of the Morris County Traction Company, the obligation to repave passes to and becomes binding upon the purchaser at such sale. I greatly doubt, however, whether the work could be done by the Highway Commission while the company is in the hands of a Receiver, so as to make the cost of the work either an obligation of the Receiver or of the purchaser. I am firmly convinced that in any event it would not be an obligation of the Receiver.

While the fourth section of the ordinance authorized the City or the Highway Commission to do the work, and charged the cost against the company, in the event that the company refused to do it, the ordinance nowhere makes this charge a lien upon the property of the company.

I am, therefore, of the opinion that while the obligation to repave will pass with the franchise, and become binding upon the purchaser, I do not believe that if the work were done by the Highway Commission during the time that the company is in the hands of a Receiver, that it could collect the cost of that work either from the Receiver or from the purchase at the Receiver's sale.

Very truly yours,

H. R. COULOMB,

Assistant Attorney General.

Approved:
Edward L. Katzenbach,
Attorney General.

After discussion of the best method to be pursued in advancing the early paving of this street, Mr. Jelin moved that the Manager of the Morris County Traction Company be invited to appear before the Commission at its next meeting to discuss the matter of paving in order that a satisfactory agreement in regard to same might be arrived at. This was seconded by Mr. Kidde and adopted.

Route 18, Fort Lee Cut-Off

The Secretary presented a communication that had been received by the Chairman from Mr. J. E. Thier, Supervisor of Roads in Bergen County, with reference to the construction of Route 18 at Fort Lee Ferry, Palisade Ave. to Lemoine Ave., in which he advised that the estimated cost of this work was $80,000.00 and that the County of Bergen was committed to an expenditure of $35,000.00 thereon, and requesting advice as to what aid the State Highway Commission would give on this work. Mr. Kidde moved that an allotment of $40,000.00 from the Motor Vehicle Emergency fund be made to Bergen County to be applied on the reconstruction of the Fort Lee Cut-Off, which will become part of State Highway Route 18, as requested by the Board of Freeholders of Bergen County, providing that the said Board of Freeholders of Bergen County will assume the responsibility for the construction of this work. Mr. Thier also made an inquiry as to when the Commission expected to proceed with the construction of Route 18, from Alpine to the New York State Line. In connection with this, State Highway Engineer Sloan stated that the Commission had already authorized an expenditure of $300,000.00 on this work, and he recommended that the Commission authorize the making of a survey and preparation of plans for the grading of Route 18 and the necessary construction in the Village of Alpine, the said survey and plans to be presented to the Commission for approval before the contract is entered into. On motion by Mr. Jelin, seconded by Mr. Stewart, the Commission approved the recommendation of the State Highway Engineer and authorized the making of surveys and the preparation of plans for the grading and necessary reconstruction of Route 18 from Alpine to the New York State Line.

Main St., Clifton, (Route 11)

The Secretary presented a resolution from the Passaic County Board of Freeholders, advising that they had again readvertised the bids for the resurfacing of Main Street, Clifton, a connecting link of State Highway Route 11, and requesting that if the bids received under this advertisement are not satisfactory to the State Highway Commission, that the State Highway Department proceed to perform this work with its own forces, in accordance with an offer as previously made. In this connection the Secretary advised that Mr. Garwood Ferguson, County Engineer of Passaic County, had requested a hearing and would be present at this morning's session. Mr. Kidde suggested that the Commission come to some decision on this matter so that definite advice could be given to Mr. Ferguson when he came before the Commission. After a discussion of the matter Mr. Kidde moved that the State Highway Engineer be requested to prepare an estimate of the cost of placing an asphalt surface on Main Street, Clifton, and that Mr. Ferguson be advised that the Commission would proceed to have this work performed with State Highway Department forces, the County of Passaic to be charged for same at the price to be named by the State Highway Department.

Route 5, Right of Way

The Secretary presented a communication from Mr. A. B. Clark, Superintendent of the P. R. R. System, with reference to the right of way on Route 5, Section 11, Delaware-Belvidere section, in which he advised that the railroad company was in accord with the recommendations that had been made to it by Major Sloan, namely, that a dedication be made to the State Highway Department of the State of New Jersey for the two parcels designated as 20 and 20-A, with the understanding that revised plans will be satisfactory to the railroad company providing the railroad company was protected against the necessity of constructing an expensive retaining wall. On motion by Mr. Kidde, seconded by Mr. Jelin, the Commission accepted the proposition as made by the P. R. R. Company,and the State Highway Engineer was directed to prepare the lines and submit same to the P. R. R. Company as requested.

Sussex-Port Jervis Road

The Secretary presented a communication from Mr. Harvey Snook, County Engineer of Sussex County, with reference to the construction on the Sussex-Port Jervis Road, which is a part of the Federal Aid 7 Percent System and requesting that their Board be granted a conference with the State Highway Commission in order that a discussion of this matter might be had. On motion by Mr. Stewart, seconded by Mr. Jelin, it was directed that the Board of Freeholders of Sussex County be requested to appear before the Commission for the purpose of a conference at the next meeting. In this connection Mr. Kidde requested that the State Highway Engineer have prepared a tabulation of the various requests made by Sussex County and the amount of aid that has been extended to them during the last three years.

Request for Aid-Burlington County

The Secretary presented a communication from Mr. Alfonza Adams, Clerk of the Board of Freeholders of Burlington County, requesting that a joint hearing of the Township Committee of Woodland Township and the Board of Freeholders of Burlington County with the State Highway Commission, be arranged in order to discuss the matter of construction of the road from Chattsworth to the Ocean County Line. Mr. Jelin moved that the Board of Freeholders of Burlington County be advised, that inasmuch as this was a county road, any discussion of same should be with Mr. E. E. Reed, Assistant State Highway Engineer and they did not feel that a hearing before the Commission was necessary at this time. This was seconded by Mr. Stewart and adopted.

Commendation

The Secretary presented a resolution adopted by the Gloucester County Board of Freeholders, expressing the appreciation of their Board for the action of the State Highway Commission in taking over State Highway Routes 18 and 20. On motion by Mr. Kidde, seconded by Mr. Jelin, the resolution was ordered received and filed.

Invitation

The Secretary presented a communication from Mr. Thomas Adams, General Director of Plans and Surveys of New York and its Environs, enclosing a copy of an invitation extended to Chairman Scott to attend their conference to be held on May 20th and requesting that as large a representation of the Commission as possible be present at the same. Inasmuch as the date of this conference is a regular meeting day of the State Highway Commission, Mr. Stewart moved that Chairman Scott be delegated to attend as representative of the State Highway Commission, and that Mr. Adams be requested to forward to the Commission a copy of the program of the conference, and that he be further requested to supply the Commission with a stenographic record of the meeting. This was seconded by Mr. Kidde and adopted.

Route 5, Springfield Ave. Maplewood

The Secretary presented a communication from Mr. Edmund R. Halsey, enclosing a letter which he had received from the Fidelity Union Trust Company, requesting that a curb line be established in front of their property on Springfield Avenue. In this connection, Mr. Halsey requested that the Commission consider the placing of a 50 foot width of pavement on this section of road. State Highway Engineer Sloan advised that this matter had already been taken up by the Commission and they had determined to place a 29 foot pavement on this section, provided the Township of Maplewood would construct it to a further width as is required and that the matter of the entire width of pavment to be constructed was a matter entirely for the local municipalities to determine. On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Engineer to reply to Mr. Halsey, advising him as to the status of the matter as at present, and informing him that the question of additional width beyond the 29 feet to be constructed by the Commission was entirely up to the local municipalities.

Route 16, South Somerville

LVRR xing

The Secretary presented a resolution from the Somerset County Board of Freeholders, disapproving of the proposed East Route under the Lehigh Valley Railroad at South Somerville and expressing their approval of the present line as followed by Route 16 at this point. In this connection Mr. Kidde moved that the Somerset County Board of Freeholders be advised that the action in adopting this new line had already been taken by the Commission on account of the considerable saving that would be affected thereby, and the further fact that the curve involved was only a six degree curve which is not considered serious by the State Highway Commission, and also the fact that a much shorter underpass and speedier construction would be accomplished by means of the new line as adopted.

Main Street, Clifton,(Route 11)

Mr. Garwood Ferguson, County Engineer of Passaic County, accompanied by Mr. Stalter, Director of the Board of Freeholders, appeared before the Commission at this time. Mr. Ferguson stated that they had received bids for the third time for the resurfacing of Main Street, Clifton, a connecting link of Route 11, and that the bids received were higher than those received at the last letting, the low bid being $2.20 per square yard. He stated that the Board of Freeholders of Passaic County felt that they could do nothing further to obtain a better price in this work and requested that if same was not satisfactory to the State Highway Commission, that they proceed to do same with State Highway Department forces. Mr. Kidde stated that the Engineers had already been requested to prepare an estimate of the cost of placing this surface on Main Street, Clifton, and he moved that Passaic County be advised that the State Highway Commission will go ahead and perform this work with State Highway Department forces, the cost of same to be paid for by Passaic County. This was seconded by Mr. Jelin and adopted.

The Schedule of Business was next taken up for consideration, item by item, as follows:

Route 12, Section 6.

State Highway Engineer Sloan presented the following list of bids received on April 21st for the construction of Route 12, Section 6, Port Colden-Stephensburg, the low bid being by Korp & Korp in the amount of $384,694.15, and recommended award of contract to the low bidder:

Korp & Korp.	$ 384,694.15
Public Service Production Co..	411,031.94
Ross & Whelan, Inc..	424,091.73
Weldon Contracting Co.	467,913.10

On motion by Mr. Jelin, the State Highway Commission unanimously adopted the following resolution:

> RESOLVED, that the State Highway Commission does hereby make award of contract for the construction of Route 12, Section 6, Port Colden-Stephensburg section, to Korp & Korp at theirs the lowest bid in the amount of $384,694.15, and
>
> BE IT FURTHER RESOLVED, that the Chairman is authorized to sign the necessary contracts after approval by the State Highway Engineer.

This was seconded by Mr. Stewart and adopted.

Route 12, Section 7.

State Highway Engineer Sloan presented the following list of bids received for the construction of Route 12, Section 7, Stephensburg-Hackettstown, the low bid being by the Public Service Production Company in the amount of $288,178.21, and recommended award of contract to the low bidder:

Public Service Production Co.	$288,178.21
Chas. T. Kavanagh	301,116.55
Ross & Whelan, Inc.	305,348.58
C. H. Winans.	306,173.38

On motion by Mr. Stewart, seconded by Mr. Jelin, the State Highway Commission unanimously adopted the following resolution:

> RESOLVED, that the State Highway Commission does hereby make award of contract for the construction of Route 12, Section 7, Stephensburg-Hackettstown section, to the Public Service Production Company, at their's the lowest bid in the amount of $288,178.21, and
>
> BE IT FURTHER RESOLVED, that the Chairman is authorized to sign the necessary contracts after approval by the State Highway Engineer.

Route 10, Section 1-A

State Highway Engineer Sloan presented the following list of bids received on April 21st for the construction of Route 10, Section 1-A, Arcadian Way-Fort Lee Ferry, the low bid being by J. J. MdGarry in the amount of $138,866.90, and he recommended the award of contract be made to the low bidder:

J. J. McGarry.	$138,866.90
N. J. Construction Co.	139,853.50
Geo. M. Brewster & Son	140,244.00
R. A. Hamilton	142,269.50

On motion by Mr. Stewart, seconded by Mr. Jelin, the State Highway Commission unanimously adopted the following resolution:

> RESOLVED, that the State Highway Commission does hereby make award of contract for the construction of Route 10, Section 1-A, Arcadian Way-Fort Lee Ferry to J. J. McGarry at his the lowest bid in the amount of $138,866.90, and
>
> BE IT FURTHER RESOLVED, that the Chairman is authorized to sign the necessary contracts after approval by the State Highway Engineer.

Route 12, Section 7. ✓

State Highway Engineer Sloan recommended that an offer of $ 50.00 be authorized to be made to William H. Saunders, for the acquisition of Parcel #22 on Route 12, Section 7, Stephensburg-Hackettstown and that in the event of failure to accept said offer the property be acquired by condemnation. On motion by Mr. Jelin, seconded by Mr. Stewart, the Commission approved of the recommendation of the State Highway Engineer and authorized an offer of $50.00 be made to Wm. H. Saunders for property on Route 12, Section 7, and in the event of his refusal to accept said offer that condemnation proceedings be entered into in accordance with the following resolution:

> RESOLVED, that this Commission hereby determines to acquire in the name of the State of New Jersey, for public use in the construction of State Highway Route 12, Section 7, ALL that certain Lot, tract or parcel of land and premises, situate, lying and being in the State of New Jersey, and more particularly described as follows:

PARCEL #22

Beginning at a point in the dividing line between the lands of grantor and the lands now or formerly of John A. Johnson, in the center of the existing channel of the Musconetcong River, said point being opposite Station 461 plus 01.80 of the State Highway Route 12, Section 7, and distant one hundred forty-four and sixty-nine one hundredths (144.69) feet from, measured at right angles to the center line of said State Highway Route at said Station 461 plus 01.8, said point being also at the southwesterly end of a proposed change in the channel of the said Musconetcong River, all as shown on a plan entitled "New Jersey State Highway Department, Route 12, Section 7, Property to be Acquired from William H. Saunders, Washington Township, Morris County, Scale 1" = 50' February 1924,"

Thence (1) along the said dividing line of lands, North fifteen degrees, forty-seven minutes East (N15°47'E) a distance of one hundred nine and four tenths (109.4) feet to a point of curvature, distant seventy-seven and thirty-four one hundredths (77.34) feet from, measured normal to the proposed Center Line of said Route 12, Section 7, at Station 461 plus 88.01 as shown on said plan;

Thence (2) still along said dividing line in a northeasterly direction along the arc of a curve to the right with a radius of one hundred forty-three and twenty-four one hundredths (143.24) feet, a distance of two hundred six and twenty-five one hundredths (206.25) feet, to a point distant eighty-eight and five one hundredths (88.05) feet from, measured normal to the proposed center line of said Route #12, Section 7, at Station 463 plus 76.60, as shown on said plan;

Thence (3) still along said dividing line, South sixty-eight degrees, thirteen minutes, eight seconds East (S68°13'08"E) a distance of fifty-six and thirty-one one hundredths (56.31) feet to a corner of lands of now or formerly John A. Johnson on the northwest, lands of grantor on the southwest and lands of now or formerly Edward Babcock on the East; said corner being distant one hundred thirty-five and eighty hundredths (135.80) feet from, measured at right angles to the proposed center line of said Route 12, Section 7, at Station 464 plus 06.44 as shown on said plan;

Thence (4) along the dividing line between lands of now or formerly Edward Babcock on the North, lands of grantor on the South, South seventy-seven degrees, thirty-three minutes East (S77°33'E) a distance of fifty-four and seventeen one hundredths (54.17) feet to a point at the easterly end of a proposed change in the channel of the Musconetcong River; said point being distant one hundred seventy- six and forty-seven one hundredths (176.47) feet from , measured nromal to the proposed center line of said Route 12, Section 7, at Station 464 plus 42.22 as shown on said plan;

Thence (5) South twelve degrees, twenty-seven minutes West (S12°27' W) a distance of thirtyfive (35) feet to a point, said point being the P. T. of the curve of the proposed southerly right of way line of the said proposed channel change and distant one hundred ninety-nine and fifty-nine one hundredths (199.59) feet from, measured normal to the proposed center line of said Route 12, Section 7, at Station 464 plus 15.94 as shown on said plan;

Thence (6) along the said proposed southerly right of way line for the proposed channel change of the Musconetcong River in a southwesterly direction along the arc of a curve to the left with a radius of 214.11 feet, a distance of three hundred twenty-three and eighty-seven one hundredths (323.87) feet to a point at the southwesterly end of channel change, said point being the P. C. of the curve of the proposed southerly right of way line of the said channel change and distant one hundred seventy-two and twenty-seven one hundredths (172.27) feet from measured normal to the proposed center line of said Route 12, Section 7, at Station 461 plus 23.35, as shown on said plan;

Thence (7) North seventy-four degrees,thirteen minutes West (N74°13'W) a distance of thirty-five (35) feet to the point and place of beginning.

The State Highway Engineer is hereby authorized and directed, on behalf of this Commission, to make an offer of the sum of $50.00 to the owner or owners of said lands and premises for the conveyance of the same to the State of New Jersey, free and clear of all encumbrances, and, upon the failure of such owner or owners to accept such offer, or if for any other reason said lands and premises cannot be immediately acquired by agreement with such owner or owners, then the Attorney General of the State of New Jersey is hereby authorized and directed to institute condemnation proceedings for the acquisition of said lands and premises.

Route 10, Section 1-C. Right of Way

State Highway Engineer Sloan recommended to the Commission that an offer of $75.00 be made to Mr. James Easton for the acquisition of Parcels "12 and #14 on Route 10, Section 1-C, Anderson Avenue-Harvard Place, and in the event of failure to accept that the property be acquired by condemnation. On motion by Mr. Jelin, seconded by Mr. Stewart, the Commission approved the recommendation of the State Highway Engineer and directed that an offer of $75.00 be made to Mr. James Easton for the purchase of property on Route 10, Section 1-C, Anderson Avenue-Harvard Place and in the event of his failing to accept said offer, that condemnation proceedings be entered into in accordance with the following resolution:

RESOLVED, that this Commission hereby determines to acquire in the name of the State of New Jersey, for public use in the construction of State Highway Route 10, Section 1-C, ALL that certain Lot, tract or parcel of land and premises, situate, lying and being in the State of New Jersey, and more particularly described as follows:

PARCEL #12

Beginning at a point in the intersection of the westerly line of Nineteen Street with the line between lots #8 and #36, and running

Thence (1) North thirty-six degrees, fifty-two minutes and thirty seconds East along the said westerly line of Nineteenth Street, a distance of thirty-two and seventy-nine one hundredths feet, to a point in the line between lots #35 and #36;

Thence (2) North fifty-three degrees, seven minutes thirty seconds West along the said line between lots #35 and #36, a distance of twenty-five feet;

Thence (3) South thirty-six degrees, fifty-two minutes and thirty seconds West, along the northerly line of Route 10, Section 1-C, a distance of thirty-two and seventy-nine one hundredths feet, to a point in the line between lots #8 and #36;

Thence (4) South fifty-three degrees, seven minutes and thirty seconds east along the said line between lots 8 and 36 a distance of twenty-five feet to the point or place of beginning, containing nineteen-one thousandths acres (0.019-A).

PARCEL #14

Beginning at a point in the intersection of the westerly line of Nineteenth Street with the line between lots 34 and 35, block 38, and running

Thence (1) North thirty-six degrees fifty-two minutes and thirty-seconds East, along the said westerly line of Nineteenth Street, a distance of fifty feet to a point in the line between lots 32 and 33;

Thence (2) North fifty-three degrees, seven minutes and thirty seconds, West along the said line between lots 32 and 33 a distance of twenty-five feet to a point in the northerly line of Route 10, Section 1-C;

Thence (3) South thirty-six degrees, fifty-two minutes and thirty seconds West, along the said northerly line of Route 10, Section 1-C, a distance of fifty feet to a point in the line between lots 34 and 35;

Thence (4) South fifty-three degrees, seven minutes and thirty seconds East, along the said line between lots 34 and 35 a distance of twenty-five feet to the point or place of beginning, containing twenty-eight one-thousandths of an acre (0.028 A)

The State Highway Engineer is hereby authorized and directed on behalf of this Commission, to make an offer of the sum of $75.00 to the owner or owners of said lands and premises for the conveyance of the same to the State of New Jersey free and clear of all encumbrances and, upon the failure of such owner or owners to accept such offer, or if for any other reason said lands and premises cannot be immediately acquired by agreement with such owner or owners, then the Attorney General of the State of New Jersey is hereby authorized and directed to institute condemnation proceedings for the acquisition of said lands and premises.

Route 1, Right of Way

The State Highway Engineer presented a communication from the U. S. Rubber Company in connection with their property on Route 1 at New Brunswick, in which they requested that a cash allowance be made to them in lieu of building of bulkhead along their property as already authorized by the State Highway Commission. In this connection he recommended that an offer of $1842.00 be made to the U. S. Rubber Company with the understanding that the State is relieved from its obligation to build the bulkhead. Mr. Jelin moved that an offer of $1842.00 be made to the U. S. Rubber Company in lieu of the construction of a bulkhead by the State Highway Commission, provided that the U. S. Rubber Company will immediately proceed with the construction of the bulkhead, and in case they do not proceed with the construction of the bulkhead, that an offer of $1,000.00 be made, in either consideration the State Highway Commission to be relieved from its obligation to build the bulkhead. This was seconded by Mr. Kidde and adopted.

Route 9, Bound Brook Bridge.

State Highway Engineer Sloan reported the completion of bridge at M. P. 40.2 over Bound Brook on Route 9, and recommended final acceptance after inspection. On motion by Mr. Kidde, seconded by Mr. Jelin, the matter was referred to Commissioner Stewart for inspection and report to the Commission prior to final acceptance.

Offices

State Highway Engineer Sloan recommended that the Commission approve lease of office at 402 Broad Street, Newark, New Jersey, at a yearly rental of $1,200.00. On motion by Mr. Jelin, seconded by Mr. Stewart, the Commission approved of the lease of office at 402 Broad Street, Newark, New Jersey, and directed the Chairman to sign on behalf of the Commission.

Route 1, Passaic River Bridge.

State Highway Engineer Sloan stated that the repair work on the Passaic River Bridge as performed by the Frederick Snare Corporation was completed, the same having been opened to traffic on Friday, April 11th at 3:45 P.M. and he recommended acceptance of the same by the State Highway Commission. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission accepted the repair work as performed on the Passaic River Bridge.

Route 1, Hackensack River Bridge

Commissioner Kidde requested that the State Highway Engineer prepare a report for the next meeting which will show the status of the suit between the Counties of Hudson and Essex and the owner of the ship which caused damage to the Hackensack River Bridge.

The State Highway Engineer submitted a sketch showing extension of the northeast fender on the Hackensack River Bridge, as submitted to this office by Col. Newcomer, with the statement that it is requested by navigation interests. The estimated cost of this work is $8,000.00, and Col. Newcomer requested information as to whether or not the State Highway Commission would be willing to carry out this work. After considerable discussion on the matter, Commissioner Kidde moved that Col. Newcomer be advised that the State Highway Commission does not feel that the requirements as set forth by him seem important enough to make this expenditure necessary, and to further advise that the Commission would like Col. Newcomer's opinion as to the necessity for the construction of these fenders. This was seconded by Mr. Jelin and adopted.

High Point Park Roads

The State Highway Engineer presented a communication from J. J. Stanton, Secretary of the Commissioners of High Point Park, requesting aid and equipment for use in repair of roads in High Point Park. On motion by Mr. Jelin, seconded by Mr. Kidde, it was directed that the Commissioners of High Point Park be advised that the State Highway Department will loan them the use of two trucks for a period of two months if they will send the necessary drivers to Trenton for the purpose of taking these trucks to High Point Park.

American Association of State Highway Officials.

The State Highway Engineer submitted a letter from Mr. Charles A. Mead, stating that there will be a meeting of the Sub-Committee on Bridges & Structures of the American Association of State Highway Officials in Washington on May 5th, 6th and 7th. The State Highway Engineer stated that the estimated expenses of his attendance will be approximately $60.00, and recommended that Mr. Mead be requested to attend this meeting and that his necessary expenses be paid by the State Highway Department. On motion by Mr. Stewart, seconded by Mr. Jelin, the Commission directed that Mr. Mead be authorized to attend the meeting of the Sub-Committee of American Association of State Highway Officials at Washington on May 5th, 6th and 7th, as representative of the State Highway Department.

Insurance

The State Highway Engineer submitted a letter from the Superintendent of Plant and Equipment with reference to the matter of insurance on the trucks and equipment of the State Highway Department, in which he advised that he felt that some insurance which would protect the drivers from property damage was the most important consideration. On motion by Mr. Stewart, seconded by Mr. Kidde, the matter of the insurance of the State Highway Department trucks, and equipment, was referred to State Highway Engineer Sloan for further investigation and report to the Commission as to whether same could be made to include the drivers of the various trucks in operation.

Federal Aid- 7 Percent System

State Highway Engineer Sloan submitted for the information of the Commission a letter from Secretary of Agriculture Hon. H. C. Wallace, approving four additional routes as a part of the 7 Percent System of Federal Aid highways of New Jersey. The highways approved are as follows:

Trenton to New Brunswick (via New Brunswick Pike)
Merchantville, via Mount Holly, Pemberton, Browns Mills, Lakewood and Toms River.
Far Hills, via Chester, Newton, Branchville and Layton to Dingman's.
Bordentown, via Mount Holly, Medford and Indian Mills to Hammonton.

On motion by Mr. Stewart, seconded by Mr. Kidde, the communication was ordered received and filed.

At this time Chairman Scott stated that he would have to leave the meeting to attend a funeral and would not be at the afternoon session.

On motion by Mr. Stewart, seconded by Mr. Kidde, the meeting was recesses for luncheon at 1:30 P.M., to meet again in regular session at 2:30 P.M. The meeting reconvened again at 2:30 P.M. as agreed.

In the absence of Chairman Scott, Commissioner Kidde moved that Commissioner Stewart act as Chairman. This was seconded by Mr. Jelin and adopted.

Route 4, Manasquan Bridge, Federal Aid Project #59.

State Highway Engineer Sloan recommended approval of Project Agreement for the Manasquan River Bridge on Route 4 at M. P. 69.4, Federal Aid Project #59. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission approved the Project Agreement for the Manasquan River Bridge at M. P. 69.4

Route 4, Alignment- Toms River

Commissioner Kidde presented two petitions which had been handed to him by Senator Mathis of Toms River, one from the Township of Berkeley and one from the Board of Freeholders of Ocean County, both of which were in favor of the State Highway Commission maintaining Route 4 through Toms River in its present location. On motion by Mr. Jelin, seconded by Mr. Kidde, the petitions were ordered received and filed.

Request for Aid-Warren County

The State Highway Engineer submitted a report on the matter of Federal Aid funds as requested by Warren County for elimination of the Brugler's Crossing on the Hainesburg-Columbia Road, Federal Aid Project #52, at the Lehigh & New England Railroad Company's grade crossing, and recommended that Federal Aid to the extent of $50,000 be extended for the elimination of this grade crossing. There was a considerable discussion of this matter, it being the feeling of the Commission that Federal Aid should only be extended on through Routes, and on motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission directed that Warren County be advised that the Commission does not have any Federal Aid funds available at this time which can be used in the elimination of this grade crossing.

Route 1, Section 5,
Hightstown-Millstone

State Highway Engineer Sloan submitted a request for hearing as made by Mr. James M. Davis, Counsel for Thompson & Glickman with reference to their claim for the return of $800.00 liquidated damages retained by the Commission for failure to complete Route 1, Section 5, Hightstown-Millstone River, on time. On motion by Mr. Jelin, seconded by Mr. Kidde, the Commission directed that this communication be filed and Mr. Davis advised that the Commission feels that this matter has been closed and is not desirous of taking same up for any further consideration.

Camden County-M. V. Aid Schedule

The State Highway Engineer recommended approval of Motor Vehicle Aid Schedule and agreement for 1924 for Camden County. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission approved of Motor Vehicle Aid and Agreement for Camden County for 1924.

Atlantic County-M.V. Aid Schedule

The State Highway Engineer recommended approval of Motor Vehicle Aid Schedule and agreement for 1924 for Atlantic County. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission approved of Motor Vehicle Aid Schedule and agreement for 1924 for Atlantic County.

Gloucester County Repairs

State Highway Engineer Sloan recommended approval of award of contract by Gloucester County to the Barber Asphalt Company for 900 gallons of Asphalt Emulsion at their's the low bid of 19.6¢ per gallon. On motion by Mr. Jelin, seconded by Mr. Kidde, the Commission approved the award of contract to the Barber Asphalt Company by Gloucester Company for 9000 gallons of Asphalt Emulsion at the low bid of 19.6¢ per gallon.

Cape May County Repairs

State Highway Engineer Sloan recommended approval of contract for painting of fences and posts on the Ocean City-Strathmere Road as made by Cape May County to Clouting & Godfrey. On motion by Mr. Jelin, seconded by Mr. Kidde, the Commission approved of the award of contract by Cape May County to Clouting & Godfrey for the painting of fences and posts on the Ocean City-Strathmere Road, the total contract price being $961.00.

Signs

State Highway Engineer Sloan submitted a description of cautionary signal, known as "Union Three Aspect Flagman" to be installed at Brugler's Corner on the Hainesburg-Columbia Road, Warren County, in order to comply with the request of the Federal Government as set forth in Project Agreement. Mr. Kidde moved that the application be approved and that Warren County be advised that as a matter of uniformity, the Commission would prefer that the other type of signal, that is, the Automatic Flashing Signal, be used instead of the type as submitted, it being the understanding of the Commission that either type could be approved by the Federal Government. This was seconded by Mr. Jelin and adopted.

Ocean County-Township Aid

State Highway Engineer Sloan recommended acceptance and final payment on Dewey Avenue, Ocean Avenue-4th Street, Lakewood Township, Ocean County. On motion by Mr. Kidde, seconded by Mr. Jelin, the Commission accepted the completed work on Dewey Avenue, Ocean Avenue-Fourth Street, Lakewood Township, Ocean County, Township Aid, Force Account, and authorized final payment thereon.

Camden County-Township Aid

State Highway Engineer Sloan recommended acceptance and final payment on Spring Road, Winslow Township, Camden County, Township Force Account work. On motion by Mr. Kidde, seconded by Mr. Jelin, the Commission accepted the completed work on Spring Road, Winslow Township, Camden Gounty, Township Aid Force Account and authorized final payment on same.

Camden County-Township Aid

State Highway Engineer Sloan recommended acceptance and final payment on Winslow Road, Winslow Township, Camden County, Township Aid. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission accepted the completed work on Winslow Road, Winslow Township, Camden County, Township Aid, Force Account, and authorized final payment on the same.

Ocean County-Township Aid

State Highway Engineer Sloan recommended acceptance and final payment on Forest Avenue (County Line Road to Lake Drive) Lakewood Township, Ocean County Township Aid. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission accepted the completed work on Forest Avenue, Lakewood Township, Ocean County Township Aid and authorized final payment thereon.

Ocean County-Township Aid

State Highway Engineer Sloan recommended approval of Township Aid Force Account Agreements for the improvement of the following roads in Lakewood Township, Ocean County, Township Aid Force Account work:

Lexington Ave. - 7th Street to County Line Road,
Clifton Ave. - 7th Street to County Line Road,
County Line Road - Madison Ave. to Greenville Church,
Meadow Avenue & Fulton St. - Main St. to Pine St.
John Street - River Avenue to Vine Street,
Fourteenth Street - Madison Ave. to Case Road.

On motion by Mr. Jelin, seconded by Mr. Kidde, the Commission approved the above Township Aid Force Account agreements for the improvement of roads in Lakewood Township, Ocean County.

Hunterdon County Repairs

State Highway Engineer Sloan recommended approval of 1924 Motor Vehicle Aid Schedule and agreement for Hunterdon County. On motion by Mr. Kidde, seconded by Mr. Jelin, the Commission approved the 1924

Motor Vehicle Aid Schedule and agreement for Hunterdon County.

Essex County Repairs

State Highway Engineer Sloan recommended approval of 1924 Motor Vehicle Aid Schedule and agreement for Essex County. On motion by Mr. Kidde, seconded by Mr. Jelin, the Commission approved the 1924 Motor Vehicle Schedule and agreement for Essex County.

Essex County Repairs

State Highway Engineer Sloan recommended approval of specifications for amiesite in competition with bituminous concrete in connection with the Essex County Repairs for 1924, the County being divided into two sections and bids to be received in each section on the two types. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission approved of specifications for amiesite in competition with bituminous concrete in connection with Essex County Road Repairs for 1924.

Cedar Creek Bridge, Route 4

The State Highway Engineer recommended final acceptance by the State Highway Commission of the Cedar Creek Bridge at M. P. 41.1 on Route 4. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission accepted and authorized final payment on the Cedar Creek Bridge at M. P.41.1 on Route 4, the same having been completed under date of March 27th, 1924.

Ocean County-Township Aid

State Highway Engineer Sloan Sloan recommended acceptance of the Lake Drive-Case Road and 14th Street, Lakewood Township, Ocean County. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission approved of the acceptance of Lake Drive-Case Road and 14th Street, Lakewood Township, Ocean County Township Aid Force Account and authorized final payment thereon.

Ocean County-Township Aid

State Highway Engineer Sloan recommended the acceptance of the Lanes Mill Road, Ridge Avenue, Ocean Avenue, Lakewood Township, Ocean County. On motion by Mr. Jelin, seconded by Mr. Kidde, the Commission approved of the acceptance of the Lanes Mill Road, Ledge Avenue, Ocean Avenue, Lakewood Township, Ocean County, Township Aid Force Account, and authorized final payment thereon.

Newton-Fredon Road, Sussex Co.

Mr. T. J. Wasser, representing the Public Service Production Company appeared before the Commission with reference to the contract of the Public Service Production Company for the construction of the Newton-Fredon Road in Sussex County. He stated that he had come before the commission at the request of Mr. Carl, the Vice-President of his company, in order to determine whether the Commission were willing to consider a change in the agreement under which this work was to be accepted. Mr. Wasser was informed that it was the feeling of the Commission that this agreement should not be changed, but that it should stand as originally made, that is, that the Public Service Production Company should furnish a five-year bond, guaranteeing the pavement, and that 25% of the contract price be retained as a further guarantee of the pavement, until the end of said five-year period.

Filing-Highway Department Records

Commissioner Kidde brought up the matter of proper filing of important records of the State Highway Commission, and the Chief Engineer was directed to prepare a report as to the methods pursued in maintaining a satisfactory record of important documents for the State Highway Commission.

Route 9, Westfield, and
Route 9, Cranford

Commissioner Stewart inquired as to how the work was proceeding in the Town of Westfield and in the Township of Cranford, and asked how soon the Department would be able to go ahead with these contracts. In connection with the Westfield matter, Mr. Bedwell was called before the Commission and he presented a letter which had been received from the Town of Westfield showing that they were not as yet able to agree as to the width of pavement to be constructed. After a discussion of the matter, Mr. Jelin moved that this matter be left in the hands of the State Highway Engineer and that the State Highway Commission proceed with the plans for the construction of a 20 foot pavement on this section, as already advertised. In connection with the matter of Route through Cranford, it was stated that the matter of necessary property rights was holding up the work, and the State Highway Engineer recommended that condemnation be proceeded with in all of these properties. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Engineer was directed to submit a report at the next meeting covering these properties in order that the proper condemnation proceedings might be authorized.

Route 9, Detours.

Commissioner Stewart also requested advice as to what work had been done toward putting the detour in shape which is to be used during the construction of Route 9, and requested that a report as to this matter be prepared for the Commission before the next meeting.

Route 7, Section 1

The State Highway Engineer reported that he had prepared an agreement to be entered into with the East Jersey Bridge Company covering the defective pavement on Route 7, Section 1. He further stated that this agreement had been approved by the Attorney General but was not satisfactory to the East Jersey Bridge Company. He requested that the State Highway Commission indicate whether they approve of the agreement as drawn, or whether they desire a new agreement to be drafted. On motion by Mr. Jelin, seconded by Mr. Kidde, the Commission approved of the agreement with the East Jersey Bridge Company as prepared by the State Highway Engineer, with the provision that the words "in good and satisfactory condition" be changed to read "in as good condition as when accepted."

Advisory Board Reports

State Highway Engineer Sloan informed the Commission that the Advisory Board Reports had been received from the printer and requested advice from the Commission as to the distribution of same. On motion by Mr. Kidde, seconded by Mr. Jelin, the Commission directed that these reports be kept intact and that no copies of same be distributed until further notice.

Paint - Maintenance Materials-State Highway

State Highway Engineer Sloan submitted a report of bids received on April 21st for the furnishing of ready mixed white lead paint, stating that eleven bids had been received, ranging in price from $2.13 to $2.90 per gallon and recommended that a contract be awarded to the low bidder. On motion by Mr. Jelin, seconded by Mr. Kidde, the Commission approved of award of contract to E. I. DuPont de Nemours & Company of Philadelphia for the furnishing of 4,600 gallons of ready mixed white lead paint at their low bid of $2.13 per gallon or a total sum of $9,798.00.

State Highway Engineer Sloan presented a report on bids received on April 21st for the furnishing of ready mixed red lead paint, stating that nine bids had been received, ranging in price from $3.92 to $5.25 per gallon, and recommended award of contract to the low bidder. On motion by Mr. Jelin, seconded by Mr. Kidde, the Commission approved of award of contract to George D. Wetherill & Co. Inc. of Philadelphia, for the furnishing of 400 gallons of ready mixed red lead paint at their low bid of $3.92 per gallon or a total lump sum of $1,569.00.

State Highway Engineer Sloan presented a report of bids received on April 21st for the furnishing of black graphite (ready mixed) paint, stating that twelve bids had been received, ranging in price from $1.15 to $1.79 per gallon, and recommended award of contract to the low bidder. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission approved award of contract to the Pittsburgh Plate Glass Co. of Newark, New Jersey, for furnishing 350 gallons of ready mixed black graphite paint at their low bid of $1.15 per gallon or in a total lump sum of $402.50.

Maintenance Materials-Asphaltic Oil
State Highway

State Highway Engineer Sloan presented a report of bids received on April 21st for the furnishing of Asphalt Cement Emulsion, advising that two bids had been received, and recommended award of contract to the low bidder. On motion by Mr. Jelin, seconded by Mr. Kidde, the Commission approved of award of contract to the Barber Asphalt Company for the furnishing of 167,100 gallons of Asphalt Cement Emulsion for a total sum of $26,685.36.

The State Highway Engineer submitted a report on bids received on April 21st for the furnishing of Asphalt Grade "SCO", stating that three bids had been received, and recommended award of contract to the low bidder. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission approved of award of contract to the

Atlantic Refining Company for the furnishing of 13,500 gallons of asphalt grade SCO on their low bid of $1147.50, for material f.o.b. plant and application, their freight rates being such as not to affect their low total.

The State Highway Engineer submitted a report on bids received on April 21st for the furnishing of asphalt Grade LK stating that two bids had been received and recommended award of contract to the low bidder. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission approved of the award of contract to the Asphalt Service, Inc. of New Brunswick, New Jersey, for the furnishing of 31,185 gallons of Asphalt grade LK on their low bid of $4365.91 for material f.o.b. plant and application, their freight rates being such as not to affect their low total.

Maintenance Material-Tar
State Highway

State Highway Engineer Sloan submitted a report on bids received on April 21st for the furnishing of tar grade X or U3, stating that two bids had been received and recommended award of contrac to the low bidder. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission approved the award of contract to the Barrett Company for the furnishing of 20,705 gallons of Tar Grade X or U3 on their low bid of $302.22, for material f.o.b. plant, and application, their freight rates being such as not to affect their low total.

The State Highway Engineer submitted a report on bids received on April 21st for the furnishing of 286,815 gallons of tar Grade B or UB, on which two bids were submitted and stated that an investigation shows that the Barrett Company were low on 111,300 gallons and Theodore Tobish of Trenton, New Jersey, was low on 185,515 gallons of Tar grade U or UB, and recommended that award of contract be made to these two contractors for the quantity on which they submitted the low bid. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission approved the award of contract to the Barrett Company for the furnishing of 111,300 gallons of Tar grade B at a total amount of $14,339.83, their material f.o.b. base, plus application. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission approved the award of contract to Theodore Tobish for the furnishing of 185,515 gallons of Tar Grade UB, at a total sum of $23,826.68, material f.o.b. base, plus application.

Maintenance Material-Slag State Highway

The State Highway Engineer submitted a report on bids received on April 31st for the furnishing of crushed slag dustless screenings, advising that an investigation showed that the National Slag Company had submitted the low bid on 3,860 tons, the Duquesne Slag Products Company on 3,310 tons, and the Philadelphia Slag Company on 875 tons, and recommended that award of contracts be made to the low bidders. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission approved of the following awards of contracts.

For the furnishing of crushed slag dustless screenings, to the National Slag Co. for 3,860 tons at $1.00 per ton, or a total of $3,860.00.

For the furnishing of crushed slag dustless screenings, to the Duquesne Slag Products Company for 3,310 tons, as follows

Pottstown	Plant	920 tons	@1.10 per ton	$1012.00
Wharton	"	2390 "	@1.25 " "	2987.50
			Total	$3999.50

For the furnishing of crushed slag dustless screenings, to the Philadelphia Slag Co. for 875 tons @ $1.15 per ton, or a total of $1,006.25.

Employments

On recommendation of the State Highway Engineer, Commissioner Jelin moved the approval of the following list of employments made since the last meeting of the Commission:

5-1-24	William J. Ryan,	Jr. Test. Chemist	$ 125.00 mo.
4-21-24	Wm. J. Fitzpatrick,	Jr. Insp.	125.00
4-21-24	Edgar B. Shrope,	Jr. Engr.	125.00

Accounting

Mr. Kidde requested that Mr. Howell be asked to prepare before the next meeting a complete report on the status of the work that has been performed or is under contract in each county, this report to include a record of the distribution of Federal Aid in each county for the last five years.

On motion by Mr. Jelin, seconded by Mr. Kidde, the meeting adjourned to meet in regular session again on Tuesday, April 29th, 1924, at 10:30 A. M.

Respectfully submitted,

A. LEE GROVER,

Secretary.

APR 29 1924

MINUTES OF MEETING - April 29, 1924.

A regular meeting of the State Highway Commission was held in the Commission meeting room, Broad Street Bank Building, Trenton, on Tuesday, April 29th, 1924. The meeting was called to order at 10:30 A. M. by Chairman Scott.

Present: Gen. H. L. Scott, Chairman, and Messrs.
Percy H. Stewart, Walter Kidde and Abraham Jelin.

Minutes Approved

Commissioner Kidde reported having carefully read the minutes of the meeting held on April 8th, and moved the approval of the same as mailed. This was seconded by Mr. Stewart and adopted.

Request for Aid-Monmouth County, Rejection of Plans

The Secretary reported that County Engineer Allen of Monmouth County was present and desired a hearing. On motion, duly seconded, a hearing was granted. Mr. Allen reported that he would present plans and specifications for the Atlantic Highlands-Hendrickson's Corner Road #58, Section 2, and he would request that the Commission grant State Aid on this work or reject the same in order that the County might advertise. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission directed that plans and specifications for the Atlantic Highlands-Hendrickson's Corner Road, Section 2, be rejected by the State Highway Commission, due to lack of funds.

Manasquan River Bridge, Route 4

The Secretary informed the Commission that the contractors desired information concerning awards on bids received on the 28th instant. State Highway Engineer Sloan presented the following report of bids received for the construction of the Manasquan River Bridge at M.P. 69.4 on Route 4 and recommended award of contract to S. S. Thompson & Co. of Red Bank, the lowest bidders at 93.8% of the Engineer's estimated units of cost.

S. S. Thompson & Co.	93.8%
F. W. Schwiers Jr., Co.	98.9
Empire Engineering Co.	99.49
Young & French	104.6
Michael Staub & Kolyn Const Co.	108.2
Frederick Snare Corp.	109.75
Edward P. Lupfer Corp.	109.7
Linde & Griffith.	123.5

On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission unanimously adopted the following resolution:

> RESOLVED, that the State Highway Commission does hereby make award of contract for the construction of the Manasquan River Bridge at M. P. 69.4 on Route 4, to S. S. Thompson & Co. of Red Bank, N.J. at their's the lowest bid of 93.8% of the Engineer's estimated units of cost, amounting to $424,695.78, and
>
> BE IT FURTHER RESOLVED, that the Chairman is authorized to sign the necessary papers after approval by the State Highway Engineer.

Route 6, Section 10, Quinton-Marlboro.

The State Highway Engineer reported the receipt of the following bids for the construction of Route 6, Section 10, Quinton - Marlboro section, in Salem County, and recommended award of contract to Michael Staub of Pitman, N. J. at his the lowest bid of $278,990.42.

Michael Staub.	$278,990.42
Sutton & Corson Co..	292,892.31
R. L. Bonham Co.	294,879.05
E. Riley Mixner Co..	296,185.00
Public Service Prod. Co.	308,525.53
Union Paving Co.	320,290.62

On motion by Mr. Stewart, seconded by Mr. Kidde, the State Highway Commission unanimously adopted the following resolution:

> RESOLVED, that the State Highway Commission does hereby make award of contract for the construction of Route 6, Section 10, Marlboro-Quinton section, to Michael Staub of Pitman, N. J. at his the lowest bid in the amount of $278,990.42, and
>
> BE IT FURTHER RESOLVED, that the Chairman is authorized to sign the necessary papers after approval by the State Highway Engineer.

Route 7, Section 3.

State Highway Engineer Sloan reported the receipt of the following bids for the construction of Route 7, Section 3, Andersons Corner-Colt's Neck section, and recommended award of contract to the lowest bidder, the Union Paving Co. of Philadelphia, at their's the lowest bid in the amount of $193,440.61.

Union Paving Company....................	$ 193,440.61
Ross & Whelan, Inc......................	200,372.01
Jannarone Cont. Co......................	202,850.54
Public Development & Cont. Co...........	204,729.25
S. S. Thompson & Co.....................	204,891.35
Joseph F. Burke.........................	216,971.89
J. M. Gibbs Const. Co...................	226,841.85

On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission unanimously adopted the following resolution:

RESOLVED, that the State Highway Commission does hereby make award of contract for the construction of Route 7, Section 3, Anderson's Corner-Colt's Neck section, to the Union Paving Co. of Philadelphia, at their's the lowest bid in the amount of $193,440.61, and

BE IT FURTHER RESOLVED, that the Chairman is authorized to sign the necessary papers after approval by the State Highway Engineer.

Route 7, Section 2.

State Highway Engineer Sloan reported to the Commission the approval of plans and specifications and the advertisement for Route 7, Section 2, Golf Course to Anderson's Corner, and recommended ratification of this action by the Commission. On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission unanimously ratified,confirmed and approved the action of the State Highway Engineer.

North Branch Bridge, Route 9

On recommendation of the State Highway Engineer, Commissioner Stewart moved the approval of plans and specifications and directed advertisement on the North Branch Bridge at M. P. 29.6 on Route 9. This was seconded by Mr. Jelin and adopted.

Musconetcong River Bridge, Route 5

On recommendation of the State Highway Engineer, Commissioner Stewart moved approval of plans and specifications and the advertisement for the Musconetcong River Bridge at M. P. 20.0 on Route 5. This was seconded by Mr. Kidde and adopted.

Route 5, Dover

The Secretary informed the Commission that as directed at the last meeting, Mr. O. G. Schultz, General Manager of the Morris County Traction Company, was invited to meet with the State Highway Commission to-day for the purpose of discussing the matter of paving the trolley track area on Route 5, through Dover, and Mr. Schultz was now present. On motion, duly seconded, a hearing was granted to Mr. Schultz.

Commissioner Kidde advised Mr. Schultz that the State Highway Commission was now contemplating the improvement of Route 5 through Dover, and all preliminary work was completed except for an agreement with the trolley company as to the pavement within the trolley track area, and he asked Mr. Schultz to make a statement as to what the trolley company proposed to do in this locality. Mr. Schultz stated that he was in receipt of a communication from the Department some time ago on this matter, on which he had advised that his company was financially unable to proceed with this work, although there was an obligation on the part of his company to replace the track material and to do the street paving in Dover whenever the type of pavement on the street was changed. He stated, however, that it was his purpose to take this matter up again as soon as plans were presented to him by the State Highway Commission, with the receivers of his company in an effort to determine just how far the company could proceed. He stated that he desired to know how much was involved in the cost of the work in order that the receivers might go before the Public Utility Commission and secure permission to do the work. Commissioner Stewart then went thoroughly into the matter of finances of the Morris Traction Company and ascertained that the total indebtedness of the company at the present time on a $3,000,000 capitalization is $150,000.00, of which $100,000.00 was for unpaid taxes for the past two years. Mr. Schultz also advised the Commission that since the receivership about $30,000.00 of the indebtedness has been paid off, and it is expected within the next ten days to begin paying some of the taxes, and it was hoped to pay all the indebtedness by the end of about three years. Commissioner Stewart inquired as to how the Traction Company proposed to finance the purchase of new equipment and he was informed by Mr. Schultz that the credit of the Traction Company was very good with the car trust, in view of the fact that the cars are leased until they are fully paid for. Mr. Schultz explained that the main purpose in the bankruptcy of the Morris Traction Company was for reorganization of their finances in order to cut the bonds in half. Commissioner Stewart inquired what obligation Mr. Schultz admitted as to the roadway in Dover. Mr. Schultz advised that under the reading of the ordinances the Traction Company is obligated to do the paving between the tracks but it would be necessary to secure permission from the Public Utility Commission before the work could be done. He stated that if the money could be obtained his company will arrange for the rehabilitation of its tracks and if a permanent pavement was to be placed on the street, new paving should be done within the tracks although the present track material still has a five or six year life. He stated also that the company must provide for some matters which may arise in Madison and Chatham since in Morristown it was already agreed that his company would furnish the new track material through the constructed portion of the work. Commissioner Stewart inquired whether the receivers would be guided by the recommendations of the General Manager, and Mr. Schultz advised that this was practically true and he would be glad to take the matter up with the receivers as soon as possible, which would be within a week. Commissioner Jelin suggested that State Highway Engineer Sloan attend the meeting with the receivers when the entire matter could be explained from the standpoint of the State Highway Commission. Mr. Schultz stated that he would be glad to notify the State Highway Engineer of the date of this meeting.

Sussex-Port Jervis Road, Sussex Co.

The Secretary informed the Commission that Judge H. T. Kays, Counsel for the Board of Freeholders of Sussex County was present and desired a hearing. On motion duly seconded, a hearing was granted. Judge Kays appeared as spokesman and stated that the County authorities were anxious to ascertain the feelings of the State Highway Commission on the matter of the paving of the Sussex-Port Jervis Road. He advised that under the Federal Aid granted to Sussex County the County was ready to proceed with the construction of a shale surface road, but could not guarantee that a hard surfaced pavement would be placed thereon with the time required by the Federal Government. He asked whether the State Highway Commission would consider the substituting of other State moneys in the place of the Federal Aid funds in order that this work might proceed. He estimated the distance from Sussex to the New York State Line as about eleven miles and the estimate for the work of grading and drainage as given to the Federal Government was $349,874.00.

County Engineer Snook was the next speaker for the County and advised that the cost of the work could be minimized by reducing the grading so that the cost per mile would only be $20,000.00. State Highway Engineer Sloan informed the Commission that it was his suggestion that the County might proceed from other State funds, but he understood that the County would conform in all respects to the requirements of the Federal Government so far as alignment and grading was concerned, but that there was no guarantee as to when the hard surface would be placed on the road. Mr. Wayne DuMont, President of the High Point Park Commission, next addressed the Commission and advised that High Point Park was being developed in a very economical manner by his Commission and was being made a beauty spot for visitors from the United States, and he felt that the State of New Jersey should aid in the improvement of the road leading to High Point Park, and he suggested that the State improve that section of road from Coleville to the entrance to the Park at the Lodge building, a distance of about five miles. Mr. Stanton, Secretary to the High Point Park Commission, also urged this improvement.

Commissioner Kidde inquired whether the County was prepared to proceed with its share of the cost of completing the entire road work if the State Highway Commission would substitute some other funds for Federal Aid funds. The amount which the State Highway Commission would pay toward the work, therefore, would amount to $165,000.00. Judge Kays informed the Commission that the County of Sussex was very heavily bonded for its road work and could not possibly consider doing this work all in one year, but he believed that the County authorities were ready to go ahead on the basis of the State granting 50% of the cost of the work. Commissioner Kidde stated that there could be no percentage arrangements but that the State's share would be the same as Federal Aid, namely, $165,000.00. In the discussion which followed the Freeholders did not seem to be of one opinion as to the best method for financing this work and Commissioner Kidde moved that the matter be laid over for consideration subject to a communication to be received from the County of Sussex, advising of their decision to accept the $165,000.00 for improving the Sussex-Port Jervis Road with shale construction in accordance with all the requirements of the Federal Bureau of Public Roads, said work to be completed within three years from the date of contract. This was seconded by Mr. Jelin and adopted.

Route 2, through Bordentown

The Secretary informed the Commission that Mr. Frederick, City Treasurer of Bordentown, was present with a delegation of Commissioners from Bordentown for the purpose of discussing matters in connection with the construction of Route 2 through Bordentown. On motion duly seconded, a hearing was granted. Mr. Frederick appeared and informed the Commission that the City of Bordentown was withholding payment to the State of an amount of $11,825.35, pending a decision as to damage claims filed against the State by properties of Black and Purcell on the line of Route 2 through Bordentown. He informed the Commission that the claim of Mr. Black is for $500.00 and that of Mr. Purcell for $1,000.00, and that the City of Bordentown officials were desirous of having these matters settled in connection with the final settlement due the State on work done on extra widening in Bordentown, and for which there was an amount due the State from the City. Mr. Moore, Assistant Construction Engineer of the State Highway Department, explained to the Commission in detail concerning this matter. He advised that when the construction of Route 2 was under way it was necessary to change the grade of the road in front of these properties and at the same time an opinion was received from the Attorney General's Department to the effect that the State Highway Commission has no liability when grades are changed as it cannot assess benefits against property owners when the new road enhances the value of their property. Commissioner Kidde inquired of Mr. Moore whether there was any particular damage done the properties and Mr. Moore stated that he did not feel that the properties had suffered any in view of the fact that provisions were made for the carrying off of water from the Purcell property. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission directed that the matter be taken under consideration until an opportunity was had for viewing the properties in question.

Mountain Ave., Hackettstown

The Secretary informed the Commission that a delegation from the Common Council of Hackettstown was present and desired a hearing. On motion, duly seconded, a hearing was granted. Mr. Edward Kilpatrick, acting as spokesman for the delegation, informed the Commission that at the present time, there are contracts under way on Routes 5 and 12, and when completed will give a 40-mile stretch of improved highway in that locality with the exception of a short stretch of road at Hackettstown. He informed the Commission that by the construction of Mountain Avenue which leads into Hackettstown there will be joined Routes 5 and 12 at a saving of about $75,000.00 over the cost of completing the connection as arranged for by the Engineering Division of the State Highway Department. He further advised that the Town of Hackettstown stood ready to pay for additional width of pavement and for necessary curbs and would give a 50 foot width at the point where the two roads would join near the monument in Hackettstown. Mr. Kilpatrick stated that it was true that the line suggested by the Engineers was the better of the two, but he believed that the State should be willing to save $75,000.00 until the traffic demands required that the line should be built. Commissioner Kidde called the attention to the fact that the improvement of Mountain Avenue would be in effect a local improvement, and he suggested that the County of Warren be asked to share in the cost of the improvement of Mountain Avenue and in the event the project could be divided so that the Town, County and State would each share one-third of the cost, there was a possibility of it receiving favorable consideration from the State Highway Commission. The estimated cost of the improvement on Mountain Avenue was placed at $55,000.00, of which the Town's portion in widening would be $15,000.00. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission directed that the matter be taken under consideration until further advice was received from the Town of Hackettstown.

Patented Pavements

The Secretary informed the Commission that Mr. M. H. Weeks of the Headley Good Roads Company, together with Mr. Cary, were present and desired a hearing. On motion, duly seconded, a hearing was granted. Mr. Weeks appeared and advised the Commission that his company had asked for the privilege of placing a type of pavement known as "Bitutop" in competition with other asphaltic tops. He informed the Commission that this pavement was composed the same as other bitumen pavements but the asphalt content was of an emulsified character and thus made a cold mixed type of pavement. Commissioner Jelin inquired whether this type of pavement was patented. Mr. Weeks informed the Commission that his company was operating under no patents except for the fact that the Barber Asphalt Company is now bringing suit for infringement and their case is, at the present time, in the courts. He further informed the Commission that his company stood ready to save the State harmless against any royalties which the courts might exact, and he also stated that this type of pavement could be produced by any of the concerns which make emulsified asphalt products. He informed the Commission that the County of Camden would be willing to place such a pavement in competition with others if the Commission could see its way clear to grant permission. State Highway Engineer Sloan informed the Commission that he was well satisfied with the results of the emulsified asphalt for patching work, but he desired to look into the matter of its use on pavement work before recommending the same to the Counties. On motion by Mr. Jelin, seconded by Mr. Kidde, the matter was ordered held for consideration.

Main St., Clifton (Route 11, Connecting Link) ✓

State Highway Engineer Sloan informed the Commission that a thorough investigation had been made of the ability of the State Highway Department to perform the asphalt work on East Main Street, Clifton, and he was prepared to recommend that the State Highway Commission do the work for the County of Passaic for the sum of $1.76 per square yard, said work to include the removal of temporary curbing, and he would also recommend that the asphalt plant now in possession of the Department be moved to the work for the purpose of mixing the binder course, and that asphalt be purchased for pavement from local plants. After discussion on the various items entering into this cost, Commissioner Kidde moved that the Board of Freeholders of Passaic County be notified that the State Highway Commission is ready to proceed with the work of paving East Main Street, Clifton, in accordance with specifications to include the removal of concrete curb for the stated price of $1.76 per square yard, subject to proper contract to be entered into by the State Highway Commission and the County of Passaic for doing the work. This was seconded by Mr. Jelin and adopted.

Commissioner Jelin called attention to the fact that this price would save to the County of Passaic approximately $10,000.00 over their last lowest bid received, and would include the moving of equipment from Trenton to Paterson.

On motion by Mr. Stewart, seconded by Mr. Kidde, the Commission recessed for luncheon at 1:00 P.M. to meet again in regular session at 2:30 P. M. The meeting reconvened again at 2:30 P.M. as agreed, with the same members present as at the morning session.

Sussex-Port Jervis Road

The Secretary presented a communication handed to him during the lunch hour by Mr. H. T. Kays, Attorney for the Board of Freeholders of Sussex County, advising that the Board of Freeholders are unanimous in their request to eliminate Federal Aid from the Sussex-Port Jervis Road, and to finance the same between the County and State, each to pay 50% of the cost of the grade in accordance with such plans as may be approved by both parties for temporary pavement to be placed on said road, to be of shale construction and financed to cover a period of three years. Commissioner Kidde stated that in this letter the Board of Freeholders of Sussex County did not appear to understand the fact that the Commission had pledged a definite sum of money in lieu of Federal Aid. Commissioner Stewart, therefore, moved that the communication from Judge Kays for the Board of Freeholders of Sussex County be acknowledged with a statement of regret that the letter does not conform to the understanding of the State Highway Commission as to suggestions made in the meeting this morning, namely, that the State would advance $165,000.00 to the construction of eleven miles of road extending from Sussex, New Jersey, to the New York State Line near Port Jervis, New York, and on further understanding that the entire road should conform, in its construction, to the requirements of the Federal Government and be satisfactory to the State Highway Commission, and further that the project should be financed to completion within three years. This was seconded by Mr. Jelin and adopted.

Bound Brook Bridge, Route 9

Commissioner Stewart reported the inspection of the Bridge on Route 9 at Bound Brook at M.P. 40.2 and moved the acceptance and final payment on the same, subject to approval of the final papers by the State Highway Engineer. This was seconded by Mr. Jelin and adopted.

Route 7, Corlies Avenue

The Secretary informed the Commission that Mr. Fraser of the East Jersey Bridge Company, together with Mr. Goldenbach his Attorney, were present and desired further hearing on the matter of the bond to be furnished covering the defective workmanship and material on the construction of Route 7, Corlies Avenue. On motion, duly seconded, a hearing was granted. Mr. Goldenbach addressed the Commission and stated that all matters in connection with the bond were satisfactory except for the fact that the East Jersey Bridge Company desires to be notified when any defects appear in the work in order that they might have an opportunity to correct such defects themselves before any work was done by State Highway forces. Commissioner Kidde stated that this could not be done because of the fact that the bond must save the State completely without any chance for argument on the part of the contractors. Commissioner Jelin also explained that the Commission had determined not to do this at the last meeting for the reason that the proper agent for notification may not be known. Commissioner Stewart stated that he believed that the matter had been gone into very thoroughly by the State Highway Department and had been given exceptional consideration and he did not believe the State Highway Commission should do anything further than what had already been done for the contractors on this work. Commissioner Kidde stated that he believed that it would be an act of courtesy to notify the contractors, if possible, when work was to be done, but there should be nothing contained in the written bond on this point.

Cape May-Lewes Ferry

The Secretary presented a communication from Mr. C. D. Buck, Chief Engineer of the Delaware State Highway Department, advising that he did not believe that the members of the Delaware State Highway Department would care to seriously discuss the project on the Cape May-Lewes Ferry until the Delaware law has been revised and made constitutional. On motion by Mr. Jelin, seconded by Mr. Kidde, the communication was ordered received and placed on file.

Route 12, Section 2

State Highway Engineer Sloan recommended to the Commission the final acceptance of the completed work on Route 12, Section 2, Parsippany-Denville section, which was completed as of December 15, 1922, in view of the fact that the bonding company has furnished suitable bond covering the five-year guarantee on 600 feet of pavement for which the State Highway Department made no payment, due to the fact that the same did not comply with the specifications. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission accepted the completed work on Route 12, Section 2, Parsippany-Denville section, subject to proper deductions.

Route 4, Morgan Grade Crossing

State Highway Engineer Sloan presented a form of agreement to be entered into with the Central Railroad of New Jersey for the construction of grade crossing elimination at Morgan on Route 4 in which agreement the Railroad Company agrees to contribute $75,000.00 as its proportionate share of the cost of the work in three yearly installments of $25,000.00 each, without interest, further providing the State Highway Commission will abandon and close the existing grade crossing coincident with the opening of the new overhead bridge. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission approved the agreement with the Central Railroad of New Jersey for the elimination of the Morgan Grade Crossing on Route 4.

Right of Way-Route 4.

State Highway Engineer Sloan presented to the Commission an agreement with the Monmouth Lighting Company whereby the company conveys to the State all its rights and interest in Parcel #4-B on Route 4, required at the Morgan Grade Crossing elimination, without charge, the State assuming responsibility and expense of removing existing steel brdige and trestle and giving the Lighting Company a perpetual privilege of maintaining a transmission pole line upon the property, and he recommended that this agreement be accepted on the part of the State. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission approved of the recommendation of the State Highway Engineer for the acquisition of Parcel #4-B on Route 4 from the Monmouth Lighting Company.

Invitations

The Secretary called the attention of the Commission, at this time, to several invitations which were extended to the Commissioners on occasions throughout the month of May, the first of which was an invitation from the State Association of Freeholders to attend a shad dinner at Salem on Tuesday, May 6th. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission directed the Secretary to accept the invitation on behalf of the Commission with the advice that such members of the Commission that can attend will be present.

The next invitation was that from the Salem County Board of Freeholders to a shad dinner in Salem on May 14th. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission directed that the Secretary acknowledge this invitation with the advice that the State Highway Commissioners will endeavor to attend this dinner.

The Secretary informed the Commission that he also had an invitation for the Commission from the Cumberland County Board of Freeholders for the Commissioners to make an inspection of the oyster beds on May 1st or May 8th with the State Board of Shell Fisheries Commission. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission directed that the Secretary notify the Cumberland County Board of Freeholders that the State Highway Commission will accept this invitation for May 8th and such Commissioners as will find it convenient will be present.

Advisory Board Reports

Commissioner Kidde, at this time, directed attention to the fact that the Advisory Reports are printed and should be distributed to the municipal authorities interested, in order that proper conferences might be arranged and he moved that the Secretary arrange for tentative dates on which conferences can be held with the City authorities of Jersey City and Camden in the matter of proposed routes outlined by the Advisory Boards for the relief of traffic from the tunnel and bridge. This was seconded by Mr. Jelin and adopted. In connection with this matter Commissioner Kidde moved that three copies of each of the Advisory Board Reports be forwarded to each member of the Boards as appointed by the Commission, for their reference. This was seconded by Mr. Jelin and adopted.

Commissioner Kidde moved that Advisory Board Reports covering the work in Jersey City and Camden be forwarded to the officials and constituted city authorities of these respective location, subject to there being a proper record of the names of individuals who receive such reports. This was seconded by Mr. Jelin and adopted.

Fenwick Creek Bridge, Route 6

State Highway Engineer Sloan presented to the Commission a communication from the Attorney General, advising that there is an opportunity to compromise in the amount of $17,500.00 on the claim of Campbell vs. the County of Salem, for work on the Fenwick Creek Bridge. He advised the Commission that his own recommendation for compromise had been on the basis of paying $14,484.41. On motion by Mr. Stewart, seconded by Mr. Kidde, the State Highway Commission directed that the Attorney General be advised that the State Highway Commission is willing to approve a settlement on the basis of paying $14,484.41 on the final estimate and said payment to be made without prejudice in the suit, and in the event of failure to accept on the part of the contractor, that the Attorney General be advised the proceed with the suit.

Equipment and Supplies

The Secretary requested information from the Commission as to whether they desired information from the Department when there is a question as to the low bidder on the purchase of supplies, equipment, etc. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission directed that in the receipt of quotations by the State Highway Department for purchasing supplies, equipment, etc., that are needed directly by the State Highway Department under the general form of quotation, all items that exceed $500.00 per unit be brought to the attention of the State Highway Commission for decision, and also that all items on which there is any question as to the low bidder, be brought to the Commission for final disposition.

Tottenville-Staten Island Bridge

The Secretary presented a communication from the New York State Bridge & Tunnel Commission, together with a copy of report of that body on the proposed bridge between Perth Amboy, N.J. and Tottenville, Staten Island. On motion by Mr. Jelin, seconded by Mr. Kidde, the communication was ordered received and the Secretary was directed to obtain a sufficient number of reports in order that the same might be studied by each member of the Commission.

Essex County-General

The Secretary presented a resolution from the Essex County Board of Freeholders advising of the appointment of Mr. William A. Stickel, County Engineer of Essex County as County Supervisor of Roads at the annual salary of $1.00, said appointment to become effective on March 1st, 1924. On motion by Mr. Kidde, seconded by Mr. Jelin, the resolution was ordered received and placed on file.

Route 16, Somerville

The Secretary presented a resolution from the Borough of Somerville, expressing its disapproval of the plans for the abandonment of the present Lehigh Valley grade crossing on Route 16, and agreeing with the stand taken by the Somerset County Board of Freeholders in requesting that this elimination be on a straight line instead of a six degree as projected. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission directed that this communication be acknowledged and that the Secretary give to the Borough of Somerville the same reasons as were expressed to the Board of Freeholders of Somerset County, bearing on this improvement.

Signs-State Highway

The Secretary presented a communication from Mr. S. P. Leeds, President of the Atlantic City Chamber of Commerce, suggesting to the Commission that for the convenience of tourists the numbers on the poles along the State Highways be placed on the side facing the road, instead of parallel to the road as at present. On motion by Mr. Kidde, seconded by Mr. Jelin, the Commission ordered the acknowledgment with thanks and with the advice that the Commission will look into the suggestion.

Grade Crossings-General

The Secretary presented to the Commission a communication received by Chairman Scott from J. N. McCall, Chairman of the Maryland State Road Commission, calling attention to the fact that the railroad will be compelled to expend over one million dollars in equipping themselves with automatic train control devices, whereas this money could be expended for the elimination of existing grade crossings and thereby would save more life on highway grade crossings than would be saved by experimenting with this money for automatic train control devices. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission directed that the communication be acknowledged with thanks and with the further statement that the matter of railroad regulation is entirely a public utility matter and therefore the State Highway Commission can exercise no jurisdiction thereon.

Laboratory-State Highway

State Highway Engineer Sloan directed attention to the fact that certain changes may be necessary at the Chemical Laboratory during the next six months, and there was now presented for approval the agreement with the Department of Conservation & Development for the use of the Laboratory for a six months period beginning May 1st. Commissioner Kidde moved that the agreement for the use of the Laboratory be executed by the Chairman and that the Department of Conservation & Development be advised that the Commission is taking under consideration the terms of a new contract. This was seconded by Mr. Jelin and adopted. Commissioner Kidde also moved that the State Highway Engineer present at the next meeting a comprehensive report on the proposed change in location for the Laboratory and also as to the matter of personnel by which the work can be handled. This was seconded by Mr. Jelin and adopted.

Insurance-State Highway Dept.

The Secretary presented to the Commission a statement from the Commercial Casualty Insurance Company advising that the policy as issued to the State Highway Commission covering liability and property damage insurance, would have an attached indorsement so that it would cover any driver operating these cars or trucks with the permission of the State Highway Commission. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission directed that the matter of auto liability insurance be referred to the State House Commission for suggestion and recommendation with the advice that the matter is presented due to the fact that the State Highway Commission is interested in protecting the employees of the Department.

Right of Way-Albany Street Br.

The Secretary presented a report from the Right of Way Department, advising that the condemnation Commission in the matter of the Manion property on Route 1, had made an award of $5,500.00 for this property as against the State 's offer of $2,800.00. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission directed that it be noted that the decision reached by the condemnation Commissioners is unsatisfactory to the Commission and that an appeal is authorized through the office of the Attorney General.

Right of Way-Route 8.

The Secretary presented a bill for the sum of $100.00 from Judge Joshua Salmon, who represented an employee of the State Highway Department in a suit brought by Miss Annie Lines in connection with property on Route 8. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission authorized the payment of an amount of $100.00 to Judge Joshua Salmon for professional services rendered.

Abandonment-Route 2, Section 5.

On recommendation of the State Highway Engineer, Commissioner Kidde moved the adoption of the following resolution abandoning a portion of Route 2, Section 5, Bordentown-Crosswicks Creek:

> RESOLVED, that in accordance with the provisions contained in Article 3, Chapter 14, Laws of 1917, and the amendment thereto in Chapter 220, Laws of 1919, whereby the State Highway Commission may by resolution, take over as a State Highway any route, routes or parts thereof, or vacate parts thereof, you and through you, the County of Burlington, is respectfully advised that effective May 1st, 1924, the State Highway Commission will abandon in the name of the State of New Jersey and vacate as a part of State Highway Route 2, a certain described portion and thus relinquish responsibility for the improvement and maintenance of such portion of the road, taken over September 1st, 1919, between Crosswicks Creek and Bordentown in Bordentown Township, Burlington County, the part to be vacated being more particularly described as follows:

BEGINNING at a point on the center line of the road as taken over on September 1, 1919, between Crosswicks Creek and Bordentown in Bordentown Township, in Burlington County, said point being thirty-three (33) feet from the center line of the present State Highway Route 2, Section 5, as constructed, at Station 1371 plus 10, more or less; thence (1) in a northeasterly direction four hundred (400) feet, more or less to a point, thence (2) in a northwesterly direction seven hundred (700) feet more or less to a point on the center line of the road as taken over, said point being thirty-three (33) feet from the center line of the present State Highway Route 2, Section 5, as constructed, at Station 1380 plus 91, more or less; it being the intention of the State Highway Commission to vacate and abandon that portion of the old road, as taken over September 1, 1919, lying outside the limit of the acquired right of way of the new road as constructed sixty-six (66) feet wide, between Station 1371 plus 10, more or less, and Station 1380 plus 81 more or less, as shown on the attached plan.

This was seconded by Mr. Jelin and adopted.

Abandonment-Route 3, Section 10.

On recommendation of the State Highway Engineer, Commissioner Kidde moved the adoption of the following resolution for the elimination of a portion of Route 3, Section 10, Kirkwood-Berlin:

> RESOLVED, that in accordance with the provisions contained in Article #3, Chapter 14, Laws of 1917 and the amendment thereto in Chapter 22, Laws of 1919, whereby the State Highway Commission may, by resolution, take over as a State Highway, any route, routes or parts thereof, or vacate parts thereof, you and through you, the County of Camden is respectfully advised that effective May 1st, 1924, the State Highway Commission will abandon in the name of the State of New Jersey, and vacate as a part of State Highway Route 3, certain described portions, and thus relinquish responsibility for the improvement and maintenance of such portions of road, taken over on September 1st, 1919, between Berlin and Kirkwood in Berlin Township, Camden County, being more particularly described as follows:
>
> BEGINNING at a point on the center line of the road as taken over September 1st, 1919, between Berlin and Kirkwood, in Berlin Township, Camden County, said point being thirty-three (33) feet from the center line of the present State Highway Route 3, Section 10, as constructed, at Station 635 plus 62 more or less; thence (1) along the center line of the road as taken over in a northwesterly direction seven hundred eighty (780) feet more or less to a point; thence (2) bearing to the left in a northwesterly direction three hundred seventy-five (375) feet more or less to a point; thence (3) bearing to the right in a northwesterly direction eight hundred sixty (860) feet more or less to a point on the center line of the road as taken over, said point being thirty-three (33) feet from the center line of the present State Highway Route 3, Section 10, as constructed at Station 655 plus 25 more or less; It being the intention of the State Highway Commission to vacate and abandon that portion of the old road as taken over September 1st, 1919, lying outside the limits of the acquired right of way of the new road as constructed sixty-six (66) feet wide, between Station 635 plus 62 more or less and Station 655 plus 25 more or less, as shown on plan.

This was seconded by Mr. Jelin and adopted.

Route 10, Bluff Road

Commissioner Kidde inquired as to what disposition was being made of property which was authorized to be returned to the owners at the same price paid by the State for property on Route 10, Bluff Road section. The Secretary informed the Commission that four properties had been accepted by the owners while there were still several who had not yet responded. Commissioner Kidde suggested that another notice be forwarded to the owners of property adjacent to State

Highway land, advising that a number of parcels had been sold and they be urged to take up the property as soon as possible.

Right of Way-Route 9.

On recommendation of the State Highway Engineer, Commissioner Kidde moved acceptance of $200.00 from L. C. Wyckoff for his house to be moved off the Dealaman property on Route 9, Section 11, Lincoln Avenue; Mr. Wyckoff also to pay the cost of moving the building. This was seconded by Mr. Jelin and adopted.

Sidewalks-White Horse Pike

State Highway Engineer Sloan presented to the Commission a communication from J. J. Albertson, County Engineer of Camden County, requesting information from the Commission as to what was proposed to be done in the matter of providing sidewalks on Route 3 over the White Horse Pike. On motion by Mr. Jelin, seconded by Mr. Kidde, the communication was ordered received and placed on file with the advice that this matter is now in the hands of the Attorney General for opinion. A reply will be made when such opinion is received.

Morris Canal Bridges-Complaint

State Highway Engineer Sloan presented a communication from Mr. J. H. Hann, Clerk of the Borough of Washington, New Jersey, enclosing a letter written by him to the Morris Canal & Banking Company, complaining of the dangerous conditions existing on the bridges crossing the Morris Canal on Belvidere Avenue, Washington, which is on the line of the new State Highway Route between Trenton and Buttzville. On motion by Mr. Kidde, seconded by Mr. Jelin, the communication was ordered received and placed on file. Commissioner Kidde stated that he had spoken to the Chairman of the Morris Canal Abandonment Committee and he had informed them that in the event they desired to appoint the Highway Commission to perform the work of tearing down bridges and filling in the roadway, the Commission would be glad to do this work. State Highway Engineer Sloan advised the Commission that it was his purpose as soon as the State Highway Construction Program was under way, to make further survey of bridges on State Highways and arrange for some method of replacing existing bridges with permanent alignment.

Signs-State Highways

State Highway Engineer Sloan presented a communication from the State Forester, requesting permission to place forest fire warning signs on posts which are erected by the State Highway Department and used for directionary and cautionary signs and he recommended that such permission be granted. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission approved the recommendation of the State Highway Engineer and authorized forest fire warning signs to be placed on State Highway posts.

Signs-State Highway

State Highway Engineer Sloan presented to the Commission a report from the Superintendent of Maintenance on the matter of erection of signs in accordance with suggestions made at a previous meeting of the Commission, whereby signs 5' X 10' in size could be erected at beginning and ending points of State Highway construction at a cost of approximately $50.00 each installed. Commissioner Kidde moved that one sign such as recommended be made up and erected on the Trenton-Lawrenceville Road, in order that the same might be viewed by the Commission before any further action is taken. This was seconded by Mr. Jelin and adopted.

Employments

State Highway Engineer Sloan presented to the Commission the following employments as made by him since the last meeting of the Commission and recommended ratification of same:

5-1-24	Wm. F. Corbett,	Jr. Insp.	$ 125.00 mo.

On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission ratified, confirmed and approved the recommendation of the State Highway Engineer.

Increase-J. J. Newmark

State Highway Engineer Sloan presented a recommendation for increase in compensation for J. J. Newmark, Office Engineer, from $275. to $300. per month, effective April 1st. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission approved the recommendation of the State Highway Engineer.

Extension of Time, Route 13,Sec. 5.

On recommendation of the State Highway Engineer, Commissioner Kidde moved the approval of an extension of time of ten days to Messrs. Grant & Driver, contractors on bridges at M. P. 1.0 and M. P. 2.6 on Route 13, Section 5, Trenton-Lawrenceville section. This was seconded by Mr. Jelin and adopted.

Extension of Time, Route 13,Sec.6.

State Highway Engineer Sloan presented to the Commission a letter received from L. J. Sieling, contractor for bridges at M. P. 3.9, 5.7 and 7.9 on Route 13, Section 6, Lawrenceville-Princeton section, and recommended to the Commission that this application for extension of time be denied, in view of the fact that the progress on this work has been unsatisfactory. On motion by Mr. Jelin, seconded by Mr. Kidde, the recommendation of the State Highway Engineer was approved and an extension of time was denied.

Right of Way-Route 9.

On recommendation of the State Highway Engineer, Commissioner Jelin moved that condemnation proceedings be instituted in accordance with the following resolution, where same is found necessary for the acquisition of Parcels 3, 4, 5, and 6 on Route 9, Section 15, through Cranford:

> RESOLVED, that this Commission hereby determines to acquire in the name of the State of New Jersey for public use in the construction of State Highway Route 9, Section 15, All that certain Lot, tract or parcel of land, situate, lying and being in the State of New Jersey, and more particularly described as follows:

Parcel No. 3

BEGINNING at a point where the southwesterly property line of M. Aanodt intersects the southeasterly line of North Avenue in the Township of Cranford, County of Union, and State of New Jersey; thence (1) along said southeasterly line of North Avenue N46°44'E

30' to the dividing line between lands of said Aanodt and Est. Hannah Randolph, thence (2) along said dividing line between lands of said Aanodt and Est. Hannah Randolph S 43°16'E 70' to a point in the dividing line between lands of M. Aanodt and Walter Mooney; thence (3) along said dividing line between M. Aanodt and Walter Mooney S0° 20'W 43.5' to a point in the northeasterly line of a driftway of said M. Aanodt N 43°16'W 101.5' to the place of beginning. Containing 0.059 acres.

Parcel No. 4.

BEGINNING at a point where the dividing line between lands of Estate of Hannah Randolph and M. Aanodt intersects the southeasterly line of North Avenue in the Township of Cranford, County of Union and State of New Jersey; thence (1) N46°44'E along the said southeasterly line of North Avenue 30.17' to an angle in said line; thence (2) still along the southerly line of North Avenue S89°40'E 26.42' to the dividing line between lands of said Est. Hannah Randolph and Walter Mooney; thence (3) along said dividing line between lands of said ESt. Hannah Randolph and Walter Mooney S 0°20'W 71.50' to the northeast corner of land of M. Aanodt, thence (4) along dividing line between lands of said Est. Hannah Randolph and M. Aanodt N 43° 16'W 70' to the place of beginning. Containing 0.046 acres.

Parcel No. 5.

BEGINNING at a point where the dividing line between lands of Walter Mooney and Est. Hannah Randolph intersects the southerly line of North Avenue in the Township of Cranford, County of Union and State of New Jersey; thence (1) along said southerly line of North Avenue, S 89°40'E 25' to the dividing line between lands of said Walter Mooney and Jos. Degorie; thence (2) along said dividing line between lands of said Walter Mooney and Jos. Degorie S 0° 20'W 115' to a point , said point being the southeast corner of Walter Mooney's land; thence (3) N 89°40'W and parallel to first course 25' to dividing line between lands of said Walter Mooney and M. Aanodt; thence (4) along said dividing line between said Walter Mooney and M Aanodt and Walter Mooney and Est. Hannah Randolph N 0°20'E 115' to place of beginning. Containing 0.066 acres.

Parcel No. 6.

BEGINNING at a point when the southeasterly line of North Avenue and the southwesterly line of a driftway intersect, in the Township of Cranford, County of Union and State of New Jersey, thence (1) along the southwesterly line of the driftway S 43°16'E 109 feet to an angle in said line of driftway; thence (2) still along southerly line of said driftway S 89°40'E 6 feet; thence (3) at right angles with said southerly line of driftway or S 0°20'W 20 feet to a R. R. Mon.; thence (4) along southerly line of Joseph Afflerback's land N 89°40'W 77.33 feet; thence (5) along the dividing line between lands of said Joseph Afflerback and Est. Hannah E. Randolph N 43°16'W 73.36 feet to the southeasterly line of North Avenue; thence (6) along the said southeasterly line of North Avenue N 46°44' E 65 feet to the place of beginning. Containing 0.154 acres.

The State Highway Engineer is hereby authorized and directed on behalf of this Commission to make an offer to the owner or owners of said lands and premises for the conveyance of the same to the State of New Jersey free and clear of all encumbrances, and upon the failure of such owner or owners to accept such offer, or if for any other reason said lands and premises cannot be immediately acquired by agreement with such owner or owners, then the Attorney General of the State of New Jersey is hereby authorized and directed to institute

condemnation proceedings for the acquisition of said lands and premises.

This was seconded by Mr. Kidde and adopted.

Federal Aid-Route 10, Section 6.

On recommendation of the State Highway Engineer, Commissioner Jelin moved the approval of project agreement for Federal Aid on Route 10, Section 6, Hackensack-Paterson section, known as Federal Aid Project #65-A. This was seconded by Mr. Kidde and adopted.

Maintenance Material-Cape May Co.

On recommendation of the State Highway Engineer, Commissioner Kidde moved the approval of contract between Cape May County and the Birdsboro Stone Co. for the furnishing of trap rock. This was seconded by Mr. Jelin and adopted.

Roosevelt Blvd., Section 2

On recommendation of the State Highway Engineer, Commissioner Jelin moved approval of award of contract by Cape May County to Monihan & Hall of Ocean City for the construction of the Roosevelt Boulevard, Section 2, Cape May County, Motor Vehicle Aid work. This was seconded by Mr. Kidde and adopted.

Lakeside Blvd, Ocean County

On recommendation of the State Highway Engineer, Commissioner Kidde moved the approval of award of contract by Ocean County to Charles T. Kavanagh, for the construction of the Lakeside Boulevard, Ocean County, Motor Vehicle Aid work. This was seconded by Mr. Jelin and adopted.

Motor Vehicle Aid-Morris County

On recommendation of the State Highway Engineer, Commissioner Kidde moved approval of Motor Vehicle Aid Schedule and Agreement for Morris County. This was seconded by Mr. Jelin and adopted.

Motor Vehicle Aid-Ocean County

On recommendation of the State Highway Engineer, Commissioner Kidde moved approval of 1924 Motor Vehicle Aid Schedule and Agreement for Ocean County. This was seconded by Mr. Jelin and adopted.

Motor Vehicle Aid-Passaic County

On recommendation of the State Highway Engineer, Commissioner Jelin moved approval of Motor Vehicle Aid Schedule and Agreement for

1924 for Passaic County. This was seconded by Mr. Kidde and adopted.

Motor Vehicle Aid-Warren County

On recommendation of the State Highway Engineer, Commissioner Kidde moved the approval of Motor Vehicle Aid Schedule and Agreement for Warren County for 1924. This was seconded by Mr. Jelin and adopted.

Commissioner Kidde inquired as to whether all Motor Vehicle Aid Agreements had been turned in for the Counties of the State, and he was advised that there were still several counties to be heard from. He, therefore, moved that Assistant State Highway Engineer Reed be requested to urge the counties to forward the 1924 Schedules and that a statement be prepared as to the names of those counties from which no reports have been received.

Motor Vehicle Aid-Camden County

On recommendation of the State Highway Engineer, Commissioner Kidde moved approval of plans and specifications for Kings Highway in Camden County, Motor Vehicle Aid work. This was seconded by Mr. Jelin and adopted.

On recommendation of the State Highway Engineer, Commissioner Jelin moved approval of plans and specifications for Warrick Road, Camden County, Motor Vehicle Aid work. This was seconded by Mr. Kidde and adopted.

Motor Vehicle Aid-Cape May County

On recommendation of the State Highway Engineer, Commissioner Kidde moved the rejection of plans and specifications for 26th St. and Central Avenue in North Wildwood, Cape May County, Motor Vehicle Aid work, due to lack of funds. This was seconded by Mr. Jelin and adopted.

Rejection of Plans-Cape May Co.

On recommendation of the State Highway Engineer, Commissioner Kidde moved the rejection of plans and specifications for Sea Isle Boulevard, Cape May County Motor Vehicle Aid work, due to lack of funds. This was seconded by Mr. Jelin and adopted.

Township Aid-Atlantic County

On recommendation of the State Highway Engineer, Commissioner Kidde moved approval of plans and specifications for the Buena-Tuckahoe Road, Section 3, Weymough Township, Atlantic County, Township Aid. This was seconded by Mr. Jelin and adopted.

Township Aid-Hunterdon County

On recommendation of the State Highway Engineer, Commissioner Kidde moved the approval of plans and specifications for Three Bridges in Readington Township, Hunterdon County, Township Aid work. This was seconded by Mr. Jelin and adopted.

Township Aid-Morris County

On recommendation of the State Highway Engineer, Commissioner Stewart moved the approval of plans and specifications for the Long Valley-Fairmount Road, Section 2, Washington Township, Morris County Township Aid. This was seconded by Mr. Jelin and adopted.

Township Aid-Union County

On recommendation of the State Highway Engineer, Commissioner Jelin moved the approval of application and agreement for Township Aid on Cranford Avenue, Linden Township, Union County. This was seconded by Mr. Kidde and adopted.

Route 4, Section 23 and 24

State Highway Engineer Sloan reported to the Commission that the contract for the construction of Route 4, Section 23 and 24, by the Department of Institutions and Agencies had been executed by that Department and was now returned for approval by the State Highway Commission. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission approved the contract with the Department of Institutions & Agencies for the construction of Route 4, Sections 23 and 24, in accordance with plans and specifications of the State Highway Department, work to be done by Inmate Labor and to be financed throughout by the Department of Institutions & Agencies through their revolving fund.

Amboy Bridge-Advisory Board

The Secretary informed the Commission that the membership of the Memorial Bridge Committee was complete and that this Committee was now awaiting a date for the first meeting to be called by Chairman

Scott. Commissioner Jelin suggested that Chairman Scott might ask Mr. J. L. Clevenger, Secretary of the Memorial Bridge Advisory Board to find a definite location where the first meeting could be held. Chairman Scott then directed that the Secretary follow the suggestion of Commissioner Jelin and ascertain from Mr. Clevenger as to a suitable place near the site of the new Amboy Bridge where a meeting could be held.

Records-State Highway Department

The Secretary presented to the Commission in detail, the matter of records of the State Highway Department as affecting contracts, agreements, franchises, etc. as was requested at the last meeting. No action was taken except that Commissioner Kidde suggested that the Accounting Division should have a method of controlling all agreements in which there was a financial question involved.

On motion by Mr. Kidde, seconded by Mr. Jelin, the meeting adjourned at 5:45 P. M., to meet in regular session again on Tuesday, May 6th, 1924, at 10:30 A. M.

Respectfully submitted,

A. LEE GROVER,

Secretary.

MINUTES OF MEETING - May 6th, 1924.

A regular meeting of the State Highway Commission was held in the Commission meeting room, Broad Street Bank Building, Trenton, on Tuesday, May 6th, 1924. The meeting was called to order by Chairman Scott at 10:30 A.M.

Present: General H. L. Scott, Chairman, and Messrs. Walter Kidde and Abraham Jelin.

Absent: Mr. Percy H. Stewart, on important business in New York.

Minutes Approved

Commissioner Kidde reported having carefully read the minutes of the meeting of April 15th and moved the approval of the same as mailed. This was seconded by Mr. Jelin and adopted.

Employments-Bridge Division

The Secretary presented a communication signed by six members of the Bridge Division, requesting the Commission to grant further extension of time on the allotments for commutation fare between Newark and Trenton, necessitated by the moving of the Bridge Office from Newark to Trenton. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission directed that the communication be referred to the State Highway Engineer for proper disposition.

Hearing-Middlesex County

The Secretary informed the Commission that a delegation from Middlesex County was present and desired a hearing at this time. On motion, duly seconded, a hearing was granted. There appeared Messrs. Haight, Applegate and Vandenberge and County Treasurer Hilker. Assistant State Highway Engineer Reed presented a report on the conditions of roads as outlined in the 1924 Schedule filed by Middlesex County on road maintenance. In this report Mr. Reed stated that the county had proceeded to do considerable work on its maintenance schedule without having the same approved by the State Highway Commission. He advised that the schedule was received in this office on April 10th, after which time it was necessary to make inspection on all roads named therein. He reported that he did not believe there could be any improvement in the work done in Middlesex County on the basis of having road work done by districts. He recommended that before approval of the schedule by the State, the County be directed to place important links in proper condition to meet with the approval of the State Highway Commission and also agree to make some change in its methods of road repair work. Freeholder Haight informed the Commission that the County was willing to try to follow the directions of the State Highway Commission, but it was impossible to complete all the roads in the schedule without additional funds. He advised further that no additional funds could be allotted in view of the fact that the County budget was already prepared for the year. He also informed the Commission that there was need to spread the money over a greater mileage than any other county in the State and for this reason the work could not be done any better by the county than was accomplished. Commissioner Kidde took occasion to call the attention of the Board of Freeholders to the fact that the county is certainly not carrying on its maintenance work in an efficient manner by spreading the money so thinly over all the roads. He suggested that the county prepare some schedule of work over a definite period of years whereby a substantial improvement could be made to all county roads, even though the moneys in hand are not as great as the needs of the case would develop. Commissioner Kidde also questioned the seriousness of the County Board of Freeholders in failing to adopt some measures for its road repairs, in view of the fact that the State Highway Commission had withheld moneys due on the Motor Vehicle Schedule in 1923 for similar reasons. Mr. Reed cited to the Commission the case of the New Durham Road which is under the control of two Freeholders, with the result that there is a gap in the road which is not repaired while the two ends of the road are in repair. After discussion Mr. Haight suggested that it might be possible for the Board of Freeholders to allow the State Highway Commission to go in to Middlesex County with its own funds and do such repair work in such a manner as they desired without any controversy with the Board of Freeholders. Commissioner Kidde suggested that Assistant State Highway Engineer Reed prepare a report, in detail, giving the amount of money already spent by Middlesex County for the making of repairs up to this time. In addition, this report should include recommendations as to the roads on which the remaining funds of the County and State can be applied to the best advantage, and to make such further recommendations as to the nethods by which the County Board of Freeholders can improve the efficiency of the work being done in the County, said report to be presented by State Highway Engineer Sloan after careful review.

Road & Bridge Bonds-1924

The Secretary reported to the Commission that upon advice from the Comptroller, it was necessary for additional bonds to be issued for the 1924 road and bridge work and he presented the recommendation of the State Highway Engineer for the apportionment of the $8,000,000 bond issue on the basis of $5,000,000 for roads and $3,000,000 for bridges. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission unanimously adopted the following resolution:

WHEREAS, Chapter 262 of the Laws of 1922 passed by the New Jersey Legislature March 17, 1922, and adopted at a general election November 7, 1922, in accordance with the provisions of the State constitution provides that bonds in a principal amount not to exceed $40,000,000.00 shall be issued for the purpose of paying the cost of constructing, improving, reconstructing and rebuilding the State Highway System as authorized by law or portion thereof, including bridges which are a part thereof, which said bonds shall be known as State Highway Bonds and which shall ~~not~~ be payable in not to exceed fifteen years from date of issue for highway construction and not exceeding thirty years from date of issue for bridge construction, and

WHEREAS, Section 6 of the said Chapter 262 of the Laws of 1922 provides that the State Highway Commission shall certify to the Issuing Officials the amount required for the purposes for which the said bonds are authorized in a total amount not to exceed $8,000,000.00 in any calendar year and that the said Commission shall designate the separate amounts required for the purpose of highway construction and bridge construction,

NOW, THEREFORE, BE IT RESOLVED, that the State Highway Commission of the State of New Jersey does hereby certify to the Issuing Officials of the State of New Jersey that there is required for the purposes of carrying out the provisions of Chapter 262 of the Laws of 1922, the sum of $8,000,000.00 during the calendar year 1924, to be issued as follows: for the purpose of paying cost of construction, improving, reconstructing and rebuilding of roads in the sum of $5,000,000.00, and for the purposes of paying the cost of constructing, improving, reconstructing and rebuilding of bridges on the said roads, in the sum of $3,000,000, and

BE IT FURTHER RESOLVED, that a copy of this resolution be certified to the said Issuing Officials as referred to in the said Chapter 262 of the Laws of 1922.

Invitation

The Secretary presented a communication received from the Secretary of the State Association of Chosen Freeholders of New Jersey, inviting the Commission to attend a shad dinner and monthly meeting of the Association at the Salem County Country Club on this day. On motion duly seconded, the communication was ordered received with thanks, it being the intention of Chairman Scott and Commissioner Kidde to attend this dinner.

Route 6, Fenwick Creek Bridge

The Secretary presented a communication from the Attorney General requesting the State Highway Commission to have expert witnesses ready to attend the trial of Campbell vs. the County of Salem, on Thursday, May 8th. The Secretary informed the Commission that the Attorney General had again suggested to him the possibility of a settlement of this case without going to court. After discussion of this matter, Commissioner Jelin moved that the Attorney General be requested to exercise his best judgment in the matter of looking for the best interests for the State and to make settlement of the case of Campbell vs. the County of Salem in an amount not to exceed $16,500.00. This was seconded by Mr. Kidde and adopted.

~~Perth~~ Amboy Bridge-Route 4

State Highway Engineer Sloan presented to the Commission the question of the desirability of lowering the footings of a number of the piers on the Amboy Bridge in order to provide for possible future dredging and improvement of the water front. On motion by Mr. Kidde, seconded by Mr. Jelin, the matter was ordered referred to the State Highway Engineer for estimates as to the cost of doing this work, the suggestion being made that an estimate also be prepared for doing this work on the three piers out in the river.

Route 9, Section 15, Cranford

Commissioner Kidde inquired as to the type of pavement proposed to be constructed in the Town of Cranford. State Highway Engineer Sloan then presented to the Commission a report on conditions through the Township of Cranford, on Route 9, Section 15, wherein the Township Engineer made the request that the "center of the town" in Cranford be eliminated from the present contract of the changes in buildings and drainage work and the Township Committee would be willing to enter a joint agreement with the State for the paving from curb to curb on the remaining sections, construction to be of concrete. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission approved of the recommendation of the State Highway Engineer for the elimination from the work on Route 9, Section 15, through the Township of Cranford, of that portion in the "center of the Town".

Route 16, Section 8.

The State Highway Engineer reported to the Commission the following bids received on May 5th for the construction of Route 16, Section 8, Harlingen Cut-Off and recommended award to Graham VanKeuren, the lowest bidder, in the sum of $45,965:

Graham VanKeuren	$ 45,965.00
T. J. M. Contracting Co	46,860.00
Sigafoos & Poore	50,582.40

On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission unanimously adopted the following resolution:

> RESOLVED, that the State Highway Commission does hereby make award of contract for the construction of Route 16, Section 8, Harlingen Cut-off, to Graham VanKeuren, at his, the lowest bid received in the amount of $45,965.00, and
>
> BE IT FURTHER RESOLVED, that the Chairman is authorized to sign the necessary papers after approval by the State Highway Engineer.

Route 5, Beaver Brook Bridge.

State Highway Engineer Sloan presented to the Commission the following list of bids received on May 5th for the construction of Beaver Brook Bridge on State Highway Route 5, Section 11 at M. P. 5.3, and recommended award to T. M. Gibbs Const. Co. of Philadelphia, at their's the lowest bid in the amount of $31,953.36.

T. M. Gibbs Construction Co	$ 31,953.36
R. T. & C. D. Stewart Co	32,530.00
Salmon Bros	34,547.00
Arnolt-More, Inc	35,900.00
Dover Boiler Works	37,885.00
D. B. Hoover	40,633.00

On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission unanimously adopted the following resolution:

> RESOLVED, that the State Highway Commission does hereby make award of contract for the construction of the Beaver Brook Bridge at M. P. 5.3 on State Highway Route 5, Section 11, to T. M. Gibbs Construction Co. at their's the lowest bid in the amount of $31,953.36, and
>
> BE IT FURTHER RESOLVED, that the Chairman is authorized to sign the necessary papers after approval by the State Highway Engineer.

Route 9, Section 11.

State Highway Engineer Sloan reported to the Commission that only one bid, and that in irregular form, was received on May 5th for Route 9, Section 11, Lincoln Avenue, Plainfield, and he would recommend that readvertisement as of May 5th be approved. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission unanimously adopted the following resolution:

> RESOLVED, that the State Highway Commission does hereby approve of plans and specifications for the readvertisement of Route 9, Section 11, Lincoln Avenue, Plainfield section, and the Chief Clerk is directed to place the necessary readvertisement as of May 5th.

Maintenance Materials-State Highway

State Highway Engineer Sloan presented to the Commission the report of bids received on April 21, 1924 for the furnishing of crushed stone and one-quarter inch washed gravel, the recommendation for award being to the low bidder in each case for the tonage indicated. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission approved the recommendation of the State Highway Engineer and authorized award of contract for crushed stone for 1924 maintenance work as follows:

Contractor	Tonnage	Amount
Orange Quarry Co., West Orange, N. J.	165	$ 377.00
Raritan Merchantile Co., Perth Amboy, N. J.	2870	5,740.00
Consolidated Stone & Sand Co., Upper Montclair, N. J.	2570	4,202.00
W. A. Fergusons' Sons Co., Little Falls, N. J.	1730	3,027.00
Birdsboro Stone Co., Philadelphia, Pa.	175	252.75
Miles-Bitting Co., Allentown, Pa.	3830	5,269.35
Graham VanKeuren, Jersey City, N. J.	555	1,110.00
Pompton Crushed Stone Co., Bloomingdale, N. J.	2920	4,658.00
Morris County Crushed Stone Co., Morristown, N. J.	4420	6,846.50
F. R. Upton, Inc., Newark, N. J. (Bound Brook)	7365	10,421.00
F. R. Upton, Inc., Newark, N. J. (Summit)	425	780.00
F. R. Upton, Inc., Newark, N. J. (Califon)	1795	2,513.00
Lambertville Stone Quarry Co., Philadelphia, Pa.	13335	18,134.75
Delaware River Quarry & Const. Co., Lambertville, N. J.	6215	7,948.85
	48370	$ 71,280.00

Hackensack River Bridge-Route 1

The Secretary presented a communication from A. T. Vanderbilt, County Counsel for the Board of Freeholders of Essex County, advising that testimony is still being taken upon the subject of damages for the wrecking of the Hackensack River Bridge by the "Glendaruel" and

and just as soon as a decision is reached as to the amount of damages fixed, this information will be forwarded to the State Highway Commission. On motion by Mr. Jelin, seconded by Mr. Kidde, the communication was ordered received and acknowledged with thanks.

Employments

State Highway Engineer Sloan presented a report of employees approved by him since the last meeting of the Commission. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission unanimously ratified, approved and confirmed the following appointments and increases as made since the last meeting of the Commission:

Chairman Scott informed the Commission that it was now time to proceed to the meeting of the State Association of Chosen Freeholders at Salem, and on motion by Mr. Kidde, seconded by Mr. Jelin, the meeting was adjourned at 12 o'clock noon to be convened again on Tuesday, May 13th, 1924, at 10:30 A. M.

Respectfully submitted,

A. LEE GROVER,

Secretary.

MINUTES OF MEETING - May 13, 1924.

A regular meeting of the State Highway Commission was held in the Commission meeting room, Broad Street Bank Building, Trenton on Tuesday, May 13, 1924. The meeting was called to order at 11:00 A. M., by Chairman Scott.

Present: Gen. H. L. Scott, Chairman, and Messrs. Walter Kidde, Percy H. Stewart and Abraham Jelin.

Minutes Approved

Commissioner Kidde reported having carefully read the minutes of the meeting held April 22, and he moved the approval of the same with the correction on Page 3, second paragraph, last line to substitute the words "price to be named by" instead of "actual cost to". This was seconded by Mr. Jelin and adopted.

Claim-New Brunswick Boat Club

The Secretary informed the Commission that a hearing had been requested by representatives of the New Brunswick Boat Club. On motion, duly seconded, a hearing was granted. There appeared Mr. E. U. Kent and Mr. W. R. VanNostrand of the New Brunswick Boat Club and advised the Commission that by authority given in a resolution of the Board of Freeholders of Middlesex County, the Boat Club was authorized to attach mooring tackle to a pier of the Albany Street Bridge and an iron stairs was provided for. They complained that now that the Albany Street Bridge is being widened, no provision is being made for the replacing of the stairs and moorings. A petition was made to the Highway Commission that these be replaced since the financial condition of the Club is such that it cannot afford to spend the money for this work. Chairman Scott informed the visitors that the State Highway Commission had no intention of doing harm to any one interested and if there has been any damage done the Boat Club, which should be corrected, the same will be attended to. Commissioner Kidde inquired whether there was any obligation on the part of the State in this matter in view of the fact that no rentals were being collected. Commissioner Stewart stated that the Boat Club appeared to have a vested right and to be entitled to its location. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission directed that the matter be referred to the State Highway

Engineer for investigation and report.

Middlesex County Road Repairs

The Secretary informed the Commission that a hearing had been requested by the Board of Freeholders of Middlesex County on the matter of the County road repair schedule. On motion, duly seconded, a hearing was granted. There appeared County Counsel F. F. Richardson and all the members of the Board of Freeholders of Middlesex County. Mr. Richardson acted as spokesman, informing the Commission that the County Board of Freeholders was awaiting a report from the State Highway Commission on its attitude toward the County road schedule with special reference to the fact that the State Highway Commission had promised at its last meeting to make a report for the benefit of the county in its work. Mr. Richardson informed the Commission that the County was very desirous of cooperating with the State, but felt that not only the main highways should be taken care of but also the rural roads in order to permit the farmers to reach their markets. He advised that the county was very willing to have any assistance that the State might give and he further stated that the county has confidence in the membership of the State Highway Commission and in its Engineering Staff, and will cooperate to the limit. He stated that it was the purpose of the county to provide funds next year to do its county work in accordance with the requirements of the State, but he pleaded that the county be permitted to proceed with its schedule as at present with proper supervision by the State, since no change could be made in the County Budget until next year. Mr. Haight of the Board of Freeholders, asked for the recommendations of the State. A report was presented to the Commission by State Highway Engineer Sloan and read. This report referred to the fact that of the total estimated cost of the work to be done by Middlesex County, there was the sum of $273,500.00, of which $125,000.00 had already been expended, leaving the balance of $148,500.00 for completing the schedule for the balance of the year, this sum inclusive of the Motor Vehicle Aid granted by the State. This report laid out a plan whereby twenty-six thoroughfares in Middlesex County could be properly provided for, leaving the remainder of the roads to be taken care of at a later date. Mr. Richardson argued that while it was desirable, from the point of view of the users of the main highways, to follow the plan suggested by the State, it was not expedient for the rural districts, although he admitted that to maintain operations on the present basis was not a satisfactory system. Commissioner Stewart called attention to the fact that the result looked for by both the State and the County was good roads for travel. He stated that he realized the conditions under which Middlesex County was trying to work and the State was very anxious to help the County and has in mind sending into the County some one who will look after the road maintenance and make sure that such roads as are repaired will stay repaired, and that a system would be worked out whereby the County would have its work done and where districts had suffered he stated that the Highway Commission was willing to assume the burden of responsibility to the people. He stated that if the County would be willing to meet the Commission half way, cooperation would be assured. Mr. Haight raised the question as to whether in the event the State Highway Commission should undertake the work now, the work already done by Middlesex County would be credited in order that funds might be secured by the County for proceeding with their work. State Highway Engineer Sloan answered this question by stating that since the county has already obligated itself for certain work and materials, the Commission, in order to give credit for what has been done, must necessarily cut down on the amount of work contemplated in the revised schedule. The County Officials, continuing the conference with the Commission, pleaded the fact that it is impossible for them during the present year to follow out the schedule as laid out by the State Highway Commission and make the rural roads passable, but gave the promise that in the preparation of the next Budget for 1925, ample provision would be made to take care of all roads. Commissioner Jelin stated that he felt in sympathy with the Board of Freeholders of Middlesex County in the fact that there are a number of rural roads which should be kept in good condition, and inasmuch as the county had expressed a promise to cooperate to the fullest extent with the Commission in 1925, he was willing that an effort be made to do the very best that can be done under existing conditions, and also to send a man into Middlesex County to assist the County Board. Mr. Richardson informed the Commission that the County was very willing to have a representative from the State come in and help spend its road money. Commissioner Kidde then moved that the State Highway Engineer be designated to review the revised schedule submitted by him, with the Board of Freeholders of Middlesex County, with a view of adjusting that schedule to a working basis, and that an Inspector be designated to follow through the work and see that it is done in accordance with the agreement, the entire plan subject to the ruling of the State Highway Engineer. This was seconded by Mr. Stewart and adopted.

Prospect Ave., Essex County

The Secretary informed the Commission that Mr. W. A. Stickel, County Engineer of Essex County and Mr. Hynes of the Board of Freeholders were present and desired a hearing before the Commission. On motion, duly seconded, a hearing was granted. Mr. Stickel informed the Commission that Essex County was very desirous of proceeding with the completion of the entire section of Prospect Avenue in Verona and West Orange from Bloomfield Avenue to the Northfield Road. He stated that it was estimated the total cost of the road would be $275,000.00 against which there has been applied State Aid balances remaining to the credit of Essex County from the 1923 account, in the sum of $45,000.00. He made the request that if the Commission felt that Essex County should proceed with the entire improvement at this time, the County would be willing to go ahead on the basis of 40% to be paid by the State and the remainder by the county. Commissioner Kidde informed the Commission that this improvement was a very desirable one and he would recommend that Motor Vehicle funds be applied. He moved that there be allotted from the Motor Vehicle funds for Prospect Avenue from Bloomfield Avenue to Northfield Road in Verona and West Orange, 40% of the cost not to exceed an additional amount of $60,000 to that set up out of the 1923 funds. This was seconded by Mr. Stewart and adopted.

Route 5, Right of Way.

The Secretary informed the Commission that Right of Way Engineer Meeker was present with Mr. VanBlarcom, representative of the Gertrude Alliger Estate on Route 5, Section 11, on which property the State

Highway Commission had authorized an offer of $2,275.00 or condemnation proceedings, in view of the fact that the owners of the property were asking $4500.00. Mr. VanBlarcom presented to the Commission appraisals from experienced tree growers, placing $50.00 each as the price for 79 trees taken with the property. Commissioner Stewart informed Mr. VanBlarcom that the Commission had received an independent appraisal from an officer of the New Jersey Agricultural College in which the trees were valued in total at $575.00, thus bringing the cost of the land and trees much below the figure asked for and at the price quoted by the Commission. After considerable discussion pro and con, Mr. VanBlarcom requested some advice as to whether the Commission would be willing to compromise the amount since his client was not desirous of condemnation proceedings. Mr. Kidde stated that he would be willing to add an amount which would equal the cost to the State of condemnation proceedings, which would be in the neighborhood of $200.00. Mr. Stewart, therefore, moved that an offer of $2500.00 be made to the Gertrude Alliger Estate for property on Route 5, Section 11, without prejudicing the condemnation proceedings authorized by the Commission in the event the said offer is rejected. This was seconded by Mr. Jelin and adopted.

Route 9, thru Westfield.

The Secretary informed the Commission that Mr. Blair, Town Engineer of Westfield, was present with reference to the paving of Route 9, through Westfield. On motion, duly seconded, a hearing was granted. Mr. Blair informed the Commission that Westfield was very desirous of paving full width on Route 9, through the Town, and felt that the State Highway Commission should cooperate by granting 22 feet of pavement in lieu of necessary shoulders in the event the extra width was not attained by the municipality. The State Highway Engineer informed the Commission that provision has already been made in the contract for the paving of 20 feet but a supplemental contract could be entered into for extra widening if necessary at the unit price bid in the contract. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission directed that 22 feet of pavement be shared in by the State in the construction of Route 9 through

Westfield, and the State Highway Engineer be directed to provide the necessary extra work in such suitable contract as may be drawn, the entire widening to be paid for by the State with reimbursement to be made by the Town of Westfield for the width beyond 22 feet. Commissioner Stewart not voting.

Flemington-White House Road, Hunterdon County.

The Secretary informed the Commission that Mr. Grant Davis, County Engineer of Hunterdon County, was present to discuss the Flemington-White House construction. On motion, duly seconded, a hearing was granted. Mr. Davis appeared before the Commission and advised that he had presented the contract to the State Highway Commission for approval for the improvement of the Felmington-White House Road by Warren Thompson the lowest bidder. In this connection, Assistant State Highway Engineer Reed presented a report in which he informed the Commission that the work performed by Mr. Thompson in 1923 was not carried out within the proper time, and that Mr. Thompson had insufficient equipment to assure a satisfactory completion within the time scheduled by the County, and it was recommended that Section 1 of the work be awarded to the second low bidder and Section 2 be awarded to Mr. Thompson. Mr. Thompson, the low bidder, was present at the meeting, and Mr. Jelin asked that he be heard. Mr. Thompson stated that he would admit that there was great difficulty in carrying out his work last year, due to the fact that he ran into harder construction than contemplated and he advised the Commission that he had made ample provision for equipment and stated that he had sufficient experience to know that both sections of this job could be done by one man much better than if the sections were divided. He also stressed the point that this road was directly in front of his home and would, therefore, have constant supervision. County Engineer Davis advised the Commission that the County of Hunterdon had awarded both contracts to Mr. Thompson, the low bidder. On motion by Mr. Kidde, seconded by Mr. Jelin, decision in the matter was ordered held until after lunch.

Route 4, Perth Amboy

The Secretary presented a communication received from Mr. L. F. Booz, City Engineer of Perth Amboy, requesting an opportunity to appear with Mr. S. R. Kelsey, on the matter of street locations in Perth Amboy. On motion by Mr. Stewart, seconded by Mr. Kidde, the State Highway Commission directed that a hearing be granted on May 27th, 1924.

Commissioner Jelin made a request that he be given more definite property lines on that property needed for new alignment on Route 4 through Perth Amboy.

Commendations

The Secretary presented a communication from the Town of Cranford, expressing commendation to the State Highway Commission for cooperation given by the State Highway Commission and its Engineer on the work through Cranford. On motion, duly seconded, the communication was ordered acknowledged with thanks.

The Secretary presented a communication from the Millville Chamber of Commerce, commending the State Highway Commission for its action in taking over Route 20 from Westville to Millville. On motion by Mr. Stewart, seconded by Mr. Kidde, the communication was ordered acknowledged with thanks.

Route 5, Trolley tracks.

The Secretary presented a report received from Construction Engineer Bedwell on the meeting held with the receivers of the Morris County Traction Company of Morristown, on the 7th instant, in which report Mr. Bedwell advised that the Receivers stood ready to cooperate on the paving of the track work through Springfield on Route 5, but would not do otherwise than furnish and place new rails and equipment through Morristown, Madison and Chatham. As to the conditions in Dover, it was reported that this was not yet ready for paving on account of drainage construction and therefore was not entered into. On motion duly seconded, the report was received and placed on file.

Route 2, Bordentown-Right of Way

The Secretary requested information from the Commission as to whether any decision was to be reached on the matter of claim for property damage at the Black and Purcell properties on Route 2 at Bordentown. Commissioner Kidde reported having viewed the conditions existing at these properties and while he could not see any material damage to either property, in the case of that of purcell, the house was now too close to the road. Commissioner Stewart stated that even though the house was now standing in a worse location than before the road was improved, there was a ruling from the Attorney General to the effect that the Commission could not be held responsible for damages caused by changes in grade, and he moved that the communication be forwarded to the representatives of Bordentown to the effect that the State Highway Commission is advised by the Attorney General that the State cannot pay damages under the circumstances of this case and it is, therefore, unable to do anything for Messrs. Black and Purcell. This was seconded by Mr. Kidde and adopted.

Shore Relief Route

The Secretary presented a communication from Mr. L. P. Bozz, Engineer for the Madison Improvement Association, offering a new line for a relief route for Shore Traffic. On motion by Mr. Jelin, seconded by Mr. Stewart, the communication was ordered received and referred to the State Highway Engineer for study and information.

Grassy Sounds Bridge, Cape May County

The Secretary presented a resolution from the Cape May Board of Freeholders, advising of the fact that they had declared abandonment on the contract for the Grassy Sounds Bridge. On motion by Mr. Jelin seconded by Mr. Stewart, the State Highway Commission ratified, confirmed, and approved the action of Cape May County Board of Freeholders in abandoning the contract on the Grassy Sounds Bridge.

Route 1, George St., New Brunswick.

The Secretary presented a communication from T. H. Hagerty, Attorney for the City of New Brunswick, advising that the City was now ready to proceed with the improvement of George Street with the aid of the State as already granted, and was ready to finance the Public Service Corporation for its share of the work, same to be paid by the State to the City and the City to be reimbursed by the Public Service Corporation. The Secretary informed the Commission that an opinion had been received from the Attorney General's Department to the effect that an agreement could be entered into with the City covering this matter. On motion by Mr. Stewart, seconded by Mr. Kidde, the State Highway Commission directed that the State cooperate in the improvement of George Street, New Brunswick, by advancing to the City of New Brunswick the cost of repaving the trolley tracks on George Street, subject to approval of the arrangements by the Attorney General.

Route 9, Right of Way.

The Secretary informed the Commission that he had received a communication from the Attorney General's Department recommending settlement to be made in the case of condemnation of the Manion property on Route 9. Commissioner Jelin informed the Commission that he would not favor a continuance of the appeal which was directed at a previous meeting of the Commission and he moved that the award of $5,500.00 as made by the Condemnation Commissioners for the Manion property, be ratified, confirmed and approved by the State Highway Commission, and that the appeal be discontinued. This was seconded by Mr. Stewart and adopted.

On motion by Mr. Stewart, seconded by Mr. Kidde, the Commission recessed for luncheon at 1:00 P.M., to meet in regular session again at 2:30 P.M. The meeting was reconvened again at 2:30 P.M. as agreed, with the same members present as at the morning session.

Flemington-White House Road

Commissioner Jelin requested that the State Highway Engineer make a report with recommendation on the award of contracts for the Flemington-White House Road in Hunterdon County. State Highway Engineer Sloan informed the Commission that the work done by Mr. Thompson in 1923 had been acceptable although not carried out according to time schedule, but he believed by the placing of penalty clauses in the present contract, that delays would be eliminated, and he recommended that award be made of contracts for the Flemington-White House Road, Sections 1 and 2, to Warren Thompson, low bidder, in accordance with the award made by Hunterdon County. Commissioner Jelin, therefore, moved that the contract for the Flemington-White House Road, Sections 1 and 2 be approved by the State Highway Commission in accordance with the recommendation of the State Highway Engineer. This was seconded by Mr. Stewart and adopted.

Complaint-Chemical Laboratory Service

The Secretary presented a communication received from Stillman

& VanSiclen Chemical Laboratory Company, inquiring as to whether the State Highway Commission intends to test materials at its laboratory for municipalities as well as State work, and advising that such procedure would be detrimental to the business of that company. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission directed that the communication be acknowledged and that the Stillman & VanSiclen Laboratory Company be advised that it is the purpose of the State Highway Commission to keep in direct touch with the work in which it is sharing in the cost of, and where the municipalities make the request upon the State for service which the State can give, it is felt the duty of the State Highway Commission, in the interests of economy, to attend to such service, no effort, however, being made to go outside for any private work.

Complaint-Route 13 Detour.

The Secretary presented a communication with a petition from residents along the Ridge Road, Mercer County, complaining of the condition of this road which is used as a detour during the construction of Route 13 from Princeton to Trenton. On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission directed that the communication be acknowledged with the advice that the Maintenance Department is given instruction to give this road the very best of attention.

Route 5, Madison.

The Secretary presented a communication from the Clerk of the Board of Freeholders of Morris County, advising that the County of Morris is now ready to provide 15% of the cost of the track paving through Madison, which was to be applied to the 60% granted by the State. On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission directed that the communication be acknowledged with the advice that the State Highway Commission did not definitely promise 60% of the cost at the time but "when funds are available."

Route 4, Alignment, Toms River

The Secretary presented communications from Dr. Frank Brouwer and the Toms River Chamber of Commerce concerning the alignment of

Route 4 at Toms River, as laid out by the State Highway Commission and urged early improvement on this new line. On motion by Mr. Kidde, seconded by Mr. Jelin, the communication was ordered received and acknowledged with thanks.

Passaic River Bridge, Route 1, Morris Canal Company

The Secretary presented a communication from Dr. H. B. Kummel, General Manager of the Morris Canal & Banking Company, advising that the Morris Canal & Banking Company has no objection to the closing of the Morris Canal opening at the Passaic River Bridge, but since the rights of the canal vested prior to the bridge rights, therefore there was no obligation on the part of the Canal Company to close the Channel. State Highway Engineer Sloan recommended that the State Highway Commission authorize the closing of the Canal opening at the Passaic River Bridge at the expense of the State Highway Commission. On motion by Mr. Kidde, seconded by Mr. Stewart, the recommendation of the State Highway Engineer was approved subject to sufficient and proper releases to be furnished by the Morris Canal & Banking Company for any claims in the future against the closing.

Grade Crossing Elimination

The Secretary presented a communication from H. B. Osborne, President of the Board of Public Utility Commissioners, transmitting a report of the Board in connection with the elimination of grade crossings and thanking the State Highway Commission for its co-operation in the closing of a number of grade crossings during the past year. On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission directed that the communication be acknowledged with suitable expressions on the part of the Commission to the effect that the State Highway Commission stands willing to cooperate in grade crossing eliminations at all times where possible.

Invitation-Camden Advisory Board

The Secretary presented a communication from the Hon. A. E. Heal, Mayor of Westville, renewing the invitation extended to the State Highway Commission to be the guests of Westville at a shad dinner in the early future. Commissioner Kidde then inquired as to whether the Commission was ready to set a date for hearings to be held at Camden on the matter of Advisory Board Projects, and he suggested Friday, May 23d, as a suitable date. This was agreeable and he moved that Friday, May 23d, be set as the date for a conference with the City Commissioners of Camden on the Advisory Board plan. This was seconded by Mr. Jelin and adopted. The Secretary was instructed to notify Mayor Heal of Westville that the Commission will be glad to have lunch at 12:00 o'clock at Westville, in advance of its Camden Conference at 2:30 P.M. on the same day.

American Ass'n. of State Highway Officials.

The Secretary presented a communication from the American Association of State Highway Officials, recommending planks on good roads for inclusion in the platforms of the National Convention. On motion duly seconded, the recommendation was ordered received and placed on file.

Signals- Bridge
Belvidere Avenue, Washington

The Secretary presented a communication from Jacob H. Hahn, Borough Clerk of Washington, New Jersey, calling attention to the dangerous crossing conditions over the canal on Belvidere Avenue in that Borough. On motion by Mr. Stewart, seconded by Mr. Jelin, the State Highway Commission authorized the placing of two Redflex signals for protection on Belvidere Avenue Canal Bridge in Washington, New Jersey.

Nichol Avenue, New Brunswick

The Secretary presented a communication from Mrs. Douglass, Dean of the New Jersey College for Women at New Brunswick, making further request for consideration on the improvement of the road forming an extension of Nichol Avenue at the New Jersey College for Women. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission directed that the communication be referred to the State Highway Engineer with the request that investigation and report be made, and the secretary was directed to acknowledge the communication from Mrs. Douglass with the advice that the matter is now being given careful consideration.

Maintenance Material-State Highway

State Highway Engineer Sloan presented to the Commission an estimate from the Maintenance Division in which was shown the requirements for dust-laying for use on State Highway Routes and Detours. He reported everything in readiness for the advertising of 1995.9 tons of Calcium Choride, 559,380 gallons of Lignin Binder, and 782,505 gallons of Asphalt Oil SCO. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission approved the recommendation of the State Highway Engineer and authorized advertisement for Lignin Binder and dust layers for State Highway Routes and Detours in 1924, as recommended by the State Highway Engineer.

Route 11, Belleville.

Commissioner Kidde reported that he was in receipt of a communication, together with ordinances from the Town of Belleville on Route 11. He stated that the entire matter was now up to the point where cooperation was necessary from the traction company operating on this street. He advised further that he understood that the Traction Company was willing to move its tracks from the outside to the center of the street and use new track material, but has not yet decided as to the amount of paving in which it will share, due to the fact that under its present franchise it is necessary only that they maintain the existing macadam pavement. He suggested that negotiations be undertaken with the traction company looking toward agreement on this matter. On motion by Mr. Jelin, seconded by Mr. Stewart, the State Highway Commission directed the matter referred to Commissioner Kidde for further conference with the traction officials. Commissioner Kidde suggested that the Construction Division check the ordinances as adopted by Belleville. The Secretary advised that these ordinances had already been taken up with the Attorney General's Department when they were submitted to the Town Council of Belleville.

The Schedule of Business was next taken up for consideration, item by item as follows:

Route 5, Section 9,
Barkers Corner-Hackettstown.

On recommendation of the State Highway Engineer, Commissioner Jelin moved the final acceptance of Route 5, Section 9, Barkers Corner-Hackettstown section, which was finally completed in accordance with plans and specifications as of November 10, 1923. This was seconded by Mr. Stewart and adopted.

May 13, 1924.

Right of Way-Route 9, Section 11 —

State Highway Engineer Sloan recommended the approval of purchase for Parcel #6, Route 9, Section 11, Lincoln Avenue, Plainfield, from Louis Kadesh, for the consideration of $293.00. Commissioner Stewart stated that he would prefer to have appraisal on this property from Mr. McLaughlin of Plainfield. On motion by Mr. Jelin, seconded by Mr. Kidde, the State Highway Commission directed that the matter be referred to Commissioner Stewart with authority to employ Mr. McLaughlin for an appraisal.

Right of Way-Route 9, Section 12 —

State Highway Engineer Sloan recommended approval of purchase agreement on Route 9, Section 12, Plainfield-Westfield section, Parcel #3 from H. C. Lockwood for the consideration of $3000.00. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission directed that this be referred to Commissioner Stewart to be appraised by Mr. McLaughlin.

Right of Way-Route 9, Section 12. —

On recommendation of the State Highway Engineer, Commissioner Jelin moved the approval of purchase of the following properties on Route 9, Section 12, Plainfield-Westfield Section for the nominal consideration of $1.00:

Parcel #4, H. C. Lockwood Co.
" #7, H. C. Lockwood Co.
" #8, Miss A. L. Miller.

Right of Way-Route 12, Section 7. —

On recommendation of the State Highway Engineer, Commissioner Kidde moved the approval of purchase agreements on Route 12, Section 7, Stephensburg-Hackettstown, of Parcels #13, 15, and 16, on the Estate of H. H. Hance, Mary A. Hance and William Hance, Executors, for the consideration of $437.00. This was seconded by Mr. Stewart and adopted.

Amboy Bridge
Overhead Bridge-Route 4-Right of Way —

State Highway Engineer Sloan submitted to the Commission an agreement prepared by the Central Railroad of New Jersey, covering certain rights and privileges granted for the construction of overhead bridge with the right to lay and maintain an 18 inch cast iron pipe over the Central Railroad Right of Way on the new Amboy Bridge on Route 4, for the consideration of $100.00, which amount was previously authorized by the State Highway Commission on March 25th, 1924. He called attention of the Commission to the fact that this agreement was satisfactory except for the question as to whether the Commission would accept the obligation of saving the railroad company harmless from any damage arising in any way from the construction of the bridge. Commissioner Stewart stated that he did not feel that the Commission should undertake such responsibility unless the same be approved by the Attorney General's Department, and he moved that the same be referred to the Attorney General for ascertaining the propriety of the clause in the agreement concerning the responsibility for damage arising out of the construction of the bridge, and also to ascertain if this would make a personal responsibility on the part of the Commissioners. This was seconded by Mr. Kidde and adopted.

Abandonment-Route 4

On recommendation of the State Highway Engineer, Commissioner Stewart moved the approval of the following resolution for the abandonment of all those portions of the old road (Ocean Highway) on Route 4, as taken over on May 1st, 1920, lying outside the limits of the required right of way of the new road:

> RESOLVED, that in accordance with the provisions contained in Article 3, Chapter 14, Laws of 1917, and the amendment thereto in Chapter 220, Laws of 1919, whereby the State Highway Commission may, by resolution, take over as a State Highway any route, routes or parts thereof, or vacate parts thereof, you and through you, the Township of Galloway is respectfully advised that effective May 13, 1924, the State Highway Commission will abandon in the name of the State of New Jersey, and vacate as part of the State Highway Route 4, certain portions and thus relinquish responsibility for the improvement and maintenance of such portions of the road taken over May 1st, 1920, between Mullica River and Smithville in Galloway Township, Atlantic County, being more particularly described as follows:

All those portions of the Old Road (Ocean Highway) as taken over May 1st, 1920, lying outside the limits of the acquired right of way of the new road as constructed sixty-six (66) feet wide, between Mullica River and Smithville.

It being the intention of the State Highway Commission to vacate and abandon those portions of the old road, as taken over May 1st, 1920, lying outside the limite of the acquired right of way of the new road as constructed sixty-six (66) feet wide between Mullica River and Smithville, as shown on the construction plans of Route 4, Section 9, on file in the offices of the said State Highway Commission at Trenton, N.J.

This was seconded by Mr. Kidde and adopted.

Route 4, Connecting Link-Perth Amboy

State Highway Engineer Sloan presented to the Commission a report on the matter of the continuation of work on Route 4, Connecting Link at Perth Amboy, by Graham & McKeon the contractors, and he recommended that the City of Perth Amboy be advised that the State Highway Commission will not approve of placing of a permanent pavement on this part of the highway at this time, unless proper subbase material is placed and that in the event the City is not prepared to place and pay for such sub-base material, that a temporary base of cinders or gravel be installed until such time as the sub-base has become sufficiently compacted and put otherwise in proper shape to carry the permanent pavement. On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission approved the recommendation of the State Highway Engineer and directed that a communication to this effect be forwarded to the City authorities of Perth Amboy.

Route 6, Fenwick Creek Bridge

State Highway Engineer Sloan presented to the Commission a communication from H. B. Keasbey, Salem County Engineer, transmitting a bill in the amount of $16,456.26, same being the amount of the judgment in the suit of Campbell vs. the County of Salem on account of claim growing out of the construction of the Fenwick Creek Bridge. On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission approved the bill as presented by the Salem County Engineer, and directed that the matter of Campbell vs. County of Salem be settled.

Route 12, Section 7.

State Highway Engineer Sloan recommended to the Commission that the Public Service Production Company, contractor for the construction of Route 12, Section 7, Stephensburg,-Hackettstown section, be permitted to sublet the bridge items of its contract to Ashbrook Cranmer of Mayetta, New Jersey, and items of earth excavation, hard rock excavation, borrow, sub-base with and without excavation, rip rap, rock wall, removal of trees, and clearing and grubbing to Culp Construction Company of Dover, New Jersey. On motion by Mr. Stewart, seconded by Mr. Jelin, the State Highway Commission approved the recommendation of the State Highway Engineer for subcontractors on Route 12, Section 7.

Appointments

The Commission next discussed their various appointment dates as follows: On Friday, May 16th, at 12:00 o'clock, at Jersey City Mayor's office. On Tuesday, May 20th, at the Town Hall, New York. On Friday, May 23d, at Camden, and on Friday, May 30th, at the Memorial Day Exercises at Camp Merritt, New Jersey. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission determined to hold a regular meeting on May 21st at 1:00 P.M.

Route 5, Section 11-Detour

On recommendation of the State Highway Engineer, Commissioner Stewart moved the approval of the following official detour for Route 5, Section 11, Delaware-Belvidere section:

> "Beginning on Route 5, at Bridgeville, where the same is intersected by the Hope-Bridgeville Road, and runs thence (1) northeasterly over the Hope-Bridgeville Road a distance of approximately 6.3 miles to Hope; thence (2) northwesterly 2.5 miles to Mt. Herman; thence (3) northwesterly 4.3 miles to Route 5 at Ramseyburg."

This was seconded by Mr. Jelin and adopted.

Route 16, Section 6-A-Detour.

On recommendation of the State Highway Engineer, Commissioner Kidde moved the approval of the following official detour for Route 16, Section 6-A, Bernardsville-Passaic River:

> "Beginning at the intersection of State Highway Route 16 with Mt. Airy Road in Bernardsville; thence (1) southerly along Mt. Airy Road about 4400 feet to its intersection with Oak Stump Road; thence (2) easterly along Oak Stump Road, through Basking Ridge, a distance of 5200 feet more or less to the intersection of Main Street (Basking Ridge): thence (3) northwesterly along road from Basking Ridge to Blaziers Corner a distance of 5500 feet more or less to its intersection with State Highway Route 16 at Blaziers Corner."

This was seconded by Mr. Stewart and adopted.

Whitewashing Poles-State Highway

State Highway Engineer Sloan recommended to the Commission that the whitewashing of poles along State Highways be started for the season, and that the work be carried on practically the same as last year, at an estimated cost of between $14.00 and $15.00 per mile. Commissioner Kidde stated that he was not in full accord with the practice of the past in marking poles to a height of six feet above ground, it being his feeling that such procedure tends to mar the landscape. Commissioner Stewart voices the opinion that chauffeurs who constantly use the highways, desire this service from the State, since it insures more safe travel by pointing out the edges of the highway, and he moved that the recommendation of the State Highway Engineer be approved. This was seconded by Mr. Jelin and adopted, Mr. Kidde being recorded in the negative.

Motor Vehicle Aid-Bergen County

On recommendation of the State Highway Engineer, Commissioner Kidde moved approval of Motor Vehicle Aid schedule and agreements for Bergen County for 1924. This was seconded by Mr. Jelin and adopted.

Motor Vehicle Aid-Cape May County

On recommendation of the State Highway Engineer, Commissioner Kidde moved approval of Motor Vehicle Aid schedule and agreements for Cape May County for 1924. This was seconded by Mr. Jelin and adopted.

Motor Vehicle Aid-Gloucester Co.

On recommendation of the State Highway Engineer, Commissioner Stewart moved the approval of Motor Vehicle Aid schedule and agreements for Gloucester County for 1924. This was seconded by Mr. Kidde and adopted.

Motor Vehicle Aid-Monmouth County

On recommendation of the State Highway Engineer, Commissioner Jelin moved the approval of Motor Vehicle Aid schedule and agreements for Monmouth County for 1924. This was seconded by Mr. Stewart and adopted.

Motor Vehicle Aid-Union County

On recommendation of the State Highway Engineer, Commissioner Stewart moved the approval of Motor Vehicle Aid schedule and agreements for Union County for 1924. This was seconded by Mr. Jelin and adopted.

Motor Vehicle Aid-Salem County

On recommendation of the State Highway Engineer, Commissioner Stewart moved the approval of Motor Vehicle Aid schedule and agreements for Salem County for 1924. This was seconded by Mr. Jelin and adopted.

Motor Vehicle Aid-Somerset County

On recommendation of the State Highway Engineer, Commissioner Jelin moved the approval of Motor Vehicle Aid schedule and agreements for Somerset County for 1924. This was seconded by Mr. Kidde and adopted.

Motor Vehicle Aid-Sussex County

On recommendation of the State Highway Engineer, Commissioner Kidde moved the approval of Motor Vehicle Aid schedule and agreements for Sussex County for 1924. This was seconded by Mr. Jelin and adopted.

Employments.

State Highway Engineer Sloan presented to the Commission the schedule of employments as approved by him since the last meeting of the Commission and recommended that the same be ratified. On motion by Mr. Kidde, seconded by Mr. Stewart, the following employments as made by the State Highway Engineer were ordered approved:

5-13-24	Edw. W. Foy,	Motor Truck Driver	$ .45	hr.
5-8-24	Edw. L. Fox,	" " "	.45	
5-13-24	J. R. Dilts,	" " "	.45	
5-1-24	Stephen Lozaw,	" " "	.40	
5-1-24	Talbert McAnney,	" " "	.40	
5-1-24	Wm. H. Salmon,	" " "	.40

5-16-24	J. A. Thiel,	"	.45 to .50
5-16-24	Harry Baker,	Mechanic,	.65 to .70

Route 14, Cape May County.

On recommendation of the State Highway Engineer, Commissioner Kidde moved approval of plans and specifications for the placing of additional concrete pavement in connection with certain intersections of County Roads with State Highway Route 14 in Cape May County, all of this work to be paid for by the county. The State Highway Engineer explained that due to the fact that it is located in part on Route 14 it is proper that the Commission should approve of the plans and specifications. This was seconded by Mr. Stewart and adopted.

Expenses-John L. Vogel

State Highway Engineer Sloan presented to the Commission vouchers of the cost of moving the household of John L. Vogel, Bridge Engineer from Newark to Manasquan, New Jersey, and he recommended that payment of same be approved in accordance with the action of the Commission of December 18, 1923, wherein the Commission approved reimbursement for moving expenses to those men who moved with the bridge office from Newark to Trenton. On motion by Mr. Kidde, seconded by Mr. Jelin the recommendation of the State Highway Engineer was ordered approved.

Leave of Absence-Vincent Loughran

State Highway Engineer Sloan reported to the Commission that leave of absence granted to Vincent Loughran expired on April 30th, 1924. On motion by Mr. Stewart, seconded by Mr. Jelin, the report was ordered received and placed on file.

Equipment-State Highway

State Highway Engineer Sloan presented to the Commission a communication from the Supervisor of Roads of Burlington County, requesting the use of an oil distributor. He explained that the State has now three oil distributors and could arrange to permit the use of this equipment from time to time to the counties, and he recommended that such equipment be furnished to the counties on their request when same is available at a charge of $25.00 per day. On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission approved the recommendation of the State Highway Engineer and authorized the use of oil distributor equipment by counties at $25.00 per day.

Amboy Bridge-Route 4.

State Highway Engineer Sloan again presented to the Commission the question of lowering the elevation of the footings of certain piers on the Amboy Bridge, together with an estimate of the cost of doing this work, in the amount of $63,000.00. He informed the Commission that the fact that the property immediately adjoining the new bridge is owned by a ship building company, gives reason to feel that the channel at this point may be deepened, thus exposing the piles of the bridge substructure, and he felt that this part of the bridge should always be of a permanent nature and anything necessary to insure its permanence should be undertaken at this time while the contract was in such shape so that the work could be done as an extra item on the contractors estimate. Commissioner Kidde contended that the dredging for deep water at the location is a remote possibility and even so the piles would give service similar to that shown in the Hudson River, covering a period of from 30 to 50 years. A general discussion took place between the Commissioners as to the probable economic value of this additional work in view of the life of the piles, even though the channel might be deepened. Commissioner Jelin expressed the feeling that it was the desire on the part of the Engineering Department to strengthen the bridge structure in addition to what had originally been planned, and for this reason he was in favor of the recommendation. Commissioner Kidde finally moved that the recommendation of the State Highway Engineer be accepted and that the piers recommended be lowered subject to proper extra work orders to be approved by the State Highway Engineer at the lowest expense possible. This was seconded by Mr. Stewart and adopted.

Township Aid-Middlesex County

On recommendation of the State Highway Engineer, Commissioner Stewart moved acceptance and final payment on the Mill Lane Road, Section 1, in North Brunswick Township, Middlesex County, Township Aid. This was seconded by Mr. Jelin and adopted.

Federal Aid-Amboy Bridge

State Highway Engineer Sloan advised the Commission that it was now necessary to request of the Federal Government that a set-up be made for funds for partial payment on account of the Amboy Bridge, and he requested information as to what amount of Federal Aid funds would be applied to this work. On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission directed that an agreement be made with the Federal Government for a setting up of $1,600,000. of Federal Aid funds toward the Amboy Bridge, subject to a review of such contract by the Attorney General's Department. This was seconded by Mr. Stewart and adopted.

Old Bridge-Matawan Road.

On recommendation of the State Highway Engineer, Commissioner Jelin moved approval of the apportionment of $15,000. as the State's share of the cost of the construction of the Old Bridge-Matawan Road in Monmouth County, it being a continuation of the work being done this year in Middlesex County, and thus completing an improved road from New Brunswick to Matawan via Old Bridge. This was seconded by Mr. Stewart and adopted.

Maintenance Materials-Sussex County

On recommendation of the State Highway Engineer, Commissioner Kidde moved the approval of contracts by Sussex County for maintenance materials to be used during 1924. This was seconded by Mr. Jelin and adopted.

Maintenance Materials-Salem County

On recommendation of the State Highway Engineer, Commissioner Kidde moved the approval of award of contracts by Salem County for 13,342 gallons of L. H. O. to the Headley Good Roads Company for $1,460.95. This was seconded by Mr. Jelin and adopted.

On recommendation of the State Highway Engineer, Commissioner Stewart moved approval of award of contract by Salem County for 208,000 gallons of S. C. O. from the Asphalt Service, Incorporated, at $16,848.00. This was seconded by Mr. Kidde and adopted.

Township Aid-Sussex County.

On recommendation of the State Highway Engineer, Commissioner Stewart moved approval of plans and specifications for Tranquility-Andover Road, Green Township, Sussex County, Township Aid. This was seconded by Mr. Kidde and adopted.

Burlington County-Motor Vehicle Aid

On recommendation of the State Highway Engineer, Commissioner Kidde moved approval of plans and specifications for Kings Highway in Burlington, work to be done from the Motor Vehicle Aid funds, alternate bids to be received for concrete and sheet asphalt on concrete base. This was seconded by Mr. Stewart and adopted

Motor Vehicle Aid-Union County

On recommendation of the State Highway Engineer, Commissioner Kidde moved approval of plans and specifications for the construction of West Brand Street and First Avenue, Union County Motor Vehicle Aid. This was seconded by Mr. Stewart and adopted.

Motor Vehicle Aid-Mercer County

On recommendation of the State Highway Engineer, Commissioner Kidde moved approval of award of contract on Cedar Grove Road, Princeton Township, Mercer County, Motor Vehicle Aid work. This was seconded by Mr. Stewart and adopted.

Cancellation,
Township Aid-Camden County

On recommendation of the State Highway Engineer, Commissioner Kidde moved the approval of cancellation of balance of $125.00 remaining to the credit of the Gibbsboro-Kresson Road in Voorhees Township, Camden County. This was seconded by Mr. Stewart and adopted.

Township Aid-Middlesex County

On recommendation of the State Highway Engineer, Commissioner Jelin moved the approval of award of contract for the Union Valley-Gravel Hill Road, Monroe Township, Middlesex County Township Aid. This was seconded by Mr. Kidde and adopted.

Township Aid-Morris County

On recommendation of the State Highway Engineer, Commissioner Jelin moved the approval of the request of Randolph Township, Morris County, for permission to repair the road used as an unofficial detour during the construction of Route 5, Mine Hill Section, with the funds as set up by the State for this purpose. This was seconded by Mr. Kidde and adopted.

Township Aid-Somerset County

On recommendation of the State Highway Engineer, Commissioner Kidde moved that the matter of bids received on Bolmer's Corner-Blawenburg Road, Somerset County, Township Aid, be laid over for one week since the low bidder, Warren Thompson, had advised that he was desirous of subletting this contract, and will present a communication to this effect at the next meeting. This was seconded by Mr. Jelin and adopted.

Extension of Time,
Route 4, Section 22.

State Highway Engineer Sloan presented to the Commission the application of Joseph F. Burke, contractor on Route 4, Section 22, Main Street, Asbury Park, for extension of time of 30 days. At the same time there was presented a report of the Construction Division informing the Commission as to the slow progress made on this work. On motion by Mr. Kidde, seconded by Mr. Jelin, the application for extension of time was ordered laid over and all extensions on this work were denied, pending completion of the entire project.

Route 10, Bluff Road

The Secretary informed the Commission that a number of property owners on Route 10, Bluff Road section, had agreed to repurchase the property taken by the State at the price paid for it by the State, and one property owner particularly had given a check for the property and the Attorney General had ruled that a deed was to be executed by each of the Commissioners and attested by the Secretary of State. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission approved of the execution of a deed to George F. Hardy for the sum of $675.00 for property on Route 10, Bluff Road section.

On motion by Mr. Kidde, seconded by Mr. Jelin, the meeting adjourned at 6:30 P.M., to meet in regular session again on Wednesday, May 21st, 1924, at 1:00 P.M.

Respectfully submitted,

A. LEE GROVER,

Secretary.

MINUTES OF MEETING - May 23, 1924.

A regular meeting of the State Highway Commission was held in the Commission meeting room, Broad Street Bank Building, Trenton, on Friday, May 23rd, 1924. The meeting was called to order at 10:00 A.M. by Chairman Scott.

Present: General H. L. Scott, Chairman, and Messrs.
Percy H. Stewart, Walter Kidde and Abraham Jelin.

Right of Way, Route 5, Section 11.

The Secretary presented a communication from F. W. VanBlarcom, Attorney for the Estate of Gertrude Alliger on Route 5, Section 11, Delaware-Belvidere section, in which he advised that they were willing to accept the proposition of the State Highway Commission to pay $2,500.00 for property needed for purposes of right of way. On motion by Mr. Stewart, seconded by Mr. Kidde, the State Highway Commission approved of the payment of $2,500.00 for purchase of the property of Gertrude Alliger on Route 5, Section 11. In this connection Commissioner Kidde suggested that an expression of appreciation be forwarded to the New Jersey State Agricultural Department for services rendered in this case.

Invitation- U. S. Good Roads Convention

The Secretary presented a communication from Hon. F. M. P. Pearse, Secretary to the Governor, on the matter of the United States Good Roads Association Convention at Albuquerque, New Mexico, transmitting a letter from the United Stated Good Roads Association, urging upon the State Highway Commission to be in attendance at the Convention. On motion by Mr. Stewart, seconded by Mr. Kidde, the communication was ordered received and acknowledged with a statement of regret that other extremely important engagements will prevent acceptance by the State Highway Commission of the very courteous invitation.

Invitation- State Association of Freeholders

The Secretary presented a communication from the State Association of Chosen Freeholders, inviting the Commission to attend the next meeting of the Association to be held at Vineland on June 9th. On motion by Mr. Kidde, seconded by Mr. Stewart, the communication was ordered forwarded to the Commissioners at their home address, and notification to be forwarded to the State Board of Freeholders that each Commissioner has been notified of the invitation.

High Point Park Roads.

The Secretary presented a communication from the Commissioners of High Point Park, expressing thanks for the loan of trucks and extending an invitation to the Commissioners to visit High Point Park. On motion by Mr. Kidde, seconded by Mr. Stewart, the communication was ordered received and placed on file.

State Highway Route 18-North

The Secretary presented a communication from Mr. E. S. Rionda, urging the early construction of the portion of Route 18, North of Englewood. On motion by Mr. Kidde, seconded by Mr. Stewart, the communication was ordered received and placed on file.

The Schedule of Business was next taken up for consideration, item by item, as follows:

Route 7, Section 2.

State Highway Engineer Sloan presented to the Commission a report of the following bids received on May 19th for the construction of Route 7, Section 2, Golf Course-Anderson's Corner section, and recommended award of contract to J. N. Reuter, Inc. of Elizabeth, N. J. at the lowest bid of $168,954.98:

J. N. Reuter, Inc.	$ 168,954.98
S. S. Thompson Co.	174,941.70
Union Paving Co.	176,449.02
C. H. Winans Co.	176,893.64
Ross & Whelan.	180,209.94

On motion by Mr. Stewart, seconded by Mr. Kidde, the State Highway Commission unanimously adopted the following resolution:

RESOLVED, that the State Highway Commission does hereby make award of contract for the construction of Route 7, Section 2, Golf Course-Anderson's Corner, to J. N. Reuter, Inc., at their's the lowest bid in the amount of $168,954.98, and

BE IT FURTHER RESOLVED, that the Chairman is authorized to sign the necessary contracts after approval by the State Highway Engineer.

Equipment - Scales

State Highway Engineer Sloan reported to the Commission that advertisement had been placed for the installation of the following motor truck weighing scales:

Thirty Ton Scales

Paterson Plank Road, at or near Carlstadt,
State Highway Route 6, at or near Westville,
State Highway Route 1 near Metuchen,
State Highway Route 4, near Rahway.
State Highway Route 4, near South Amboy,
State Highway Route 9 near Bound Brook.

Forty Ton Scales

State Highway Route 1, Lincoln Highway between
Newark and Jersey City.

and he recommended ratification of this action. On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission unanimously ratified, confirmed and approved the recommendation of the State Highway Engineer in directing advertisement for six (6) thirty-ton and one forty-ton suspension motor truck weighing scales.

Route 13, Bridges Section 5.

State Highway Engineer Sloan reported to the Commission the final completion of bridges #158 and 159 on Route 13, Section 5, and recommended acceptance of the same by the Commission. Commissioner Jelin and Chairman Scott both reported having inspected these bridges on several occasions and Mr. Jelin moved the final acceptance of bridges #158 and 159 on Route 13, Section 5, and directed final payment to be made after approval by the State Highway Engineer. This was seconded by Mr. Kidde and adopted.

White's Bridge,
Route 8, Section 3.

State Highway Engineer Sloan reported to the Commission the completion of White's Bridge atM. P. 16.1, on Route 8, Section 3, and recommended that the same be given final inspection by the Commission. On motion by Mr. Stewart, seconded by Mr. Jelin, the inspection of White's Bridge on Route 8, Section 3, was referred to Commissioner Kidde.

Route 10, Delia Ave. Bridge

State Highway Engineer Sloan informed the Commission that the bridge at M. P. 9.9 and 10.0, at the Delia Avenue Crossing, and its approaches, on Route 10, as constructed by the McGarry Construction Company, is now completed for final inspection. On motion by Mr. Stewart, seconded by Mr. Jelin, the Inspection of Delia Avenue Crossing on Route 10, was referred to Commissioner Kidde.

May 23, 1924.

Passaic River Bridge, Route 1.

State Highway Engineer Sloan reported to the Commission that final statement had been prepared of the cost of repairs to the Passaic River Bridge, with the result that the Frederick Snare Corporation, contractors on this emergency work, had succeeded in doing the work in an amount less than the estimate, and therefore, had earned for themselves an increased fee, represented as 50% of the saving between the estimated and actual total cost, exclusive of extra granite work, the total cost of the work, including fees, being $101,469.13. On motion by Mr. Stewart, seconded by Mr. Kidde, the report was ordered received and approved with the further direction that a communication of appreciation be forwarded to the Frederick Snare Corporation for the expeditious and efficient manner in which the work on the Passaic River Bridge was prosecuted.

Route 7, Section 1, Corlies Avenue.

State Highway Engineer Sloan presented to the Commission papers covering the final acceptance on Route 7, Section 1, Corlies Avenue, Asbury Park, which was finally completed in accordance with plans and specifications as of August 27th, 1923. He also presented a bond, executed in quadruplicate, as furnished by the Royal Indemnity Company, in the amount of $44,943.75, the retained percentage bond executed by the same company in the amount of $4,911.70, together with an agreement with reference to the collateral to be deposited on account of the guaranteeing of the concrete base. He also presented three certificates of the People's Building & Loan Association, aggregating $7,300.00, together with assignment of these certificates to the State Highway Commission. State Highway Engineer Sloan recommended to the Commission that in view of the fact that the foregoing papers are all in accordance with the requirements of the State Highway Commission, the work on Route 7, Section 1, Corlies Avenue, Asbury Park, be accepted by the State Highway Commission subject to all agreements as filed. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission approved the recommendation of the State Highway Engineer for the acceptance of Route 7, Section 1, Corlies Avenue, Asbury Park, and directed that the People's Building & Loan Association be given notice of the assignment of the shares of the East Jersey Bridge Company to the New Jersey State Highway Commission.

May 23, 1924.

Right of Way-Route 8.

State Highway Engineer Sloan presented to the Commission a proposed purchase agreement for property of Marjorie L. Davies on Route 8 at Mountain View, and recommended that an offer of $850.00 be made and in the event the same is not accepted that condemnation proceedings be instituted. Mr. Kidde recommended that an appraisal of this property be secured from Mr. Hughes of the firm of Hughes & Taylor of Montclair. On motion by Mr. Stewart, seconded by Mr. Jelin, this purchase agreement was ordered referred to Commissioner Kidde for investigation and report with appraisals.

Right of Way-Route 16, Section 7

On recommendation of the State Highway Engineer, Commissioner Stewart moved the approval of purchase agreement on Route 16, Section 7, Bayard Lane, Princeton, Parcel #3, from the Moses Taylor Pyne Estate, for the consideration of $1.00, with the thanks of the Commission. This was seconded by Mr. Kidde and adopted.

Right of Way-Route 7, Section 3.

On recommendation of the State Highway Engineer, Commissioner Stewart moved the approval of the purchase of the following parcels of property on Route 7, Section 3, Anderson's Corner-Colt's Neck Road:

Parcel	#7, William Rachkovsky et als,	consideration	$ 70.00
"	# 8 & #9, Vincenzo Longo & Wife,	"	104.00
"	#28 & #29, William Lippincott & Wife,	"	95.00
"	#30 & #31, Jeremiah Ervin & Wife,	"	30.00
"	#34, Henry CanBrunt & Wife,	"	60.00
"	#36 and 37, Elwood Hurley & Wife,	"	60.00
"	#40, Reinold Heidenreich et als,	"	1.00
"	#42, Joseph W. Conrow & Wife,	"	88.00
"	#43, William F. Bischoff & Wife,	"	86.00

This was seconded by Mr. Kidde and adopted.

Route 13, Lawrenceville-Princeton

In connection with the construction of Route 13 between Lawrenceville and Princeton, Commissioner Stewart inquired whether there was any method by which this work could be prosecuted so that it could be of more convenience to those people living on the road. State Highway Engineer Sloan informed the Commission that this could be accomplished if the contractor was notified to complete the shoulder work on the one-half of the road which has been finished. On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission directed that the Engineering Department notify the contractor on the Lawrenceville-Princeton section of Route 13 that the shoulder work on the finished side of the road be undertaken forthwith in order that local traffic may be maintained under the contract provisions.

Right of Way-Route 5, Section 11

State Highway Engineer Sloan recommended to the Commission the approval of purchase agreement on Route 5, Section 11, for Parcel 10-A from Dorson S. Drake & Wife, and Elmer King and Wife, the owners to take care of moving the buildings, etc., for the consideration of $9500.00. On motion by Mr. Stewart, seconded by Mr. Jelin, this purchase agreement was ordered referred to Commissioner Jelin for inspection and report.

Right of Way-Route 4

On recommendation of the State Highway Engineer, Commissioner Jelin moved the approval of purchase agreements for Parcel #6 on Route 4 at the location of the Morgan grade crossing elimination cut-off, from Herman H. Brehme, for the consideration of $200.00. This was seconded by Mr. Stewart and adopted.

Right of Way-Route 9, Section 11

State Highway Engineer Sloan presented to the Commission for approval, purchase agreement on Route 9, Section 11, Parcel #5 and Parcel #2 for the consideration of $218.00 and $300.00, respectively. On motion by Mr. Kidde, seconded by Mr. Jelin, the State Highway Commission directed that these purchase agreements be referred to Commissioner Stewart for investigation and report.

Right of Way-Route 9, Section 8-A

On recommendation of the State Highway Engineer, Commissioner Jelin moved the approval of the lease of land required for the construction of a temporary bridge over the North Branch of the Raritan River at M. P. 29.6, known as Parcel #2-A on Route 9, Section 8-A, from E. M. Sutton at a total rental of $50.00 for two years. This was seconded by Mr. Stewart and adopted.

Employments

State Highway Engineer Sloan presented to the Commission the following list of employments as made by him since the last meeting of the Commission and recommended ratification of the same by the Commission:

5-22-24	Lebeus Martin,	Jr. Inspector,	$ 135.00	mo.
4-21-24	Harry Johnson,	" "	130.00	
5-19-24	Frank P. DeRenzis,	Rodman,	90.00	
5-13-24	Koster Frosig,	" Amboy Br.	125.00	
5-10-24	Geo. Hendershot,	Rollerman	150.00	
5-16-24	C. E. Whitehair,	"	150.00	
5-13-24	H. M. Baker,	Stenog.-Bkkp.	130.00	
5-16-24	Wesley Bates,	Gravel Patrolman,	80.00	
5-16-24	Irvin W. Sanford,	Junior Inspector,	125.00	
5-16-24	E. J. Groeschel,	Rodman,	90.00	
5-16-24	A. E. Oakes,	"	90.00	
5-19-24	Geo. Armington,	St. Shovel Oper.	150.00	
5-16-24	John H. Wallace,	Gravel Patrolman,	75.00	
5-3-24	George Lewis,	Garage Assistant,	.45	hr.
5-6-24	Russel Simpson,	Mechanic,	.75	
5-7-24	Walter Peer,	Motor Truck Driver	.40	
5-12-24	F. E. Fleck,	" " "	.45	
5-14-24	Fred Calhoun,	" " "	.45	
5-15-24	Willard Bush,	" " "	.45	
5-21-24	Walter J. Manning,	" " "	.45	
5-21-24	Juan Casma,	" " "	.45	
5-21-24	Chas. M. Flynn,	" " "	.45	
5-19-24	Daniel McDonald,	" " "	.45	
5-15-24	Lester J. Rich,	" " "	.45	

On motion by Mr. Stewart, seconded by Mr. Jelin, the State Highway Commission unanimously ratified, confirmed and apprpved the recommendation of the State Highway Engineer.

Right of Way-Route 9, Section 13

State Highway Engineer Sloan presented to the Commission a report concerning a change in plan on Route 9, Section 13 at the property occupied by Miss Emma Stryker, recommending that a curve on Route 9, Section 13, White House-Somerset County Line section, at the Stryker Estate, be eliminated by the moving of the Stryker house by the State contractor on an extra work order for the sum of $1410.00, this having been agreed to by all the interested parties of the estate and in order to expedite the work. On motion by Mr. Kidde, seconded by Mr. Stewart, the recommendation of the State Highway Engineer for a change in plan in accordance with the report of the Construction Engineer, was adopted.

Pan-American Highway Commission

State Highway Engineer Sloan reported to the Commission that the Pan-American Commission, consisting of delegates from Latin-American countries to view highway construction in the United States, was desirous of spending one day in going over the highways of the State of New Jersey. In this event the program provides for their arrival in Trenton on the evening of June 27th, go from Trenton to Bayonne on the morning of the 28th, thence from Bayonne to Atlantic City on the same day. He recommended to the Commission that motor cars of the State Highway Commission be furnished for the accommodation of this distinguished party and also that representatives of the State Highway Department accompany the party during this inspection trip. On motion by Mr. Stewart, seconded by Mr. Jelin, the State Highway Commission approved the recommendation of the State Highway Engineer and authorized that the matter be carried out in accordance with his suggestions and recommendations.

Route 5, Blackwell St., Wharton

State Highway Engineer Sloan presented to the Commission a letter with a petition from the citizens of the Borough of Wharton, New Jersey, expressing opposition to the granting of permission by the State Highway Commission to the Morris County Traction Company to lay a switch in West Blackwell Street in Wharton, New Jersey. On motion, duly seconded, the petition was ordered received and placed on file at this time, since authority has already been granted.

Materials-Transportation

On recommendation of the State Highway Engineer, Commissioner Jelin moved approval of car demurrage average agreements with the P. R. R. and authorized the Chairman to execute the same on behalf of the State Highway Commission. This was seconded by Mr. Stewart and adopted.

Route 16-Detour, Somerville

On recommendation of the State Highway Engineer, Commissioner Jelin moved that the Borough of Somerville be granted aid from the Motor Vehicle Reserve Account in the amount of $1,000.00 for the maintenance of a detour which is estimated to cost $2583.00, on which detour all State Highway traffic will flow on account of the closing of Bridge Street, Somerville, on State Highway Route 16, due to the track elevation work of the Jersey Central Railroad, said detour work to be performed under the supervision and to the satisfaction of the State Highway Commission.

Route 1, Albany Street Bridge

State Highway Engineer Sloan presented to the Commission a detailed report with estimate and sketch showing work to be done on the stairs of the New Brunswick Boat Club landing at the Albany Street Bridge. The estimate of this work as given by the contractor was placed at $1,032.90. On motion by Mr. Stewart, seconded by Mr. Jelin, the State Highway Commission directed that an allotment of $500.00 be made to the New Brunswick Boat Club for the replacement of stairs removed by the contractor on the widening work of the Albany Street Bridge, all work to be done by the New Brunswick Boat Club.

Middlesex County Repairs.

State Highway Engineer Sloan presented to the Commission a report of a conference held with the Middlesex County Board of Freeholders on the matter of the revision of the road maintenance and betterment schedule for 1924, and he informed the Commission that the Freeholders had agreed on taking two roads from the general schedule and spending the sum of $40,000.00 on these. He also informed the Commission that he had ascertained that the Middlesex County Board of Freeholders had added to the budget of this year for roads, an amount which would pay a number of bills not met during the year beofre. He recommended to the Commission that of the statement showing the $124,772.58, there be approved $91,457.85 expended by the Freeholders this year, in which the State should share to the extent of 54.3% or in the amount of $49,661.61. On motion by Mr. Kidde, seconded by Mr. Stewart, the State Highway Commission directed that the recommendation of the State Highway Engineer be approved and that the sum of $49,661.61 be paid to Middlesex County on account of revised Motor Vehicle Schedule and agreement for 1924, and at the same time that a communication be forwarded to the County which will explain the fact that this money is being paid to the County for the reason that the State Highway Commission is not desirous that the public of Middlesex County suffer due to the activities of the Board of Freeholders, and also to explain that the State Highway Commission is not desirous of paying on account of balances left from the past year.

Maintenance Materials-Hunterdon Co.

On recommendation of the State Highway Engineer, Commissioner Stewart moved approval of award of contracts by Hunterdon County for stone, slag and bituminous materials to be used in 1924. This was seconded by Mr. Jelin and adopted.

Roosevelt Boulevard, Cape May Co.

On recommendation of the State Highway Engineer, Commissioner Jelin moved the rejection of plans and specifications for the Roosevelt Boulevard, West Avenue on 34th Street to 17th Street on Asbury Avenue in Cape May County, due to lack of funds with which to grant State Aid.

Beach Avenue, Section 3, Cape May Co.

On recommendation of the State Highway Engineer, Commissioner Stewart moved the rejection of plans and specifications for Beach Avenue, Section 3, and Broadway, from Windsor Avenue on Beach Avenue, Cape May City, to First Avenue on Broadway, Cape May County, due to lack of funds with which to grant State Aid. This was seconded by Mr. Jelin and adopted.

National Park Road, Gloucester Co.

On recommendation of the State Highway Engineer, Commissioner Jelin moved the approval of the rejection of plans and specifications for National Park Road, Gloucester County, due to lack of funds with which to grant State Aid. This was seconded by Mr. Jelin and adopted.

Hudson County-Motor Vehicle Aid

On recommendation of the State Highway Engineer, Commissioner Jelin moved the approval of plans and specifications for County Road, Hudson County (from Tonnelle Avenue to County Avenue), work to be done from Motor Vehicle Aid Account. This was seconded by Mr. Stewart and adopted.

Bridgeton-Port Norris, Section 2

On recommendation of the State Highway Engineer, Commissioner Jelin moved approval of award of contract by the Board of Freeholders of Cumberland County for the Bridgeton-Port Norris Road, Section 2, Federal Aid Project #61. This was seconded by Mr. Stewart and adopted.

Sussex County-Motor Vehicle Aid

On recommendation of the State Highway Engineer, Commissioner Stewart moved the approval of award of contract by the Board of Freeholders of Sussex County for Lakeside Boulevard, Section 1, Sussex County, Motor Vehicle Aid. This was seconded by Mr. Jelin and adopted.

Gloucester Co.-Motor Vehicle Aid

On recommendation of the State Highway Engineer, Commissioner Stewart moved approval of award of contract by the Board of Freeholders of Gloucester County for Crown Point Road, Section 6, Gloucester County, Motor Vehicle Aid work. This was seconded by Mr. Jelin and adopted.

Maintenance Materials-Gloucester Co.

State Highway Engineer Sloan presented to the Commission the matter of award of contract by the Board of Freeholders of Gloucester County for the furnishing of 15,000 gallons of S.C.C. by the Headley Good Roads Company of Philadelphia and 10,000 gallons of lignin binder by the Good Roads, Inc. of Philadelphia. He advised the Commission that he understood that the county proposed to use approximately 100,000 gallons of lignin binder, and he recommended that all counties be notified that in accordance with opinion rendered by the Attorney General, the State Highway Commission will not approve of the application of maintenance materials on county work in excess, by 25% of the amount advertised for. On motion by Mr. Stewart, seconded by Mr. Jelin, the State Highway Commission approved the award of contract by Gloucester County for 15,000 gallons of S.C.C. and 10,000 gallons of lignin binder and directed that all the counties of the State be notified that the State Highway Commission desired that they estimate with reasonable accuracy the amount of the various materials they will purchase under contract, and bids will be advertised for on the basis of such quantities, and in no case will an allowance of more than 25% in excess of the quantities estimated be approved.

Salem County-Motor Vehicle Aid

On recommendation of the State Highway Engineer, Commissioner Jelin moved approval of award of contracts by Salem County Board of Freeholders for Pennsgrove-Pedrickstown, Section 2; Pedrickstown-Woodstown, 1st Section; Salem-Hancocks Bridge, 1st Section, work to be done from Motor Vehicle Aid account. This was seconded by Mr. Stewart and adopted.

Monmouth Co.-Motor Vehicle Aid

On recommendation of the State Highway Engineer, Commissioner Stewart moved approval of plans and specifications for Reckless Place, Red Bank, New Jersey, Monmouth County Motor Vehicle Aid work. This was seconded by Mr. Jelin and adopted.

Hunterdon Co.-Motor Vehicle Aid

On recommendation of the State Highway Engineer, Commissioner Stewart moved the approval of plans and specifications for the Flemington-Frenchtown Road, Central Section, Hunterdon County, Motor Vehicle Aid work. This was seconded by Mr. Jelin and adopted.

Cumberland County-Motor Vehicle Aid

On recommendation of the State Highway Engineer, Commissioner Stewart moved the acceptance and final payment on the Bridgeton-Port Norris Road, Sections 1 to 5, Cumberland County, Motor Vehicle Aid work. This was seconded by Mr. Jelin and adopted.

Ocean County-Township Aid

On recommendation of the State Highway Engineer, Commissioner Jelin moved approval of award of unadvertised contract for the construction of surface on the Laurelton-Allen Osborne Road in Brick Township, Ocean County, Township Aid work. This was seconded by Mr. Stewart and adopted.

On recommendation of the State Highway Engineer, Commissioner Stewart moved approval of award of unadvertised contract for grading on the Laurelton-Allen Osborne Road, Brick Township, Ocean County Township Aid. This was seconded by Mr. Jelin and adopted.

Route 12, Section 6.
